Spacecraft attitude ion sensor using charged thermal ions of earth atmosphere as reference, stressing reliability, economy and response

01 p0079 A69-10293

Solid body automatic orientation, discussing data units for angular error and angular velocity

01 p0122 A69-11302

Multipulse thruster module design and development tests for spacecraft attitude control, noting micropulse solid propellant rocket motor

02 p0194 A69-11762

Stabilization and control techniques for future unmanned commercial space vehicles, emphasizing appli-

cation of projected technological advances in instrumentation

[AIAA PAPER 67-878]

02 p0334 A69-12367

Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite

[AIAA PAPER 67-723]

02 p0305 A69-12375

Attitude control system for gravity gradient stabilized satellite in synchronous and near synchronous equatorial orbits, discussing libration damping methods

03 p0504 A69-12857

Magnetic orientation and attitude control of spin stabilized satellites, synthesizing control circuits and calculating power requirements

03 p0521 A69-13644

Artificial intelligence application to design of off-line and on-line learning control systems for controlling spacecraft attitudes

04 p0581 A69-14568

Time optimal turn maneuver for rocket with tilting engine and control nozzles, noting rotation moments distribution

04 p0665 A69-14832

Apollo guidance, navigation, stabilization and control subsystems, detailing inertial, optical and computer units for data processing and collecting

04 p0665 A69-14881

Soviet book on attitude control of meteorological satellites noting reference systems, sensing units and control algorithms

04 p0666 A69-15012

Boom flutter effects on attitude dynamics of OV1-10 satellite, noting introduction of angular momentum by tip mass elliptical vibration

04 p0666 A69-15520

UV astronomy, discussing vehicle stabilization, un-stabilized sounding rockets, scanning satellites, balloons, stabilized rockets, pointing satellites, optics and detectors

05 p0821 A69-15839

Predictive logic control of on-off system with one position sensor

[ASME PAPER 68-WA/AUT-14]

05 p0830 A69-16134

Attitude perturbations of spin stabilized satellite describing highly eccentric orbit

06 p1014 A69-17568

Attitude control system design problems for earth oriented satellites

06 p1015 A69-17586

Active magnetic coils for attitude control of synchronous satellites by computer simulation and laboratory tests

06 p1017 A69-17944

ORBIS-CAL designed to achieve three axis orientation to local vertical and velocity vector in eccentric orbit by gravity gradient stabilization

07 p1226 A69-18323

Semipassive three axis stabilization for dumbbell type satellites, considering pitch, roll and yaw motions damping

07 p1226 A69-18324

Semipassive attitude control system providing one degree pointing accuracies in all axes

07 p1226 A69-18326

Three axis gravity gradient stabilization system to minimize stray magnetic fields

07 p1226 A69-18329

Three axis gravity gradient stabilization systems for OV-1 spacecraft design

07 p1227 A69-18330

Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner

07 p1227 A69-18334

Hybrid simulation study of satellite attitude control system to replace momentum wheels and gas jets by commandable gravity gradient boom

07 p1227 A69-18335

Equilibria of orbiting gyrostabilized satellite with internal angular momenta along principal axes

07 p1227 A69-18336

Communication satellites attitude control and stabilization due to antenna beam pointing, with future systems forecast, discussing exchange, distribution and collection systems

07 p1228 A69-18339

Eddy current damping systems for gravity gradient stabilized satellites, discussing electromagnetic torque and various parametric relationships

07 p1228 A69-18341

Semiactive gravity gradient stabilization system /SAGS/ for active pitch control and semipassive roll/yaw control

07 p1228 A69-18342

Long life gravity gradient stabilization system using Vee configured control moment gyros to semipassively damp vehicle librations

07 p1228 A69-18345

Gravity gradient stabilization role in space missions in 1970s and 1980s

07 p1229 A69-18348

GEOS 2 attitude stabilization by means of gravity gradient principle and passive energy dissipator, noting effects of orbit eccentricity, thermal distortion, radiation, etc

07 p1229 A69-18349

Vertistat H gravity gradient configuration prevents elastic deformation, permitting high pointing accuracy at synchronous altitudes

07 p1229 A69-18351

Optimum attitude program for multistage satellite launch vehicle with impact restrictions

07 p1229 A69-18492

Fluidic devices application to attitude and guidance control of satellites, rockets and space probes

07 p1230 A69-19292

Satellite attitude control, discussing mission requirements, typical guidance sensors, actuating torque, systems reliability, etc

09 p1609 A69-21617

Damped mass expulsion for space vehicle attitude control reducing propellant consumption and pulsing frequency

[AIAA PAPER 67-535]

09 p1610 A69-21986

Computer program for continuous attitude determination for spin stabilized OGO-C satellite after malfunction of attitude control system, calculating angle between high rate data periods

09 p1610 A69-21987

Attitude determination and hydrogen peroxide control system for spacecraft orientation in Syncom, Early Bird and ATS

[AIAA PAPER 67-532]

09 p1610 A69-21988

Automatic flight control system /AOOSY/ for German Azur satellite

09 p1459 A69-22563

Ionic propulsion application to geostationary satellite attitude correction

10 p1753 A69-23841

Numerical solution for changing satellite orientation within circular orbit plane by applying force of onboard flywheel

10 p1792 A69-24194

Harmonic balance procedure to study periodic motions in nonlinear stabilization system of nonrigid satellite

10 p1792 A69-24195

Space station attitude control through resistojets and control moment gyros /CMG/, discussing propulsion, safety features, weight factors, etc

11 p1965 A69-24531

Spacecraft attitude control with minimum energy control logic for small constant disturbance torques, considering reaction jet torquers and fuel consumption

11 p1966 A69-25446

Dynamic modeling for spin stability of satellites with flexible parts, noting torques induced by attitude control

11 p1994 A69-25533

Perturbation theory of nonlinear control systems with periodic coefficients and small perturbation terms, exemplifying satellite attitude control

12 p2173 A69-26067

Control moment gyro /CMG/ and use in space vehicle attitude control system, emphasizing control laws

[AIAA PAPER 67-589]

12 p2129 A69-26777

Wobble-spin technique for spacecraft inversion for earth photography using flywheel

12 p2174 A69-26780

Photochemical attitude control rocket adaptable to self contained command signal or remote signal transmission, discussing light irradiation of propellant for thrust control

12 p2148 A69-26801

Solar array energy performance as function of orbital parameters and spacecraft attitude

13 p2203 A69-27419

Spacecraft attitude control and stabilization by three degree of freedom control moment gyro with controllable gyro spin angular velocity

13 p2355 A69-27445

Spacecraft and satellite attitude control, discussing payloads, optimization and simulation problems

13 p2356 A69-27919

Magnetometers role in Aurorae satellite attitude stabilization, discussing operation principle, characteristics and performances

15 p2611 A69-31087

Dynamics of spin stabilized satellite with long crossed dipoles or slender beams, including linearized equations of motion

15 p2703 A69-31332

Multipad externally pressurized spherical bearing fed with incompressible fluid for satellite attitude control systems tests

16 p2793 A69-31728

Permanent magnets optimal design and properties for attitude control of German research satellite Azur, considering environmental influences

16 p2868 A69-31936

Ion propulsion applied to geostationary satellites attitude control, discussing thrust levels, cesium ionization, colloidal propulsion, etc

16 p2837 A69-32068

Free gas formation in propellant systems and effects on attitude control systems [AIAA PAPER 69-434]

16 p2870 A69-32765

Satellite attitude control and stabilization - Conference, Paris, October 1968

17 p3045 A69-33219

Diademe satellites stabilization system to measure station-to-satellite distance by laser pulse, discussing reflector, magnet for attitude control, damping device, etc

17 p3046 A69-33224

Passive attitude stabilization of interplanetary probe, using conically shaped sails elastically connected to payload

17 p3047 A69-33225

Cosmos 149 satellite stabilization system, discussing three axis orientation and pitch, yaw and roll stabilizations by aerodynamic and/or gyroscopic moments

17 p3047 A69-33226

Attitude and simple stability of deformable earth pointing satellite

17 p3047 A69-33229

Gravity gradient stabilized satellite achieving best theoretical performance through Foucault current and magnetic hysteresis articulations

17 p3048 A69-33234

Magnetic materials simulation for satellite stabilization device based on magnetic hysteresis, using mathematical models and direct magnetic measurements

17 p2945 A69-33235

Orbital and attitude control tests for PAS (two stage perigee-apogee synchronous satellite) in conjunction with booster Europa 2, discussing functional configuration

17 p3048 A69-33238

Satellites and space vehicles attitude control mathematical model accounting for nonrigidity, sloshing and energy dissipation in vehicle interior

17 p3048 A69-33239

Satellite three axis attitude control analysis showing rolling and longitudinal stabilization possibility by flywheel, with validity tested by analog simulation

17 p3048 A69-33240

Fluidics for satellite and rocket attitude control and guidance, discussing computing block function and components, system reliability and resistance to aging, etc

17 p3049 A69-33243

Astronomical satellite direct digital attitude control using digital computer between sensor and actuator to achieve optimal filtering and stabilization

17 p3049 A69-33244

Microthrusters thrust requirements for attitude control and orbital transfer of gravity gradient geostationary satellite

17 p3019 A69-33336

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space

17 p3021 A69-33359

Attitude control system for 625 A-1 research earth satellite, detailing operation and test program

17 p3050 A69-33426

Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations

17 p3050 A69-33797

Satellite attitude control mass properties, showing weight tradeoff analyses role in selecting control system [SAWE PAPER 743]

18 p3208 A69-34885

Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity

18 p3210 A69-35094

Attitude stabilization of symmetrical nonrotating earth satellite using earth-pointing rotor as gravitational anchor

19 p3429 A69-35914

Jet engine risetime effect on spacecraft orientation control system performance, assuming monotonic or extremal thrust mode

19 p3370 A69-36619

Stationary resonant nonlinear oscillatory and rotary states, stability and pitching motions of controlled satellite in slightly elliptical orbit

20 p3616 A69-37177

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance [AAS PAPER 68-124]

20 p3616 A69-37178

Space vehicle electronic attitude measurement method for reference coordinate and fixed coordinate systems based on rectangular coordinates of RF wave propagation directions

20 p3574 A69-37703

Spinning satellite attitude perturbations due to oscillating mass in satellite rigid frame, discussing analytical approach and analog simulation results

20 p3618 A69-37912

Earth pointing spacecraft attitude control, discussing reference axis system

21 p3760 A69-38620

Time-independent feedback attitude control system for high accuracy earth pointing motion of stable and unstable satellites in elliptic orbits

21 p3804 A69-39020

Degrees of freedom requirements in hinge couplings of multibody satellites, examining main body attitude control

21 p3820 A69-39233

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit [AIAA PAPER 69-921]

21 p3821 A69-39351

Constraint torque elimination from vector equations canonical system for attitude dynamics of satellite consisting of arbitrarily interconnected rigid bodies [AIAA PAPER 69-923]

21 p3821 A69-39354

Magnetic hysteresis dynamic model suitable for digital computer simulation of near-earth satellite attitude motions damping compared with experimentally generated loops [AIAA PAPER 69-833]

21 p3821 A69-39364

Reaction boom attitude control systems for improving stabilization and maneuvering capability of earth pointing satellites, describing configurations [AIAA PAPER 69-834]

21 p3822 A69-39365

Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs [AIAA PAPER 69-843]

21 p3786 A69-39373

Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation [AIAA PAPER 69-844]

21 p3822 A69-39374

Mass expulsion and momentum systems for orbiting space station attitude control optimized, considering reaction jet and control moment gyro systems [AIAA PAPER 69-846]

21 p3822 A69-39376

Advanced reaction wheel controller for spacecraft attitude control, discussing brushless DC motor role in weight and power reduction and control precision [AIAA PAPER 69-855]

21 p3822 A69-39383

Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation [AIAA PAPER 69-856]

21 p3823 A69-39384

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect [AIAA PAPER 69-857]

21 p3823 A69-39385

Spacecraft attitude acquisition/reorientation and stabilization controller design implemented by control moment gyro, proposing control algorithm using control actuator nonlinearity

21 p3826 A69-39641

Suboptimal attitude control system for Nimbus satellite using motor-driven inertia wheels as control torque source for three dimensional control

21 p3826 A69-39642

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop

21 p3827 A69-39755

Two-pulse limit cycle oscillation stability relation to physical parameters of pulse modulated feedback system used for satellite attitude control

21 p3688 A69-39756

Fluid loop rotational kinetic energy dissipator reducing time required for reaching WRESAT 1 satellite spin stabilization axis

21 p3828 A69-39767

Satellite attitude stabilization synthesis by flywheels allowing independent control of angular motions, assessing perturbation type influence

21 p3768 A69-39831

Satellite attitude stabilization systems transient response optimization using combined feedback

21 p3830 A69-39833

Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc [AIAA PAPER 69-983]

22 p3907 A69-40363

Attitude stability of orbiting vehicle containing gyrost, discussing asymptotic stability

22 p4037 A69-40555

Spinning satellite containing elastically restrained, viscously damped mass, analyzing attitude dynamics and stability, noting wide nutation possibility

23 p4224 A69-42396

Spacecraft pitch and yaw angles measurement using environmental positive ion probes, discussing Gemini flight tests and attitude control systems

24 p4315 A69-43241

Torqued two axis gimbaled boom actuator satellite attitude control [AIAA PAPER 68-857]

24 p4348 A69-43245

Optimal hinged two body satellite configurations in circular and elliptical orbits, discussing need for adaptive attitude control for transient and steady state operation

24 p4393 A69-43247

Multidimensional approximation algorithm for parameter optimization of nonlinear stochastic systems, detailing application to space vehicle attitude controller

24 p4291 A69-43275

Pulse modulated feedback system for satellite attitude control, analyzing relationship between physical parameters to ensure two pulse limit cycle oscillation stability

24 p4295 A69-43318

SATELLITE ATTITUDE DISTURBANCE

U ATTITUDE STABILITY

U SPACECRAFT STABILITY

SATELLITE-BORNE PHOTOGRAPHY

Analytic photogrammetric determination of lunar control coordinates from Ranger photography

01 p0147 A69-10022

Synchronous observations of satellites by photographic techniques from satellite stations, discussing reference stars plane coordinates and exposure time recording

01 p0027 A69-10224

Cloud pictures from weather satellites reception according to automatic picture transmission (APT) system, discussing design and field strength measurements

[UN PAPER 68-95451]

01 p0108 A69-10458

Utility of satellite cloud pictures to meteorological work, discussing weather observation in Israel Meteorological Service

[UN PAPER 68-95571]

01 p0109 A69-10482

Earth orbital satellites for geologic applications, discussing Gemini photograph qualities and influence on Earth Resources Observational Satellite program

[UN PAPER 68-95441]

01 p0065 A69-10509

Lineament trend analysis of Gemini Red Sea synoptic terrain photography, noting computerized rotation from apparent to true angles

02 p0247 A69-12808

Tiros and ESSA weather satellites meteorological contributions, discussing photographic interpretation for weather predictions

04 p0626 A69-14690

Mare Orientale basin satellite photographs suggest asteroid impact formation

04 p0664 A69-15421

Space photography to provide synoptic sedimentary environmental data analysis, discussing orbital sensing advantages

05 p0753 A69-15993

Meteorological satellites data for safe navigation of ships, discussing techniques to overcome difficulties in interpreting ice and cloud photographs

[UN PAPER 68-95776]

06 p0916 A69-17028

European cyclonic system developmental phases determined from characteristic structural features of satellite cloud pictures

[UN PAPER 68-95711]

06 p0950 A69-17070

Satellite picture signal reception from ESSA, Nimbus and ATS to ascertain instrument requirements
06 p0888 A69-17651

ATS satellite distorted photographs conversion into normal and Mercator projections, using computer programs
10 p1689 A69-22945

Time registration delays during photographic observations of satellites, describing NAFA type satellite camera and mechanical and electrical systems
11 p1880 A69-24365

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations
[SMPTE PAPER 105-72] 12 p2078 A69-25772

Earth TV pictures from Molniia 1 communication satellite, showing advantages of high orbit over low orbit photography for global weather analysis and forecasting
13 p2292 A69-27729

Earth resource satellites, discussing mapping, land evaluation, geological observation, agricultural and hydrological applications, electromagnetic spectrum information, sensors and photographs
16 p2881 A69-31763

Daily European weather surveys based on meteorological satellite pictures transmitted during third quarter 1967
17 p3000 A69-33769

Meteorological satellite research, ATS-3 program earth color picture from oceanographic and geomorphological viewpoints and U.S.S.R. research
17 p3000 A69-33777

Daily European weather surveys based on pictures transmitted by satellite during fourth quarter 1967
17 p3000 A69-33778

Graphic representation of time dependence of subsatellite points and orbital azimuths for relating satellite photographs to locality
18 p3128 A69-34818

Satellite photograph analysis to investigate interaction between subtropical and polar front jet streams
18 p3166 A69-34827

Satellite photography for snow cover mapping and depth estimation
18 p3167 A69-35084

Gemini program for geologic orbital photography, discussing equipment used
18 p3131 A69-35274

Horizontal wind components over U.S.S.R., Western Europe and Northeast Atlantic obtained from satellite photographs of vortex cloud systems
19 p3365 A69-36668

Cirrus clouds occurrence, position and wind velocities on jetstream axes based on statistical analysis of aerological data and satellite TV pictures
19 p3366 A69-36669

Satellite IR hyperaltitude imagery for earth resources application, obtaining geological, meteorological and hydrological information
20 p3536 A69-36930

Synoptic and mesoscale cloud patterns near low level jet from Tiros 7 and 8 photographs, noting stratus formation and dissipation
20 p3570 A69-37404

Orbital images for earth resources satellite mission planning using Mercury, Gemini and Apollo synoptic terrain photographs
21 p3721 A69-38632

Long term computer produced multiple image satellite photomosaics for Southern Hemisphere, analyzing circulation, meridional bands, polar ice, cloud cover variations, etc
22 p3977 A69-40733

Cloud cover forms in circulatory-climatic zones of earth based on Zond 5 picture analysis, discussing air-mass exchanges and motions direction
23 p4184 A69-42486

Earth orbital remote sensing applications to forest and range resources management, discussing conventional aerial photography
[AAS PAPER 69-059] 24 p4307 A69-42823

Multispectral orbital photography used to obtain urban land-use data
[AAS PAPER 69-483] 24 p4307 A69-42837

Equatorial anticyclones over eastern Pacific caused by large scale cross-equatorial flows determined by ATS-1 photographs, noting frictional convergence factor
24 p4342 A69-42895

Gridding technique for satellite APT pictures taken with camera axis perpendicular to earth surface
24 p4314 A69-42992

SATELLITE-BORNE RADAR

Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles
03 p0388 A69-13183

SATELLITE COMMUNICATIONS
U SPACECRAFT COMMUNICATION

SATELLITE CONFIGURATIONS

Attitude control system for maintaining orientation of experimental package relative to space stabilized platform, noting transient response and steady state accuracy
06 p0955 A69-17587

Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
07 p1229 A69-19126

Optical sensing devices for angle measurement between celestial body and satellite axes
12 p2078 A69-25871

Dynamics of spin stabilized satellite with long crossed dipoles or slender beams, including linearized equations of motion
15 p2703 A69-31332

Temperature distribution of solid spherical satellite under solar radiant heating solved by variational calculus or point matching methods
16 p2877 A69-31922

Satellite configurations and rotation parameters determined by radar analysis
20 p3488 A69-37295

Equations of motion of elastic dumbbell satellite and two-mass spring-connected satellite in orbit, using energy and Floquet theory to investigate spinning motion stability
21 p3817 A69-39759

Satellite rotation from radar data analysis, requiring two full rotations and body characteristics to produce distinctive lobes in radar cross section
22 p3900 A69-40682

Book on commercial satellites covering characteristics, uses, design, rocket propulsion systems, flight trajectories, etc
23 p4224 A69-42367

Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload
[AAS PAPER 69-255] 24 p4313 A69-42859

Optimal hinged two body satellite configurations in circular and elliptical orbits, discussing need for adaptive attitude control for transient and steady state operation
24 p4393 A69-43247

SATELLITE CONTROL

Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles
03 p0388 A69-13183

Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
07 p1229 A69-19126

Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services
09 p1451 A69-21290

Cesium microthruster system using beam deflection for satellite control, describing ion engine subsystem and control logic/power conditioner subsystem
[AIAA PAPER 69-292] 09 p1569 A69-21875

Computer design for booster/satellite control, discussing systems reliability, low power and tradeoffs
11 p1843 A69-25320

Multidimensional mode shapes and frequencies of 100 ft space erectable parabolic antenna
11 p1994 A69-25532

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite
13 p2356 A69-27684

Ground station network and facilities for control of and acquisition and processing data from ESRO 1 satellite
13 p2220 A69-27751

ESRO 1 and 2 satellites onboard remote control system, discussing tone digital standard code and equipment design features
15 p2702 A69-31086

Test facility for qualification of satellite fairings jet-tisoning system, describing accelerating tower and recording and control instrumentation
16 p2765 A69-31739

Electrically propelled TV satellite control maneuvers to reach target position in synchronous circular orbit from spiral ascent trajectory
16 p2868 A69-31935

Momentum control system for satellite maneuvering and pointing in pitch and roll developed by modifying existing libration damping gyro stabilizer
18 p3207 A69-34684

NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
20 p3536 A69-36931

Automatic stationkeeping /geosynchronization/ for maintaining satellite in circular synchronous orbit at all geocentric longitudes for prolonged time with low fuel consumption
21 p3805 A69-39213

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3821 A69-39350

Orbital results for Automatic Orbit Control System of Lincoln Experimental Satellite LES 6, using pulsed plasma microthrusters and self contained orbit measurement and control methods
[AIAA PAPER 69-934] 21 p3824 A69-39428

Linear multichannel spatial motion control systems for vehicles orbiting in earth atmosphere at supersonic velocities
21 p3766 A69-39645

Optimal control system for earth satellite orbital transfer, using wandering ellipse technique to develop trajectory correction algorithm
21 p3767 A69-39652

Satellite motion orbital elements dependence on large short impulse arbitrarily directed in space, analyzing optimal orbits transfer and thrust control
21 p3818 A69-39821

Satellite stabilization by earth magnetic field through conservative magnetic moments application
21 p3830 A69-39834

SATELLITE DESIGN

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions
01 p0160 A69-10031

TRANSIT satellite navigation system for all-weather diurnal position fixing, noting Doppler frequency measurement and ionospheric signal refraction
01 p0112 A69-10457

Direct TV broadcasting from satellites with incoherent thermionic reactor and electrical propulsion
[UN PAPER 68-95559] 01 p0114 A69-10466

Remote sensors utilization in earth orbital space for discovery, inventory, evaluation, development and conservation of earth natural resources, noting satellite design
[UN PAPER 68-10464] 01 p0065 A69-10532

International Radiation Investigation Satellite /IRIS/ mission, structural design, power supply and control systems
01 p0162 A69-11101

Book on Demeter-earth resources satellite system covering design, instrumentation, cost estimates, economic benefits and political considerations
01 p0163 A69-11333

French satellites structure, power and communications systems, stabilization and detector groups
02 p0333 A69-11917

French geodetic satellites tracking operations, on-board equipment and ground stations
[UN PAPER 68-95835] 06 p1013 A69-17065

Anna 1-B geodetic satellite design, instruments and data acquisition
[UN PAPER 68-96195] 06 p0917 A69-17082

Orbital station projects, concepts and future uses
06 p1013 A69-17266

Soviet achievements in space research, comparing satellites with U.S. counterparts
06 p1005 A69-17561

Attitude control system design problems for earth oriented satellites
06 p1015 A69-17586

ORBIS-CAL designed to achieve three axis orientation to local vertical and velocity vector in eccentric orbit by gravity gradient stabilization
07 p1226 A69-18323

RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
07 p1226 A69-18328

Three axis gravity gradient stabilization system to minimize stray magnetic fields
07 p1226 A69-18329

Three axis gravity gradient stabilization systems for OV-1 spacecraft design
07 p1227 A69-18330

Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
07 p1229 A69-19126

Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] 07 p1230 A69-19195

Intelsat 2 satellite structural design for Apollo communications
08 p1408 A69-19907

Domestic satellite system for carrying maximum traffic by full use of rocket technology including Saturn 5 type propulsion systems, antennas, frequencies, etc
09 p1458 A69-22467

AZUR German research satellite main structure dynamic characteristics, solar panels, yo-yo despin system, electronic ignition devices and magnetometer boom
12 p2175 A69-26875

AZUR satellite structural development static and dynamic considerations, discussing center of gravity, notching technique and test results
12 p2187 A69-26876

ESRO 1/Aurora project for ionospheric phenomena connected with incoming protons and electrons, describing orbit and alignment with geomagnetic field
13 p2356 A69-27747

Nimbus D meteorological satellite construction, control system, orbit, etc
13 p2356 A69-27832

Satellite and spacecraft power supply and power converters
13 p2209 A69-27917

European space program developmental and fabrication problems in satellite structure development covering booster constraints, mission constraints, tolerances, etc
13 p2357 A69-28479

Earth Resources Technology Satellites design for complete spectrum of frequencies
14 p2453 A69-29952

COMSAT thermal vacuum chamber specification configurations, discussing chamber orientation, vacuum and roughing systems, pumping mechanism, wiring, installation, testing, etc
15 p2587 A69-30393

ESRO 1 satellite design coordination, assembly and tests
15 p2702 A69-31082

D-2 satellite stabilization system design and development, noting mission to determine hydrogen distribution around earth
17 p3046 A69-33223

International organization and project management procedures in design and construction of Heos 1 satellite for measuring charged particles energy distribution outside geomagnetic field
17 p3050 A69-33699

German research satellite Azur design and production management
17 p3050 A69-33700

Scientific satellites structural design problems, considering limitations imposed by weight, layout, environmental conditions, mission and manufacture
18 p3208 A69-34792

ESRO Large Astronomical Satellite /LAS/ observatory in orbit, discussing operation, design and instrument settings in scientific package
18 p3208 A69-34793

Tank configurations allowing for sloshing in liquid fuel reaction control system in spinning satellite
18 p3219 A69-34796

Ground controlled remote manipulator spacecraft system to perform unmanned satellite orbital maintenance, discussing refurbishment, laboratory simulation, system cost effectiveness and feasibility
19 p3430 A69-36001

Communication satellites equipment and techniques, considering global network, satellite design, millimeter wave systems, etc
19 p3275 A69-36314

OGO for conducting diversified experiments to study earth atmosphere, earth-sun relationship, etc
19 p3432 A69-36674

Ionospheric satellite series Alouette-ISIS, discussing successive engineering and management constraints leading to ISIS-C design
20 p3618 A69-37856

Alouette spacecraft design and dynamics emphasizing antenna characteristics
20 p3618 A69-37858

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems
21 p3818 A69-38621

Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
21 p3805 A69-39215

Ariel 3 satellite shape and systems including heat balance, data storage and compatibility problems
21 p3820 A69-39256

Circularly polarized VHF antenna systems for spin stabilized satellites, discussing design and performance test results
22 p3913 A69-40695

Book on commercial satellites covering characteristics, uses, design, rocket propulsion systems, flight trajectories, etc
23 p4224 A69-42367

OGO-6 design, research program, orbits and instrumentation, emphasizing relationship between particle activity, aurora and airglow, geomagnetic field, atmospheric and solar energy interrelations
24 p3493 A69-43132

SATELLITE DRAG

Accelerometric measurement of atmospheric drag with satellite 1968-59B, obtaining upper atmosphere density profile at 130-160 km
02 p0245 A69-12728

Satellite drag data to determine upper atmospheric composition according to density distribution with height
03 p0423 A69-13532

Upper atmosphere semiannual density variations, using satellite drag analysis
06 p0918 A69-17380

Air density at 470 km from orbit of satellite 1966-118 A, confirming large semiannual variation
09 p1488 A69-21659

Cylindrical satellite drag rotating about transverse axis in earth magnetic field, including aerodynamic and magnetic moments
12 p2174 A69-26443

Small body drag in wake of large satellite using two dimensional model noting methods for calculating distribution function moments in wake regions
12 p2012 A69-26798

Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements
15 p2600 A69-31351

Low altitude atmospheric density satellite OV1-16 measurements, showing agreement between onboard accelerometer and orbital drag data
15 p2602 A69-31385

Atmospheric density determination based on long period variations of drag coefficients from satellite Proton 2, considering satellite orientation
15 p2602 A69-31392

Drag measuring requirements and comparison of accelerometer or drag-free satellite control systems usage for atmospheric density determination
16 p2788 A69-31722

Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres
[AIAA PAPER 69-673] 17 p2893 A69-33488

Ground traces of artificial earth satellites with respect to perturbations due to atmospheric drag, earth oblateness and moon and sun as third body
19 p3398 A69-35614

Satellite orbits calculation in nonrotating atmospheres, considering atmospheric drag and zonal harmonics coupled effects
[AIAA PAPER 69-925] 21 p3808 A69-39352

SATELLITE GROUND SUPPORT

Monograph on photogrammetry in satellite geodesy including photogrammetric measurement of satellite positions, German observation stations and work done in U.S., U.S.S.R. and France
16 p2790 A69-32202

More earth station equipment and design for satellite communication in INTELSAT network including antenna, feed and tracking, interconnect system, etc
22 p3900 A69-40679

Traveling wave tubes in satellite earth stations, discussing single carrier tubes and multiple carrier technique
23 p4143 A69-42420

SATELLITE GUIDANCE

Range difference air navigation equations solution, discussing error updating of satellite position and constellation geometry
09 p1538 A69-21996

Peano-Baker method for integration of variational equations to produce partial derivatives used in satellite trajectory estimation
19 p3398 A69-35616

Minimum fuel guidance from hyperbolic into specified circular orbit
19 p3367 A69-35663

SATELLITE INSTRUMENTS

Selective chopper radiometer for remote atmospheric temperature sounding, discussing satellite versions for Nimbus D and Nimbus E
[UN PAPER 68-95797] 01 p0080 A69-10531

Remote sensors utilization in earth orbital space for discovery, inventory, evaluation, development and conservation of earth natural resources, noting satellite design
[UN PAPER 68-10464] 01 p0065 A69-10532

Scintillation gamma spectrometer on Luna 10, eliminating charged particle background by fabricating detector from NaI single crystal in scintillating plastic container
01 p0084 A69-11314

Balloon, rocket probe and satellite payloads, noting French contributions and CNES role
02 p0333 A69-11914

Satellite high resolution radar mapping of planets, discussing synthetic aperture and linear FM transmission radar techniques
03 p0430 A69-13399

Satellite-borne auroral particle spectrometer calibration to minimize uncertainty in measuring absolute particle flux of electrons and protons
04 p0599 A69-15022

Low DC current measurement on board satellite, noting absence of elaborate compensation
04 p0602 A69-15399

General purpose satellite computer, discussing on-board processor /OBP/ design, memory, central unit, input/output and software
05 p0725 A69-16710

Data handling equipment for Ariel 3 and future satellites emphasizing manufacturing of PFM and PCM systems
05 p0726 A69-16769

Anna 1-B geodetic satellite design, instruments and data acquisition
[UN PAPER 68-96195] 06 p0917 A69-17082

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelsat 3 satellite
06 p0897 A69-17590

Heat storage cells for satellite solar power plants based on latent heat of fusion and single phase heat carrying agent
06 p0870 A69-17604

Calibrating long wave actinometric instruments designed for Soviet meteorological satellites
06 p0929 A69-17978

Informative properties of IR scanning equipment of meteorological satellites, discussing radiative flux measurements and thermal mapping
06 p0929 A69-17979

IR scanning systems of meteorological satellites for detection of clouds and various underlying surfaces, determining detection probability and errors
06 p0952 A69-17986

Electronic tubes utilization in space flight, summarizing characteristics and satellite applications
07 p1093 A69-18421

Onboard calibration system for gamma ray spectrometers and X ray detector in earth satellites, describing fabrication and test results for radioactive sources
[IEEE PAPER 3A-6] 07 p1134 A69-19193

Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] 07 p1230 A69-19195

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing
[IEEE PAPER 3C-3] 07 p1135 A69-19197

Channel multiplier spectrometer for low energy electrons and protons at synchronous altitude on ATS-E satellite
[IEEE PAPER 3C-5] 07 p1135 A69-19199

Multichannel pulse height analyzer with memory, small size and low power consumption for application to satellites [IEEE PAPER 3C-6] 07 p1135 A69-19200

Structure of quasi-linear and wideband satellite transponders, discussing possible improvements 09 p1609 A69-21619

Primary cosmic rays, radiation belts and solar wind studies by semiconductor detectors installed on orbiting satellites 10 p1662 A69-23294

Radiation measurements quality by wide angle receivers of Cosmos 122 satellite analyzed, showing agreement with data by other methods 11 p1912 A69-24830

Astronomical wide field cameras of large aperture ratio to detect extended near UV light sources outside atmosphere 12 p2080 A69-26127

Logarithmic response electrometer for upper atmosphere satellite measurements using subminiature vacuum tube 12 p2092 A69-26476

Geographic and cartographic mapping applications of remote sensor data from orbital heights, discussing hardware, instrumentation, NASA role in data selection, etc 12 p2192 A69-26984

Latching high-voltage reed relays in satellite instrumentation systems 13 p2231 A69-28047

Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters 14 p2447 A69-29403

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth 14 p2447 A69-29404

Atmospheric radiative balance measurement on board Cosmos 149, describing design and operation of device 15 p2597 A69-30652

Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results 17 p3001 A69-33221

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13 18 p3113 A69-34239

Steady motion stability of satellite gyroscope in Cardan suspension traveling along circular orbit in Newtonian central force field 18 p3135 A69-34585

ESRO Large Astronomical Satellite /LAS/ observatory in orbit, discussing operation, design and instrument settings in scientific package 18 p3208 A69-34793

Spacecraft data storage requirements, discussing use of servo-driven tape recorders in data processing systems 18 p3107 A69-35096

Instruments for gamma ray astronomy including Ranger low energy detector, howitzer detector and cosmic spark chamber 18 p3138 A69-35135

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase 19 p3309 A69-36060

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites 19 p3377 A69-36182

Onboard satellite computer design and programming language criteria, considering cost, reliability, weight, volume and energy requirements 20 p3499 A69-37379

Missile-borne and satellite-borne computers analogies, comparing design, operational conditions and functional requirements 20 p3500 A69-37380

Swedish satellite onboard computer for particle experiment, discussing functional design based on buffer unit for experimental data 20 p3501 A69-37386

Onboard data processor design for Swedish satellite to study spatial and temporal variations of auroral particles 20 p3501 A69-37387

Onboard satellite computer for project Roseau experiments for magnetosphere study, discussing program switches, monitors and data compilers 20 p3501 A69-37388

Roseau satellite onboard computer systems design, emphasizing simulator and assembly programs for real time operation verification 20 p3501 A69-37389

Data handling system design for large astronomical satellite /LAS/, discussing spacecraft configuration, basic aims, program functions, subsystems, signal flow, flight repair, etc 20 p3501 A69-37390

Wire type memory model for satellite onboard computers, discussing nondestructive readout, power requirements, marginal temperatures, material and volume 20 p3503 A69-37403

Explorer 20 satellite for obtaining fixed frequency pulse soundings of ionospheric topside, discussing transceiver-dipole antenna instrumentation and payload 20 p3618 A69-37857

Sweep frequency ionospheric topside sounder design for Alouette and ISIS satellites, discussing influence of experiment requirements and spacecraft limitation and environments 20 p3507 A69-37859

Measuring devices for near earth space radiation measurements 20 p3591 A69-38018

Explorer 22 observations of ionosphere electron content, describing measuring equipment and data evaluation 22 p3935 A69-39977

OGO-6 design, research program, orbits and instrumentation, emphasizing relationship between particle activity, aurora and airglow, geomagnetic field, atmospheric and solar energy interrelations 24 p4393 A69-43132

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication 24 p4362 A69-43666

SATELLITE LAUNCHING

U SPACECRAFT LAUNCHING

SATELLITE LIFETIME

Environmental tests of space vehicles, determining parameter effects on ground storage and transportation, launching and orbital life 02 p0228 A69-11918

Elliptic integrals to determine orbital elements time dependence in three body problem, estimating satellite lifetime 10 p1791 A69-24196

Air density height distribution determined from satellite orbit decay analysis, noting semiannual density variations 22 p3935 A69-39971

Lifetime of artificial satellites by approximate integration method with application to Explorer 1, comparing analytical prediction 22 p4036 A69-39973

Battery subsystems optimization for earth satellite lifetimes greater than 5 years, analyzing flexibility, weight and reliability 23 p4068 A69-42243

SATELLITE MANEUVERS

U SPACECRAFT MANEUVERS

SATELLITE NAVIGATION SYSTEMS

Ship navigation by altitude and azimuth measurements of artificial earth satellite, discussing position and reference errors and synchronous satellite advantages [UN PAPER 68-95247] 01 p0112 A69-10461

Worldwide navigation system consisting of synchronous satellites equipped with pulse modulated microwave transmitters [UN PAPER 68-95205] 01 p0113 A69-10514

Ship and aircraft traffic conditions in Japan and neighboring areas and requirements for navigation satellite system [UN PAPER 68-95226] 01 p0113 A69-10520

Aircraft navigation using synchronous satellites based on position location by intersection of two circles with centers below satellites 01 p0114 A69-11011

Navy Navigation Satellite System TRANSIT providing all-weather continuous worldwide service for military and civil users 02 p0277 A69-11753

TRANSIT /Navy Navigation Satellite System/ military and commercial applications 02 p0278 A69-12359

Digital simulation of demodulator/tracking phase locked loop of navigation/traffic control satellite system in thermal noise diffuse multipath fading environment 03 p0390 A69-13204

SPOT /Speed, Position and Track/ transoceanic traffic surveillance and navigation system for aircraft and marine users 03 p0463 A69-13234

Transoceanic air traffic control system with independent surveillance of aircraft positions, decision making agency and undelayed communications, using satellites 03 p0464 A69-13236

Project Dioscures for permanent air traffic control centers, positive telecommunication links and satellite navigation 08 p1347 A69-20779

Satellite navigation system feasibility for accurate and continuous navigation capability for Army tactical aircraft 08 p1349 A69 21193

Optimum inertial/Doppler satellite navigation system, discussing position fixes application in resetting 08 p1349 A69-21199

Soviet book on radio navigation of flight vehicles covering systems classification, operational characteristics, satellite navigation, etc 12 p2129 A69-27076

Navy Navigational Satellite System for position location accuracy in marine and oceanographic exploration applications [AIAA PAPER 68-471] 13 p2295 A69-27247

Algorithm for solving autonomous artificial satellite orbital elements by using successive approximations 13 p2296 A69-27687

Space vehicles and marine navigation using navigation satellites, radar, Doppler navigation, etc 13 p2296 A69-27918

Navy Navigation Satellite System /NAVSAT/ applications, considering nonmilitary marine and air all-weather navigation and positioning 14 p2479 A69-29856

Satellite space navigation system providing three component position in geodetic coordinates instantly and accurately on or near earth 15 p2650 A69-30088

Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties 18 p3169 A69-34855

Correlation role in navigation satellite analysis noting reduction in ephemeris error effects [AAS PAPER 68-145] 21 p3761 A69-39222

SATELLITE NETWORKS

Navigation Service Satellite System for aiding aircraft and ships at sea in Pacific Ocean, noting equipment and functions [UN PAPER 68-95251] 01 p0112 A69-10470

World Weather Watch /WWW/ system and meteorological satellites, discussing observational networks, data centers, telecommunication facilities, research, education and training program [UN PAPER 68-95209] 01 p0178 A69-10478

Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft [UN PAPER 68-95363] 01 p0113 A69-10479

Optical spacecraft tracking organization in U.S.S.R., describing network of visual observation and photographic stations for satellite and space probe tracking 01 p0032 A69-10952

Navigation by satellite systems, discussing vehicle position determination and communications link for traffic control with comment on French space program 02 p0278 A69-11912

Maritime radio communications satellite service for ship safety, discussing stationary equatorial satellite systems [AIAA PAPER 68-232] 02 p0356 A69-12383

Communication satellites systems, discussing Intelsat satellite specifications and modulation methods for multiple access 03 p0383 A69-12870

Error correcting coding on DCSP satellite channels, discussing single access communication through wide-band SHF repeaters in synchronous earth orbit 03 p0387 A69-13177

Economic importance of European communications satellite system development 03 p0535 A69-13583

European regional satellite communication systems, discussing EUROVISION TV program broadcasting and multiple access telephony 03 p0395 A69-13585

Domestic satellite communication system model for greatest possible amount of traffic using Saturn 5 propulsion systems, multibeam antennas, synchronous repeater platforms, etc
04 p0561 A69-15447

Soviet Orbita communication satellite system network operation, design and technical and economic aspects
06 p0886 A69-17043

U.S.S.R. system Meteor consisting of four Cosmos satellites in polar orbits to observe cloud distribution, snow and ice field boundaries, etc
06 p1013 A69-17053

Dioscours system for international air traffic control and navigation over North Atlantic by means of two geostationary satellites
[UN PAPER 68-95832] 06 p0954 A69-17063

Canadian domestic satellite system requirements to extend existing terrestrial communications systems to improve coverage, capacity, flexibility and cost factors
06 p1043 A69-17832

Space communication, discussing global network of Intelsat satellites ground facilities, regional switching, RF channels, etc
06 p0890 A69-17860

Predictor determining future position of TDMA/Time Division Multiple Access/synchronous satellite communications system satellite from previously received bursts
07 p1076 A69-18553

World satellite telecommunications network, discussing recommendations with reference to signal transmission, acoustic echoes, etc
07 p1079 A69-18942

Communication satellites applied to broadcasting, considering point to point satellite link and distribution systems
08 p1272 A69-19925

Communication satellite systems role in world telecommunication network, discussing traffic type, volume and routing, earth stations location and capacities and orbit selection
09 p1449 A69-21271

Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance
09 p1461 A69-21281

Earth station antenna radiation patterns for studying mutual interference effects between radio relay stations and communication satellite earth stations
09 p1461 A69-21282

Communication satellite system design for operation with frequency bands above 10 GHz, noting wideband communication
09 p1450 A69-21284

INTELSAT for design, construction, launching and maintenance of global communication satellites, noting transponders
09 p1457 A69-22466

Domestic satellite system for carrying maximum traffic by full use of rocket technology including Saturn 5 type propulsion systems, antennas, frequencies, etc
09 p1458 A69-22467

Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
11 p1839 A69-25296

Satellite technology for government and defense communications systems, noting effects of rainfall attenuation, weather and solar interference on performance and reliability
12 p2028 A69-25932

Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
12 p2028 A69-25933

Technological feasibility of satellite based global data relay service for small users
12 p2028 A69-25949

Satellite networks for air traffic control and aircraft communications in North Atlantic
13 p2296 A69-27831

Dioscours project for worldwide telecommunications, air traffic control and navigation by satellites, discussing technical, operational and economic characteristics
16 p2749 A69-31601

Satellites and ground stations system providing transoceanic civil, air and marine traffic control in North Atlantic, discussing position determination, communication and navigation, etc
18 p3170 A69-35065

Satellite systems for air traffic control, navigation, communications and telemetry in view of regulations of frequency allocations
18 p3103 A69-35089

Communication satellites equipment and techniques, considering global network, satellite design, millimeter wave systems, etc
19 p3275 A69-36314

Satellite telecommunication systems coordination, discussing transformation feasibility of consortium or international organ into international organization
20 p3637 A69-37120

Juridical norms defined by Madrid, Belgrade and Washington conferences regulating exploration and utilization of extraterrestrial bodies and space, considering satellite communications networks
20 p3638 A69-37123

International cooperation regarding space telecommunication systems, discussing INTELSAT and INTERSPUTNIK roles in achieving international coordination and equality
20 p3638 A69-37125

Global communication satellite system with 12 to 16 hour period equatorial orbit, discussing satellite daily switchings, motions relative to earth, etc
20 p3497 A69-38189

Meteorological parameters-radio propagation characteristics correlation, studying feasibility of data acquisition by occultation satellite system
21 p3705 A69-38374

Orbital mechanics of near earth satellite arrangements /clusters/ for satellite service vehicle /SSV/ accessibility from orbital space stations
[AIAA PAPER 69-929] 21 p3809 A69-39358

Technical and economic factors of program to provide communications services via satellite facilities in continental U.S.
[AIAA PAPER 68-412] 21 p3678 A69-39762

Air traffic control transoceanic satellite system for minimizing navigation errors forcing wide separations, providing VHF voice communication and position surveillance
22 p3901 A69-41147

Communication satellite technology application to overlay network linking nationwide data machines for business mail service with virtually instantaneous delivery at low cost
23 p4117 A69-41669

Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S-band experiment
23 p4121 A69-41759

Multichannel time division multiple access system for communication satellite networks, considering PSK modems, PCM codes and channel capacity
23 p4129 A69-42511

Multiple access discrete address system /MADA/ for digital modulation communication systems for satellite networks, using time division techniques
23 p4130 A69-42512

Distributed communications for earth orbiting global satellite network defined parametrically, describing relay/switching and terminal station satellites
23 p4130 A69-42515

Satellite communication system capacity for segment of geostationary orbit extended to models involving two angular dimensions
23 p4131 A69-42521

Satellite system survival probability expressed as function of launch probability, time and number of satellites available
[AIAA PAPER 67-324] 24 p4249 A69-43665

SATELLITE OBSERVATION

Synchronous observations of satellites by photographic techniques from satellite stations, discussing reference stars plane coordinates and exposure time recording
01 p0027 A69-10224

Cloud pictures from weather satellites reception according to automatic picture transmission /APT/ system, discussing design and field strength measurements
[UN PAPER 68-95451] 01 p0108 A69-10458

Observation of satellites, orbit calculation and use in upper atmosphere research
[UN PAPER 68-95789] 01 p0064 A69-10459

Ship navigation by altitude and azimuth measurements of artificial earth satellite, discussing position and reference errors and synchronous satellite advantages
[UN PAPER 68-95247] 01 p0112 A69-10461

Satellite automatic picture transmission application to meteorological and hydrological problems including

wind estimates, atmospheric stability and cloud distributions
[UN PAPER 68-95300] 01 p0108 A69-10462

Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] 01 p0108 A69-10463

Tiros Operational Satellite system for global weather analysis data acquisition and cloud cover photography, noting sensor development for numerical weather prediction
[UN PAPER 68-95823] 01 p0108 A69-10473

Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology
[UN PAPER 68-95333] 01 p0064 A69-10487

Satellite photography applications to geography and cartography based on Gemini 7 photographs
[UN PAPER 68-95401] 01 p0178 A69-10489

Orbiting satellite global all-weather oceanographic data acquisition to complement higher resolution data from ships, buoys and aircraft remote sensors
[UN PAPER 68-95878] 01 p0064 A69-10491

Meteorological satellite observations value to Southern Hemisphere
[UN PAPER 68-95213] 01 p0109 A69-10513

Earth surveying methods by artificial satellites, discussing applications to undeveloped regions
[UN PAPER 68-95793] 01 p0065 A69-10523

Earth surface shape determinations by geodetic networks connecting ground observation points and satellite positions
[UN PAPER 68-95377] 01 p0065 A69-10528

Remote sensors utilization in earth orbital space for discovery, inventory, evaluation, development and conservation of earth natural resources, noting satellite design
[UN PAPER 68-10464] 01 p0065 A69-10532

Diapason satellite geodetic results concerning measurement accuracy, terrestrial potential models and station synchronization
01 p0065 A69-10543

Tiros satellite meteorological observations, discussing perturbation morphology and cloud mass organization
01 p0109 A69-10545

Topside ionosphere average height distributions of electron density and geomagnetic field intensity from Alouette 2 data over Japan, noting ionic composition
01 p0065 A69-10548

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise
01 p0152 A69-10578

General theory of relativity tests with aid of satellites, considering gravitational red shift measurements, light deflection in solar field, etc
01 p0152 A69-10751

Soviet studies of ionospheric electron densities by means of geophysical rockets and satellites
01 p0067 A69-10944

Ionospheric plasma electrostatic resonances from Alouette satellite signal observations
01 p0067 A69-10983

Solar, interplanetary and magnetospheric electromagnetic events before and during magnetic storm from ground observatory and earth satellite data
01 p0156 A69-11120

Explorer 26 observations of solar proton penetration inside trapped radiation near geomagnetic equator
01 p0146 A69-11122

Solar protons observations by Satellite 1963 38C in polar regions at high altitude during spring 1966
01 p0146 A69-11123

Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay
01 p0146 A69-11124

Magnetic field data fromOGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
01 p0069 A69-11125

Differential Faraday technique to determine electron content latitude dependence in Northern Hemisphere during magnetically disturbed periods in March 1966
01 p0146 A69-11128

Venus atmosphere and radius measurements by Mariner 5, Venera 4 and radar, comparing values
01 p0157 A69-11197

Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed byOGO 3 satellite in magnetotail
01 p0075 A69-11226

- Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
01 p0076 A69-11234
- Cosmos satellites monitoring electrons distribution in inner radiation belt suggest intensity stability for solar activity cycle
01 p0147 A69-11309
- Electron intensity diagram of diurnal trapped electron variation from Cosmos 5 satellite data, including harmonic analysis of data
01 p0147 A69-11321
- Cosmic radio emission at 1.68 MHz measured by Cosmos 142 satellite, discussing receiver, antenna and radiation temperature
01 p0158 A69-11322
- Orbital spectroscopic and radiometric IR experiments, considering moon and Mars surface
[AAS PAPER 68-196] 02 p0312 A69-11474
- Tensor character of fictitious potential function introduced to approximate locally tangent actual potential function, discussing planetary gravitational anomaly observation from orbiting vehicles
[AAS PAPER 68-198] 02 p0312 A69-11476
- Satellite monitoring application to air traffic control in parallel track system, discussing lateral and longitudinal separation control
02 p0277 A69-11591
- Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
02 p0306 A69-11656
- Electron measurements at 18 earth radii in Vela satellite program
02 p0307 A69-11735
- French geodetic work with aid of artificial satellites, describing equipment, mounting, observation technique and laser telemetry experiments
02 p0228 A69-11913
- Vela 3A and Explorer 33 elapsed time observations of earth bow shock
02 p0244 A69-12299
- European space programs requirements for satellite launch autonomy/independence from U.S. and U.S.S.R., discussing satellite applications for resource surveys, weather forecasting, etc
02 p0335 A69-12682
- OSO-B2 satellite zodiacal light observations at constant 90 degree elongation, measuring polarized component as function of time
02 p0245 A69-12718
- Solar atmosphere from two dimensional study of solar spectrum, discussing satellite observations of corona and upper chromosphere
02 p0329 A69-12785
- High energy cosmic ray particles observed with SEZ-14 instrument aboard Proton 1 and 2 satellites
03 p0499 A69-12944
- Infrasonic waves recordings from Saturn 5 vehicle, observing signal reversal occurrence
03 p0509 A69-13358
- Elektron 2 satellite magnetic measurement of high latitude nocturnal magnetosphere, discussing variations, antisolar effect and elongation of magnetic field
03 p0422 A69-13505
- Angular and spectral distribution of earth IR radiation near horizon from satellite observation and spectrograms
03 p0422 A69-13506
- Latitude dependence of earth spectral radiation intensities, discussing satellite observations in equatorial and subtropical regions
03 p0422 A69-13507
- Topside ionosphere composition data by energy spectrometer on satellite Ariel 1, discussing positive ions and diurnal, seasonal and secular variations
03 p0424 A69-13806
- Low energy electrons on day side of magnetosphere observed with MIT electron detector on OGO 3 satellite
03 p0503 A69-14027
- Midlatitude nighttime total ionospheric electron content during magnetically disturbed periods from geostationary satellites Canary Bird and ATS 3
03 p0426 A69-14030
- Ground coverage of oblate planets by spin stabilized satellites, determining ground areas visible to satellite by solution of quadratic equations
03 p0522 A69-14244
- Satellite data for reevaluating extraterrestrial particles origin found in polar ice, atmosphere and terrestrial surface collections
04 p0654 A69-14655
- Portable amplitude and frequency recording system for studying ionosphere by radio signals from artificial satellites
04 p0597 A69-14748
- Outgoing radiation field based on interpretation of broad sector radiometer measurements made from meteorological earth satellites
04 p0627 A69-15032
- Space radio astronomy techniques for problems in galactic radio emission, solar studies and planetary observations
05 p0821 A69-15844
- Space observations needed for solar flares study
05 p0814 A69-15859
- Space observation of flare sprays and solar limb surges, stressing X ray research
05 p0814 A69-15860
- UV solar spectra observation, discussing coordination of ground based and satellite programs
05 p0822 A69-15861
- Space photography to provide synoptic sedimentary environmental data analysis, discussing orbital sensing advantages
05 p0753 A69-15993
- Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position
05 p0824 A69-16059
- Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
05 p0824 A69-16252
- Continuous and triggered audio frequency noise bands associated with ionospheric lower hybrid resonance frequency observed on OGO 2
05 p0754 A69-16257
- Magnetic disturbance vector distribution during polar magnetic substorm
05 p0755 A69-16271
- Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period
05 p0816 A69-16275
- Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrad sensor programmed as retarding potential analyzer
05 p0825 A69-16278
- Langmuir probe experiment measurement of upper region electron temperature on Explorer 32 conflict with Jicamarca Radar Observatory measurements
05 p0756 A69-16283
- Lower ionospheric diurnal variations in electron density observed by beacon satellite, noting effect on high power VHF forward scatter circuits
05 p0757 A69-16405
- Atmospheric vertical density and pressure profiles determined from satellite measurements of light beam phase shift and refraction angle
05 p0760 A69-16694
- Satellites role in observing and forecasting global atmospheric behavior, discussing World Weather Watch and Global Atmospheric Research Program
06 p0916 A69-16854
- Earth resource information from spacecraft including landmapping, geological photographs, hydrological and oceanographic data, etc
06 p0916 A69-16855
- Photomultipliers response to energetic particles in terms of background current using data from OGO experiments
06 p0923 A69-16932
- Cosmic dust concentration in interplanetary space near earth, noting suitability of satellite observation
06 p0999 A69-16971
- Mass influx and penetration rate of meteor streams
06 p1000 A69-17007
- Soviet satellite exploration of space magnetic fields and charged particles, noting Proton satellites and protons and carbon nuclei inelastic interactions
[UN PAPER 68-95768] 06 p0986 A69-17031
- Satellite actinometric data computerized reduction in U.S.S.R., examining computer program features
[UN PAPER 68-95763] 06 p0916 A69-17038
- Onset and development of typhoons observed by Cosmos satellites using TV type IR apparatus
[UN PAPER 68-95774] 06 p0949 A69-17039
- Atmospheric heat sources and heat sinks distribution based on Cosmos satellite data
06 p0949 A69-17048
- Processing TV cloud data monitored by Molniya 1 and Meteor meteorological satellites, discussing computer interpretation of TV photographs
[UN PAPER 68-95759] 06 p0950 A69-17060
- Rectangular space coordinates for points on earth determined from observations of directions and distances to and from satellites
[UN PAPER 68-95265] 06 p0917 A69-17064
- Earth resource satellites, discussing world ground station network for data reception and information dissemination and training and research center
[UN PAPER 68-95529] 06 p0917 A69-17067
- Economic and scientific reasons for using artificial satellites to establish continental geodetic network, noting continental displacements and terrestrial pole motion observations
[UN PAPER 68-07445] 06 p0917 A69-17069
- French program of space geodesy, discussing spatial triangulation, telemetry, dynamic geodesy, Diapason and Diademe experiments
[UN PAPER 68-95834] 06 p0917 A69-17071
- Eole meteorological satellite secondary use, discussing cosmic rays monitoring, navigation purposes and oceanographic research
[UN PAPER 68-95833] 06 p1013 A69-17077
- Attitude stabilization for astronomical satellites
06 p1015 A69-17588
- Mathematical techniques for treating satellite based atmospheric data involving radiative transfer equation inversion, noting scattering and temperature measurement problems
06 p0957 A69-17618
- Vertical ozone distribution in upper atmosphere from satellite measurements of UV solar radiation scattering by solving integral Laplace equation
06 p0996 A69-17733
- Soviet papers on satellite meteorology covering equipment onboard meteorological satellites, data processing, photograph interpretation, etc
06 p0951 A69-17976
- Ground, aircraft and spacecraft actinometric data compared for clear sky
06 p0951 A69-17982
- Interpretation of IR cloud images transmitted by Nimbus 1 and Cosmos 122 satellites, using radiation temperature contrasts
06 p0952 A69-17984
- Lower atmosphere pressure field determination based on meteorological satellite observations of amount and types of clouds and upper boundary altitude
06 p0952 A69-17987
- Relation between satellite data concerning thermal microwave radiation and meteorological conditions in lower atmosphere for possible use in weather forecasting
06 p0953 A69-17995
- Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] 06 p0954 A69-18038
- Venusian atmosphere model developed from satellite and earth based radar data for environmental criteria in spacecraft design and mission planning
[AIAA PAPER 69-51] 06 p1011 A69-18096
- Radio occultation measurements of planetary atmospheres and ionospheres from orbiting parit
[AIAA PAPER 69-53] 06 p1011 A69-18104
- Remote sensing platform requirements for oceanographic and meteorologic observations, discussing orbital and aircraft platforms
[AIAA PAPER 69-154] 06 p1044 A69-18122
- Electron density distribution stationary with respect to sun determined by Alouette 1 measurements over winter pole, noting relation to high density plasma
06 p0922 A69-18224
- Satellite and aircraft radiation measurements in cm and mm wavelength range to provide information on underlying surfaces
07 p1130 A69-18257
- Visible radiation scattering around Venus spherical atmosphere computed on basis of Venus 4 and Mariner 5 data
07 p1213 A69-18609
- Optical device for measurement of temperature changes with height in upper atmosphere by rockets or satellites
07 p1132 A69-18676
- Micron and submicron particle cumulative flux upper limits in satellite micrometeoroid environment of Gemini 12
07 p1215 A69-18845
- Solar wind, bow shock and magnetosheath observations by charged particle analyzers on Vela satellites
07 p1208 A69-19361
- Particle measurements by Vela nuclear test detection satellites /2A and 2B/ noting plasma sheet in center of magnetotail
07 p1208 A69-19362
- Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
07 p1208 A69-19363

Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
07 p1128 A69-19365

Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances
07 p1209 A69-19371

Bow shock and magnetopause boundary observations with IMP 2 plasma detector
07 p1129 A69-19372

Low energy electrons in magnetosphere from OGO-1 and OGO-3 observations, discussing plasma sheet, magnetic bay activity, electron pressure, temperature and density gradient
07 p1209 A69-19373

Observability theory of dynamic objects application to composing measurements for space flights, solving parametric observability problem
07 p1087 A69-19605

Magnetospheric magnetic field ring current asymmetry during different phases of geomagnetic storm observed by Explorer 26 and Vela 2 satellites
07 p1129 A69-19611

Solar corona X ray emission during flares and under quiet sun conditions investigated by satellite with X ray heliograph
07 p1210 A69-19614

Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
07 p1224 A69-19715

Ballistics room of Royal Belgian Observatory for observation of geodetic satellites
08 p1272 A69-19993

Solar proton monitoring by particle detectors on-board rockets and IMP satellite
08 p1318 A69-21142

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
09 p1485 A69-21533

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
09 p1485 A69-21534

VLF emissions intensity and spectra variations compared with energetic electron fluxes variations during magnetosphere storm periods
09 p1488 A69-21698

Irregular regions in Antarctic ionosphere from Polar Ionosphere Beacon Satellite S-66 recordings, obtaining irregularities density from nulls clarity
09 p1490 A69-21716

Elektron 4 satellite radio emission data transmitted from July to December 1964, noting month-to-month variations in mean radiation level
09 p1578 A69-21776

Atmospheric density profile from satellite measurements of light wave phase and refraction angles, discussing ionospheric, water vapor and diffraction effects on errors
09 p1490 A69-21862

Spin stabilized spherical satellite in high elliptical orbit for lower thermosphere measurements during entire solar cycle
09 p1610 A69-22009

Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between solar satellite energy and energy level interval
09 p1598 A69-22158

Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
09 p1578 A69-22167

Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics
09 p1578 A69-22168

Solar and cosmic X rays observed by OSO-C, stressing galaxy M 87 upper limits and Lupus XR-1 power law spectral form
09 p1578 A69-22171

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei
09 p1579 A69-22172

Sudden commencement associated discontinuities in interplanetary magnetic field observed by 3 satellite, stressing shocks and tangential and rotational discontinuities
09 p1598 A69-22183

Meteorological observation problems from satellites, considering lower atmosphere measurements and accuracies
09 p1537 A69-22690

Auroral electrojet precursors and geomagnetic variations before onset of bays, noting satellite observations
10 p1681 A69-22804

Satellite data on relative flux and group composition of heavy nuclei in primary cosmic rays
10 p1756 A69-22820

Secondary emission in low altitude satellite body dependent on inelastic collisions with primary cosmic ray protons
10 p1757 A69-22821

Diffusion coefficient and cosmic ray motion in solar system, using satellite data of interplanetary magnetic field
10 p1757 A69-22822

Forbush decreases spectra in low energy region from satellite measurements of neutron and hard component of cosmic rays
10 p1758 A69-22829

Solar research from rockets and satellites, considering solar instruments including EUV spectrographs
10 p1772 A69-22867

Apollo 7 and weather satellite observation photographs of hurricane Gladys and typhoon Gloria
10 p1722 A69-22944

Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
10 p1766 A69-23753

Solar X ray flare of July 7, 1966 with Explorer 33 satellite attributed to McMath plage region 8362, discussing solar and cosmic radio noise
10 p1766 A69-23754

Time dependence, anisotropy and spectral composition of cosmic radiation generated during series of flares during July 5-20, 1966 by Pioneer 6 observations
10 p1768 A69-23769

Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
10 p1783 A69-23773

Protons emitted by July 7, 1966 solar flare observed by low altitude high latitude Injun 4 satellite
10 p1768 A69-23778

Subauroral traveling ionospheric disturbances and fading due to diffraction observed by geostationary satellites
10 p1685 A69-23831

Visual observation of aerospacecraft, discussing object luminance, eye contrast sensitivity, atmospheric contrast transmission function and psychophysiological and atmospheric effects
10 p1649 A69-23872

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation
10 p1783 A69-23922

Venus atmosphere observations compared with Venera 4 measurements of temperature, pressure and carbon dioxide content
10 p1791 A69-24200

Solar wind flux near earth observed by Venera 2 /1965/ and Venera 4 /1967/ probes, noting solar activity effects
10 p1771 A69-24201

Radio astronomical observations of Venus atmosphere interpreted noting agreement with model based on Venera 4 data
10 p1791 A69-24202

Denser material beneath lunar maria revealed by precise tracking of lunar orbiting spacecraft, discussing geology and evolution
11 p1953 A69-24339

Time registration delays during photographic observations of satellites, describing NAFA type satellite camera and mechanical and electrical systems
11 p1880 A69-24365

Satellite photographic astrometry and chronometry, determining spatial positions of satellites and observation stations by space triangulation
11 p1956 A69-24400

Remote geoscience sensing using properties of radar return noting scatterometry, imagery, altimetry and penetration measurements
11 p1835 A69-24692

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques
11 p1835 A69-24695

Soviet collection of articles on satellite data interpretation and use for meteorological services
11 p1911 A69-24824

Chemical composition of Venusian atmosphere by Mariner and Venera satellites, comparing upper atmospheres of Venus and earth
11 p1960 A69-24971

Ionospheric electron content gradients from Faraday rotation observations of radio beacon satellites for direction finding of HF radio waves
11 p1837 A69-25004

Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
11 p1950 A69-25144

Anisotropic fluxes of energetic particles in and near distant trapping region encountered by Explorer 33 satellite in outer magnetosphere
11 p1950 A69-25146

Solar flare and magnetic storm signals from ATS geostationary satellite on May 28, 1967, deriving total electron content
11 p1951 A69-25161

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study [SMPT PAPER 105-79]
12 p2077 A69-25767

Planetary imaging systems design problems illustrated by Mars orbiter reconnaissance, discussing radiation effect on film, shielding, stereo method comparisons, color bands, etc [SMPT PAPER 105-78]
12 p2078 A69-25770

Low light level slow scan Owl TV camera system with secondary electron conduction camera tube for satellite-borne observation of auroral light emission
12 p2079 A69-25904

Theories for universal time controlled polar F region reevaluated in light of satellite low energy charged particle observations
12 p2065 A69-26103

Meteorology and space vehicle capabilities noting earth, outer space and earth atmosphere observations and measurements, relaying telecommunication signals, etc
12 p2126 A69-26126

Martian crater density determined by comparison of statistical counts from Mariner 4 photographs
12 p2157 A69-26309

Collection of Soviet papers on satellite observations covering geodetic applications, orbital mechanics, atmospheric measurements, etc
12 p2067 A69-26424

Earth center of mass determination from simultaneous satellite observations by photography or laser radar
12 p2068 A69-26425

Spatial direction determination from simultaneous photographs of Echo 2 at Nikolaev and Helwan stations, using circle of simultaneity
12 p2068 A69-26427

Geocentric orientation of quasi-geocentric coordinate network determined from simultaneous photographic satellite observations, using gravity force values
12 p2158 A69-26429

Earth stations coordinates determination from non-simultaneous photographic satellite observations by orbital method compared with simultaneous photographic observations of Echo 1
12 p2068 A69-26430

Cosmic triangulation by geometrical synchronization of astrometric satellite observation, with precise times unavailable
12 p2158 A69-26433

Coupled geodetic triangular grids obtained using satellite observations for azimuths
12 p2069 A69-26433

Subsatellite point velocity determination by interpolation method using observation data without knowledge of orbital elements
12 p2158 A69-26435

Satellite celestial equator intersection time calculation from visual satellite observation near equator including satellite draconic period determination, particularly for high altitude
12 p2069 A69-26438

Cosmos 17 and 44 draconic periods of rotation, discussing period variations determination from visual observations
12 p2173 A69-26439

Soviet satellites rotation periods from processing of photometric observations
12 p2069 A69-26440

Anomalous satellite periods of rotation from successive observations at same topocentric parallel
12 p2158 A69-26441

Draconic periods changes of satellites 1963 53A and 1964 76A, based on observations
12 p2174 A69-26446

Solar chromospheric flares effect on temperature of upper atmosphere observed by satellite at perigee altitude

12 p2149 A69-26447

Computer program in ALGOL for computing satellite ephemerides applicable to satellites with direct or retrograde motion observed in Northern or Southern Hemispheres

12 p2159 A69-26448

Budapest University satellite radio observation APT station design, equipment and methods

12 p2059 A69-26449

Observatory camera for satellite observation, discussing objective focusing and diameter and manual/automatic operation

12 p2092 A69-26450

Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect

12 p2094 A69-26697

Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models

12 p2072 A69-26739

Orbit determination from satellite using linear combinations of time of flight measurements and based on expansion of satellite law of motion

12 p2159 A69-26778

Meteorological application of ATS observations in form of time lapse movies of weather in motion, describing camera and data flow [AIAA PAPER 68-1094]

12 p2174 A69-26804

Space research in U.S.S.R. including Venera 4 soft landing mission to measure temperature, pressure, density and atmospheric composition of Venus

12 p2160 A69-26921

Solar-terrestrial environment, discussing mathematical development of solar wind, satellite measurement, magnetic storms, aurora and cosmic rays

12 p2161 A69-26941

Satellite observation of intensity and distribution of VLF emission at medium latitude during magnetic storm interpreted by transverse resonance plasma instability

12 p2073 A69-26947

Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution

12 p2192 A69-26978

Correlation spectrometer for air pollution surveillance from airborne and spaceborne platforms, noting scanning satellite system for continuous global coverage

12 p2096 A69-26981

Geographic and cartographic mapping applications of remote sensor data from orbital heights, discussing hardware, instrumentation, NASA role in data selection, etc

12 p2192 A69-26984

Tenuous cirrus cloud influence on 6.4-6.9 micron Nimbus 2 water observations, discussing equivalent black body temperatures correspondence to cloud and clear areas

12 p2075 A69-27003

Airborne and satellite IR survey over active effusive eruption at Surtsey, Iceland, comparing thermal energy yield and radiant emission to ground measurements

12 p2076 A69-27011

Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres

12 p2173 A69-27172

Collection of Soviet papers on U.S.S.R. outer space studies /1957-1967/ covering rocket and satellite sounding, meteorology, radiation belts, etc

13 p2335 A69-27346

Van Allen radiation belts proton and electron components recorded by Soviet lunar probes and Cosmos and Elektron satellites

13 p2326 A69-27350

Cosmic rays during 11-year solar cycle, short term variations and radial gradient based on Luna, Zond and Venera probes and Cosmos observations

13 p2326 A69-27351

Soviet satellite and probe studies of earth, moon, Venus and Mars magnetic fields, noting automatic magnetometer

13 p2336 A69-27352

Interplanetary plasma measurements by Luna, Mars 1, Zond 2 and Venera 3 probes, including solar plasma flux energy spectra diagram

13 p2336 A69-27354

Solar radiation in short wave, UV and X ray range recorded by rockets, probes and satellites, notably Elektron 2 probe

13 p2326 A69-27355

Soviet and foreign visual, photographic and photometric ground observations of satellites, emphasizing synchronous optical observations role in geodesy and geophysics

13 p2219 A69-27357

Sky mapping in IR, using IR photometer on TD1 ESRO satellite

13 p2260 A69-27606

Venusian atmospheric pressure and temperature measurements by Venera 4 probe, noting agreement with Mariner 5 observations

13 p2345 A69-27689

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe

13 p2345 A69-27690

Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium

13 p2345 A69-27691

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum

13 p2327 A69-27693

High latitude capture region boundary for electrons in upper radiation belt determined relative to current electrojets in ionosphere from satellite observations

13 p2327 A69-27700

Collection of articles on satellite meteorology including vertical air motions, clouds and radiation fields

13 p2291 A69-27723

Radiation measurements by Cosmos 122 satellite over various regions, determining radiation temperature, long wave heat flux and albedo

13 p2291 A69-27726

Radiation fields and large scale atmospheric disturbances analyzed, using radiation maps from Cosmos satellites

13 p2291 A69-27727

Auroral phenomena investigation by ESRO 1 satellite, measuring particle flux arriving at auroral height

13 p2381 A69-27748

Auroral luminosity determination by two photometers on ESRO 1 satellite

13 p2253 A69-27752

Global coverage of positive ion composition and temperature, and electron density and temperature measurements during AURORAE mission of ESRO 1 satellite

13 p2253 A69-27753

ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons

13 p2327 A69-27754

Electron and proton spectra in 1-13 keV range relative to geomagnetic field lines measured by ESRO 1 satellite during Aurorae mission

13 p2328 A69-27755

Medium energy trapped and dumped protons at high latitudes and auroral zone, using semiconductor radiation detectors on ESRO 1 satellite

13 p2328 A69-27756

Nimbus D meteorological satellite construction, control system, orbit, etc

13 p2356 A69-27832

European earth resource satellite systems technology, applications and costs

13 p2356 A69-27833

Corrections for atmosphere thickness needed for satellite measurements of underlying surface temperature

13 p2293 A69-27850

Radar and satellite TV clouds observation in meso and macroscale cloud systems

13 p2294 A69-27853

Scientific aims, optical design, instrument data, control and orbit operation of European Large Astronomical Satellite used in UV observations

13 p2264 A69-28477

Lunar surface gamma radiation observed by Luna 10 spectrometer, suggesting basalt-like minerals composition of lunar maria

13 p2333 A69-28635

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km

13 p2333 A69-28687

Solar proton flux in two energy intervals measuring by ATS detectors during January 1967 event compared with data from satellites outside magnetosphere

14 p2509 A69-28935

Ionospheric electron and ion temperatures correlated with electron concentration profile as measured by rockets and satellites

14 p2510 A69-28942

Sporadic E layer cloud configuration study based on explorer 20 satellite observations, discussing W echoes

14 p2434 A69-28943

Ionograms in vertical depletion duct in horizontally stratified isotropically refractive plasma, considering vertical propagation and ray paths traces dependence on electron concentration

14 p2434 A69-28945

Large amplitude pulsations in magnetic field magnitude and proton fluxes observed by satellite during magnetic storm compared with various models

14 p2434 A69-28947

Correlation coefficients between radial components of interplanetary magnetic field and solar wind velocity from Mariner 5 data due to Alfvén waves

14 p2510 A69-28949

High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections

14 p2511 A69-28950

Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation

14 p2512 A69-28963

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents

14 p2512 A69-29041

Night airglow variations observed during Cosmos 92 satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies

14 p2435 A69-29042

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift

14 p2435 A69-29043

September 14, 1966 magnetic storm observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth

14 p2438 A69-29078

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations

14 p2438 A69-29079

Rocket and satellites topside sounding of earth ionosphere, determining magnetoplasma structure and resonance

14 p2438 A69-29101

Electron density profiles in outer ionosphere and integral of electron density measured with coherent radio waves emitted from Electron satellite

14 p2438 A69-29106

Polar cap absorption riometer recorded during 2-6 September 1966 event compared to satellite measurements of solar protons, discussing diurnal variations and oxygen role in associative detachment reactions

14 p2440 A69-29126

Monograph on reduction of satellite data using fixed stars covering ALGOL programming for computing satellite direction from photographic model

14 p2446 A69-29286

Saturated signals of GM counter from solar radiation monitoring satellite, showing Van Allen belt high energy particle origin

14 p2514 A69-29383

Geomagnetic storm induced temporary radiation zones located by determining Explorer 30 attitude and spin axis orientation

14 p2514 A69-29384

Worldwide observation of atmosphere with occultation satellites, correcting orbit perturbations to obtain air pressure

14 p2447 A69-29517

Radio wave reflections from edge of large scale depressions of ionospheric electron density observed by topside sounding satellites, discussing ionogram recordings

14 p2415 A69-29521

Radar radiometer by adding radar to scanning microwave radiometer, discussing applications to spacecraft measurement of oceanic winds, waves and precipitation

14 p2421 A69-29528

Micrometeoroid showers proximity to epsilon Leonid showers in earth orbit, analyzing Helfenzreider comet role from satellite data

14 p2522 A69-29588

High and low latitude cellular cloud patterns observed by meteorological satellites, noting frequent occurrence over oceans

14 p2473 A69-29727

Cloud pattern characteristics in intertropical convergence zone above Indian and Pacific oceans from meteorological satellite photographs and cloud formation maps

14 p2473 A69-29728

Satellite radiation maps for synoptic analysis regarding world weather maps, discussing front, intertropical convergence zones and typhoon location

14 p2473 A69-29729

Meteorological elements variation from measuring earth radiation in different spectral regions by satellites, determining temperature and humidity profiles

14 p2477 A69-29828

Radio propagation in upper atmosphere and ionosphere noting rocket and satellite experiments including plasma physics research, tropospheric studies and space science services

14 p2526 A69-29854

Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time

14 p2528 A69-29970

Solar wind Helmholtz-type velocity discontinuities, noting plasma density and temperature stabilities from Explorer 34 observations

14 p2515 A69-29971

Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes

15 p2679 A69-30010

IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra

15 p2673 A69-30014

Satellite radio observation for ionospheric parameters, utilizing Doppler and Faraday phenomena, signals fluctuations and sporadic phenomena

15 p2594 A69-30028

Artificial earth satellites positional observations by graphical smoothing on azimuth and altitude, discussing advantages for space geodesy

15 p2594 A69-30029

Satellite triangulation by least squares method based on conditions relating to observing stations coordinates, concerning synchronous observations of directions and distances

15 p2594 A69-30030

Satellite observation of ocean surface and subsurface features, discussing onboard equipment and proposed orbits

15 p2607 A69-30190

Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces

15 p2596 A69-30455

Spacecraft radar altimetry with application to geodesy, discussing orbit and tracking errors

15 p2609 A69-30460

Spacecraft radar altimetry applied to study of sea surface slopes, tides, tsunamis, storm surges and submarine geology

15 p2609 A69-30461

Extraatmospheric long and short wave radio astronomy since first artificial satellite, including device carriers effectiveness of earth satellites, lunar orbiters, rockets and balloons

15 p2682 A69-30504

Solar corpuscular radiation component from satellite and interplanetary space probe geophysical data, discussing interplanetary magnetic field geometry and corpuscular fluxes

15 p2684 A69-30516

Astronomical UV radiation observation by OAO 2 satellite, discussing solar images, corona, chromosphere and UV spectrum, stellar evolution, etc

15 p2689 A69-30597

Temperature of underlying surface and moisture content of atmosphere from satellite thermal radio emission measurements

15 p2648 A69-30641

Earth thermal emission intensity measured by two beam radiometer onboard Cosmos 149, noting discrepancy between empirical and theoretical transfer functions of atmosphere

15 p2596 A69-30651

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise

15 p2691 A69-30748

Antenna, frequency converter and automatic spectrum recorder system for closest approach times prediction and satellite identification, discussing errors

15 p2569 A69-30800

Radio wave absorption by water vapor in Venusian and Martian atmospheres, constructing model from Venera 4 data

15 p2569 A69-30952

ESRO 1/Aurora satellite for Arctic ionosphere and aurorae observation, discussing electrons and protons measurements and auroral photometry

15 p2702 A69-31081

Monograph on large scale cloud distribution in extratropical low pressure regions, using classical meteorological observations and Tiros weather satellites data

15 p2650 A69-31212

Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence

15 p2570 A69-31309

Rapid orbit prediction method for planning satellite observation programs, considering oblateness and radiation pressure effects

15 p2697 A69-31310

Magnetic storm effects on electrons and protons in outer belt, using satellite data for intensity and differential energy spectra

15 p2676 A69-31314

Cloud distribution effect on global coverage of remote radiometric sounding of atmosphere, considering Nimbus 1 and 2 data

15 p2650 A69-31335

Satellite orbits obtained by tracking by synchronous satellites, discussing accuracy for low altitude satellites

15 p2698 A69-31340

Lunar surface features as observed by orbiting and landing craft, discussing particle layer, rocks, craters, effects of erosion, meteorite impact, etc

15 p2698 A69-31356

Radio wave scattering characteristics of lunar surface in 3 cm wavelength by Luna 8 and Luna 9 automatic stations and Surveyor spacecraft

15 p2571 A69-31359

Comparisons and combinations of geodetic parameters from dynamic and geometric satellite solutions and Mariner flights

15 p2600 A69-31362

Solar corona observed by X ray instrumentation of SOLRAD 8 satellite crossing moon penumbra during solar eclipse of 20 May 1966

15 p2698 A69-31363

Space direction by compensation method of cosmic triangulation network, using laser and optical observations of artificial satellites

15 p2699 A69-31377

Atmospheric density measurements by triaxial accelerometer system, ionization gauges and orbital decay of OV1-15 satellite

15 p2602 A69-31384

Low altitude atmospheric density satellite OV1-16 measurements, showing agreement between onboard accelerometer and orbital drag data

15 p2602 A69-31385

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer

15 p2650 A69-31389

Photoelectric photometry of artificial satellites noting equipment, Pegasus satellite observations and light curves from Cosmos 151, 192 and 220

15 p2616 A69-31391

Picogram dust particle flux in selenocentric space measurement by Lunar Explorer 35, showing enhancement during meteor showers

15 p2699 A69-31396

UV OGO observations of atomic hydrogen and oxygen in airglow, comparing results to exospheric models of hydrogen geocorona

15 p2603 A69-31400

Geocoronal Lyman alpha short term and 27-day variations observed by OGO 4 spacecraft attributed to flux variability at solar emission line center

15 p2699 A69-31404

Ion whistlers recorded by Alouette 2 VLF receiver providing information on ion composition of terrestrial ionosphere, showing variation with latitude and relationship to solar cycle

15 p2604 A69-31410

OGO 5 satellite measurements of intensity and width of Lyman alpha line scattered by hydrogen geocorona

15 p2699 A69-31412

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation

15 p2604 A69-31416

Israel research on space data for meteorological purposes, describing automatic picture transmission data and errors in surface temperature determination by satellite radiometry

15 p2650 A69-31422

Faraday rotation measurements of signals from Explorer 22 analyzed to determine scintillation boundary in auroral ionosphere

15 p2605 A69-31443

British rocket and satellite experiments in space research, considering neutral atmosphere, ionosphere and solar radiation, orbital analysis, etc

15 p2724 A69-31463

Plasma flow pattern in twilight regions of earth magnetosheath from positive ion observations of twin Vela 3 satellites

16 p2773 A69-31961

Solar wind direction by analysis of data from IMP 1 satellite, noting anticorotation tendency

16 p2847 A69-31962

Interplanetary magnetic field radial dependence from Mariner 4 measurements between earth and Mars, indicating fluctuations produced by dynamic processes in solar wind

16 p2856 A69-31964

Solar energetic proton penetration into magnetotail from proton data collected by Vela 4 energetic particle telescopes, comparing proton fluxes inside and outside magnetotail

16 p2847 A69-31966

Solar protons nonuniformity over polar caps observed by OGO 2 ionization chamber during 24 March 1966 solar proton events

16 p2848 A69-31967

Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency

16 p2774 A69-31981

Lunar magnetic field measurements by Mariner 4 near sun-moon line extension, discussing search for lunar wake

16 p2856 A69-31986

Explorer 33 and Explorer 35 observations of solar flare of 8 July 1969 soft X rays, discussing absolute flux

16 p2849 A69-31988

Atmospheric density at 130-160 km measured from satellite 1968-59B orbit, noting agreement with CIRA 1965

16 p2776 A69-32095

Monograph on photogrammetry in satellite geodesy including photogrammetric measurement of satellite positions, German observation stations and work done in U.S., U.S.S.R. and France

16 p2790 A69-32202

Satellites meridian and extrameridian observations by transit instrument, examining errors in ephemerides of bulletins

16 p2858 A69-32211

Dim astronomical sources observability from sunlit spacecraft, considering coma of micron sized ice crystals influence on scattering by condensation model

16 p2861 A69-32301

Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view

16 p2862 A69-32309

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin

16 p2783 A69-32528

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys

16 p2783 A69-32529

Ozone and temperature profiles influence on atmospheric radiation intensities measurement by satellite in five spectral regions, noting pressure broadening effect

16 p2786 A69-32633

Atmospheric optical density vertical distribution curves in near UV from spectrophotometer data of Echo type satellites entry into earth shadow

16 p2787 A69-32638

Ozone vertical distribution in upper stratosphere determined from OGO 4 observations, describing calibration of satellite data and onboard instrumentation

16 p2788 A69-32645

Faraday rotation measurements in ionosphere by geostationary satellite ATS-3 as evidence of considerable nighttime electron transport

17 p2959 A69-32926

Survey of six year period of satellite observed tropical Pacific cloud mapping

17 p2996 A69-33001

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances

17 p2959 A69-33006

D-2 satellite stabilization system design and development, noting mission to determine hydrogen distribution around earth

17 p3046 A69-33223

French space geodesy since Space Age, detailing Diapason and Diademe satellites program, techniques and results

17 p2961 A69-33382

Collision free earth shock wave gross and fine structure deduced from OGO 5 plasma diagnostics [AIAA PAPER 69-676]

17 p2961 A69-33452

Tropical storms wind speeds related statistically to characteristics as pictured from satellites

17 p2997 A69-33690

Daily European weather surveys based on pictures transmitted by satellite during fourth quarter 1967

17 p3000 A69-33778

Lower ionosphere electron concentration confirmed as function of electron and ion temperature by satellite and probe data

17 p2966 A69-33981

Solar soft X ray bursts observed by Solrad 8 satellite, considering relationship to microwave radio bursts

17 p3025 A69-34055

Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites

18 p3126 A69-34284

Lunar origin, geological composition and water existence controversies from data gathered by various lunar probes

18 p3196 A69-34631

Ground data operations system for large astronomical satellite comprising UHF telemetry, PCM telecommand and processing and display equipment

18 p3117 A69-34794

Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers

18 p3187 A69-34939

Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite

18 p3199 A69-34941

Sea surface temperature remote sensing by Nimbus 2 satellite using TV camera and medium and high resolution IR radiometer

18 p3130 A69-35057

Manned spacecraft earth resource sensing, discussing advantages and applications in agriculture, forestry, geography, hydrology, oceanography and geology

18 p3208 A69-35058

Oceanographic sensing satellite systems, discussing applications, data requirements, sensors, booster and earth coverage capabilities

18 p3210 A69-35091

Satellite observation data association, estimating consistency of radar object with orbiting prediction, using computer program including Monte Carlo run

18 p3103 A69-35098

Earth ellipsoid determination by satellite observations, noting accuracy of polar flattening measurement on basis of perturbation or perigee argument

18 p3131 A69-35195

Geodetic satellite measurements employing curve fitting approach using least squares analysis to resolve atmospheric refraction and shimmer problem

18 p3104 A69-35202

Gas dynamics of interactions of tenuous ionosphere with moving satellites and diagnostic probes, using collision-free plasma kinetics methods

18 p3132 A69-35409

Spacecraft lunar observations, especially data from Surveyor landings

18 p3205 A69-35410

Orthogonal functions for determining atmospheric vertical temperature profile from satellite measurement of earth outgoing radiation in carbon dioxide absorption band

19 p3303 A69-36409

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models

19 p3396 A69-36621

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data

19 p3304 A69-36623

Soviet collection of papers on satellite meteorology problems covering cloud physics, jet streams, cyclones, satellite photography, etc

19 p3365 A69-36667

OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc

19 p3432 A69-36674

OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results

19 p3284 A69-36675

Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability

19 p3284 A69-36676

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability

19 p3314 A69-36679

Long range weather forecasts attempt from relation between northern Atlantic Ocean water temperature anomaly and monthly satellite cloud data changes

20 p3569 A69-36987

Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves

20 p3519 A69-37022

Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations

20 p3519 A69-37025

Jupiter tenth satellite reobserved, discussing calculations and computer techniques for determining orbit [AAS PAPER 68-140]

20 p3595 A69-37194

Satellite configurations and rotation parameters determined by radar analysis

20 p3488 A69-37295

Janus discovery, discussing solar distance, rotation period, diameter, opposition brightness and planetary parameters derived from pictures

20 p3597 A69-37337

X ray data in 44-60, 8-16 and 1-8 A bands telemeasured by Solrad 9 satellite

20 p3588 A69-37473

Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation

20 p3603 A69-37554

Satellite observations of solar proton events with halo structure or energetic storm proton event and SSC, noting similarity in origin

20 p3589 A69-37555

Satellite representations of earth gravity field portraying consistent pattern of mass anomalies due to density differences in layers

20 p3523 A69-37566

Near-polar circular orbiting satellite for calibrating and evaluating ground-based radars observing space objects

20 p3617 A69-37714

Alouette 1 and 2 topside sounder ionograms analyzed with emphasis on low electron density, spread F and field aligned propagation

20 p3529 A69-37863

Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections

20 p3495 A69-37865

Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms

20 p3530 A69-37867

High latitude ionosphere data from Alouette- ISIS program, describing various F, E and D regions parameters

20 p3530 A69-37868

Alouette satellite VLF observations data of ionosphere ion composition determined from ion whistlers and noise bands with LF cut-off

20 p3530 A69-37873

Cylindrical electrostatic probe measurements on Alouette 2 and Explorer 31, considering implications for future missions

20 p3544 A69-37877

Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition

20 p3544 A69-37878

Explorer 31 ion mass spectrometer calibrated in flight and compared with Alouette 2 topside electron concentration data

20 p3545 A69-37879

Suprathermal electron flux in lower latitudes and polar region analyzed from measurements by retarding potential analyzers on Explorer 31 satellite

20 p3590 A69-37880

Ionospheric electron and ion concentration and temperature by Langmuir plate and spherical ion probe on Explorer 31 and ionosonde on Alouette 2

20 p3531 A69-37883

Ionospheric topside plasma resonances observed by fixed and swept frequency satellite-borne sounders

20 p3531 A69-37884

Topside ionospheric magnetic field aligned irregularities using satellite observations of nonvertical electromagnetic wave propagation and delayed echo generation

20 p3495 A69-37885

Ionospheric resonances due to plasma nonlinearities near spacecraft, noting effects on radio signal propagation

20 p3495 A69-37886

Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction

20 p3496 A69-37892

Topside ionospheric structure from Alouette 2 data, discussing thermopause temperature, plasma temperature, electron density profiles, satellite plasma frequency, etc

20 p3532 A69-37895

Ionic composition determined by combining Alouette topside sounder electron density profiles with electron and ion temperatures measured by ground based Thomson scatter sounder

20 p3532 A69-37898

Diurnal, seasonal and spatial variations in height and occurrence frequency of low electron density region below 3000 km

20 p3532 A69-37899

Radiation effects due to high altitude thermonuclear explosion measured by satellite, estimating fragments longitudinal drift velocity, plasma cloud expansion rate and fragment distribution

20 p3532 A69-37960

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position

20 p3606 A69-37969

Measuring devices for near earth space radiation measurements

20 p3591 A69-38018

Earth albedo in lower latitudes measured by satellites and surface stations, comparing solar energy absorption by oceans and atmosphere

20 p3591 A69-38058

Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations

20 p3534 A69-38093

Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times

20 p3535 A69-38100

Solar X-ray events observed by scintillation counter telescope on OSO 3 satellite, discussing X ray spectra during burst initial and decay phases

20 p3593 A69-38166

Diurnal entrainment deviations and atmospheric turbulence effects on flash photographs from Geos 1

21 p3793 A69-38339

Space contamination due to manned vehicles and debris atmosphere effects on dim light source observations

21 p3793 A69-38341

Satellite measurements of small particles near-earth space density compared with chemical estimates of terrestrial cosmic material, suggesting particles origin in meteoroid ablation

21 p3701 A69-38342

Rocket and satellite particle collection experiment to confirm reduced micrometeoroid flux near earth, noting inconclusive size frequency distributions of exposed flight samples

21 p3793 A69-38343

Particle trapping and plasma oscillations in satellite disturbed ionosphere observed from Ariel and Alouette measurements, discussing frequency and wavelength relation

21 p3787 A69-38357

Ionospheric lower hybrid resonance /LHR/ noise discovered by Alouette 1, describing possible mechanisms for origin

21 p3702 A69-38358

Wind and cloud velocities from ESSA 3 and 5 and ATS 1 pictures for typhoon and tropical vortices in intertropical convergence zone

21 p3758 A69-38371

Microwave refraction method for satellite horizontal probing of earth atmosphere, discussing phase delay data inversion, air density and intersatellite relative velocity

21 p3671 A69-38376

Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions

21 p3794 A69-38379

VLF and LF emission characteristic features and origin mechanism in auroral regions of ionosphere, discussing satellite observation of noise spectrum in space

21 p3708 A69-38495

Simultaneous ground and Alouette 2 satellite measurements of enhanced electromagnetic band emission in 500-1000 Hz range

21 p3708 A69-38496

Optical data supporting satellite observations of soft electron precipitation on poleward side of normal auroral zone

21 p3709 A69-38501

Equatorial plasma sheet role in magnetotail assessed from Vela satellite data, noting diurnal density variations

21 p3711 A69-38512

Direct detection of ionospheric irregularity by device onboard San Marco satellite, utilizing antenna impedance fluctuations

21 p3715 A69-38562

Satellite phase and aberration corrections in processing photographic observations for geodetic purposes

21 p3720 A69-38606

International organizations and planning for earth observation satellite program involving exploitation in communications, meteorology and aircraft

21 p3855 A69-38622

Earth resources observation technology from satellites, reviewing sensors and methods, electromagnetic spectrum, atmospheric attenuation and windows, passive-active devices

21 p3720 A69-38624

Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation

21 p3721 A69-38625

Effusive volcanic eruptions recorded by high thermal sensitivity satellite-borne IR systems

21 p3721 A69-38631

Satellite synoptic meteorological data collection systems, discussing configurations, global location requirements and digital code platforms position determination

[AIAA PAPER 68-1095] 21 p3819 A69-39029

Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows

21 p3759 A69-39114

Terrestrial radio noise from lightning discharges measured by Ariel 3 satellite to deduce sources distribution

21 p3759 A69-39259

Synoptic study of worldwide VLF electromagnetic wave fields distribution above ionosphere from Ariel 3 observations

21 p3717 A69-39262

Tropospheric refractivity height profile model, computing corrections to satellite Doppler or range data

21 p3678 A69-39748

Airborne microwave radiometric measurements of simulated ocean surface under various conditions, suggesting possible wind velocity measurement by satellite

21 p3726 A69-39750

Residuals from earth based coherent two way radio Doppler data from Lunar Orbiter three orders of magnitude larger than observations from spacecraft

[AAS PAPER 68-131] 21 p3828 A69-39766

Anomalous X ray signals from Explorer 30 satellite showing saturation in ionization chamber possibly due to enhanced solar and atmospheric X rays

21 p3792 A69-39808

Latitude variation of radio satellite scintillation related to small scale ionospheric irregularities

22 p3899 A69-39972

Explorer 22 observations of ionosphere electron content, describing measuring equipment and data evaluation

22 p3935 A69-39977

Computer controlled TV cloud recognition equipment on meteorological satellites, discussing multistep process of automatic perspective distortion corrections by onboard computer

22 p3977 A69-40004

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components

22 p4003 A69-40274

Solar soft X rays observed from OSO-3, correlating to solar flares and radio bursts

22 p4003 A69-40297

Explorer 30 /Solrad 8/ satellite observation of 0.5-3 A solar X ray emission related to magnetic configuration in sunspot group

22 p4003 A69-40298

Solar wind north-south component sector dependent asymmetry implied from tangential discontinuities orientations as observed by Mariner 4

22 p4004 A69-40303

Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations

22 p4020 A69-40304

Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms

22 p4004 A69-40305

Satellite observations of auroral particle precipitations indicating latitude dependence of auroral electrons averaged pitch angle and energy spectral distributions

22 p3938 A69-40502

Injun 5 satellite VLF electric and magnetic fields observations, discussing antenna operation, Poynting flux and noise band measurements

22 p3938 A69-40503

Drift shell splitting in nondipolar distorted magnetosphere tested with data from electron spectrometer on ATS 1 and OGO 3 satellites

22 p4005 A69-40508

Faraday effect measurements by polar orbiting satellites for vertical distribution of ionospheric electron density

22 p3941 A69-40718

Solar X ray detector aboard OGO 5 satellite observing two components in energetic solar X ray bursts, attributing impulsive component to bremsstrahlung

22 p4007 A69-40775

Ionospheric electron content satellite measurements during 20 May 1966 annular solar eclipse

22 p4007 A69-40916

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error

22 p3979 A69-41087

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

22 p4007 A69-41093

Radial velocity data monitored during Venera 4 descent used for determining vertical and horizontal atmospheric flows velocities

22 p4034 A69-41099

Autometric gyro for satellite general relativity experiments, particularly earth orbit measurement of Lense-Thirring precession

23 p4162 A69-41543

Radiometer for measurement of cosmic rays at 200-400 km altitudes range by satellites, presenting block diagram of radiation detector units

23 p4165 A69-41732

Radioactive debris distribution in space from 9 July 1962 thermonuclear explosion over Johnston island recorded by Cosmos 6 satellite

23 p4205 A69-41836

Disagreement between Mariner 2 and IMP 1 data concerning interrelation between solar wind velocity and geomagnetism ascribed to instrumental errors and changes in magnetospheric properties

23 p4205 A69-41848

Integral electron concentration in column of space between earth satellite and ground determined by integral equation, assessing errors minimization methods

23 p4157 A69-41858

Relativistic Doppler shift effect observed from radio signal periodic variation of GEOS-1 satellite

23 p4126 A69-42389

Ionospheric electron content measurement from Faraday fading on satellite BE-B, using computer program for data reduction as function of latitude

23 p4160 A69-42434

Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements

23 p4161 A69-42438

IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions

24 p4365 A69-42667

Fluctuating electric fields relations to MHD bow shock structure, using LF fluxgate magnetometer aboard OGO 5

24 p4306 A69-42693

Lunar gravitational field data from Lunar Orbiter spacecraft reprocessed, discussing mascon effects on moon structure and evolution theories

24 p4379 A69-42785

Satellite-based meteorological observation system for global atmospheric research program, discussing wind measurement, IR and microwave sounding possibilities, etc

[AAS PAPER 69-120] 24 p4307 A69-42817

Earth resources surveys by space flights and plans for future satellites, describing results of EROS and ERTS programs

[AAS PAPER 69-058] 24 p4307 A69-42824

Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions

[AAS PAPER 69-258] 24 p4380 A69-42860

Mars atmosphere study by Mariner 6 and 7 spacecraft, discussing instrumentation on board

[AAS PAPER 69-091] 24 p4393 A69-42881

Multiple exposure averaging technique summarizing satellite cloud photographs for various periods, presenting entire earth cloud cover atlas

24 p4343 A69-42897

Ionospheric electron content and distribution at low altitudes from satellite S 66 data, describing seasonal variations of equatorial anomaly peak

24 p4367 A69-43010

OGO-6 design, research program, orbits and instrumentation, emphasizing relationship between particle activity, aurora and airglow, geomagnetic field, atmospheric and solar energy interrelations

24 p4393 A69-43132

Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence

24 p4346 A69-43154

Electron intensities and substorm drift effects in outer radiation belt using two satellite technique

24 p4309 A69-43172

Magnetospheric electron sudden intensity increases correlated with magnetic substorms occurrence at midnight meridian from ATS 1 observation

24 p4367 A69-43173

Atmospheric density above 158 km altitude measured near equator with cold cathode magnetron pressure gage on satellite OV1-15

24 p4310 A69-43179

Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere

24 p4310 A69-43181

Geomagnetically trapped protons and alpha particles, analyzing OGO 4 data

24 p4368 A69-43184

Proton cyclotron echoes on ionograms obtained from topside ionosphere by Alouette 2 satellite

24 p4310 A69-43189

Orbiting vehicles remote sensing of earth resources, discussing instrumentation and accuracy requirements, data management and analysis and effectiveness criteria

24 p4315 A69-43199

Auroral activity and lunar phases correlation from IMP-1 measurements of lunar magnetic field

24 p4311 A69-43502

Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts

24 p4371 A69-43609

Time structure of solar X ray bursts from OSO 3 satellite observations showing impulsive and gradual components

24 p4371 A69-43610

Solar X ray flux measurements from OGO 4, comparing peak fluxes before, during and after flares with IQSY data

24 p4371 A69-43611

- Solar X-ray spectrum as function of sunspot group type based on Solrad satellites flux data, discussing relationship to lower ionosphere characteristics variations
24 p4372 A69-43615
 - Solar cosmic ray anisotropy measurement by Explorer 34 satellite during solar flare events
24 p4373 A69-43619
 - Satellite photographic astrometry and chronometry, determining spatial positions of satellites and observation stations by space triangulation
24 p4391 A69-43790
- SATELLITE ORBIT CALCULATION**
U ORBIT CALCULATION
- SATELLITE ORBITS**
NT PARKING ORBITS
NT POLAR ORBITS
NT STATIONARY ORBITS
NT TWENTY-FOUR HOUR ORBITS
- Equations of motion of satellite in rotating coordinate system, noting effects of precession and nutation on transformation of orbital elements
01 p0150 A69-10445
 - Observation of satellites, orbit calculation and use in upper atmosphere research
[UN PAPER 68-95789]
01 p0064 A69-10459
 - Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection
01 p0151 A69-10570
 - Near circular satellite orbits evolution taking into account gravitational fields zonal harmonics effect on motion
01 p0157 A69-11304
 - Satellite optimal transfers from elliptic to parabolic orbits within set time
01 p0157 A69-11306
 - Smoothing and prediction of satellite orbit elements by stochastic approximation method, solving nonlinear equations system
01 p0158 A69-11319
 - Existence of periodic solutions by Whittaker criterion to equations describing motion of satellite of spheroidal planet in planetocentric coordinate system
02 p0317 A69-11959
 - Motion stability of two tethered unsymmetrical earth pointing bodies in circular orbit, presenting nine degrees of freedom differential equations of motions
02 p0324 A69-12507
 - Satellite orbit selection for determining geopotential and spherical and tesseral harmonic coefficients, discussing propulsion systems and satellite observation cost feasibility
02 p0331 A69-12807
 - Release windows for auxiliary body ejection from satellite in eccentric orbit, discussing visibility, celestial body interference, etc
03 p0505 A69-13003
 - Mission analysis for applications satellites, discussing tradeoffs among mission objectives, launch vehicles, spacecraft and geopolitical considerations
03 p0511 A69-13428
 - Geopotential resonant orbital perturbations of existing satellites, noting high inclination role
03 p0521 A69-13777
 - Optimal circular satellite orbits for planetary surface mapping mission minimizing overlap
03 p0518 A69-14247
 - Soviet book on artificial satellite motion in noncentral gravitational field, discussing celestial axisymmetric planetary orbits, stationary centers, three body problem, etc
04 p0659 A69-15027
 - Artificial lunar satellite orbital motion calculated by numerical integration, including solar and lunar electromagnetic radiation pressure effects
04 p0662 A69-15251
 - Satellite orbit evolution under effect of small perturbing force with constant magnitude and direction
05 p0829 A69-16672
 - Approximate solution for determining satellite motion around axisymmetric planet
06 p1005 A69-17563
 - Attitude perturbations of spin stabilized satellite describing highly eccentric orbit
06 p1014 A69-17568
 - Sun-orbit plane relationship effects on mission planning
[AIAA PAPER 69-129]
06 p1011 A69-18093
 - Transfer orbits calculation between low and high satellite orbits, determining trajectories by method with minimum use of linearization
07 p1211 A69-18503
 - Coordinates and velocity components accuracy for artificial earth satellite moving in central Newtonian field, covering elliptic and circular orbits
07 p1178 A69-19606
 - Steady state motions stability of gyroscope mounted on satellite in gravitational orbit
07 p1137 A69-19679
 - General relativistic gravitational red shift effect on frequency transmitted from satellite orbits, noting possibility of measurement
08 p1383 A69-19901
 - Circular satellite orbit calculation from incomplete observations of one orbital pass
09 p1589 A69-21373
 - Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
09 p1589 A69-21374
 - Earth equipotential surface shape determination from satellite orbit dynamics, obtaining triaxial ellipsoid
09 p1487 A69-21635
 - Upper atmosphere rotation perturbation effect on satellite orbit when scale height varies with height, showing inclination reduction
09 p1594 A69-21660
 - Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient
09 p1609 A69-21761
 - Resonance relations of rotational and orbital frequencies of solar system planets and satellites estimated for statistical significance
10 p1771 A69-22852
 - Satellite altitude stabilization by gravity gradient capture in earth elliptical orbit, showing effect of increase in damping
10 p1791 A69-22926
 - Planar motion of satellite containing damping mechanism, considering small dampers case
10 p1791 A69-22935
 - Motion of satellite of very oblate planet, investigating axisymmetric potential
10 p1774 A69-22969
 - Earth gravitational field effect on satellite orbits, noting elliptical motion in central force field, energy criteria and rotational ratios
10 p1776 A69-23295
 - Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances
10 p1780 A69-23616
 - Numerical solution for changing satellite orientation within circular orbit plane by applying force of onboard flywheel
10 p1792 A69-24194
 - Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem
11 p1956 A69-24399
 - Satellite 1968-5A orbit analyzed for atmospheric density at 140-180 km, noting semiannual variation
12 p2066 A69-26229
 - Earth stations coordinates determination from non-simultaneous photographic satellite observations by orbital method compared with simultaneous photographic observations of Echo I
12 p2068 A69-26430
 - Cosmos 17 and 44 draconic periods of rotation, discussing period variations determination from visual observations
12 p2173 A69-26439
 - Anomalistic satellite periods of rotation from successive observations at same topocentric parallel
12 p2158 A69-26441
 - Draconic period changes of satellite 1965-11-D /Cosmos 54 rocket/ during visual observations with Interochs
12 p2174 A69-26444
 - Draconic periods changes of satellites 1963 53A and 1964 76A, based on observations
12 p2174 A69-26446
 - Orbit determination from satellite using linear combinations of time of flight measurements and based on expansion of satellite law of motion
12 p2159 A69-26778
 - Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere
13 p2219 A69-27701
 - First order secular and aperiodic perturbations in Keplerian orbital elements of synchronous satellite due to earth gravitational field eccentricity
14 p2521 A69-29466
 - Secor 6 satellite /1966-51A/ orbital parameters determined from optical and radar observations noting use for upper atmosphere density and rotational speed studies
14 p2522 A69-29631
 - Satellite observation of ocean surface and subsurface features, discussing onboard equipment and proposed orbits
15 p2607 A69-30190
 - Satellite trajectories calculated in form of parameters derived from processing measured functions, considering optimum mathematical description selection
15 p2691 A69-30740
 - Antenna, frequency converter and automatic spectrum recorder system for closest approach times prediction and satellite identification, discussing errors
15 p2569 A69-30800
 - Satellite orbits obtained by tracking by synchronous satellites, discussing accuracy for low altitude satellites
15 p2698 A69-31340
 - Upper atmospheric density effects on satellite orbits, discussing variations due to solar activity, day-night and semiannual changes and atmospheric rotation
15 p2600 A69-31350
 - Average angular velocity of upper atmosphere from changes in orbital inclinations of satellites, discussing wind speeds
15 p2600 A69-31352
 - Satellites orbits analysis for semiannual variation of air density in upper atmosphere
15 p2601 A69-31378
 - Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
15 p2602 A69-31387
 - Atmospheric models for pressure variation and neutral air winds in thermosphere, discussing wind velocity vector relation to satellites orbital inclination
15 p2603 A69-31403
 - Satellite orbit evolution data applied to refinement of geophysical parameters, including upper atmosphere parameters and zonal harmonic coefficients in gravitational potential expansion
15 p2604 A69-31417
 - Hill method for satellite motion with reference to rectangular rotating axes system with origin at moon center of gravity, obtaining intermediate orbits
16 p2855 A69-31656
 - Satellites trajectories under influence of earth oblateness and low radial thrust acceleration by nonlinear mechanics asymptotic method, discussing osculating orbits
16 p2856 A69-32009
 - Satellite orbital resonances due to geopotential analyzed by asymptotic expansion for nearly circular or equatorial orbits
16 p2863 A69-32401
 - Upper atmospheric gas density and temperature distribution diurnal and seasonal variations calculated from satellites orbiting time changes
17 p2959 A69-32924
 - Orbital and attitude control tests for PAS /two stage perigee-apogee synchronous satellite/ in conjunction with booster Europa 2, discussing functional configuration
17 p3048 A69-33238
 - Adaptive filter for estimating system noise inputs from actual residuals developed to control Kalman filter in satellite orbit estimation
18 p3110 A69-34676
 - Time optimal pitch motion of satellite in circular orbit based on maximum principle, considering variable and constant controls
18 p3207 A69-34677
 - Canonical equations of planet satellite intermediate orbits using harmonics of gravitational potential
18 p3198 A69-34762
 - Graphic representation of time dependence of sub-satellite points and orbital azimuths for relating satellite photographs to locality
18 p3128 A69-34818
 - Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
18 p3169 A69-34855
 - Satellite observation data association, estimating consistency of radar object with orbiting prediction, using computer program including Monte Carlo run
18 p3103 A69-35098
 - Polar coordinates in Euclidean space applied to theory of satellite moving in gravitational field of spherically symmetrical body, introducing equipotential surfaces
19 p3397 A69-35610

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration
19 p3431 A69-36615

Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk
19 p3427 A69-36618

Gyrostat satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostatized satellite equations of motion
19 p3432 A69-36620

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects
19 p3427 A69-36628

Rotational motion bounds of satellites exhibiting parametric resonance under small librations in orbital plane
20 p3617 A69-37191

Satellite orbit determination method allowing geogravitational field determination and correction of station coordinates
21 p3793 A69-38337

Periodic orbits of Poincare and Schwarzschild types in motion of artificial satellite in disturbed gravitational field of axisymmetric oblate spheroid
21 p3795 A69-38441

Orbital parameters of short-lived low altitude earth satellites assuming no atmospheric drag, no orbital precession and flat earth condition
21 p3798 A69-38626

Satellite tracking and orbit determination accuracy for system of two synchronous geostationary satellites [AIAA PAPER 68-449]
21 p3674 A69-39019

Ariel 3 satellite management structure, responsibilities and orbit, stabilization, launch window, data acquisition and processing
21 p3856 A69-39255

Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution [AIAA PAPER 69-911]
21 p3807 A69-39343

Satellite orbits calculation in nonrotating atmospheres, considering atmospheric drag and zonal harmonics coupled effects
21 p3808 A69-39352

Sun-moon short term disturbances effect on synchronous equatorial navigation satellite orbits, noting fuel expenditure [AIAA PAPER 69-927]
21 p3761 A69-39356

Computer program for eccentric geocentric satellite orbits evolution, discussing atmospheric drag, earth oblateness and soilunar effects [AIAA PAPER 69-928]
21 p3808 A69-39357

Orbital mechanics of near earth satellite arrangements /clusters/ for satellite service vehicle /SSV/ accessibility from orbital space stations [AIAA PAPER 69-929]
21 p3809 A69-39358

Mathematical formulation and error analysis of two rotor gyroorbit used in plotting orbital system of satellite coordinates
21 p3765 A69-39363

Satellite maneuver for changing plane of circular orbit to pass through given point, determining on-off engine switching and thrust vector control
21 p3765 A69-39364

Satellites resonant perturbations analysis, deriving mean mean motion formulas
22 p4035 A69-39968

Algorithms for close earth satellite orbit calculation developed by numerical integration methods, discussing solution efficiency [AIAA PAPER 69-948]
22 p4021 A69-40331

Molecular beams for simulating orbital flight through planetary atmospheres, considering various nozzle beam systems [AIAA PAPER 69-1031]
22 p3926 A69-40437

Neglected gravity coefficients influence on computed satellite orbits and geodetic parameters
22 p4023 A69-40556

Sun and moon effects on earth satellite orbit
22 p4030 A69-40901

Artificial satellite motion analysis and perturbation function, considering disturbances due to second satellite or sun
22 p4030 A69-40906

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error
22 p3979 A69-41087

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements
22 p4033 A69-41088

Periodic solutions for gravity-gradient stabilized satellite librating in orbital plane, using elliptic sine function and harmonic balance method
23 p4224 A69-41876

Spherical trajectories control by star height maintenance, analyzing resulting cycloid and cartographic representations
23 p4186 A69-42023

Ionospheric irregularities effect on accurate satellite position determination in near real time
23 p4132 A69-42549

OGO-6 design, research program, orbits and instrumentation, emphasizing relationship between particle activity, aurora and airglow, geomagnetic field, atmospheric and solar energy interrelations
24 p4393 A69-43132

Sun-orbit plane relationship effects on mission planning [AIAA PAPER 69-164]
24 p4386 A69-43261

Planetary gravitational fields and artificial satellite orbits determined by using earth based range rate measurements
24 p4388 A69-43650

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem
24 p4390 A69-43789

SATELLITE ORIENTATION

Solid body automatic orientation, discussing data units for angular error and angular velocity
01 p0122 A69-11302

Three axis magnetometers to determine nonoriented satellite axial orientation in absolute coordinates
01 p0163 A69-11303

Multibody dual spin spacecraft spin axis motion with active internal devices, using digital simulation
02 p0332 A69-11739

Magnetic orientation and attitude control of spin stabilized satellites, synthesizing control circuits and calculating power requirements
03 p0521 A69-13644

Short period terms elimination for problem of motion of satellite with strong inclination and eccentricity, using von Zeipel method
03 p0514 A69-13783

Equilibrium orientations of orbiting gyrostats, giving spectrum of solutions for bodies of varied shape and internal rotor angular momentum
03 p0522 A69-14246

UV astronomy, discussing vehicle stabilization, unstabilized sounding rockets, scanning satellites, balloons, stabilized rockets, pointing satellites, optics and detectors
05 p0821 A69-15839

Soviet achievements in space research, comparing satellites with U.S. counterparts
06 p1005 A69-17561

Equilibria of orbiting gyrostat satellite with internal angular momenta along principal axes
07 p1227 A69-18336

Rotation and orientation parameters of earth satellites based on qualitative analysis of solar direction indicator readings
07 p1230 A69-19604

Attitude determination and hydrogen peroxide control system for spacecraft orientation in Syncom, Early Bird and ATS [AIAA PAPER 67-532]
09 p1610 A69-21988

Luna 9 automatic station flight control complex, detailing communication, orientation and stabilization systems operation after separation from acceleration module
10 p1792 A69-24197

Flight control system for automatic interplanetary stations /AIS/, comparing Venera series orientation and correction system to Mariner systems
10 p1792 A69-24198

Spacecraft orbit control laws determined by studying influence of controlling acceleration in plane perpendicular to absolute velocity vector
11 p1965 A69-25743

External perturbation effects of near earth environment on dynamics and attitude of slowly spinning multibody satellite [AIAA PAPER 68-856]
12 p2174 A69-26795

Space vehicle attitude stabilization based on rotating flywheel resistance to changes in rotation axis attitude, noting grease lubricated hydrodynamic bearing system
12 p2175 A69-26893

Atmospheric density determination based on long period variations of drag coefficients from satellite Proton 2, considering satellite orientation
15 p2602 A69-31392

Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results
17 p3001 A69-33221

Langmuir probe to determine space vehicle orientation in ionospheric or interplanetary plasma, discussing apparatus, accuracy and application
17 p3001 A69-33222

Cosmos 149 satellite stabilization system, discussing three axis orientation and pitch, yaw and roll stabilizations by aerodynamic and/or gyroscopic moments
17 p3047 A69-33226

Numerical integration of Eole satellite attitude equations compared with results obtained by analog simulation or hybrid computation
17 p3048 A69-33232

Attitude stabilization of symmetrical nonrotating earth satellite using earth-pointing rotor as gravitational anchor
19 p3429 A69-35914

Instantaneous and integral solar irradiance of earth oriented satellite surface, noting solar illumination nomogram representation
19 p3432 A69-36629

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance [AAS PAPER 68-124]
20 p3616 A69-37178

Time-independent feedback attitude control system for high accuracy earth pointing motion of stable and unstable satellites in elliptic orbits
21 p3804 A69-39020

Ariel 3 satellite attitude determination, using solar aspect sensors to define conical surface containing spin axis
21 p3820 A69-39260

Ariel 3 satellite spin axis direction determination by optical means from analyzing sunlight glints reflected from surfaces
21 p3820 A69-39261

Reaction boom attitude control systems for improving stabilization and maneuvering capability of earth pointing satellites, describing configurations [AIAA PAPER 69-834]
21 p3822 A69-39365

Spacecraft attitude acquisition/reorientation and stabilization controller design implemented by control moment gyro, proposing control algorithm using control actuator nonlinearity
21 p3826 A69-39641

Aperiodic feedback substitution for angular velocity component of control signal in stabilization systems of oriented satellites
21 p3829 A69-39832

Spacecraft spherical motion about mass center under inertial force using Euler differential equations
21 p3830 A69-39838

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates
22 p4037 A69-41089

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment
22 p4037 A69-41090

Satellite aerodynamic characteristics, considering orbital position and attitude of cylindrical body and separate plate
22 p4037 A69-41102

Satellite attitude estimation from onboard telescope celestial sightings using iterative least squares method, considering measurement error noise and axes wobble
24 p4348 A69-43244

Stability analysis of periodic solutions associated with planar librations of gravity oriented satellite using linear perturbation analysis
24 p4388 A69-43649

SATELLITE PERTURBATION

Mass functions of real earth derived from satellite orbital perturbations [UN PAPER 68-95385]
01 p0064 A69-10460

Dynamically symmetric gyrostat steady motion stability in relation to satellite motion
01 p0163 A69-11301

Satellite nonlinear spatial oscillations about center of mass during circular orbit, using perturbation theory and analog computer
04 p0665 A69-14270

Perturbations of stationary orbital vehicles of arbitrary latitude due to earth triaxiality, noting control by low thrust rocket engine
05 p0823 A69-16037

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

05 p0823 A69-16043

Roll dynamics of spinning axisymmetric satellite in elliptical orbit, discussing eccentricity and gravity gradient torque effect

05 p0830 A69-16397

Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures

07 p1231 A69-18331

Secular perturbations of remote satellites within lunar gravitational field, comparing observations and analytical data

10 p1779 A69-23614

Satellite motion short period perturbations by earth gravitational field tesseral and sectoral harmonics

12 p2069 A69-26431

Natural terrestrial satellites existence suggested by telescopic and photographic observations and artificial satellites orbital perturbations

13 p2344 A69-27642

Steady motion stability of satellite with gimbal suspended gyroscope in central gravitational field, showing no effect of satellite perturbations on gyrostatic stability

14 p2530 A69-29481

Generalized Fourier analysis for satellite motion deviations from arbitrarily chosen reference orbit generated analytically or numerically, determining equations for potential coefficients

15 p2697 A69-31323

Earth reflected radiation pressure and perturbing effect on satellites

15 p2599 A69-31324

Air density at various heights determined from analysis of satellite low perigee orbits, discussing periodic density variations and correlation with daily geomagnetic index

15 p2599 A69-31348

Air densities from satellite obtained orbital data, comparing accuracy of values and methods of analysis

15 p2600 A69-31349

Upper atmospheric density effects on satellite orbits, discussing variations due to solar activity, day-night and semiannual changes and atmospheric rotation

15 p2600 A69-31350

Literal algebra /SPASM/ computer program critical verification of Kozai short period lunar perturbations, discussing errors

15 p2699 A69-31381

Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics

15 p2699 A69-31405

Long range perturbations of satellites and asteroids with arbitrary inclination and eccentricity, illustrating motion around moon, oblate and spherical planets using energy integral

17 p3031 A69-33098

Equatorial moderately elliptical satellite orbit perturbations calculated in local invariants, assuming state vector dependence of acceleration

17 p3039 A69-33796

Polar flattening influence of Jupiter on artificial satellite motion around Callisto noting orbital perturbations

18 p3199 A69-34913

Satellite motion perturbations in vicinity of critical inclination, using Encke method of numerical integration

19 p3397 A69-35607

Ground traces of artificial earth satellites with respect to perturbations due to atmospheric drag, earth oblateness and moon and sun as third body

19 p3398 A69-35614

Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements

19 p3402 A69-35934

Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used

20 p3602 A69-37529

Direct light pressure effect on evolution of limited planetocentric orbits of small bodies, noting longitudes of ascending node and pericenter

20 p3606 A69-37952

Three dimensional coupled flexural and attitude dynamics of libration-damped cruciform gravity gradient satellite, discussing effects of orbital eccentricity, solar radiation pressure, etc

[AAS PAPER 68-126] 21 p3819 A69-39211

Satellite position perturbation due to earth oblateness using Hansen method

[AIAA PAPER 69-909] 21 p3807 A69-39341

Gravity gradient perturbing torque cast in terms of perturbing Hamiltonian, deriving long term changes in rotational motion of tumbling triaxial satellite in elliptical orbit

[AIAA PAPER 69-922] 21 p3821 A69-39353

Sun-moon short term disturbances effect on synchronous equatorial navigation satellite orbits, noting fuel expenditure

[AIAA PAPER 69-927] 21 p3761 A69-39356

Earth shape and areas of anomalous gravity from satellite orbital perturbations, tabulating results from various experimenters

21 p3718 A69-39734

Satellite attitude stabilization synthesis by flywheels allowing independent control of angular motions, assessing perturbation type influence

21 p3768 A69-39831

Geomagnetic field and aerodynamic perturbation effects on satellite motion about center of mass, using asymptotic methods of nonlinear oscillation theory

21 p3830 A69-39835

Closed form solution to stability of coupled libration motion of slender axisymmetric satellite in circular orbit limited to small amplitude vibrations

22 p4008 A69-39936

Satellites resonant perturbations analysis, deriving mean mean motion formulas

22 p4035 A69-39968

Sun and moon effects on earth satellite orbit

22 p4030 A69-40901

Artificial satellite motion analysis and perturbation function, considering disturbances due to second satellite or sun

22 p4030 A69-40906

SATELLITE RENDEZVOUS

U ORBITAL RENDEZVOUS

SATELLITE ROTATION

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field

01 p0161 A69-10585

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source

01 p0162 A69-10761

Three axis magnetometers to determine nonoriented satellite axial orientation in absolute coordinates

01 p0163 A69-11303

Multibody dual spin spacecraft spin axis motion with active internal devices, using digital simulation

02 p0332 A69-11739

Energy dissipation effects on attitude stability of dual-spin satellites with damping mechanism on rotating sections

04 p0665 A69-14703

Optimum stabilization of uniformly rotating axisymmetric satellite, using Liapunov theorem on asymptotic stability

04 p0666 A69-14921

Roll dynamics of spinning axisymmetric satellite in elliptical orbit, discussing eccentricity and gravity gradient torque effect

05 p0830 A69-16397

Nutational stability of multibody spin stabilized satellites, discussing moment of inertia ratios role with energy dissipative damper on despin platform

06 p01015 A69-17585

West German test facility for simulating artificial satellite rotation about center of mass

07 p1116 A69-18260

Rotation and orientation parameters of earth satellites based on qualitative analysis of solar direction indicator readings

07 p1230 A69-19604

Coriolis acceleration in rotating environment, discussing origins and role in human existence in rotating space station

09 p1540 A69-21891

Aerodynamic torque on spinning spherical satellite, noting applications to accommodation coefficient measurement and study of aerodynamic gas-surface interactions

09 p1611 A69-22087

Small angle precessional motion of axisymmetric spin stabilized bodies subject to disturbing moments

10 p1724 A69-22932

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem

11 p1956 A69-24399

Rotational dynamics equations in linearized matrix form applied to satellite librations in circular orbit and gyroscope motion

11 p1970 A69-24608

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight

11 p1990 A69-25510

Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction

12 p2173 A69-25885

Cylindrical satellite drag rotating about transverse axis in earth magnetic field, including aerodynamic and magnetic moments

12 p2174 A69-26443

Wobble-spin technique for spacecraft inversion for earth photography using flywheel

12 p2174 A69-26780

External perturbation effects of near earth environment on dynamics and attitude of slowly spinning multibody satellite

[AIAA PAPER 68-856] 12 p2174 A69-26795

Photographic observations of fifth satellite and disk of Jupiter against stars background for mean motion and regression of nodes

13 p2345 A69-27653

Satellite motion relative to center of mass and resonances by approximate solutions to motion equations, applying asymptotic methods

13 p2357 A69-28502

Autonomous canonical system with two degrees of freedom, determining equilibrium position stability in resonance case, calculating earth satellite rotational stability

14 p2482 A69-28813

Magnetic damping of homogeneous cylindrical satellite rotation about transverse axis

14 p2530 A69-29065

Coriolis effect in rotating spacecraft simulation, discussing optokinetic reflex responses as function of head turning angle with spin axis

14 p2409 A69-29300

Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions

14 p2534 A69-29318

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field

15 p2702 A69-30755

Satellite motion about center of mass, discussing satellite stabilization and libratory motion in gravitational force field, planet resonances, etc

15 p2703 A69-31411

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers

[AIAA PAPER 69-529] 16 p2868 A69-32713

Lunar rotation parameters determined from photographs and visual observations independent of moon profile

17 p3027 A69-32874

Lunar rotation elements determined from distances between Moesting A and limb craters, using Iakovkin position angle method

17 p3028 A69-32876

Rotational equations of motion for two body spacecraft on common spin axis required for simulated gravity environment or gyroscopic stability augmentation

17 p3047 A69-33227

Rotor hazards in rotational behavior of gravity stabilized satellites, describing gyrostabil applications

17 p3048 A69-33233

Minimum time single axis capture of satellite spinning about pitch axis by low thrust jets, considering gravity gradient phenomenon

17 p3048 A69-33237

Rotational locks for arbitrary eccentricity orbit satellites

19 p3397 A69-35609

Passive damper system for reducing precession in free symmetrical rotating space vehicle, noting linear torsional spring influence on precession decay

19 p3429 A69-35913

Gravity torque influence on axisymmetric dual spin satellites in fixed attitudes, using attitude stability studies of spinning single rigid bodies

19 p3429 A69-35917

Stationary resonant nonlinear oscillatory and rotary states, stability and pitching motions of controlled satellite in slightly elliptical orbit

20 p3616 A69-37177

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance
[AAS PAPER 68-124] 20 p3616 A69-37178

Rotational motion bounds of satellites exhibiting parametric resonance under small librations in orbital plane
20 p3617 A69-37191

Spacecraft rotation and astronaut head and body motion as stimuli for vestibular analysis function study during weightlessness
20 p3473 A69-37275

Satellite configurations and rotation parameters determined by radar analysis
20 p3488 A69-37295

Moving model target for laboratory measurements of radar cross section to simulate satellite or reentry vehicle precession motion, noting signature data analysis
20 p3511 A69-37850

Spinning satellite attitude perturbations due to oscillating mass in satellite rigid frame, discussing analytical approach and analog simulation results
20 p3618 A69-37912

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters
[AIAA PAPER 69-919] 21 p3820 A69-39349

Gravity gradient perturbing torque cast in terms of perturbing Hamiltonian, deriving long term changes in rotational motion of tumbling triaxial satellite in elliptical orbit
[AIAA PAPER 69-922] 21 p3821 A69-39353

Equations of motion of elastic dumbbell satellite and two-mass spring-connected satellite in orbit, using energy and Floquet theory to investigate spinning motion stability
21 p3817 A69-39759

Fluid loop rotational kinetic energy dissipator reducing time required for reaching WRESAT 1 satellite spin stabilization axis
21 p3828 A69-39767

Geomagnetic field and aerodynamic perturbation effects on satellite motion about center of mass, using asymptotic methods of nonlinear oscillation theory
21 p3830 A69-39835

Satellite rotation from radar data analysis, requiring two full rotations and body characteristics to produce distinctive lobes in radar cross section
22 p3900 A69-40682

Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
22 p4033 A69-41086

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates
22 p4037 A69-41089

Proton 2 satellite orientation and motion about center of mass determined from telemetric data analysis under aerodynamic moment
22 p4037 A69-41090

Motion stability of rapidly spinning satellite, discussing elastic booms effect
22 p4037 A69-41091

Concentric or eccentric rotation effect on burning rate and geometry of small hybrid rocket motors using hydrogen peroxide-organic fuel
23 p4203 A69-41932

Spinning satellite containing elastically restrained, viscously damped mass, analyzing attitude dynamics and stability, noting wide nutation possibility
23 p4224 A69-42396

Iterative weighted least squares method for reconstructing time history of coupled rotation and flexural oscillations of Radio Astronomy Explorer satellite
24 p4394 A69-43291

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem
24 p4390 A69-43789

SATELLITE TELEVISION

Direct TV broadcasting from satellites with incoherent thermionic reactor and electrical propulsion
[UN PAPER 68-95559] 01 p0114 A69-10466

Geostationary satellite transmissions for educational purposes
[UN PAPER 68-95533] 01 p0028 A69-10494

Satellite TV systems for India, alternatives and costs
[UN PAPER 68-95750] 01 p0028 A69-10495

Satellite educational TV, considering program distribution, satellite characteristics, ground terminals design, reliability, quality, programming and costs
[UN PAPER 68-95827] 01 p0029 A69-10499

Satellite digital video data analyzed by two dimensional filter computer technique, discussing biomedical applications
02 p0213 A69-12155

Educational TV satellites, considering stationary ASCEND system with high power transmitters
02 p0335 A69-12747

Satellite TV transmitter power requirements for adequate direct broadcasting field strength in existing UHF TV bands
03 p0394 A69-13578

European regional satellite communication systems, discussing EUROVISION TV program broadcasting and multiple access telephony
03 p0395 A69-13585

Sound and TV broadcasting from satellites, discussing systems for future individual user pickup
04 p0558 A69-15120

Atmospheric processes interpretation from cloud cover pictures televised by orbiting satellite, examining indirect weather forecasting
[UN PAPER 68-95713] 06 p0949 A69-17029

Quality control for TV transmissions via communication satellites, considering transmission accuracy improvement and error measurement automation
[UN PAPER 68-95773] 06 p0886 A69-17047

Meteorological satellite TV data of earth cloud cover for determining atmosphere pressure field
[UN PAPER 68-95654] 06 p0949 A69-17052

Processing TV cloud data monitored by Molniya 1 and Meteor meteorological satellites, discussing computer interpretation of TV photographs
[UN PAPER 68-95759] 06 p0950 A69-17060

Communication satellites application to domestic live TV, telephone and data communication and long distance telecommunication in Canada
[UN PAPER 68-95501] 06 p0887 A69-17075

Communication satellites in synchronous equatorial orbit for two types of educational TV, discussing picture quality, modulation, power, bandwidth and system costs
06 p1017 A69-17624

M-20 digital computer program designed for calculating statistical characteristics of signals from IR TV scanning system of Cosmos 122 meteorological satellite
06 p0929 A69-17980

TV system producing images with 5000 line resolution, proposing application in Earth Resources Observation Satellite
07 p1131 A69-18552

Satellite TV broadcast application for communication and education, discussing costs and benefits in single and multimission combinations
07 p1244 A69-18678

Preemphasis applications compared in active communication satellite systems for frequency division multiplex telephony and for TV
09 p1449 A69-21275

Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion
09 p1450 A69-21277

Ground station receiving antenna design and size for indirect distribution of TV programs by geostatic satellites
10 p1654 A69-23389

TV broadcasting from synchronous satellites direct to ordinary UHF receivers in 1980s
11 p1833 A69-24529

Air flow distribution and wind velocities in cyclones constructed from Cosmos 122 TV cloud images
11 p1912 A69-24825

TV IR cloud images interpretation transmitted by Cosmos 122, discussing specific features of cloud covers and underlying surfaces
11 p1912 A69-24826

Statistical analysis of convective layer thickness and moisture content effect on convective cloud configurations, using satellite TV pictures
11 p1912 A69-24827

Statistical analysis of lee wave clouds from satellite TV pictures, determining lengths and air flow direction
11 p1912 A69-24828

Computer program for interpreting IR cloud pictures from Cosmos 122 satellite based on potential function method
11 p1884 A69-24833

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study
[SMPTE PAPER 105-79] 12 p2077 A69-25767

Thermionic converter power from satellite nuclear reactor for TV satellites, discussing direct heat utilization and applications
12 p2016 A69-25869

Vertical air motions and cloud behavior relationship based on statistical analysis of TV cloud pictures from Cosmos 122 satellite
13 p2291 A69-27724

IR TV cloud pictures from meteorological satellites used for sky condition diagnostics and forecasting through automatic interpretation by image brightness quantization
13 p2291 A69-27728

Earth TV pictures from Molniya 1 communication satellite, showing advantages of high orbit over low orbit photography for global weather analysis and forecasting
13 p2292 A69-27729

Cartographic interpretation of TV cloud pictures transmitted by Molniya 1 satellite
13 p2292 A69-27730

Synchronous satellite TV broadcasting systems in UK, discussing equipment, transmission problems and economic factors
13 p2220 A69-27830

Radar and satellite TV clouds observation in meso and macroscale cloud systems
13 p2294 A69-27853

Educational TV satellite system design for U.S. in 1970s
18 p3235 A69-35076

TV picture and newspaper pages simultaneous transmission via earth satellite /Orbit/ system, measuring SNR and crosstalk
19 p3277 A69-36567

Cloud masses vertical thickness estimated from study of cloud shadows on satellite TV pictures
19 p3366 A69-36670

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film
21 p3720 A69-38619

Multispectral radiometric analysis of ERTS images, discussing image registration, SNR and atmospheric and diffraction effects
21 p3721 A69-38627

Mariner 6 TV pictures with description of craters and south polar cap, noting moon-like crater abundance, form, arrangement and crater sizes
21 p3803 A69-38981

Computer program for satellite APT geographical grid production, discussing latitude-longitude intersections transformation to Cartesian coordinates
21 p3718 A69-39749

German ground station radio communications via Intelsat satellites, discussing transmitting facilities, TV picture and sound signals, etc
22 p3902 A69-41249

Geostationary satellite TV broadcasting to small contiguous areas with separate programs, discussing communication distribution problems
22 p3902 A69-41252

Communication satellites european development, discussing economic and technological problems, stressing color TV and SHF/FM transmission, compared to conventional ground station transmission
24 p4393 A69-43133

SATELLITE TRACKING

Satellite triangulation simultaneous and trailing methods, discussing timing devices design
[UN PAPER 68-95285] 01 p0064 A69-10475

Earth surface shape determinations by geodetic networks connecting ground observation points and satellite positions
[UN PAPER 68-95377] 01 p0065 A69-10528

CNES worldwide network of tracking stations, describing equipment, location, organization and center of operations
02 p0228 A69-11922

Computer programming of satellite orbit tracking angles for automatic picture transmission receiving stations
04 p0558 A69-14917

Predictor determining future position of TDMA /Time Division Multiple Access/ synchronous satellite communications system satellite from previously received bursts
07 p1076 A69-18553

Ballistics room of Royal Belgian Observatory for observation of geodetic satellites
08 p1272 A69-19993

Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services
09 p1451 A69-21290

Technical characteristics of spacecraft telemetering, tracking and telecommand systems, stressing links between earth stations and spacecraft
09 p1451 A69-21291

- Automatic flight control system /AOOSY/ for German Azur satellite
09 p1459 A69-22563
- Satellite photographic astrometry and chronometry, determining spatial positions of satellites and observation stations by space triangulation
11 p1956 A69-24400
- Electrical servopositioning of telemetry reception antenna for tracking satellites, considering weight, stability, etc
11 p1852 A69-25118
- Optical satellite tracking system using multicoincidence method of photon signal counting by Q switched laser
11 p1841 A69-25579
- Satellite position errors due to atmospheric instability, discussing altitude-temperature relation and stellar scintillation synchronism for stars at small angular distances
12 p2158 A69-26445
- Streak camera for continuous photographing of dark and bright satellites up to 9 stellar magnitude
12 p2092 A69-26451
- Satellite positions measurements by laser compared with radar and photographic methods, considering measurement errors
12 p2110 A69-27149
- Antenna cross dipole array for vehicle tracking in VHF band, obtaining effect of local rotation by electrical phase shifting
13 p2226 A69-27185
- Esro 1 satellite program management, discussing scientific mission, structure, tracking system and history
13 p2355 A69-27360
- Satellite tracking cameras developed in East Germany, discussing optical systems
13 p2262 A69-27958
- Pulsed laser satellite tracking system, noting tracking mount adjustment
13 p2222 A69-28192
- Artificial earth satellites positional observations by graphical smoothing on azimuth and altitude, discussing advantages for space geodesy
15 p2594 A69-30029
- Satellite triangulation by least squares method based on conditions relating to observing stations coordinates, concerning synchronous observations of directions and distances
15 p2594 A69-30030
- Stellar image vibration amplitude dependence on trace direction by comparison with traces of moving satellites
15 p2647 A69-30166
- Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence
15 p2570 A69-31309
- NASA laser systems for satellite tracking, determining ranging accuracy by comparing laser and computed reference orbital data
15 p2571 A69-31312
- Satellite trajectory determination and expected errors for OGO 4 and Geos 1 orbits, noting geopotential, aerodynamic drag and integration contributions
15 p2698 A69-31331
- Lasers for satellite range measurements, discussing power output, mount, accuracy and data
15 p2571 A69-31337
- Satellite orbits obtained by tracking by synchronous satellites, discussing accuracy for low altitude satellites
15 p2698 A69-31340
- Laser measurements for DIADEME satellites tracking to reconstruct actual trajectory in semidynamic geodesy
15 p2600 A69-31365
- Tesseral harmonics of geopotential and station coordinates based on combined Baker-Nunn, laser and range and rate satellite data
15 p2601 A69-31372
- Monograph on photogrammetry in satellite geodesy including photogrammetric measurement of satellite positions, German observation stations and work done in U.S., U.S.S.R. and France
16 p2790 A69-32202
- Electrooptical distance measurement based on laser pulse traveling time and phase measurements to determine satellite range
18 p3103 A69-35199
- Secor data reduction to correct tropospheric refractive effects of radio ranging on earth satellites using tropospheric model
18 p3104 A69-35200
- Australia spatial triangulation and trilateration using geometric satellite geodesy, including station position accuracy tests
18 p3132 A69-35499
- Ground traces of artificial earth satellites with respect to perturbations due to atmospheric drag, earth oblateness and moon and sun as third body
19 p3398 A69-35614
- Orbit parameters identification method based on given tracking data span applied to lunar orbiter tracking using Fourier analysis
19 p3401 A69-35916
- Gain measurement of two element phased array aperture antenna during ATS-C tracking
19 p3272 A69-36254
- Balloon location by low orbit meteorological satellites, discussing balloon movement due to wind and geometric and nongeometric effects on errors
21 p3760 A69-38618
- Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites
21 p3721 A69-38630
- Satellite tracking and orbit determination accuracy for system of two synchronous geostationary satellites [AIAA PAPER 68-449]
21 p3674 A69-39019
- Doppler tracking of near synchronous DODGE satellite from single frequency data, noting error sources [AAS PAPER 68-128]
21 p3674 A69-39202
- Satellite position perturbation due to earth oblateness using Hansen method [AIAA PAPER 69-909]
21 p3807 A69-39341
- Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution [AIAA PAPER 69-911]
21 p3807 A69-39343
- Radar calibration techniques for accurate real time tracking data, describing GEOS-B C-band experiment [AIAA PAPER 69-872]
21 p3675 A69-39398
- Space simulation tests of satellite-borne quartz crystal oscillators for tracking based on Doppler effect
22 p3927 A69-40590
- Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers
23 p4120 A69-41755
- Tracking and data relay satellite system /TDRSS/ compared to ground based mission support, considering altitude coverage capability, economy and communication requirements
23 p4120 A69-41756
- Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S-band experiment
23 p4121 A69-41759
- Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
23 p4231 A69-42133
- Ground to satellite laser ranging experiments for daylight satellite range measurements
23 p4174 A69-42193
- Ionospheric range difference errors after correction for position fixing from satellite, considering elevation angle, latitude, day time, spatial and time electron content correlation
23 p4128 A69-42505
- Satellite photographic astrometry and chronometry, determining spatial positions of satellites and observation stations by space triangulation
24 p4391 A69-43790

SATELLITE TRACKING AND DATA ACQ

NETWORK

U STADAN [SATELLITE TRACKING NETWORK]

SATELLITE TRANSMISSION

Mechanically despun VHF antenna for spin stabilized synchronous satellites, detailing electrical and mechanical design
01 p0161 A69-10350Cloud pictures from weather satellites reception according to automatic picture transmission /APT/ system, discussing design and field strength measurements [UN PAPER 68-95451]
01 p0108 A69-10458International experimentation with U.S. communications satellites, noting design variations with participants and restraintless information exchange [UN PAPER 68-95421]
01 p0108 A69-10474Fucino earth station operation with Early Bird and Intelsat 2-F3 satellites receiving equipment and transmission system [UN PAPER 68-95455]
01 p0028 A69-10493Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies
01 p0030 A69-10574Communication satellites development in U.S.S.R., discussing Molniya 1 satellite design and objectives and Echo 2 satellite transmission experiments
01 p0032 A69-10949Amplitude scintillations of satellite radio signals during sunrise due to ionospheric turbulence induced electron content variations
01 p0067 A69-10980Transmitting systems of ESRO 2/IRIS satellite for ground station contact, discussing telemetry system, mission requirements and telecontrol
01 p0034 A69-11103Monopulse ground station antenna configuration for improvement of sidelobe level in satellite transmission [DVL-856]
02 p0214 A69-11599Surveyor 5 alpha particle backscattering instrument measurement, TV pictures of lunar surface elemental composition and magnetic and mechanical measurements
02 p0317 A69-12023Satellite power generation and transmission system for solar energy conversion, noting estimates of surface area and weight of collectors
02 p0323 A69-12296Aeronautical satellite system to relay communications at VHF or L band frequencies from aircraft flying over oceanic routes
03 p0464 A69-13235WEFAX /Weather Facsimile/ experiment to explore operational feasibility of direct meteorological data transmission via satellite relay from central station to remote stations
03 p0411 A69-13240Graphical data on atmospheric and rainfall attenuation of spacecraft earth signal, emphasizing transmission via satellites
03 p0397 A69-13727Total ionospheric electron content determination from measurement of phase differences of satellite transmission, discussing data processing and differential Doppler effect measurements
04 p0592 A69-14766Sound and TV broadcasting from satellites, discussing systems for future individual user pickup
04 p0558 A69-15120Sporadic E irregularities in producing amplitude variations in radio star observations and satellite transmission
04 p0594 A69-15125Path length and path length rate variations in synchronous satellite communications link
04 p0561 A69-15448Satellite scintillation at high latitudes and possible relation to soft particle precipitation
05 p0757 A69-16406F region equatorial irregularity belt observed from satellite transmission scintillation, noting north-south elongated patches
05 p0758 A69-16418Satellite picture signal reception from ESSA, Nimbus and ATS to ascertain instrument requirements
06 p0888 A69-17651High power coupled cavity traveling wave tube for satellite communication, noting design techniques and performance characteristics
07 p1094 A69-18427Water effect on air supported radome of ground station for satellite communication
07 p1111 A69-19533Numerical determination of Doppler effect and reduced Doppler frequency difference for two coherent radio waves emitted from earth satellite
07 p1087 A69-19610Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role
08 p1274 A69-20045Direct radio and TV broadcasting from satellite-borne radio transmitter to general public, giving visibility, gains, frequencies and bandwidths tables
09 p1586 A69-21286Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons
09 p1451 A69-21293Computer program for processing actinometric data transmitted from Cosmos 122 satellite
11 p1913 A69-24831

Worldwide clock synchronization by geostationary satellite transponder relaying VHF signals from

reference clock, noting accuracy of radio propagation delay prediction

12 p2080 A69-26053

Scintillation index variations based on 40 MHz Explorer 22 satellite signals recorded in Germany

12 p2034 A69-27094

Soviet satellite-borne radio waves studies of ionosphere, considering wave amplitudes, Doppler frequency shifts and outer ionosphere properties

13 p2252 A69-27349

Instructional broadcast satellites programming for time cost reduction, discussing frequency allocation, interference and ground station design

13 p2381 A69-27373

Satellite 40 mc signal scintillations near sunspot minimum, noting scintillation index dependence on angle between radio ray and magnetic field

14 p2439 A69-29114

Computer program for STV-F9 satellite communication parameters, using ELDO forecasting values as input data

14 p2530 A69-29689

Omega/VLF transmission range rate measurements for satellite Doppler navigation to provide velocity and location data, noting propagation error

14 p2479 A69-29857

Faraday angle of rotation of radio signals polarization plane from satellites and celestial bodies

15 p2568 A69-30744

Aoriste antenna to receive radioelectric signals from satellite emitter at distance of 10,000 km

15 p2580 A69-31095

Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons

15 p2570 A69-31227

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms

16 p2751 A69-32103

Signal records from S 66 satellite with strong scintillations, noting fluctuation well described by Nakagami m-distribution and possibility of deriving relations between different indices

16 p2777 A69-32104

Satellite radio signal scintillation variations association with sporadic E and spread F and dependence on magnetic activity in Southern Hemisphere during sunspot minimum

16 p2780 A69-32307

First order Doppler shift in ionosphere and horizontal gradients influence, discussing total electron content determination method made from geodetic satellites using two coherent frequencies

16 p2755 A69-32614

Doppler shift measurements at two coherent frequencies from Diadem satellites to determine ionospheric electron content, discussing accuracy and parameters defining satellite passage

16 p2785 A69-32615

Waveguide feeder for Goonhilly Downs satellite communication antenna reducing feeder loss for use with low elevation Intelsat 3 satellite

17 p2935 A69-32849

Europa 3 rocket design, comparing 2 ton geostationary satellites and 700 kg satellite conceptions

17 p3045 A69-33095

Antenna array construction for reception of weather satellite transmissions, noting automatic picture transmission systems/APT

17 p2946 A69-33767

Irregularities distribution in antarctic ionosphere from polarization angle fluctuations of satellite S-66 radio signals, discussing diurnal magnetic and solar cycle effects

18 p3125 A69-34249

Quasi-transverse /Q-T/ point time lag on Faraday rotation records at widely spaced frequencies during satellite pass explained by refraction theory

18 p3100 A69-34251

Image dissector meteorological cameras, discussing ATS-III and Nimbus systems, high resolution camera and multispectral cameras

18 p3137 A69-35101

Digitized video cloud picture data from ESSA satellite, discussing mesoscale archive and computer products including time averages and composites

19 p3279 A69-35810

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by Cosmos satellites short wave transmitter radio signal scintillation statistical evaluation

19 p3304 A69-36624

Satellite and terrestrial point-to-point communication circuit costs, considering multiple access and small antenna earth stations

19 p3456 A69-36822

Ionospheric electron content and concentration variations analysis based on data of radio waves propagating from satellite, considering Doppler shift and Faraday effect

20 p3486 A69-37027

Computer based onboard satellite PCM telemetry, showing improved adaptability, size and cost reduction

20 p3500 A69-37382

Satellite onboard transmission measurements determining atmospheric water vapor influence on integrated refractivity at specific absorption line resonant frequency

20 p3545 A69-38097

Diffraction pattern of satellite signal field-aligned amplitude scintillation during quiet geomagnetic conditions

20 p3497 A69-38108

Multispectral radiometric analysis of ERTS images, discussing image registration, SNR and atmospheric and diffraction effects

21 p3721 A69-38627

Discrete filters for optimal processing of down-linked satellite data, considering inverse filter development by Kalman filtering techniques

21 p3677 A69-39462

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities

22 p3942 A69-41095

Satellite scintillating signals amplitude distribution, correlating observations and theoretical results

23 p4115 A69-41486

Power combining network for high power UHF solid state satellite transmitters with low loss, compact size and input port selection capability

23 p4137 A69-41743

Relativistic Doppler shift effect observed from radio signal periodic variation of GEOS-1 satellite

23 p4126 A69-42389

Faraday rotation diurnal variation plotted by analyzing radio transmissions from Canary Bird geostationary satellite, considering ionospheric electron density peak

23 p4160 A69-42433

Ionospheric electron content measurements at low latitudes close spaced frequency and differential Doppler shift technique, using BE-B and BE-C satellite transmission

23 p4161 A69-42435

Multiple access discrete address system /MADA/ for digital modulation communication systems for satellite networks, using time division techniques

23 p4130 A69-42512

Distributed communications for earth orbiting global satellite network defined parametrically, describing relay/switching and terminal station satellites

23 p4130 A69-42515

Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR

23 p4130 A69-42520

PCM satellite communication systems signal power and frequency bandwidth requirements, noting PCM-psk superiority over FDM-FM

24 p4283 A69-43200

I-V characteristics of electron emitting satellite in ionosphere, analyzing spherical Langmuir probe in collisionless plasma in magnetic field

14 p2511 A69-28956

SATURATED HYDROCARBONS

U ALKANES

SATURATION

Saturation effect theory in gas system, taking into account Doppler expansion and collisions based on density matrix

03 p0437 A69-13042

Carbon dioxide band vibration-rotation transitions saturation characteristics, stressing role of collisions in molecular gas lasers

14 p2457 A69-28928

Laser-nonlinear crystal dynamical interactions, studying saturation and coherence properties of second harmonic wave generated inside laser cavity

15 p2632 A69-30026

- Different parametric converters amplitude characteristics analysis for determining necessary pumping power, allowing for saturation
15 p2574 A69-30119
- Pulse radar quantum paramagnetic amplifier protection from saturation by transmitter power, using linear electrical bias of EPR line
15 p2579 A69-30956
- Magnetic anisotropy and porosity from approach to saturation of polycrystalline ferrites based on magnetization measurement
16 p2825 A69-31700
- Q switching of CW 337 mu maser, gain factor measurements for pulse discharges and data on saturation and time dependence
17 p2981 A69-33088
- Diffusion times for saturated region in Hipernom tubes measured for various exciting magnetic fields and pulse duration
23 p4141 A69-42222

SATURN (PLANET)

- Two element interferometer observing Saturn, Uranus and Neptune at 3.12 cm, determining equivalent black body disk temperature
01 p0148 A69-10052
- Saturn ring gravitational field perturbations of space vehicle orbit on flyby mission solved by particle motion perturbation theory
03 p0508 A69-13260
- Saturn ring formation by satellite spiral into Roche limit and disintegration
04 p0660 A69-15128
- Saturn rings optical properties and thickness from edgewise photometric observations, noting luminance relationship to direct brightness
07 p1219 A69-19335
- Photographic photometry of Saturn rings around times of disappearance /1966/
08 p1381 A69-19791
- Latitude measurements for features on Saturn, discussing means and standard deviations
08 p1394 A69-20618
- Magnitude data for Saturn satellites compiled and analyzed, noting discrepancy for Iapetus
08 p1394 A69-20619
- Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters
09 p1602 A69-22216
- Thermal models for Jupiter and Saturn corresponding to completely convective structure, using De Marcus state equations
09 p1607 A69-22428
- Gravitational potential of circular rings used to investigate motion stability of Saturn rings
10 p1771 A69-22855
- Methane absorption distribution in 6190 A band over Saturn disk at center and polar latitudes based on spectrograms
11 p1960 A69-24731
- Visual mapping and photometric scanning of Saturn with rings from earth, noting ring brightness edgewise linear dependence on rings opening
15 p2697 A69-31256
- Mimas-Tethys commensurability of motions and inclinations, calculating libration amplitude variation by numerical integration
16 p2861 A69-32241
- Radio telescope observations at 11.13 cm for polarized E vector intensities of Saturn and disk temperature of Uranus and Neptune
17 p3039 A69-33731
- Saturn emission peak and flux density at 408 MHz determined by cross telescope, discussing mechanism for enhanced radiation at long wavelengths
17 p3041 A69-33813
- Janus discovery, discussing solar distance, rotation period, diameter, opposition brightness and planetary parameters derived from pictures
20 p3597 A69-37337
- Photographic and spectroscopic observation of Saturn at Cassegrain focus of 122 cm reflector during earth passage through ring plane, discussing Saturn satellites
20 p3600 A69-37481
- Saturn ring dynamical structure theory supported by observations of knots or condensations
20 p3600 A69-37482
- Optical properties and thickness of Saturn rings from observations during ring plane crossing of earth or sun, determining Tethys diameter and albedo
20 p3605 A69-37821

- Saturn surface spectrum near ring shadow examined for water vapor content in ring and greenhouse effect on surface
20 p3616 A69-38305

SATURN LAUNCH VEHICLES

- Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model
04 p0645 A69-14475
- Electrostatic control for portable clean rooms, describing fabrication, assembly and checkout problems with Instrument Unit /IU/ control center for Saturn launch vehicles
19 p3428 A69-35550
- Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation [AIAA PAPER 69-876]
21 p3824 A69-39402
- Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth
22 p4020 A69-40319
- Cape Kennedy Space Center mobile launchers and auxiliary equipment for Saturn vehicles, discussing functions, design and systems
24 p4297 A69-43036

SATURN PROJECT

- Saturn software configuration accounting and reporting system for document change and information retrieval
18 p3105 A69-34269

SATURN S- 1C STAGE

- Digital computer systems design optimization based on operational experience in development of Saturn S-1C stage Automatic Test and Checkout System
03 p0400 A69-13233
- Nondestructive weld tests of propellant tanks in Saturn V-S-1C stage
07 p1140 A69-18798
- Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating [AIAA PAPER 69-318]
09 p1611 A69-22383
- Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-1C stage, using IR radiation data
10 p1653 A69-23049
- Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests [AIAA PAPER 69-335]
13 p2242 A69-28271
- Saturn S longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency [AIAA PAPER 69-548]
16 p2868 A69-32658
- Saturn S S-1C stage propulsion performance, using engine parameters from telemetry rather than accelerometer data, analyzed by iterative techniques and computer program [AIAA PAPER 69-733]
16 p2839 A69-32672

SATURN S- 2 STAGE

- Ultrasonic inspection systems to determine and record bond quality on all adhesive bonded assemblies of Saturn S-2 booster and Apollo Command and Service Modules
15 p2632 A69-31515
- Sprayable polyurethane foam external insulation for liquid hydrogen and oxygen storage aboard Saturn S-2 booster
24 p4337 A69-43453

SATURN S- 4B STAGE

- Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile
01 p0087 A69-11149
- Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
05 p0784 A69-16487
- System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
07 p1228 A69-18338
- LASSO /modified S-4B/IU/ vehicle mission to place in orbit two unmanned Lunar Modules for landing of radio and optical telescopes on lunar surface
18 p3136 A69-34813

SATURN STAGES

- Feasibility of nuclear stage for space missions, discussing Saturn 5 third stage replacement, payload gain, reactor and engine size
08 p1409 A69-20158

- NERVA rocket engine with 200,000-250,000 lb thrust to replace Saturn 5 upper stage for manned interplanetary flights, discussing Mars flight
08 p1410 A69-21029
- Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements [AIAA PAPER 69-555]
16 p2867 A69-31849

SATURN 5 LAUNCH VEHICLES

- Pressurization system for liquid rockets, analyzing inert weight and complexity reduction using Saturn 5 S-4B stage
02 p0305 A69-12386
- Large convective clouds in superheated air generated by static tests of Saturn 5 first stage
03 p0462 A69-14125
- LOX preclude accumulator system with He pressurant for prevention of Pogo effect on Saturn 5
04 p0666 A69-15298
- Integrated nondestructive testing systems to ensure welded assemblies reliability for Saturn 5 program, including surface defect detection
07 p1117 A69-19699
- Saturn 5 holddown and service arm electrical system design program optimized by integrating reliability and maintainability at initial design phase [AIAA PAPER 69-309]
10 p1670 A69-23043
- Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program
10 p1699 A69-23050
- Computerized shake test facility for Saturn 5 moon rocket, describing data acquisition, magnetic tape units, X-Y plotters, display devices, etc
10 p1672 A69-23285
- Saturn 5 unstable longitudinal oscillation due to coupling of structure and LOX line frequencies solved by helium injection
11 p1967 A69-25497
- Saturn 5 boost phase environment simulation on Apollo stages, discussing fixtures, load devices, instrumentation and ground test
15 p2588 A69-30405
- Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency [AIAA PAPER 69-548]
16 p2868 A69-32658
- Saturn 5 transular payload capability encancement by fuel biasing, propellant utilization systems, trajectory shaping and programmed mixture ratio scheme [AIAA PAPER 69-451]
16 p2839 A69-32669
- Saturn 5 system simulation showing feasibility, efficiency and economy of real time simulation using large mathematical model and general purpose digital computer
18 p3113 A69-34268
- Computer simulation model for Saturn 5 prelaunch system reliability analysis, using Bayesian techniques
18 p3207 A69-34529
- Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program
19 p3431 A69-36329
- Plastics applications in Apollo-Saturn 5 program, considering foam, honeycomb, conformal coatings, embedment compounds, dielectrics, damping compounds, adhesives, sealants and gaskets
21 p3751 A69-38533
- Apollo-Saturn 5 propulsion and structure feedback loop, analyzing Pogo components and Nyquist plot application [AIAA PAPER 69-877]
21 p3824 A69-39403
- Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure [AIAA PAPER 69-883]
21 p3764 A69-39409
- Manned flyby and stopover missions to Mars and Venus with chemical propulsion and Saturn 5 launch vehicles, noting short duration low energy missions [AAS PAPER 69-492]
24 p4380 A69-42839

SAWTOOTH WAVESFORMS

- Radar FM signal design with zigzag frequency variation, discussing relation between waveform characteristics and associated ambiguity function features
01 p0033 A69-11001
- Sawtooth generators production based on equivalent circuit theory, calculating linearity errors in voltages
08 p1296 A69-20105
- Spherical and rod-plate spark gap response voltage as function of sawtooth wave, cosmic, gamma and UV radiation
11 p1851 A69-25086

SC- 7 AIRCRAFT

Integrating filter analysis for effect of phase detector sawtooth characteristics on locking range of phase locked oscillator

20 p3486 A69-37011

SC- 7 AIRCRAFT

Skyvan 3 light passenger/freight carrier design, detailing power plant, installation and power management

17 p2902 A69-34192

Skyvan 2 aircraft aerodynamic design, describing modifications to increase fuel capacity, directional stability and range capability

17 p2896 A69-34193

Series 3 Skyvan design, describing controls, electric and electronics equipment, weather protection, environmental and fuel systems

17 p2906 A69-34194

Flight compartment and cabin layout of Skyvan 3 designed as freighter with passenger capability

17 p2903 A69-34195

SCALARS

Weighting functions effect in calculating average scalar electrical conductivity in Lorentzian gas

04 p0638 A69-15317

Black body radiation coherence properties characterization by stochastic Gaussian scalar potential correlation function

05 p0795 A69-16819

Brans-Dicke scalar-tensor theory, showing radiative Riemann tensor existence in absence of usual spin-2 gravitational waves

07 p1216 A69-18894

Plane symmetric perfect fluid cosmological model derived from class I considerations, evaluating scalar invariants for line element

07 p1222 A69-19586

Waveguides and resonators design by solving scalar problem for eigenvalues of elliptic operator

09 p1469 A69-22626

Largest scalar product of class and identification codes in diagnostic problems, discussing recognition

14 p2417 A69-29144

Integral scalar equation describing signal attenuation by acoustically soft disk for mirror-shadow method of ultrasonic flaw detection

18 p3137 A69-35109

SCALE [CORROSION]

Impurities effect on defects in oxygen deficient niobium, tantalum and zirconium oxide scales at high oxygen pressures, noting relationship to metal oxidation

03 p0444 A69-13312

Cobalt chromium high temperature oxidation and scale formation

08 p1332 A69-20363

Chemical treatment of Ti during processing, discussing protective coating, scale conditioning, surface contaminant removal and acid pickling

24 p4324 A69-43432

SCALE [RATIO]

Wind velocity evaluating device operating by scale enlargement

12 p2079 A69-25896

SCALE EFFECT

Smooth cylindrical shell stability under axial compression noting effects of scale factor, initial defects, initial stresses and deflections in welded seam, etc

04 p0680 A69-14929

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection

12 p2143 A69-26459

Scale factor determination for energy dissipation at clamped ends, analyzing geometric parameter and clamping force effect on oscillation damping constant

17 p3065 A69-33927

Scale factor in designing uniform strength structures for dynamic load effects determined by recording fatigue limit and failure location, using variable cross section samples

23 p4225 A69-41422

SCALE HEIGHT

Neptune atmosphere height scale and density from photometric observation of star occultation

04 p0660 A69-15061

Photoelectric observation of star occultation by Neptune for scale height determination

06 p1008 A69-17694

Mathematical expressions for measuring heights of vertical and nonvertical features with both slant and ground range radar images

13 p2263 A69-28198

Ionized gas height scale changes in polar ionosphere obtained, assuming Chapman type ionization distribution

14 p2436 A69-29052

Sunspot spectra near solar limb for difference between Fraunhofer line continuum and line core formation levels, finding geometrical height scale and pressure equilibrium

22 p4019 A69-40292

SCALE MODELS

Elastic wind tunnel models used for testing at full scale dynamic pressures, discussing scaling laws and manufacturing and testing problems

[AIAA PAPER 68-56] 01 p0011 A69-11018

Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere

04 p0653 A69-14626

Scaled models for spacecraft thermal control, considering radiation-conduction-convection heat transfer

[SAE PAPER 690196] 07 p1116 A69-18304

Small and full scale model tests for feasibility of retracted rotor aircraft for high speed flight

[AIAA PAPER 69-219] 07 p1055 A69-19550

Graphite and B filament-epoxy resin composites application to aeroelastic dynamic models, analyzing weight savings, fabrication and component stiffness

11 p1990 A69-25508

Thrust balance for scale model of powered nacelle fan jet engine from drag analysis in wind tunnel, deriving fan nozzle velocity coefficient

13 p2199 A69-27446

Multicell air cushion vehicle technology based on 1/4 scale and full scale tests, noting comparison with plenum systems and costs

13 p2202 A69-27547

Variable bypass ratio lift/thrust engine arrangement in relation to safety and economic requirements, using scale model of V/STOL

15 p2672 A69-31542

Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems

[AIAA PAPER 69-553] 16 p2840 A69-32678

Scale modeling of multilayer insulated spacecraft for thermal design, considering solar probe and two meter telescope models

[AIAA PAPER 69-613] 17 p3049 A69-33267

Critique of paper on comparison of dynamically scaled model rotor test data with discrete azimuth aeroelastic stability theory

[AHS PAPER 341A] 17 p3059 A69-33505

Dynamically scaled model rotor tested in wind tunnel to evaluate blade aeroelastic limits constructed with realistic mass and stiffness distributions

[AHS PAPER 341] 17 p3059 A69-33506

Nonrecirculating wind tunnel configuration with minimum atmospheric wind disturbances for V/STOL vehicles aerodynamic testing

[AIAA PAPER 68-398] 17 p2947 A69-34024

Thermal scale modeling for space hardware development from managerial and engineering viewpoints

[AIAA PAPER 69-1010] 22 p3922 A69-40383

Speed conditions of environmental simulation of thermal scale models of reentry vehicles, considering ablatives with phase-change and involved chemical reaction

[AIAA PAPER 69-1011] 22 p3922 A69-40384

Buoyant Venus Station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels

[AIAA PAPER 69-1017] 22 p3922 A69-40389

STOL seaplane bottom pressure distribution from tests on scale model of PX-S seaplane, discussing boundary layer control effects

22 p3864 A69-40586

Solid fuel ablation and supersonic combustion processes for various propulsion configurations, testing plastic models in wind tunnel

24 p4414 A69-43569

Scale error correction technique for structural impact modeling using dissimilar materials, involving permanent deformation of spherical caps impacted into liquids

24 p4406 A69-43692

SCALING

Decibel scaling advantages in vibration measurements

04 p0602 A69-15324

Metrological measuring instrument scales selection principles for ensuring constant sensitivity and Q factor

17 p2975 A69-33614

Automated analog scaling for in hybrid computer systems imposing magnitude and frequency constraints, using equations for amplifier input factors

18 p3105 A69-34617

SCALING LAWS

Scaling laws for RF discharge experiments in ionized environments, considering proper limit variables for simulation of electron density

02 p0283 A69-12241

Geostrophic adjustment for neutral and lapse conditions, discussing similarity arguments based on appropriate length and velocity scales

02 p0276 A69-12699

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution

[AIAA PAPER 68-1158] 03 p0362 A69-13566

Scenic holographic stereograms resolution and up/down scaling, discussing roles of projector lens and camera aperture

11 p1883 A69-24690

Proposed index for measuring ionospheric scintillations, describing simplified scaling method

16 p2752 A69-32106

Blast response of model structures fabricated from material differing from prototype structures, testing in dynamic, impulsive and quasi-static loading realms

16 p2874 A69-32164

Froude number for scaling wind stress at air-water interface, verifying logarithmic wind profile and relating shear velocity to surface roughness

17 p2996 A69-33152

Full scale and transonic wind tunnel store separation characteristics, outlining uses of heavy and light scaling methods

17 p2896 A69-34035

Plane, cylindrical and spherical point explosions in combustible gas mixtures for different gas motion models, formulating scaling law for detonation wave model

19 p3449 A69-36353

SCANDIUM

Meteoritic materials investigated for Sc, Ce and Eu content and distribution in various phases, using neutron activation analysis

01 p0026 A69-11376

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices

03 p0491 A69-14053

X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices

18 p3182 A69-35046

SCANDIUM ISOTOPES

Angular distributions for Sc 45-Ti 46 nuclear reactions involving 41 Mev alpha particles bombardment described by Born approximation

22 p3988 A69-41044

SCANNERS

NT HORIZON SCANNERS
NT INFRARED SCANNERS
NT OPTICAL SCANNERS
NT SUBREFLECTORS

Current distribution in scanning rectangular array with all-directional constant sidelobe and narrowest beamwidth

04 p0570 A69-14302

Directivity and beamwidth determination of large scanning Dolph-Chebyshev arrays

04 p0570 A69-14303

Impedance matching of volumetrically scanned waveguide arrays, stressing element spacing, surface wave impedance, etc

04 p0571 A69-14312

Aircraft gas turbine component pressure data storage and scanning

05 p0726 A69-16768

Scanning beam landing systems for VTOL aircraft

07 p1178 A69-19631

High field domains in Gunn effect diode in transit time mode of operation probed with stroboscopic electron beam in scanning electron microscope

08 p1283 A69-20162

Focusing effect on far field directional pattern shifting of array normal, noting electronic scanning properties

08 p1285 A69-20400

Scanning antenna array design utilizing element coupling and telescope type cylindrical optical system

10 p1664 A69-23800

Signal processing and DC restoration in line scan devices used in land/water terrain analysis

12 p2096 A69-26980

Plasma scanner in obtaining current cross sections and current-voltage characteristics of hollow cathode magnetically confined arc plasma in argon
14 p2450 A69-29568

Microwave scanning beam landing guidance system for Swedish tactical aircraft Saab 37 Viggen, reviewing ground station and onboard equipment
16 p2735 A69-32057

Electronic device utilizing scanning beam to evaluate limb photographs, reducing errors by introducing second generator with frequency proportional to deflecting potential variation
17 p2970 A69-32884

Scanning electron microscopy to study device failure and performance, discussing limitations and progress
17 p2936 A69-32890

Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
17 p2971 A69-32891

Scanning electron microscopy of devitrifying solder glass seals for hermetic packages, biased integrated circuits and metallization corrosion
17 p2936 A69-32892

Scanning electron microscopy for reliability studies in semiconductor devices
19 p3382 A69-35788

Electronic scanning and correlation techniques for terrain sensing required in automatic stereoperception
24 p4316 A69-43566

SCANNING

NT FREQUENCY SCANNING
NT PANORAMIC SCANNING
NT RADAR SCANNING

Phase, frequency and amplitude scanning, noting array design and applications
01 p0049 A69-11348

Two dimensional electronically scanned k-band phased array antenna design and performance, discussing radiometric system
04 p0572 A69-14328

Butler matrix-fed circular array for continuous 360 degree beam scanning
04 p0573 A69-14329

Parabolic antenna beam scanning by defocusing, calculating relationship between reflector and beam tilt angles
07 p1089 A69-18248

Holography by scanning receiver, source, object or both source and receiver, discussing resolution, magnification, image position and aberrations
07 p1136 A69-19640

Hemispherical scanning with small aperture monopoles, spirals, scimitars and wire antennas, discussing various types for multiple beam operations
08 p1290 A69-20973

Northern sky scan for discrete sources of gamma rays in 240 to 1000 kev energy region by telescope on balloon flight
11 p1946 A69-24593

Holographic scanning technique for laser beam deflection, noting two and three dimensional raster scanning
11 p1885 A69-24847

Theory of field distribution in antenna aperture extended to scanning with desired shape beam
15 p2578 A69-30634

Phased array blindness at inoperative scan angles explained in terms of elements excitation and termination caused by leaky wave
17 p2928 A69-33872

Spectral analyzer for structural noise spectrum of scanning ray TV transmitter
17 p2939 A69-33909

Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854] 21 p3767 A69-39764

SCANNING DEVICES

U SCANNERS

SCAT

U SUPERSONIC COMMERCIAL AIR TRANSPORT

SCATTER PROPAGATION

NT IONOSPHERIC F-SCATTER PROPAGATION
Three-dimensional holography using scatter plates applicable to transilluminated objects in particular distribution of particles or phase disturbances
01 p0079 A69-10217

Soviet book on multichannel and TV signals transmission over radio relay links using microwave tropospheric scatter propagation
04 p0558 A69-14919

Soviet book on meteor trail scatter communications covering civil and military advantages over troposcatter systems, meteor trail scatter properties, etc
04 p0562 A69-15488

High resolution azimuth and elevation arrays sensing remote ionosphere and sea surface characteristics, discussing backscatter data for ionosphere and sea scatter
14 p2448 A69-29520

Variable scatter mechanism in turbulent tropospheric propagation medium, employing dynamic meteorology concepts for frontal disturbances effect on scatter volume
17 p2927 A69-33856

Scattered ionospheric reflection distribution at evening/morning periods showing deviation, using coherent method
17 p2927 A69-33860

Electromagnetic waves scatter propagation in isotropic plasma in plane waveguide, noting electron charge density fluctuations role
23 p4125 A69-42040

NT X RAY SCATTERING

Carrier scattering mechanisms in n-type GaP, measuring IR radiation absorptivity in Te doped GaP
03 p0492 A69-14168

N-type GaAs single crystal magnetoresistivity, noting charge carrier scattering mechanisms
03 p0492 A69-14177

Monograph on atmospheric radiation transfer including absorption, scattering, direct, diffuse, global, thermal and net radiation
12 p2073 A69-26918

Normal and directional emittance for two dimensional emitting, absorbing and scattering semiinfinite plane slab based on Monte Carlo method compared with Bobco approximation
[AIAA PAPER 69-625] 17 p3005 A69-33301

SCATTERING AMPLITUDE

Polarized orbital method for calculating electron-atom scattering amplitudes, noting discontinuous wave function, nonvariational technique and strong dependence on parameter
02 p0284 A69-12702

Long range ionospheric propagation of ultrashort radio waves, obtaining diurnal and seasonal characteristics of reflected signals amplitude and duration
13 p2255 A69-28543

Spotted scattered background contrast relation to scattering system geometry during laser scattering by suspended Lycopodium spores
13 p2273 A69-28550

Plane light wave propagation in homogeneous isotropic medium with fluctuating dielectric constant using perturbation theory and integrating energy conservation law
18 p3173 A69-35127

Raman spectrum of solid alpha-nitrogen at low temperatures, calculating scattering intensities and Raman active librational lattice vibrations
23 p4194 A69-42204

Negative pions elastic scattering from hydrogen, confirming differential cross section minimum for specific incident momentum-scattering angle region
24 p4352 A69-43049

SCATTERING COEFFICIENTS

Radiation from isothermal sphere in vacuum having spherical scattering indicatrix solved by Bubnov-Galerkin method with allowance for scattering
01 p0174 A69-10106

Atmospheric extinction coefficient and backscattering function determined by laser radar using differential equation
07 p1126 A69-18966

Lunar scattering of meter radio waves emitted by Luna 11 and 12 satellites, relating glide angle scattering coefficients to satellite altitude
07 p1087 A69-19615

Reflection and transmission scattering coefficients for step type transition between two uniform waveguides with surface impedance boundaries, discussing coupled differential equations
08 p1272 A69-20020

Plane and spherical albedos of planet surrounded by infinite optical thickness atmosphere, with application to Venusian atmosphere
10 p1776 A69-23210

Transmission and reflection scattering coefficient measurements of microwave networks by Fourier analysis of transient response to impulsive or steplike waveforms
12 p2038 A69-26056

Transport equation numerical solution for unsteady radiation field by straight lines method, allowing for scattering indicatrix forms with passage of time
13 p2350 A69-27858

Backscattering intensity measurements by optical elements at 180 degrees to beam propagation direction, using CW He-Ne laser as radiation source
20 p3554 A69-37609

Normalized phase function and scattering coefficient of aerosols prediction from measurements of particle size distribution, density and refractivity based on Mie solution
21 p3719 A69-39774

SCATTERING CROSS SECTIONS

Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions
01 p0123 A69-10620

Initial ionization rates and collision cross sections in shock heated argon in low pressure shock tube, using double electrostatic probes
01 p0132 A69-11206

Raindrop size distribution law effect on radio wave attenuation coefficient and differential effective backscattering cross section of rain
02 p0208 A69-12259

Born approximation for calculating low temperature plasma transport properties from quantum mechanical scattering cross sections on Debye potential
02 p2921 A69-12486

Angular distribution of radiation scattered by microscopic polyvinyl toluene sphere monolayer, noting intensity distribution approximation using Mie theory
[AIAA PAPER 68-30] 02 p0282 A69-12503

Elastic scattering cross section for low energy electrons on metastable He atoms, using polarized orbital method
03 p0469 A69-12922

Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees
03 p0472 A69-13464

Very thin short metallic filament scattering and absorption cross sections for various values of filament conductivity
03 p0395 A69-13623

Transport diffusion cross sections of slow electrons during scattering at inert gas atoms by microwave method, calculating electron transfer coefficients
03 p0481 A69-14143

Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
04 p0609 A69-14290

Angular distribution of reactive elastic scattering analyzed by opacity function/reaction probability/
04 p0554 A69-14859

Relativistic analysis of far zone electromagnetic scattering by conducting sphere moving through incident plane wave, calculating scattering cross section
04 p0559 A69-15212

Atomic hydrogen-bromine linear collision reaction intermediate formation and reactive scattering cross sections quantum mechanical calculation, using perturbed Morse oscillator approximation
05 p0796 A69-15911

Differential cross section frequency dependence for resonant scattering of monochromatic light by dilute gas atoms
[IEEE PAPER T-8] 05 p0776 A69-16328

Hydrogen ions collision-induced dissociation cross section angular dependence measured, showing qualitative agreement with theoretical predictions
05 p0798 A69-16698

First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions
06 p0960 A69-17027

Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion
06 p0961 A69-17135

Polar molecule rotational excitation diffusion cross sections for electron scattering
06 p0961 A69-17139

Rayleigh scattering cross sections for He, C, N and O compared with corresponding absorption coefficients, noting opacity of H deficient stars
06 p1002 A69-17319

Atmospheric droplets diameter, number density and scattering cross sections determined from laser radar return equation and Mie theory
06 p0888 A69-17483

Plane wave scattering by conducting wire impedance loaded at center, discussing loading effect on backscattering cross sections
06 p0888 A69-17512

Angular dependence of low energy electron impact excitation cross section of lowest molecular hydrogen triplet states
06 p0962 A69-17820

Incoherent scatter power measurements, comparing square law signal detection, phase coherent receiver and parametric amplifier methods
07 p1085 A69-19222

Quantitative radar determinations of radio wave scattering cross section of lunar surface layer
07 p1087 A69-19621

Quantum mechanical, dipole approximation, non-resonance light scattering cross sections expressed in terms of oscillator strengths and refractive indices
07 p1183 A69-19645

Cross sections for inelastic interactions of electrons with atoms and heavy impurity ions and processes of atomic excitation
07 p1195 A69-19652

Electron collisional excitation cross sections for upper states in Ar ion lasers
07 p1157 A69-19656

Bounds on scattering lengths, phase shifts and other scattering parameters determining cross sections, noting variational bounds for zero incident energy
07 p1186 A69-19657

Electron collisional excitation cross section calculations for atoms and ions using modified Born approximation taking into account three physical effects
07 p1187 A69-19658

Cross section calculations for elastic and inelastic electron collisions with atoms, ions and molecules and ionization of atomic systems by electrons and photons
07 p1187 A69-19660

Atomic collision theory, discussing cross section calculations by Gryzinski classical method, variational methods and Fadeev equations for three particles
07 p1187 A69-19661

Electron collision excitation of positive ions, calculating collision cross sections for transitions between levels of P term
07 p1187 A69-19714

Coupling between array antennas shown to reduce reflecting properties of Van Atta reflector consisting of linear half wave dipoles
08 p1282 A69-20037

Radar scattering cross section of finite perfectly conducting wedge for case of illumination by polarized plane wave
08 p1274 A69-20047

Absolute excitation cross sections for emission of second positive bands of nitrogen under electron impact
08 p1355 A69-20208

Collision cross sections between monatomic gas impurities and metastable atoms in He-Ne laser from output curve and impurity partial pressure
08 p1325 A69-20278

Plasma diagnostics methods for evaluating collision and transport cross sections, discussing resonance fluorescence, steady state discharge and afterglow measurements
08 p1364 A69-20476

Excitation cross sections of Fe XIV lines in solar coronal spectra, comparing computations with Coulomb-Born approximation
08 p1392 A69-20563

Inelastic transport cross sections for Lyman alpha transitions in hydrogen
08 p1357 A69-20814

Tables of effective electron cross sections and macroscopic coefficients, Volume 1, covering hydrogen and rare gas molecular and atomic interactions with electrons
09 p1541 A69-21579

Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039

Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient
09 p1579 A69-22175

Collision broadening cross sections of OH UV transition at room temperature, using flash photolysis
09 p1543 A69-22252

Line blanketing for two level atom with spectral line formed in pure absorption and noncoherent scattering, studying wavelength and depth dependence
09 p1606 A69-22424

Interplanetary magnetic fields characteristics and magnetic inhomogeneities spectra from cosmic ray variation studies used to obtain scattering mean free path
10 p1757 A69-22824

Rotational excitation and scattering cross sections for rigid diatomic molecules reduced to yield distorted wave approximation, resulting in inelastic transition probabilities
10 p1726 A69-23524

Disturbed index of refraction scattering cross sections and aircraft acceleration increments for clear air turbulence, deriving correlation for measurements
10 p1656 A69-23651

Surface currents, scattered field and scattering cross section for perfectly conducting cylinder found by reducing two dimensional problem to solving coupled differential equations
10 p1657 A69-23860

Cut-off Coulomb potential transport cross sections compared with exponentially screened potential for various cut-off radii
11 p1924 A69-24309

Resonances in cross sections for electron impact excitation of forbidden lines in oxygen molecular ion at near threshold energies for astrophysical applications
11 p1921 A69-24417

Neutron production cross sections prediction at proton bombarding energies below 50 Mev and above threshold for multiple nucleon emission
12 p2192 A69-26299

Horizontally moving body wake scattering cross section calculated with allowance for sphericity of incident and scattered radio waves, using Bessel functions
12 p2031 A69-26699

Molecular beam scattering analysis by four parameter B-C intermolecular potential, plotting expansion coefficients against reduced curvature
13 p2301 A69-27206

Negative charge production by H atoms collisions with rare gases and hydrogen, noting smooth rise of cross section with energy for rare gases
13 p2302 A69-27459

Inelastic interaction cross sections of nuclear active particles at C and Fe in 70 to 1000 GeV energy range
13 p2330 A69-28383

Inelastic interaction cross sections of nuclear active cosmic ray particles with atomic Fe and Pb in 100 to 1000 GeV range
13 p2330 A69-28384

Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
14 p2504 A69-29006

Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
14 p2487 A69-29007

Unignited mode converter and emitter work function patches, calculating electron-cesium momentum transfer cross sections from saturation current measurements
14 p2490 A69-29240

Rare gases total excitation cross sections absolute values measured in collision chamber, noting energy

distribution of exciting electron beam, fine structure, etc
14 p2493 A69-29693

Kinetic theory of gases collision cross section definition compared to usual definition, discussing time reversed collisions
14 p2488 A69-29993

Finite scattering cross section in current carriers scattering on impurities in compensated semiconductors, assuming unscreened Coulomb potentials
15 p2666 A69-30063

Partial wave description for calculating cross sections of fine structure transitions of Na in collision with He, discussing shape resonances
15 p2655 A69-30198

Low energy neutral bremsstrahlung cross sections for Ne, Ar and Xe, using rapid scanning spectrometer
15 p2657 A69-31159

Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity
15 p2657 A69-31160

Thermodynamic Green function for Compton scatter cross section of photons by electrons in hot plasma
15 p2664 A69-31479

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization
16 p2835 A69-31895

Elastic scattering cross sections of negative pions by deuterons compared with Glauber model calculations
17 p3007 A69-32885

Current distribution and scattering cross section of missile with plume/ionized trail/of tapered conductivity due to plane wave electromagnetic excitation
17 p2921 A69-33671

Spectrum and cross section of radio wave scattering in two temperature plasma, relating differential backscattering cross section to ionospheric electron density fluctuations
17 p2930 A69-33895

Plane electromagnetic wave scattering by motion of small ellipsoid in vacuum, noting total scattering and radar cross sections dependence on ellipsoid velocity
18 p3105 A69-35485

Elastic scattering cross sections for 21-Mev incident protons measured for nuclei differing in mass, determining optical model potential
18 p3179 A69-35489

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
19 p3377 A69-36179

Heated supersonic beam study of He-Ar intermolecular potential, determining total elastic collision cross section as function of velocity in scattering chamber
19 p3377 A69-36183

Molecular N rotational temperature effect on rare gases scattering cross section
19 p3377 A69-36184

Ar-Kr integral collision cross sections based on density measurements of Ar beam passed through liquid nitrogen cooled Kr filled scattering chamber
19 p3378 A69-36185

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature
19 p3378 A69-36186

Atom-atom scattering potential from phase shifts, using WKB formula and Jeffreys-Born approximation
19 p3378 A69-36189

Scattering cross sections of radio waves at wake of vertically moving body near reflecting ionospheric layer, noting wave sphericity influence
20 p3486 A69-37023

Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
20 p3486 A69-37024

Differential cross sections for elastic scattering of protons by Ar atoms in energy range 12.7-44.1 eV, estimating internuclear separation
20 p3580 A69-37499

Atom-atom collisional excitation cross sections obtained from ionization cross sections, noting Thomson classical theory
20 p3580 A69-37500

Coupled equations for determining cross sections for rotational transitions in CN induced by low energy electron impact
21 p3773 A69-38476

Semiempirical electron impact cross sections and energy loss functions applied to dayglow and auroral intensities calculation, discussing atomic and aeronomic implications

21 p3713 A69-38527

Electromagnetic wave scattering from rough layer with plane and rough interfaces, determining scattering cross sections from electrical field and power density

21 p3677 A69-39459

Diatomic-monomeric oxygen collision cross section determined from rotational line width in diatomic oxygen Schumann-Runge emission spectra

22 p3983 A69-40099

Metals conductivity under high pressure, giving theories for electrons scattering cross sections on ions and for Debye temperature

22 p3980 A69-40187

Stueckelberg formulation for transition probabilities to interpret perturbation effects in elastic scattering differential cross section measurements

22 p3987 A69-41005

Impact parameter versions of two state and Born approximations to calculate single excitation cross sections of H atoms ground state collisions

22 p3987 A69-41006

Hydrogen-hydrogen excitation collisions by impact parameter treatment, investigating rotation coupling influence in four state cross sections approximation

22 p3987 A69-41007

Nonresonant and resonant cross sections for gamma ray transitions involving isobaric-spin mixed states in Be 8

22 p3987 A69-41043

Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions

22 p3988 A69-41045

Radio wave scattering cross section in wake of body moving in ionosphere, using simplified procedure with asymptotic expressions

22 p3901 A69-41094

Inelastic collision cross sections for low energy interactions among electrons, ions, atoms and molecules determined as function of temperature, using approximate methods

23 p4194 A69-41520

Randomly oriented disks and rods scatter pattern used to determine causes of log-normal distribution of radar cross section fluctuations

23 p4116 A69-41592

Bistatic radar scattering cross sections for reentry vehicle with ionized wake

23 p4116 A69-41593

Ionospheric heating and velocity dependence of collision cross sections on transversely propagated equatorial hydromagnetic waves, discussing ordinary and extraordinary modes

23 p4161 A69-42437

Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role

24 p4351 A69-43033

Negative pions elastic scattering from hydrogen, confirming differential cross section minimum for specific incident momentum-scattering angle region

24 p4352 A69-43049

Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei

24 p4352 A69-43125

Elastic differential Li ion scattering cross sections on helium, nitrogen and oxygen

24 p4354 A69-43817

SCATTERING FUNCTIONS

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern

01 p0158 A69-11312

Probabilistic model for scattering function to solve radiative transfer problems in externally illuminated spherical shell atmosphere with perfectly absorbing core

02 p0328 A69-12751

Spatial autocorrelation functions of amplitude and phase fluctuations in plane parallel to wavefront of incident wave for conditions of multiple scatter

03 p0468 A69-13807

Flux equivalences of reflected and transmitted radiation among Rayleigh, isotropic and other scattering models

04 p0687 A69-15281

Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies

08 p1353 A69-19788

Diffuse reflection and transmission of parallel rays by homogeneous two layer slab, solving simultaneous integral equations governing auxiliary functions

08 p1350 A69-19799

Brightness coefficients for isotropic scattering of homogeneous plane layer in turbid medium, using Legendre polynomials

11 p1960 A69-24733

Angular distribution of electrons leaving plasma at electrode boundary, using kinetic Boltzmann equation with scattering function and specular reflection

11 p1933 A69-25546

Spatial distribution patterns of gaseous argon atoms scattered from solid argon surface

13 p2300 A69-28658

Coherence-polarization in remote sensing by microwave and laser means, analyzing scattering functions of rough surfaces

14 p2448 A69-29532

Anisotropic scattering of current carriers in semiconductors, obtaining general expression for mobility tensor with variational principle

14 p2508 A69-29667

Radiative heat transfer in nonisothermal scattering media of plane, spherical and cylindrical geometries separated by particle cloud

16 p2878 A69-31925

Asymptotic formulas for X and Y functions for resonance radiation scattering in layer, analyzing Doppler absorption and line profiles

16 p2813 A69-32588

Ambiguity function interaction with target scattering function in range-Doppler radar, discussing matched filtering application

20 p3490 A69-37641

Scattering equations for sonic boom waveform spike perturbations produced by atmospheric turbulence, discussing supersonic aircraft pressure signatures

21 p3646 A69-38689

Radiative heat transfer in nonisothermal absorbing and emitting media without scattering and with anisotropic and isotropic scattering

23 p4239 A69-41632

SCATTERING MATRIX

U S MATRIX THEORY

SCAVENGING

Jet engine intershaft bearing oil feed design, discussing use of nonrotating feed link and improvement of oil scavenging at high altitudes

15 p2671 A69-30702

SCENEDESMUS

Tryptic digestion of C terminal tritiated peptides analyzed with Scenedesmus ferredoxin, noting use for protein structural study

10 p1648 A69-24190

White rats diet containing alcohol-soluble fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerulus

17 p2906 A69-32930

Scenedesmus algae cell wall structure degrading to increase digestibility of cell bound protein, describing mechanical, enzymatic and chemical methods

21 p3667 A69-39701

Scenedesmus ferredoxin amino acid sequence

22 p3896 A69-40435

Oxygen exchange in Scenedesmus and Chlorella as function of carbon dioxide, compensation point, Hill activity and photorespiration, using mass spectrometry

23 p4099 A69-42528

SCF

U SELF CONSISTENT FIELDS

SCHEDULES

U COUNTDOWN

SCHEDULING

Cost and schedule planning and control /CSPC/ project progress reporting technique

05 p0850 A69-16300

Airport alternate facilities, restrictive flight schedules and fee schedules for relieving airport congestion during peak traffic hours [AIAA PAPER 69-820]

19 p3453 A69-35595

Human observers visual monitoring of multiple meter display differentially controlled by concurrent signal scheduling

23 p4081 A69-41438

SCHELKUNOFF PRINCIPLE

Magnetic field plane radiation patterns for tapered dielectric rod antennas computed by Schelkunoff principle, noting taper angle effect on lobes

09 p1464 A69-22097

SCHIFF BASES

U IMINES

SCHLEICHER AIRCRAFT

Schleicher glider AS-W15 prototype tests, discussing balsa sandwich structure and flight characteristics

10 p1633 A69-22872

SCHLIENEN PHOTOGRAPHY

Schlieren method for studying rotating sphere heat transfer during natural convection

01 p0174 A69-10095

Flow field in fluidic temperature sensor using schlieren and shadowgraph techniques [ASME PAPER 68-WA/FE-29]

05 p0763 A69-16102

Mode locked laser as stroboscopic light source potential by investigating expansion of laser produced plasma by schlieren photography [IEEE PAPER H-1]

05 p0774 A69-16315

Modified schlieren interferometer for quantitative investigation of free convection boundary layer temperature profiles

07 p1130 A69-18263

Velocity measurement by combination of Doppler principle and schlieren method involving reflection, refraction or diffraction of laser beam

07 p1135 A69-19259

Schlieren optics study of omega wave in water filled cuvette, noting propagation by wall reflected water wave

08 p1350 A69-19889

Holography applied to schlieren and phase contrast methods to enable visualization of minute phase change in light scattering object

08 p1313 A69-20176

Kine films of gas flows within highly luminous transient arc taken by laser schlieren technique

08 p1316 A69-20615

Monograph on schlieren-optical technique for plasma beam temperature measurements using photoelectric scanning device

12 p2134 A69-26120

Shadow and schlieren photography, interferometry and quantitative data treatment obtainable by high speed multiframe photographic arrangement, using laser beam

12 p2086 A69-26165

Pulsed laser holography used in conjunction with schlieren three dimensional system for observing gas density gradients at different test positions

12 p2088 A69-26179

Diffraction theory of schlieren photometric slot and wire methods for cylindrical light wave of even order, discussing Fresnel diffraction for spherical wave

12 p2088 A69-26180

Quantitative schlieren technique for one dimensional recording of light refraction in density gradients of high speed flow fields

12 p2088 A69-26181

Schlieren high speed photography systems for ballistic projectile studies, discussing use of gas lasers as nanosecond light sources

12 p2088 A69-26182

Flow field over plain or complex bodies with pressure density changes, using high speed schlieren apparatus with color strip filter

12 p2088 A69-26183

Schlieren and photoelastic methods for continuous and pulsed ultrasonic waves propagating in transparent media, discussing nondestructive testing applications

15 p2617 A69-31510

Schlieren method for visualization of refractive index changes in transparent materials, discussing application to study of elastic wave fields

17 p2973 A69-33322

Streak photographs by differential interferometer to study head wave standoff in shock tubes as function of time

18 p3085 A69-34473

Rotating static thrust propeller or hovering rotor flow field study by schlieren photography, considering vortex field, tip flow and shock wave formation

18 p3087 A69-35218

Double knife-edged double-crossing schlieren apparatus analyzed for operation principle and applied to measure hypersonic wake characteristics in hotshot tunnel

19 p3293 A69-35740

Quantitative density data from schlieren measurements by photomultiplier technique for axisymmetric flow outside diffraction bands

19 p3306 A69-35741

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography

19 p3450 A69-36361

Coherent radiation short pulses from mode locked laser permitting schlieren photography of plasma growth

21 p3736 A69-38795

SCHMIDT CAMERAS

Novas in M 31 on Tautenburger Schmidt photographs

08 p1382 A69-19873

Schmidt all-reflecting telescope for UV imaging in Apollo Earth Orbital Scientific Experiment

11 p1887 A69-25101

Astronomical data collection and evaluation, discussing digital distance measurement, photoelectric photometry, servocontrols and electronic computers suited for Schmidt telescope output

20 p3539 A69-37525

Schmidt camera image quality examined with spot diagrams, emphasizing methods of color confusion reduction over wide wavelength range

20 p3546 A69-38272

SCHMIDT METHOD

Benard convection cells analyzed by Boussinesq approximation and Schmidt-Liapunov method, obtaining boundary value problem branching solution

19 p3301 A69-36791

SCHMIDT NUMBER

Turbulent Schmidt number as function of ratio between turbulent and molecular kinematic viscosities for He, carbon dioxide and normal octane eddy diffusivities

21 p3852 A69-39432

SCHOOLS

Aerospace research pilot school /ARPS/ to train experimental test and aerospace research pilots and Manned Orbiting Laboratory /MOL/ astronauts

06 p0882 A69-17670

SCHOTTKY EFFECT

U WORK FUNCTIONS

SCHREIBERSITE

Barringerite as Fe-Ni phosphide occurring in meteorite Ollague pallasite, indicating troilite and schreibersite crystallization at high temperatures

18 p3205 A69-35433

Fe-Ni-P phase diagram studies applied to schreibersite and rhodite formation in iron meteorites

19 p3417 A69-36132

Morphologies and mechanical properties for identification of phosphides /schreibersite/ and carbides /cohenite/ in iron meteorites, noting nucleation and growth

19 p3417 A69-36133

SCHROEDINGER EQUATION

Separation of center of mass and rotational coordinates from N electron diatomic Schrodinger equation

04 p0554 A69-14861

Particle motion, deriving Lagrangian formalism equivalent to Schrodinger equation for random motion theory

07 p1182 A69-19455

Elastic medium properties recovered from reflected or transmitted plane waves at normal incidence, obtaining computational procedures and analytical solution from Schrodinger equation

13 p2300 A69-28664

Master equation in quantum optics phase-space formulation based on Schrodinger equation of motion, noting application to Volterra integral equation and Born approximation

15 p2633 A69-30307

Stellar system stability for corresponding stable barotropic gaseous system, discussing Schrodinger operator role

16 p2862 A69-32374

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for each electronic state by numerical solutions of radial Schrodinger equation

21 p3774 A69-38758

SCHULER TUNING

Schuler gyroscopic pendulum, noting magnitude requirement for gravitational field used in inertial navigation

02 p0248 A69-11593

Hybrid OMEGA inertial system for following vehicle maneuver without lag developed by combining Schuler tuned inertial data and radio position data

07 p1177 A69-19209

Mathematical basis for inertial vertical gyro development, considering Schuler conditions fulfillment with integral position correction

19 p3311 A69-36193

SCHUMANN-RUNGE BANDS

Oscillator strength determination for Schumann-Runge band system in molecular oxygen

02 p0284 A69-12832

Oxygen absorption coefficients for atomic silicon in spectral range of Schumann-Runge bands

06 p0960 A69-17090

Oxygen line absorption at elevated temperatures in Schumann-Runge system, estimating line widths

06 p0962 A69-17803

Effective cross sections of UV radiation absorption by molecular oxygen in Schumann-Runge bands at high temperatures

11 p1921 A69-24617

Nighttime molecular O densities between 100-130 km determined from Schumann-Runge absorption data for successive far UV spectra of hot star

14 p2435 A69-28959

Molecular oxygen rate of dissociation resulting from absorption in Schumann-Runge bands, calculating effects on chemistry of lower thermosphere and upper mesosphere

20 p3534 A69-38089

Absorption spectrum of diatomic oxygen excited by AC silent discharge photographed with vacuum spectrograph, associating lines with Schumann-Runge band

20 p3581 A69-38276

Diatomic-monomeric oxygen collision cross section determined from rotational line width in diatomic oxygen Schumann-Runge emission spectra

22 p3983 A69-40099

SCHWARZSCHILD METRIC

Observable surface of part of Friedmann universe calculated using analytical continuation of Schwarzschild coordinate system, noting angular extent and angle of observation effect

02 p0314 A69-11644

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity

03 p0506 A69-13090

Energy definition in relativity for steady state universes, particularly Schwarzschild universes

05 p0792 A69-15683

Schwarzschild perfect fluid spheres stability to radial perturbations, noting fluid adiabatic index relation to critical value

07 p1221 A69-19585

Coordinate transformations eliminating singularities in gravitational radius of Schwarzschild metric, noting local Lorentz transformations

08 p1351 A69-19952

Counterexample to Tangherlini argument, discussing inconsistency of postulates leading to Schwarzschild metric without field equations

09 p1540 A69-22100

Covariant equations of motion of body of variable mass in general relativity, considering Schwarzschild field, rotating mass field and Einstein static universe

11 p1965 A69-25744

Singularity of Schwarzschild spherically symmetrical solution to Einstein equations of general relativity theory, exemplifying Lemaitre coordinate system

12 p2129 A69-25974

Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc

13 p2350 A69-27823

Coordinates interpretation in Schwarzschild problem, projecting space of events by light beams onto Galilean system at infinity

14 p2516 A69-28772

Particle and light motions in Schwarzschild field, discussing acceleration beyond speed of light in reference /S/ frame of time independent coordinate systems

17 p3006 A69-33741

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius

22 p3982 A69-41063

Spherically rotating symmetric body gravitational collapse within Schwarzschild radius, presenting

trapped surface concept for asymmetrical cases and generalization of space-time singularities

23 p4219 A69-42333

SCHWASSMANN-WACHMANN COMET

Comet Schwassmann-Wachmann I orbit computation, using perturbations of all planets from Venus to Neptune

01 p0158 A69-11328

SCIATIC REGION

Cerebellar cortex reactions to sciatic nerve stimulation in rats under transverse accelerations in centrifuge

22 p3877 A69-40279

Electric responses of anterior and posterior gyrus cinguli to stimuli of sciatic nerve in cats

22 p3886 A69-41175

SCIENTIFIC SATELLITES

NT APPLICATIONS TECHNOLOGY SATELLITES

NT ORBIS CAL SATELLITE

International Radiation Investigation Satellite /IRIS/ mission, structural design, power supply and control systems

01 p0162 A69-11101

Scientific mission of ESRO 2/IRIS satellite, study of X rays and particles from sun and galaxy and primary cosmic ray electron measurement

01 p0163 A69-11102

Transmitting systems of ESRO 2/IRIS satellite for ground station contact, discussing telemetry system, mission requirements and telecontrol

01 p0034 A69-11103

ESRO 2/IRIS satellite launching checkout, count-down and breakdown of operations

01 p0163 A69-11104

Orbiting ESRO 2/IRIS energy measuring experiments, satellite stabilization, power source, communications and data recovery

01 p0156 A69-11108

Adaptive multiplex telemetry use in scientific satellite data management

02 p0212 A69-12817

European space research program, discussing government, science and industry in developing satellites and sounding rockets

03 p0520 A69-13584

Stored program computer for small scientific spacecraft, noting program and data memory capacities

04 p0569 A69-15472

Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space

[IEEE PAPER 3C-1]

07 p1230 A69-19195

Vela 4 satellite energetic particle experiment, describing instruments design and operation

[IEEE PAPER 3C-2]

07 p1134 A69-19196

AZUR satellite movement simulator for thermal control tests, describing assembly

08 p1300 A69-20095

Spin stabilized spherical satellite in high elliptical orbit for lower thermosphere measurements during entire solar cycle

09 p1610 A69-22009

European space research program, discussing government, science and industry in developing satellites and sounding rockets

11 p1966 A69-25102

Scientific aims, optical design, instrument data, control and orbit operation of European Large Astronomical Satellite used in UV observations

13 p2264 A69-28477

European space program developmental and fabrication problems in satellite structure development covering booster constraints, mission constraints, tolerances, etc

13 p2357 A69-28479

Scientific satellite checkout system tests by manual, automatic and self test control

13 p2243 A69-28480

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

14 p2446 A69-29047

Scientific satellite 1 solar cell panels power output dependence on temperature and spin calculated and compared with results for outdoor sunlight

15 p2552 A69-30072

ESRO 1/Aurora scientific satellite for ionospheric phenomena observation, discussing management structure and development process

15 p2702 A69-31080

ESRO 1/Aurorae satellite for Arctic ionosphere and aurorae observation, discussing electrons and protons measurements and auroral photometry
15 p2702 A69-31081

Centro Ricerche Aerospaziali objectives, equipment and activities in aerospace research, including space flight simulation facilities and scientific satellite launching range
15 p2724 A69-31456

AZUR research satellite HF communications system, describing telemetry transmitter, command receiver and data transmission
16 p2759 A69-31854

Data processing for scientific rocket research, considering pulse counters, multiplexers, converters and programmers
16 p2755 A69-31858

Thermal control system for AZUR research satellite, tabulating extreme flight temperatures and permissible temperature range from simulation test data
17 p2903 A69-33427

European Space Research Program report on HEOS-A satellite, noting planetary physics research particularly in magnetic fields, cosmic radiation and solar wind
18 p3207 A69-34628

TD1/TD2 satellites power supply subsystem, stressing high power requirements and significant design features regarding battery and solar array controls
18 p3093 A69-34791

Scientific satellites structural design problems, considering limitations imposed by weight, layout, environmental conditions, mission and manufacture
18 p3208 A69-34792

ESRO Large Astronomical Satellite /LAS/ observatory in orbit, discussing operation, design and instrument settings in scientific package
18 p3208 A69-34793

OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
19 p3432 A69-36674

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program
19 p3432 A69-36750

Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing
23 p4132 A69-41735

Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] 24 p4379 A69-42825

SCIENTISTS

Scientists involvement in planetary spacecraft missions, considering organization for particular instruments and more complex payloads
[AAS PAPER 68-192] 02 p0311 A69-11473

Scientific and technical information flow sources, showing DOD user need within defense industry and importance of local work environment
02 p0204 A69-12219

Organization behavior models compared in theory of scientific and professional personnel management, noting compromise between excess restrictions and freedom
[AIAA PAPER 68-805] 08 p1422 A69-20196

Organizational behavior of scientists noting working environments, effectiveness of work sections, research management and organizational development
08 p1423 A69-21124

Unutilized ideas in university laboratories, showing generation and implementation enhancement by marketing experience and product development background
15 p2720 A69-30596

Behavioral differences between engineers and scientists with reference to work environment
15 p2721 A69-31073

Book on digital electronics for scientists covering digital circuits and instruments for measurement, control or computation
18 p3112 A69-34915

Organizational identification of scientists as professional employees, exploring degree of loyalty and perceived self prestige
21 p3855 A69-38765

SCINTILLATION

Ionospheric irregularities height measurement using spaced receivers for recording satellite signals
01 p0064 A69-10428

Amplitude scintillations of satellite radio signals during sunrise due to ionospheric turbulence induced electron content variations
01 p0067 A69-10980

Latitudinal variations in auroral and subauroral region F layer diurnal and magnetic storm pattern shown by scintillation measurements
01 p0069 A69-11127

Ionospheric electron content, slab thickness and scintillation occurrence measurements at low latitude stations
02 p0235 A69-11427

Radar target amplitude, angle and Doppler scintillation from analysis of echo signal propagation in space
02 p0211 A69-12447

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
03 p0505 A69-13081

Beryllium nondestructive tests, discussing eddy current inspection, ultrasonics, film radiography and scintillation
[SAE PAPER 680652] 03 p0444 A69-13546

Pulsar amplitude variations due to scintillation effects arising from irregular plasma refraction by general interstellar medium between source and solar system
05 p0825 A69-16354

Satellite scintillation at high latitudes and possible relation to soft particle precipitation
05 p0757 A69-16406

F region equatorial irregularity belt observed from satellite transmission scintillation, noting north-south elongated patches
05 p0758 A69-16418

Statistical comparison of scintillation depths of Transit 4A satellite to radio star Cassiopeia A
07 p1215 A69-18821

High latitude transition or scintillation boundary between high and low amplitude fluctuations of satellite radio beacon signals examined as function of time
07 p1125 A69-18846

Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
07 p1157 A69-19641

Interplanetary scintillations of 3C 279 and CTA 21 combined to derive solar wind density fluctuation model, using random thin screen theory
08 p1385 A69-20069

VHF satellite signal scintillation by ionospheric irregularities with sharp boundary [such as sporadic E], noting diffraction pattern dependence on phase shift
09 p1489 A69-21713

Laser beam optical scintillation under atmospheric turbulence conditions, showing log amplitude variance saturation and decrease
09 p1517 A69-22079

Laser beam scintillation at night over long atmospheric horizontal paths, showing log amplitude covariance observation in agreement with theoretical prediction
09 p1517 A69-22080

Scintillation fading of VHF beacons on synchronous satellites, noting amplitude fluctuation depth and rate
09 p1457 A69-22461

Solar flare relation to interplanetary scintillation indices and power spectra
09 p1582 A69-22751

Atmospheric scintillation effect on planetary brightness distribution over disk from photometric measurements
11 p1960 A69-24729

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
12 p2144 A69-26722

Interplanetary scintillation and angular spectrum of radio waves scattered by solar plasma, noting magnetospheric tail and solar wind
12 p2161 A69-26942

Scintillation index variations based on 40 MHz Explorer 22 satellite signals recorded in Germany
12 p2034 A69-27094

Radio star scintillation data, establishing periodic variations in rates within 1 to 1.5 years
14 p2515 A69-28763

Pulsars dynamic spectra, suggesting inadequacy of interstellar scintillation models to explain observed dependence of decorrelation band widths on frequency
14 p2517 A69-29087

Satellite 40 mc signal scintillations near sunspot minimum, noting scintillation index dependence on angle between radio ray and magnetic field
14 p2439 A69-29114

Log amplitude variance calculation methods compared in statistics of optical scintillation by application to measurements with laser
14 p2486 A69-29642

Stellar scintillation spectra for different zenith distances, correlating data with meteorological conditions at time of observation
15 p2647 A69-30165

Interstellar hydromagnetic waves due to streaming cosmic rays indicated by pulsar scintillations studies
15 p2676 A69-30889

Electron ion recombination role in atomic collision process in rare gases ionization path, considering scintillation mechanism
15 p2655 A69-30961

Scintillation magnitude related to range and turbulence strength in near earth optical propagation, using pulsed and helium-neon laser
15 p2570 A69-31030

Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence
15 p2570 A69-31309

Optical communications experiments for quantitative data at 6328 Å on system fading due to scintillation and atmospheric turbulence effects on coherent propagation at 10.6 micron
16 p2748 A69-31564

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms
16 p2751 A69-32103

Signal records from S 66 satellite with strong scintillations, noting fluctuation well described by Nakagami m-distribution and possibility of deriving relations between different indices
16 p2777 A69-32104

Scintillation index determination, discussing data reduction methods, standard test records, calibration at stations with modest equipment and simulation on digital computer
16 p2751 A69-32105

Satellite radio signal scintillation variations association with sporadic E and spread F and dependence on magnetic activity in Southern Hemisphere during sunspot minimum
16 p2780 A69-32307

Radio sources interplanetary scintillations and cross correlation coefficient real time determination
17 p3038 A69-33727

Wavelength dependence of stellar scintillation, discussing apparatus to detect color effect in twinkling
19 p3401 A69-35809

Ionosphere disturbances due to high altitude thermomolecular explosions, discussing experimental proof by Cosmos satellites short wave transmitter radio signal scintillation statistical evaluation
19 p3304 A69-36624

Aircraft measurements of scintillation of ground based light source, calculating autocorrelation functions and intensity fluctuations spectra
19 p3279 A69-36881

Ionospheric scintillation power spectrum measurements from radio star and satellites related to F region radio refractive index fluctuations
20 p3534 A69-38093

Diffraction pattern of satellite signal field- aligned amplitude scintillation during quiet geomagnetic conditions
20 p3497 A69-38108

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
21 p3781 A69-39135

Stellar scintillation spectra theory extended to rectangular apertures, generalizing to planetary scintillation and effects of diffraction, atmospheric dispersion and seeing
21 p3773 A69-39771

Latitude variation of radio satellite scintillation related to small scale ionospheric irregularities
22 p3899 A69-39972

Satellite scintillating signals amplitude distribution, correlating observations and theoretical results
23 p4115 A69-41486

Coherent light propagation through turbulent atmosphere observed by applying He-Ne lasers to simultaneous measurements of scintillation effects over homogeneous optical paths
24 p4344 A69-43114

SCINTILLATION COUNTERS

Scintillation gamma spectrometer on Luna 10, eliminating charged particle background by fabricating detector from NaI single crystal in scintillating plastic container
01 p0084 A69-11314

Photomultiplier geometry without use of light pipes for uniform response from large area single and double sheet plastic scintillation detectors

03 p0428 A69-13107

Balloon-borne SPARMO detector SC 67 used for measuring radiation at high altitudes

05 p0762 A69-15823

Large area scintillation telescopes with cubic geometry, measuring cosmic rays intensity from vertical and slant directions

06 p0925 A69-17296

X ray microanalyzer maximum sensitivity obtained using flow type proportional and scintillation counters with proper tuning and eliminating scattered electrons

12 p2093 A69-26596

Cosmic ray particles with fractional charge at sea level searched by scintillation counters with spark chambers, estimating quark flux intensity

13 p2333 A69-28425

Rocket-borne scintillation spectrometer for cosmic photon radiation

14 p2449 A69-29566

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma

14 p2452 A69-29809

Quark detection in cosmic rays at sea level using scintillation counter and streamer chamber system

15 p2674 A69-30308

Faraday rotation measurements of signals from Explorer 22 analyzed to determine scintillation boundary in auroral ionosphere

15 p2605 A69-31443

Proposed index for measuring ionospheric scintillations, describing simplified scaling method

16 p2752 A69-32106

Variable time lapse videoscintiscopes in medical applications, discussing implementation of TV camera, signal tape recording and audio activation

18 p3134 A69-34541

NaI/Tl/ and CsI/Tl/ scintillation counters effectiveness in recording low energy protons against counter noise background

18 p3138 A69-35255

Transparency and luminescence yield of plastic scintillators prepared from polymethyl methacrylate, comparing naphthalene and benzene compound additions with polystyrene

21 p3724 A69-39073

Random function output current obtained in phototube and scintillation detector including amplitude distribution, time measurements and pulse shape discrimination

22 p3947 A69-40670

Diurnal variations in solar cosmic ray muon component near sea level, using scintillation counters assembled in muon telescope array

23 p4207 A69-42498

Solar high energy gamma ray flux abrupt increase detected by neutral particle plastic scintillators at balloon altitude

24 p4371 A69-43612

SCINTILLATION SPECTROMETERS

U SPECTROMETERS

SCINTILLATORS

U SCINTILLATION COUNTERS

SCINTILLOMETERS

U SCINTILLATION COUNTERS

SCISSION

U CLEAVAGE

SCORING

Scratch gages under water in open and at high temperature, including circular X-Y recording scratch strain gage

15 p2610 A69-30682

SCORPIO CONSTELLATION

U SCORPIUS CONSTELLATION

SCORPIUS CONSTELLATION

Soft X ray spectrum of Sco XR-1, noting intensity change from previous measurement

02 p0309 A69-12711

Photometric investigation in UVB and H alpha of early B stars in Scorpio-Centaurus association, computing intrinsic colors and magnitudes corrected for interstellar absorption

06 p1001 A69-17195

Photoelectric observation of Sco X-1 variations with 91-cm reflector, tabulating results and estimating accuracy

06 p1008 A69-17695

Pulsar characteristics absence in X ray sources, noting data for Scorpius XR-1

07 p1218 A69-19254

Sco XR 1 optical and X ray spectra simultaneous observations during rocket flights

07 p1220 A69-19391

Low energy X ray spectra of Sco X-1 and Sagittarius sources measured by Be and Al window proportional counters during rocket flight

09 p1574 A69-21460

Sco X-1 optical spectrum magnitude and color changes, proposing variable black body model

09 p1601 A69-22213

Radio emission time variation from radio object associated with Sco X-1

09 p1603 A69-22268

Photoelectric spectrum scanning and IR photometric observations of Scorpius XR-1 X ray source

09 p1604 A69-22401

Spectrum of high energy X ray flux from Sco XR-1 during balloon flight using active collimator detector and graded shield detector

09 p1584 A69-22766

Modulation collimators determining angular sizes and celestial positions of X ray sources Sco X-1 and Taurus XR-1

10 p1678 A69-23326

Proper motions and positions of X ray source Sco X-1 and surrounding stars derived from astrophysical plates using overlap technique

12 p2152 A69-25798

X ray polarization from Sco X-1, noting spurious instrumental polarization due to cosmic ray anisotropy using X ray polarimeter

12 p2149 A69-26315

Scorpius XR-1 X ray emission spectra, discussing Fe emission line near 7 kev plasma models, supernova mass and cosmic abundance

13 p2325 A69-27313

Sco-Cen B stars radial velocities, determining spectroscopic binaries

14 p2519 A69-29136

Spectral classifications and UVB photometry for southern association Sco OB 1 containing cluster NGC 6231

15 p2692 A69-30771

Sco X-1 fluctuating optical and X ray emission observed simultaneously, determining total energy flux and plasma radius and density

15 p2676 A69-30885

Five color photometry of X ray source SCO X-1 in 1966-1968, discussing luminosity pulsations and flare activity

16 p2847 A69-31648

Time variation of optical intensity of Sco X-1 X ray source, evaluating photometric data by power spectral analysis

16 p2852 A69-32805

Nocturnal D region conductivity enhancement relation to X radiation from Scorpius XR-1 and other sources, calculating ion production rate

17 p3024 A69-33378

Radio emission from Sco XR-1 shown as synchrotron radiation of relativistic electrons in low density region surrounding denser core producing X ray

20 p3597 A69-37334

Star counts in Ophiuchus nebula darkened region /Scorpius-Ophiuchus/ and in comparison fields Corona Australis and Sagittarius

20 p3604 A69-37788

Scorpius X-1 X ray star model based on relativistic electron distribution due to magnetic field fluctuations, considering role of Alfvén waves

20 p3593 A69-38154

Sco X-1 X-ray source energy spectrum and time variation from rocket flights in India

22 p4030 A69-40774

Radial velocities for O and B stars in Milky Way field in Scorpius determined from prism spectrograms with specific dispersion at H gamma line

23 p4211 A69-41489

SCOTCHLITE (TRADEMARK)

Retroreflector and Scotchlite object images obtained in long range holography with Q switched ruby laser, noting atmospheric seeing conditions

23 p4167 A69-42184

SCOUT LAUNCH VEHICLE

Rocket motor integration into Scout vehicle to improve performance

02 p0335 A69-12384

Scout launch vehicle for launching small research satellites in near earth orbits, describing solid propellant stages, guidance, telemetry and beacon systems

06 p1016 A69-17597

SCR (RECTIFIERS)

U SILICON CONTROLLED RECTIFIERS

SCRAMJET ENGINES

U SUPERSONIC COMBUSTION RAMJET ENGINES

SCRAMJETS

U SUPERSONIC COMBUSTION RAMJET ENGINES

SCREEN EFFECT

Screening of high density plasma from penetration by neutral gas, discussing prevention of high energy losses by charge exchange collisions

02 p0288 A69-12170

Charge accumulation elimination on dielectric electrodynamic channel walls, comparing resistive wall channel to high internal impedance generator

02 p0291 A69-12506

Metal surface degradation by constant density laser radiation, computing screening effect

03 p0442 A69-14221

Frequency-fluctuation correlation functions of radio wave field behind n random screens with random phase shifts calculated, obtaining statistical characteristics

07 p1076 A69-18525

Transmission coefficient of plane electromagnetic wave obliquely incident on perforated metal screen in frequency range near primary resonance of structure

07 p1076 A69-18527

Radiation probability of transmission through intervening galaxy and screening of quasar emission in universes with positive cosmological constant

10 p1790 A69-24135

Time harmonic electromagnetic waves diffraction by circular aperture in conducting plane screen between different media, using Hertz vector formulation

12 p2030 A69-26463

Electron shielding in heavily doped many valley semiconductors, discussing Thomas-Fermi screening and Mott transition

13 p3234 A69-28683

Electrostatic screening in isothermal symmetrically charged and quasi-neutral plasmas, noting confinement in electrostatic trap

14 p2490 A69-29035

Plane wave reflection and transmission by unidirectionally conducting screen, considering oblique incidence and two polarizations

14 p2421 A69-29547

Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position

14 p2493 A69-29673

Plane electromagnetic wave diffraction by screened periodic metallic strips array with real ferrite transversely magnetized to saturation

23 p4124 A69-42032

SCREENING

Screening techniques for semiconductor devices, considering component classification with respect to population strength distribution

15 p2627 A69-30840

SCREENS

Plane screen electrical shielding effectiveness calculation, using incident wave impedances associated with current loop and magnetic dipoles in transmission line equations

19 p3267 A69-35932

SCREW DISLOCATIONS

Screw dislocation interaction with partially bonded bimetallic interface, using isotropic elastic continuum approximation

10 p1802 A69-24027

Antiplane strain model for describing cracks and dislocation arrays within circular cylindrical inhomogeneity surrounded by elastic material

10 p1803 A69-24031

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role

18 p3157 A69-35246

X ray analysis of rolled and compressed Ti powder produced by calcium hydride reduction, noting coexistence of screw dislocations

21 p3745 A69-38952

SCREWS

Waveguide capacitive screw tuners effects on dissipative loss, discussing microwave measurements with copper screw tuners

16 p2757 A69-31586

Screw-nut feeder and adjustor systems with compensation for clearance and wear of cutting tools, deter-

mining efficiency for conversion of rotary to translational motion
23 p4168 A69-41414

CRIBING
U SCORING

CUTUM CONSTELLATION
Photoelectric search for delta Scuti variables in Coma and NGC 752 clusters, discussing short period variability of B, A and F stars
13 p2343 A69-27620
Short period variability of B, A and F stars observed in photometry of New Delta Scuti stars
13 p2348 A69-27803
Spectrophotometric observations of delta Scuti short period variable stars compared with model atmospheres
22 p4015 A69-40150

SDP [COMPUTERS]
U SITE DATA PROCESSORS

SE- 210 AIRCRAFT
Caravelle aircraft halting tests with barrier net
10 p1674 A69-23706

SEA-A
U EXPLORER 30 SATELLITE
U EXPLORER 31 SATELLITE

SEA KING HELICOPTER
U SH- 3 HELICOPTER

SEA KNIGHT HELICOPTER
U CH- 46 HELICOPTER

SEA WATER
Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea
01 p0008 A69-10027
Protective coatings for gas turbine engine components in marine environments, considering corrosion of diffuser, impeller, compressor case and turbine blades
01 p0099 A69-11057
Stress corrosion in smooth and prenotched maraging steels exposed to sodium chloride solution and natural sea water
14 p2467 A69-29940
Galvanostatic anodic and cathodic currents effect on stress corrosion of Be sheet in aerated synthetic sea water at 72 F
21 p3747 A69-39436
Aerospace and marine corrosion technology - Conference, Los Angeles, July 1968
21 p3747 A69-39484
Stress corrosion cracking of welded Al alloys in sea water solution, showing combined action of sustained stress, corrosive environment and heat treatment
21 p3748 A69-39492

SEALANTS
U SEALERS

SEALERS
Viscoseal sealing coefficient and friction factor under turbulent flow conditions
[ASLE PREPRINT 68AM 5B-1]
01 p0087 A69-10911
High temperature organic sealants for repairing small gas leakages in vacuum devices, tabulating test results for alkyd, epoxy, silicone and polyimide resins
11 p1907 A69-24742
Stress corrosion cracking of titanium alloys in contact with high temperature fuel tank sealants
12 p2112 A69-25945
Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance
13 p2275 A69-27344
Room temperature vulcanizing silicone rubber adhesive sealants strength and self bonding, describing primerless adhesion to Ti and Al alloys, Al, Ni and stainless steels
19 p3356 A69-35532
Integral fuel tank sealant based on various hydrofluorocarbon polymers prepared, tested and compared for physical properties
19 p3356 A69-35533
Fuel resistant elastomers evaluated for seal compounds for low temperature capability, noting epichlorohydrin-ethylene oxide as promising sealant
19 p3356 A69-35534
Low viscosity/density RTV silicone rubber sealants obtained by using glass microballoon fillers
24 p4337 A69-43454
Elastomers for SST aircraft applications, discussing properties evaluation, material selection, sealant requirements, etc
24 p4338 A69-43455

RTV silicone rubber for corrosion control coatings, high strength adhesives and low density sealants in aircraft structures
24 p4338 A69-43457

SEALING
Mechanical and physical properties and cryogenic wear tests performed on composite materials, considering NERVA cryogenic turbopump bearing retainer development
[ASME PAPER 68-WA/LUB-10]
05 p0768 A69-16133
Rectangular shock tube for use with pressure and vacuum, discussing sealing of circular end flanges to buildup tube
06 p0906 A69-16928
Nondestructive tests for determining braze bond quality of open face honeycomb seal rings, using low viscosity liquids with fluorescent additives
07 p1140 A69-18797
Bellows sealed valve for measurement of fluorine thermodynamic properties at moderately high pressures
09 p1493 A69-21428
Book on Wankel RC engine design and performance covering sealing, timing, life, lubrication, etc
11 p1942 A69-25237
Gas turbine compressor end seals, discussing air leakage paths, primary and secondary seals, design and efficiency
[ASLE PREPRINT 68AM 4B-4]
13 p2267 A69-27366
Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient
[ASLE FICFS PREPRINT 18]
15 p2620 A69-30489
Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films
[ASLE FICFS PREPRINT 21]
15 p2622 A69-30500
Leak tests for sealed electronic circuits using helium mass spectrometer
18 p3138 A69-35271
Oil-free linear motor resonant piston gas compressor, hermetically sealable to handle radioactive and dangerous gases
[ASME PAPER 69-FE-36]
20 p3466 A69-37996
Bonding mechanisms in Mo-Mn-Ti metallizing and Cu brazing in metal to ceramic seals by strength test, microscopy and electron probe microanalysis
21 p3733 A69-39599
Clamping and sealing fastener for single direction installation consisting of pin, collar and sealing collar with insert
22 p3957 A69-40831

SEALS [STOPPERS]
NT GASKETS
NT GLANDS [SEALS]
NT HERMETIC SEALS
NT O RING SEALS
NT PACKINGS [SEALS]
NT PUMP SEALS
Radial face seals lubricating mechanism noting surface waviness effect on film thickness fluctuations
01 p0087 A69-10910
Friction and wear behavior of mechanical face seals, considering techniques and lubricants for increasing product of pressure and sliding velocity
02 p0253 A69-12160
Dynamic and interfacial fluid effects in mechanical face seals, discussing hydrodynamic pressure generation
04 p0606 A69-14798
Orifice compensated hydrostatic face seal under pressure and thermal loading for aircraft gas turbine
[ASME PAPER 68-WA/LUB-6]
05 p0768 A69-16131
Seal swell prediction methods extended to include three dimensional solubility parameter concept
[ASLE PAPER 68-LC-21]
07 p1171 A69-19306
Radial liquid flow between flat annular rings /face seals/, discussing film cavitation
13 p2267 A69-27365
Turbomachinery buffer seals, buffer gas regulation and cleanup systems for operation of closed Brayton cycle power conversion system with gas cooled nuclear reactor
13 p2268 A69-27367
Sintered metal powder process for metal-to-ceramic seals for thermionic converters, giving results for tensile strength, thermal cycling and cesium corrosion
14 p2454 A69-29211

Metal insulating seals using preliminary metallization or direct brazing for applications in thermionic converter technology and irradiation capsules
14 p2455 A69-29212
Spiral grooved turbulent screw seal /viscoseal/ analysis, combining results of spiral grooved journal bearing study with turbulent fluid film theory
[ASLE FICFS PREPRINT 32]
15 p2619 A69-30482
Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle
[ASLE FICFS PREPRINT 15A]
15 p2620 A69-30483
Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B]
15 p2620 A69-30484
Noncontacting minimum leakage dynamic seal requiring liquid-vapor interface with leakage tolerance
[ASLE FICFS PREPRINT 40]
15 p2620 A69-30485
Lubrication and leakage control mechanics of face seals, considering liquid to vapor boundary within interface
[ASLE FICFS PREPRINT 22]
15 p2620 A69-30486
Face seals for jet engine mainshaft bearing compartments, emphasizing oil film and gas film seals
[ASLE FICFS PREPRINT 28]
15 p2620 A69-30487
Seal selection criteria based on maintaining fluid film between faces, discussing facial heat generation and dissipation, speed and size effects, etc
[ASLE FICFS PREPRINT 25]
15 p2620 A69-30488
Sealing mechanism theory with face seal applications, taking into account load carrying capacity and no leakage pressure gradient
[ASLE FICFS PREPRINT 18]
15 p2620 A69-30489
Dynamic seals literature review covering contact, mechanical, fixed clearance, film riding and elastomeric seals, systems and materials
[ASLE FICFS PREPRINT 29]
15 p2620 A69-30490
Hot pressed molybdenum disulphide-nickel composite film friction and wear tests in air and face seal configuration
[ASLE FICFS PREPRINT 23]
15 p2620 A69-30491
Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE FICFS PREPRINT 27]
15 p2621 A69-30492
Elastohydrodynamic lubrication of square section high pressure face seals mounted on rigid housings, considering design charts for load and leakage
[ASLE FICFS PREPRINT 16]
15 p2621 A69-30493
Gas visco seals performance analyzed for continuum flow regime, noting coefficient agreement with laminar flow analysis
[ASLE FICFS PREPRINT 34]
15 p2621 A69-30494
Gas barrier seal design producing varying unit loading on conventional contact seal faces, including geometric stability and test results
[ASLE FICFS PREPRINT 26]
15 p2621 A69-30495
Turbulent viscoseals gas ingestion and fluid inertia analysis using stability of dynamic gas-liquid interface between rotating cylinders
[ASLE FICFS PREPRINT 31]
15 p2621 A69-30496
Leakage prediction through mechanical seal by theoretical equation developed from basic fluid mechanics
[ASLE FICFS PREPRINT 17]
15 p2621 A69-30499
Lubrication and lubrication systems literature including compressible and incompressible fluid films, automotive, bearing, gear, friction, wear and boundary lubrication, seals and sealing systems
15 p2628 A69-30900
Erosion wear of graphitic and mica-ceramic materials used for sealing turbine compressors at high temperatures, including test installation
15 p2643 A69-31186
Shaft speed limitations on close clearance seals, using test data on changes in fluid viscosity causing contact and damage
[ASLE PAPER 68-LC-13]
21 p3731 A69-38763

Seals leak testing for complex manned spacecraft structures
[AIAA PAPER 69-1030] 22 p3924 A69-40399

SEAMS [JOINTS]

Seam and stitch welding in miniaturized semiconductor package fabrication, including leak rate tables
18 p3149 A69-35272

SEAPLANES

Blowing boundary layer control /BLC/ system designed for STOL seaplanes
05 p0695 A69-15546

STOL seaplane bottom pressure distribution from tests on scale model of PX-S seaplane, discussing boundary layer control effects
22 p3864 A69-40586

Beriev Be-12 cranked wing seaplane design including technical and operational data
24 p4251 A69-42796

SEARCH RADAR

Sequential logic for improved signal detectability in frequency-agile search radars, discussing target echo fading models in radar range performance prediction
01 p0033 A69-11008

Radar detector for survivors, using inexpensive microwave mixer detector crystal
06 p0878 A69-16964

Pulse Doppler radar operation, discussing Doppler shift, range resolution and systems components
10 p1659 A69-24084

Probability matrix for n order transition independent of decision taking method, applying fundamental matrices to analysis of mean number of false targets
14 p2410 A69-28836

Doubly curved reflectors for rotating search radar directional antenna, noting assembly of elliptical strips constituting segments of parabolic dishes and sidelobe suppression
16 p2763 A69-32790

Avionics of Naval E-2C airborne sentry and command and control system, discussing digital computer, search radar, etc
18 p3108 A69-34811

SEARCHING

Optimal distribution of search effort for moving target location, suggesting Markovian decision models
01 p0104 A69-10653

Aircraft Searchmeter, discussing device fitted to locate emergency radio beacon signal
06 p0878 A69-16963

Trunk and tree searching properties of Fano sequential decoding algorithms
06 p0902 A69-17400

Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
17 p2933 A69-33745

Pulsar search techniques, sources searched and discovery of NP 0527 and 0532
18 p3192 A69-34320

Search for maximum along admissible directions in optimal control systems
19 p3286 A69-35988

SEAS

NT RED SEA

Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
18 p3127 A69-34421

SEASONAL VARIATIONS

U ANNUAL VARIATIONS

SEASONS

NT SUMMER

NT WINTER

Westerly air flow frequency decline resulting in lower seasonal temperatures, tabulating Lamb categories daily maximum and minimum temperatures
13 p2222 A69-28474

SEAT BELTS

Impact mechanism in hip safety belt protection in vehicles, deriving motion for natural oscillations of upper part of human body model
20 p3482 A69-37595

Linear viscoelastic model parameters optimization for designing automobile lap seat belts, assuming abrupt impact stop
[ASME PAPER 69-APMW-25] 24 p4275 A69-43094

SEATS

NT BARANY CHAIR

NT EJECTION SEATS

Universal vestibulometric chair for inducing irritation in tests involving vestibular analyzer interaction with other body functions
02 p0200 A69-11517

Concorde aircrew seats design for electric operated tracking and lift, vertical movement accommodation seat and back tilt
15 p2553 A69-31167

SECANTS

U TRIGONOMETRIC FUNCTIONS

SECONDARY AIR

U AIR

SECONDARY COSMIC RAYS

Barometric coefficients of multiplicities calculated using cosmic ray interactions model and neutron monitors response to secondary nucleons
03 p0425 A69-14025

Coupling coefficients between primary and secondary ionizing cosmic ray variations, using stratospheric observations in Siberia during IQSY
03 p0504 A69-14224

Muon component of extensive cosmic ray showers, discussing effect of multiplicity of secondary particles created by high energy nuclear interactions
07 p1207 A69-19325

Neutron counter for measurements of atmospheric and earth leakage flux of secondary cosmic ray neutrons, discussing design and calibration
07 p1209 A69-19454

Secondary muon flux from primary cosmic ray particles monitored during minimum solar activity by telescopes at 60 mwe underground
10 p1769 A69-23827

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
10 p1769 A69-23904

Excess radiation in equatorial regions studied on-board Cosmos 137, noting contribution of primary particle multiplication to secondary radiation
10 p1783 A69-23922

High altitude balloon measurements of secondary gamma quanta intensity vertical distribution, using scintillation counter with CsI/Tl crystal
10 p1770 A69-23924

Azimuth angle distribution of secondary particles forming cosmic ray diffused cone with high energy, showing asymmetry and deducing particle transverse momentum upper limit
17 p3024 A69-33763

High energy cosmic rays primary spectrum determined from observations of secondary components including gamma rays, muons and air showers
21 p3790 A69-38822

Primary and secondary cosmic ray intensity variation with altitude from ascending balloon data, noting absorption length role
21 p3791 A69-39249

SECONDARY EMISSION

Frequency and polarization selection of neodymium glass laser oscillators by directing secondary radiation into laser cavity and duplicating spectral properties
[IEEE PAPER P-3] 05 p0775 A69-16324

Secondary emission and hollow cathode effects in low pressure hot cathode thyratron filled with hydrogen and with shield surrounded thermionic cathode
06 p0896 A69-17475

Ion formation and ion secondary emission during sputtering, discussing Saha-Langmuir equation, probability theory, simultaneous processes, mass spectroscopic analyses, etc
08 p1355 A69-20616

Secondary emission in low altitude satellite body dependent on inelastic collisions with primary cosmic ray protons
10 p1757 A69-22821

Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity
11 p1848 A69-24868

Radiation pattern as function of asymmetry in amplitude of secondary source excitation by primary aperture antenna
11 p1852 A69-25117

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory
15 p2633 A69-30121

Electron beam rotational temperature, noting discrepancies between experimental values and iterative calculations due to secondary electron effects
16 p2814 A69-32175

Auroral electrons measurement by rocket, discussing difficulties due to secondary electrons and method permitting primary electrons detection threshold determination as function of rocket position
16 p2785 A69-32617

Secondary electron emission from gas covered metal surfaces, discussing results of neutral beam investigations
17 p3008 A69-33000

Differential cross sections for secondary electron production in atomic ionization by charged particle impact, using classical binary encounter approximation
17 p3009 A69-34189

Frequencies of charged secondaries numbers emitted from nucleon-nucleon and pion-nucleon inelastic collisions, observing multiplicity regularity
18 p3177 A69-35009

Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
19 p3320 A69-35555

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components
22 p4003 A69-40274

Flexible channel multiplier made of electron conductive polymer, noting secondary yield and feedback effect
22 p3917 A69-41234

SECONDARY FLOW

Downstream secondary circulation resulting from sharp bend in fully developed turbulent pipe flow, noting departure from twin circulatory flow
03 p0419 A69-13952

Numerical solution of axisymmetric incompressible viscous fluid flows about rotating cylinder, Taylor vortex between cylinders and through labyrinth seal
03 p0419 A69-13990

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow
05 p0745 A69-15780

Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations
06 p0909 A69-17185

Transverse secondary gaseous injection penetration into confined supersonic flow
[AIAA PAPER 69-2] 06 p0913 A69-18080

Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data
[AIAA PAPER 69-473] 16 p2844 A69-32726

Finite amplitude standing transverse resonant acoustic field effects upon flow behavior of viscous fluid in cylindrical enclosure to acoustically model combustion instability
[AIAA PAPER 69-667] 17 p2954 A69-33457

Blade length effects on performance of flow straightener vanes influenced by secondary flow, noting high deflection and low aspect ratio
17 p2896 A69-33606

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization
[AIAA PAPER 69-755] 18 p3084 A69-34411

Turbomachinery aerodynamics, discussing secondary flow in blading and digital computer applications to annulus flow field
18 p3086 A69-34925

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow
18 p3123 A69-35032

Secondary flow consisting of longitudinal vortices superposed on convection flow on inclined plate, obtaining flow pattern through flow visualization
18 p3124 A69-35383

Secondary flows in confined viscous vortex for nuclear rockets, employing rotating disk in chamber end wall for recirculation
19 p3296 A69-35756

Viscous fluid secondary flow stability between coaxial rotating cylinders, using nonlinear differential equations derived from equations of motion
19 p3299 A69-36391

Viscous incompressible nonNewtonian fluids flow with treatment for steady rotational problems and oscillatory motion, considering primary and secondary motions
20 p3519 A69-38319

Secondary flow occurrence and geometry in viscous turbulent flow in square channel, using iterative solution
24 p4303 A69-43501

Laminar flow in horizontal circular tubes with uniform heat flux, analyzing combined free and forced convection effects on secondary flow
24 p4409 A69-43519

SECONDARY HARMONIC GENERATION
U HARMONIC GENERATIONS

SECONDARY INJECTION

Secondary injection effect on supersonic parallel diffuser, analyzing flow patterns, pressure distribution and recovery and heat transfer
03 p0365 A69-13991

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary injection into supersonic stream [AIAA PAPER 69-1]
06 p1039 A69-18196

Hydraulic control valves for guidance of rockets by secondary liquid injection into nozzle skirt, discussing structure, single nozzle missile and mass gain
07 p1230 A69-19293

Fluidic secondary injection thrust vector control systems for solid propellant and hydrogen-oxygen rocket engines
10 p1753 A69-23561

Flow field structure involving supersonic secondary jet interactions and separated regions in thrust vector control system
11 p1944 A69-25594

Pressure distribution in wake produced by obstacle with secondary fluids injection into boundary layer, obtaining coefficient governing resistance of obstacle to forward motion
16 p2768 A69-31604

Flow disturbances in supersonic rocket nozzles due to secondary injection analyzed by effective body approximation, including side forces [AIAA PAPER 69-443]
16 p2839 A69-32666

Directional thrust control for solid propellant rockets, describing swinging, bent rotating nozzles and secondary injection
17 p3019 A69-33332

Thrust vector control by secondary gas injection for predicting lateral thrust performance, applying method to rocket engines, secondary gas generator and injector configuration
17 p3019 A69-33333

Turbulent premixed ammonia-air flame stabilization on flameholders, discussing secondary oxygen injection into circulation zone at blowoff limits
21 p3849 A69-38808

SECONDARY RADAR

Listen-in feature, allowing general aviation aircraft equipment to receive airborne SSR reply signals, provides air to air proximity warning
03 p0464 A69-13247

Secondary radar equipment functions and features forming IFF-SIF chain, discussing displacement controller and minor lobe suppression functions technical problems
05 p0721 A69-16591

Synchronous extractor for simultaneous extraction and association of primary and secondary radar videos in civil system, discussing automatic identification process
05 p0721 A69-16592

Secondary radar for air traffic control automation in France, discussing onboard equipment
10 p1723 A69-23705

Primary-secondary radar /SECAR/ integration for air traffic control, discussing problems of simultaneous display, transmission synchronization, signal multiplexing, etc
15 p2570 A69-31222

Secondary radar system chosen by EUROCONTROL Agency for civil air traffic control at Shannon and Brussels airports
15 p2571 A69-31501

Secondary radar IFF/SIF /Identification Friend or Foe-Selective Identification Feature/ system, describing ground and onboard radar and data processing equipment
19 p3278 A69-36702

SECONDARY WAVES
U S WAVES

SECRECTIONS
NT ENDOCRINE SECRETIONS
NT HORMONES
NT SWEAT

Allelopathy, discussing application to gas liberating activity of edible plants as ingredients of space flight life support systems
02 p0198 A69-11509

SECTORS

Stiffness matrices for sector elements under membrane stress, considering alternative displacement distributions within element
04 p0676 A69-14728

Lift drag ratio for conical sector with V-shaped wing at zero incidence
06 p0858 A69-17340

SECULAR PERTURBATION

U LONG TERM EFFECTS

SEDIMENTARY ROCKS

U COAL
U SANDSTONES
U SHALES

SEDIMENTS

Space photography to provide synoptic sedimentary environmental data analysis, discussing orbital sensing advantages
05 p0753 A69-15993

Space photography as sedimentological research tool demonstrated by space photographs application to projected Mars mission
09 p1490 A69-21797

Demixed layer at wall in shear flow of nonsedimenting suspensions with different geometries due to viscous and inertia effect superposition
13 p2251 A69-28498

Sediments and crude oils analyzed for fatty acids, considering abiological or bacterial origin of acids
20 p3523 A69-37538

SEEBECK EFFECT

Peltier measurements below 4 K capable of measuring low Seebeck coefficient on high resistivity alloys and in presence of magnetic field
14 p2449 A69-29563

Semiconducting properties of lanthanum-cobalt oxide measured, using Seebeck coefficient for analysis as function of resistivity
21 p3780 A69-38612

SEEDS

Wheat seedling germination and growth processes in absence of gravitational force onboard Biosatellite 2
01 p0015 A69-10932

Change in content of dry matter, sugars and ascorbic acid in plants after action of space flight factors on seeds of these plants
10 p1645 A69-23495

Weightlessness and vibration effects on soft red winter wheat seedlings
15 p2557 A69-31368

SEEKERS

U HOMING DEVICES

SEGMENTS

Traveling wave tube segmentation, analyzing effects of drift, grouping and selecting sections on efficiency and amplification
03 p0407 A69-13985

SEGREGATION

U SEPARATION

SEISMIC ENERGY

Sonic boom produced earth particle velocities, noting seismic effect limitation to boom pressure envelope area and earth surface boundary
14 p2393 A69-29880

Lunar seismology, discussing Apollo 11 instrumentation and experiments, moonquakes and travel times measurements and lunar tides
19 p3315 A69-36765

SEISMIC WAVES

NT LOVE WAVES
NT RAYLEIGH WAVES

Air coupled seismic waves generated by jet fighters flying at high altitudes and supersonic speeds
01 p0077 A69-11281

Lunar seismic velocity distribution data indicates broad low velocity zone together with possible extensive melting at depth [AAS PAPER 68-205]
02 p0312 A69-11480

Granite compressional wave velocity and electrical resistivity variations with depth, explaining discrepancy between in situ and laboratory measurements on dry samples
02 p0241 A69-11806

Moving window analysis digital technique for complex seismic surface waves in presence of noise and multimode propagation
02 p0243 A69-12006

Spectral peaks for torsional oscillations of earth, estimating free periods from observations at six stations around earth
02 p0243 A69-12007

Seismic wave generation, propagation, dispersion and attenuation in gravitating sphere having

homogeneous elastic mantle and liquid core, giving theoretical seismograms

02 p0243 A69-12010

Velocity distribution in lower mantle, showing second major discontinuity in P wave travel time curve at 24 degrees
07 p1129 A69-19502

Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters
16 p2784 A69-32576

Seismic surface wave observations analyzed by applying moving window method to orthogonal detector recordings permitting lateral refraction measurement, wave separation, etc
16 p2784 A69-32577

Monte Carlo inversion of seismic body waves for transposing uncertainties of observations to velocity models
17 p2962 A69-33654

Semiinverse method for elastic nonhomogeneity problems, considering case of seismic wave propagation
20 p3624 A69-37589

Multiple filter technique for seismic multimode dispersed signals, checking time and frequency resolution by diagnostic diagram
22 p3934 A69-39872

Sensors array to determine propagation wave vector velocity via high resolution frequency wavenumber spectrum analysis, emphasizing seismic applications
22 p3902 A69-41220

SEISMOGRAMS

Seismic wave generation, propagation, dispersion and attenuation in gravitating sphere having homogeneous elastic mantle and liquid core, giving theoretical seismograms
02 p0243 A69-12010

Spheroidal disturbances theoretical seismograms on surface of gravitating elastic sphere with homogeneous mantle and liquid core, considering gravity and polar radial stress effects
23 p4158 A69-42020

SEISMOGRAPHS

NT LUNAR SEISMOGRAPHS

Telemetry by reflex klystron accelerometer and seismometer with on air or coaxial cable signal transmission
19 p3272 A69-36255

SEISMOLOGY

Seismic refraction study of internal structure of volcanic cinder cone
02 p0236 A69-11465

Seismic regions location prediction on visible lunar side based on transient events, hot spots and gravity anomalies
18 p3193 A69-34363

Spheroidal disturbances theoretical seismograms on surface of gravitating elastic sphere with homogeneous mantle and liquid core, considering gravity and polar radial stress effects
23 p4158 A69-42020

SEISMOMETERS

U SEISMOGRAPHS

SELECTION

NT PERSONNEL SELECTION
NT PILOT SELECTION

Feature selection in pattern recognition, discussing techniques, crop classification problem and parametric multiclass pattern recognition
06 p0892 A69-17396

Nonparametric ranking procedures /based on order statistics/ guaranteeing preassigned probability for selection from random samples populations as good as control
08 p1342 A69-20172

Selection effects on comets discovery, comparing effectiveness of photographic and visual observation techniques
17 p3045 A69-34221

Part selection, source control and application program for reliability of equipment design, noting derating
22 p3953 A69-40031

Computer selection for given automatic control system, considering efficiency criterion and operational constraints satisfaction
24 p4285 A69-42952

SELECTIVE FADING

Noncoherent binary communication detector for slow selective fading channel with additive quasi-stationary noise based on mathematical procedure of nonparametric classification
03 p0390 A69-13215

SELECTORS

Sunde model of troposcatter channel as transmission medium in computer simulation of adaptive digital communication scheme for selective fading channels
09 p1458 A69-22471

SELECTORS

Laser wavelength selection device for parallel wavelength separation or recombination of laser beams external to laser cavities
01 p0091 A69-10841

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection [IEEE PAPER R-2]
05 p0775 A69-16326

Peak amplitude selector for electrophysiological phenomena analysis, describing memory schemes, threshold crossing detectors and display, input and output circuits, timing, etc
15 p2612 A69-31266

Single hyperfine-state atomic beam selector effect on hydrogen maser stability, discussing DC magnetic field variation
18 p3153 A69-35306

Q multiplier UHF device as preselection filter for closely spaced channel signals, discussing channel interference reduction
23 p4141 A69-42220

SELENIDES

NT CADMIUM SELENIDES

NT GALLIUM SELENIDES

NT LEAD SELENIDES

NT ZINC SELENIDES

SnTe, SnSe and SnS epitaxial layers obtained by deposition of sublimates on cellulose-nitrite-varnish and single crystal NaCl and KBr substrates
02 p0298 A69-12049

Bismuth selenide inhomogeneous distribution effect on thermoelectric properties of bismuth telluride alloy
04 p0644 A69-15265

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions
15 p2668 A69-30629

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing
15 p2670 A69-31248

Nonlinear voltage dependence on current in p-type indium selenide single crystals, detecting negative resistance under pulsed electric field
22 p3992 A69-40602

SELENIUM

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method
09 p1554 A69-21469

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides
13 p2317 A69-27875

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method
15 p2669 A69-30714

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides
21 p3782 A69-39141

Selenium distribution along GaSb single crystals during oriented crystallization determined by radiometry
23 p4198 A69-41725

SELENIUM COMPOUNDS

NT CADMIUM SELENIDES

NT GALLIUM SELENIDES

NT LEAD SELENIDES

NT SELENIDES

NT ZINC SELENIDES

ESR comparative study of selenoamino acids and S analog radical formation and radiation resistance, noting selenium groups ability as acceptors for unpaired electrons
21 p3668 A69-38425

SELENOGRAPHY

Selenographic and celestial selenocentric coordinate systems, noting precession and nutation of lunar rotation axis
04 p0662 A69-15250

Selenographic technique for tying in lunar far side space photographs based on earth disk position measurements with respect to moon limb
05 p0763 A69-16055

Comparator measures for relative lunar altitudes on Yerkes lunar photographs, estimating selenographic positions from grids of orthographic atlas of moon
07 p1225 A69-19771

Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
12 p2158 A69-26371

Selenographic technique for tying in lunar far side space photographs based on earth disk position measurements with respect to moon limb
20 p3545 A69-37965

SELENOLOGY

Selenodetic data results and calculations of moon visible physical surface do not agree
02 p0314 A69-11643

Tectonic map compiled for visible and far sides of moon, noting correlations between earth and moon tectogenesis
03 p0505 A69-12899

Lunar geoscience role in lunar mission planning, discussing costs, reduced gravity effects, sample mass limits and seismology
03 p0510 A69-13391

Lunar crater count observations of mare surface and ejecta blanket in Orientale basin
04 p0656 A69-14672

Lunar premare and postmare craters distributions, discussing latitude independence and sources of impacting bodies
04 p0656 A69-14673

Lunar history reexamination including added mantle convection and recent rocket data
05 p0825 A69-16303

Lunar rock composition monitored by Luna 9 and 13 soft landed lunar probes [UN PAPER 68-95769]
06 p1000 A69-17041

Post-telescopic lunar exploration, discussing Apollo program and development of selenology [JPL-TR-32-1399]
06 p1001 A69-17159

Nature and origin of lunar far side Tsiolkovsky crater
06 p1003 A69-17386

Fine structure and geology of lunar surface from Luna, Ranger, Surveyor and Orbiter data
07 p1212 A69-18547

Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density
07 p1213 A69-18604

Selenodetic measurements on Yerkes lunar star trailed photographs, considering limb and star trail
07 p1225 A69-19772

Yerkes star trailed lunar photographs with ephemeris values of moon libration for selenodetic coordinates of secondary points, discussing errors and altitudes
07 p1225 A69-19773

Tucson selenodetic triangulation for coordinated points, considering measures on Yerkes star trailed plates
07 p1225 A69-19774

Models for lunar density distribution consistent with available data on lunar physical properties
08 p1393 A69-20579

Lunar mass concentrations /mascons/ origin and nature, postulating primordial lunar atmosphere and hydrosphere and carbon derived from primordial organic compounds
08 p1397 A69-20697

Collection of Soviet papers on physics of moon and planets covering results of lunar, Mars and Jupiter photometric studies
11 p1959 A69-24723

Moon figure determined by DOD-66 Selenodetic Control System compared with second surface harmonic using computer analysis
14 p2527 A69-29942

Mascons implications in selenodetic data analysis conducted at U.S. space centers
17 p3028 A69-32922

Lunar photometric function determined using modified Hapke surface model and corrected Lommel-Seeliger law for surface roughness and crater distribution [AIAA PAPER 69-596]
17 p3033 A69-33308

Lunar surface bulk density determined from laboratory and spacecraft measurements of static bearing capacity as functions of depth and solids percentage
18 p3193 A69-34366

Standing waves on moon, discussing annular and radial structures of lunar craters and global tectonic patterns
20 p3604 A69-37565

Lunar regolith from Surveyor Program pictorial data of lunar maria
22 p4012 A69-40087

Miniaturized seismic refraction system for manned lunar landings consisting of geophones, three channel amplifier, calibrator and logarithmic compressor
23 p4162 A69-41533

Manned lunar exploration programs and site evaluation concerning volcanic processes, chemical and mineralogical differentiation, atmosphere and protobiological materials
23 p4216 A69-42200

Lunar gravitational field data from Lunar Orbiter spacecraft reprocessed, discussing mascon effects on moon structure and evolution theories
24 p4379 A69-42785

SELF ABSORPTION

Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects
02 p0354 A69-12547

Band profiles and emission spectra of shock heated AIO compared for self absorption of blue-green system, discussing electronic transition moment
07 p1184 A69-19163

Spectra of opaque radio sources with synchrotron self absorption, discussing brightness temperature and magnetic field
09 p1591 A69-21447

Radiative relaxation of relativistic particle distribution undergoing synchrotron radiation and reabsorption, discussing self absorbed radio source model
13 p3227 A69-27572

Polarimetric observations of Be stars, noting dependence and self absorption by hydrogen of polarization produced by electron scattering
16 p2863 A69-32397

Radiation self absorption effects on heating loads of blunt body during hyperbolic entry
21 p3644 A69-39040

SELF ADAPTIVE CONTROL SYSTEMS

Self adaptive control circuit diagram examination, considering phase shift measurement reliability by eliminating distortion caused by system nonlinearities and noise
01 p0052 A69-10796

Dynamic system for self adaptive control of inertial plant described by differential equations, noting synthesis method eliminates distortion
01 p0052 A69-10797

Synthesis of statistically optimal self adaptive system for dynamic characteristics stabilization of automatic control system main loop
03 p0410 A69-13256

Self adaptive circuit parameters synthesis of systems using amplitude-frequency characteristic by Chaplygin theorem
03 p0410 A69-13256

High gain self steering repeater for multibeam microwave array system for earth-satellite communications
04 p0573 A69-14330

Self adaptive systems stability analyzed using filter and correlation methods, considering higher harmonics at rectifier and synchronous detectors output
04 p0582 A69-14796

Sensitivity models for adaptive and self adaptive systems design
04 p0582 A69-14797

Self balancing single degree of freedom free fall space environment simulator, discussing coincidence of mass and rotation centers
04 p0586 A69-15468

Space vehicle flight automatic optimization for maximum L/D reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry
05 p0830 A69-16045

Multivariable self adaptive control system design using sensitivity methods, obtaining adaptation stability by Liapunov synthesis
06 p0900 A69-17352

Pattern recognition method dependent on preselection of good variables, discussing SELFIC and relationship to Karhunen-Loeve expansion and factor analysis
07 p1088 A69-18386

Computer simulations, comparing self adaptive /neurotron/ control of spacecraft energy allocation subsystem to programmed control
07 p1058 A69-18389

Directional gyroscope accuracy increased by self adaptive systems, based on precession theory and drift amplitude dependence
11 p1881 A69-24559

Digital control algorithm based on self adaptive linear model of multivariable processes used for feed-forward control of output signals

12 p2046 A69-26063

Self adaptive system for recognition of dynamic shapes, discussing self structuring by learning, incomplete pattern recognition, logic element network, etc

12 p2054 A69-27080

Searchless gradient self adaptive system for adjusting servosystem parameters to reference model characteristics, using auxiliary operator method

14 p2426 A69-29146

Liapunov method applied to stability evaluation of multiparameter self adaptive nonsearch gradient servosystems

19 p3286 A69-35891

Missile and spacecraft guidance navigation and control, discussing fluidics, self adaptive and digital control and Kalman filtering

19 p3370 A69-36316

Failure test algorithm for sequential units with delay lines of control digital computers, detecting replacement of output terminals by sensitive paths

20 p3502 A69-37394

Space vehicle flight automatic optimization for maximum L/d reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry

20 p3618 A69-37954

Soviet book on self adaptive systems design, operational principles and analysis and synthesis methods

21 p3687 A69-39532

SELF ALIGNMENT

Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors

03 p0427 A69-12980

Shipborne self pointing antenna for reception of telemetry signals from maneuverable missile, discussing tracking and compensation for ship platform motion

10 p1664 A69-23803

Self steered retrodirective antenna arrays with phase synthesizer, combining signals from individual elements at LF levels

11 p1850 A69-24983

Multidimensional self adjusting systems design by achieving parametric invariance, using sensitivity theory

11 p1861 A69-25711

SELF BIAS

U BIAS

SELF CONSISTENT FIELDS

Linear combination of atomic orbitals-molecular orbitals self consistent fields calculation on beryllium dihydride, using Gaussian basis functions

05 p0811 A69-15910

Asymptotic formulas for field diffracted by conducting wedge illuminated by line source usable for self consistent field analyses

05 p0720 A69-16344

LCAO-MO-SCF wave functions determined for ground and excited states of nitrogen dioxide at five different ONO angles

06 p0960 A69-17109

Ground state energy of Anderson Hamiltonian calculated by cluster variation for cases of infinite d-d correlation energy

06 p0958 A69-17712

Rapid differential rotation effect on massive main sequence O and B stars, discussing bolometric magnitude deficiencies and shifted position in Hertzsprung-Russell diagram

07 p1220 A69-19390

Self consistent field calculations of effective quantum numbers for nd, nf and ng electrons for atomic configurations from 2-126 Z

08 p1355 A69-20734

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability

11 p1956 A69-24394

Self consistent solutions for collisionless plasma penetration across magnetic field, showing electrons ability to accompany ions across field

15 p2661 A69-30923

Self consistent flow calculation in dense space charge beams, including electrode design for portions isolation

22 p3985 A69-40668

Self consistent field molecular orbital method in LCAO linear combination of atomic orbitals/approximation applied to LiH ground state for potential energy curve

22 p3985 A69-40721

Self consistent fields in waveguides containing thin conductors, expanding induced field into Fourier series in normal waves for series coefficients

23 p4123 A69-41942

Linear diffraction equations in electronics in self consistent formulation reduced to complex transcendental equations, using perturbation method

23 p4124 A69-42033

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability

24 p4390 A69-43784

SELF DEPLOYING SPACE STATIONS

U SPACE STATIONS

SELF DIFFUSION

U DIFFUSION

SELF ERECTING ANTENNAS

U ANTENNAS

SELF ERECTING DEVICES

Triangulated pantograph structure for deploying antennas, special equipment and instruments from spacecraft, noting structural design and strength characteristics

02 p0252 A69-11752

SELF EXCITATION

Self excitation conditions and output characteristics of tunnel diode DC to AC converters for spacecraft, discussing relaxation-oscillator and push-pull circuit converter types

01 p0046 A69-10755

Parametric vibrations of self excited elastic and aeroelastic systems with traveling waves, determining stable vibration boundaries

02 p0337 A69-11561

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

04 p0610 A69-14382

Electromotive force along magnetic field induced by liquid metal flow /alpha effect/, giving foundation for self excitation of electromagnetic field

04 p0635 A69-14547

Two cavity large storage box atomic hydrogen maser, obtaining self excited oscillations coupled with high gain amplifier [IEEE PAPER C-8]

05 p0774 A69-16310

Induction, helical and straight through liquid metal MHD generators tested under independent and self excitation conditions

13 p2208 A69-27512

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases

14 p2456 A69-28755

Self excited vibrating laminar diffusion flames, discussing coupling, jet spacing radial heat transfer and boundary layer interaction

16 p2876 A69-31711

Viscoelastic half space properties effect on self excited vibration boundaries determination

16 p2873 A69-32063

Self excited vibrations of rotors supported in gas bearings from analyzing solutions to equations of rotor motion

16 p2875 A69-32250

Self excited oscillations in systems with one linearity symmetrical with origin determined by harmonic balance method

21 p3685 A69-38463

Nonlinear theory of optically excited semiconductor laser for conditions of self excitation, steady state lasing amplitude and lasing frequency shift

23 p4174 A69-41733

Self rhythms of low audio frequencies in motor nerves under electric pulses influence at VLF related to viscosity changes of nerve substance

23 p4092 A69-42057

SELF FOCUSING

Sparks from laser induced air breakdown due to focusing of laser beam, noting evidence for initiation by self focusing

01 p0092 A69-11246

Kerr effect and electrostriction during self focusing of high power laser beam in gases and liquids

04 p0611 A69-14792

Thermal self focusing of argon laser beam passing through lead glass

05 p0771 A69-15819

Thermal self actions of CW laser beams in solids and liquids with wind or convection flow, discussing self focusing and defocusing [IEEE PAPER E-12]

05 p0774 A69-16311

Thermal self defocusing effect of laser beam in self focusing liquids, measuring refractivity changes by high speed double exposure holography [IEEE PAPER J-7]

05 p0775 A69-16320

Self focusing of TM type electromagnetic waves in isotropic plasma and formation of waveguide channel

07 p1196 A69-19749

Laser beams self focussing interpreted as photon contraction due to equivalent gravitational attraction with gravitational constant proportional to nonlinear refractive index

08 p1324 A69-20085

Inhomogeneous laser beams self focusing effects in organic liquids recorded on bases of induced stimulated scattering

08 p1326 A69-20538

Self focusing linear array for communication satellites, evaluating reradiated field taking into account mutual coupling between elements

08 p1289 A69-20970

Self focusing aerial antenna arrays with full angular coverage for two way airborne communications

08 p1289 A69-20971

Self focusing of plasma whistler wave along magnetic field at small threshold power

09 p1546 A69-21577

First Stokes component of stimulated Mandelstam-Brillouin scattering and line defects caused by self focusing of single pulse laser beam

09 p1521 A69-22686

Self focusing of CW argon laser beam due to absorptive heating in crown glass, emphasizing time dependence of beam diameter as function of distance

10 p1706 A69-24009

Breakdown in air produced by picosecond mode locked laser pulses showing evidence for self focusing

13 p2270 A69-27196

Weakly divergent intense light beam propagation in laminar optically inhomogeneous medium with self focusing possibility analyzed by perturbation theory

13 p2223 A69-28568

Laser beam light pressure bending of incompressible liquid surface leading to beam self focusing in linear medium

14 p2461 A69-29674

Physical mechanisms for nonlinearities in electromagnetic wave propagation, analyzing plane wave instability, self focused beams propagation and laser oscillations

17 p2928 A69-33867

Self channeling of light in nonlinear isotropic medium using exact solutions of nonlinear Maxwell equations for two dimensional case

17 p3007 A69-33975

Laser beam self focusing in plasma in terms of ponderomotive acceleration due to light intensity gradient

22 p3961 A69-40417

Ultrashort laser light pulses self focusing and determination of focal points coordinates

24 p4328 A69-43068

SELF INDUCED VIBRATION

NT PANEL FLUTTER

NT SUBSONIC FLUTTER

NT SUPERSONIC FLUTTER

Self excited vibration of flowing medium and infinite cylindrical duct wall in primary magnetic field, discussing vibration stability and critical speeds

18 p3226 A69-35462

SELF LUBRICATING MATERIALS

Two phase self lubricating composite materials for high temperature, detailing impact strength, friction and wear tests [IME PAPER 12]

07 p1137 A69-18560

Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation [ASLE PAPER 68-LC-2]

07 p1141 A69-19310

Self lubricating bearings lifetime calculated as function of lubricant in pores and consumption rate, noting temperature effects

15 p2618 A69-30281

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests

15 p2642 A69-30328

Polyphenyl ether lubricants and self lubricating materials compared for antifriction ball bearings in thrust reversing actuator gear box [SAWE PAPER 68-LC-1]

18 p3148 A69-35003

SELF LUBRICATION

Self acting gas lubricated bearings design procedures and comparison with oil lubricated bearings [ASME PAPER 68-LUBS-10]

13 p2265 A69-27267

Pressure distribution in finite width high speed self acting gas lubricated slider and partial arc bearings, noting trailing edge conditions and side leakage effects [ASME PAPER 68-LUBS-15]

13 p2265 A69-27268

Linearized theory for stability of self acting gas journal bearings with noncircular members and elements of flexibility and damping, noting three lobe rotor [ASME PAPER 68-LUBS-45]

13 p2266 A69-27277

Radial clearance influence on self lubricating porous bearing friction coefficient and oil losses as function of operation duration

16 p2794 A69-32067

SELF ORGANIZING SYSTEMS

Self organizing and learning control systems, adaptive systems theory and defining self organizing control systems

07 p1114 A69-18382

Self organizing trainable logical networks /TLN/ as stable controllers in multiaxis vehicle control problem, reviewing TLN concepts and training theory

07 p1070 A69-18388

Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials

08 p1278 A69-20420

Data handling by groups in perceptron type pattern recognition and decision making problems based on algorithm involving second degree polynomials

14 p2418 A69-29658

Perceptron probability algorithm for random events prediction based on previous histories, applying Bayes formulas, static solutions formulas and transition probability tables and graphs

19 p3287 A69-36664

Cell origin in self organizing natural polymers in terms of molecular evolutionary priority of polynucleotides and poly alpha amino acids

22 p3896 A69-40781

Stochastic fuel regulator problem investigated by optimal and self organizing techniques, emphasizing realizability of resulting controllers

24 p4292 A69-43284

SELF OSCILLATION

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations

01 p0173 A69-10094

Self sustained oscillations of piston type valving system with conduit line at upstream and capacity at downstream

01 p0012 A69-10310

Rubidium self oscillating magnetometer long term stability, noting changes affecting accuracy and sensitivity

02 p0250 A69-12394

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit

03 p0519 A69-13068

Self oscillating pulse relay control system investigated by approximate method for harmonic linearization of nonlinearities, noting external effects

03 p0410 A69-13684

Equations for self oscillating mode of operation for O-type backward wave generator with electrostatically focused electron beam and finite values of amplification parameter

03 p0407 A69-13986

Relaxation induced self oscillations during combustion of gunpowder in semiclosed volume, noting combustion instability

04 p0686 A69-14987

Low power RF signal triggering of self sustaining Gunn oscillations in GaAs samples

05 p0734 A69-16575

Self excited rotor blade oscillation at high subsonic Mach numbers during flight tests of Sikorsky NH-3A compound helicopter

07 p1053 A69-18870

Optimizer for shaping control signal of hunting type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation

07 p1115 A69-19757

High speed stable system by combining hunting type control system without closed cycles designed for plant optimization with recycling type controller

07 p1116 A69-19759

Self oscillations in angular velocity sensor using electric spring and potentiometric pickup, examining friction moment and inductance coil effects

09 p1497 A69-22106

Response and stability of self sustained two degrees of freedom system with nonlinear damping, noting harmonic oscillations

[ASME PAPER 69-VIBR-24]

10 p1806 A69-24171

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations

11 p1915 A69-24535

Asymptotic method for single and multifrequency oscillations of quasi-linear control systems with distributed parameters and delayed time coordinate

11 p1916 A69-24766

Acoustic frequency of longitudinal self oscillations during vibrational fuel combustion in afterburner, taking into account nonlinear properties of heat supply zone

11 p2002 A69-25339

Self and forced oscillations in multivariable relay control system, considering relays with hysteresis and dead band and stability of periodic states

12 p2049 A69-26084

Monograph on nonlinear servosystems covering nonlinearity with/without inertia, self oscillations, linearization by forced oscillations, stability theorems and Liapunov function choice

12 p2054 A69-26966

Heat convection mechanism in two phase autooscillatory system generalized to convective heat transfer in cloudy atmosphere

13 p2292 A69-27798

Phase and amplitude changes of arbitrary-Q self excited oscillator under external disturbance, using differential equations

13 p2300 A69-28574

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit

14 p2530 A69-28750

Equation system for asynchronous MHD generator operating in self oscillating mode derived and solved

14 p2405 A69-29457

Spontaneous self pulsing and cavity dumping in carbon dioxide laser Q switched by internal GaAs electro-optic cell without saturable absorber

16 p2797 A69-32014

Autooscillatory process in n-circuit tunnel diode LC oscillators acted upon by external sinusoidal voltages

16 p2764 A69-32256

Si planar IMPATT diodes anomalous mode continuous wave UHF oscillations, noting DC density and DC/RF power conversion efficiency

17 p2934 A69-32846

Tunnel diode oscillators theory applications, investigating self resonance phenomena relating to static characteristic variations under self oscillating conditions

19 p3285 A69-36738

Monograph on periodic solutions and locking-in regions for differential equations with switching points describing motion of self excited oscillatory physical structures

20 p3577 A69-37923

Pulse modulated feedback system for satellite attitude control, analyzing relationship between physical parameters to ensure two pulse limit cycle oscillation stability

24 p4295 A69-43318

SELF REGULATING

U AUTOMATIC CONTROL

SELF REPAIRING DEVICES

Nonreplicative self repairing control, describing prototype computer construction for testing feasibility

04 p0569 A69-15457

Self reproducing automata, noting description of cellular system and applications to systems science

05 p0723 A69-15826

Computer reliability by development and methodical employment of self repair techniques

12 p2034 A69-25941

Satellite onboard computers automatic reconfiguration and self repair

20 p3503 A69-37399

SELF STIMULATION

Critical body temperature for intracranial self stimulation in white rats

03 p0375 A69-13897

Electrical self stimulation adaptability of hypothalamus or instrumental self reinforcing reaction in rats using skinner box technique

23 p4091 A69-42052

SELSYNS [TRADEMARK]

U SERVOMOTORS

SEMANTICS

Space Treaty interpretation of ambiguity of term peaceful due to differing concepts of U.S. and U.S.S.R.

20 p3635 A69-37104

Juridical meaning of peaceful in 1967 Space Treaty interpreted in terms of real purpose of given space activity

20 p3635 A69-37105

Interpretation of peaceful uses of outer space in Space Treaty, emphasizing provision forbidding individual military space activities whether aggressive or nonaggressive

20 p3635 A69-37106

1967 Space Treaty peaceful activities definition, suggesting explicit provisions regarding treaty province, enforcement machinery and implementation

20 p3636 A69-37112

SEMICIRCULAR CANALS

Vestibular analyzer role in spatial orientation under weightlessness conditions during aircraft flights, discussing underestimations of rotation angle of Barany chair

08 p1262 A69-19840

Human nystagmic reaction variations due to simultaneous rotation of head and body, studying coriolis couple in horizontal semicircular canals

12 p2020 A69-26565

Prolonged iterative accelerations and decelerations on vestibular apparatus, discussing nystagmus measurement attempt and centrifugation tests on guinea pigs

13 p2211 A69-28592

Diphenidol and prochlorperazine effect on human semicircular canal function, noting failure of drug to alter vestibular responses

17 p2913 A69-33168

Vestibular function tested with angular acceleration, applying semicircular canal reflexes for flight crew selection and appraisal

20 p3481 A69-37271

Equipment with minimum semicircular canals stimulation for vestibular analyzer studies

20 p3481 A69-37274

SEMICONDUCTING FILMS

Dimensional effects on thermodynamic and kinetic properties of thin semiconductor and semimetal films, noting quantization influence

01 p0136 A69-10186

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity moving carriers size and magnetic inductance

01 p0136 A69-10254

Thin film transistors prepared from spray deposited cadmium sulfide, discussing carrier mobility and low stability

02 p0214 A69-11596

Gunn domains reduction in sheet type GaAs oscillators by spreading of field lines out of active region

02 p0215 A69-11933

Thin CuAs selenide films by vacuum deposition, electronographic study proves cubic spherulitic phase existence

02 p0298 A69-12045

Nondestructive measurement of thin transparent film thickness by interference method, noting diffusion profiles

03 p0430 A69-13634

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission

03 p0488 A69-13887

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination

03 p0489 A69-13890

Epitaxial GaAs films with high electron mobility, noting radiation recombination spectra dependence on substrate orientation

03 p0492 A69-14172

Electrical conductivity of high resistance epitaxial semiconducting films measured by three probe method

04 p0597 A69-14538

Impurity transfer in doped and undoped epitaxially grown GaAs films, studying substrate dopants effect on carrier concentration profiles

05 p0807 A69-15957

Electrical polarization effect on electroluminescence brightness waves in zinc sulfide films

05 p0807 A69-16213

Polarization effect on electroluminescent properties of zinc sulfide films

05 p0807 A69-16214

Cadmium sulfide films with larger than bandgap photovoltages, analyzing photovoltage decay and temperature and light intensity effects
06 p0980 A69-17772

Selective etching technique in study of dislocations in epitaxial layers of gallium arsenide
06 p0981 A69-17891

Structural and electrical properties of indium antimonide and arsenide films, noting dependence of electron concentration and mobility on thickness
06 p0981 A69-17892

Automatic test set for measuring dopant concentration profiles in epitaxial films
07 p1130 A69-18245

CdSe single crystal films vacuum deposition for use of photocells base with p-n heterojunctions
07 p1198 A69-18512

Structural and optical properties of vacuum deposited GaP films at below 240-850 C
09 p1554 A69-21332

Semiconducting films as collector work function in thermionic converters, with regard to I-V characteristics
09 p1558 A69-21825

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity, moving carriers size and magnetic inductance
09 p1559 A69-22647

PbTe single crystal films growth on KCl studied by electron microscope, observing vapor crystal mechanism without coalescence of contacting crystals
10 p1745 A69-23323

Photoluminescence spectra of n-type GaAs films grown by gas transport reactions and from solution melt, noting recombination emission
11 p1939 A69-25688

Photocurrent carriers recombination in organic semiconductor rhodamine B films analyzed as function of illumination
11 p1939 A69-25691

Substructural patterns of epitaxial PbTe films obtained by condensation of vaporized PbTe on NaCl crystal surfaces, discussing formation kinetics and morphology
12 p2144 A69-26675

Microminiature five point measuring head with linear point design for resistivity measurement of semiconductor films, noting four point head capabilities
12 p2099 A69-27104

Semiconductor thin films analysis using mass spectrometer with spark source
13 p2316 A69-27293

Transverse quantum thermogalvanomagnetic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations
13 p2318 A69-27890

Absorption band edge position in p type indium antimonide thin films after heating, showing forbidden bandwidth function relationship to film thickness
15 p2666 A69-30044

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface
15 p2670 A69-31046

Electrical switching in thin film arsenic selenium telluride semiconducting glass diodes, observing formation of liquid phase and conducting filaments
16 p2760 A69-32017

Tunnel junctions with low background currents made by reacting active gas layer adsorbed on Nb film surface with Pb upper film to form barrier
17 p3016 A69-33788

InSb thin films prepared by flash evaporation, discussing Hall measurements at various temperatures and electron mobility dependence on film thickness
18 p3182 A69-34348

Copper sulfide-cadmium sulfide heterojunction model for photovoltaic effect, considering surface layer intrinsic absorption and CdS photoconductivity
19 p3250 A69-35683

Gold/polycrystalline cadmium selenide film contact found ohmic in darkness and barrier in light, noting potential distribution, electron concentration and energy gap
19 p3384 A69-36480

Transport mechanism in amorphous Ge films deposited on glass substrates studied by measuring piezoresistance as function of temperature during pure nitrogen immersion
19 p3391 A69-36559

Silicon dioxide film doped with Al to increase MOS structure radiation resistance
20 p3584 A69-38070

Chalcogenide semiconductor film switches time parameters, showing delay time decrement with thickness decrease and voltage increase
21 p3780 A69-39045

Thin PbTe semiconductor films electrical properties measured in air and vacuum, showing dependence on thickness and conditions of preparation
21 p3782 A69-39242

Spectral dependence of optical absorption in InSb thin films under conditions of quantum dimensional effect, considering allowance for nonparabolic conduction zone
21 p3783 A69-39560

Optimal CdS single crystals growth from gaseous phase achieved with 2 to 1 ratio between Cd and S concentration
23 p4199 A69-42468

Temperature gradients effects on GaAs crystals grown by Bridgman method
23 p4199 A69-42469

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites
24 p4361 A69-42993

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature
24 p4361 A69-42994

Component proportion and diffraction spectrum of macroblock thin films of indium telluride phase of In-Te system, using X ray and microanalysis
24 p4361 A69-42995

Dielectric and semiconductor films vacuum deposition by CW carbon dioxide laser, discussing optical properties
24 p4329 A69-43755

SEMICONDUCTOR DEVICES

NT AVALANCHE DIODES

NT FIELD EFFECT TRANSISTORS

NT GALLIUM ARSENIDE LASERS

NT GERMANIUM DIODES

NT JUNCTION DIODES

NT JUNCTION TRANSISTORS

NT METAL OXIDE SEMICONDUCTORS

NT PARAMETRIC DIODES

NT PHOTODIODES

NT PHOTOVOLTAIC CELLS

NT SILICON TRANSISTORS

NT THERMISTORS

NT THYRISTORS

NT TRANSISTOR AMPLIFIERS

NT TRANSISTORS

NT VARACTOR DIODES

Posistors heat capacity investigated as temperature function, showing maximum heat balance corresponds to Curie temperature
01 p0038 A69-10098

Output p-channel MOS transistor selection tree for display and information storage systems
01 p0039 A69-10173

Microwave applications of monolithic and hybrid semiconductor circuit technologies, considering cost and performance
01 p0039 A69-10188

Nonreciprocal tunable yttrium-iron garnet microstrip filter design through generation of circularly polarized field
01 p0041 A69-10202

Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity
01 p0137 A69-10260

Semiconductor switching diode, evaluating operation with nonlinear time delay equivalent circuit
01 p0046 A69-10747

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment
01 p0047 A69-10783

Plastic material requirements for semiconductor device encapsulation noting electrical compatibility, mechanical and environmental protection and costs
02 p0270 A69-12161

Semiconductor center traps effect on characteristics of metal oxide semiconductor transistors
02 p0299 A69-12183

Epitaxial GaAs transferred electron oscillators pulsed operation at bias voltage ten times threshold voltage, noting power output and efficiency
03 p0402 A69-12854

High power pulse generators with four layer p-n-p-n structure, discussing design, principles and applications of semiconductor elements as modulators and switches
03 p0402 A69-12978

Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures
03 p0484 A69-13280

Broadbanding of S-band three port stripline circulator, discussing effect of tuning and mode suppressor screws
03 p0404 A69-13472

Gunn effect and resulting electron transfer mechanism in semiconductor devices
03 p0486 A69-13610

Microwave generation and amplification, noting microwave transit time tubes, semiconductor devices and methods utilizing quantum electronic effects to generate and amplify EHF oscillations
03 p0395 A69-13611

Two band model for determining linear and nonlinear electromagnetic responses of small band gap semiconductors in magnetic field
03 p0487 A69-13753

Transverse perturbation influence on helical instability in oscillistor
03 p0488 A69-13886

Book on Hall generators /magnetically controllable semiconductor elements/, discussing principles of operation, design, manufacture and applications
03 p0406 A69-13954

Current oscillations or instabilities in semiconductor wafer with one electromagnetic mode and one carrier mode, investigating resonant frequencies
03 p0408 A69-14049

Potential distribution approximations for junction semiconductor devices, noting application to barrier layers and electron tunneling
03 p0408 A69-14107

Electron emission into vacuum from forward biased Schottky barrier consisting of cesiated thin layer of Pt on n-type ZnS
03 p0493 A69-14186

Semiconductor microwave phase shifters for electronic steering of phased array radar antennas noting cost, reliability and properties of steerable antennas
04 p0572 A69-14319

Twin differential calorimeter for measuring heat dissipation by wire specimen under fatigue tests, using semiconductor thermopiles
04 p0618 A69-15205

Field distribution and potential drop in semiconductor field emitter, noting nonlinear effects in indium trisulfide, electron mobility and multiplication factor
05 p0806 A69-15630

Coupled waves in ferromagnetic and antiferromagnetic semiconductors in constant electric and magnetic fields, discussing spin, electromagnetic and plasma waves dispersion
05 p0809 A69-16548

Radiation tests on Ovonic threshold switches performed with fast neutrons and broadband X rays
06 p0978 A69-16891

Semiconductor standard memory circuits, discussing arrays and density
06 p0894 A69-17202

Semiconductor device failure modes temperature dependence, discussing bonds, metallization and packaging
06 p0894 A69-17218

Semiconductor glasses use for electronic devices
06 p0980 A69-17714

Microwave semiconductor devices, discussing performance trends in detectors, tunnel diodes, mixers, varactors, transistors and Gunn effect devices
07 p1096 A69-18440

Pulse power from X band LSA devices at centimeter through millimeter wavelengths
07 p1097 A69-18445

Solution regrowth method to prepare epitaxial GaAs for Gunn effect devices
07 p1197 A69-18451

Low temperature technique for preparing solid-solid diffusion sources for silicon device fabrication based on gaseous hydrides as reagents
07 p1198 A69-18619

Doped silicon dioxide films as controlled reproducible diffusion sources for silicon devices fabrication
07 p1198 A69-18620

Monolithic HF circuits stability in TV and HF devices noting need for appropriate amplifiers
07 p1103 A69-18883

Logic circuit for semiconductor current gain sensing switch

07 p1113 A69-19744

Differential capacity of Li doped zinc oxide crystals between vapor deposited asymmetrical In electrode contacts

08 p1371 A69-19883

Microwave amplification using silicon diodes in avalanche resonance pumped modes

08 p1279 A69-19909

Digital method for quantitative study of carrier circulation phenomena in semiconductors, noting Algol program and continuously polarized p-n junction

08 p1280 A69-19973

Linville model for describing elementary phenomena of electronic equipment in terms of physical data applied to irradiated semiconductor diode and transistor

08 p1280 A69-19974

Semiconductor current fluctuations associated with generation, recombination and annihilation of random electron-hole pairs at ohmic contacts

08 p1372 A69-20545

Composite transistor simulation of circuit inductor effect for synthesizing frequency selective circuits

08 p1286 A69-20834

Nonohmic microwave conductivity in semiconductor posts in rectangular waveguide, measuring incident, transmitted and reflected microwave powers

08 p1373 A69-20859

Normalized thermionic field emission in metal semiconductor barriers for forward and reverse current-voltage relation

08 p1373 A69-20861

Response time of semiconductor diode from dependence of equivalent capacitance on direct displacement current

08 p1287 A69-20889

Microelectronics technology and economics, discussing semiconductor integrated, discrete component and thin film hybrid circuits and MOSFET devices [AGARDOGRAPH-114]

08 p1291 A69-20983

Assessing cost effectiveness of reliability and quality of semiconductor products, using mathematical models

08 p1292 A69-21102

Synthetic circuit equipment for semiconductor rectifier life testing with built-in fault analyzer for indicating shorted and broken diodes

08 p1293 A69-21113

Failure mechanisms in semiconductors, discussing imperfections, fabrication errors and electrical, thermal and mechanical stresses

08 p1294 A69-21117

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals

08 p1294 A69-21118

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters

09 p1471 A69-21327

Germanium solid state triode controlling electron currents of space charge limited regime by means of gate conductors in solid state diode

09 p1462 A69-21353

Book on special semiconductor devices covering photoelectric devices, Zener diodes, diffused junction silicon rectifiers, tunnel diodes, etc

09 p1462 A69-21638

Semiconducting diode base Dember effect impedance studied for recombination rates approaching zero or infinity

09 p1559 A69-22653

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices

09 p1541 A69-22698

Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity

09 p1560 A69-22718

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment

10 p1661 A69-23112

Surface ion behavior on planar semiconductor devices determined by measuring effect of time, humidity, temperature, voltage and previous testing history

10 p1743 A69-23173

Semiconductor strain gage balance with temperature compensation for conventional wind tunnels

10 p1672 A69-23265

Semiconductors with negative differential conductivity, investigating decreasing current-voltage characteristics, S or N shaped curves, perturbation parameters, instability, etc

10 p1744 A69-23300

Semiconductor properties, applications and problems including thin films, superconductivity, etc

11 p1937 A69-24736

Lasers applied to simulation of effects of X ray or gamma ray bursts on semiconductor devices

11 p1896 A69-24877

Transverse perturbation influence on helical instability in oscillator

11 p1939 A69-25687

High CW power K-band Gunn oscillators attained through control over doping level, profile and GaAs epitaxial layer thickness

12 p2036 A69-25907

Voltage and current waveforms of resonant domain and limited space charge accumulation modes in transferred electron oscillators, noting drift current

12 p2036 A69-25908

Meshless shutter tube with nine images double deflection capability, using deflection and semiconducting plates assembly

12 p2083 A69-26144

Book on industrial control engineering covering mathematics, semiconductor devices, feedback amplifier theory, closed loop systems, frequency response diagrams

12 p2051 A69-26244

Multiinput sine comparators graphical analysis and design considerations, emphasizing semiconductor circuit providing quadrilateral polar characteristic on impedance plane

12 p2039 A69-26350

Bias circuit LF oscillations in short Gunn devices, analyzing sinusoidal and relaxation oscillations and stable bias in terms of terminal I-V characteristics

12 p2041 A69-26628

Soviet collection of papers on semiconductor devices and application

12 p2042 A69-26877

Harmonic generation, using nonlinear current-voltage characteristics of Gunn diodes at 9500 MHz frequency

13 p2226 A69-27235

Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal

13 p2272 A69-27969

Dielectric thin film electrical and mechanical properties and preparation for semiconductor devices, emphasizing Si compounds

13 p2286 A69-28004

Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures

14 p2508 A69-29653

Push-pull circuit configurations for GaAs transferred electron oscillators, discussing CW X band and pulsed L band devices operation

15 p2574 A69-30168

Engineering problems in IC microminiaturization, dividing devices according to suitability for microminiaturization

15 p2576 A69-30352

MIS devices with dielectric properties avoiding positive space charge formation, discussing radiation effect

15 p2625 A69-30829

Screening techniques for semiconductor devices, considering component classification with respect to population strength distribution

15 p2627 A69-30840

Reliability of high resolution accelerometer composed of semiconductor integrated circuits

15 p2627 A69-30843

Semiconductor rectifiers economic life testing with synthetic circuits utilizing thyristor switch

15 p2579 A69-31041

Book on semiconductor devices physics covering principles and operational characteristics, carrier distribution and transport properties, materials, junctions, thin films, etc

15 p2670 A69-31062

Similarity between semiconductor discrete devices and integrated circuits, considering materials, processing and failure modes

15 p2580 A69-31128

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization

15 p2581 A69-31521

Linear high resolution gate function in blocking out analog signals or reproducing signal amplitudes at output, noting semiconductor elements utilization

15 p2581 A69-31523

Semiconductor devices leak testing methods including liquids, helium mass spectrometer, Radiflo and hermetic seal tests

16 p2758 A69-31712

Semiconductor impressed voltage preconditioning, considering problems involving surface properties

16 p2758 A69-31713

Soviet book on reliability of semiconductor radio devices of flight vehicles covering failures through production errors, power source instability, environment induced changes, etc

18 p3108 A69-34350

Semiconductor life potential evaluation based on electrical parameters measurements at various voltages over wide temperature range

18 p3144 A69-34489

Semiconductor reliability evaluation program for economical experimental design, noting stress tests

18 p3232 A69-34496

Failure analyses of semiconductor devices for military use, suggesting modifications to MIL-STD reliability screen tests

18 p3108 A69-34499

Gunn effect theory and applications, discussing field domains in semiconductors, excited oscillations measurement, oscillators design, computer elements, etc

18 p3183 A69-35160

Gunn effect and devices effective use for specific purposes and as components of microwave systems

18 p3183 A69-35263

Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models

18 p3109 A69-35293

Scanning electron microscopy for reliability studies in semiconductor devices

19 p3382 A69-35788

Amorphous semiconductors based on noncrystalline materials compared to crystalline materials, noting radiation damage resistance

19 p3392 A69-36660

Light emitting diodes /LED/, discussing operating voltage vs color, diode materials and applications

20 p3505 A69-37702

Equivalent circuit for microwave cavity containing active GaAs device applied to waveguide and radial mode cavity design

20 p3508 A69-37900

Failure analysis on semiconductor devices and integrated circuits, discussing procedure for factual information representing present condition of device

22 p3953 A69-40032

Hungarian-made semiconductor silicon-base strain gages meeting specifications at half world market price

22 p3947 A69-40938

Semiconductor devices development based on amorphous materials, reviewing solid state physics implications

23 p4198 A69-41560

Semiconductor phase shifting for inertialless antenna scanning at microwave to millimeter wavelengths, describing diode construction with emphasis on solving insertion loss

23 p4143 A69-42519

SEMICONDUCTOR JUNCTIONS

NT JOSEPHSON JUNCTIONS

NT N-N JUNCTIONS

NT N-P-N JUNCTIONS

NT P-I-N JUNCTIONS

NT P-N JUNCTIONS

NT P-N-P JUNCTIONS

NT P-N-P-N JUNCTIONS

NT SILICON JUNCTIONS

Heterojunction band model and carrier transport mechanisms emphasizing applications to heterophotodiodes, solar cells and hetero field effect transistors

02 p0294 A69-11598

GaSb-ZnTe heterojunction fabrication method, noting photoresponse, fluorescence and light transmission

02 p0299 A69-12408

WKB approximation for metal-semiconductor junction tunneling and transmission coefficient of parabolic barrier, discussing density of states in degenerate semiconductors

02 p0301 A69-12652

Scanning electron beam display of space charge of defects and junction behavior of edge dislocation array in Ge and Si monocrystals

02 p0301 A69-12661

Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements

03 p0368 A69-13075

Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system

03 p0489 A69-13896

Potential distribution approximations for junction semiconductor devices, noting application to barrier layers and electron tunneling

03 p0408 A69-14107

Insulated junction integrated circuit transistor operation with various terminal connections corresponding to diode switching of transistor

05 p0730 A69-16217

Diffusion anomaly of native acceptor defect in zinc selenium telluride p-n junctions, discussing applications in triple diffusion technique of preparing p-n junction diodes

05 p0808 A69-16286

Deep trapping levels caused by ion implantation doping, discussing level effects on electrical characteristics of zinc implanted GaAs diodes

05 p0808 A69-16287

Injection characteristics of n-aluminum gallium arsenide-p-GaAs heterojunctions from recombination radiation spectra

06 p0979 A69-16993

Barrier capacitance of semiconductor diodes for exact temperature measurement, discussing application to temperature to frequency converters

07 p1100 A69-18556

Surface plasmon excitation by tunneling electrons in GaAs-Pb junctions, discussing conductance at bias voltages, plasmon energy and concentration

07 p1200 A69-19402

Passivated metal semiconductor IMPATT diode for microwave CW oscillation

08 p1286 A69-20862

Second breakdown in semiconductors, studying thermal feedback connected with temperature time dependence of junction electrical properties

08 p1294 A69-21115

Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions

09 p1544 A69-21336

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

09 p1554 A69-21469

Trapping state effect on tunneling probability in Schottky barriers, discussing current-voltage characteristics

09 p1557 A69-21748

Emission characteristics of duplex vapor deposited tungsten emitter with molybdenum collector in variable spacing guard ring converter

09 p1438 A69-21820

Schottky barriers on n-type GaAs, measuring forward current characteristics for various electron concentrations and temperatures

10 p1745 A69-23358

Coherent emission in epitaxial structures with heterojunctions in AlAs-GaAs system

11 p1939 A69-25697

Probability distributions of characteristics of mass produced semiconductor rectifier diodes

12 p2035 A69-25832

High current density filaments formation in silicon p-n-n avalanche diodes caused by incremental negative resistance in static current-voltage characteristics

12 p2036 A69-25916

Gallium arsenide junction laser resonant modes from theoretical model, calculating frequency separation

12 p2108 A69-26637

Collector supply voltage and base width effects on transistor amplification and frequency characteristics at microampere currents

12 p2042 A69-26879

Ceramic CdS photovoltaic solar cell properties and model, classifying junctions according to preparation method

14 p2508 A69-29886

Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment

15 p2667 A69-30078

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

15 p2669 A69-30714

Book on semiconductor devices physics covering principles and operational characteristics, carrier distribution and transport properties, materials, junctions, thin films, etc

15 p2670 A69-31062

Tunnel junctions with low background currents made by reacting active gas layer adsorbed on Nb film surface with Pb upper film to form barrier

17 p3016 A69-33788

Copper sulfide-cadmium sulfide heterojunction model for photovoltaic effect, considering surface layer intrinsic absorption and CdS photoconductivity

19 p3250 A69-35683

Photovoltaic effect at copper sulfide-cadmium sulfide heterojunction, studying depletion layer width, diffusion lengths and spectral response

19 p3382 A69-35684

Multilayer multijunction solar cells with carrier generation within diffusion length of junction, discussing epitaxial techniques

19 p3251 A69-35690

Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics

19 p3382 A69-36049

GaAs-GaP heterojunctions, analyzing continuous conduction band, capacitance and current-voltage characteristics, photoresponse and modulation effect

21 p3779 A69-38424

Diagonal tunneling and radiation polarization in doped heterojunctions and p-n junctions of GaAs, using electroluminescence spectrum analysis

24 p4362 A69-43737

SEMICONDUCTOR LASERS

NT GALLIUM ARSENIDE LASERS

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter

01 p0091 A69-10883

Solid state liquid and semiconductor lasers, detailing conditions for producing stimulated emission and applications

01 p0092 A69-11068

Quadratic and cubic response in photoelectric emission in potassium antimonide under laser irradiation observed with measurement of energy distribution of excited electrons

05 p0771 A69-15813

Semiconductor laser generation efficiency increased by using external resonator and by signal amplification

05 p0777 A69-16378

Semiconductor lasers, discussing electron transitions, radiative band-band transitions, emission and absorption spectra, recombination rates, carrier lifetime and lasing conditions

06 p0937 A69-18009

Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate

07 p1147 A69-18542

Self modulated radiation modes of Te-doped n-type InAs injection lasers

07 p1148 A69-18685

Quantum mechanical perturbation treatment of optical parametric luminescence in nonlinear lithium niobate crystals, noting applications to noncolinear phase matching problems

07 p1152 A69-19067

Semiconductor laser with isolated diodes in cavity, noting watt-ampere characteristics during nonuniform excitation and threshold curves

08 p1326 A69-20539

Lasing characteristics of Nd-glass laser when cavity radiation varies with time, discussing rapid damping of relaxation oscillations of laser intensity

08 p1327 A69-21024

Semiconductor lasers, discussing materials, oscillation wavelengths, excitation methods, operating principles, fabrication, GaAs p-n junction laser and applications

09 p1518 A69-22122

Stimulated Mandelstam-Brillouin scattering at second harmonic of ruby laser and neodymium glass laser

09 p1520 A69-22684

Electroluminescence and electroluminescent devices, considering semiconductor lasers, radiation sources and image amplifiers

11 p1899 A69-25198

Laser diode output efficiency increased in presence of transverse magnetic field suppressing higher order TE and TM modes

12 p2039 A69-26353

Bismuth doped lead tin telluride diode lasers with low threshold currents at cryogenic temperatures, discussing doping effect

12 p2109 A69-26641

P-n junction cut-off current density and ohmic losses effect on injection laser efficiency determined by using quality parameter

12 p2109 A69-26647

Direct modulation characteristics of semiconductor junction laser, analyzing resonance phenomenon, bias current, admittance, modulation frequency limit and emission lifetime

12 p2110 A69-27069

Electroluminescence of p-GaAs diodes analyzed over temperature range of linear dependence of lasing on injection current

13 p2230 A69-27887

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures

13 p2271 A69-27888

Cadmium telluride laser characteristics including emission wavelength and electron beam threshold current density

13 p2272 A69-27896

Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal

13 p2272 A69-27969

Square wave generator for junction laser power supply

13 p2274 A69-28643

Nanosecond pulse generator for powering semiconductor lasers, examining circuit diagram and elements design

15 p2633 A69-30234

AM sinusoidal current pulse generator for semiconductor lasers, describing solid state circuit

15 p2633 A69-30235

Power coupling among modes in semiconductor lasers in presence of spontaneous or forced microwave modulation of population inversion

15 p2634 A69-30875

Unsaturable frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum

15 p2635 A69-30967

Reliability block diagrams for laser systems, discussing failure modes of solid state, semiconductor and gas lasers

18 p3151 A69-34523

Spectral inhomogeneity effect on spectrum of modes emitted by semiconductor p-n junction/laser

18 p3152 A69-35023

Current generator circuit designed for semiconductor laser excitation with pulses modulated by sinusoidal signals at 4.75 MHz

18 p3153 A69-35256

Nanosecond pulse generator circuits based on four layer Si diodes designed for semiconductor laser excitation

18 p3153 A69-35257

Semiconductor optical quantum amplifiers in pulse mode operation, describing arrangement for studying performance including pulse duration and current controls

18 p3153 A69-35258

GaSb p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift

19 p3387 A69-36530

Junction lasers current-voltage characteristics, discussing coherence-pinch effect as explanation of threshold behavior

19 p3337 A69-36531

Temperature effects on threshold current density, emission wavelength and polarization of PbSe diode lasers

19 p3337 A69-36533

Output power spectra of Pb-Sn-Te diode laser above threshold of oscillation, demonstrating inverse dependence of line width on laser power

21 p3734 A69-38326

Temperature dependence of stimulated light power from GaAs junction lasers operated at constant bias current above threshold

21 p3734 A69-38437

Memory effect in injection lasers output characteristics, noting anomalous increases in pulsed emission intensity with increasing current-pulse repetition rate

21 p3735 A69-38694

SEMICONDUCTORS [MATERIALS]

Electron beam pumped semiconductor laser light beam amplitude and phase distribution, studying effects of inhomogeneous excitation by model
21 p3737 A69-39041

Electroluminescence of p-GaAs diodes, analyzing temperature range of linear dependence of lasing on injection current
21 p3682 A69-39145

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures
21 p3738 A69-39146

Digital computer determination of stimulated emission time delay, Q switching temperature and current region and impurity profile effect across junction in junction lasers
22 p3962 A69-40561

Lasing properties of spontaneous emission hemispherical semiconductor diode with AlAs-GaAs junctions measured by calibrated silicon photocell
22 p3964 A69-40608

Nonlinear theory of optically excited semiconductor laser for conditions of self excitation, steady state lasing amplitude and lasing frequency shift
23 p4174 A69-41733

SEMICONDUCTORS [MATERIALS]

NT ACCEPTOR MATERIALS

NT DONOR MATERIALS

NT METAL OXIDE SEMICONDUCTORS

NT N-TYPE SEMICONDUCTORS

NT P-TYPE SEMICONDUCTORS

NT PHOTOCONDUCTORS

Collection of papers on physics, Volume 31, Part 1, covering stellar evolution, electron transport in semiconductors, plasma microstability, etc
01 p0115 A69-10045

Electron transport theory for pure and doped low mobility semiconductors and for impurity conduction in disordered semiconductors, noting related optical phenomena
01 p0135 A69-10047

Direct reading device for minority carriers lifetimes measurement in semiconductor single crystals
01 p0078 A69-10073

Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface
01 p0136 A69-10253

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels
01 p0137 A69-10257

Microwave second harmonic, sum and difference frequencies generation for two different microwaves normally incident on low temperature semiconductor slab in DC field
01 p0137 A69-10334

Soviet book on semiconductor compounds, production and properties covering crystal structures, phase diagrams, etc
01 p0137 A69-10353

Thermoelectric properties of GeTe-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence
01 p0138 A69-10404

Nonequilibrium carriers during semiconductor depolarization, noting microwave oscillation energy absorption in silicon and zinc sulfide crystals
01 p0138 A69-10434

IR reflection and transmission properties of various semiconductor compounds, rubidium halides, strontium titanate, BN and Te
01 p0139 A69-10840

Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature
01 p0139 A69-10895

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes
01 p0140 A69-11109

Ionization losses of Ge 72 atoms stopping in Ge, noting no cut-off indicative of energy gap effects
01 p0140 A69-11245

Fast reversible switching between highly resistive and conductive states in various disordered semiconductors, using electric field
01 p0140 A69-11248

Minority carrier density and diode current obtained as Laplace transforms from analyzing differential equations, describing charge carriers in semiconductor
01 p0049 A69-11361

Phase diagram of BiTeI degenerate semiconductor crystals synthesized by heat treatment, discussing crystallization methods and physical properties
02 p0294 A69-11540

Current carrier mobility in GaTe and tin selenide semiconducting stratified lattices, noting interaction of free carriers and polarized nonpolar phonons
02 p0295 A69-11777

Vacancy diffusion in Ge, relation to precipitation of Cu impurities from supersaturated solid solution and determination of monovacancy migration energy
02 p0295 A69-11780

Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use
02 p0295 A69-11786

Diffusion data in binary compound semiconductors, tabulating impurities, electrical behavior, temperature variations and diffusion coefficients
02 p0296 A69-11809

Electrical conductivity of sintered polycrystalline cubic and monoclinic europium sesquioxide from DC current-voltage characteristics obtained in air at various pressures
02 p0296 A69-11874

Temperature dependence of semiconductivity of sintered polycrystalline EuO from current-voltage characteristics, measuring activation energy
02 p0296 A69-11875

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors
02 p0297 A69-11881

Solid solutions microstructure and electrical conductivity in InAs-CdS and InAs-CdSe and InAs-CdSe systems
02 p0297 A69-11882

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate
02 p0297 A69-11994

Electronographic determination of ternary alloys of germanium antimony tellurides noting hexagonal laminarity with cell periods
02 p0298 A69-12046

Overheated semiconductor plasma instability in crossed electric and magnetic fields, deriving condition for occurrence
02 p0298 A69-12099

Traveling high electric field domains in bulk semiconductors use in high speed integrated electronics, noting domain properties of GaAs and CdS
02 p0216 A69-12144

Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination
02 p0256 A69-12245

Energy distribution and capture cross section ratio limiting factors in semiconductors with deep energy levels
02 p0299 A69-12562

Step voltage transient behavior of electron-hole plasma injected into Ge, noting current time dependence
02 p0301 A69-12651

WKB approximation for metal-semiconductor junction tunneling and transmission coefficient of parabolic barrier, discussing density of states in degenerate semiconductors
02 p0301 A69-12652

Dielectric dispersion in inhomogeneous dielectrics and semiconductors, discussing three layered equivalent circuit
02 p0301 A69-12837

Semiconductor nonlinear electron polarizability, using model to obtain correct order of magnitudes
03 p0483 A69-13035

Ruby laser radiation nonlinear absorption coefficient measurement in CdS, ZnS and SiC semiconductor crystals, noting light limiting effects
03 p0436 A69-13038

Carbon dioxide laser for observing nonlinear effects related to electron interaction with lattice vibration within semiconductors
03 p0437 A69-13041

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
03 p0484 A69-13278

Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force
03 p0484 A69-13281

Positron annihilation in As, Sb, Bi, diamond, Ge, Si, S, Te and Se, noting contribution of valence electrons
03 p0485 A69-13295

Exciton distribution in semiconductors below Bose condensation temperature differing from diffusion distribution
03 p0486 A69-13415

Exciton spectrum for limiting case of large radius leading to Wannier-Mott equation with static dielectric permeability
03 p0486 A69-13416

Electrical resistivity of sintered high melting point metal oxides, noting width of semiconductor forbidden band
03 p0445 A69-13570

Carbon formation during production of high purity semiconductor Si, using C 14 tagged hydrogen impurities and methylated chlorine silanes contained in silicichloroform
03 p0486 A69-13635

Critique of paper on theory of gradient instability in semiconductor currents, questioning boundary value problems solution validity
03 p0487 A69-13728

Photocurrent pinch-off effect in high resistivity thin CdS crystals for evaluating donors, acceptors and surface states
03 p0488 A69-13757

Phonon capture by electrons in semiconductors with high permittivity in external electric field
03 p0489 A69-13891

Second harmonic generation in ternary semiconductor compounds
03 p0489 A69-13894

Direct amplification of ultra and hypersonic surface waves in semiconducting crystals of wurtzite group, taking into account drift effects and boundary conditions
03 p0490 A69-13925

Heat capacity of diamond-like semiconducting Si, GaAs and GaP calculated on basis of quasi-chain dynamics of covalent crystals
03 p0490 A69-13943

Stray fields and domain dynamics in Gunn effect semiconductors covered with dielectric sheets
03 p0491 A69-13988

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
03 p0491 A69-14054

Transport phenomena in semiconductors in strong DC field, emphasizing electrical conductivity as function of crystallographic orientation
03 p0491 A69-14097

Energy structure parameters for ZnTe-CdTe and ZnSe-ZnTe crystals, obtaining forbidden bandwidth dependence on composition
03 p0492 A69-14173

Electron vs phonon superconductivity mechanism conditions for semiconductors, semimetals and molecular crystals
03 p0492 A69-14176

Collection of papers on III-V compound semiconductors and semimetals covering physical properties, solid solutions and electric field, pressure, radiation and impurity effects
04 p0641 A69-14501

Phenomena in III-V compounds and III-V compound-other compound solid solutions, examining equilibrium phase diagrams
04 p0641 A69-14505

Resistivity and Hall mobility periodic change effect on probe measurements in semiconductors
04 p0642 A69-14534

Electric field and energy dispersion law effects on plasma oscillations in semiconductors, calculating composite oscillation frequency
04 p0642 A69-14554

Semiconductor resistivity, discussing resonator field structure and specimen position effects on measurement errors by contactless method
04 p0642 A69-14853

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement
04 p0642 A69-14856

Vacuum equipment for evaporation or sputtering in semiconductor industry
04 p0598 A69-14876

Free carrier Faraday effect in piezoelectric semiconductors investigated for microwave frequencies, low temperatures, mixed deformation potential and piezoelectric scattering
04 p0643 A69-15201

Drifting temperature fluctuations in semiconductors in presence of strong electric field

04 p0643 A69-15256

Temperature dependence of Hall coefficient, conductivity and carrier mobility in manganese doped indium antimonides

04 p0643 A69-15257

Semiinsulating GaAs mobile electric domains, determining electric field strength from electrooptical effect measurements

04 p0643 A69-15261

Approximate equations in matrix form for analyzing complex semiconductor structures with p-n junctions

05 p0806 A69-15658

Threshold velocities of acoustoelectric current oscillations in elemental piezo- and nonpiezoelectric semiconductors, taking into account amplification and losses of phonons

05 p0807 A69-15956

Fresnel drag produced by relativistic addition of electron velocities in semiconductors measured by changes in refractive index

05 p0807 A69-16026

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion

05 p0808 A69-16216

Design theory of esaki diodes relation to internal parameters of degenerate semiconductors, discussing Fermi level position and maximum state density in purity band

05 p0732 A69-16298

Nonlinear optical coefficients in group IV and III-V semiconductors, calculating contribution from longitudinal and core electrons

[IEEE PAPER V-7]

05 p0776 A69-16329

Ultrasound propagation amplification coefficient in high permittivity semiconductors with electric field based electron-phonon interaction

05 p0809 A69-16372

BiTeBr semiconductor band structure determined from electrical and optical properties

05 p0810 A69-16609

Critical electron drift velocity threshold in surface wave amplification in semiconductor in magnetic field, noting partial effect of diffusion

05 p0810 A69-16648

Nonuniform distribution and concentration of doping materials in semiconductors determined by measuring optical reflection coefficient

05 p0764 A69-16664

Selective etching process for microminiaturization of special circuits for aerospace

05 p0736 A69-16753

Radiation defects stability in semiconductors, noting low temperature electron irradiation of Ge and effects of annealing

06 p0974 A69-16863

Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time

06 p0974 A69-16864

Light absorption in semiconductors with electron hole pair formation noting conduction and valence band

06 p0978 A69-16901

Kinetics of homogeneous and heterogeneous growth of centers of new phase of semiconductor during ion bombardment as function of radiation dose

06 p0978 A69-16985

Transverse AC current influence on longitudinal current induced by constant electric field in anisotropic semiconductor

06 p0978 A69-16991

Ambipolar motion of light injected photocarriers in cadmium-mercury-telluride in terms of diffusion and drift in electric fields

06 p0979 A69-17154

Heat transfer and IC, discussing semiconductors thermal and electrical analogs and thermal properties

06 p0894 A69-17216

GaAs IR emitters efficiency due to semiconductor material band structure

06 p0894 A69-17248

Semiconductor glasses use for electronic devices

06 p0980 A69-17714

Semiconductors reflectivity enhancement by irradiating with Q switched ruby laser output

06 p0935 A69-17768

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

06 p0981 A69-17879

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

06 p0981 A69-17880

Raman spectra of optical phonons in semiconductors, using reflection techniques and Ar laser excitation

06 p0936 A69-17882

Electron and phonon tunneling spectroscopy in metal Ge contacts, noting improved agreement with one electron model

06 p0982 A69-18234

Halide salts, semiconductors and nonoxide glasses as materials for high power laser windows

07 p1144 A69-18401

Magnetoplasma waves in semiconductors, discussing cold plasma dispersion, helicons, carrier densities, lattice dielectric constant and acoustic domain propagation

07 p1197 A69-18465

Semiconductor current carriers surface recombination rates determined from photomagnetic effect

07 p1198 A69-18505

Minority carrier distribution in doped semiconductors space-charge layer assuming relation between diffusion and Debye length

07 p1198 A69-18506

Approximate solution to differential equations describing primary radiation defects transformation into secondary defects in semiconductors

07 p1199 A69-18679

Absorption and amplification of sound in many valley semiconductors in strong electric field, noting dependence on electron heating and relaxation times

07 p1199 A69-18681

Photoconductivity induced by laser pulses in semiconductor with parabolic dispersion law, linear transition and nonequilibrium carrier concentration higher than equilibrium carrier concentration

07 p1148 A69-18690

Electron-electron interaction effect on I-V characteristic and equivalent circuit of metal-semiconductor contact, noting conductivity and rectifying properties

07 p1107 A69-19162

Magnetic and semiconducting properties of samarium boride, noting effect of decreasing temperature

07 p1200 A69-19403

Silicon on sapphire semiconductor technology for diode arrays used as read-only memories, discussing capacitance, resistance and pattern encoding by laser

07 p1113 A69-19767

Resonance effects during piezoelectric interaction between charged drift wave and flexural wave in semiconductors with one sign current carriers

08 p1371 A69-19806

Interaction between semiconductor excitons, obtaining formulas for exciton concentrations ground state energy and dispersion, noting association with Pauli statistics

08 p1371 A69-19955

Eutectic anisotropic InSb-NiSb crystals applied to IR detection, noting sensitivity to carbon dioxide lasers

08 p1373 A69-20866

Thin semiconductor plates negative differential resistance associated with captures at surface, describing electron gas by electron temperature

08 p1374 A69-21081

Population inversion in semiconductors obtained by applying electric field through dielectric sphere /field effect/

08 p1374 A69-21082

Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function

09 p1554 A69-21467

Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers

09 p1554 A69-21468

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method

09 p1555 A69-21476

Plasmon superconductivity mechanism in degenerate semiconductors and semimetals, noting interaction effect between electrons and plasma sound

09 p1556 A69-21573

Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions

09 p1556 A69-21578

Antiferromagnetic semiconductor transformation into metal in magnetic field

09 p1556 A69-21672

Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra

09 p1557 A69-21753

Dielectric relaxation for analysis of defect structure, microstructure, surface behavior, structural changes kinetics and environmental effects in insulators and semiconductors

09 p1559 A69-22307

Hybrid circuit technology application to packaging electronic systems

09 p1508 A69-22336

Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface

09 p1559 A69-22646

Electron-hole collisions effect on drift and electron and hole diffusion in semiconductors at high injection levels

09 p1559 A69-22650

Oxide coated thermionic cathodes, noting semiconducting properties of alkaline earth oxides, particularly barium oxide and adsorption and optical properties

09 p1470 A69-22700

Photoelectric effects produced by polarized radiation in isotropic optical media, discussing photo EMF and photoconductivity in multivalley semiconductors and plasmas

10 p1701 A69-23138

Soviet book on fluid semiconductor properties at high temperatures during transition from solid to liquid state

10 p1744 A69-23316

Electronic states and minority carrier transport in mixed semiconductors with graded composition, noting position dependent band gaps and effective masses

10 p1745 A69-23360

Shallow impurity states in semiconductors, calculating bulk and surface energy eigenvalues in Si and Ge

10 p1745 A69-23361

Soviet book on highly doped semiconductors covering energy spectrum analysis, kinetic effects, optical properties, fabrication and applications

10 p1746 A69-23522

Entrainment and acoustothermal effect in piezoelectric semiconductors having electrons with different energy

10 p1746 A69-23573

Amorphous semiconductors, emphasizing structure and theory of liquid and amorphous states, electron energy spectra and scattering, impurities, Hall effect, etc

10 p1747 A69-23807

Thin film thickness and composition determination through scattered electron and characteristic X ray radiation recording

10 p1747 A69-23847

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra

10 p1747 A69-23963

Surface atomic structure effects on polar faces in InSb semiconductor crystal established from measurements of contact potential difference by dynamic capacitor

10 p1747 A69-23965

Electronic properties of beryllium doped silicon studied with IR absorption spectroscopy and electrical measurements, describing Be thermal diffusion

10 p1747 A69-23989

Transmission line analogs and kinetic power theorems for space charge waves amplification in semiconductors, considering internal effect and wave excitation

10 p1748 A69-24052

Space charge waves amplification in semiconductors on coupling with forward circuit wave by transmission line analog, noting application to electromagnetic and acoustic waves

10 p1748 A69-24053

Gaussian summation for ion implantation profile control in semiconductors, describing computer program selecting optimum energies to fit predetermined profiles

11 p1857 A69-24546

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons

11 p1936 A69-24640

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by super-sonic carrier drift currents

11 p1926 A69-24641

Semiconductor properties, applications and problems including thin films, superconductivity, etc
11 p1937 A69-24736

Electrical conductivity of impurity semiconductors containing variable current carrier concentrations, discussing current-voltage characteristics
11 p1937 A69-24909

Photoconductivity of semiconductors with multivalley electron energy and isotropic hole spectra, discussing nonlinearity of field dependence
11 p1937 A69-24913

Electrical conductivity of space charge layer in semiconductors with many-valley energy spectra of current carriers, discussing scalar relaxation time
11 p1937 A69-24915

Effective masses of electrons and holes in HgSe and HgTe characterized by narrow forbidden bands and high charge carrier mobility
11 p1937 A69-24920

Electrons conduction and switching in noncrystalline semiconductors, discussing localized states and thermally activated hopping
11 p1938 A69-25239

Phonon capture by electrons in semiconductors with high permittivity in external electric field
11 p1939 A69-25692

Second harmonic generation in ternary semiconductor compounds
11 p1939 A69-25695

Solar cells physical properties and functions, considering band structure of semiconductors, p-n junction diodes and photovoltaic effect, efficiency calculations and radiation damage
12 p2015 A69-25864

Room temperature thermal conductivity of semiconducting alloys with stoichiometric distributions of vacancies in cation sublattice, discussing heat resistance
12 p2142 A69-25975

Lattice defects in development of recombination centers on Ge semiconductor surfaces, discussing photoconductivity and field effect
12 p2142 A69-25978

GeTe, SnTe and strontium titanate transition into superconducting state including induced superconductivity
12 p2144 A69-26620

Solution for kinetic energy equation for organic semiconductors with narrow conduction band situated in strong electric field
12 p2144 A69-26673

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production
12 p2145 A69-26723

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition
12 p2145 A69-26724

Soviet book on methods of investigating semiconductors as applied to lead chalcogenides PbTe, PbSe and PbS covering physical and physicochemical properties
12 p2145 A69-26851

Organic semiconductors physical properties and intermolecular charge transfer between donor and acceptor
13 p2317 A69-27799

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise
13 p2317 A69-27876

Interacting carriers acoustoelectric waves in semiconductors with high dielectric constant, analyzing dispersion equation
13 p2317 A69-27878

Polarization stabilization times dependence on risetime of external field pulse leading edge for semiconductor crystal, determining field concentration
13 p2317 A69-27880

GaS, GaSe and InSe crystals band structure from analyzing reflection spectra, noting sensitivity to visible, IR and hard radiation
13 p2317 A69-27883

Electric drift instability in semiconductors with hot electrons, discussing diffusion, electron heat conduction, energy transfer, space charge density, etc
13 p2318 A69-27891

Monograph on optical properties and band structure of semiconductors covering absorption and reflectivity measurement, electronic states transition, deformation, etc
13 p2323 A69-28200

Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581

Electron shielding in heavily doped many valley semiconductors, discussing Thomas-Fermi screening and Mott transition
13 p2324 A69-28683

Acoustic effects in piezoelectric semiconductors due to sound-electrons interaction including sound absorption, sound velocity changes, electroacoustic effect, etc
14 p2503 A69-28786

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors
14 p2503 A69-28788

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential
14 p2503 A69-28789

Electron magnon interaction in ferromagnetic and antiferromagnetic semiconductors, showing conduction band and electron effective mass and magnetic moment dependences on temperature and spin direction
14 p2504 A69-28991

Thermionic converters semiconducting collector surfaces, evaluating work functions of nickel-chromium steel and aluminum trioxide collectors
14 p2506 A69-29269

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator
14 p2447 A69-29409

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
14 p2508 A69-29652

Hall effect in semiconductors with polarons as majority carriers, noting variation with temperature of magnetic field dependence on Lorentz force
14 p2508 A69-29654

Linear approximation of electron temperature increment and electron mobility in nondegenerate polar semiconductor in crossed fields
14 p2508 A69-29662

Light sensitivity dependence of semiconductor-metal systems on layer thickness
14 p2508 A69-29666

Anisotropic scattering of current carriers in semiconductors, obtaining general expression for mobility tensor with variational principle
14 p2508 A69-29667

Inhomogeneous distribution of nonequilibrium current carrier concentrations in semiconductors with electrons and holes of different lifetimes, noting instability
15 p2665 A69-30041

Frequency dependence of light absorption by excitons obtained for allowed and forbidden zone transfers in semiconductors
15 p2632 A69-30057

Finite scattering cross section in current carriers scattering on impurities in compensated semiconductors, assuming unscreened Coulomb potentials
15 p2666 A69-30063

Pulsed IR laser optimal Q switching mode by using semiconductor mirror with nonparabolic dispersion law and changing mirror opening moment delay time
15 p2663 A69-30064

Indium antimonide crystals polarity effect on photoeffect, analyzing quantum yields and energy spectrum
15 p2667 A69-30076

Amorphous semiconducting alloys single band model characteristics
15 p2667 A69-30199

Semiconductor resistivity, discussing resonator field structure and specimen position effects on measurement errors by contactless method
15 p2667 A69-30245

Quality control of semiconductor materials, analyzing homogeneity by statistical distribution of nonequilibrium carriers based on photoconductivity measurement
15 p2667 A69-30248

Impurities effect on electron energy spectrum in semiconductors at zone boundary and arbitrary doping levels, using Green function
15 p2669 A69-30712

Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
15 p2669 A69-30713

Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method
15 p2669 A69-30721

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Book on semiconductor devices physics covering principles and operational characteristics, carrier distribution and transport properties, materials, junctions, thin films, etc
15 p2670 A69-31062

Plasma modes, critical fluctuations and optical properties electric field dependence in two valley model of Gunn instability semiconductors
15 p2581 A69-31240

Multicomponent semiconductor compounds of nonstoichiometric composition, studying structure, behavior and correlation between electrical properties and phase diagrams
15 p2670 A69-31243

Fluctuation kinetics of electron system in nonequilibrium state arising in semiconductor in strong electric field, considering lattice and interelectron scattering
16 p2824 A69-31569

Heat conductivity of liquid and solid gallium telluride in steady state regime, using graphite cylindrical device
16 p2824 A69-31572

Magneto-optical oscillation of absorption coefficient in semiconductors during direct electron transitions
16 p2824 A69-31574

Microwave power loss and semiconductor conductivity relationship measured for carrier lifetime and mobility, noting nonlinearity and accuracy
16 p2825 A69-31617

Normal modes of electrons-electromagnetic field coupled system for many valley semiconductors, calculating dielectric constant for electron gas for ellipsoidal energy surfaces
16 p2826 A69-31821

External magnetic force and internal Coulomb force influence on carriers in conduction or valence band of semiconductor, considering H atom spectra
16 p2826 A69-31824

Shubnikov-de Haas effect and quantum limit phenomena concerning oscillatory magnetoresistance in semiconductors
16 p2827 A69-31826

Approximate equations in matrix form for analyzing complex semiconductor structures with p-n junctions
16 p2827 A69-32515

Raman scattering by coupled plasmon-cyclotron-harmonic modes in semiconducting plasmas in homogeneous static magnetic field
16 p2824 A69-32604

Thermoelectric converter systems optimization by geometry independent functions
18 p3093 A69-34782

Semiconductor plasma DC overheating instability in electric and magnetic fields, determining growth increments of oscillation amplitude
18 p3182 A69-35022

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors
18 p3182 A69-35041

Solid solutions microstructure and electrical conductivity in InAs-CdS, InAs-CdS and InAs-CdSe systems
18 p3182 A69-35042

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
18 p3182 A69-35047

Photovoltaic effects in cadmium mercury tellurides, considering band-gap variations, effective masses, mobilities, majority carrier concentration and pair lifetime
19 p3381 A69-35680

Cu-Cd-S photovoltaic cell models correlated, reporting spectral response and electron microprobe test results
19 p3382 A69-35682

Transducer with single crystal Ge for high heat flux measurement, noting calibration by direct conduction
19 p3307 A69-35748

Optical frequencies mixing based on photoelectric effect in metals and semiconductors, noting internal photoconductivity
19 p3332 A69-35871

Laser emission theory for indirect band-band transitions, considering light absorption by free carriers in semiconductors with polar and unpolar scattering
19 p3332 A69-35873

Physics of semiconductors - Conference, Moscow, July 1968, Volume 1

19 p3384 A69-36513

Impurity levels in semiconductors with multiconduction bands, noting impurities influence on photoluminescence, laser action and Gunn effect

19 p3385 A69-36514

Electrons and optical phonons interaction effects on optical and photoconducting properties of semiconductors, discussing phonon cyclotron resonance and oscillatory and magneto-oscillatory photoconductivity

19 p3385 A69-36517

Optical mixing and harmonic generation in semiconductors, discussing magnetoconductivity tensors and magneto-optical phenomena due to free carriers

19 p3385 A69-36519

Exciton line broadening in II-VI compound semiconductors, discussing thermal broadening of n equals one exciton associated with LO phonon-induced scattering

19 p3386 A69-36524

Photomechanical and electromechanical effects in semiconductors, considering indentation microhardness decrease caused by light irradiation or electric field

19 p3386 A69-36526

Coherent recombinational radiation of semiconductors excited by electron beam

19 p3387 A69-36539

Semiconductor physics - Conference, Moscow, July 1968, Volume 2

19 p3387 A69-36540

Narrow band gap alloys and ferromagnetic semiconductors, using transport properties for characterization

19 p3388 A69-36541

Semiconductor plasma production effects and pinching and microwave radiation in InSb plasma, discussing impact ionization, two photon absorption and plasma lifetime

19 p3389 A69-36545

Low temperature energy band gap in n -type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient

19 p3390 A69-36552

Energy band gap variation as function of composition in In-Ga-P semiconductor crystals

19 p3390 A69-36553

Energy spectrum and transport mechanism for current carriers in amorphous-crystalline semiconductors, measuring thermostimulated conductivity, induced photoconductivity, optical quenching, etc

19 p3391 A69-36558

Transport properties of liquid semiconductors, using model for liquid mercury with minimum state density

19 p3391 A69-36560

Glassy semiconductors from metallic alloy binary and ternary systems of sulfide, selenide and telluride noting properties

19 p3392 A69-36641

Free electrons influence on reflection coefficient of semiconductor in IR spectra, showing selective modulation with change in carrier concentration

20 p3583 A69-37610

Light emitting diodes (LED), discussing operating voltage vs color, diode materials and applications

20 p3505 A69-37702

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion

20 p3584 A69-37786

Hall coefficient and conductivity measured as function of temperature for liquid Au, Cu and Ag tellurides and liquid alloy systems Bi-Te and Tl-Te

20 p3584 A69-38024

In-Te-Se system alloys structure and semiconductor properties analyzed by X rays

21 p3779 A69-38579

Semiconductor properties of indium telluride alloys, conductivity and Hall effect

21 p3779 A69-38580

Semiconducting properties of lanthanum-cobalt oxide measured, using Seebeck coefficient for analysis as function of resistivity

21 p3780 A69-38612

Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands

21 p3737 A69-38998

Breakdown mechanism in GaAs, Si and CdSe semiconductors under intense light pulses ascribed to thermal impact

21 p3737 A69-39042

Metal semiconductor contact resistance determination from measuring voltage drop in current passing through contact and second metallic contact

21 p3780 A69-39046

S doped GaSb single crystals prepared by Crochral-ski method studied for temperature dependence of resistivity and Hall coefficient

21 p3781 A69-39048

Electromechanical effect dependence on CdS semiconductor surface state, noting relationship between microhardness and discharge current

21 p3781 A69-39072

Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production

21 p3781 A69-39136

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition

21 p3781 A69-39137

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise

21 p3782 A69-39142

Absorption constant and reflectivity coefficient on semiconductor samples with nonideally prepared surfaces, calculating measurement errors

21 p3782 A69-39240

Transverse thermomagnetic EMF and Nernst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers

21 p3783 A69-39558

Electrical properties of semiconductors in HF electromagnetic field, showing Dember type EMF dependence on carrier response to field inhomogeneity

22 p3993 A69-40605

Multiquantum photoemissive effect in metals, semiconductors and dielectrics emphasizing laser application for studying electromagnetic field

22 p3964 A69-40690

Electromagnetic wave propagation in semiconductor plate under constant electric field, studying nonstandard carrier energy dispersion law effects on refractive index

22 p3994 A69-40751

Inhomogeneities effect on thermoelectric power and thermal efficiency of semiconductor thermocouple with constant forbidden band width

22 p3994 A69-40933

Electric instabilities in semiconductors analyzed by subdividing instabilities into cathode and anode waves, considering recombination and electron and hole production processes

22 p3997 A69-41173

Electromagnetic wave propagation instabilities in semiconductor magnetoplasmas not diffusion limited to LF, using dispersion equation

22 p3902 A69-41223

Electric fields reducing recombination radiation intensity from bulk ionized GaAs and InP and shifting spectrum to lower energies, discussing self absorption

23 p4198 A69-41499

SEMIEMPIRICAL EQUATIONS

Unidirectional filamentary composites thermoelastic properties relation to constituent materials properties, using semiempirical micromechanics theory

09 p1530 A69-22320

Vapor pressure equation for oxygen and nitrogen derived by adding nonanalytic term, correlating equation with observed data

[NAS-NRC PAPER H-1] 22 p4051 A69-40628

Sensitivity of voltage transfer function relative to variation in value of components of resistance terminated reciprocal reactive network

01 p0049 A69-10069

Error and sensitivity analysis of on-line algorithms for fixed point linear smoothing

01 p0050 A69-10238

Sensitivity reduction in specific optimal control by use of dynamical controller

01 p0051 A69-10441

Optimal control system sensitivity definitions, analysis methods and design techniques, discussing equations of motion of dynamical system satisfying vector differential equation

01 p0051 A69-10553

Sensitivity calculation for microwave receiver consisting of traveling wave tube preamplifier followed by square law detector and video amplifier

01 p0048 A69-11038

Two parameter dynamic system of fourth order optimization based on gradient method modified for discrete optimization

02 p0224 A69-11594

Singular perturbation method for reducing order of mathematical models in optimal sensitivity control problems

02 p0224 A69-11967

Generalized digital low pass filter synthesis by recursion technique, noting coefficient sensitivity simplification

03 p0403 A69-13227

Sensitivity of radio receiver detecting weak sinusoidal and noise signals by counting zero crossings by envelope or phase of signal sum

03 p0405 A69-13717

Sensitivity models for adaptive and self adaptive systems design

04 p0582 A69-14797

Transverse sensitivity ratio of vibration transducer, discussing measurement by shaker method

04 p0603 A69-15432

Performance index sensitivity of nominally optimal controls noting initial and final target manifolds relationship to trajectory sensitivity

05 p0737 A69-15866

Minimum sensitivity deadbeat sampled data control system design by frequency domain technique, using two controllers

[ASME PAPER 68-WA/AUT-15]

05 p0738 A69-16177

Sensitivity matrix in multivariable feedback control systems, discussing loop gain matrix design to achieve desired insensitivity to system error sources

[ASME PAPER 68-WA/AUT-9]

05 p0738 A69-16179

Root sensitivity of linear feedback control systems calculated with signal flow graph and transforming circle

05 p0740 A69-16588

SNR enhancement in optical receiver by amplification before detection of carrier of modulated optical signal, using quantum amplifier

[IEEE PAPER R-5] 07 p1154 A69-19079

Absolute sensitivity of Soviet UTs-3 photographic emulsion to vacuum UV radiation by method involving absolute calibration of photocathodes

07 p1136 A69-19620

Error in receiver sensitivity calculation using approximate equation for noise power at input

08 p1275 A69-20226

Sensitivity coefficients to solve two point boundary value problem arising from Pontryagin principle, with application to time optimal control studies

08 p1296 A69-20297

Sensitivity of microwave earth stations for analog and digital communications

09 p1453 A69-21409

Low sensitivity electric circuits synthesis based on analytical and numerical analysis of sensitivity function characteristics of selective polynomial circuits
09 p1472 A69-21780

Two fold congruency method for statistical evaluation of fluorescent flaw detection penetrant sensitivity and reproducibility
10 p1700 A69-23374

Hot wire sensitivity to velocity, temperature and density fluctuations of temperature varying flow field, discussing calibration curves and special cases
11 p1886 A69-25088

Computational method for quasi-optimal control with parameter sensitivity function, noting application to dynamical system model
11 p1859 A69-25165

Multidimensional self adjusting systems design by achieving parametric invariance, using sensitivity theory
11 p1861 A69-25711

Atmospheric thermal radio emission fluctuations effects on radio telescope sensitivity, evaluating dispersion at low angles to horizon
12 p2031 A69-26643

Sensitivity decrease of reversible temper brittleness of low alloy steels due to Mo inhibiting effect on phosphorus diffusion
13 p2283 A69-28491

Automatic search-free optimization by sensitivity functions, deriving algorithms by Q factor and discrepancy extrapolation
14 p2425 A69-28823

Pulsed noise sensitivity in radar receivers having noise limiter for simple and complex signals
15 p2563 A69-30137

Short and ultrashort waves signals amplitude and phase displacement determination device, stressing sensitivity
15 p2570 A69-31088

IR radiation detection sensitivity emphasizing frequency up-conversion
17 p2969 A69-32839

Pulsed control systems sensitivity relationship to discreteness period described via differential equations
17 p2994 A69-33143

Metrological measuring instrument scales selection principles for ensuring constant sensitivity and Q factor
17 p2975 A69-33614

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error incremental covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc
17 p2944 A69-33742

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure
18 p3110 A69-34675

Memory matrices sensitivity to laser beams with various emission power densities, considering matrices of thin metal layers on transparent base
19 p3335 A69-36198

Large parameter variations effect on linear feedback control systems performance, optimal or suboptimal
21 p3685 A69-38726

Dynamic system absolute stability and sensitivity to parameter variations in linear part of system calculated by graphical and analytical techniques
21 p3685 A69-38729

Space mission sensitivity to parameters of interest determined by Monte Carlo simulation samples
21 p3804 A69-39036

Nocturnal and diurnal monkeys spectral sensitivity functions determined from simultaneous recordings of light-evoked cortical and retinal responses
22 p3882 A69-40867

Cat intraretinal DC component and b-wave separation based on sensitivity to visual stimuli, discussing electroretinogram recorded with microelectrodes
22 p3883 A69-40881

SENSITIZING

Ammonium nitrate thermal decomposition activation by dyes and halides, noting endothermic and exothermic reactions, proposing models to study impurities role
17 p3016 A69-32830

SENSOR-AIRBORNE TERRAIN ANALYSIS

U SENSORS
U TERRAIN ANALYSIS

SENSORIMOTOR PERFORMANCE

NT PSYCHOMOTOR PERFORMANCE

Reduced sensory input states psychobiology, discussing brain-mind relationship and dynamic information transfer loop for normal brain-mental operations

mation transfer loop for normal brain-mental operations
06 p0873 A69-17020

Subjects sensory reactions to weightlessness during parabolic flight, studying coordination of writing, eating and drinking motions
07 p1060 A69-18575

Sensory and physiological reactions experienced by cosmonauts during parabolic training flights, tabulating arterial pressure, heart beat and respiration rate
07 p1061 A69-18580

Human motor reactions during weightlessness based on parabolic or orbital space flight observations, noting cosmonaut writing performance
07 p1063 A69-18595

Auditory startle stimuli effect on human performance, noting decrease in mental and sensorimotor activity
07 p1066 A69-19421

Vestibular analyzer role in spatial orientation under weightlessness conditions during aircraft flights, discussing underestimations of rotation angle of Barany chair
08 p1262 A69-19840

Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism [AGARDOGRAPH-111]
08 p1265 A69-20672

Man machine integration, detailing sensory input and motor /or output/ systems, control loop and social structure impact
11 p1831 A69-25656

Muscle motor performance under continuous practice conditions, analyzing individual differences, intraindividual variability and remoteness
17 p2911 A69-34003

Factor analysis of complex perceptual-motor performance of man, measuring speed, flexibility, balance and strength
18 p3098 A69-35085

Sensorimotor coordination of man performing graphic assignments in upright, reclining and prone position, discussing interaction of vestibular, visual and motor analyzers
20 p3470 A69-37246

Orientation reflexes of animals in weightlessness, analyzing turnover, vestibular and cervix reactions using motion pictures
20 p3470 A69-37248

Human sensorimotor reactions during rotation in small radius apparatus at different speeds and torso inclinations
20 p3471 A69-37258

Motion sickness forms in human subjects subjected to induced rocking, noting impaired performance and sensorimotor reactions to visual stimuli
20 p3472 A69-37263

Ear-hand coordination adaptability tested by exposure to auditory rearrangement entailing 30 degree rotation of interaural axis produced by electronic pseudophones
21 p3663 A69-38899

Spatial distribution of amplitude and onset of pre-motion positivity, readiness and motor potential changes in human cerebral cortex preceding voluntary finger movements
22 p3875 A69-40261

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
22 p3892 A69-40281

Human performance on button pressing task with fixed ratio fixed interval reinforcement schedules
23 p4081 A69-41439

Bisensory auditory and visual signals characteristics effects on human reaction time, noting different results for unilateral and bilateral signal pairs
23 p4083 A69-41454

Arterial oxygen partial pressures and heart beat rates measured in humans during acute hypoxia after altitude and ergometer training, noting sensorimotor performance
23 p4086 A69-41788

Klaxon hooter sudden sound used as auditory startle stimulus to determine hand sensorimotor activity and standing stability in pilot error causes
23 p4088 A69-41808

Occipital eeg activity slowing and physiological changes during prolonged immobilization plus perceptual deprivation of human beings
24 p4256 A69-42554

SENSORS

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
04 p0602 A69-15428

InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures
10 p1696 A69-23717

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content
12 p2020 A69-26557

S-N fatigue life small bondable resistance sensor, discussing random response data interpretation with emphasis on use of strain multipliers
15 p2613 A69-31270

Acoustic fluidic sensor /sonicell/ combining sonic generator based on edgetone principles with sensor dependent on laminar stream acoustic disturbance
15 p2616 A69-31302

Level signaling device for high temperature conducting fluids, describing sensor construction and circuitry
20 p3536 A69-36980

Sensors array to determine propagation wave vector velocity via high resolution frequency waveform spectrum analysis, emphasizing seismic applications
22 p3902 A69-41220

SENSORY DEPRIVATION

External observer effect on human behavior during sensory deprivation tests conducted in isolation chambers as factor in estimating personality
02 p0200 A69-11516

Reduced sensory input states psychobiology, discussing brain-mind relationship and dynamic information transfer loop for normal brain-mental operations
06 p0873 A69-17020

Work capacity and adaptation characteristics of humans confined in small chamber and experiencing effects of isolation and sensory deprivation
08 p1262 A69-19838

Social isolation and other sensory deprivations effects on human organism
08 p1263 A69-19937

Prolonged visual deprivation effect on pressure sensitivity of finger, forearm, neck and leg, noting effects after restoration of normal visual stimulation
13 p2210 A69-28313

Social and visual isolation effect on rat blood pressure, pulse pressure, heart rate, behavior and response to epinephrine
14 p2407 A69-29296

Occipital eeg activity slowing and physiological changes during prolonged immobilization plus perceptual deprivation of human beings
24 p4256 A69-42554

SENSORY DISCRIMINATION

NT BRIGHTNESS DISCRIMINATION
NT TACTILE DISCRIMINATION
NT VISUAL DISCRIMINATION

Control circuits in nature and sensory information data processing in human work, including servomechanism of brain-muscle system
21 p3652 A69-38784

Dynamic reactions of mathematical model representing vision and hearing process adaptation
23 p4110 A69-41984

Combined eye and ear identification of bimodally presented signals in noise over oscilloscope and earphones, noting significance of independent observers model
23 p4111 A69-42168

Attention shifts in maintained discrimination discussing combined responses of varying and constant visual and auditory stimuli in pigeons
24 p4275 A69-43198

SENSORY FEEDBACK

Reduced sensory input states psychobiology, discussing brain-mind relationship and dynamic information transfer loop for normal brain-mental operations
06 p0873 A69-17020

Unit activities in cerebellar cortex by auditory stimulation in cats, discussing response patterns obtained by histograms
22 p3876 A69-40264

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
22 p3892 A69-40281

SENSORY PERCEPTION

NT AUTOKINESIS
NT CRITICAL FLICKER FUSION
NT PAIN SENSITIVITY
NT SPACE PERCEPTION
NT TACTILE DISCRIMINATION
NT TASTE
NT VERTICAL PERCEPTION
NT VIBRATION PERCEPTION
NT VISUAL DISCRIMINATION
NT VISUAL PERCEPTION

Human sensory reactions to short term weightlessness
07 p1060 A69-18574

Motion cues simulation system with seat of six differentially inflatable sections, discussing DYNASEAT
17 p2947 A69-34007

Sensory physiology of pilot landing guided by runway lighting, stressing visibility influence
19 p3260 A69-35987

Human taste perception mechanism and taste system anatomy
21 p3652 A69-38783

Control circuits in nature and sensory information data processing in human work, including servo-mechanism of brain-muscle system
21 p3652 A69-38784

Sensory and logic behavior model of sequence selection based on received information, considering perception, sense, desire, concept and criteria levels
23 p4109 A69-41976

Human hearing and vision mathematical simulation, relating signal perception parameters to corresponding adaptation processes
23 p4109 A69-41979

Sensory information processing model for tactile perception using array of airjet and piezoelectric stimulators applicable to display design and nervous system investigation
24 p4276 A69-43273

SENSORY STIMULATION

Stability and habituation of nonspecific galvanic skin responses during light and sound stimulation periods in medical students
03 p0380 A69-13462

Critical body temperature for intracranial self stimulation in white rats
03 p0375 A69-13897

Coriolis stimulus effect during centrifugal g load on spatial orientation and accompanying stick performance
06 p0876 A69-18023

Spacecraft rotation and astronaut head and body motion as stimuli for vestibular analysis function study during weightlessness
20 p3473 A69-37275

Motion sickness as sensory rearrangement phenomenon, proposing neural mismatch hypothesis to account for symptom pattern
20 p3483 A69-38266

Stimulation effects of reticular formation, hippocampus and septum on sensory responses of posterior hypothalamic neurones in cats
21 p3656 A69-38979

Cortical and thalamic evoked activities changes during sensory conditioning of freely moving cat
22 p3872 A69-40160

Cortical responses by transient sensory stimulation of fingers EEG recorded, obtaining isomorphism between psychological and neurophysiological events
22 p3876 A69-40262

Mapping of biological potentials evoked in primary somatosensory fields by electrical signals on dorso-lateral surface of brain cortex of cats
22 p3886 A69-41121

Unisensory and multisensory signal processing in cortical and brain stem regions of albino rat by electronic averaging and time histogram techniques
23 p4092 A69-42055

SEPARATED FLOW NT BOUNDARY LAYER SEPARATION

Nozzle separation for thrust vector control with applications to guidance problems
01 p0161 A69-10412

Supercritical flow effects on unsteady aerodynamic coefficients used for subsonic aircraft flutter analysis, emphasizing changes due to shock and flow separation
01 p0007 A69-11020

Model for asymptotic separated flow in wake behind broadside of bluff body, discussing separation point, interaction, reattachment, base flow and near wake
02 p0188 A69-11986

Fluid mechanics of supersonic flow separation and reattachment in fluidic devices
02 p0231 A69-12077

Hydrodynamic analysis for determining steady flow region with closed separation area for Reynolds numbers to describe viscous mixing by Prandtl equations
02 p0190 A69-12570

Photographic flow patterns of separated flows with vortex formation obtained in wind tunnel for different aerodynamic configurations of revolution
02 p0191 A69-12586

Heat transfer covering heat conduction, channel flow, boundary layer flow, separated flow, etc
04 p0684 A69-14354

Slow nonNewtonian flow in separation zone analyzed using finite difference scheme
04 p0587 A69-14594

Reattachment pressure correlated for any type of two dimensional turbulent supersonic separated flow
04 p0588 A69-14727

Pressure fluctuations in separated flow region behind thin fence, determining recombination point position, noise sources and frequency spectra variations
04 p0544 A69-14868

Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point
04 p0591 A69-15408

Vortex motion of separated flow from slender wings and rotor loading, discussing computer role in low speed aerodynamic research
05 p0696 A69-15562

Local pressure and skin friction distribution around circular cylinder in cross flow in large range of Reynolds numbers
05 p0744 A69-15716

Plane supersonic flows separated by thin film shaped jet, deriving pressure as function of deviation
05 p0746 A69-16020

Lift and drag coefficients for circular cylinder immersed in time dependent flow analyzed using potential flow model
05 p0747 A69-16072

[ASME PAPER 68-FE-15] Asymmetric supersonic air flow at 60 degree angle of attack past ellipsoid with frontal spike creating separation area
06 p0858 A69-17337

Similarity functions defined for laminar or turbulent separation in nonuniform supersonic flow
07 p1050 A69-18417

[ONERA-TP-659F] Gas segregation in positive column of DC discharge due to axial ion motion analyzed using conservation equation
08 p1361 A69-20145

Equilibrium theory of parametric pump using cyclic flow of binary mixture through column with heated and cooled bed of solid absorbent
09 p1481 A69-21910

Two dimensional supersonic flow along adiabatic curved ramp noting separation, attached flow and laminar boundary layer interaction with external stream
09 p1430 A69-21949

[AIAA PAPER 68-109] Tangential air jet for separation control of two dimensional incompressible flow along circular cylindrical wall
09 p1431 A69-22277

Oblique shock wave separation conditions in supersonic gas flow past wedge
09 p1483 A69-22665

Axisymmetric detached flow past slender solid of revolution by ideal incompressible fluid at zero angle of attack and with small cavitation numbers
11 p1877 A69-25741

Heat flux in two dimensional laminar separation zone in supersonic flow, measuring convection coefficient and wall pressure
12 p2011 A69-26289

Heat and mass transfer in two dimensional turbulent free shear flows including separated and reattached flows
13 p2377 A69-28145

Semiempirical parameters in streamline division and momentum integral analyses for separated flows, using error function velocity profile and spreading parameter sigma
14 p2389 A69-29028

Supersonic gas flow past wedge at zero angle of attack with separated shock wave, calculating velocity gradient at stagnation point and pressure and drag distribution
14 p2390 A69-29615

Quasi-steady state supersonic gas flow past two closely spaced coaxial separating bodies at different velocities, showing dependence on separation rates
14 p2391 A69-29617

Supersonic jet flow with separated shock wave flowing past infinite wedge using Chaplygin method, assuming negligible entropy variations
14 p2391 A69-29619

Two piston flow stability separated by thin wall in traveling magnetic field, finding piston inertia centers velocity equal to field velocity
14 p2500 A69-29903

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid
16 p2732 A69-32142

Distributed boundary layer suction effectiveness for controlling supersonic transitional flow separation
16 p2772 A69-32149

Heat transfer in laminar separated flows with flat plate segment connections, indicating correlation between local heat transfer rates for successive regions
16 p2879 A69-32169

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess
17 p2949 A69-33124

Leading edge vortices and shock detachment flow over delta wings, discussing drag reduction due to lift
17 p2896 A69-34025

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field
18 p3124 A69-35384

Pure gas suction through free jet shock structure, analyzing aerodynamic effect of molecular separation
19 p3240 A69-36650

Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures
19 p3241 A69-36779

Global properties of solution of inverse detached shock problem analyzed by characteristic coordinates at low Mach number
19 p3301 A69-36788

Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature
20 p3458 A69-37185

[AIAA PAPER 68-672] Potential flow theory applied to determination of airfoil separated vortex flow and maximum lift and Reynolds number dependence
20 p3459 A69-37421

Flow separation and reattachment points and line of zero velocity jet mixing determined by injecting smoke
20 p3517 A69-37994

Secondary losses in flat large scale turbine lattice attributed to LF pulsating flow separation on back of blade
21 p3645 A69-39717

Axisymmetric separated flow in Chapman model shown nonexistent by flow visualization technique
23 p4060 A69-41905

Detachment in incompressible turbulent flows around thick body analyzed to predict base pressure, vortex volume, etc
24 p4299 A69-42674

Continuous potential fields modeling based on electrohydrodynamic analogy extended to flows involving stream separation
24 p4300 A69-43089

Laminar flow swirling motion in circular duct, studying separation and reversal
24 p4301 A69-43355

Separation flows in flat channel with step recess, analyzing dynamic characteristics in mixing region, in wake of rarefaction waves and in attachment zone
24 p4247 A69-43498

SEPARATION

Moving and stationary interphase boundaries segregation during phase transformation, discussing embrittlement
03 p0450 A69-13883

Optimization problems solution applied to separable but bounded state variable problem, providing control over commercial errors
24 p4292 A69-43286

SEPARATORS

NT AIR FILTERS
NT DUST COLLECTORS
NT ELECTROSTATIC PRECIPITATORS
NT EVAPORATORS
NT FLUID FILTERS
NT SIEVES
NT STILLS

Highly resistant separator performance in Zn-Ag oxide battery, discussing zinc electrode limitations on battery performances
10 p1640 A69-23996

Research and development programs leading to heat sterilizable spacecraft battery separator material, describing bench tests
23 p4072 A69-42284

Separation system for collecting wash and waste water from gaseous environment and separating liquid and gaseous phases during space missions
24 p4272 A69-42845

SEPTUM

Higher order modes suppression in square waveguides by bifurcating metal septa of finite length, analyzing periodic array of many finite-length septa
04 p0576 A69-14758

Stimulation effects of reticular formation, hippocampus and septum on sensory responses of posterior hypothalamic neurones in cats
21 p3656 A69-38979

SEQUENCING

Book on nonlinear programming, discussing transformation of constrained minimization problem into sequence of unconstrained minimizations of appropriate auxiliary functions
04 p0563 A69-14421

Sequence pulse stuffing technique for rate equalization of digital channels, discussing coding effect and capacity for word signaling
07 p1080 A69-19094

Probability density functions of waveforms from summation of digits in n-stage shift register generating m-sequence
15 p2568 A69-30617

SEQUENTIAL ANALYSIS

Optimal distribution of search effort for moving target location, suggesting Markovian decision models
01 p0104 A69-10653

Sequential probability ratio test for detecting changes in Gauss-Markov process characteristics, noting application to fault detection in gyro navigational system
01 p0083 A69-11002

Sequential logic for improved signal detectability in frequency-agile search radars, discussing target echo fading models in radar range performance prediction
01 p0033 A69-11008

Power advantage of optimum system achieved with suboptimum feedback function for sequential binary detection system
02 p0225 A69-11996

Sequential signal design for feedback channels, emphasizing single set subject to peak and average power constraints in time continuous transmission
03 p0408 A69-12868

Cross correlation function for two sequences of pulses arbitrarily distributed in time, noting noise stability of diversity reception systems
04 p0557 A69-14790

Distribution free sequential probability ratio procedure for detecting signal in multiple resolution element radar
05 p0717 A69-15609

Invariant imbedding and sequential interpolating filters for nonlinear processes
[ASME PAPER 68-WA/AUT-3]
05 p0738 A69-16183

Identification of finite memory, time discrete linear systems by Kiefer-Wolfowitz stochastic approximation procedures, presenting two algorithms for sequential identification
06 p0900 A69-17359

Trunk and tree searching properties of Fano sequential decoding algorithms
06 p0902 A69-17400

Signal detection procedures preserving nonparametric detection properties and advantages of sequential procedures, assuming signal corruption by additive noise at input
06 p0888 A69-17531

Linear recurring sequences over finite fields, discussing application to error correcting codes
06 p0948 A69-17863

Sequences with small correlation functions as error correcting codes in word separation, synchronization and pulse compression systems
06 p0948 A69-17868

Optimum and suboptimum detection of K binary symbols corrupted by white Gaussian noise, discussing searching procedure and average error probability
07 p1081 A69-19097

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis
08 p1297 A69-20419

Infinite tree code ensemble upper bound on moments derived for sequential decoding governed by Fano algorithm
09 p1471 A69-21318

Computer simulation of unbiased digital recording composed of sequential computations intended for various bit densities
[IEEE PAPER 3.3]
09 p1461 A69-22562

Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
11 p1830 A69-24795

Kalman sequential estimation adaptation to target maneuvers without sacrificing tracking accuracy in nonmaneuvering portions of trajectory
11 p1861 A69-25455

Algebraic and sequential coding-decoding method for data communication rates up to capacity of discrete memoryless channel, discussing error probabilities
13 p2219 A69-27664

Finite automaton malfunctions, discussing input sequences construction and output sequences analysis for malfunction subsets recognition
13 p2239 A69-28536

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis
14 p2427 A69-29657

Dynamic meteorology quasi-stable problems solved using sequential approximations solution for barotropic model of Euler equations
14 p2476 A69-29821

Real time shock response analysis advantages over sequential analysis, describing equipment
15 p2618 A69-30359

Sequential Bayes procedure demonstrating mean time to failure exceeding acceptable value with given confidence coefficient
19 p3327 A69-36040

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations
19 p3273 A69-36266

Dirichlet polynomials double sequences and double series with positive exponents, defining conditions for convergence in bicylinder
19 p3361 A69-36639

Existence theorem for limits of minimizing sequences in optimal control problems, applying results to systems governed by partial differential equations
19 p3287 A69-36724

Failure test algorithm for sequential units with delay lines of control digital computers, detecting replacement of output terminals by sensitive paths
20 p3502 A69-37394

Sequential design for economic description of potentially redundant elastic structures, noting redesign sequence
21 p3842 A69-39302

Nonlinear estimation with noisy data, considering least squares fit, sequential /Kalman/ estimate and iterated sequential scheme
21 p3686 A69-39370

Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
23 p4213 A69-41623

Satellite communication system high speed sequential decoder design, discussing parameters, simulation and test results on satellite channels
23 p4131 A69-42523

Sequential vector estimation of matrix of second partial derivatives, suggesting alternative least squares method
24 p4340 A69-42958

SEQUENTIAL COMPUTERS

Infinite tree code ensemble upper bound on moments derived for sequential decoding governed by Fano algorithm
09 p1471 A69-21318

Asynchronous finite state sequential nonlinear controller synthesis with few flip-flops for dynamic space vehicle systems
[AIAA PAPER 67-988]
13 p2225 A69-28201

Algorithm for assigning binary codes to inputs, internal states and outputs for sequential machines by threshold logic
18 p3105 A69-34618

SDP-3 small serial computer for engineering experiment on IMP spacecraft, discussing design modifications to improve performance
23 p4133 A69-41737

SEQUENTIAL CONTROL

Atomic clock with sequential optical pumping using resonance frequency of hyperfine transition of ground state Rb 87
12 p2090 A69-26291

Synthesizable automata with sequential homogeneous structure formed by standard fixed units combination
13 p2224 A69-27249

Apparent movement in peripheral vision induced by sequential flashing of spatially unresolved two dots, studying dynamics of illusion
16 p2746 A69-31556

Fluidic logic for high speed pneumatic stepping motor for high radiation environments, discussing bellows pressure sequencing by open-loop counter, signal conversions and performance
18 p3092 A69-34310

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequences
[AIAA PAPER 69-946]
22 p3974 A69-40329

Optimal rule for decision to stop or continue observation of random variables after observing sequence of variables with continuous distribution function
24 p4341 A69-43235

SERIES [MATHEMATICS]

NT ASYMPTOTIC SERIES

NT FOURIER SERIES

NT PADE APPROXIMATION

NT POWER SERIES

NT SINE SERIES

NT TAYLOR SERIES

Summation of Legendre series by transformation into integrals and use of recurrence relations
01 p0171 A69-11072

Chebyshev polynomials maximum property, examining effect of roundoff errors in Horner scheme for floating point arithmetic
03 p0456 A69-13553

Matrizants construction for Keplerian motions, discussing Hamiltonian character of variational equations for planar two body problem
03 p0513 A69-13779

Phenomena satisfying inhomogeneous Helmholtz equation in cylindrical coordinates, inferring equivalent infinite series directly from integral-transform method
04 p0623 A69-14896

Boundary condition description effect on numerical accuracy of series solution to boundary value problem by direct method
04 p0681 A69-15283

Double stochastic approximation algorithm for minimizing mean square error in finite expansion of unknown probability distribution functions
06 p0947 A69-17361

Uniqueness conditions of expansions in series of functions stressing Jacobi series applied to singular partial differential equations
07 p1174 A69-18805

Time harmonic, spherical harmonic and power series expansion of Boltzmann equation
08 p1353 A69-20793

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies
10 p1687 A69-23927

Rapidly convergent series expansions for plane wave transmission coefficients for elliptical and rectangular apertures
11 p1837 A69-25001

Theorem for integral expansion applied to boundary value problems of mathematical physics and elasticity theory for single sheet hyperboloids of revolution
11 p1910 A69-25731

Analytic continuation of Appell hypergeometric series into linear combination of four infinite series
12 p2123 A69-26605

Matched asymptotic expansions to obtain slider bearing load carrying capacity
[ASME PAPER 68-LUBS-18]
13 p2266 A69-27270

Series and integral expansions of Jacobi polynomials with positive kernel, noting ultraspherical polynomials
14 p2470 A69-28905

Finite thickness plate heat equation using Legendre polynomials
14 p2537 A69-28970

Quasi-integral analytic continuation operator applicability to potential field approximated by certain truncated series expansion
14 p2470 A69-29032

Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method
14 p2534 A69-29284

Eigenvalues of finite matrix Hamiltonian, considering convergence radius of perturbation series, limits and renormalization
14 p2470 A69-29451

Wiener-Hermite expansion extended to include time dependent ideal random functions, discussing application to shear flow turbulence
15 p2644 A69-30201

Lagrange expansion theorem for shielded surface waves, obtaining modal functions and power flows
16 p2750 A69-31947

Dirichlet polynomials double sequences and double series with positive exponents, defining conditions for convergence in bicylinder
19 p3361 A69-36639

Generalized series solutions of boundary layer flows over pointed and blunt nosed axisymmetric bodies, noting general potential flow extending Mangler transformation usefulness
20 p3514 A69-37211

Polya concept of maximum and minimum densities of series applied to entire functions of finite order with positive zeros
20 p3568 A69-37442

Residue series representation of radiation fields for azimuthal leaky wave antenna on conducting cylinder, showing zeroth term correspondence to omnidirectional antenna
20 p3506 A69-37834

Literat solution to equations of motion applied to lunar theory using electronic computer with series convergence
21 p3796 A69-38474

Solution procedure for torus with given surface loads or displacements, using series expansion of generalized analytical functions, discussing stress concentration near toroidal cavity
21 p3839 A69-39192

Bullard-Gellman dynamo, discussing magnetic field developed as series expansion, truncation levels and convergence
22 p4018 A69-40194

Northern Hemisphere 500-mb height pattern series expansion, using optimal sets of orthonormal functions, obtaining rms error
24 p4346 A69-43157

Chebyshev series approximations for Bose-Einstein functions of orders one to ten, noting computability of Fermi-Dirac functions and polylogarithms
24 p4341 A69-43231

Single series solution for rectangular plate deflection under arbitrarily located concentrated load, considering monolithic slab beam connection case
24 p4404 A69-43593

SERT [ROCKET TESTS]
U SPACE ELECTRIC ROCKET TESTS

SERUMS
U INOCULUM

SERVICE LIFE
Quantitative amounts of contaminants oil from piston engine and life of oil lubricant in engine
04 p0604 A69-14500

Statistical method to investigate time varying stresses in helicopter structures, considering service life evaluation
05 p0767 A69-16775

Helicopter flight safety as function of service duration, performance limitations and propulsion failure
07 p1054 A69-19313

Nickel-cadmium and Ag-Cd storage batteries performance, discussing methods to lengthen battery life and improvement of characteristics
08 p1261 A69-21051

Synthetic circuit equipment for semiconductor rectifier life testing with built-in fault analyzer for indicating shorted and broken diodes
08 p1293 A69-21113

Automatic transistor reliability testing system based on measured data and reliability research
08 p1294 A69-21119

Reliability in microelectronics estimated from failures expected during lifetime, describing various test methods
08 p1294 A69-21121

Life test of high temperature /2400 K/ 10 millipound resistojet thrusters, comparing results to theoretical predictions
[AIAA PAPER 69-294] 09 p1563 A69-21232

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] 09 p1566 A69-21255

Thermionic converter metallography relationship between materials and fabrication methods and reliable performance life
09 p1439 A69-21824

Heat pipes for thermionic converters, wicks development, high temperature life testing and performance
09 p1440 A69-21833

Stochastic model for calculating expected component failures in transient state from Weibull distribution failure data for first generation
09 p1504 A69-22149

Titanium-boron composites for gas turbines, mechanical properties and service life in high temperature environment
[ASME PAPER 69-GT-1] 09 p1527 A69-22510

Reliability characteristics of service life determination, noting exponential distribution of failure time value
10 p1662 A69-23319

Zinc electrode cycle life improvement by reducing change in electrode shape, noting effectiveness of teflonation
10 p1640 A69-23995

First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise
11 p1990 A69-25505

Reliability improvement influence on life cycle costs of high volume piece of military/commercial equipment
12 p2101 A69-25848

Service life of system predicted by identifying and testing system variables of mission phases, using obtained data in statistical estimation
12 p2101 A69-25970

Lens shutters durability, analyzing break-in effect, cock-and-release cycles and cause of failures
12 p2094 A69-26600

Mathematical relations presented for parameters of technological, transport and information systems reliability and life expectancy
13 p2268 A69-27436

Reliability and efficiency improvements for thermionic converters at JPL, giving failures analyses
14 p2397 A69-29175

Thermionic converters with different collectors, emitters and metal-ceramic seals reliability tested, determining life duration
14 p2398 A69-29179

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times
14 p2481 A69-29191

Cylindrical geometry in-pile and out-of-pile thermionic converters long term life tests, including unfueled and fueled versions
14 p2399 A69-29197

Cylindrical in-core thermionic converters performance and life tests, discussing diode design, operation data and irradiation studies
14 p2399 A69-29199

European heat pipe research emphasizing transportable heat quantities, heating rate and life duration
14 p2538 A69-29201

Concorde aircraft and engine materials selection factors including mechanical properties of metals and nonmetals, corrosion resistance, service life, sealants, weight analysis, etc
15 p2639 A69-30464

Life margin tests of oil lubricated oscillating caged needle roller bearings under service conditions duplicating helicopter rotor hinge pin locations
[ASLE PAPER 68-LC-7] 15 p2622 A69-30609

Hydrogen laser operation time reduction attributed to hydrocarbon formation on inner surface of storage flask, promoting atomic hydrogen recombination
15 p2634 A69-30942

Long life repairable equipment reliability and mean time between failure with limited life components and material in normal life maintenance environment
15 p2581 A69-31134

Airborne particle size influence on gas turbine parts erosion, with attempts to relate to filtration and engine life
16 p2794 A69-32026

Small turbine development for long life applications in helicopters and unpresurized aircraft, describing Artouste, Turmo, Astazou and Bastan series
17 p3020 A69-33346

Turbine blade cooling emphasizing economics, service life and computerized calculations
17 p3020 A69-33352

Helicopter flight loads spectra data compared on statistical basis to establish component service lives
[AHS PAPER 301] 17 p2901 A69-33548

Gas turbine components life prediction, using Weibull distribution and Bayes theorem to estimate probability of crack initiation
19 p3394 A69-36004

Relationship between chronological and fatigue life in airframes, showing fatigue life dependence on operating conditions, pilot techniques and maintenance and inspection quality
20 p3461 A69-36920

Argon laser lower operating level decay probabilities, using spectrum analysis to study role of radiative decay
22 p3965 A69-40965

Bayesian estimate of individual truck maintenance costs based on optimum replacement maintenance age
23 p4241 A69-41577

Fatigue crack initiation mechanism as used in design to prevent fatigue failures in service
24 p4397 A69-42770

Diagnosis of service failures and reasons for primary failure isolation from secondary damage
24 p4398 A69-42772

Engineering components service failures involving fatigue crack propagation, analyzing causes
24 p4398 A69-42775

Military aircraft service life problems solved by alternative replacement policies comparative present value analysis
24 p4253 A69-43058

Aerospace fastener systems standardization proposal to reduce inventories, simplify design and provide extended structural life
24 p4325 A69-43439

Aerospace fastening system requirements to lower in-place costs, extend service life and reduce weight of aircraft
24 p4325 A69-43440

Polymeric polyurethane protective coatings for radar radome covers with improvement in service life, discussing performance properties and production method
24 p4338 A69-43456

SERVICE MODULES
Thermal insulation for cryogenic storage in space, discussing Apollo service module conversion to cryogenic service module
12 p2175 A69-26827

SERVICES
NT MEDICAL SERVICES
NT METEOROLOGICAL SERVICES
Bulk queuing with service time distribution assuming customer arrival in batches and service discontinuance
02 p0271 A69-12060

SERVO LOOPS
U FEEDBACK CONTROL
U SERVOCONTROL

SERVOACTUATORS
U ACTUATORS
U SERVOMOTORS

SERVOAMPLIFIERS
Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results
15 p2553 A69-31294

Servovalves with fluidic and electrical inputs compared for gas servoamplifiers performance, considering use as sensors in closed-loop hydraulic circuit
19 p3255 A69-36711

SERVOCONTROL
Positive feedback of spring mass system for mirror control on spectroheliometer of Apollo Telescope Mount flight
02 p0248 A69-11738

Servoelements and control methods for V/STOL aircraft, including lift and propulsion throttle configurations
04 p0547 A69-14815

Servosystems and control, discussing characteristics, types and stability of servomechanisms
04 p0550 A69-15179

Servosystems and control, discussing open and closed loops and parallel, decoupling, multivariable and adaptive control
04 p0550 A69-15180

Hybrid electropneumatic and electrohydraulic servosystem for actuation of gas jet nozzles of sounding rocket automatic pointing system
04 p0550 A69-15182

Electrohydraulic radar antenna telecontrol system, discussing pump assembly, hydraulic motor and pump control servojack
04 p0551 A69-15185

DC servo system with torque feedback to ensure insensitivity to load variation and provide optimal performance
05 p0736 A69-15659

- Self contained electrically servoed transducers for flight control, noting angle of attack transducer and force
05 p0766 A69-16750
- Modal response analysis of servocontrols as deduced from vibration test, for possible application to aircraft [ONERA-TP-668]
06 p0869 A69-17100
- Three axis attitude servomechanism design to adjust attitude and angular velocity of spacecraft
06 p0955 A69-17589
- Design criteria for pneumatic servo controls with fluidic elements stressing final transient, pilot circuits and amplifier elements
08 p1256 A69-20305
- Gas servo design utilizing floating flapper disk switching valves and pulse-length modulated pressure waves to actuate on-off switch [AGARDOGRAPH-118]
08 p1257 A69-20950
- Monitors to detect incipient failure during turbine engine development, describing servocontrol
10 p1692 A69-23253
- Electrohydraulic vibration isolation systems with feedback, considering band and notch isolation, system stability and adjustable frequency response [ASME PAPER 69-VIBR-40]
10 p1641 A69-24178
- Dynamics of gyroscopic synchronous servo system intended for remote measurement of spatial orientation coordinates of sensor moving element
11 p1881 A69-24558
- Electrical servopositioning of telemetry reception antenna for tracking satellites, considering weight, stability, etc
11 p1852 A69-25118
- Servocontrol to delay flutter onset of aeroelastic structures, discussing rapid amplitude and phase changes near instability point, wind tunnel models, instrumentation, analog simulation
11 p1992 A69-25518
- Hydraulic servo actuators load effect included in control loop actuator simulation
12 p2016 A69-26266
- Temperature control below 5.2 K based on servoing He pressure above bath
18 p3136 A69-34641
- Servovalve orifice characteristics described by discharge, flow or loss coefficients for laminar and turbulent flow, noting use of Mises model
19 p3256 A69-36712
- Astronomical data collection and evaluation, discussing digital distance measurement, photoelectric photometry, servocontrols and electronic computers suited for Schmidt telescope output
20 p3539 A69-37525
- SERVOMECHANISMS**
NT SERVOAMPLIFIERS
NT SERVOMOTORS
- Dynamic properties of electrohydraulic servomechanisms having variable structure analyzed by analog computer
03 p0368 A69-13686
- Servosystems and control, discussing characteristics, types and stability of servomechanisms
04 p0550 A69-15179
- Servosystems and control, discussing open and closed loops and parallel, decoupling, multivariable and adaptive control
04 p0550 A69-15180
- Servosystems components design, discussing detector, corrector, amplifier and motor
04 p0550 A69-15181
- Hybrid electropneumatic and electrohydraulic servosystem for actuation of gas jet nozzles of sounding rocket automatic pointing system
04 p0550 A69-15182
- Electric position servosystems for 50 ton telemetry reception antenna and 1200 ton loading turntable of nuclear power plant
04 p0585 A69-15184
- Spherical gyroscope servosystem probabilistic synthesis ensuring minimum dispersion of random drift
05 p0764 A69-16669
- Electrohydraulic attitude servomechanism for controlling movements of pilot training cabin, describing hydraulic system and electric control circuit
06 p0906 A69-16966
- Automatic control textbook covering theoretical and practical principles of control engineering, analysis, design, servomechanisms and instrumentation
06 p0904 A69-17856
- DC servo system with torque feedback, discussing bang-bang system comparison, analog simulation, damping and quasi-optimum behavior
07 p1059 A69-19229

- Book on feedback control theory for engineering and applied physics noting signal theory, servomechanisms, transfer functions, system stability and Nyquist diagrams
08 p1295 A69-19841
- Kinematics of vertical gyroscope mounted in additional servo frame, determining kinematic errors due to rotor axis deviation
09 p1498 A69-22108
- Correlation between responses of linear systems for transient input as performance criterion for servomechanisms
09 p1475 A69-22536
- Analytical method for optimum switching function of relay servosystem subjected to stationary Gaussian random noise, considering perturbation and dynamic programming
11 p1859 A69-25025
- Inertial servomechanisms actuators, discussing dynamic characteristics, power, vibration damping, matching, couplers, etc
11 p1826 A69-25119
- Monograph on nonlinear servosystems covering nonlinearity with/without inertia, self oscillations, linearization by forced oscillations, stability theorems and Liapunov function choice
12 p2054 A69-26966
- Human operator as servo system element of subassemblies in tracking and equilibrium tasks, stressing results of electromyographic analysis
12 p2025 A69-27081
- Searchless gradient self adaptive system for adjusting servosystem parameters to reference model characteristics, using auxiliary operator method
14 p2426 A69-29146
- Correlated noise effect on accuracy of suboptimal servosystem velocity measurements from recording Doppler frequencies
15 p2567 A69-30341
- Barometric altimeters development, discussing servo and three pointer types, accuracy, Central Air Data Computer repeater function and future trends
15 p2610 A69-30859
- Servosystems components design, discussing detector, corrector, amplifier and motor
16 p2741 A69-32431
- Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems
18 p3093 A69-34356
- Computerized analysis and design of nonlinear servomechanisms, using describing functions technique
18 p3110 A69-34672
- Feedback realization of continuous optimal filter applied to designing servomechanisms with stochastic inputs and disturbances
18 p3110 A69-34673
- Analytical, graphical and graph-analytical methods for synthesis of passive circuits ensuring air removal from chambers of pneumatic logic control and servoelements
18 p3093 A69-34831
- Automatic ultrasonic inspection device search head, servomechanism and electronic system used for detecting weld defects and cracks
18 p3137 A69-35111
- Liapunov method applied to stability evaluation of multiparameter self adaptive nonsearch gradient servosystems
19 p3286 A69-35891
- Optimal structural parameters of radar digital ranging servosystems derived from reproduction error, including computer simulation data
19 p3278 A69-36593
- First harmonic approximation method reformulated to interpret nonlinear characteristic directly, discussing oscillation stability of servosystems
19 p3287 A69-36709
- Electrohydraulic servomechanism harmonic response showing nonlinear behavior, including jump resonance, analyzed by mathematical model and analog simulation
20 p3464 A69-36999
- Electrohydraulic servosystem to counteract atmospheric turbulence effects on B-52 global bombers, noting reduction in aircraft fatigue and structural damage
20 p3467 A69-38184
- Design concepts and principles of systems for monitoring of Concorde flight control actuators, considering servo control, control interconnections and control input system
20 p3467 A69-38190
- Stability of nonlinear systems with state variable feedback applied to fuel valve servomechanism
21 p3687 A69-39460

Programmable digital compensator for single high performance control loop servomechanisms
21 p3688 A69-39704

Aircraft directional stability in terms of ideal non-holonomic coupling on mechanical system, noting servosystem role
21 p3830 A69-39836

Statistical analysis of operation of precision electric spark machine servosystems with RC generator based on working pulse peak voltage distribution
23 p4168 A69-41307

Fluidic servomotor controlled by hydraulic vortex valves using mechanical signals for helicopter stability augmentation system
24 p4255 A69-42800

SERVOMOTORS

- Servosystems components design, discussing detector, corrector, amplifier and motor
04 p0550 A69-15181
- Limiting amplitude of output shaft vibrations of servodrive operated in linear region as function of frequency
04 p0584 A69-15417
- Transfer function variation of invariant servodrive, comparing calculated and experimental transient response
04 p0584 A69-15418
- Synchronous servomotor for parabolic antenna of surveillance radar, discussing motor size and optimum gear ratio determination
08 p1274 A69-20108
- Dynamic behavior of electrohydraulic servomotors over wide range of loads using differential equations of motion
08 p1256 A69-20718
- Gas servo design utilizing floating flapper disk switching valves and pulse-length modulated pressure waves to actuate on-off switch [AGARDOGRAPH-118]
08 p1257 A69-20950
- Inertial servomechanisms actuators, discussing dynamic characteristics, power, vibration damping, matching, couplers, etc
11 p1826 A69-25119
- Servosystems components design, discussing detector, corrector, amplifier and motor
16 p2741 A69-32431
- Fluidic logic for high speed pneumatic stepping motor for high radiation environments, discussing bellows pressure sequencing by open-loop counter, signal conversions and performance
18 p3092 A69-34310
- Spacecraft data storage requirements, discussing use of servo-driven tape recorders in data processing systems
18 p3107 A69-35096
- Duplex servomotor package sized for stabilator channel of F-4 aircraft providing compact integrated control surface positioning [AIAA PAPER 69-788]
19 p3249 A69-35640
- Triple redundant actuator for fly-by-wire control system, noting electrohydraulic servomechanisms in side-by-side arrangement
22 p3870 A69-41242
- Stability criteria for electrical interconnection in parallel operating valve controlled hydraulic servomotors applied to gimbaled system
24 p4256 A69-43310
- SERVOS**
U SERVOMOTORS
- SERVOSTABILITY CONTROL**
U SERVOCONTROL
- SET THEORY**
NT BOREL SETS
NT EQUIVALENCE
- Minimal conditions for association of binary variables, studying nondecreasing functions and equivalence in coherent binary systems theory
04 p0624 A69-15007
- Spontaneous decomposition of image space into compact sets/images or classes/ using adaptive dispersion method to reduce system learning time
11 p1859 A69-24964
- Torsion theory for modules over integral domain, giving definition of injective sums
13 p2287 A69-27339
- Image recognition algorithm for determination of hyperplane separating two finite sets of elements in Euclidean space
14 p2418 A69-29353
- Probabilistic automata stochastic matrices algebraic properties of definite, quasi-definite, periodic and quasi-periodic sets
15 p2645 A69-31141

Autonomous second order recurrence with real variables, studying conditions for attractive limiting set stability region with several noninterconnected regions
19 p3287 A69-36651

N-dimensional vector functions branching process stability belonging to locally compact set in certain space
20 p3509 A69-37075

SFERICS
U ATMOSPHERICS
SH-3 HELICOPTER

Analytical design of SH-3 helicopter engine inlet ice deflector shield interior surfaces, defining potential flow pattern and moisture droplet trajectories
01 p0011 A69-11064

SHADOWGRAPH PHOTOGRAPHY
NT SCHLIENEN PHOTOGRAPHY

Boundary layer effects on shadow deformation, emphasizing two dimensional flow with image projected by parallel light beams perpendicular to flow plane
03 p0364 A69-13787

High speed shadow photographs of Q switched laser triggered spark gap air discharge, showing sonic waves and development of discharge channel
04 p0610 A69-14349

Feed support blockage loss in parabolic antennas evaluated by shadowgraph photography
04 p0576 A69-14771

Electron fractography techniques and fracture modes in metallic materials interpretation, giving special attenuation to classical fracture replication and shadowing techniques
04 p0619 A69-15395

Qualitative criterion for observing atmospheric turbulence structure by shadowgraph based on medium statistical properties, using ray optics
07 p1183 A69-19650

Mirror image and oblique shadow method forming moire patterns to measure surface topography
08 p1312 A69-20103

Direct electron beam shadowgraph photographic/betagraphy/ technique for recording small high speed objects with 3 nanosecond exposure time
12 p2086 A69-26164

Q switched ruby laser application to high speed shadow photography and holography in study of gas flow around ballistic body
12 p2088 A69-26177

Shadowgraph cinematography technique for testing attenuating influence of symmetrical diaphragm system on shock wave
12 p2088 A69-26184

Shadow, schlieren and interferometric methods for study of transonic, supersonic and hypersonic fields of aerodynamics, using refractivity variations in heterogeneous medium
12 p2060 A69-26934

Plane shock wave propagation around cylinders of various radii recorded with shadowgrams and Mach-Zehnder interferograms, discussing wave diffraction mechanics
18 p3120 A69-34472

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method
21 p3695 A69-38961

Shadow photography study of electrical discharge set off by laser spark
21 p3740 A69-39552

Laser shadowgraph technique for visual observation of projectiles surface flying at hypersonic velocity along ballistic trajectory
22 p3963 A69-40601

Stereoscopic shadow caster application to photographic stereoscopic projection for studying binocular stereopsis under kinetic viewing conditions in vision research
22 p3893 A69-40839

SHADOWGRAPHS
U SHADOWGRAPH PHOTOGRAPHY
SHADOWS
NT LUNAR SHADOW
NT PENUMBRAS

Magnetically aligned flows between sunspots, considering Evershed effect on umbrae and penumbrae
10 p1772 A69-22907

Light saturation development of line profile component of normal Zeeman triplet in sunspot umbrae
14 p2528 A69-29964

Combined distribution density of elevations and slopes for illuminated areas of stable statistically

homogeneous random surface exposed to parallel rays beam
15 p2569 A69-30948

Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae
18 p3204 A69-35389

Umbral chromosphere flashes visual and photometric observations at 5 sec intervals on K line filtergrams using Halle filter
18 p3204 A69-35390

Shadow effects on current-voltage characteristics of solar cell array circuits, developing mathematical models
19 p3254 A69-35709

Cloud masses vertical thickness estimated from study of cloud shadows on satellite TV pictures
19 p3366 A69-36670

Sunspot umbra observed on 21 September 1966, computing transparency in model equaling photosphere transparency at same optical depth
20 p3605 A69-37825

Sunspots microstructure, discussing penumbra and umbral properties with respect to magnetic field configuration
24 p4378 A69-42690

SHAFTS [MACHINE ELEMENTS]
NT TURBOSHAFTS

Numerical solutions of elastic problems by conformal mapping and finite difference method applied to circumferentially grooved shafts in torsion
02 p0346 A69-12419

Numerical solutions elastoplastic torsion of circumferentially grooved shafts based on flow and deformation type theories
02 p0346 A69-12420

Amplitude-frequency characteristics of rotor mounted on hydrostatic bearings calculated by equations of dynamic compliance method
03 p0432 A69-12961

Limiting amplitude of output shaft vibrations of servodrive operated in linear region as function of frequency
04 p0584 A69-15417

Spring supported hydrostatic shaft seal with floating members isolated from structure
[ASME PAPER 68-WA/LUB-9]
05 p0768 A69-16132

Noncontacting torqueometers using magnetoelastic properties of steel shafts, discussing gas turbine and industrial applications
[ASME PAPER 69-GT-64]
09 p1500 A69-22480

Heat treatable low alloy steels weldability for lightweight ultrahigh strength pressure vessels, gear and shaft fabrication in aerospace applications
12 p2100 A69-25827

High speed shafting design for helicopter power transmission systems, discussing shaft in OH-6A Cayuse light observation helicopter
[ASME PAPER 69-DE-5]
14 p2453 A69-28837

Transverse and torsional vibration characteristics of tapered cantilever beams and shafts analyzed by lumped inertia force method
17 p3066 A69-34052

Shaft speed limitations on close clearance seals, using test data on changes in fluid viscosity causing contact and damage
[ASLE PAPER 68-LC-13]
21 p3731 A69-38763

SHAKERS

Equalization of multiple electromagnetic shakers for environmental vibration testing, using analog computer
[JPL-TR-32-1364]
02 p0229 A69-12374

Vibration machine as vibration environment simulation for product reliability testing, analyzing spectrum of acceleration waveforms
12 p2060 A69-26940

Multiple shaker ground vibration test system for confidence in helicopter designs before flight testing and evaluation of force balancers
15 p2585 A69-30357

Reciprocity method for absolute calibration of piezoelectric accelerometer mounted on electrodynamic shaker table
15 p2615 A69-31283

Piezoelectric shaker consisting of combination of damped resonant cylindrical elements for wide frequency calibration of vibration pickups
17 p2975 A69-33665

Machine parts vibration attenuation, discussing input vibration reduction, resonance avoidance, damping, vibrating parts strengthening and shakers
18 p3148 A69-34619

MIL-STD-781A vibration requirements, using mechanical shakers for AGREE vibration testing
22 p3954 A69-40036

SHALES

Normal, isoprenoid, dicarboxylic, keto and various aromatic acids isolated from controlled stepwise degradation of Green River kerogen by successive chromic acid oxidations
15 p2606 A69-31533

Acid fraction extraction of Green River shale identified by gas chromatography-mass spectrometry-computer system, noting trimethyl pentadecanoic acid
21 p3669 A69-38983

SHALLOW SHELL EQUATIONS

Exact solution of shallow shells of revolution equations governing linear deformation compared with asymptotic integration procedure
01 p0166 A69-10234

Shear buckling test data for shallow corrugated webs compared with theoretical analysis with web buckling as orthotropic plate or local mode
01 p0170 A69-10866

Boundary value problems in thin shallow shells of arbitrary planform analyzed by partial differential equations
01 p0171 A69-11071

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell
02 p0337 A69-11654

Plane shock wave interaction with elastic shallow spherical shell in compressible fluid, formulating equations of motion
02 p0339 A69-11977

Elastic noncircular orthotropic conical shell stress-strain state, obtaining differential equations reducible to integrodifferential equations solvable by iteration
04 p0673 A69-14494

Shallow shell deformations based on nonlinear equations solved by Newton-Raphson iteration
04 p0674 A69-14591

Equations for nonshallow spherical shell deformations derived by Bubnov-Galerkin method
04 p0684 A69-15539

Creep buckling of shallow geometrically nonlinear spherical shell of linear viscoelastic material under constant external load
05 p0831 A69-15679

Bending equations for shallow elastic three layer asymmetric shell with different isotropic layers and transversely isotropic rigid filler at various temperatures
05 p0840 A69-16197

Bending general instability of stiffened shallow orthotropic cylindrical shells, noting buckling stress and application to shell design for various loadings
06 p1022 A69-17369

Stress distribution in shallow spherical shell with smooth cornered rectangular hole or biperiodically arranged set of holes, using computer program
06 p1027 A69-18020

Circular cylindrical spinning shells vibrations by gyroscopically induced inertia loads, formulating equations of motion based on shallow shell theory
07 p1236 A69-19459

Shallow spherical shells equilibrium under uniformly distributed internal pressure, analyzing nonlinear boundary value problems by algorithm
07 p1237 A69-19685

Large deflection behavior of shallow circular arch subjected to vertical point load by nonlinear Rayleigh-Ritz finite element method, discussing deformation path
08 p1411 A69-20140

Stability and bending of flexible plates and shallow shells obeying hereditary relations solved by singular kernel functions
08 p1413 A69-20335

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads
09 p1616 A69-21977

Rectangular planform shallow spherical shell stability with mixed boundary conditions, using Cauchy-Riemann equations and equation for plate on elastic base
10 p1792 A69-22848

Stiffness matrix for doubly curved shallow shell element with rectangular plane projection applied to circular cantilevered cylinder and barrel vault
10 p1802 A69-23892

Strength analysis of revolving shallow shell with jumpwise thickness variations under axisymmetric dis-

tributed load, considering rigidity and plastic deformation 11 p1968 A69-24318

Stress concentration during deformations in thin shallow shells, using conformal mapping and difference method 11 p1971 A69-24648

Static and dynamic stability of flexible shallow spherical shell under axisymmetric load and elastically hinged along contours 11 p1976 A69-24763

Thin plastic shell theory based on static and geometrical relations for shallow and circular cylindrical shells 11 p1978 A69-24807

Asymptotic methods for three dimensional equations in thin and thick elastic shell theory for determining two dimensional systems 11 p1978 A69-24810

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship 11 p1980 A69-24823

Bending and membrane stresses determination in shallow thin shells of revolution under large axisymmetric deflections, using normal and radial displacement relationship [SESA PAPER 1332] 11 p1995 A69-25651

Quasi-shallow shells theory applicability to thin elastic shallow shells, emphasizing use of function W/W_0 12 p2178 A69-26001

Variational method of displacements for calculating positive Gaussian curvature shells with allowance for shear strain, considering shallow shell equations and symmetrical load 12 p2178 A69-26006

Free vibration fundamental natural frequency of shallow shell or dished plate with simply supported square boundary 12 p2179 A69-26211

Symmetrical stressed state of shallow shell with crack edge loading solved in Cartesian coordinates 12 p2181 A69-26614

Shallow hyperbolic paraboloidal shell with large deflections, analyzing nonlinear behavior with numerical method based on integral equations 12 p2185 A69-26820

Elastic buckling and initial postbuckling behavior of clamped shallow spherical shells under axisymmetric load 12 p2187 A69-26842

Stiffness matrix derived for skewed curved shallow shell element with reference to oblique coordinate system 13 p2358 A69-27210

Finite element displacement method extension to include geometric nonlinearity applied to arbitrary plate element, shallow cylindrical shell and shallow hyperbolic paraboloid 13 p2361 A69-27441

Nonlinear Galerkin analysis of curved plate flutter, using shallow shell/von Karman equations and quasi-steady aerodynamic theory 13 p2364 A69-28207

Differential equations for shallow circular spherical shell transformation to equation describing stress-strain state of plate on elastic base 13 p2369 A69-28565

Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations 14 p2533 A69-28985

Torsional stability of shallow shells of revolution, solving eigenvalue problem obtained from perturbation of nonlinear equations by finite differences 16 p2871 A69-31879

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations 16 p2871 A69-31897

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations 18 p3212 A69-34347

Side force problem for shallow helicoidal shell, shown as static geometric analog of pure bending problem, solved by applying duality [ASME PAPER 69-APM-11] 18 p3213 A69-34387

Regular integral equations solvability for boundary value problems in shallow shell theory, using method of potential representations and Green matrices 18 p3224 A69-35309

Limiting equilibrium of variable thickness shallow spherical and conical shells of revolution under axisymmetric loads, assuming rigid plastic shell material 18 p3225 A69-35370

Transverse oscillations of shallow multilayer shells, using tangential-stress distribution law in determining natural oscillation frequencies in single and sandwich layer panels 19 p3435 A69-35842

Iterative algorithm applied to shell theory boundary value problem of stress concentrations at shallow shell holes 19 p3436 A69-35847

Matrix displacement method of structural analysis applied to dynamic buckling of clamped shallow spherical caps under step pressure loading 20 p3622 A69-37229

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations 21 p3834 A69-38719

Nonlinear problems involving large deflections of isotropic and orthotropic shallow shells of rectangular planform, deriving partial differential equations for solution 21 p3838 A69-39185

Nonlinear stability of shallow elliptical paraboloidal dome under uniformly distributed compression, solving by Bubnov-Galerkin method on computer 21 p3838 A69-39186

Variational principle applicable to nonlinear theory of shallow shells, deriving potential for equations describing uniform boundary conditions, discussing shell stability 21 p3838 A69-39191

Small curvature effect on prevention of vibration in shallow shells under random loading numerically analyzed for component modes using linear theory 22 p4044 A69-40600

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load made applicable to nonshallow shells equilibrium 22 p4047 A69-41062

Shallow shells two dimensional theory including effects of transverse shear deformation and of moments turning about normal to middle surface 22 p4048 A69-41197

Nonlinear shallow shell theory of stress and strain formulated via shell of revolution problem 22 p4048 A69-41198

Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures 22 p4048 A69-41199

Stress concentration in shallow spherical perforated shell under loads, reducing boundary value problem to infinite algebraic equations solution 23 p4233 A69-42342

Collapse load of shallow conical shells clamped at base and loaded through finite rigid boss, using Tresca yield condition for sandwich shell 23 p4236 A69-42496

Local stress distribution in cylindrical shells at concentrated load area solved by shallow shell theory 24 p4395 A69-42593

Axisymmetric vibration of shallow spherical caps, using nonlinear dynamic equations and associated variational equation of motion for elastic spherical shells [ASME PAPER 69-APMW-6] 24 p4402 A69-43107

Circular cylindrical photoelastic shells buckling modes under axial compression using high speed isoclinic photography, discussing shallow shell equations applicability to early stages 24 p4404 A69-43652

SHANKS

U JOINTS [JUNCTIONS]

SHANNON INFORMATION THEORY

U INFORMATION THEORY

SHAPED CHARGES

Wedge shaped charge technique for evaluation of detonation hazards of liquid explosives 04 p0646 A69-14479

Hollow charge pyrotechnic circuit closer, noting one piece construction, transportability, safety, quick action and reproducible delay 10 p1635 A69-23030

SHAPES

NT ELLIPTICITY

NT LINE SHAPE

NT ROSETTE SHAPES

NT T SHAPE

Optimal body shape determination by mathematical-mechanical relations derivation, discussing variational problems and variational principles applicability 03 p0526 A69-13739

Elastic rods shape for maximum stability defined by solution of variational problem, assuming noninfinite compressive stresses 05 p0832 A69-15688

Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight 06 p1026 A69-18017

Reading and reliability efficiency comparison in round vs vertical aircraft displays 06 p0883 A69-18025

Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws [AIAA PAPER 69-181] 06 p0863 A69-18052

Rotating incompressible liquid drop held together by surface tension noting spheroidal and toroidal shapes, energies and case of surrounding denser medium 07 p1120 A69-19267

Quasi-plane stress in rotating disks of unconventional profile emphasizing conic shaped disk analysis in terms of hypergeometric series 07 p1235 A69-19444

Shape and surface roughness effects on turbulent ablation of reentry body nose tip, noting recession rate [AIAA PAPER 69-717] 17 p2952 A69-33435

Least squares method of smoothing curves or surfaces involving orthogonal base functions, discussing matrices conditioning and structure eigenmodes 18 p3218 A69-34642

Sorting particles by shape using sieving equipment, noting results with crushed gravel 21 p3731 A69-38950

SHARING

U COORDINATION

SHARP LEADING EDGES

Two dimensional flow of incompressible fluid near sharp leading edge of plate at zero incidence, discussing approximation error and friction stress 03 p0415 A69-13651

Kinetic theory of sharp leading edge parallel to supersonic flow using Boltzmann equation, determining flow field 06 p0861 A69-17637

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation [AIAA PAPER 69-141] 06 p0866 A69-18208

Leeward side of delta wing with sharp leading edges at hypersonic speeds, noting Prandtl-Meyer expansion [AIAA PAPER 68-675] 09 p1431 A69-21992

Boltzmann equation with BGK model as governing equation for sharp leading edge problem in supersonic flow 11 p1817 A69-24288

Radiated aerodynamic noise effects on boundary layer transition on sharp leading edge hollow cylinders in wind tunnels, noting Reynolds numbers correlation [AIAA PAPER 68-375] 13 p2241 A69-28211

Hypersonic rarefied gas flow past flat plate with sharp leading edge and past circular cylinder, noting wake structure similarity to viscous theory prediction 19 p3294 A69-35755

SHATTERING

U FRAGMENTATION

SHEAR DISTURBANCES

U S WAVES

SHEAR FLOW

Neutrally stable disturbances for nonplanar parallel shear flow with continuously varying mean velocity 03 p0415 A69-13155

Reflectivity of low Richardson number critical levels for internal gravity waves propagating in stably stratified fluids with shear, studying stability numerically 03 p0424 A69-13953

Internal gravity waves propagation in shear flow, detailing interaction stress in incompressible stratified Boussinesq liquid, conservation energy exchange and radiation stress 05 p0788 A69-15721

Quasi-method of characteristics with application to fluid lines with frequency dependent wall shear and heat transfer [ASME PAPER 68-WA/AUT-7] 05 p0750 A69-16181

Compressible combustor turbulent shear flow analysis, discussing eddy diffusivity, density fluctuations, vorticity intensification and turbulent transport [WSCI PAPER 68-27] 06 p1034 A69-17793

Analytical model developed from turbulent shear flow study, discussing Reynolds number effect [AIAA PAPER 69-163] 06 p0914 A69-18139

Mean shear in wall region and outer region of constant pressure turbulent boundary layer 09 p1482 A69-21967

Buoyancy in turbulent shear flow, rotation or streamline curvature effects and meteorological parameters, drawing formal exact algebraic analogy 11 p1870 A69-24894

Direction of maximum turbulent vorticity in turbulent shear flow, determining alignment 11 p1874 A69-25282

Power law profiles of mean wind velocity and temperature in thermally stratified shear flow, considering dependence on thermal stability and Richardson number 11 p1874 A69-25381

Torsional flow of incompressible anisotropic fluid between parallel circular plates rotating with constant angular velocity, showing resemblance to shear flow 12 p2062 A69-26277

Heat and mass transfer conditions in ablation of shear thinning and thickening fluids at stagnation point [ASME PAPER 67-HT-78] 13 p2374 A69-27778

Heat and mass transfer in two dimensional turbulent free shear flows including separated and reattached flows 13 p2377 A69-28145

Incompressible uniform shear flows merging behind trailing edge of semiinfinite flat plate, using inner-outer expansion method based on Navier-Stokes equation 13 p2248 A69-28223

Demixed layer at wall in shear flow of nonsedimenting suspensions with different geometries due to viscous and inertia effect superposition 13 p2251 A69-28498

Model equation for Reynolds stress in turbulent two dimensional shear flow 14 p2428 A69-29000

Drift wave instability due to particle number density gradient of plasmopause, considering velocity shear modification 15 p2595 A69-30096

Wiener-Hermite expansion extended to include time dependent ideal random functions, discussing application to shear flow turbulence 15 p2644 A69-30201

Horizontal shear flow effect on linear geostrophic adjustment in unbounded barotropic fluid, discussing gravity waves, vorticity equations, available energy, etc 15 p2648 A69-30217

Rate equation for effective turbulent viscosity variations, considering effects of generation, convection, diffusion and decay in quasi-parallel shear flows 15 p2591 A69-30905

Lifting surface theory for cascade of blades in subsonic shear flow, determining blade surface pressure distribution, distinguishing shear and uniform flow compressibility effects 16 p2731 A69-31592

Compressible shear flow linear theory applied to transonic flow past thin airfoil, determining pressure distribution, discussing compressibility effects of nonuniform Mach number 16 p2731 A69-31593

Monograph on ring airfoil theory with nonuniform incidence covering steady flow and shear flow transition into boundary value problem of potential theory 17 p2889 A69-32995

Rotating cylinder or vortex motion in shear flow with friction, noting drag and rotor force combined influence 17 p2950 A69-33151

Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model 17 p2951 A69-33255

Transverse magnetic field effect on shear turbulence structure of magneto-fluid-mechanic pipe flow with and without heat transfer [AIAA PAPER 69-723] 17 p3012 A69-33497

Displacement of rectangularly mouthed pitot tubes in turbulent tube flow, determining roles of wall and shear effects 17 p2976 A69-34049

Statistical dynamics and structure of turbulent shear flows in incompressible fluids of constant density, discussing Reynolds stress at critical layers 18 p3123 A69-34922

Roshko correlation for estimating vortex shedding from circular cylinder in sheared flow with velocity in Strouhal and Reynolds numbers 20 p3515 A69-37228

Small amplitude acoustic waves propagating in compressible fluid with parallel shear flow and within constant gravitational field 21 p3772 A69-39241

Polystyrene melt tensile viscosity prediction from shearing viscosities, using rheological network rupture theory 21 p3753 A69-39730

Parallel shear flow equilibrium in inviscid nonheat-conducting incompressible fluid with density varying as function of vertical coordinate 21 p3697 A69-39743

Mass injection by strong blowing across Couette-Poiseuille shear flow 24 p4301 A69-43354

SHEAR LAYERS

Turbulent free shear layers in isoeenergetic flow, correlating theory and experiment [ASME PAPER 68-FE-9] 05 p0748 A69-16077

Mixing zone between two dimensional free stream and fluid at rest, measuring turbulent shear layer velocity profile behind rearward facing steps and over cavities [ASME PAPER 68-WA/FE-21] 05 p0749 A69-16097

Boundary shear stress with unknown magnitude and direction measured by yaw probe used as Preston tube 05 p0751 A69-16396

Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer [SAE PAPER 690266] 09 p1494 A69-21555

Mixing zone between two dimensional free stream and fluid at rest, measuring turbulent shear layer velocity profile behind rearward facing steps and over cavities [ASME PAPER 68-WA/FE-21] 14 p2430 A69-29443

Ideal fluid unsteady rectilinear plane-parallel flow stability, calculating shear layers before breakdown by using modified Rayleigh method 14 p2431 A69-29606

Mean velocity distribution prediction in turbulent shear flows of variable density by coordinate stretching method [AIAA PAPER 68-41] 16 p2770 A69-31888

Shear layer effect on plane sound waves, discussing reflection and refraction at velocity discontinuity between two regions of fluid 17 p3005 A69-32954

Linear normal mode instability of three dimensional laminar and turbulent shear layers, analyzing relations between velocity profile, eddy viscosity and oscillations 22 p3932 A69-40893

Free vertical shear layers structure solutions singularities in rotating fluids, considering motion by rising or spinning axisymmetric body 23 p4153 A69-42356

SHEAR PROPERTIES

Shear accommodation kinking at second order twin bands in critically deformed magnesium investigated for dislocation mechanism 01 p0093 A69-10063

Magnetic shear effect on stability of electron-neutral collision dominated plasma, noting helical perturbations onset 03 p0473 A69-12925

Frequency dependent shear modulus for hexachlorobiphenyl measured under rare gas infusion at 5-25 C and from ambient atmospheric to 4000 psi 05 p0796 A69-15912

Liquid oxygen shear viscosity dependence on temperature and pressure obtained by measuring electrical characteristics of immersed torsional vibrating crystal 05 p0846 A69-15916

Free vibrations of plates and beams of pyrolytic graphite type materials, analyzing transverse shear deformation and rotary inertia [AIAA PAPER 69-55] 06 p1027 A69-18070

Experimental evidence of validity of shear coefficient in Timoshenko beam theory 10 p1801 A69-23538

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade [ASME PAPER 69-VIBR-50] 10 p1804 A69-24148

Shear buckling of clamped rectangular linearly tapered plates, considering uniform shear stress and load 13 p2361 A69-27443

Isotropic plate critical strength measurements, evaluating role of material shear modulus 18 p3225 A69-35361

Twisting of spherical shell of nonhomogeneous isotropic material with variable shear modulus and inner surface assumed to be stress free 20 p3619 A69-36911

Complex representation of strain and displacement state in spherical shell using membrane theory, deriving shear forces resulting from single moment loading 21 p3831 A69-38416

Elastic modulus of beta Ti alloy containing Mo, Cr, Fe and Al measured under vibrations and shear modulus determined under torsion 22 p3969 A69-40072

Shearing force and shear buckling deformation influence on supersonic panel flutter boundary of simply supported rectangular plates, basing analysis on deflection approximation 24 p4400 A69-43055

SHEAR STRAIN

Shear buckling test data for shallow corrugated webs compared with theoretical analysis with web buckling as orthotropic plate or local mode 01 p0170 A69-10866

Elastic stability equations solved in geometrical linearization for thin anisotropic plates under transverse shear, using variational method 03 p0525 A69-13130

Compatible triangular plate elements for normal and in-plane displacements, discussing nine degree of freedom element, strain energy, simply supported and clamped plates 04 p0677 A69-14742

Plane shear strain measurement by means of properly oriented strain gages on surface and proper disposition of gages in Wheatstone bridge circuit 04 p0603 A69-15498

Sign conventions definition and importance for shear stress and strain analysis in laminated anisotropic composite materials, noting role in studying response 07 p1170 A69-18720

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values 08 p1416 A69-20722

Elastic bending moments and shear forces uniformly loaded flat plate structures with rectangular symmetry, using collocation technique and complex variable methods 11 p1986 A69-25241

Variational method of displacements for calculating positive Gaussian curvature shells with allowance for shear strain, considering shallow shell equations and symmetrical load 12 p2178 A69-26006

Torsional oscillation of cylindrical shell of nonhomogeneous material under periodic shearing force 13 p2361 A69-27462

Plastic flow anisotropy and texture shifting by rolling in Ti-Mo-V alloy, analyzing slip rotation, grain boundary shear and deformation mode 17 p2987 A69-33078

Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates [ASME PAPER 69-APM-10] 18 p3213 A69-34386

Strain displacement and compatibility equations of finite symmetrical deflections of thin shells of revolution [ASME PAPER 69-APM-14] 18 p3214 A69-34391

Flanges flexural rigidity effect on load carrying capacity, failure mechanism and postbuckling behavior of webs in shear, noting permissible load 18 p3227 A69-35492

Shallow shells two dimensional theory including effects of transverse shear deformation and of moments turning about normal to middle surface 22 p4048 A69-41197

SHEAR STRENGTH

Shear strengths of polyimide and polybenzimidazole resin/fiberglass reinforced honeycomb materials compared to previous high temperature materials, noting lightweight sandwich aircraft structures 04 p0620 A69-14844

Shear strength of grossly deformed solids noting extrusion and opposed anvils techniques 04 p0631 A69-15465

Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation 05 p0843 A69-16682

Multidirectional boron-epoxy laminates shear strengths and elastic moduli, calculating in-plane tension and compression 08 p1337 A69-20484

High modulus and high strength carbon fibers and composites, discussing mechanical properties and interlaminar shear strength
08 p1338 A69-20488

Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties
08 p1340 A69-20509

Dislocation model of strength of elastically inhomogeneous crystalline materials based on elastic interactions between dislocations and periodic fluctuations of shear modulus
08 p1333 A69-20557

Finite control volume approach to shock Hugoniot in unidirectional fiber reinforced composite, computing shear force along matrix-fiber interface
[AIAA PAPER 69-359] 13 p2366 A69-28292

W shear moduli at high temperatures measured by forced torsional vibration in wide frequency ranges, discussing grain boundary effects
14 p2465 A69-29651

Interlaminar shear strength development for utilization of unidirectional strength and stiffness of graphite fibers, discussing epoxy resin-fiber interface improvement
15 p2642 A69-30312

Atmospheric wind shear velocity snapping effect on yarn suspending instrument package from balloon gondola during parachute recovery
17 p2975 A69-33613

Craze formation and shear yielding considered for glassy polymers in terms of stress field requirements
17 p2993 A69-34169

Low temperature adhesive shear tests to measure force to break ice away from stainless steel surfaces coated with various bonded solid lubricants
19 p3323 A69-35581

Lap-shear strengths of Mg-Al alloy bonded with nylon-epoxy adhesive, including anodized coating rolling schedule and honeycomb core fabrication
24 p4323 A69-43417

SHEAR STRESS

NT TORSIONAL STRESS

Off-axis test for hard orthotropic composite materials, discussing fixture design to reduce shear coupling effect
01 p0103 A69-11273

Turbulent boundary layer growth, pressure distributions and surface shear stresses on yawed semiangle cone
[AIAA PAPER 68-98] 02 p0190 A69-12526

Compressible and incompressible laminar boundary layer with constant wall shear stress, using initial profiles
02 p0233 A69-12535

Second normal stress difference measurement by annular flows, giving approximate method for experimental data inversion
02 p0234 A69-12604

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-1154] 03 p0533 A69-13669

Turbulent fluctuations of viscous sublayer of two dimensional flow, assessing wall shear stress spectrum
04 p0587 A69-14544

Reynolds number similarity argument, establishing relation between mean velocity at pipe or channel center and shear stress at wall
04 p0589 A69-14895

Dynamic shear stresses at interface of embedded thin elastic filament and elastic matrix after subjecting filament to concentrated longitudinal line load
05 p0831 A69-15577

Velocity fields and wall shear stress distributions in eccentric annuli
[ASME PAPER 68-WA/FE-35] 05 p0750 A69-16108

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane
[ASME PAPER 68-WA/APM-8] 05 p0839 A69-16186

Boundary shear stress with unknown magnitude and direction measured by yaw probe used as Preston tube
05 p0751 A69-16396

Statically indeterminate elastoplastic problem under condition of complex shear
05 p0843 A69-16691

Boundary layer on flat plate with homogeneous suction, discussing dimensionless displacement/ momentum thickness and wall shearing stress
05 p0752 A69-16744

Three layer structure theory, discussing thin elastic sandwich shells with middle layer susceptible to transverse shear
06 p1025 A69-17615

Pressure distribution, heat transfer rates and shear stresses in laminar boundary layer of supersonic viscous flow incident on corner point of body
06 p0861 A69-17641

Sign conventions definition and importance for shear stress and strain analysis in laminated anisotropic composite materials, noting role in studying response
07 p1170 A69-18720

Laminar and turbulent stresses in plane asymmetric incompressible flows analyzed based on Boussinesq formula for turbulent shear stresses
07 p1121 A69-19330

Shear stress at wall, averaged velocity field and turbulent heat transfer coefficients in straight smooth non-circular channels used to compute temperature fields
07 p1243 A69-19734

Subgrain diameter relation to misorientation in melt-grown aluminum single crystals from etch pitting and X ray techniques, discussing critical shear stress
08 p1330 A69-20011

Finite elements for analysis of flexible shells, considering Kirchhoff theory for transverse shear deformation and problems involving rotations and buckling
08 p1411 A69-20142

Fiberglass reinforced plastic plates strength coupled to elastic base with allowance for tangential shearing stresses
08 p1412 A69-20334

Wall friction influence on three dimensional flow in axial flow turbomachines, introducing shear stresses between flow planes
08 p1252 A69-20724

Approximation method applied to closed viscous streamline flow in rectangular cavity, discussing constant shear stress boundary condition
08 p1304 A69-20811

Conformal mapping method for flexure function determination, discussing shear coefficients for arbitrary cross section beams in Timoshenko beam theory
09 p1612 A69-21611

Bond shear effects on dynamic behavior of two layered cylindrical shell, identifying bond stiffness parameters
[AIAA PAPER 68-354] 09 p1616 A69-21941

Shear field pattern theory modified to apply to determination of sweptback wings, calculating stress development
10 p1801 A69-23645

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction
11 p1983 A69-25137

Buckling of long flat panel in combined compression and shear with sinusoidal edge moments and support on two edges and on point supports
11 p1984 A69-25138

Tresca shear stress fatigue failure criterion and experimental data for combined bending and torsion acting out of phase
11 p1984 A69-25140

Shear buckling of simply supported infinitely long plates orthogonally reinforced by stiffeners with flexural and torsional rigidity
11 p1984 A69-25142

Floating element skin friction meter designed for adverse pressure gradients, discussing wall shear stress measurement
11 p1889 A69-25557

Torsional shearing stress in thick walled hollow rectangular cross sections
13 p2358 A69-27212

Stress and plastic deformation influence on allotropic transformation of cobalt-nickel single crystals studied by X ray diffraction
13 p2279 A69-27761

Wall shear stress measurement by evaporating liquid film, determining optimum liquid viscosity
13 p2375 A69-27793

Shear stress and velocity profile in MHD duct, examining turbulence damping by electromagnetic coupling
13 p2309 A69-28024

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane
[ASME PAPER 68-WA/APM-8] 13 p2362 A69-28121

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials
13 p2368 A69-28346

Buckling of unsymmetric cross-ply rectangular plates under uniform shear, considering hinge support boundary conditions
13 p2371 A69-28679

Stress concentration around rhombic hole in nonlinear isotropic plate under pure shear
14 p2533 A69-28987

Turbulent boundary layer in corner, measuring velocities, wall shear and turbulent normal stresses by employing momentum integral and similarity analyses
14 p2431 A69-29576

Mixing length model to relate turbulent shear stress to mean velocity field within planetary boundary layer above surface roughness change
17 p2997 A69-33154

Shear modulus of fiberglass reinforced plastics determined from torsional tests on squared beam of orthotropic material, evaluating influence of end conditions
17 p3058 A69-33204

Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction
17 p2951 A69-33256

Chemical species flux decay in turbulent boundary layer with catalytic wall, obtaining solution of conservation equation by using shear stress distribution
[AIAA PAPER 69-709] 17 p2955 A69-33480

Thin circular ring stability under uniform external transverse loading at various angles, discussing transverse shear deformation effects and buckling
17 p3061 A69-33707

Shear stress theory of fatigue failure of ductile materials based on crystallographic orientation and probability of slip of neighboring crystals
18 p3211 A69-34344

Plane wave propagation due to combined compressive and shear stresses in half space, assuming elastoplastic material
[ASME PAPER 69-APM-12] 18 p3213 A69-34388

Electrohydrodynamics of fluids having uniform electrical properties, emphasizing shear effects for interfacially confined electromechanical coupling
18 p3123 A69-34919

Higher harmonic pitch angle inputs to eliminate oscillatory helicopter blade root shear determined through teetering rotor model
18 p3089 A69-35233

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model
18 p3225 A69-35357

Microstresses in hollow-fiber reinforced cylindrical shell under longitudinal shear stress, determining modulus of elasticity and optimum component ratios
18 p3225 A69-35369

Skin friction balance in Mach 5 wind tunnel with high heat transfer, measuring shear forces
19 p3292 A69-35734

Skin friction balance for shear stress measurements in presence of ablation, describing balance construction, calibration, flexure range, etc
19 p3292 A69-35735

Molybdenum single crystals deformation in direct shear, determining stress temperature dependence and critical regions for various slip systems
19 p3342 A69-35811

Structural flexure center position from shear stress analysis showing nondependence on Poisson ratio
20 p3622 A69-37213

Transverse shear deformation effect on bending of laminated rectangular plates, obtaining solutions for bending deflections, flexural vibration frequencies and buckling loads
20 p3627 A69-37770

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments
[AIAA PAPER 68-39016] 21 p3851 A69-39016

Buckling stability of thin cylindrical shell under torsion, allowing for finite displacements due to shear in initial stress-strain state
21 p3838 A69-39187

Photoelastic data analysis for stress separations, discussing shear slope and Tesar methods
21 p3843 A69-39316

Sandwich beams interlaminar shear stress calculations, considering roles of moduli of elasticity and layers thickness relative to beam
22 p4041 A69-40080

Dynamics of viscous electrically charged gas using Navier-Stokes equation
22 p3931 A69-40686

Limiting load of square plate subjected to shear and reinforced by vertical stiffener, computing membrane and bending stresses as function of flexural rigidity
24 p4399 A69-42967

- Interlaminar shear stresses in cross-ply three ply symmetric laminated composite plate, analyzing interlaminar stress distribution under simple tension
24 p4399 A69-43052
- Real shear modulus and mechanical damping characteristics of cured adhesives measured for temperature effect, using torsion pendulum apparatus
24 p4338 A69-43460
- Transverse shear influence on circular plates small displacement theory determined from coupled linear partial differential equations of plates
24 p4405 A69-43655
- Shear stress and free molecular drag for gas flow along concave cylindrical surface oriented at angle of attack, analyzing multiple surface collisions effect
24 p4249 A69-43660
- SHEAR WAVES**
U S WAVES
- SHEARING**
Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces
14 p2427 A69-29029
- Stiles-Crawford effect measurements before and following eye movements to determine retina shearing during eye movements
15 p2555 A69-31035
- SHEARING STRESS**
U SHEAR STRESS
- SHEATHS**
U ION SHEATHS
U PLASMA SHEATHS
- SHEDDING**
Vortex shedding and wake formation behind inclined flat plate at low Reynolds number, using dye injector method for streak line observation
16 p2768 A69-31767
- Narrow band vortex shedding from circular cylinder in critical Reynolds number range, noting increase in Strouhal number
21 p3644 A69-38690
- Vortex shedding from circular cylinders rotating normal to free stream velocity, studying roles of rotation rate and Reynolds number
24 p4248 A69-43601
- SHEEP**
Myocardial muscle fibers transient inward current components during sheep ventricle voltage clamp analysis
23 p4095 A69-42080
- SHEET METAL**
U METAL SHEETS
- SHELL STABILITY**
Circular, cylindrical thin walled shell dynamic response to moving shock solved by Flugge equations in series form
01 p0164 A69-10057
- Exact solution of shallow shells of revolution equations governing linear deformation compared with asymptotic integration procedure
01 p0166 A69-10234
- Thin cylindrical shell deformation and stress under concentrated radial loading, analyzing singularity at load point
01 p0166 A69-10301
- Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution
01 p0168 A69-10380
- Sheba family of shell elements for matrix displacement method applied to problems of thin shells under membrane and bending action
01 p0170 A69-10865
- Shear buckling test data for shallow corrugated webs compared with theoretical analysis with web buckling as orthotropic plate or local mode
01 p0170 A69-10866
- Critical internal pressure induced plastic instability in membrane shells of revolution determined by graphical numerical method
02 p0338 A69-11719
- Existence and uniqueness of weak solutions in linear theory of stable equilibrium position for inhomogeneous elastic thin walled shells
02 p0340 A69-12036
- Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field
02 p0341 A69-12256
- Multilayered shells equivalence to single layer shells for stress analysis, vibrations and stability
02 p0346 A69-12509
- Orthotropic stiffened multilayer circular cylindrical shells buckling under axial compression, lateral pressure, etc
02 p0346 A69-12510
- Matrix displacement method for nonlinear elastic analysis of shells of revolution under symmetrical and asymmetrical loadings
02 p0346 A69-12511
- Buckling of electroformed thin conical shells under hydrostatic pressure, proving theory for cones of large taper ratio
02 p0347 A69-12515
- Recent advances in shell buckling, discussing imperfection sensitivity, boundary conditions and wall configuration [AIAA PAPER 68-103]
02 p0347 A69-12516
- Elastic-plastic and creep deformation calculations of cylindrical shell, providing better estimate of critical time at higher stress levels by including plasticity
02 p0348 A69-12539
- Imperfection sensitivity of axially compressed stringer stiffened cylinder analysis via shell equations formulation using finite differences
02 p0348 A69-12542
- Finite difference schemes for axisymmetric oscillations of shells of revolution filled with liquid
03 p0523 A69-12951
- Unreinforced circular cutouts effects on buckling behavior of circular cylindrical shells under axial compression, using photoelastic plastic shells
03 p0523 A69-12988
- Creep buckling of circular cylindrical shells under axial compression and bending, using Al alloy test specimens
03 p0523 A69-12995
- Helicoidally symmetrical stress in cylindrical thin shells
03 p0529 A69-14056
- Compressed cylindrical shell stability analyzed on basis of axisymmetric equilibrium form, noting dependence on mechanical characteristics and geometry
04 p0667 A69-14265
- Impulse buckling threshold for elastic-plastic cylinder with elastic core after development of unstable motion
04 p0671 A69-14414
- Circular cylindrical isotropic shell deformation rate under dynamic axial load described by second order linear differential equation
04 p0673 A69-14499
- Thin shells deformations described by finite element model accounting for transverse shear deformations
04 p0674 A69-14588
- Shallow shell deformations based on nonlinear equations solved by Newton-Raphson iteration
04 p0674 A69-14591
- Buckling equations for orthotropic cylindrical shells with eccentric spiral stiffeners derived through variation method of total potential
04 p0676 A69-14710
- Nonlinear boundary value problem of elastokinetics solved by step-by-step integration to study thin walled shells stability under axial impact [DVL-853]
04 p0677 A69-14836
- Postbuckling equilibrium calculation for pressure loaded thin walled cylinders of finite length, using Donnell nonlinear shell theory
04 p0677 A69-14837
- Stability of circular cylindrical viscoelastic and elastic shells with local effects due to radial load on circumference or thermally induced tangential stress
04 p0680 A69-14928
- Smooth cylindrical shell stability under axial compression noting effects of scale factor, initial defects, initial stresses and deflections in welded seam, etc
04 p0680 A69-14929
- Reissner nonlinear equations for nonshallow symmetrically loaded shells of revolution
04 p0684 A69-15538
- Equations for nonshallow spherical shell deformations derived by Bubnov-Galerkin method
04 p0684 A69-15539
- Creep buckling of shallow geometrically nonlinear spherical shell of linear viscoelastic material under constant external load
05 p0831 A69-15679
- Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse reinforcement ribs, initial defects and under large strains
05 p0832 A69-15691
- Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress
05 p0832 A69-15692
- Stresses in cylindrical shell with elastic core loaded on curved surface solved, using elasticity theory for core and membrane solutions for shell
05 p0835 A69-15871
- Critical axisymmetric loads for instability in orthotropic multilayer conical shells obeying Hooke law under axial compression or external pressure
05 p0840 A69-16198
- Stability of thin cylindrical shells of medium length with one or both ends rigidly clamped
05 p0840 A69-16199
- Annular stress in rib reinforced cylindrical shells under axial compression load and internal pressure, using successive approximation
05 p0841 A69-16208
- Stability of three layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear
05 p0843 A69-16683
- Stability of Al-Mg alloy spherical shells under uniform external pressure beyond elastic limit
05 p0843 A69-16693
- Calculation of thin shell or beam structures with plasticity and isothermal creep based on linearization and local kinematic behavior [ONERA-TP-667]
06 p1020 A69-17099
- Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method
06 p1021 A69-17179
- Axisymmetric form of stability loss of cylindrical shell under effect of axial load suddenly applied along generatrix, considering inertia forces and obtaining differential equations
06 p1021 A69-17181
- Oscillations of cylindrical orthotropic three layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions
06 p1022 A69-17186
- Bending general instability of stiffened shallow orthotropic cylindrical shells, noting buckling stress and application to shell design for various loadings
06 p1022 A69-17369
- Buckling of elastic cylinders with rectangular cutouts and reinforcements under axial or lateral loading, using modified Newton method [AIAA PAPER 69-92]
06 p1027 A69-18060
- Radial vibrations of thin cylindrical shells subjected to thermal loadings, discussing temperature distributions, thermal stresses and natural frequencies [AIAA PAPER 69-59]
06 p1028 A69-18143
- Initially imperfect axially compressed cylindrical shells strength using variational principle, shell theory and deformation theory of plasticity [AIAA PAPER 69-91]
06 p1028 A69-18181
- Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations
06 p1029 A69-18194
- Elastic stability of three dimensionally reinforced composite cylindrical shells [AIAA PAPER 69-122]
06 p1029 A69-18216
- Supercritical elastic states of closed spherical shell
07 p1232 A69-18934
- Mathematical formulas for rigidity distribution of inhomogeneous multilayer shells, discussing invariance property
07 p1232 A69-19011
- Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria
07 p1234 A69-19378
- Shallow spherical shells equilibrium under uniformly distributed internal pressure, analyzing nonlinear boundary value problems by algorithm
07 p1237 A69-19685
- Local stability of thin walled elastic shells of revolution subjected to external pressure
07 p1237 A69-19686
- Stability of cylindrical shell reinforced by circular ribs under combined action of external pressure and axial forces, using characteristic equation
07 p1238 A69-19687
- Stability of cylindrical shells under concentrated annular loads using finite difference method, discussing critical loads, moments and errors
07 p1238 A69-19688
- Large deflection behavior of shallow circular arch subjected to vertical point load by nonlinear Rayleigh-Ritz finite element method, discussing deformation path
08 p1411 A69-20140

Finite elements for analysis of flexible shells, considering Kirchhoff theory for transverse shear deformation and problems involving rotations and buckling
08 p1411 A69-20142

Creep buckling stability of shells, with emphasis on stress and strain states and critical time, considering circular cylindrical shell
08 p1411 A69-20143

Stability of finitely deformed thin cylindrical shell of rubberlike material, showing bending resistance and thickness effects
08 p1413 A69-20414

Variational method for safety limits of perfectly plastic simply supported conical sandwich shells subjected to uniform internal pressure and obeying Mises yield criterion
08 p1416 A69-20702

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values
08 p1416 A69-20722

Two layer cylindrical shells stability under external pressure, assuming nonuniform shell rigidity
08 p1419 A69-21180

Stress-strain problem of geometrically nonlinear conical shell subjected to creep, giving method for complex deformation solution
09 p1612 A69-21497

Multilayer orthotropic cylindrical shells stability under distributed external load and off-center compression, analyzing subcritical deformation on critical load
09 p1613 A69-21685

Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying irrotational motions in compressible and incompressible ideal fluids
09 p1613 A69-21720

Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions from Flugge shell equation [AIAA PAPER 69-447]
09 p1616 A69-21938

Buckling of cylindrical and conical sandwich shells with fiberglass/epoxy facings and aluminum honeycomb cores [AIAA PAPER 68-294]
09 p1616 A69-21942

Buckling of eccentrically stiffened thin circular cylindrical shell under uniform combined axial compression and torsion loads with lateral pressure
09 p1616 A69-21955

Buckling capabilities of inflation rigidized wire film and shell film cylinders in axial compression and bending
09 p1617 A69-21997

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states
09 p1617 A69-22078

Pressure on unsteadily oscillating cylindrical shell in external or internal supersonic flow derived from asymptotic theory
09 p1618 A69-22256

Linear theory of cylindrical panel buckling and circumferential restraint along straight edges under lateral pressure, using Donnell equations
09 p1621 A69-22782

Rectangular planform shallow spherical shell stability with mixed boundary conditions, using Cauchy-Riemann equations and equation for plate on elastic base
10 p1792 A69-22848

Axisymmetric free edge buckling of semiinfinite heterogeneous orthotropic cylindrical shells in axial compression, noting stability condition
10 p1802 A69-23889

Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-fluid interaction [ASME PAPER 69-VIBR-4]
10 p1805 A69-24162

Strength analysis of revolving shallow shell with jumpwise thickness variations under axisymmetric distributed load, considering rigidity and plastic deformation
11 p1968 A69-24318

Stress concentration during deformations in thin shallow shells, using conformal mapping and difference method
11 p1971 A69-24648

Static and dynamic stability of flexible shallow spherical shell under axisymmetric load and elastically hinged along contours
11 p1976 A69-24763

Postbuckling behavior and subsequent imperfection sensitivity of thin walled cylinders subjected to torsion, considering perturbation
11 p1979 A69-24814

Thin walled circular cylinders postbuckling behavior and stability under axial compression calculated for design loads
11 p1979 A69-24816

Nonlinear shell theory, determining elastic deformation as function of stress under external loads using Lagrange variational principle
11 p1979 A69-24817

Semiinfinite circular cylindrical shell buckling under axial load, computing forces, moments and displacements by thin shell equation
11 p1979 A69-24818

Incremental collapse of shells under cyclic loadings in terms of generalized variables, finding interaction surfaces of load multipliers
11 p1980 A69-24820

Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure
11 p1980 A69-24821

Permanent displacement relationship to shell thickness following snap-through of loaded rigid boss in spherical metal shell
11 p1980 A69-24822

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship
11 p1980 A69-24823

Stress analysis of reinforced cylindrical shells under external loading, using Vlasov semimomentless theory
11 p1982 A69-24949

Deformations and stresses in pressure vessel with elliptical cross section under uniform internal pressure, noting radial deflection and membrane, bending and skin stress
11 p1983 A69-25023

Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution
11 p1983 A69-25090

Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings
11 p1984 A69-25170

Optimal parameters selection for rib-reinforced cylindrical shells determined with respect to axial critical loading magnitude
11 p1985 A69-25173

Stress-strain state of shells with opposite edges hinged and rigidly clamped solved by numerical method after reduction to boundary value problem
11 p1985 A69-25174

Bending and membrane stresses determination in shallow thin shells of revolution under large axisymmetric deflections, using normal and radial displacements relationship [SESA PAPER 1332]
11 p1995 A69-25651

Glass fiber reinforced plastics shells stability under external hydrostatic pressure, discussing compression and axial tests for normal elastic modulus, shear modulus and Poisson coefficient
11 p1995 A69-25681

Stochastic problems in thin elastic shell theory solved by equations obtained by linearizing shell equations near initial state of stress
11 p1996 A69-25732

Composite shell carrying capacity under general load, studying closing shape between laminate layers, transverse contraction, supporting layers thicknesses ratio, etc
12 p2176 A69-25851

Quasi-shallow shells theory applicability to thin elastic shallow shells, emphasizing use of function W/δ
12 p2178 A69-26001

Variational method of displacements for calculating positive Gaussian curvature shells with allowance for shear strain, considering shallow shell equations and symmetrical load
12 p2178 A69-26006

Dynamic programming method for upper bound on collapse load of rotationally symmetric thin cylindrical shell under ring loading
12 p2179 A69-26214

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells
12 p2181 A69-26609

Optimal additional loading at zero moment stress-strain state in simply connected shell of complex design under external loads, using successive approximation
12 p2181 A69-26610

Symmetrical stressed state of shallow shell with crack edge loading solved in Cartesian coordinates
12 p2181 A69-26614

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution
12 p2182 A69-26679

Natural frequencies of ring-stiffened thin walled cylindrical shell determined by partial differential equations of motion, allowing for eccentricity
12 p2184 A69-26810

Complex two layered shell of revolution under static and dynamic asymmetric loads analyzed using SABOR/DRASTIC computer codes
12 p2184 A69-26811

Large deflection elastic-plastic analysis of axisymmetric shells of revolution indicating role of plastic yielding in buckling pressure reduction
12 p2186 A69-26839

Elastic buckling and initial postbuckling behavior of clamped shallow spherical shells under axisymmetric load
12 p2187 A69-26842

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression
12 p2187 A69-26843

Stress distributions in two normally intersecting cylindrical shells subjected to internal pressure, using Donnell and Flugge equations
13 p2359 A69-27255

Dynamic response of imperfect circular cylinder to constant velocity load, noting applicability of Hoff nonlinear equation for dynamic buckling of columns
13 p2359 A69-27260

Axisymmetric plastic buckling of complete spherical shells subjected to external hydrostatic pressure
13 p2361 A69-27439

Torsional oscillation of cylindrical shell of non-homogeneous material under periodic shearing force
13 p2361 A69-27462

Astronomical model explaining shell instability of Pleione /28 Tauri/ extended atmosphere, discussing magnetic field amplification by differential rotation to explosive dissipation in 9.16 years
13 p2347 A69-27716

Bending state of shells of revolution due to edge effects using nonlinear stress strain relation
13 p2362 A69-27921

Imperfection surface effect on buckling load of circular cylindrical shell under axial compression, locating limit points of postbuckled states
13 p2362 A69-28122

Elastoplastic cylindrical shell instability determination under axial compression applied to inelastic solids
13 p2363 A69-28124

Stressed state of cylindrical circular shell clamped at edges and subjected to concentrated radial forces
13 p2368 A69-28322

Infinite cylindrical shell stability under circular load solved by linearization about bending moment stress state and Galerkin method
14 p2531 A69-28808

Orthotropic cylindrical shell stability under uniform axial compression and internal pressure, taking into account subcritical state duration
14 p2532 A69-28981

Geometric discrepancies influence on stability modes and loads for thin shells up to point of pcollapse
14 p2533 A69-29022

Heterogeneous orthotropic circular cylindrical shell stability during axial critical compression
14 p2533 A69-29024

Zero-moment cylindrical meshed shell equilibrium equations, discussing solution methods and difference analog
14 p2536 A69-29473

Elastic deformations of spherical sandwich shell of rigidly connected isotropic homogeneous layers, describing shell symmetrical expansion and inversion under stresses
15 p2707 A69-30582

Bending surface of shells under crosswise load analyzed by moire method, considering rotating cylindrical surfaces
15 p2713 A69-31056

Reinforced cylindrical shell stability under external compression load by pressurized air, determining critical pressure
15 p2715 A69-31204

Torsional stability of shallow shells of revolution, solving eigenvalue problem obtained from perturbation of nonlinear equations by finite differences
16 p2871 A69-31879

Prebuckling deformations influence on circular cylindrical shell buckling under external pressure, applying Galerkin method to Donnell equations 16 p2872 A69-31905

Buckling load of cylindrical shell with inclined stiffeners, using method for stability of thin walled cylinder under transverse end load at free end 16 p2872 A69-31912

Axially symmetric vibrations of thin elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 16 p2873 A69-32129

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 16 p2873 A69-32131

Eigenvalues of truncated orthotropic shells of revolution with degenerate poles and various rigidities and geometries 16 p2873 A69-32133

Cylindrical shell aeroelastic dynamic stability subjected to supersonic flow field, considering geometric imperfections, edge constraint and prestability deformation [AIAA PAPER 68-285] 16 p2874 A69-32159

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory 16 p2874 A69-32162

Oscillations and stability of cylindrical shell in gas flow taking into account inertia forces 16 p2875 A69-32287

Transient wave processes of deformation in spherical shell under load abruptly applied to geometrical pole 16 p2875 A69-32288

Compressibility of material in stability problems of elastoplastic plates and shells 16 p2875 A69-32292

Stresses in perforated ribbed cylindrical shell subjected to internal pressure using brittle coating, electrical strain gages, photoelasticity and micrometers 16 p2876 A69-32784

Free vibrations of thin truncated circular conical shell and reinforcing rings and stringers, determining resonant frequencies for stiffened and unstiffened configurations 17 p3051 A69-32955

Damped vibrations of elastic open cylindrical shell under arbitrary loading, obtaining mean square of bending from correlation theory 17 p3054 A69-33094

Nonaxisymmetric stability loss /buckling/ of closed toroidal shell of circular cross section under uniformly distributed external pressure, considering Volmir linear theory 17 p3055 A69-33130

Critical buckling stress for cylinders wound with fiber reinforced plastics /FRP/, establishing stability criteria for fiber reinforced shells 17 p3058 A69-33430

Nonlinear flexural vibrations excitation in cylindrical shell by longitudinal harmonic load, discussing solution of partial differential equations of motion 17 p3064 A69-33920

Cylindrical aluminum shell dynamic stability, analyzing steady state parametric oscillations, mode shape, frequency, amplitude and damping 17 p3065 A69-33929

Longitudinal crack in cylindrical shell under internal pressure, calculating normal and bending stress singularity strengths against curvature/ cracklength parameter 18 p3212 A69-34346

Circular cylindrical shell nonlinear response to uniform radial impulsive pressure, noting inextensionality constraint and equations of motion roles [ASME PAPER 69-APM-26] 18 p3214 A69-34399

Toroidal, spherical and conical shells limiting equilibrium under various loading and support conditions 18 p3216 A69-34572

Local stability of viscoelastic shells of revolution under axisymmetric loads, discussing asymmetric snapthrough of dome 18 p3216 A69-34573

Cantilever truncated conical shell stability under tensile stresses solved by strain energy technique 18 p3216 A69-34574

Stability of thin walled eccentrically reinforced cylindrical shell, determining eccentricity influence and critical pressure formula from considerations of Poisson ratio, reinforcement parameters, etc 18 p3216 A69-34576

Cylindrical shell stability under axial compression, studying buckling process and wave formation 18 p3217 A69-34597

Growth rate of stability loss intrinsic modes in elastic shells under severe load, discussing stress distribution during buckling 18 p3217 A69-34598

Positive Gaussian curvature shell under concentrated forces, analyzing stresses and strains relation to load distance using Thompson and Legendre functions 18 p3218 A69-34601

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves 18 p3218 A69-34624

Stress-strain state of shells under concentrated loading, emphasizing positive Gaussian curvature 18 p3219 A69-34832

Axisymmetric deformation of cylindrical wound fiberglass reinforced plastic shell analyzed by methods of rigid normals and nonlinearly elastic fiber system 18 p3222 A69-34974

Nonlinear axisymmetric oscillations and motion stability of cylindrical wound elastic glassfiber shell under time dependent uniform internal pressure 18 p3222 A69-34975

Stability loss of shells of revolution under axial tension and radial pressure, considering shells of Gaussian curvature, calculating critical force 18 p3222 A69-34976

Boundary conditions of orthotropic shell stability under external pressure and axial tension, analyzing critical pressure by strain energy method 18 p3222 A69-34977

Constrained elastoplastic torsion of closed thin walled cylindrical shells, analyzing tangential and normal stress by using equilibrium equations 18 p3222 A69-34978

Dynamic instability regions of parametric resonance of cylindrical shells with curved generating lines under axial and radial pressure 18 p3223 A69-34979

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression 18 p3224 A69-35318

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading 18 p3224 A69-35319

Thin brittle plastic shells mechanical properties differing under tension and compression described by solving differential equations in successive approximation 18 p3224 A69-35327

Long term stability of orthotropic cylindrical shells under transverse shear stresses, calculating critical stress using Kirchhoff-Love model 18 p3225 A69-35357

Limiting equilibrium of variable thickness shallow spherical and conical shells of revolution under axisymmetric loads, assuming rigid plastic shell material 18 p3225 A69-35370

Cylindrical reinforced steel shells stability under external pressure 18 p3225 A69-35371

Stress-strain state of open cylindrical shells with arbitrary cross section determined for clamped-clamped, clamped-free and free-free supported shells 18 p3225 A69-35372

Automatic control systems for plants with distributed parameters, discussing stabilizing resonance shell with space-time dispersion of controlled processes 19 p3372 A69-35893

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc 19 p3437 A69-36201

Displacement patterns for buckled shapes of axially compressed thin walled circular, cylindrical and conical shells 19 p3443 A69-36793

Number of forms of stability of plates and shells derived from eigenvalues of nonlinear boundary value problem containing generalized von Karman equations 19 p3445 A69-36816

Buckling and postbuckling of complete spherical shells with symmetric initial shape deviations and plastic deformations 19 p3446 A69-36834

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient 20 p3621 A69-37076

Shells of revolution bearing capacity under axisymmetric loads determined by linear programming and finite difference method 20 p3622 A69-37326

Nonlinear theory based on Euler-Bernoulli hypothesis for axisymmetric deformations of heterogeneous orthotropic shells of revolution under rotationally symmetric mechanical and thermal loads 20 p3625 A69-37592

Load carrying capacity of orthotropic circular cylindrical shell under uniformly distributed normal load, considering edge support conditions 20 p3629 A69-38075

Soviet book on shell and thin walled structure calculation methods covering stability and stress analysis, reinforced and sandwich shells, etc 20 p3630 A69-38199

Noncircular curved shell stability under axial compression, using strain energy method to determine upper and lower critical stresses 21 p3834 A69-38715

Elastic closed and truncated conical shell stability with initial deflections under dynamic critical loading 21 p3834 A69-38716

Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method 21 p3835 A69-38723

Circular cylindrical freely supported shell moment state stability, solving critical parameters by infinite matrix eigenvalues determination 21 p3835 A69-38724

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure 21 p3837 A69-39088

Deformation of circular cylindrical shell of varying thickness, obtaining differential equation solutions through multiple scales method 21 p3837 A69-39159

Nonlinear problems involving large deflections of isotropic and orthotropic shallow shells of rectangular platform, deriving partial differential equations for solution 21 p3838 A69-39185

Nonlinear stability of shallow elliptical paraboloidal dome under uniformly distributed compression, solving by Bubnov-Galerkin method on computer 21 p3838 A69-39186

Buckling stability of thin cylindrical shell under torsion, allowing for finite displacements due to shear in initial stress-strain state 21 p3838 A69-39187

Stability of free and clamped spherical and circular cylindrical shells subjected to uniform or nonuniform heating, discussing effects of temperature stresses 21 p3838 A69-39190

Variational principle applicable to nonlinear theory of shallow shells, deriving potential for equations describing uniform boundary conditions, discussing shell stability 21 p3838 A69-39191

Cylindrical shell stability during loading by uniform external pressure represented by Fourier series, determining critical pressure by solving nonlinear equations 21 p3846 A69-39715

Postbuckling of filled circular cylindrical shell using Ritz energy method for load deformation relation, discussing stabilizing effect of core 22 p4038 A69-39895

Cylindrical shells vibrations using Lagrangian based on Flügge system of stress-strain relations 22 p4039 A69-39924

Buckling strength prediction for circular cylindrical shells reinforced by circumferential and longitudinal stiffeners, solving torsional buckling of orthotropic shells under internal pressure 22 p4042 A69-40171

Nonlinear stability for closed thin walled orthotropic cylindrical shell subjected to uniform external pressure, using Bubnov-Galerkin method for approximate solution 22 p4042 A69-40454

Axisymmetric vibrations of semifinite cylindrical shell constructed of fiber reinforced composite layers, obtaining frequency equation from equations of motions 22 p4044 A69-40559

Cylindrical shells bending by finite element /cylindrical strips/ method, considering shells of arbitrary shape and variable thickness 22 p4046 A69-40968

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending 22 p4046 A69-40969

Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components
22 p4046 A69-41041

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load made applicable to nonshallow shells equilibrium
22 p4047 A69-41062

Prebuckling deformation influence on compressive buckling load for orthotropic cylindrical shells with elasticity principal axes in axial and circumferential directions
22 p4047 A69-41182

Standing waves in running tire shell wall, considering internal pressure, cross sections, wall thickness, cord angle, critical speed, etc
22 p4048 A69-41185

Closed circular cylindrical shell stability and oscillations under ring-shaped axial load, defining stress-strain state by radial displacements and force function
22 p4049 A69-41280

Deformation of orthotropic layered elastic shells based on linear elasticity theory, assuming surface and stress constraints
23 p4226 A69-41535

Nonlinear differential equations for large deflections of multisandwich shells of arbitrary shape built of stiff and weak elastic layers, considering cylindrical shells
23 p4226 A69-41572

Statics of axisymmetric deformation of cylindrical and conical shells of revolution of moderate thickness under uniformly and nonuniformly distributed loads
23 p4226 A69-41705

Infinite systems of algebraic equations in periodic problems for spherical shells with circular holes approximated by reduction method
23 p4227 A69-41706

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states
23 p4228 A69-41970

Supercritical elastic states of closed spherical shell
23 p4228 A69-41971

Cylindrical shell load carrying capacity under axial compression, considering middle surface initial distortions influence
23 p4228 A69-41989

Discrete rib effect on buckling resistance of cylindrical shell under combined external and axial compression loads, using Laplace transforms
23 p4229 A69-41990

Stability of orthotropic cylindrical shells reinforced at edges by elastic ribs, analyzing axisymmetric buckling, natural oscillations and rigidity characteristics
23 p4229 A69-41992

Hinged circular cylindrical shells reinforcing ribs effect on deflection and bending moments, assuming external pressure application
23 p4229 A69-42001

Space frame radome shell structural stability with emphasis on analogous continua for reticulated framework, examining connection imperfections effect on stiffness
23 p4232 A69-42140

Circular cylindrical thin walled shells creep buckling under uniform axial compression
23 p4234 A69-42413

Buckling of truncated conical shells under torsion with various boundary conditions, applying Galerkin method to estimate critical load and wave number
24 p4395 A69-42715

Time independent interaction surface bounds to shells shakedown domain obtained for multiparameter loadings
24 p4396 A69-42732

Shallow spherical sandwich shells critical buckling loads using differential pressure method
24 p4396 A69-42734

Spherical vessel partially liquid-filled and supported by equatorial ring, studying axisymmetric oscillations under external forces
24 p4300 A69-43069

Cylindrical shell with supersonic nozzle end, describing axisymmetric oscillations forced by burning filler in gas stream
24 p4300 A69-43073

Axisymmetric vibration of shallow spherical caps, using nonlinear dynamic equations and associated variational equation of motion for elastic spherical shells
[ASME PAPER 69-APMW-6]

Orthotropic stiffness layer models for buckling of eccentrically stiffened shells of revolution with two un-

bonded orthotropic layers uncracked and circumferentially cracked
24 p4405 A69-43657

Computer program determination of barrel effect on strength of ring and stringer stiffened shells designed to support axial compression loads
24 p4405 A69-43671

SHELL THEORY

Random temperature fields in plates and shells in thermal contact with two media with temperatures as separable random space-time functions
01 p0173 A69-10077

Elastic shell nonlinear theory, introducing nonsymmetric stress tensor and principles of virtual work and objectivity
01 p0166 A69-10166

Variational principles of dynamic shell theory using Legendre transform for relations and boundary conditions of Timoshenko theory
01 p0166 A69-10262

Asymptotic integration of three dimensional elasticity equations for thin anisotropic shells and plates, deriving variability exponent of stress under given load
01 p0170 A69-10878

Torsion of variable cross sectional thin walled bars using shell theory equations
02 p0337 A69-11559

Three dimensional elastic theory using parametric expansion method developed for cylindrical translation shell profiles
02 p0338 A69-11718

Boundary value problem solution for arbitrary nonshallow cylindrical shells by small parameter method, assuming arbitrary geometry and hinged rectilinear edges
02 p0339 A69-11960

Soviet book on vibrations of elastic shell partly filled with fluid covering different stages in procedure for shells of axisymmetric configuration
02 p0346 A69-12480

Imperfection sensitivity of axially compressed stringer stiffened cylinder analysis via shell equations formulation using finite differences
02 p0348 A69-12542

Stresses in circular cylindrical shell subjected to local heating
03 p0523 A69-12952

Thin shells deformations described by finite element model accounting for transverse shear deformations
04 p0674 A69-14588

Natural vibrations of cylindrical panels analyzed on basis of Lamé parameters, shell equations and energy method
04 p0674 A69-14592

Postbuckling equilibrium calculation for pressure loaded thin walled cylinders of finite length, using Donnell nonlinear shell theory
04 p0677 A69-14837

Axisymmetric oscillation modes and frequencies of hemispherical shell partially filled with liquid, using moment theory of shells
04 p0679 A69-14922

Kirchhoff-Love hypothesis error dependence on stressed state variability index in theory of elasticity for closed spherical shell under uniform surface load
04 p0680 A69-14927

Soviet handbook on elasticity, plasticity and creep theories, emphasizing stresses and strains in solid thin walled shells and plates under bending, tension and torsion
04 p0683 A69-15499

Exact geometrical equations and internal equilibrium for elastoplastic deflections of orthotropic shells of revolution using thin shell theory
05 p0831 A69-15680

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
05 p0834 A69-15783

Stresses in cylindrical shell with elastic core loaded on curved surface solved, using elasticity theory for core and membrane solutions for shell
05 p0835 A69-15871

Circumferential buckling of ellipsoid of revolution due to internal pressure, assuming linear deflection and uniform thin shell
[ASME PAPER 68-WA/PVP-12]

Orthogonality of natural oscillation modes of shells of arbitrary geometry, using equations of motion from Vlasov engineering moment theory
05 p0840 A69-16190

Orthogonality of natural oscillation modes of shells of arbitrary geometry, using equations of motion from Vlasov engineering moment theory
05 p0840 A69-16200

Asymptotic integration of equations in theory of elasticity to develop approximate theory of momentless shells
05 p0843 A69-16689

Stress calculation for internal pressure in momentless shell of revolution
05 p0843 A69-16690

Steady state frequency response of conical and cylindrical shells under lateral excitation
06 p1021 A69-17147

Automatic data processing method for analyzing multiply connected elastoplastic shells of revolution
06 p1025 A69-17614

Three layer structure theory, discussing thin elastic sandwich shells with middle layer susceptible to transverse shear
06 p1025 A69-17615

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89]
06 p1028 A69-18133

Initially imperfect axially compressed cylindrical shells strength using variational principle, shell theory and deformation theory of plasticity
[AIAA PAPER 69-91]
06 p1028 A69-18181

Approximate solution for hollow circular cylinder with fixed ends under axial displacement and cylindrical surfaces free from traction, using boundary layer technique
07 p1230 A69-18265

Mathematical formulas for rigidity distribution of inhomogeneous multilayer shells, discussing invariance property
07 p1232 A69-19011

Traveling waves on elastic spherical shells derived from dynamic equations of motion, including transverse shear and rotatory inertia effects
07 p1236 A69-19460

Buckling of long cylinders with homogeneous random axisymmetric geometric imperfections under axial compression, using truncated hierarchy technique
07 p1236 A69-19473

Finite elements for analysis of flexible shells, considering Kirchhoff theory for transverse shear deformation and problems involving rotations and buckling
08 p1411 A69-20142

Shell theories for polymer and reinforced plastic shells, giving revised temperature and creep problem solutions due to mechanical behavior
09 p1611 A69-21481

Stress-strain problem of geometrically nonlinear conical shell subjected to creep, giving method for complex deformation solution
09 p1612 A69-21497

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function
09 p1614 A69-21886

Nonlinear boundary value problem algorithm in shell theory, showing aid of numerical technique
09 p1614 A69-21887

Static, kinematic and elastic basic equations of shell theory integrated into differential equation for minimal surface helical shells
10 p1793 A69-22886

Finite element concepts for continuum theory of shells, noting bilinear approximation for displacement and fundamental decomposition principle for large deflection
10 p1794 A69-22891

Eddy current nondestructive tests of nonmagnetic thin metallic sheets and plates from single surface
10 p1698 A69-23046

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations
10 p1798 A69-23147

Theory of thin shells - Conference, Copenhagen, September 1967
11 p1977 A69-24801

Thin elastic shell interior equations based on stress and strain, discussing shell description, strain derivatives plate deformation into cylindrical shells, etc
11 p1977 A69-24802

Linear shell theory foundations, discussing two and three dimensional stress strain relations, couple stresses, circumferential length ratio to shell thickness, etc
11 p1977 A69-24803

Thin elastic shell theory, using iterative process to develop differential equation integrals for interior state of stress
11 p1977 A69-24804

Nonlinear theories of deformable surfaces as two dimensional generalized continua applied to elastic shells, emphasizing elastic Cosserat surface
11 p1978 A69-24805

Consistent elastic shell theory based on expansion of sought solutions in power series over distance between point and middle surface
11 p1978 A69-24806

Thin plastic shell theory based on statical and geometrical relations for shallow and circular cylindrical shells
11 p1978 A69-24807

Shell theory foundations and basic equations, discussing classical shell equations asymptotic nature and errors
11 p1978 A69-24808

Continuum theory for thin elastic shells with local structural effects, emphasizing shell constituted by Cosserat material
11 p1978 A69-24809

Asymptotic methods for three dimensional equations in thin and thick elastic shell theory for determining two dimensional systems
11 p1978 A69-24810

Linear thin shell theory in complex dependent variable form for determining fourth order partial differential equations, considering elastic shells with edge loads
11 p1978 A69-24811

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces
11 p1979 A69-24813

Nonlinear shell theory, determining elastic deformation as function of stress under external loads using Lagrange variational principle
11 p1979 A69-24817

Symmetrically loaded weak moment shells of revolution made of materials with different moduli of elasticity
11 p1980 A69-24819

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship
11 p1980 A69-24823

Thermal stresses in longitudinally reinforced cylindrical shell, combining moment and semimomentless shell theories to obtain numerical results
11 p1981 A69-24942

Bending theory for truncated multilayer anisotropic conical shells, defining relations between displacements and external forces
11 p1984 A69-25141

Stress-strain state of shells with opposite edges hinged and rigidly clamped solved by numerical method after reduction to boundary value problem
11 p1985 A69-25174

Stochastic problems in thin elastic shell theory solved by equations obtained by linearizing shell equations near initial state of stress
11 p1996 A69-25732

Composite shell carrying capacity under general load, studying closing shape between laminate layers, transverse contraction, supporting layers thicknesses ratio, etc
12 p2176 A69-25851

Quasi-shallow shells theory applicability to thin elastic shallow shells, emphasizing use of function W/ρ
12 p2178 A69-26001

Variational method of displacements for calculating positive Gaussian curvature shells with allowance for shear strain, considering shallow shell equations and symmetrical load
12 p2178 A69-26006

Shallow hyperbolic paraboloidal shell with large deflections, analyzing nonlinear behavior with numerical method based on integral equations
12 p2185 A69-26820

Monograph on shell calculations by linear three dimensional elasticity theory, relating displacements and stresses
12 p2188 A69-26902

Three dimensional equations of elasticity reduced to two dimensional equations of shell theory, discussing stressed states of thin elastic bodies
14 p2531 A69-28807

Zero-moment cylindrical meshed shell equilibrium equations, discussing solution methods and difference analog
14 p2536 A69-29473

Oscillations of freely supported cylindrical shell of arbitrary cross section with breaks along generatrix,

determining eigenvalue of infinite matrix with normal determinant
15 p2707 A69-30581

Coaxial deviator theory of nonlinear elasticity, applying deformation theory variant to shell theory
15 p2592 A69-31058

Cylindrical shell bending subjected to internal pressure and force uniformly distributed on round section solved by numerical integration of differential equations
15 p2653 A69-31195

Sloping helicoid median surface with given parameters, obtaining equilibrium equations, elasticity and formulas relating deformations to displacements
15 p2714 A69-31197

Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods
16 p2876 A69-32785

Stress-strain state determination for axisymmetric shells applied to design of circular/annular plates and rotating disks
17 p3057 A69-33194

Stress-strain rate of glass fiber reinforced plastic pressure vessels under internal pressure, determining optimal fiber pattern
17 p3057 A69-33195

Complete spherical shells transverse frequency analysis, comparing results of elastic theory and classical, improved and membrane shell theories
17 p3061 A69-33705

Complete spherical shells nonsymmetric vibrations frequencies and mode shapes calculated by matrix method
17 p3061 A69-33706

Nonlinear partial differential equations solutions in theory of thin elastic spherical shells subjected to temperature fields and external loading
17 p3067 A69-34147

Axisymmetrical vibration characteristics of circular sandwich shell with viscoelastic core layer analyzed via differential equation to obtain frequency equation and composite loss factors
18 p3211 A69-34327

Side force problem for shallow helicoid shell, shown as static geometric analog of pure bending problem, solved by applying analogy
[ASME PAPER 69-APM-11]
18 p3213 A69-34387

Strain displacement and compatibility equations of finite symmetrical deflections of thin shells of revolution
[ASME PAPER 69-APM-14]
18 p3214 A69-34391

Differential equations of shells of revolution theory assuming rotationally symmetric stress and strain in thin elastic shells
18 p3215 A69-34549

Toroidal, spherical and conical shells limiting equilibrium under various loading and support conditions
18 p3216 A69-34572

Positive Gaussian curvature shell under concentrated forces, analyzing stresses and strains relation to load distance using Thompson and Legendre functions
18 p3218 A69-34601

Plastic cylindrical shell buckling under axial impact, predicting velocity required to cause flexural waves
18 p3218 A69-34624

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
18 p3223 A69-35035

Fluid-shell interactions, using piston theory and cylindrical-wave approximations
18 p3223 A69-35174

Regular integral equations solvability for boundary value problems in shallow shell theory, using method of potential representations and Green matrices
18 p3224 A69-35309

Weak moment shells made from materials with different elastic moduli, developing theory based on nondeformable normals
18 p3225 A69-35367

Thin walled shell temperature and strain fields described by integrodifferential equations based on Kirchhoff hypothesis and coupled thermoelasticity reciprocity equations
18 p3225 A69-35368

Cylindrical reinforced steel shells stability under external pressure
18 p3225 A69-35371

Resonant oscillations amplitude of nonlinearly elastic hinged cylindrical shell determined with cubic equation taking into account Hooke law, linear stresses, shell theory displacements, etc
19 p3435 A69-35843

Iterative algorithm applied to shell theory boundary value problem of stress concentrations at shallow shell holes
19 p3436 A69-35847

Contact problem of two thin elastic shells within Kirchhoff-Love theory, discussing constitutive equations
19 p3438 A69-36305

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states
19 p3440 A69-36636

Boundary conditions for shells with reinforced nonasymptotic boundaries, assuming coincident beam axis deformation with shell boundary deformation
19 p3443 A69-36781

Thin elastic shells internal stress state by iteration of two dimensional equation of general linear theory
19 p3443 A69-36790

Elastic shell theory to regularize singular integrodifferential equation, investigating load transfer from reinforcing ribs to circular cylindrical shell and numerical solution correlation
19 p3443 A69-36792

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design
20 p3621 A69-37064

Equilibrium equations reduced to single partial differential equation for membrane theory of shells having coefficients of first quadratic form and specified curvature radius
20 p3622 A69-37220

Nonlinear theory based on Euler-Bernoulli hypothesis for axisymmetric deformations of heterogeneous orthotropic shells of revolution under rotationally symmetric mechanical and thermal loads
20 p3625 A69-37592

Free vibrational characteristics of thin walled circular cylindrical shells with layers of anisotropic elastic material laminated about middle surface
20 p3627 A69-37767

Thin curved panels postbuckling behavior under axial compression, basing study on thin shell finite deformation theory and Galerkin method
20 p3629 A69-38112

Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements
20 p3630 A69-38207

Shell elasticity calculation method, discussing stress state model, equilibrium conditions, shell geometry, etc
21 p3832 A69-38419

Composites elastic behavior, considering stress-strain in anisotropic lamina, composite plates and shells theory, thermal stresses and buckling for improving heterogeneous structures design
21 p3836 A69-38931

Variational principle applicable to nonlinear theory of shallow shells, deriving potential for equations describing uniform boundary conditions, discussing shell stability
21 p3838 A69-39191

Small parameter method applied to axisymmetric problems of elastoplastic nearly spherical bodies undergoing exponential hardening process, deriving linearized expressions for boundary conditions
21 p3839 A69-39198

Computer program for stress analysis of cylindrical pressure vessel with flat-end closures by thin shell theory
21 p3842 A69-39306

Nonlinear stability for closed thin walled orthotropic cylindrical shell subjected to uniform external pressure, using Bubnov-Galerkin method for approximate solution
22 p4042 A69-40454

Shallow shells two dimensional theory including effects of transverse shear deformation and of moments turning about normal to middle surface
22 p4048 A69-41197

Nonlinear shallow shell theory of stress and strain formulated via shell of revolution problem
22 p4048 A69-41198

Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures
22 p4048 A69-41199

Vlasov thin shell theory extended for undamped bending, transforming partial differential equations and stress function into integral equation solvable by successive approximations

23 p4225 A69-41407

Deformation of orthotropic layered elastic shells based on linear elasticity theory, assuming surface and stress constraints

23 p4226 A69-41535

Plates and shells under concentrated loads, analyzing stress-strain state

23 p4228 A69-41986

Complex configuration shells described by single analytical expression using R-conjunctive and R-disjunctive functions yielding boundary equations

23 p4229 A69-41991

Rigid/plastic solids subjected partly to uniform fluid pressure and partly to general boundary conditions, analyzing uniqueness and stability criteria

23 p4235 A69-42460

Three dimensional and shell theory analysis of nonaxisymmetric harmonic elastic wave propagation in hollow elastic sphere

[ASME PAPER 69-APMW-7]

24 p4402 A69-43105

Computerized spectral analysis of vibrational frequency due to elastic waves in isotropic hollow spherical shells

[ASME PAPER 69-APMW-8]

24 p4402 A69-43106

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source

01 p0162 A69-10761

Asymmetrically loaded systems composed of shells of revolution, developing digital computer algorithm for solution of statics problems

05 p0840 A69-16201

Automatic data processing method for analyzing multiply connected elastoplastic shells of revolution

06 p1025 A69-17614

Stress-strain state of shells of multicable elevator pulleys under asymmetric load for various friction coefficients and pulley shell lengths and widths

06 p1026 A69-18016

Computer program for axisymmetrically deformed shells of revolution and combinations of such shells

06 p1026 A69-18019

Optimum design of shells loaded by concentrated forces, discussing thickness relation to middle surface, loading point and manufacturing considerations

11 p1979 A69-24812

Symmetrically loaded weak moment shells of revolution made of materials with different moduli of elasticity

11 p1980 A69-24819

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement matrix analyses, discussing local subelement, natural modes, cross sectional resultants, etc

16 p2872 A69-32025

Bending of circular plate into shell, using stress-strain relation in finite strain, solving differential equations and boundary conditions

21 p3836 A69-39005

Curved shell elements in shell and plate analysis, discussing quadratic and cubic elements for space structures design

21 p3845 A69-39329

Plate and shell structures static and dynamic analysis by generalized variational principles in finite element method, discussing element displacement functions

[AIAA PAPER 68-290]

23 p4227 A69-41882

Complex configuration shells described by single analytical expression using R-conjunctive and R-disjunctive functions yielding boundary equations

23 p4229 A69-41991

SHELTERS

U LUNAR SHELTERS

SHIELDING

NT ELECTROMAGNETIC SHIELDING
NT ELECTROSTATIC SHIELDING
NT HEAT SHIELDING
NT MAGNETIC SHIELDING
NT RADIATION SHIELDING
NT RADIO FREQUENCY SHIELDING
NT REENTRY SHIELDING
NT SOLAR RADIATION SHIELDING
NT SPACECRAFT SHIELDING

Bumper materials effect on two component hypervelocity impact shields performance, noting material velocity influence

[AIAA PAPER 69-379]

13 p2283 A69-28309

SHIFT REGISTERS

Wafer chip assembling technique for high density interconnection of silicon devices in large monolithic electronic systems, noting application to MOS shift register

02 p0222 A69-12472

Nonlinear feedback shift register circuit design by logical sequences

08 p1298 A69-20835

Linear shift register synthesis algorithm found to coincide with Berlekamp iterative algorithm for decoding BCH codes

09 p1470 A69-21317

Error control coding noting cyclic codes, binary shift registers, shift register circuits, encoding and decoding

09 p1461 A69-21893

Decoding procedure for error locating binary code indicating location of single subblock containing errors in code word, employing feedback shift registers

11 p1857 A69-24549

Shift registers with binary switching elements for shaping signal spectrum in data transmission systems without phase distortions

12 p2040 A69-26486

Pseudorandom uniformly distributed numbers generation from noise-like signals produced by shift register with feedback, noting statistical tests

13 p2218 A69-27248

Probability density functions of waveforms from summation of digits in n-stage shift register generating m-sequence

15 p2568 A69-30617

Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error

19 p3312 A69-36284

Minimization algorithm for switching systems synthesis, describing design of mass spectrometer curve function generator and autonomous shift register

23 p4146 A69-42535

SHIMS

U COMPENSATORS

SHIP PROPULSION

U MARINE PROPULSION

SHIPS

NT AIRCRAFT CARRIERS
NT NUCLEAR POWERED SHIPS
NT SUBMARINES

Marine requirements possible satisfaction by using space techniques to improve long range communications to achieve safety at sea and shipping operations efficiency

01 p0161 A69-10503

Shipboard direction finder calibration accuracy, emphasizing radio operator training

06 p0897 A69-17533

Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles

17 p2951 A69-33254

Kormoran airborne missile weapon system for attacking seagoing targets, discussing navigation guidance, radar tracking and homing system

17 p3050 A69-33697

SHIVERING

Primary muscle spindle afferents from gastrocnemius muscle of cat before, during and after cold shivering, utilizing ramp stretches of same muscle

23 p4096 A69-42091

SHOCK

Dogs cardiovascular responses to histamine liberator /compound 48/80/, describing shock and acidosis with elevated histamine levels

22 p3873 A69-40206

SHOCK ABSORBERS

Supercritical damping of nonlinear mass elastic system with damping force function dependent on fractional powers of velocity, noting impact deceleration

04 p0671 A69-14413

Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters for protecting hard landing planetary payloads

04 p0683 A69-15508

Airflow through open foam cellular structure, discussing mathematic model for predicting pressure buildup and foam response in shock and vibration isolation

[ASME PAPER 69-VIBR-46]

10 p1803 A69-24144

Synchronous vibration absorbers using gyroscopic systems, noting antiresonance with Perissogyro

[ASME PAPER 69-VIBR-39]

10 p1807 A69-24177

Optimum and suboptimum shock and vibration isolators, discussing three criteria and tradeoff between relative motion and accelerative force

[ASME PAPER 69-VIBR-45]

10 p1808 A69-24183

Landing shock attenuation system for Surveyor spacecraft, describing hydraulic cylinder and piston arrangement for damping, computerized shock absorber design and landing process simulation

[ASME PAPER 69-DE-54]

14 p2530 A69-28848

Steady state motion of multiple unit impact damper attached to sinusoidally excited primary system, determining asymptotically stable regions

15 p2714 A69-31144

Parameter selection for optimum characteristics of machine part shock absorbers subject to orthogonal impact pulses

16 p2794 A69-32297

Landing shock struts of Surveyor 6, emphasizing silicone liquid springs role as absorbers and stabilizers

20 p3466 A69-38180

SHOCK DIFFUSERS

U DIFFUSERS

SHOCK DISCONTINUITY

Lighthill method based expressions derived for discontinuity shape formed during shock wave diffraction near small angle

02 p0234 A69-12588

Anisotropic nonlinear wave propagation in arbitrarily moving ideal gas, using singular surface/ray combined theories

04 p0630 A69-14532

MHD shock discontinuities above critical Alfvén-Mach numbers in two fluid plasma

06 p0970 A69-17954

Jump conditions across MHD shock waves, reducing relations to identities applicable to nonequilibrium situations

07 p1193 A69-19242

Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers

08 p1360 A69-19988

Mach wave and anisotropic supersonic flow interaction, considering constant entropy along streamline and layer of entropy discontinuities /interfaces/

10 p1631 A69-22906

Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations

22 p4020 A69-40304

Semianalytic solution for axisymmetrical supersonic inviscid flow near stagnation region of spherically blunted body with detached shock waves

22 p3861 A69-41178

Axisymmetric supersonic flow around spherically blunted body at small angles of attack, deriving equations for shock deformation perturbations and surface pressure

22 p3861 A69-41179

SHOCK FRONTS

Shock front structure in radiative relaxation region in atomic H, calculating Lyman continuum effects

01 p0122 A69-10125

Gas flow model of coaxial electromagnetic plasma gun front profiles and speeds for operation with positive central electrode

02 p0288 A69-12032

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves

02 p0189 A69-12182

Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates

03 p0414 A69-13138

Shock waves luminescence temperature dependence measured by UV and visible radiation, noting dependence on front glow duration

03 p0415 A69-13411

Legendre transformation application to plane elastoplastic loading waves, examining shock front formation in interaction region

04 p0673 A69-14495

Apparatus for generating HF shock fronted pressure waves in resonant tube

06 p0906 A69-17149

Width of strong shock wave front and transition layers estimated, using Boltzmann kinetic equation and H-theorem

07 p1118 A69-18702

Approximate solution to problem of estimating thickness of shock wave by statistical mechanics

07 p1119 A69-18704

Gas dynamic shock wave entry into magnetic field, discussing field distribution behind shock front and diffusion and medium motion effects on penetration depths

07 p1192 A69-19022

Radiative cooling layer behind shock front from neutral interstellar hydrogen cloud collision at Mach 20, discussing molecular hydrogen abundance during cooling

08 p1381 A69-19796

Sonic boom minimum achievable shock front pressure rise and overpressure level prediction for given aircraft and flight conditions

08 p1253 A69-19903

Flow behind shock front propagating along viscous fluid film surface, noting shock intensities as related to detonation velocities, using schlieren photographs

08 p1303 A69-20326

Displacement effect due to subsonic reaction heat front behind shock wave in two dimensional supersonic flows

08 p1252 A69-20691

Gas pressure variations behind autonomous stable detonation fronts in propane-O mixtures, noting effect of diameter tubes and initial pressures

08 p1421 A69-20757

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field

09 p1577 A69-21714

Bodies of revolution in sonic flow of ideal gas, showing same perturbational effect of source and dipole on flow before shock front

10 p1632 A69-23364

Shock front propagation in argon with electrode-drawn induced EMF, using shock tube with induced transverse magnetic field

10 p1737 A69-23469

Relaxation phenomena in ionization process in argon shock front structure, using EM and pressure driven shock tube to drive high speed shock waves

10 p1726 A69-23685

Electrical conductivity of air behind incident and reflected shock wave fronts as function of temperature and Mach numbers measured by electrode method

11 p1888 A69-25220

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

12 p2061 A69-25880

Boundary layer parameters behind shock wave front in ionized gas calculated with allowance for charged particle diffusion

12 p2139 A69-26713

Enhanced plasma heating in absorption zone of laser-induced gas breakdown at spherical blast wave shock front

14 p2460 A69-29604

Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position

14 p2493 A69-29673

Shock wave propagation in isothermal atmosphere, discussing radiation and ionization effects on thermal jump

16 p2858 A69-32207

Shock detachment distance for flow around cylinders and spheres determined by microphotometric tracing of negatives of photographs of forward stagnation streamlines

17 p2949 A69-32962

Wave motion nonsteadiness influence on detonation front thickness using quasi-steady kinetic model of induction process, discussing agreement with experimental observations

17 p2952 A69-33403

Collisionless shock wave front turbulence in diluted plasma, including thickness, electron and ion component measurements

17 p3012 A69-33818

Oblique hydromagnetic shock waves in magnetized hydrogen plasma enclosed in pyrex chamber by oscillatory zeta discharge, probing for front development and structure

17 p3013 A69-33823

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field

17 p3013 A69-33824

Shock wave propagation in two types of electromagnetically driven shock tubes, describing probe for shock front velocity measurement

18 p3119 A69-34260

Br molecular dissociation rate in argon excess determined, considering visible emission intensity behind shock front

18 p3176 A69-34465

Reflected shock front interaction with heated thin gaseous filament studied in shock tube by spark interferometric and schlieren technique

18 p3228 A69-34468

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

18 p3180 A69-35017

Cylindrical concentric detonation front and stability mechanism space-time measurement

20 p3632 A69-37215

Precursor electrons due to photoionization ahead of pressure driven shock waves, presenting electron temperature and density theoretical analysis

20 p3511 A69-38238

Shock front reaction and detonation initiation in low density ammonium perchlorate

21 p3784 A69-39590

Charge exchange of solar wind protons passing shock front, noting turbulent subsonic motion of randomized hot solar wind protons in shadow cone

22 p4008 A69-41208

One dimensional shock waves and acceleration fronts in nonlinear isotropic viscoelastic materials using constitutive equations

23 p4235 A69-42463

Molecular vibrational relaxation effect on dissociating airflow behind shock wavefront, giving relations to chemical reaction rates in diffusion approximation

24 p4302 A69-43486

Irregular pressure profiles and pressure-time histories when using octofluorocyclobutane and sulfur hexafluoride in explosive driven shock tube

[AIAA PAPER 68-730] 24 p4297 A69-43577

Tube diameter effects on shock front propagation, observing front formation process with schlieren method

24 p4297 A69-43630

Hot dense plasma used as driver gas producing plane stable current-free high Mach number shock fronts resembling plane blast waves

24 p4359 A69-43647

SHOCK HEATING

Initial ionization rates and collision cross sections in shock heated argon in low pressure shock tube, using double electrostatic probes

01 p0132 A69-11206

Medium heating by explosion in presence of allotropic changes and thermochemical reactions concerning temperature field determination

03 p0534 A69-14159

Shock heated gas radiation frequency dependence and UB and B-V color indices determination, studying role in close binary systems luminescence

13 p2350 A69-27860

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure

15 p2637 A69-30225

Electron temperature relaxation in shock heated Ar plasma, measuring plasma microwave radiation

15 p2663 A69-30995

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra

16 p2877 A69-31768

Convective plus radiative shock tube model stagnation point heating rate measurements for planetary entry heating rate in air and Venus gas

[AIAA PAPER 69-635] 17 p2890 A69-33272

Absolute gf values for Fe I and Fe II lines between 3190 and 3315 A measured by spectral absorption through shock heated gas containing Fe

18 p3175 A69-34304

Radiation gas dynamics in shock tube, studying radiation coupled flows with flow field affected by radiant energy transport

18 p3116 A69-34447

Shock heated argon thermal conductivity studied by optical interferograms, deriving equation for measured mean value

18 p3228 A69-34459

Metallic aerosol generator application in shock tube spectrometric measurements of radiation by molecules occurring as solids before decomposition to vapor phase

18 p3099 A69-34461

Steady Prandtl-Meyer expansion of shock heated gases for recombination studies, measuring static pressure, stagnation point heat transfer, IR emission and optical absorption

18 p3228 A69-34466

Radiation effects produced by high temperatures of shock waves and nuclear explosion fireballs, air cooling, laser emission-matter interaction and optical phenomena

18 p3230 A69-34926

Sulfur hexafluoride dissociation in argon at various temperatures and pressures, using shock tube techniques to determine unimolecular parameters

18 p3100 A69-35475

Ramsdorf meteorite chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

Shock histories of hexahedrites and Ga-Ge group III octahedrites based on metallographic and X ray diffraction analysis, noting meteorites shocked preterrestrially

19 p3418 A69-36136

Dispersion of paraffin cork after instantaneous shock heating, noting expansion at various isentropic indices

19 p3301 A69-36839

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc

20 p3457 A69-36981

Photoelectric measurements of UV absorption coefficients of high temperature air at specific temperature and wavelength ranges in pressure-driven shock tube

22 p4049 A69-40098

Gaseous mixtures for hypervelocity applications, studying equilibrium conditions and thermodynamic properties for shock and constant volume heating processes

22 p4049 A69-40266

Unsteady aerodynamic heating at stagnation region including surface combustion in arc heated high enthalpy wind tunnel

22 p3860 A69-40597

Arc heating of shock tube driver gas, describing radiative energy transfer mechanism

23 p4147 A69-41895

SHOCK LAYERS

Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations

01 p0007 A69-11070

Radiation heating characteristics of shock layer gases surrounding Venus entry vehicle, noting domination of carbon monoxide band and UV spectrum

02 p0351 A69-11751

Rarefied merged stagnation shock layer of hypersonic body, considering chemical reactions of nonequilibrium dissociative relaxation of air

02 p0189 A69-12521

Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle

[AIAA PAPER 68-1151] 03 p0532 A69-13560

Plasma flow in electromagnetic shock tube with various pressures and speeds, noting turbulence onset in shock layer

06 p0968 A69-17764

Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere

06 p0861 A69-17812

Electron density shock layer profiles measured by Langmuir probe in hypersonic tunnel on blunt body for air flows and gas densities

[AIAA PAPER 69-81] 06 p0863 A69-18101

- Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation
[AIAA PAPER 69-136] 06 p0864 A69-18141
- Time dependent technique for inviscid blunt body flows to analyze viscous rarefied shock layer regime, using Navier-Stokes equations
[AIAA PAPER 69-139] 06 p0865 A69-18173
- Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature
[AIAA PAPER 69-183] 06 p0865 A69-18201
- Shock waves internal structure in perfect monatomic gases, discussing density distribution in shock layer experimental measurement 07 p1120 A69-18930
- Bow shock and magnetopause boundary observations with IMP 2 plasma detector 07 p1129 A69-19372
- Supersonic gas flows in shock layer past blunt bodies taking into account selective radiation and radiative transfer in continuum, applying method of characteristics 14 p2390 A69-29477
- Plane shock layer structure in pseudoMaxwellian monatomic gas, integrating Krook equation for gas molecule velocity 14 p2432 A69-29613
- Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model 14 p2390 A69-29614
- Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] 17 p3070 A69-33258
- Shock layer properties, radiative and convective heat transfer about two hypersonic blunt bodies at zero angle of attack in assumed Martian atmosphere
[AIAA PAPER 69-634] 17 p2891 A69-33281
- Nonequilibrium multicomponent ionization calculations for stagnation merged shock layer of hypersonic blunt body by successive accelerated replacement
[AIAA PAPER 69-655] 17 p2892 A69-33469
- MGD hypersonic shock layer at spherically blunted body analyzed by utilizing induction equation including Hall effect
[AIAA PAPER 69-722] 17 p3012 A69-33494
- Radiative energy emission by blunt vehicle shock layer under severe entry conditions, discussing flow properties and radiative transfer coupling
[AIAA PAPER 69-719] 18 p3084 A69-34416
- Blunt body stagnation point ionization by chemical nonequilibrium thin viscous shock layer analysis, predicting electron density 23 p4060 A69-41917
- Supersonic flows past blunt bodies, formulating approximate similarity law for shock layers in subsonic regions 24 p4246 A69-43495
- Reentry shock layer radiative heat transfer to surface of blunt superorbital vehicle
[AIAA PAPER 68-1151] 24 p4414 A69-43567
- Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas 24 p4249 A69-43663
- SHOCK LOADS**
NT BLAST LOADS
- Shock loading history effect on solid state response of iron meteorites to annealing at moderate temperatures permits deductions about thermal history 01 p0149 A69-10134
- Corrosion rates and stress corrosion cracking sensitivity of explosively shocked austenitic stainless steels 03 p0444 A69-13308
- Deformation microstructures in shock loaded olivine, discussing planar features 05 p0818 A69-15607
- Dislocation redistribution during annealing and shock deformation in liquid nitrogen of chromium, molybdenum and tungsten single crystals 07 p1159 A69-18534
- Mathematical formula for estimating cost and efficiency of parachuting supplies, noting shock load reduction 07 p1053 A69-19140
- Shockload on axial intake fan leading edge of radial flow compressor, calculating flow field 08 p1251 A69-20604

- High speed deformation of metals under pulse loading, noting role of maximum stress magnitude and deformation characteristics 12 p2113 A69-26043
- Quantitative interferometric analysis of shock induced wavelength variations in glass and polished steel plates using Q switched ruby laser light source 12 p2089 A69-26185
- Meteorite fragment from Arizona Meteor Crater, establishing probable history from shock loading experiments on iron alloys 12 p2158 A69-26344
- Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength 12 p2119 A69-26847
- Experimental and predicted shock axial pressure variations for semiinfinite metallic targets during high velocity impact, using Al alloys and Cu
[AIAA PAPER 69-361] 13 p2366 A69-28294
- Shock load protection through energy absorption and dissipation in primary or composite structures, listing honeycomb, cellular plastics and rubber mechanical properties
[ASME PAPER 69-DE-37] 14 p2531 A69-28846
- Optimal active shock isolation by nonlinear elements for system subjected to shock type loadings, discussing impulse shapes 15 p2713 A69-31019
- Shock force calculation for parachute of arbitrary canopy design, illustrating simplification permitting differential equation solution in closed form 15 p2551 A69-31172
- X ray detectable preferred disorder in solids by shock loading studied in Ainsworth meteorite and in hexagonal alpha silicon dioxide 15 p2671 A69-31538
- Polycrystalline nickel foil microstructure after explosive shock loading and heat treatments, using transmission electron microscopy 20 p3563 A69-38126
- Hugoniot equation of state of shock loaded W determined at room temperature and 950 C 20 p3564 A69-38127
- Shocked Bamle enstatite transformed to disordered enstatite, noting Debye-Scherrer patterns similarity 21 p3792 A69-38321
- Shock hardening of Al alloys in annealed, solution heat treated and aged conditions compared with cold-rolled materials
[ASM PAPER W9-10.4] 21 p3729 A69-38664
- Piezoelectric transducer transient electrical response due to shock loaded stress using transfer calculus 22 p3947 A69-40863
- SHOCK MEASURING INSTRUMENTS**
- Shock and vibration data recording, discussing transducer selection, accelerometer mounting, conditioning electronics and recording devices 01 p0083 A69-11050
- In-flight measurement of shock and vibration effects on aircraft and propulsion systems 01 p0084 A69-11051
- Etched manganin gauge for shock pressure measurement in high noise environments containing radiation and electromagnetic effects 04 p0603 A69-15431
- Shock attenuation and equation of state of polyurethane based on aquarium technique and free surface velocity measurement 16 p2828 A69-31810
- Optimum ballast resistance of thin film heat transfer gage producing shock arrival time, thickness and structure data of low pressure shock tube 18 p3117 A69-34470
- SHOCK RESISTANCE**
NT IMPACT RESISTANCE
- Shock sensitivity of solid explosives and propellants, using calibrated gap testing techniques 02 p0302 A69-11520
- Shock initiation and sensitivity of granular explosives, noting heterogeneity effect in ammonium perchlorate 10 p1751 A69-23016
- Ruggedized ballistic range telemetry system survivability and in-flight stability after gun launching, presenting temperature, strain and stagnation point pressure measurements 10 p1654 A69-23281
- Shock load protection through energy absorption and dissipation in primary or composite structures, listing honeycomb, cellular plastics and rubber mechanical properties
[ASME PAPER 69-DE-37] 14 p2531 A69-28846

- Solar array configurations and performance on Martian surface, including hard lander design and surviving shock levels 23 p4073 A69-42289
- SHOCK SIMULATORS**
- Gun tunnel equilibrium piston technique by model analysis of piston weight, tunnel conditions and geometry 11 p1862 A69-25013
- Shock spectra practical applicabilities to simulated and real shock equivalence, including spectra definitions and determinations 13 p2369 A69-28600
- Sonic boom simulation methods using shock tube booth type simulators, ballistic ranges and explosives, discussing unmanned data recorder as monitoring device 15 p2585 A69-30371
- Mechanical linear accelerator simulating acceleration, shock and weightlessness, noting data acquisition and interpretation 17 p2945 A69-33423
- SHOCK SPECTRA**
- Shock testing methods using shock spectrum concept and description testing machines and instrumentation 11 p1862 A69-24408
- Shock spectra practical applicabilities to simulated and real shock equivalence, including spectra definitions and determinations 13 p2369 A69-28600
- Real time shock response analysis advantages over sequential analysis, describing equipment 15 p2618 A69-30359
- Collision free earth shock wave gross and fine structure deduced from OGO 5 plasma diagnostics
[AIAA PAPER 69-676] 17 p2961 A69-33452
- Relative displacement spectra analysis illustrating shock spectra errors, comparing real system response with simple single degree of freedom system response 20 p3548 A69-37301
- Sonic boom lower bounds determination in midfield based on modification of Jones results by minimizing overpressure or shock strength of boom wave positive component 24 p4254 A69-43662
- SHOCK TESTS**
- Controlled transient signal distortion by shock monitoring instrumentation circuits using piezoelectric accelerometers 04 p0603 A69-15430
- Deformation microstructures in shock loaded olivine, discussing planar features 05 p0818 A69-15607
- Primary explosives tested for effects of shock, friction, heat and electrical discharges 10 p1750 A69-23010
- Shock testing methods using shock spectrum concept and description testing machines and instrumentation 11 p1862 A69-24408
- Shock pulse criterion limitations and HF transients technique for design and tests of structures and components 12 p2182 A69-26731
- Shock spectra practical applicabilities to simulated and real shock equivalence, including spectra definitions and determinations 13 p2369 A69-28600
- Real time shock response analysis advantages over sequential analysis, describing equipment 15 p2618 A69-30359
- Pulse generator to accommodate electronic system testing to shock response spectrum by simulating real world shock environment 15 p2585 A69-30360
- Flight worthiness of mishandled electronic equipment, analyzing fragility and performance of shock exposed components and connections 15 p2576 A69-30362
- SHOCK TUBES**
NT MAGNETIC ANNULAR SHOCK TUBES
- Shock reflection structure in ionizing xenon determined by fast rise pressure gauge mounted in shock tube end wall 01 p0132 A69-11205
- Initial ionization rates and collision cross sections in shock heated argon in low pressure shock tube, using double electrostatic probes 01 p0132 A69-11206
- Flow nonuniformity measured in shock tubes by determining heat transfer rate to fine wire probes 01 p0062 A69-11219

Radiation and electrical precursor effects in expansion tube of electromagnetic shock tube, discussing primary causes

02 p0229 A69-11936

Inert gas nonequilibrium MHD power generation in shock tube

02 p0196 A69-12425

Electronic transition moment for C/Swan/ bands measured in shock tube in carbon dioxide and argon mixtures

02 p0285 A69-12833

Boundary layers and heat transfers at shock tube walls, establishing approximate solution of boundary layer equation for laminar and turbulent cases [ONERA-TP-647]

03 p0412 A69-12875

Surface temperature thermal fluxmeters used in measurements of shock tubes [ONERA-TP-648]

03 p0427 A69-12876

High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance

03 p0428 A69-13104

Shock tube equilibrium method for determining vapor pressure of platinum submicron particles by suspension in xenon-argon carrier gas at high temperatures

03 p0532 A69-13319

Nozzle geometry influence on argon plasma flow parameters in shock tube, discussing measurement data behind shock wave front

03 p0481 A69-14160

Shock tube and samples of fluoroethylene, difluorodichloroethylene and fluoromethane in argon diluent used to prepare carbon difluoride, discussing electronic oscillator strengths

04 p0632 A69-14944

Rectangular shock tube for use with pressure and vacuum, discussing sealing of circular end flanges to buildup tube

06 p0906 A69-16928

Emissivity of high temperature air and carbon dioxide-nitrogen mixtures in two diaphragm shock tube

06 p0911 A69-17348

High speed streak camera synchronization with shock tube process involving nonreacting gases or mixtures in pressure chamber

06 p0926 A69-17499

Plasma flow in electromagnetic shock tube with various pressures and speeds, noting turbulence onset in shock layer

06 p0968 A69-17764

Shock tube study of ammonia oxidation at high temperature, detecting molecular species in reaction zone by IR emission

06 p0885 A69-17936

Chemiluminescence in high temperature oxidation of methane studied in shock tube

06 p0885 A69-17937

Shock tube measurements of radiation from simulated Jupiter atmosphere related to thermodynamic conditions encountered by entry probe [AIAA PAPER 69-184]

06 p0908 A69-18207

Kinetics calculations in shock tube data interpretation, determining elementary rate constants and complex reaction mechanism [WSCI PAPER 68-50]

07 p1073 A69-18319

Flow diagnostics for high enthalpy nonequilibrium gas flows in shock tubes using long pulse ionized Ar gas laser

08 p1323 A69-19879

Oscillator strengths of transitions in shock tube between nitric oxide Rydberg states in near IR

08 p1354 A69-20150

Monograph on interferometric studies of unsteady shock waves in theta pinch driven shock tube, discussing flow characteristics in helium and hydrogen

08 p1304 A69-20710

Monograph on shock wave structure in binary gas mixtures covering gas kinetics and shock tube measurements of heavy component density distribution

08 p1304 A69-20711

Arc driven shock tube with alumina ceramic liner to reduce driver gas contamination, noting shock speed and test time increase [AIAA PAPER 68-366]

09 p1570 A69-21957

Gate for measurement of density variation between expansion chamber and driver gas of valve driven shock tube

10 p1673 A69-23342

Shock front propagation in argon with electrode-driven induced EMF, using shock tube with induced transverse magnetic field

10 p1737 A69-23469

Relaxation phenomena in ionization process in argon shock front structure, using EM and pressure driven shock tube to drive high speed shock waves

10 p1726 A69-23685

Electric shock tube for measurement of plasma magnetic fields induced by shock plasma moving through DC magnetic field transverse to flow

11 p1925 A69-24311

Viscous effects of wall boundary layer behind primary shock wave on flow in shock tube, noting pressure and temperature changes

11 p1870 A69-25010

Dense real gas thermodynamic relations in piston driven shock tube facilities operation

11 p1862 A69-25011

Piston driven facilities for hot high pressure gas production including gas tunnels, heavy piston facilities, piston driven shock tunnels and high speed guns

11 p1862 A69-25012

Radiation studies of pressure driven shock tubes with atomic ionization at high temperatures, discussing thermal light sources, autoionization, etc

11 p1863 A69-25014

Planning, instrumentation and analysis of shock tube experiments in chemical kinetics, noting gas phase reaction rates at high temperatures

11 p1863 A69-25015

Intermittent flow facilities for ballistic and lifting reentry flight simulation including shock tubes, ballistic ranges and shock and gun tunnels

11 p1863 A69-25016

Transistorized assembly for amplification of signals emitted by platinum film probes in shock tubes, discussing application to chronometric device triggering

11 p1887 A69-25095

Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations

11 p1866 A69-25275

Electrical breakdown between cold electrodes in contact with flowing plasma produced by electromagnetic shock tube

12 p2134 A69-26098

Shock wave gas flow density behind shock tube calculated by shadows measurements using interferometric techniques

13 p2245 A69-27384

Shock tubes and tunnels design and operation principles for investigating physical and chemical phenomena

13 p2240 A69-27930

Isentropic compression tube with piston compressor for producing hypervelocity test flows, noting shock speeds [AIAA PAPER 69-334]

13 p2249 A69-28270

Reservoir conditions of reflected shock wind tunnel by subjecting gas to direct shock and shock reflected at closed downstream end of shock tube

13 p2243 A69-28359

Interaction between shock tube gas discharge plasma and fast electrons ionized stationary gas, noting luminous discontinuities propagation

14 p2490 A69-28998

Blue continuum emission from hot carbon dioxide measured in shock tube, discussing applications to temperature measurement of gases containing carbon dioxide

14 p2427 A69-29014

Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation

14 p2449 A69-29561

Shock wave velocity and gas flow parameters in shock tube with noninstantaneously opening diaphragm calculated by method of characteristics

14 p2432 A69-29623

Shock development in electrothermal shock tube with performance simulation of mechanical shock tube with hot driver but turbulent or unstable driver-shock interface

14 p2427 A69-29768

MHD interaction between plasma and transverse magnetic field in shock tube, noting unsteady shock wave propagation in interaction zone

14 p2501 A69-29919

Cosmic shock waves simulation through correlations between shock equations in classical and relativistic fluid dynamics, using shock tube tests

14 p2433 A69-29981

Shock tube hot flow duration, contact surface configuration and boundary layer thickness

15 p2590 A69-30297

Hall generator electrical characteristics, discussing plasma homogeneity, stability and shock tube priming

15 p2658 A69-30298

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges

15 p2593 A69-31161

Microwave breakdown dependence on elevated gas temperature in electric arc shock tube, considering air, nitrogen and argon

16 p2749 A69-31693

Carbon dioxide dissociation relaxation times measured in shock tube at 1900-2400 K and 1.5-2.5 km/sec

16 p2766 A69-31910

Mach reflection shock-shock locus in shock tube implosions generation by area change

16 p2766 A69-31919

Two phase detonations of fuel in liquid layer on shock tube wall with gaseous oxidizer, presenting one dimensional approximation for film detonation propagation

16 p2879 A69-32151

Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube

16 p2748 A69-32793

Temperature jumps at gas-solid interface in shock tube calculated by one dimensional approximation of thermal boundary layer behind reflected shock wave

17 p2949 A69-33023

Shock wave propagation in two types of electromagnetically driven shock tubes, describing probe for shock front velocity measurement

18 p3119 A69-34260

High temperature and short duration flows - Conference, Freiburg University, West Germany, April 1967

18 p3114 A69-34444

Schardin contributions to theory and applications of shock tube, including rapidly occurring events

18 p3115 A69-34445

Shock tube application to transition probability measurements with emphasis on thermodynamic state of radiating gas, noting temperature dependence of level population

18 p3176 A69-34446

Radiation gas dynamics in shock tube, studying radiation coupled flows with flow field affected by radiant energy transport

18 p3116 A69-34447

Reflected shock and boundary layer interaction in shock tube, discussing bifurcation effect on flow and turbulence transition

18 p3116 A69-34448

Widths measurements of van der Waals broadened Si I spectral lines by shock tube and scanning Fabry-Perot interferometer, using argon as perturbing gas

18 p3116 A69-34449

Gas ionization relaxation times from ion density profiles in shock tubes at low Mach numbers, discussing influence of impurities on ionization process

18 p3116 A69-34451

Heated Hg shock tube construction and operation, application to high electron density plasmas and problem of shock bifurcation in Hg monatomic gas

18 p3116 A69-34453

Fissioning plasma generated in shock tube with 235 uranium hexafluoride gas, selecting tube diameter, reflector depth and initial gas density for specific neutron multiplication

18 p3180 A69-34455

Prestressed ceramic driver chamber energy efficiency for arc driven shock tube by pressure measurements with piezoelectric probe

18 p3116 A69-34456

Shock wave profiles in molecular N-H gas mixtures in shock tube measured by optical electron beam method, noting disagreement with Navier-Stokes calculations

18 p3134 A69-34458

Shock tube with cylindrical explosive to implode glass wall and produce high velocity glass particle jet, studying jet velocity and behavior and test gas pressure effects

18 p3116 A69-34460

Metallic aerosol generator application in shock tube spectrometric measurements of radiation by molecules occurring as solids before decomposition to vapor phase

18 p3099 A69-34461

Criteria to predict flow instabilities triggered by exothermic reaction presence in high temperature reaction kinetic shock tube studies

18 p3116 A69-34462

Gas phase ignition shock tube analysis of solid propellant taking into account changing surface temperature and fuel vapor consumption
18 p3183 A69-34463

Low molecular weight fluorocarbons pyrolysis and oxidation in single pulse shock tubes, using vapor phase chromatography and mass spectral analyses
18 p3099 A69-34467

Reflected shock front interaction with heated thin gaseous filament studied in shock tube by spark interferometric and schlieren technique
18 p3228 A69-34468

Shock tube calibration for aerodynamic loading, determining flow parameters by observing particle trajectories with high speed photography of smoke tracers
18 p3085 A69-34469

Optimum ballast resistance of thin film heat transfer gage producing shock arrival time, thickness and structure data of low pressure shock tube
18 p3117 A69-34470

Rereflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements
18 p3085 A69-34474

Shock waves attenuation through multiple reflections at ends and interactions with expansion wave in shock tube by pressure transducer, noting exponential decay
18 p3121 A69-34475

UV absorption coefficients of high temperature air measured in shock tube reflected region
18 p3230 A69-35073

Heat exchange in stagnation point region of blunt body, using shock test simulation of high speed flight
18 p3086 A69-35118

Biased electrostatic probes determining free stream charge density and ionization risetime in supersonic flows in arc heated pressure driven shock tube
19 p3291 A69-35715

Calibration of inertial and surface temperature heat transfer transducers for hotshot and shock tube measurements developed and tested at ONERA [ONERA-TP-683]
19 p3305 A69-35726

Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions
19 p3295 A69-36471

Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
20 p3538 A69-37227

Thermal dissociation rate of HBr in Ar in 2100-4200 K temperature range by shock tube analysis, using IR emission and UV absorption
20 p3484 A69-37347

Vacuum UV flux along T type shock tube axis and measurements of He I line precursor emission, indicating ionizing radiation contributions to precursor ionization and excitation
20 p3511 A69-38239

Photon induced precursor ionization and electron produced wave separation from electrical shock tubes
20 p3511 A69-38240

Shock tube boundary layers dependence on shock strength determined using vorticity transport to define boundary layer coordinate
22 p3930 A69-40531

Velocity and temperature boundary layers on plane wall developed by ideal shock tube flow for weak shock and expansion waves
22 p3932 A69-40894

Piston driven shock tube at Kyoto University with performance tests results, investigating compression processes, shock speed and flow duration time
22 p3928 A69-41046

Mirror mount for shock tube laser cavity with alignment capability, noting seal against internal pressures
22 p3951 A69-41233

Detonation driven shocks of high Mach number obtained in improved membrane shock tube by heating and compressing driver gas
23 p4198 A69-41545

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients
23 p4146 A69-41547

Irregular pressure profiles and pressure-time histories when using octofluorocyclobutane and sulfur hexafluoride in explosive driven shock tube [AIAA PAPER 68-730]
24 p4297 A69-43577

Tube diameter effects on shock front propagation, observing front formation process with schlieren method
24 p4297 A69-43630

Shock formation mechanism in simple shock tube using multistage modification of White model, deriving variation of shock Mach number
24 p4305 A69-43631

Quasi-steady laminar flat plate boundary layer in shock tube determined by reducing boundary layer equations to linear differential equations
24 p4305 A69-43632

High enthalpy shock tube and nozzle gas flows for incident shock Mach numbers analyzed for laminar boundary layers and boundary layer transitions
24 p4305 A69-43664

SHOCK TUNNELS

High temperature air plasma total radiant intensity measurements in shock tube
04 p0685 A69-14719

Shock tunnel simulation of scramjet combustion chamber performance [AIAA PAPER 69-84]
06 p0985 A69-18165

Transition of hypersonic boundary layers on conical body using shock tunnel, obtaining surface heat transfer distributions [AIAA PAPER 68-39]
09 p1482 A69-21943

Diagnostic techniques to identify flow regimes of high enthalpy shock tunnel [AIAA PAPER 68-729]
09 p1477 A69-21970

Pressure vessel design to alleviate hydrogen embrittlement of steels for shock tunnel drivers [AIAA PAPER 68-367]
09 p1477 A69-21993

Gun tunnel equilibrium piston technique by model analysis of piston weight, tunnel conditions and geometry
11 p1862 A69-25013

Shock tubes and tunnels design and operation principles for investigating physical and chemical phenomena
13 p2240 A69-27930

Nose bluntness and model scale effect on radial and axial variation of wake fluid and plasma properties by hypervelocity shock tunnel [AIAA PAPER 69-330]
13 p2242 A69-28266

Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time
14 p2391 A69-29622

Density and density fluctuations in hypersonic turbulent boundary layer on shock tunnel nozzle wall measured using electron beam probe
16 p2770 A69-31907

Shock tunnel facility generating short duration high velocity high density air flow with equilibrium chemical simulation of free stream flight conditions [AIAA PAPER 68-17]
16 p2766 A69-32167

Shock tunnel steady flow starting process in two dimensional reflection nozzle, using multiple shadowgraphs and interferograms, noting nozzle geometry influences
18 p3085 A69-34471

Quantitative photographs of low density flowfields during shock tunnel tests using electron beam excitation with image intensifier tube detector
19 p3292 A69-35723

Nanosecond pulse coherent Doppler radar for monostatic measurements of turbulent wakes in shock tunnels and ballistic ranges
19 p3293 A69-35743

Digital data acquisition system with ultrahigh sampling rate for Ames electric arc shock tunnel, describing analog to digital conversion, data storage, system performance, etc
19 p3293 A69-35744

Probe for spectral radiation from luminous gas-cap stagnation region to determine driver gas in test section of hypersonic shock tunnel
19 p3294 A69-35753

Miniature transducer to measure low transient pressures on models in rarefied shock tunnel flows, emphasizing mechanical vibration, convective heating and miniaturization
22 p3950 A69-41227

Uniform flow and wall boundary layer growth measurement in conical nozzle of reflected shock tunnel operating at high enthalpy conditions
24 p4247 A69-43575

SHOCK WAVE ATTENUATION

MHD shock wave decay in one dimensional unsteady flow of ideal inviscid perfectly conducting compressible fluid subjected to transverse magnetic field
05 p0806 A69-16736

Shadowgraph cinematography technique for testing attenuating influence of symmetrical diaphragm system on shock wave
12 p2088 A69-26184

Hypervelocity shock wave propagation in rarefied gas, observing anomalous wave attenuation
14 p2433 A69-29846

Attenuation of small perturbations in shape of plane shock wave propagating into uniform medium in presence of rigid or interfacial boundaries
15 p2592 A69-31145

Shock attenuation and equation of state of polyurethane based on aquarium technique and free surface velocity measurement
16 p2828 A69-31810

Shock wave structure dissipation in gaseous medium with microscopic particle velocities asymptotically approaching light velocity
17 p2958 A69-34145

Shock waves attenuation through multiple reflections at ends and interactions with expansion wave in shock tube by pressure transducer, noting exponential decay
18 p3121 A69-34475

Coordinate perturbation and second order solution for early collapse phases of cylindrical or spherical detonation wave in equimolar acetylene-oxygen mixture
19 p3449 A69-36354

Perturbation solution in power and asymptotic series for initial collapse phases of impulsively generated converging cylindrical and spherical shock waves in perfect gas
21 p3692 A69-38688

Electromagnetic wave propagation in nonlinear media, considering evolution and decay of electromagnetic shocks
21 p3697 A69-39670

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode
22 p3929 A69-40112

SHOCK WAVE CONTROL

Sonic boom reduction devices, discussing supersonic electroaerodynamic flow with shock waves, gas discharge one dimensional continuum analysis, power expenditure and aerodynamic interaction [AIAA PAPER 69-38]
06 p0869 A69-18150

Gage for measurement of density variation between expansion chamber and driver gas of valve driven shock tube
10 p1673 A69-23342

SHOCK WAVE GENERATORS

NT MAGNETIC ANNULAR SHOCK TUBES

Unsteady flow in blade passage of partial admission turbine for high energy fluids, predicting shock wave formation at entrance using one dimensional theory [ASME PAPER 68-FE-25]
05 p0698 A69-16075

Apparatus for generating HF shock fronted pressure waves in resonant tube
06 p0906 A69-17149

Shock formation in supersonic plasma flow guided by magnetic channel up to magnetic barrier
06 p0966 A69-17524

Kinetic theory for weak shock generation by impulsive piston, using Fourier and Laplace transforms to solve BGK equation
08 p1304 A69-20783

Energy characteristics of exploding wires considered as shock wave source
09 p1539 A69-21560

Shock ignition procedure to keep pyrotechnic composition in optimum condition in space environment, describing test layouts and theory
10 p1749 A69-23007

MHD power plant research and development, discussing shock wave electric power generators and modulated systems
11 p1925 A69-24469

MHD generator design using shock wave kinetic energy produced by explosion in shock tube with superconducting magnetic system
14 p2393 A69-28911

Detached MHD shock wave formation in front of magnetic field acting as piston moving collisionless plasma, discussing time dependence, Alfvén speed and plasma parameters
14 p2502 A69-29958

Detonation wave in gaseous media, current theories on wave initiation, structure and propagation
19 p3452 A69-36370

Electromagnetic piston produced shock wave interaction with detonation wave, producing overdriven detonations
20 p3631 A69-37209

Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices

21 p3776 A69-38708

Collisional shocks in inverse pinch MHD shock producing device, discussing position in current sheet and effect on conductivity and diffusion

21 p3776 A69-38709

SHOCK WAVE INTERACTION

Pulsating magnetic white dwarfs as pulsar models, discussing radio emission mechanisms via shock wave interaction with stellar plasma atmosphere

01 p0149 A69-10269

Plane shock wave interaction with elastic shallow spherical shell in compressible fluid, formulating equations of motion

02 p0339 A69-11977

Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime

[AIAA PAPER 68-2]

02 p0189 A69-12520

Shock waves collision with supersonically moving axisymmetric slender bodies analyzed by integral transform method, noting application to shock-shock interaction

03 p0413 A69-13010

Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number

03 p0414 A69-13137

Stokes-like region around yawed needle in hypersonic strong interaction regime, discussing asymptotic analysis under Stewartson conditions

04 p0542 A69-14732

Rarefied hypersonic flow model for sharp flat plate in strong interaction regimes, discussing inviscid and viscous shock and merged layers subregions

04 p0589 A69-14747

Shock wave produced polarization effects in dielectrics, noting reflected shock waves and experimental results for polymethyl methacrylate and carbon tetrachloride

04 p0589 A69-14988

Dynamic compatibility conditions for shock wave collision with material discontinuity surface and for superposing two shock waves propagating in opposite directions

05 p0745 A69-15867

Weak shock wave diffraction at two dimensional obstacles, discussing time behavior of pressure distribution

05 p0746 A69-16018

Shock wave-boundary layer interaction configurations for hypersonic propulsion device inlets under transitional and turbulent conditions, noting heat transfer rate

[AIAA PAPER 69-8]

06 p0915 A69-18172

Shock wave in two dimensional mixed transonic airfoil flows, discussing initial value problem for flow downstream of shock

[AIAA PAPER 69-43]

06 p0915 A69-18180

Arc phenomena and gas dynamic effects during shock heated plasma interaction with magnetic field

07 p1188 A69-18273

Interaction between shock wave and magnetic field of current carrying grid for ideal gas with constant coefficients, discussing dissipation, ionization and Joule heat

07 p1120 A69-18998

Shock-like solutions of electrostatic Vlasov and Poisson equations, assuming zero temperature of positive ions and increasing electrostatic potential

08 p1359 A69-19982

Flow behind shock front propagating along viscous fluid film surface, noting shock intensities as related to detonation velocities, using schlieren photographs

08 p1303 A69-20326

Stationary shock wave formation onset in Meyer-Prandtl flow, obtaining Marchal number for plane flow

09 p1429 A69-21688

Nonequilibrium electron heating effect on inert gas plasma conductivity during shock wave movement across magnetic field

10 p1737 A69-23470

Viscous effects of wall boundary layer behind primary shock wave on flow in shock tube, noting pressure and temperature changes

11 p1870 A69-25010

Fluid mechanics shock wave interaction with turbulent boundary layers at transonic to high supersonic speed ranges, noting examples in aviation

11 p1871 A69-25018

Sound field generation by isotropic turbulence through finite strength shock, estimating acoustic energy flux from supersonic jet containing shock waves

11 p1872 A69-25130

Diffraction accompanying reflection of plane shock wave obliquely impinging on walls of obtuse wedge at finite incidence, considering Lighthill method

11 p1873 A69-25135

Nonuniform flowfield from supersonic penetration of plane shock by three dimensional pointed planar wing, using integral transform method to study field perturbation pressure

13 p2199 A69-27323

Suction effects on shockwave-turbulent boundary layer interactions at compression corner leading to reductions in upstream influence

13 p2244 A69-27326

Compression forces during interaction of colliding shock waves in compressible fluid medium, discussing linear and nonlinear problems

13 p2246 A69-27523

Reservoir conditions of reflected shock wind tunnel by subjecting gas to direct shock and shock reflected at closed downstream end of shock tube

13 p2243 A69-28359

Flow structure in conical shock wave-sharp flat plate interaction zone in supersonic flow, noting turbulent boundary layer before separation

14 p2428 A69-28897

Shock wave and blunt faced cylinder interaction in supersonic gas flow in two chamber shock tube observed with high speed photography

14 p2390 A69-29467

Plane shock wave interaction with elastic shallow shell in compressible fluid, formulating equations of motion

15 p2704 A69-30262

Electron concentration and mass density behind reflected shock in ionizing argon, using time resolved two wavelength interferometry

16 p2771 A69-31918

Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects

[AIAA PAPER 69-450]

16 p2773 A69-32754

Separated flow patterns in base flow at body recesses, emphasizing shock wave boundary layer interaction, laminar flow and flow in front of recess

17 p2949 A69-33124

Plane shock wave interaction with plane rigid netlike wall, obtaining Mach numbers for reflected and penetrating shock waves

17 p2957 A69-33719

Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines

17 p3040 A69-33801

Collisionless shock waves in plasma and ion and electron turbulent heating in high voltage theta pinches, noting magnetic disturbance

17 p3013 A69-33825

Reflected shock and boundary layer interaction in shock tube, discussing bifurcation effect on flow and turbulence transition

18 p3116 A69-34448

Reflected shock front interaction with heated thin gaseous filament studied in shock tube by spark interferometric and schlieren technique

18 p3228 A69-34468

Shock waves attenuation through multiple reflections at ends and interactions with expansion wave in shock tube by pressure transducer, noting exponential decay

18 p3121 A69-34475

Free jet shock wave structure penetrated by surrounding pure gas molecules

18 p3086 A69-34819

Laminar separation in incompressible fluid flowing past bluff body at high Reynolds number, investigating shock wave interaction with laminar boundary layers

18 p3122 A69-34918

Vibrational deexcitation shocks in expanding nonequilibrium nozzle flows extended to include embedded adiabatic shock

18 p3089 A69-35386

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography

19 p3450 A69-36361

Shock waves Mach reflection at various velocities in real gases, observing temperature and pressure distributions, double reflections, effects of internal degrees of freedom excitation, etc

19 p3450 A69-36363

Transverse and longitudinal velocity components of detonation waves in stoichiometric hydrogen-oxygen propagating in fundamental mode in square section tube

19 p3451 A69-36367

Finite chemical reaction rate detonation wave interaction with rarefaction wave, noting mixture activation energy and heating power influence

19 p3298 A69-36384

Lateral and head-on interactions between plane shock wave and supersonic wedge, showing solution dependent on apex angle and incident flow Mach number

19 p3239 A69-36398

Gas ionizing shock waves structure in arbitrary magnetic field, considering greater magnetic viscosity than dissipative coefficients

19 p3381 A69-36773

Three dimensional velocity field disturbed by shock wave traveling across slender wing at supersonic speed

19 p3242 A69-36797

Electromagnetic piston produced shock wave interaction with detonation wave, producing overdriven detonations

20 p3631 A69-37209

Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves

20 p3582 A69-38242

Perturbation solution in power and asymptotic series for initial collapse phases of impulsively generated converging cylindrical and spherical shock waves in perfect gas

21 p3692 A69-38688

Thermal dissociation of chlorine trifluoride behind incident shock waves as function of temperature using UV absorption spectroscopy

21 p3670 A69-39739

Shock wave effect on ionization of detonation waves in propane-O mixtures producing stable high velocity plasma, measured by double probe method

21 p3853 A69-39745

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons

22 p4009 A69-39984

Jadeite /high pressure sodium aluminum pyroxene/ shock-induced phase assemblage from oligoclase, noting relevance to lunar rock samples investigation

22 p3941 A69-40569

Transient flow resulting from plane shock diffraction by analytic blunt body, basing analysis on Taylor series expansions in space and time variables

22 p3860 A69-40895

Strong interaction between hypersonic boundary layer over flat plate and associated inviscid flow, discussing heating and vorticity effects, boundary layer edge, etc

22 p3860 A69-40896

Initial pressure rise and consequent laminar boundary layer separation during interaction with shock wave

23 p4151 A69-41691

Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates

[AIAA PAPER 68-720]

23 p4059 A69-41886

Pressure measurement modifications of quasi-steady flow model for interaction between reflected shock wave and laminar boundary layer in shock tube

23 p4148 A69-41903

Supersonic aircraft sonic bangs loudness level calculations by model waveforms with allowance for interaction between incident and ground reflected shock waves

23 p4063 A69-42454

Shock wave/boundary layer interaction calculation methods circumventing simultaneous large longitudinal and transverse pressure gradients and viscous effects

24 p4243 A69-42582

Magnetic and electron temperature interaction effects in fast MHD shock waves in slightly ionized plasma

24 p4356 A69-43361

Hypersonic viscous interaction, studying axisymmetric flow over slender sharp nose cones at zero angle of attack and three dimensional flow over sharp flat plate

24 p4248 A69-43579

Strong shock and Mach waves interaction generated downstream of thick wedge body shock in unsteady hypersonic and supersonic flows

24 p4306 A69-43674

SHOCK WAVE LUMINESCENCE

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves

02 p0189 A69-12182

Spectral brightness temperature of shock waves in air measured at 220-800 nm, obtaining 9-14 km/sec shock waves by detonating explosives

11 p1877 A69-25755

High speed photographic study of plasma luminescence front and charged particle concentration front counter to electrodynamic force in crossed electric and magnetic fields

12 p2141 A69-27130

Br molecular dissociation rate in argon excess determined, considering visible emission intensity behind shock front

18 p3176 A69-34465

Precursor electrons due to photoionization ahead of pressure driven shock waves, presenting electron temperature and density theoretical analysis

20 p3511 A69-38238

SHOCK WAVE PROFILES

Pressure and shock shape determination for plane supersonic and low hypersonic flows past aerodynamic profiles

01 p0008 A69-11299

Schematic chart prepared for shock wave geometry of Tungusk meteorite, discussing tree felling

01 p0159 A69-11379

Detonation wave structure in solid cylindrical shell explosive, noting attainment of steady state structure

02 p0349 A69-11526

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves

02 p0189 A69-12182

Two dimensional diffuse shock waves in carbon dioxide, noting effect of shock curvature equivalence to thickness

02 p0233 A69-12534

Trimodal solutions for strong shock structure in gas of spherocylindrical molecules

03 p0414 A69-13136

Parameter changes of diatomic gas behind direct shock wave with simultaneous oscillatory and dissociative relaxation

03 p0418 A69-13835

Spherical shock wave propagation in polytrope with poloidal magnetic field, noting application to shock waves in magnetic stars

04 p0664 A69-15438

Shock wave profiles in expansion flows determined with static and impact pressure probes, investigating pressure gradient effects

06 p0908 A69-17022

Collisionless shock waves in rarefied plasma, discussing dispersion effect and oscillatory shock wave structure

08 p1303 A69-19996

Multibeam Fabry-Perot interferometers for aerodynamics measurements of rarefied gas flows, determining density distribution, shape, structure and detachment of shock waves

08 p1314 A69-20385

Monograph on shock wave structure in binary gas mixtures covering gas kinetics and shock tube measurements of heavy component density distribution

08 p1304 A69-20711

Supersonic jet impingement on flat plate, showing shock wave profiles and slipstream surface at stations parallel to nozzle axis

08 p1252 A69-20841

Bow shock wave position and shape in rectilinear flight with constant acceleration

09 p1433 A69-21386

Shock wave structure problems in plasma, including plasma particles random motion in term representing electric field

09 p1551 A69-22032

Switch-on ionizing shock waves structure, analyzing condition of downstream state and effect on hydromagnetic wave speed

09 p1552 A69-22045

Hypersonic drag and shock wave characteristics of blunt bodies including cones, spherical nose and concave nose bodies

09 p1433 A69-22568

Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm

10 p1680 A69-23894

Type 2 radio burst dynamic spectra determination for finding shock wave and magnetic field parameters above active corona region

11 p1945 A69-24243

Kinetic theories applied to shock wave structure study of monatomic gas

11 p1870 A69-25007

Motion equations for ideal transonic gas flow, applying solutions to flow with incident shock waves of various profiles

11 p1820 A69-25468

Supersonic gas flow past plane and axisymmetric bodies with broken generatrix, determining tangential discontinuities and shock waves shape and position

11 p1820 A69-25470

Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity

12 p2061 A69-25888

Bhatnagar-Gross-Krook model for plane shock structure, considering moment and least squares methods and shock density gradient error analysis

12 p2063 A69-27112

Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation

13 p2244 A69-27327

Shock wave gas flow density behind shock tube calculated by shadows measurements using interferometric techniques

13 p2245 A69-27384

High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses [AIAA PAPER 69-360]

13 p2283 A69-28293

Minimum error criteria for shock wave structure determined by applying Mott-Smith distribution to Boltzmann equations for rigid sphere gas

14 p2431 A69-29579

MHD quantities in linear wave and small intensity shock wave dissipation and structure determinable by right and left eigenvectors of matrix MHD flow equation

14 p2500 A69-29902

Supersonic flow past cone in presence of blowing normal to cone surface, calculating flow field parameters behind conical shock wave

15 p2548 A69-31175

Trailing shock wave position in air breathing jet engine channels, determining supersonic-subsonic boundary, noting Mach number effects on pressure ratio

16 p2768 A69-31743

Mach reflection shock-shock locus in shock tube implosions generation by area change

16 p2766 A69-31919

Shock polar equation in polar coordinates, showing shock polar shape dependence on Mach number

16 p2772 A69-32178

Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision

18 p3120 A69-34457

Shock wave profiles in molecular N-H gas mixtures in shock tube measured by optical electron beam method, noting disagreement with Navier-Stokes calculations

18 p3134 A69-34458

Streak photographs by differential interferometer to study head wave standoff in shock tubes as function of time

18 p3085 A69-34473

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial

18 p3124 A69-35170

Nonequilibrium behavior of shock standoff distance ahead of spheres at low supersonic Mach number

18 p3089 A69-35385

Computer program for numerical integration of chemical reaction rate equations behind steady state hydrogen-oxygen shock wave

19 p3451 A69-36366

Shock and detonation waves refraction due to small disturbances in medium, noting causes of wave cellular structure

19 p3451 A69-36369

Pure gas suction through free jet shock structure, analyzing aerodynamic effect of molecular separation

19 p3240 A69-36650

Pade method applied in aerodynamics for determining detached shock wave shapes and shock waves attached at vertex of cone

19 p3241 A69-36778

Global properties of solution of inverse detached shock problem analyzed by characteristic coordinates at low Mach number

19 p3301 A69-36788

Shock wave parameters from meteoric body moving at high supersonic speeds through atmosphere, calculating specific heat ratio

19 p3428 A69-36841

Weak shock wave structure in temperature relaxation media determined using theory of sound absorption in fluids

19 p3301 A69-36842

Shock structure in two dimensional or axisymmetric jet flows under transverse impingement by low energy jets [ASME PAPER 69-FLCS-41]

20 p3515 A69-37975

Windward shock angle parameters on yawed cones correlated in single variable for hypersonic flow

23 p4060 A69-41918

Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions

23 p4222 A69-42394

One dimensional shock waves and acceleration fronts in nonlinear isotropic viscoelastic materials using constitutive equations

23 p4235 A69-42463

Class of one dimensional nonlinear waves and shock structure reduced to steady flows in radiation gas dynamics

23 p4240 A69-42466

Rarefied gas one dimensional transverse motions consistent with Boltzmann kinetic equation, solving integrodifferential equations for shock wave structure

24 p4351 A69-43491

SHOCK WAVE PROPAGATION

Two dimensional diffuse shock waves in carbon dioxide, noting effect of shock curvature equivalence to thickness

02 p0233 A69-12534

Propagation of detonation wave in tube containing single stream of diethylcyclohexane droplets dispersed in gaseous oxygen

03 p0415 A69-13139

Shock wave produced polarization effects in dielectrics, noting reflected shock waves and experimental results for polymethyl methacrylate and carbon tetrachloride

04 p0589 A69-14988

Spherical shock wave propagation in polytrope with poloidal magnetic field, noting application to shock waves in magnetic stars

04 p0664 A69-15438

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion

05 p0801 A69-15787

Dynamic compatibility conditions for shock wave collision with material discontinuity surface and for superposing two shock waves propagating in opposite directions

05 p0745 A69-15867

Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states

05 p0745 A69-15890

Equations describing chemical kinetics and conservation law derived for ionization relaxation processes behind shock wave front in air

05 p0746 A69-15891

Shock tube investigation of formation and flow characteristics of impulsively generated vortex street recorded interferometrically, using high speed framing camera [ASME PAPER 68-FE-32]

05 p0748 A69-16079

Oblique shock wave propagation through two dimensional steady nonuniform incoming flow, discussing higher order theory via irrotational or rotational disturbances of arbitrary amplitude [AIAA PAPER 69-39]

06 p0913 A69-18103

Collisionless shock waves in high beta plasmas and in cold plasmas

07 p1194 A69-19366

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity

08 p1420 A69-19882

Spectroscopic analysis of hydrogen spark plasma discharge parameters at small PD values, discussing shock wave initiation accounting for transition to quasi-stable phases

08 p1360 A69-20100

Flow behind shock front propagating along viscous fluid film surface, noting shock intensities as related to detonation velocities, using schlieren photographs
08 p1303 A69-20326

Displacement effect due to subsonic reaction heat front behind shock wave in two dimensional supersonic flows
08 p1252 A69-20691

Laser produced blast wave expansion measured by microwave technique, obtaining surface temperature and electron density
09 p1514 A69-21324

Boundary layer at tube wall behind shock wave propagating in gas-vapor mixture, analyzing condensation rate
09 p1480 A69-21591

High velocity gas stream induced shattering of liquid drops, disintegration rate and breakup time
[AIAA PAPER 68-83] 09 p1482 A69-21947

Nonuniform propagation of imploding shock waves by extending self similar solution to earlier times in implosion process when shock strength is finite
10 p1678 A69-22931

Converging cylindrical shock waves produced by discharging condenser bank into single turn coil surrounding gas container /theta pinch discharge/
10 p1678 A69-22933

Invariant finite amplitude spherical shock wave propagation in medium with inversely radial density
10 p1778 A69-23405

Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow
11 p1961 A69-25106

Model for shock propagation from point energy source into cold atmosphere with exponential density variation
11 p1871 A69-25123

Electric field measurements for turbulence in collision-free shocks, noting power spectra of magnetic and electric fluctuations and electron density
11 p1930 A69-25276

Kinetics of air plasma formation in wake of shock wave propagating in air, taking into account nonequilibrium ionization
12 p2062 A69-26674

Nonequilibrium radiation from first negative band of molecular nitrogen ion excited by shock wave electron impact
13 p2245 A69-27380

Speed of sound and shock waves in two phase flows of liquid metal MHD generators, considering droplets uniformly dispersed in gaseous phase
13 p2245 A69-27475

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials
13 p2368 A69-28346

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation
13 p2250 A69-28447

Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time
14 p2391 A69-29622

Shock wave velocity and gas flow parameters in shock tube with noninstantaneously opening diaphragm calculated by method of characteristics
14 p2432 A69-29623

Shock development in electrothermal shock tube with performance simulation of mechanical shock tube with hot driver but turbulent or unstable driver-shock interface
14 p2427 A69-29768

Hypervelocity shock wave propagation in rarefied gas, observing anomalous wave attenuation
14 p2433 A69-29846

MHD interaction between plasma and transverse magnetic field in shock tube, noting unsteady shock wave propagation in interaction zone
14 p2501 A69-29919

Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening
15 p2657 A69-30104

Hydromagnetic fast shock strength and direction in inhomogeneous gravitational atmosphere with uniform magnetic field, discussing heating in solar corona
15 p2680 A69-30202

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Unsteady nonadiabatic shock waves in stellar gas dynamics, analyzing energy losses due to ionization at shock fronts by extended Chiznell-Wisem method
15 p2682 A69-30508

Pressure, temperature, density and enthalpy of carbon dioxide behind primary and reflected shock waves determined by method suitable for computer
15 p2592 A69-31054

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges
15 p2593 A69-31161

Shock waves from accelerated, decelerated and stationary axisymmetric bodies flying at supersonic velocities in stratified isothermal atmosphere
15 p2551 A69-31171

Conditions behind incident and reflected shock waves in shock tube calculated from initial pressure, density, temperature and shock speed
15 p2593 A69-31487

Shock wave growth or decay in atmospheres with density and temperature variation using singular surface theory
16 p2768 A69-31663

Compression waves observed ahead of luminous discharge plasma below Mach 12-15 in electric shock tube, describing shock structure by blast wave theory
16 p2768 A69-31664

N wave propagation across nonuniform medium described by cloud or front layer, using geometrical optics
16 p2812 A69-31924

Numerical simulation of flare generated shock wave propagation through solar wind, noting transit time and shock strength agreement with observations
16 p2848 A69-31970

Transmission of Alfvén waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification
16 p2777 A69-32099

Shock wave propagation in isothermal atmosphere, discussing radiation and ionization effects on thermal jump
16 p2858 A69-32207

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection
[AIAA PAPER 69-559] 16 p2880 A69-32740

Supersonic blowdown wind tunnel noting cylindrical diffusers efficiency in starting supersonic nozzles increased in proportion to Mach number
17 p2890 A69-33125

Shock waves propagation in inhomogeneous gases, considering time development and energy flux during point explosion in plane layers by quasi-stationary approximation
17 p2952 A69-33383

Gas and small particle diffusion in turbulent boundary layer of blast wave propagating over land or water, assuming logarithmic vertical velocity profile
[AIAA PAPER 69-672] 17 p2953 A69-33439

Laboratory plasma produced by electromagnetically generated shock front propagation through unionized hydrogen
[AIAA PAPER 69-693] 17 p2945 A69-33447

Flow field pressure distribution due to plane shock wave impinging by thin wing moving in opposite direction, discussing mathematical formulation, analytic solution and applications
[AIAA PAPER 69-647] 17 p2891 A69-33459

Collisionless shock wave generation and structure in zeta and theta pinches
17 p3013 A69-33819

Energy dissipation in collisionless shock waves generated in plasmas with 1-500 trillion/cm electron density by theta pinch, measuring axial ionic energy spectrum
17 p3013 A69-33820

Oblique hydromagnetic shock waves in magnetized hydrogen plasma enclosed in pyrex chamber by oscillatory zeta discharge, probing for front development and structure
17 p3013 A69-33823

Red dwarf star YZ CMi corona structure showing possible estimation of additional carried energy by shock waves after flare
17 p3043 A69-34166

Shock wave propagation in two types of electromagnetically driven shock tubes, describing probe for shock front velocity measurement
18 p3119 A69-34260

Shock wave propagation induced by nonuniform instantaneous internal heating of nonlinear elastic strain hardening solid material
[SAWE PAPER 69-APM-17]

18 p3214 A69-34393

Plane shock wave propagation around cylinders of various radii recorded with shadowgrams and Mach-Zehnder interferograms, discussing wave diffraction mechanics
18 p3120 A69-34472

Rereflected shock waves behind tapered shock tube section indicated by shock wave detectors, microwave absorption and optical emission measurements
18 p3085 A69-34474

Gas velocity variations in ionizing shock wave propagating along magnetic field applied to conducting piston motion
18 p3181 A69-35038

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
18 p3124 A69-35326

Shock wave propagation through collisionless magnetized plasma, using gun driven, laser and cesium plasma flow methods
19 p3379 A69-35759

Detonation wave in gaseous media, current theories on wave initiation, structure and propagation
19 p3452 A69-36370

Gas motion behind cylindrical shock wave created by piston motion in gravitating medium
19 p3298 A69-36386

Jet and Mach disk density measured by fluorescence electron beam technique, calculating Mach disk thickness from density profiles
19 p3239 A69-36396

Hugoniot prediction for shock moving along longitudinal direction of unidirectional fiber reinforced composite
20 p3627 A69-37768

Soviet book on shock waves propagated by meteorite intrusion into earth atmosphere, covering interaction with earth surface, Tunguska meteorite, etc
20 p3613 A69-38205

Precursors ahead of pressure driven shock waves in Ar, considering electron diffusion, temperature a density
20 p3518 A69-38237

Normal ionizing shock waves in H, analyzing shock velocities as function of drive magnetic field using Chapman-Jouguet hypothesis
21 p3691 A69-38332

Schlieren framing photography used for studying shock wave hydrodynamic structure and ignition dynamics during expansion into detonable gas region
21 p3849 A69-38803

Shock front reaction and detonation initiation in low density ammonium perchlorate
21 p3784 A69-39590

Equation of state measurements of earth materials by shock wave techniques, applying to olivine for earth mantle constitution problem
22 p3937 A69-40188

Shock wave detachment distance in front of spheres and cylinders in hypersonic flow, using magnetic shock tubes and Mach 5 and 18 wind tunnels
22 p3931 A69-40710

Adiabatic plane ideal gas flow past airfoil, studying shock waves propagation effect on dynamic behavior
22 p3861 A69-41024

Unsteady combustion wave passage through inert obstacle in gunpowder in N filled pressure vessel
22 p4051 A69-41119

Ionizing shock wave propagation and reflection in transverse magnetic field based on MHD theory, assuming gas thermal equilibrium
22 p3992 A69-41176

Reaction zone following overdriven detonation wave propagating into mixtures of fluorine oxide and hydrogen molecules showing HF laser emission
22 p4052 A69-41188

Detonation driven shocks of high Mach number obtained in improved membrane shock tube by heating and compressing driver gas
23 p4198 A69-41545

Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions
23 p4222 A69-42394

Shock wave transient motion during passage through ducts in inviscid gas containing convergences, using characteristics method
23 p4153 A69-42398

Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
24 p4302 A69-43367

Tube diameter effects on shock front propagation, observing front formation process with schlieren method

24 p4297 A69-43630

Light scattering from ruby laser beam passing through collisionless shock produced by H plasma compression measured by photomultiplier

24 p4360 A69-43748

SHOCK WAVES

NT DETONATION WAVES

NT MACH CONES

NT NORMAL SHOCK WAVES

NT OBLIQUE SHOCK WAVES

NT RIEMANN WAVES

NT SONIC BOOMS

Circular, cylindrical thin walled shell dynamic response to moving shock solved by Flugge equations in series form

01 p0164 A69-10057

Simple and shock waves in nonlinear unsteady heat and mass transfer, discussing conditions for transforming simple waves into shock waves

01 p0174 A69-10096

Three dimensional flow at large distance and in front of shock wave for three dimensional body traveling at sonic velocity

01 p0005 A69-10159

Sonic flow at large distance and behind shock wave for axisymmetric body of revolution of finite dimensions in inviscid fluid

01 p0058 A69-10160

Molecular velocity distribution function in nonequilibrium flows, detailing asymptotic expansions in different velocity domains for weak shock

01 p0059 A69-10330

Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front

01 p0152 A69-10579

Structure of shock waves from MHD jet injected into zero viscosity, finite thermal and electrical conductivity medium analyzed by nonlinear differential equation system

01 p0130 A69-10774

Vibrational relaxation of diatomic gases behind shock waves, with variable heat bath temperature extended to constant enthalpy and constant total enthalpy conditions

01 p0061 A69-11204

Shock reflection structure in ionizing xenon determined by fast rise pressure gauge mounted in shock tube end wall

01 p0132 A69-11205

Detonation generation in granular explosive subject to different shock wave intensities due to variable impact velocity

02 p0349 A69-11527

Swirl flow through single and multistage Carnot shock diffuser, analyzing relation of pressure rise and diffuser aspect ratio

02 p0230 A69-11616

Hydraulic analogy for shock and expansion waves arising in supersonic compressors due to three dimensionality of flow [ONERA-TP-598]

02 p0187 A69-11621

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer

02 p0188 A69-11651

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front

02 p0241 A69-11729

Equations, tables and charts for shock drag parameter in determination of shock wave drag of body in supersonic free stream of ideal gas

02 p0188 A69-11862

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves

02 p0230 A69-11979

Vela 3A and Explorer 33 elapsed time observations of earth bow shock

02 p0244 A69-12299

Initiation of detonation by incident shock waves in hydrogen-oxygen-argon mixtures

02 p0304 A69-12313

Fuel films ignition behind shock waves in air and oxygen

02 p0353 A69-12317

Quantitative determination of reentry shock precursor absorption level and effect on surface radiation

heating, calculating radiative flux from shock layer enthalpy distribution

02 p0354 A69-12528

Hypersonic flow past delta wings with attached shock wave, analysis leads to determination of closed flow pattern

02 p0191 A69-12577

Lighthill method based expressions derived for discontinuity shape formed during shock wave diffraction near small angle

02 p0234 A69-12588

Velocity measurement and flow pattern determination of plane shock waves during passage through channel diaphragm

02 p0234 A69-12589

Nonlinear weak shock wave diffraction around convex angled corners in polytropic inviscid thermally nonconducting gas

03 p0412 A69-12848

Velocity field generated by shock wave incident on slender symmetrical body resting in infinite compressible medium

03 p0362 A69-13418

Solar wind interaction with moon, discussing core/surface layer conductivity and lunar limb shock wave formation

03 p0502 A69-14006

Nozzle geometry influence on argon plasma flow parameters in shock tube, discussing measurement data behind shock wave front

03 p0481 A69-14160

Explosive detonated in external electric field to obtain data on gas state behind shock wave

04 p0634 A69-14430

Structures response to explosive blast, discussing damage criterion in terms of blast wave impulse and critical time

04 p0671 A69-14476

Book on transonic aerodynamics, emphasizing two dimensional and three dimensional problems involving transonic flow about airfoils with and without shocks

04 p0541 A69-14580

Numerical algorithm for supersonic gas flow past blunt bodies with shock wave separation, using Dorodnitsyn method of integral correlation

04 p0587 A69-14621

One-dimensional self similar motion of relaxing gas, noting ODEs of process and gas dynamic parameters of flow field

04 p0588 A69-14623

Detection of electric field turbulence in earth bow shock, noting wave amplitude correlation with magnetic field structure

04 p0592 A69-14681

Soviet book on shock waves in real gases covering gas flow patterns in shock tube, perturbations, shock and detonation wave reflection, etc

04 p0589 A69-14937

Collapsing cylindrical ionizing shock in axial magnetic field, solving governing equations numerically

04 p0637 A69-15049

Transverse ionizing MHD shock waves, discussing jump conditions with magnetic field in shock plane

04 p0637 A69-15052

Magnetic lines curvature behind pseudostationary hydromagnetic shock determined, assuming parallel magnetic field and velocity vectors

04 p0638 A69-15092

Adiabatic motion of hydromagnetic fluid behind spherical fast shock wave for Parker solar wind model

04 p0660 A69-15126

Mountain structures surrounding lunar craters, discussing possible origin by impacting planetesimals shock waves

04 p0661 A69-15142

Wind turbulence measurement by shock wave tracking using Doppler radar, stressing relative location of antenna and sound source

04 p0628 A69-15149

Variable energy blast waves analysis with reference to cylindrical spark channel formation, noting shock front velocity approximation

04 p0590 A69-15203

Steady plane supersonic gas flows with large number of shocks computed on basis of weak solutions of hyperbolic system

04 p0544 A69-15284

Shock wave damping at large distances from body situated in ideal gas three dimensional flow

04 p0591 A69-15535

Energetic electrons of terrestrial origin behind bow shock and upstream in solar wind

05 p0815 A69-16253

Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave

05 p0752 A69-16688

Numerical calculation of density profiles of shock waves in expansion flows

06 p0908 A69-17021

Plasma physics in space research, discussing solar wind, planetary atmosphere bow shock and convective motions of magnetosphere plasma [ISAS-431]

06 p1000 A69-17026

Thickness of resistivity controlled hydromagnetic shock wave, using classical one fluid equations and generalized Ohm law

06 p0970 A69-17956

Gasdynamic flow shock wave phenomena during exploding wire dwell time inside metal vapor cylinder, noting effect on reignition

07 p1188 A69-18275

Thermal dissociation of chlorine trifluoride behind incident shock waves at high temperature, discussing bimolecular reaction rate constant [WSCI PAPER 68-40]

07 p1202 A69-18355

Electric signals by shock and detonation waves, describing detection technique [WSCI PAPER 68-44]

07 p1240 A69-18360

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma

07 p1190 A69-18692

Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure

07 p1190 A69-18695

Nonstationary flow past spheres and cylinders in electromagnetic shock tube, determining time required for flow to become stationary

07 p1119 A69-18744

Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas

07 p1050 A69-18755

High electron-proton temperature ratios effect on solar wind double shock wave structure, using one dimensional and two fluid models

07 p1205 A69-18849

Shock waves internal structure in perfect monatomic gases, discussing density distribution in shock layer experimental measurement

07 p1120 A69-18930

Jump conditions across MHD shock waves, reducing relations to identities applicable to nonequilibrium situations

07 p1193 A69-19242

Solar wind, bow shock and magnetosheath observations by charged particle analyzers on Vela satellites

07 p1208 A69-19361

Magnetopause, magnetosheath, bow shock and adjoining interplanetary domain study by IMP-1 satellite, discussing macroscopic plasma variables and fluid model for solar wind

07 p1129 A69-19374

Shock waveforms lengthening due to propagation to high altitudes derived from computed numerical values, studying N waves from SST

07 p1054 A69-19463

Plane radiative shock wave propagation in homogeneous medium noting heating ahead and cooling behind shock front

08 p1302 A69-19798

Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers

08 p1360 A69-19988

Vibrational relaxation effects on laminar boundary layer velocity profiles and temperature and on layer thicknesses and wall heat flow downstream of shock wave

08 p1303 A69-20269

Monograph on kinetic study of fast gas reactions with shock waves covering thermal decomposition of nitrous oxide, hydrazine tetrafluoride and nitrogen tetrafluoride

08 p1304 A69-20707

Monograph on interferometric studies of unsteady shock waves in theta pinch driven shock tube, discussing flow characteristics in helium and hydrogen

08 p1304 A69-20710

Frozen shock in steady one dimensional compression flow of relaxing gases weaker than equilibrium shock

08 p1304 A69-20785

- Vorticity behind shock waves in conducting gases when magnetic field is tangential or normal to shock surface using momentum equation
08 p1367 A69-20789
- Two fluid kinetic model for analyzing shock wave structure in binary mixtures of monatomic inert gases, noting no overshoot in velocity profiles
08 p1304 A69-20813
- Bose condensation and shock waves in photon spectrum during scattering for equilibrium state of ionized plasma and radiation
09 p1546 A69-21574
- Singular shock waves formation during pulsed forward motion of conducting piston in MHD medium
09 p1551 A69-22034
- Solar moving type 4 burst emitting synchrotron radiation, noting electron acceleration in collisionless shock wave in corona
09 p1578 A69-22058
- Envelope shock waves transitions between modulated wave amplitude and frequency in dispersive medium with relaxing nonlinearity
09 p1483 A69-22660
- D type dissociation ionization front structure and associated shock fronts using quasi-steady flow approximation for Stromgren sphere development in interstellar molecular hydrogen cloud
10 p1772 A69-22858
- Analytical method for perturbations by spherical and cylindrical shock waves flowing toward common center
10 p1677 A69-22899
- Transverse magnetic field and shock strength effects on curvature ratio of attached shock waves and wedge
10 p1728 A69-23238
- Invariant transformation of equations for ideal gas plane steady motions, noting application to gas flows with shock waves and eddies
10 p1680 A69-23709
- Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
10 p1783 A69-23773
- Existence of motions of second type in explicit self similar strong shock solutions of Euler equations when velocity is linear function of coordinate
10 p1680 A69-23789
- Rotational discontinuity in plasma, noting behavior for particle reflection off front side or back side of MHD wave
11 p1923 A69-24293
- Angle of attack and Reynolds number effect on hypersonic flow past circular cone, obtaining shock wave shape
[ONERA-TP-692] 11 p1818 A69-24751
- Shock induced boundary layer flow establishment on semiinfinite flat plate, measuring heat transfer rates and transition to turbulence
11 p1869 A69-24890
- Vibrational relaxation frequency of asymmetric stretching mode of carbon dioxide determined by measuring rate of thermal emission in shock waves near 4.3 microns
11 p1922 A69-25128
- Electrical conductivity of air behind incident and reflected shock wave fronts as function of temperature and Mach numbers measured by electrode method
11 p1888 A69-25220
- Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity
11 p1873 A69-25226
- Space-time hypersurfaces representations of shock waves of relativistic MHD, discussing compressibility role in proving consistency with relativistic theory
11 p1928 A69-25246
- Unstable ion sound wave propagation across magnetic field in collisionless shock waves, noting drift instability
11 p1930 A69-25273
- Diffusion of ion-electron pairs produced by photoionization upstream of strong shock waves to shock tube walls based on particle flux and Poisson equations
11 p1866 A69-25275
- Solution of confluence in three dimensional shock and detonation polars for spinning detonation
11 p2002 A69-25353
- Shock wave structure in gas mixtures, discussing velocity and temperature undershoot and overshoot
11 p1874 A69-25356
- Current and voltage distribution around normal shock in MHD duct using conformal transformation, considering continuous and segmented electrode boundary conditions
11 p1931 A69-25359
- Gas velocity variation in ionizing shock waves arbitrarily oriented with respect to magnetic field, considering magnetic viscosity and conductive piston
11 p1935 A69-25740
- Spectral brightness temperature of shock waves in air measured at 220-800 nm, obtaining 9-14 km/sec shock waves by detonating explosives
11 p1877 A69-25755
- Rotating mirror streak cameras in quantitative measurements of extreme compressions by shock waves, analyzing spatial and temporal resolving power
12 p2084 A69-26151
- Gasdynamic stability of detonation shock wave in case of arbitrary heat evolution kinetics using detonation model
12 p2062 A69-26672
- Shock pulse criterion limitations and HF transients technique for design and tests of structures and components
12 p2182 A69-26731
- Spiral arms as wakes of gravitational shock waves arising at galactic nucleus boundary and propagating outward through interstellar gas
12 p2170 A69-27066
- Shock waves in solids, discussing gas gun firing and explosive detonating at specimen, transformations measurement and materials processing applications
13 p2360 A69-27341
- Vibrational energy exchange between diatomic molecules by IR emission of CO fundamental behind shock waves
13 p2301 A69-27361
- Monograph on gasdynamics and classical theory of shock waves covering viscosity, heat conduction, gas cloud expansion into vacuum, etc
13 p2246 A69-27639
- Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations
13 p2253 A69-27692
- Constant density heating upstream and constant pressure cooling downstream formulas for radiating shock waves
13 p2249 A69-28240
- Finite control volume approach to shock Hugoniot in unidirectional fiber reinforced composite, computing shear force along matrix-fiber interface
[AIAA PAPER 69-359] 13 p2366 A69-28292
- Enhanced plasma heating in absorption zone of laser-induced gas breakdown at spherical blast wave shock front
14 p2460 A69-29604
- Supersonic gas flow past wedge at zero angle of attack with separated shock wave, calculating velocity gradient at stagnation point and pressure and drag distribution
14 p2390 A69-29615
- Supersonic jet flow with separated shock wave flowing past infinite wedge using Chaplygin method, assuming negligible entropy variations
14 p2391 A69-29619
- Rate constants for recombination of atomic hydrogen with hydrogen molecules, hydrogen atoms and argon atoms at high temperatures behind shock waves
14 p2488 A69-29637
- Shock wave radiation screening by thermodynamically unstable gas, discussing brightness and gas temperature relative to shock wave front position
14 p2493 A69-29673
- Cosmic shock waves simulation through correlations between shock equations in classical and relativistic fluid dynamics, using shock tube tests
14 p2433 A69-29981
- Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media
15 p2590 A69-30103
- Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
15 p2561 A69-30264
- Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
15 p2709 A69-30749
- Ballistic wake structure and jump conditions for plane plasma shock waves with electrostatic turbulence
15 p2660 A69-30914
- Critical study of Tidman model for turbulent electrostatic shock wave structure in plasmas, noting velocity distribution function role
15 p2661 A69-30927
- Two phase flow mixing shocks, obtaining expressions for pressure and entropy changes, discussing shock stability and gas entrapment mechanism
16 p2768 A69-31589
- Initial ionization processes in strong shock wave in hydrogen, determining ionization relaxation length and cross section of atom-atom excitation collisions
16 p2815 A69-31590
- Similarity concepts extended to shock initiated fluid compression devices for magnetic flux concentration
16 p2768 A69-31665
- Q switched laser produced blast waves in low pressure Ar, discussing gas density and time dependence roles
16 p2796 A69-31705
- Photoinduced shock processes involving metastable hydrogen atoms and molecules, discussing vibrational and rotational levels
16 p2813 A69-31754
- Pressure behind spherically divergent shock wave produced by explosion of metal wire measured and compared with calculated values
16 p2769 A69-31837
- Perturbation solutions for planar cylindrical and spherical blast waves in air, considering third and fourth order approximations
16 p2770 A69-31900
- Pitot tubes diameter effect on pressure gradients during measurement through shock wave
16 p2771 A69-31927
- Bow shock wave during rectilinear flight with varying acceleration, describing sonic boom loop mechanism
16 p2734 A69-32005
- MHD of interstellar gas-dust medium, analyzing gas-dust flow and gas-dust shock waves in magnetic fields
16 p2823 A69-32590
- Shocks in gases, giving differential equation set for ideal gas behavior
17 p2948 A69-32845
- Axisymmetric supersonic gas flow with attached shock wave past cone, calculating flow parameters between body and shock wave
17 p2890 A69-33123
- Shock structure in RF heated partially ionized Ar plasma jet, using cylindrical free molecule Langmuir probe
[AIAA PAPER 69-697] 17 p3011 A69-33466
- Flow field study of merging between bow shock and viscous layer upstream of highly cooled axisymmetric blunt body in rarefied hypersonic stream
[AIAA PAPER 69-656] 17 p2893 A69-33498
- Collisionless shock wave structure in plasmas, noting plasma and shock wave generation mechanisms
17 p3013 A69-33822
- Leading edge vortices and shock detachment flow over delta wings, discussing drag reduction due to lift
17 p2896 A69-34025
- High temperature and short duration flows - Conference, Freiburg University, West Germany, April 1967
18 p3114 A69-34444
- Radiation cooling behind strong shock in Kr as function of plasma luminosity near end of relaxation zone
18 p3171 A69-34450
- Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock
18 p3176 A69-34452
- Shock wave studies of gaseous NO thermal ionization in Kr as function of temperature, using time-of-flight mass spectrometer
18 p3099 A69-34464
- Elastic circular cylindrical panel behavior in fluid with acoustic shock wave, allowing for propagation waviness of elastic stresses
18 p3216 A69-34579
- Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnant point, noting heat transfer
18 p3086 A69-34910
- Radiation effects produced by high temperatures of shock waves and nuclear explosion fireballs, air cooling, laser emission-matter interaction and optical phenomena
18 p3230 A69-34926
- Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite
18 p3199 A69-34941

Rotating static thrust propeller or hovering rotor flow field study by schlieren photography, considering vortex field, tip flow and shock wake formation
18 p3087 A69-35218

Cumulative shock waves in vaporized products of electrical explosion of conical copper wire configuration, discussing atmospheric ionized vortical configuration formation
19 p3372 A69-35823

Skimmer interaction influences on nozzle beam production explaining intensity maxima, proposing model assuming normal shock across skimmer mouth
19 p3238 A69-36172

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle
19 p3377 A69-36180

Flow velocity, flow Mach number and weak disturbance velocity behind shock wave measured for nitrogen, oxygen and carbon dioxide
19 p3298 A69-36362

Construction of single headed spin detonation polar as confluence of shock and deflagration waves by two dimensional hodograph
19 p3451 A69-36368

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection
19 p3298 A69-36385

Drag measurements for sharp and blunt-nosed bodies shot into wind tunnel supersonic gas counterflows, discussing shock waves for different configurations
19 p3239 A69-36401

Water jets with greater than half sound speed created by shock wave impinging on cavity within liquid, discussing mechanism, maximum speed, shape, etc
19 p3301 A69-36815

Mach reflection limiting parameters of conical shock wave in Plexiglas cylinders, showing head wave curvature radius linear relationship to cylinder diameter
19 p3302 A69-36845

Structure of isolated MHD shock wave in viscous heat-conducting radiating gas finite electrical conductivity and transverse magnetic field
20 p3581 A69-37189

Shock and current sheet separation in magnetic shock tubes, determining electron temperature behind shock and within current layer
20 p3511 A69-38241

Giant Q switched laser pulse interaction with C target in background gas showing complex luminous shock structure near target as function of time
21 p3736 A69-38942

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method
21 p3693 A69-38961

Shock waves in closed cycle MHD with gaseous working fluids, investigating MHD channel flow
21 p3778 A69-39482

Electron temperature profile across shock wave in weakly ionized nonequilibrium argon by numerical integration of energy conservation equation, noting three body recombination
21 p3698 A69-39791

Vibration relaxation time and dissociation rate constant of carbon dioxide in high temperature shock waves, using IR emission
21 p3775 A69-39801

Magnetic fluctuations in various frequency ranges, associated with earth bow shock, detected with search coil magnetometer on OGO 3
22 p3938 A69-40501

Radiation emission and ionization in precursor and nonequilibrium region behind shock wave during approach to equilibrium in argon-like gas
22 p4006 A69-40526

Shock tube boundary layers dependence on shock strength determined using vorticity transport to define boundary layer coordinate
22 p3930 A69-40531

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem
22 p3861 A69-41114

Transonic flows behind separated shock waves of ideal gases past bodies of various geometries
23 p4151 A69-41526

Atomic spectrophotometry to monitor O atom formation rate behind shock waves in oxygen-argon mixtures, noting dissociation over 2850-5550 K temperature range
23 p4194 A69-42209

MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
23 p4222 A69-42417

Blast wave energy determination of laser-induced gas breakdown in hydrogen, nitrogen, helium, argon and xenon in pressure chamber
24 p4299 A69-42651

Solar corona instabilities and shock waves indicated by type 3 and 2 bursts, considering electrons ejection
24 p4378 A69-42689

Fluctuating electric fields relations to MHD bow shock structure, using LF fluxgate magnetometer aboard OGO 5
24 p4306 A69-42693

Theoretical models for collisionless plasma shock waves in terms of nonlinear, magnetosonic, constant profile waves, turbulent- and electrostatic-shock structures, etc
24 p4355 A69-42694

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere
24 p4368 A69-43178

Electron temperature distribution across shock wave in weakly ionized plasma, noting variable ionization across wave
24 p4356 A69-43362

Underexpanded plane hypersonic gas jet injection into resting medium from straight nozzle, discussing shock wave formation
24 p4246 A69-43484

Viscous shock wave chemical relaxation for diatomic nonequilibrium dissociating gas flow, using Navier-Stokes and chemical kinetics equations
24 p4302 A69-43487

Compressible laminar boundary layer behind shock or thin expansion wave past moving flat plate solved by transforming governing equations into Blasius equation
24 p4305 A69-43596

Shock formation mechanism in simple shock tube using multistage modification of White model, deriving variation of shock Mach number
24 p4305 A69-43631

SHOES

Two degrees of freedom control moment gyro for astronaut attitude control during EVA, discussing muscle-controlled shoe-mounted stilts and precessional feedback forces
24 p4272 A69-42846

SHORT AND HARLAND AIRCRAFT U SC- 7 AIRCRAFT

SHORT CIRCUITS

Rectangular RC distributed circuits with shaped electrodes, analyzing short circuit admittance parameters
11 p1858 A69-24938

Dynamic properties of supply sources in carbon dioxide shielded welding as function of short circuit current statistical parameters, noting metal spatter correlation
11 p1892 A69-25667

Plane linear induction pump design optimization without short circuiting bus bars, allowing for MHD effects induced by traveling magnetic field
14 p2405 A69-29913

SHORT SC-7 AIRCRAFT

U SC- 7 AIRCRAFT

SHORT TAKEOFF AIRCRAFT

STOL and VTOL aircraft characteristics in operation, considering impact on terminal navigation and air traffic control
03 p0465 A69-13452

Heligyro type takeoff and landing maneuvers, discussing M 211 takeoff jet thrust, pressure ratio, tip speed, etc
04 p0547 A69-14816

Blowing boundary layer control /BLC/ system designed for STOL seaplanes
05 p0695 A69-15546

STOL aircraft intercity test flights emphasizing curved ILS approach, using onboard computer for altitude and distance data
08 p1347 A69-20602

Aerodynamic characteristics of propeller-wing-flap systems used on deflected slipstream STOL aircraft
09 p1431 A69-22278

Short takeoff aircraft characteristics, discussing aircraft certification and airfield regulation in Great Britain
13 p2203 A69-28356

STOL and V/STOL short haul intercity airliners emphasizing propulsion systems, operational aspects and economics
17 p2898 A69-33356

Wind tunnel wall interference effects in wind tunnel testing of STOL aircraft by inducing interference velocities
17 p2947 A69-34022

Lockheed C-130 Hercules modified as STOL aircraft studied in laboratory by computerized simulation and graphics techniques for pilot view during landing
18 p3092 A69-35466

Airport facilities planning for conventional jet, STOL and SST aircraft ground handling, stressing facilities economy and transportation subsystems
19 p3289 A69-35623

Computerized clock sequenced ATC system, area navigation /R Nav/ systems and STOL flight control
19 p3370 A69-36317

Short haul air transportation traffic congestion problems in Northeast corridor, emphasizing STOL solution for economy
19 p3248 A69-36865

STOL aircraft to serve traffic needs of northeast corridor, discussing decision making regarding size, type, cost, speed and strip-length
20 p3462 A69-37352

Flight control and stability of STOL transport aircraft with powered-lift boundary layer control system augmented lift
20 p3462 A69-37513

STOL airline operation test programs involving aircraft, navigation equipment, systems and ATC
21 p3646 A69-38731

STOL takeoff optimal trajectory maximizing altitude at given runway distance, using aircraft models
21 p3649 A69-39427

Wind tunnel tests determining propeller slipstream effect on roll-damping derivative in transitional flight region, estimating STOL aircraft characteristics
22 p3863 A69-40145

Air traffic systems and diminishing airspace capacity problems requiring additional airport facilities and STOL aircraft
22 p3925 A69-40428

STOL aircraft characteristics emphasizing ground and air space operations requirements and noise levels
22 p3863 A69-40430

STOLport policy for New York City including travel time analysis, ground transport systems, political and community acceptance, aircraft noise, etc
22 p3927 A69-40484

STOL seaplane bottom pressure distribution from tests on scale model of PX-S seaplane, discussing boundary layer control effects
22 p3864 A69-40586

VTOL, STOL and CTOL transportation systems cost effectiveness comparison for Northeast Corridor operation, considering ground facilities, access time, etc
23 p4147 A69-41642

STOL program in Northeast Corridor demonstrating significant city-to-city block time reduction by STOL transportation system
23 p4185 A69-41644

Terminal facilities planning for STOL service to meet traffic demand, considering site selection, runway alignment, aircraft noise, ground accessibility, etc
23 p4147 A69-41645

Air traffic interfaces of VTOL, STOL and CTOL aircraft serving same metropolitan terminal, emphasizing navigation systems, geographical positions, ground communication, etc
23 p4185 A69-41646

Metropolitan downtown airports for STOL and VTOL aircraft stressing Los Angeles Metroport
23 p4147 A69-41660

STOL transport aircraft propulsion requirements, discussing engine cycle selection, design variables effects, etc
23 p4201 A69-41668

Czechoslovak L-400 high wing short range STOL transport aircraft powered turboprop engines, discussing passenger and cargo version
24 p4251 A69-42799

SHORT WAVE RADIATION

NT MICROWAVES

NT MILLIMETER WAVES

NT SUBMILLIMETER WAVES

GaAs diode laser short wave emission, discussing coherent radiation and photon energy
03 p0441 A69-14165

Actinometric and nephelometric data on outgoing short wave radiation obtained by Cosmos 122 satellite,
24 p4251 A69-42799

- tabulating cloud cover data, digital radiation data and brightness curves
06 p0952 A69-17983
- Short wave radiation field reflected anisotropically from underlying surface into atmosphere calculated from brightness coefficient
06 p0952 A69-17985
- Visceral lesions observed in mice and rats exposed to ultrashort waves indicating no pathological modification of physiology of reproduction
[AGARDOGRAPH-111] 08 p1266 A69-20679
- Solar radio emission S component at short waves, discussing role of higher frequency spectrum in proton flare occurrence
10 p1763 A69-23735
- Functional relations expressing short wave radiation absorption and scattering in atmosphere
15 p2648 A69-30222
- Extraatmospheric long and short wave radio astronomy since first artificial satellite, including device carriers effectiveness of earth satellites, lunar orbiters, rockets and balloons
15 p2682 A69-30504
- Field strength determination at reception point for long range short wave paths, taking into account multiple ray paths and antenna radiation patterns
20 p3520 A69-37035
- Soviet book on methods of calculating characteristics of solar radiation covering short wave radiation, relationship to meteorological factors, applications, etc
20 p3570 A69-37233
- SHORT WAVE RADIO TRANSMISSION**
- Diversity antenna continuous short wave radio signal envelope distribution, autocorrelation functions, damping rate and cross correlation coefficients
03 p0394 A69-13522
- Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
03 p0397 A69-13721
- Correlation coefficient between frequency diversified signals amplitudes estimated by approximation for two beam short wave radio channels
04 p0560 A69-15401
- Equivalent hop and equivalent ionospheric parameters for short wave long distance radio links in ionospheric radio propagation
04 p0560 A69-15402
- Vertical probe observations of short radio waves propagation through sporadic E at various frequencies and path lengths
10 p1657 A69-23933
- Noise sensitivity of space diversity reception system with narrow beam electrically switchable antennas for incomplete beam separation
12 p2030 A69-26485
- Two beam short wave channel capacity with beam separation at receiving end, noting dependence on channel properties and fading correlations
15 p2562 A69-30115
- Directional transmitting and receiving antenna arrays for short wave meteor studies in Kharkov
17 p2939 A69-33903
- Short radio wave damping of earth satellite transmitter due to ionospheric diffraction resulting from increasing satellite-ground station distance
20 p3491 A69-37689
- SHOT NOISE**
- Forward current shot noise in parametric amplifiers using GaAs varactors, noting additional noise due to stored minority carriers current
01 p0048 A69-11137
- Thermal and shot noise in pumped resistive diode for frequency conversion, analyzing equivalent circuits
03 p0406 A69-13828
- Shot noise in Si Schottky barrier diodes for frequencies between 100 Hz and 50 kHz
05 p0734 A69-16564
- Shot noise in dipole antenna immersed in hot plasma related to antenna input resistance, using Maxwellian velocity distribution
07 p1079 A69-18920
- Unsuccessful space charge noise suppression measurements on field emission tubes, obtaining diffusion and shot noise measurements at high currents
16 p2752 A69-32384
- SHOT PEENING**
- Shot peening effect on fatigue properties of maraging and Al-Zn-Mg alloy steel welds, using repeated tensile tests
02 p0253 A69-12061
- Butt weld fatigue properties improvement in maraging steels, using shot peening and prestretching
03 p0434 A69-13762
- Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure
04 p0614 A69-14576
- Stress corrosion cracking prevention by shot peening, considering aircraft industry applications
14 p2466 A69-29937
- Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure
15 p2638 A69-30278
- SHRINKAGE**
- Stress concentrations around elliptical perforations in shrunk plates with bonded boundaries based on photoelastic models
02 p0345 A69-12391
- Two dimensional photoelasticity for minimizing stress concentration in perforated rectangular plate subjected to restrained shrinkage, discussing application to solid propellant rocket grains
08 p1412 A69-20255
- Shrinkage and heat release of polyglycol maleinate binder during gamma radiation consolidation compared with thermochemical consolidation
12 p2117 A69-25991
- Shrinkage stresses in two phase materials, analyzing stress distribution in epoxy inclusions in plasticized matrix during curing by photoelastic method
13 p2371 A69-28675
- Shrinkage cavity volume formulas for alloy castings with wide liquidus to solidus range, considering effects of diffused porosity and clustering for Mg alloy
20 p3548 A69-37329
- Low melting point material selected model melt simulating shrinking process in castings of melt with broad liquidus-solidus interval
21 p3733 A69-39720
- Stress analysis of incompressible solid propellant rocket charges by point matching technique, considering differential thermal shrinkage and axial acceleration cases
24 p4402 A69-43263
- SHROUDED BODIES**
U SHROUDS
- SHROUDED PROPELLERS**
- Rotating spectral and spatial sound pressure distribution in propeller duct calculated on basis of propulsion quantities, noting effect of tip clearance
04 p0544 A69-14867
- Integrated shrouded propeller as glider thrust source permitting powered takeoffs and updraft independence
05 p0702 A69-16379
- Wind tunnel measurements on integrated shrouded propeller model proposed for power gliders
07 p1052 A69-19633
- SHROUDED TURBINES**
- Gas flow characteristics in shrouded and unshrouded turbine wheel assemblies, emphasizing radial flow role in efficiency
21 p3785 A69-38865
- SHROUDS**
- Cryogenic plants for space simulation chambers, examining processes for cooling shroud below 100 K at given temperature differences
01 p0057 A69-11154
- Field noise reduction frequency spectra afforded by spacecraft shroud, basing estimating criterion on flight test data
09 p1609 A69-21892
- SHUNTS**
U BYPASSES
U CIRCUITS
- SHUTDOWNS**
- NERVA engine operational cycle and performance, discussing startup, thrust buildup and shutdown
[AIAA PAPER 69-515] 18 p3170 A69-34809
- SHUTTERS**
- Electro-optical shutter for Nd-glass laser with high peak power pulses, discussing switching time, contrast ratio and synchronization
09 p1493 A69-21422
- High speed curtain type photographic shutters testing by chronograph with phosphorescent and photographic recording, determining movement rate including acceleration and braking
12 p2093 A69-26598
- Single crystal line block electro-optical shutter reflector operation based on double reflection and birefringence in anisotropic media, noting application to Nd glass laser
20 p3554 A69-37611
- Isolation technique using exploding mirror shutter in multistage high gain laser system to overcome amplified target feedback during pulse lasing of reflective targets
24 p4330 A69-43762
- SIBERIA**
- Total solar eclipse of September 22, 1968 in Siberia, discussing instrumentation and solar light radiation, corona, prominences, spicules, etc
10 p1782 A69-23696
- SIC [COEFFICIENT]**
U STRUCTURAL INFLUENCE COEFFICIENTS
- SICKNESSES**
NT ALTITUDE SICKNESS
NT DECOMPRESSION SICKNESS
- In-flight illnesses in French Air Force, emphasizing psychological failures in etiology
21 p3666 A69-39270
- Cardiovascular illnesses incidence among airline flight personnel, discussing coronary insufficiency detection
21 p3661 A69-39271
- Aircraft pilots medical disabilities as potential flight safety hazard, discussing aerospace medical specialist role and pilot education in symptoms evaluation
22 p3894 A69-41146
- SID [IONOSPHERIC DISTURBANCES]**
U SUDDEN IONOSPHERIC DISTURBANCES
- SIDE-LOOKING RADAR**
- Holographic and microwave technology relationship, noting side-looking radar photos and X band radiation
03 p0430 A69-13354
- Side looking radar for earth resources sensing, discussing geological and hydrographical mapping, oceanography, agricultural and biological phenomena
06 p0923 A69-17119
- Analysis and optimization of side-looking synthetic aperture radars carried out for resolution, SNR and least squares estimation of target field
08 p1277 A69-20960
- Photography for remote sensing, discussing aerial photography, side-looking radar and photography for recording, storing and retrieving data
12 p2096 A69-26975
- Side-looking airborne radars (SLAR) application to geological exploration of remote unmapped areas
12 p2099 A69-27009
- Equations derived for radar image coordinate transition to geodetic coordinates in aerial surveying by side-looking airborne radar
15 p2596 A69-30574
- Side-looking radar and thermal IR photography as mapping system, discussing resolution and distortion
15 p2612 A69-31162
- APQ-97 side-looking radar for topographic mapping of continually cloud covered areas, noting data reduction and compilation methods
20 p3519 A69-36928
- Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point
20 p3536 A69-36929
- Geological radar in regional and detail studies, discussing area side scanning imagery and lithology changes detection
20 p3491 A69-37652
- SIDEBANDS**
- Amplitude modulation factors expressed as carrier and sideband power for sinusoid and square wave signals, considering negative clipping by modulator cut-off
01 p0028 A69-10419
- Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide gas filled cylindrical cavity
07 p1145 A69-18479
- Sideband structure of transmitted frequency spectrum exhibited by plasma wave features on topside ionograms, noting harmonic resonances
20 p3496 A69-37891
- SIDELOBE REDUCTION**
- Monopulse ground station antenna configuration for improvement of sidelobe level in satellite transmission [DVL-856]
02 p0214 A69-11599
- Constant amplitude current excitations superposed on uniformly spaced array for sidelobe reduction, comparing results to Chebyshev arrays
12 p2040 A69-26473
- Residual phase term influence on compressed signal shape, analyzing linearly frequency modulated signal spectrum and sidelobe suppression in pulsed radar
15 p2564 A69-30143

Meteorological radar dead zone diminished by using hybrid electronic waveguide suppression system to eliminate antenna sidelobe reflections
16 p2791 A69-32281

Short backfire antenna based on yagi type equipped with end reflector, noting fewer elements and low sidelobe advantages
16 p2763 A69-32586

Doubly curved reflectors for rotating search radar directional antenna, noting assembly of elliptical strips constituting segments of parabolic dishes and sidelobe suppression
16 p2763 A69-32790

Quantization sidelobe characteristics of phased array with triangular and rectangular element arrangement
23 p4137 A69-41591

Cophase antenna aperture with shaded central region, considering sidelobe radiation reduction by varying field amplitude distribution
23 p4138 A69-41939

SIDELOBES

Statistical characteristics of radiation pattern of mirror antennas in region of irregular sidelobes
04 p0577 A69-14787

Jamming susceptibility, noting corrections for multiple noise sources and sidelobe level for antenna pattern
14 p2414 A69-29501

Multiplicative feed system for monopulse angle tracking antennas, discussing influence of sidelobe and backlobe responses on control function slope determining antenna bearing angle
20 p3510 A69-37704

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
21 p3684 A69-39619

Envelope characteristics of earth station Cassegrain antenna sidelobes, deriving formulas for central and spar blocking and forward feed spillover
23 p4143 A69-42517

SIDERITE METEORITES

U IRON METEORITES

SIDESLIP

Aircraft stability during sideslip, discussing influence of fuselage/wing interference
04 p0548 A69-14824

SIEVES

Sorting particles by shape using sieving equipment, noting results with crushed gravel
21 p3731 A69-38950

SIGHT

U VISUAL PERCEPTION

SIGNAL ANALYSIS

Small signal characteristics and frequency response of diode-stabilized integrated linear circuits, discussing feedback, impedance, bias-diode, etc
01 p0041 A69-10204

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions
01 p0136 A69-10242

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design
02 p0214 A69-11614

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails
02 p0207 A69-11690

Radar target amplitude, angle and Doppler scintillation from analysis of echo signal propagation in space
02 p0211 A69-12447

Book on compound signals and uncertainty principle in radar observations, considering Woodward ambiguity function, determining accuracy and resolution of range and velocity measurements
03 p0385 A69-13000

Iterative method of determining orthogonalized bases for representation of sampled data signals
03 p0391 A69-13231

Infrasound waves recordings from Saturn 5 vehicle, observing signal reversal occurrence
03 p0509 A69-13358

Multichannel communication received signals irregular components, discussing signal phase and amplitude fluctuations correlation coefficients
03 p0394 A69-13519

Maximum probability technique for measuring angular coordinate with unknown signal and noise intensity
03 p0399 A69-14132

Electronically steered and shaped beams for linear and ring phased array antennas by sampling element signals multiplexed into single channel
04 p0570 A69-14307

Weak periodic signal separation from noise using single and multichannel analog adders
04 p0597 A69-14848

Optimal filter design for estimating state of linear dynamical system in presence of high measurement noise
04 p0582 A69-14877

Optical signal frequency method for measuring velocity of fluid flow
04 p0598 A69-14995

Near earth atmospheric spectrum characteristics determined by analytical expressions for elementary signals in 2-30 kHz range
04 p0593 A69-15105

Threshold signals and optimum signal parameters in radar range and velocity measurements
04 p0560 A69-15403

Spectral density of response of linear discrete filter with multiple input and output periods to random signal
04 p0584 A69-15419

First and second passage times of stationary random process consisting of sinusoidal signal with stationary Gaussian noise
04 p0561 A69-15453

Uniaxial loading effect determination by change of harmonics amplitude of inductive pickup signal
05 p0763 A69-15995

Noise signal mean square value measurement in pulse noise conditions by using noise amplitude limiter with limitation threshold in receiver
05 p0719 A69-16086

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
05 p0720 A69-16530

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network
05 p0721 A69-16531

Time averages for estimating probability distribution, density and moments of random functions applied to deterministic signals, considering sampling frequency dependence
05 p0722 A69-16729

Pulse amplitude measurements comparison by sampling signal at given time and pulse peak detection, considering SNR
05 p0722 A69-16730

Book on introduction to random signals and communication theory covering signal analysis, analog and digital data transmission, information theory, etc
06 p0887 A69-17144

Analog-hybrid computer configurations for average and rms values of signals with respect to time
06 p0891 A69-17220

Optimal radio signal receiver analyzing output signal properties
06 p0888 A69-17464

Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
07 p1083 A69-19122

Frequency feed forward open loop technique for lowering threshold and linearity of FM demodulators
07 p1106 A69-19128

Recursive method for estimating number, amplitudes and time delays of signals overlapping in time and in presence of additive white Gaussian noise
08 p1270 A69-19854

Hilbert transform properties and application to random signals, analyzing analytic signal associated with general Gaussian random signal
08 p1271 A69-19915

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis
08 p1297 A69-20419

Radio signal from magnetron transmitter, noting slow amplitude phase fluctuations distribution according to log-normal law
08 p1275 A69-20424

Vortex valves and amplifiers small signal analysis using mathematical model to describe quantitative effects of vortex parameter changes [AGARDOGRAPH-118]
08 p1257 A69-20953

Error probability for transmission of one of M orthogonal, equally likely, equal energy signals over generalized incoherent channel
09 p1452 A69-21314

Upper bound obtained for probability of zero Gaussian random process remaining above specified signal throughout prescribed interval of time
09 p1452 A69-21319

Continuous signal over finite time intervals represented by impulse functions of linear channel
09 p1454 A69-21723

Wideband signal Doppler distortion influence on parameter estimate accuracy
09 p1454 A69-21725

Large signal analysis of IMPATT oscillators with carrier velocity saturation, discussing two frequency mode of operation
09 p1463 A69-21846

Power spectrum of nonstationary processes with periodicity in two dimensional autocorrelation function based on Fourier transform
09 p1455 A69-21847

Automatic level measuring system, consisting of decade control oscillator, digital level generator and selective level meter for 200Hz-2MHz range
09 p1501 A69-22577

Sporadic noise, false fronts and other noise effects on phase of output oscillations of resonance apparatus
09 p1460 A69-22641

Singular integral method in approximation for synthesizing sequence of functions with spectrum of limited length
09 p1460 A69-22642

Vortex amplifiers small signal analysis based on mathematical model and network theory
09 p1443 A69-22739

Large signal vortex amplifier analysis using load lines to evaluate series orifice and vortex flow control valve characteristics
10 p1639 A69-23558

Analytic investigation of spectrum of electrical signals induced by spherical defects in ferroprobe sensors
10 p1675 A69-24072

Algorithm for calculating Bayes estimates for unsteady Gaussian signals separation in presence of unsteady Gaussian noise by least squares method
11 p1833 A69-24443

HF measurements by phase and amplification control of signal in impulse oscillography, noting accuracy in nanosecond range and signal distortion
11 p1880 A69-24541

Upper bounds for increment of band limited signal in sampling interval by increasing integral expressions of increment
11 p1834 A69-24551

Cepstrum /Fourier transform of log-spectrum of signal/ as model for prediction of perception of pitches in harmonic residue /ambiguity of pitch/
11 p1834 A69-24571

Signal to noise ratio in spectral composition of FM signals in magnetic recorder channels, taking into account parasitic FM and AM
11 p1834 A69-24612

Germanium tunnel diode capacitance as function of bias voltage and HF signal magnitude, considering circuit design
11 p1847 A69-24722

Transient responses of mutually synchronized signal systems, obtaining design parameters
12 p2030 A69-26388

Book on random signal analysis covering Fourier analysis, circuit analysis, Fourier transform theory, operators, probability, random variables, stochastic processes
12 p2031 A69-26632

Statistical distribution of instantaneous frequency and power of signal associated with Doppler spectrum for exponentially distributed and determinate frequencies
12 p2032 A69-26863

Book on elements of detection and signal design covering transmitter optimization for coherent and noncoherent digital communication systems, statistical decision theory, radar detection, etc
12 p2033 A69-26867

Pull-in oscillator for random noise coincident with synchronizing and frequency shift signals, discussing circuit parameters effect on signal discrimination and noise suppression
12 p2044 A69-27101

Spectral criterion for distinguishing mode locked and nonmode locked laser signals
13 p2270 A69-27197

Small signal quasi-stationary characteristics of pulse transistors including gain and input impedance calculations
13 p2227 A69-27423

Signal strength of two beam interferometers with laser illumination, considering modulation depth of interference pattern
13 p2259 A69-27450

Signal to noise ratio at output of three stage radio section with preselector, detector and ideal integrator, noting error

13 p2222 A69-28506

Transistorized DC amplifier circuit with reversible and controllable transfer constant based on voltage conversion principle

13 p2235 A69-28511

E layer fine scale structure, F 1 reactions and F 2 reflected signals analysis during 20 May 1966 solar eclipse

13 p2255 A69-28541

Coherent signal addition in systems with multibeam channels and incomplete beam separation, deriving expressions for signal shape effect on noise rejection

13 p2223 A69-28551

Input signal random amplitude fluctuations suppression by parametric power limiter, discussing limiting frequency determination and dependence on signal amplitude

13 p2236 A69-28573

Random signals and real time analysis systems for environment testing and transient signals

13 p2264 A69-28603

Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails

13 p2224 A69-28721

Radio signal amplitude changes from Explorer 22 beacon satellite attributed to wave diffraction by tropospheric structures

14 p2411 A69-29107

Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc

14 p2413 A69-29489

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes

14 p2460 A69-29602

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis

14 p2427 A69-29657

Recording installation of ionospheric reflected radio signal fluctuations and amplitudes of resulting signals simultaneously at three points, discussing antenna commutator circuit

14 p2452 A69-29874

Small signal analysis of processes in klystron resonators involving beam-field interaction

15 p2573 A69-30117

Distribution function of SNR from coherent optimal estimate of signal amplitude

15 p2564 A69-30149

Weak periodic signal separation from noise using single and multichannel analog adders

15 p2607 A69-30241

Autonomous radiometers signals statistical properties used in space technology, discussing radar signals phenomenological models, measurement errors and energy characteristics

15 p2566 A69-30337

Power spectrum analyzer of weak periodic signal obscured by white noise by zero interactions count of signal and noise mixture

15 p2579 A69-30945

Signal records from S 66 satellite with strong scintillations, noting fluctuation well described by Nakagami m-distribution and possibility of deriving relations between different indices

16 p2777 A69-32104

Cumulonimbus clouds phase structure and spatial distribution based on radar signal polarization analysis, showing high nonuniformity and variability

16 p2806 A69-32266

Meteorological effects on anomalous radio echo determined from simultaneous aerological and radar observations, noting maximum signal amplitude during high humidity and low wind speeds

16 p2808 A69-32277

Error analysis of one bit autocorrelation method of spectral estimation, noting decrease in spectral variance with increased sampling rate

16 p2752 A69-32390

Complex mechanical vibrations causes determined by sensor signals analysis

16 p2876 A69-32434

Signal propagation in channel subject to static investigated using Fokker-Planck type equation in statistical mechanics methods

16 p2753 A69-32437

Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals

16 p2753 A69-32472

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network

16 p2753 A69-32473

Seismic surface wave observations analyzed by applying moving window method to orthogonal detector recordings permitting lateral refraction measurement, wave separation, etc

16 p2784 A69-32577

Ionosphere depression influence on VLF signals phase and amplitude calculated by mode theory and integral equations system representing aperture fields

17 p2920 A69-33418

Preemphasis analysis for FM system optimization to maintain constant output signal to noise ratio throughout baseband

18 p3103 A69-35088

Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation

18 p3103 A69-35097

Reflected signals detection with limited frequency spectrum and minimum velocity resolution considered, analyzing signal properties

18 p3104 A69-35265

Signature analysis diagnostic methods for reliability tests involving final product checkout and early fault detection

19 p3322 A69-35574

Transient phenomenon analysis and filtering based on stage separation tests in vacuum chamber, with emphasis on selective integration method

19 p3293 A69-35747

Critical signal assignments optimization in electrical/electronic connectors, considering bent pins, signal cross talk, adjacency requirements and corona

19 p3284 A69-36030

Meteor burst communication channel parameters for low data rate telemetry, considering signal amplitudes, decay, duty cycle, multipath, phase stability, trail location and variations

19 p3271 A69-36250

Continuous signal over finite time intervals represented by impulse functions of linear channel

20 p3488 A69-37459

Wideband signal Doppler distortion influence on parameter estimate accuracy

20 p3488 A69-37461

Linear radar system theory including Fourier transforms, linear superposition and input/output ratio for deterministic and random signals, discussing filter and sampling theory

20 p3489 A69-37633

Signal spectrum and SNR of synthetic aperture terrain imaging radar using model, including two dimensional signal and Gaussian additive noise

20 p3489 A69-37638

Signal amplitude no memory nonlinearity effect on performance of synthetic aperture terrain imaging radar systems and simulation of CRT film systems

20 p3490 A69-37643

Sensitivity improvement for inertialess microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography

20 p3545 A69-37901

Radar signal design, considering ambiguity and modulation functions, envelope surfaces, coding conditions, etc

20 p3496 A69-37904

Optimal radio signal receiver analyzing output signal properties

20 p3496 A69-37947

Diffraction pattern of satellite signal field-aligned amplitude scintillation during quiet geomagnetic conditions

20 p3497 A69-38108

Microwave oscillations amplification in bulk GaAs, discussing experimental verification of small signal theory

21 p3781 A69-39127

Unknown parameter experimental estimation based on signal direct observations with solution by stochastic approximations method

21 p3756 A69-39265

Biomedical electrical signals analysis by optical data processing, discussing conversion, SNR and filtering techniques

21 p3666 A69-39440

Algorithmic approach to nonlinear signal estimation problem useful in fetal electrocardiography

21 p3668 A69-39866

Multiple filter technique for seismic multimode dispersed signals, checking time and frequency resolution by diagnostic diagram

22 p3934 A69-39872

Optimal control problems, discussing properties of signal producing response signals with transient functions at independent outlets of linear dynamic system

23 p4145 A69-41958

Digital analysis of surface wave observations, discussing moving window, multiple filter, multicomponent recording, time variable filtration and cross correlation techniques

23 p4157 A69-42018

Compatible single sideband /CSSB/ modulation suitability for broadcasting, analyzing signal spectrum, demodulation distortion and signal generation methods

23 p4125 A69-42111

Mechanical stress measurement in cylindrical steel subjected to loads inside coaxial transducer, using transducer signal in contactless eddy current method

24 p4296 A69-42654

Small signal amplitude/frequency response or transfer gain of volume-terminated pneumatic lines with circular and rectangular cross sections

24 p4301 A69-43288

SIGNAL ANALYZERS

Time compression system with ultrasonic diffraction cell allows coherent light optical spectrum analyzer to function at audiofrequencies

01 p0035 A69-11283

Multichannel amplitude analyzer for space applications, noting use as gamma-spectrometer component in Lunik 10 and 4096 bit/channel traffic capacity

01 p0084 A69-11315

Multichannel pulse height analyzer with memory, small size and low power consumption for application to satellites

07 p1135 A69-19200

Pulsed RF spectra analyzer displays, noting responses to CW and pulsed signals and Fourier and pulsed repetition rate lines

09 p1460 A69-22791

Receiver filter nonoptimality effects on accuracy of nonenergetic signal parameter measurements

11 p1835 A69-24960

Design and efficiency for signal-time compressors of spectral analyzers using electron beam tubes with charge storage

15 p2576 A69-30351

Peak amplitude selector for electrophysiological phenomena analysis, describing memory schemes, threshold crossing detectors and display, input and output circuits, timing, etc

15 p2612 A69-31266

Information storage of multichannel analyzer of continuous and pulsed processes

17 p2939 A69-33900

Compressed signal spectral analyzer resolving power, discussing dynamic amplitude range influence and weighting functions role

17 p2939 A69-33906

Sampled data system with built-in data processing for observation of fine grain characteristics of pulsed signals used in radar systems

17 p2934 A69-34076

Modified pulse height analyzer /PHA/ for sample amplitude height occurrence frequency measurements obtaining amplitude probability distribution /APD/ and three moments of atmospheric noise

18 p3102 A69-34960

SIGNAL DETECTION

NT CORRELATION DETECTION

Optimal rank algorithm construction for signal detection in noise investigated for use in information transmission systems

01 p0027 A69-10374

Sequential logic for improved signal detectability in frequency-agile search radars, discussing target echo fading models in radar range performance prediction

01 p0033 A69-11008

Tinted ophthalmic media effect on detection and recognition of red signal lights in daylight, noting allowable coloration for aviation use

01 p0022 A69-11341

Optimum linear filters for signal detection against background noise using Hodges-Lehmann method

02 p0223 A69-11565

Test procedure for obtaining large signal S characterization of nonlinear power transistors

02 p0214 A69-11600

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

02 p0206 A69-11604

Probability density distributions for monaural detection of tonal signal in continuous background of Gaussian noise as modified noncentral chi distribution

02 p1201 A69-11821

Optimal detection of random signals on background of noise of unknown intensity and persistent false alarm probability

02 p0208 A69-12264

Natural microwave radiation generation and propagation and wideband signal detection in problems connected with radio wave propagation, geophysics, radiometerology and plasma physics

03 p0420 A69-12919

Adaptive processing limited memory receiver for synchronous detection of signals of unknown amplitude

03 p0400 A69-13228

Digital detection of angle modulated signals including zero crossing detectors, digital phase locked loops, differentiation and arcsine demodulator

03 p0391 A69-13230

Sensitivity of radio receiver detecting weak sinusoidal and noise signals by counting zero crossings by envelope or phase of signal sum

03 p0405 A69-13717

Spatial autocorrelation functions of amplitude and phase fluctuations in plane parallel to wavefront of incident wave for conditions of multiple scatter

03 p0468 A69-13807

Broadband signal and noise performance of direct detection optical receiver consisting of solid state photodiode and baseband amplifier

04 p0556 A69-14283

Photographic recording to produce spatial analog of temporal Fourier spectrum of astronomical source used for distinguishing weak periodic signal from background signal

04 p0556 A69-14294

Optimum conditions for signal analysis determined for symmetrical binary communications channel with unknown signal phase

04 p0556 A69-14492

Signal detection by four terminal receiver network optimal for background Gaussian noise

04 p0557 A69-14776

Optimal detection of deterministic signals with random initial phase on background of unknown intensity noise under condition of constant false alarm probability

04 p0557 A69-14788

Optimal filter design for estimating state of linear dynamical system in presence of high measurement noise

04 p0582 A69-14877

Distribution free sequential probability ratio procedure for detecting signal in multiple resolution element radar

05 p0717 A69-15609

Algorithm for discriminating random signals with unknown mean values, discussing decision functions possible existence to minimize error probability

05 p0719 A69-16218

Bayes estimator in decision directed adaptive detection problem, noting allowance for decision errors

05 p0740 A69-16583

Expressions for calculating filtering errors resulting from insufficient information about useful signal and noise characteristics

05 p0740 A69-16668

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra

05 p0722 A69-16762

Optimum antenna radiation patterns during suboptimum scattered Gaussian signal detection in homogeneous interference level investigated with single channel antenna

05 p0736 A69-16782

Sounding energy optimum spatial distribution during scanning and detection of several signals, noting reduction of mean energy losses

05 p0723 A69-16786

Aircraft Searchmeter, discussing device fitted to locate emergency radio beacon signal

06 p0878 A69-16963

Attenuation of visual vigilance decrement through visual stimulation combined with various sound conditions

06 p0880 A69-17213

Identification of finite memory, time discrete linear systems by Kiefer-Wolfowitz stochastic approximation procedures, presenting two algorithms for sequential identification

06 p0900 A69-17359

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

06 p0887 A69-17463

Signal detection procedures preserving nonparametric detection properties and advantages of sequential procedures, assuming signal corruption by additive noise at input

06 p0888 A69-17531

Electric signals by shock and detonation waves, describing detection technique [WSCIPAPER 68-44]

07 p1240 A69-18360

Optical pumping at high temperatures using spin exchange signals for RF spectroscopy

07 p1148 A69-18893

Optimum and suboptimum detection of K binary symbols corrupted by white Gaussian noise, discussing searching procedure and average error probability

07 p1081 A69-19097

Communication satellite system design by use of baseband equation relating SNR after detection to CNR at detector input

07 p1085 A69-19180

Incoherent scatter power measurements, comparing square law signal detection, phase coherent receiver and parametric amplifier methods

07 p1085 A69-19222

Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector

07 p1157 A69-19641

Optical heterodyne detection of randomly distorted signal beam, noting time invariant scheme yielding largest average SNR in atmospheric turbulence

07 p1087 A69-19642

Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise

07 p1088 A69-19676

Secondary acquisition systems analysis by semiMarkov process model, defining minimum average acquisition time

08 p1270 A69-19852

Approximate noise analysis of phase locked loop with signal clipping

08 p1270 A69-19857

Phase locked loop demodulator with quadrature channel modified for decision feedback to detect binary phase shift keyed signals

08 p1270 A69-19859

Book on laser communication system design covering modulation and detection methods

08 p1277 A69-20884

Image orthicon tube to detect low intensity pulsed light signals, formulating SNR in terms of resolvable image points

08 p1317 A69-21085

Constant amplitude in-band additive interference for analysis of PSK signals in Gaussian noise, discussing coherent and differential detection

09 p1455 A69-21848

Optimal detection of determinate signal and signal with random amplitude and phase, estimating probability of false and correct detection

09 p1456 A69-22286

Weak signal optimization of multilevel quantization and corresponding detection performance, discussing asymptotic limits

09 p1456 A69-22293

Rapidly varying phase error effect on system performance in data detection process due to RF carrier tracking loop

09 p1456 A69-22459

Detectability parameter for measuring performance of multiple and random access satellite communication system using PN codes

09 p1457 A69-22460

Signal processing regenerative technique used for multichannel predetection combining, including carrier suppressed signals

09 p1458 A69-22472

Constant envelope threshold detection for establishing signal energy in presence of input noise power density variations

09 p1459 A69-22474

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions

09 p1459 A69-22593

Monitors to detect incipient failure during turbine engine development, describing servocontrol

10 p1692 A69-23253

IR detection at sum or difference frequency by employing optically nonlinear crystal and laser in visible and photomultiplier

10 p1704 A69-23656

Coherent detection spectroscopy with laser oscillator, emphasizing high resolution and applications in astronomical spectroscopy and IR

10 p1696 A69-23684

Antenna array statistical synthesis, investigating signal detection capacity for large phase fluctuations

11 p1833 A69-24439

Optimizing two stage procedure for detecting fluctuating incoherent signal, estimating detection attempts reliability

11 p1833 A69-24444

Self tuning in active filter for detection of weak LF signals in noisy background

11 p1845 A69-24548

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

11 p1835 A69-24711

Polyharmonic predictive and self tunable filters synthesis based on signal periodic components detection, noting role in information transmission and processing systems

11 p1849 A69-24966

Real time correlator in periodic signal extraction from noise background, discussing multichannel sampler as special case of cross correlation extraction

11 p1837 A69-25094

Adaptive threshold detection, using stochastic approximation techniques to derive receiver structures capable of learning optimum threshold setting during actual operation

11 p1839 A69-25297

Optical satellite tracking system using multicoincidence method of photon signal counting by Q switched laser

11 p1841 A69-25579

Optimal scale factor selection to ensure minimum error variance in signal detection against random noise background for input limited range of measuring instrument

12 p2079 A69-25966

Computer controlled network analyzer performing automatic microwave measurements of passive and active networks, based on signal splitting and detecting

12 p2037 A69-26048

Optimum nonstationary Gaussian signals estimation in presence of noise, generalizing Wiener stationary processes filtering theory

12 p2029 A69-26202

Detection of known signals in general noise, describing sufficient conditions for singular detection and estimation

12 p2029 A69-26203

Error bounds for orthogonal signals in additive white Gaussian noise channels for class of generalized decision strategies permitting variable-size list decoding

12 p2029 A69-26204

Up-converter IR detector noise characteristics for pulse and CW signal detection compared with photoconductive detector

12 p2029 A69-26329

Book on elements of detection and signal design covering transmitter optimization for coherent and noncoherent digital communication systems, statistical decision theory, radar detection, etc

12 p2033 A69-26867

Optical detection signals optimization in optical pumping, discussing light beam propagation direction, spectral composition and polarization characteristics

12 p2111 A69-27180

Algorithm for hypothesis optimal tests by series during signal detection in presence of noise

13 p2222 A69-28509

Independently fluctuating Poisson light signals detected by receiver with inertialess photodetector, developing algorithm for estimating amplitude of useful signals

13 p2223 A69-28552

Optical signal conversion efficiency and threshold relationships in pulsed rangefinding systems, considering effects of noise obeying Poisson distribution

14 p2412 A69-29324

Ideal quantum receiver to detect coherent narrow band optical signal in presence of thermal background radiation, noting error probability

14 p2414 A69-29502

Fast folding algorithm for detection and correlation of digital data with weak noisy pulse trains of differing periods

14 p2416 A69-29548

Algorithms for optimal detection of signals on background of normal noise with time varying intensity

15 p2563 A69-30133

Noise stability of receiver network during detection of finite duration noise signal on white noise background, considering various narrow band preselectors

15 p2563 A69-30142

Linear distortions effect on signals detection in binary communication channel with fluctuating noise, determining error probability

15 p2564 A69-30146

False alarm stabilization circuits efficiencies compared in unsteady Gaussian noise, considering phase autocorrelator performance

15 p2567 A69-30342

Threshold signal gain estimated in Glaser frequency filter self adaptation process during transformation from square law summator into matched filter

15 p2576 A69-30344

General autocorrelation function for input signal composed of two amplitude modulated noise waves and background noise from detecting system composed of half wave element

15 p2569 A69-30805

Superheterodyne millimeter and submillimeter wave detection, allowing harmonics separation

15 p2570 A69-31093

Book on statistical theory of signal detection and resolution in random noise covering hypothesis testing, digital communications, stochastic signals, filters, etc

16 p2748 A69-31566

Logic circuits abstract synthesis for detecting signals against noise background using known conditional quantized signal distributions

16 p2749 A69-31627

Night sky far IR observation by rocket-borne telescope, discussing minimum signal detection and origin

16 p2781 A69-32445

Electrooptical/photomultiplier/ detection of satellite beacon flashes, establishing time of flash and measuring pulse shape and energy received

17 p2919 A69-33083

Likelihood ratio for random signals detection in white Gaussian noise based on innovation process

17 p2920 A69-33622

Optimum detection of stochastic signals in Gaussian noise, obtaining eigenfunctions series expansion associated with probability density function

17 p2921 A69-33623

Robust detection of binary signal in additive noise, using extreme value theory /EVT/ to estimate probability density function and system error and threshold

17 p2944 A69-33624

Discrete information transmission synchronization in communication systems concerning optimal signal detection, HF, phase and coded synchronization, etc

18 p3104 A69-35264

Reflected signals detection with limited frequency spectrum and minimum velocity resolution considered, analyzing signal properties

18 p3104 A69-35265

Optimum signal design to maximize SNR for pulse communications systems with signal energy detection, considering frequency, transmission and filtering characteristics and signal duration

18 p3104 A69-35484

Temporal discrimination based on signal fluctuations emphasizing signal detection in presence of noise

19 p3373 A69-36057

Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance

19 p3270 A69-36241

M-ary detection for optical communication investigated for maximum likelihood detection of one of M Poisson processes in background noise

19 p3276 A69-36486

Representation theory of signal detection in non-Gaussian noise environments applied for improved near optimum system performance [IEEE PAPER 69-TP-10-COM]

19 p3277 A69-36488

Optical information rates for photocount detection systems based on coherent field model, considering binary channels with or without Gaussian noise

20 p3485 A69-36923

Paradox of incoming photons detection at two antennas without interference pattern disturbance explained by classical and quantum physics

20 p3538 A69-37415

Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise

20 p3488 A69-37458

Range-Doppler data processing of radar echoes from spread targets, considering quadratic filter theory, emphasizing received signal correlation functions

20 p3490 A69-37648

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

20 p3496 A69-37946

QRS complex detection time error in noisy electrocardiograms

21 p3667 A69-39442

Tradeoffs between measurement accuracy, false alarm and detection probability in practical setting of thresholds for Neyman-Pearson criterion, analyzing noise samples

22 p3902 A69-41221

Envelope detection threshold levels definition for low input SNR based on apparent modulation depth reduction

22 p3902 A69-41225

Partially coherent PSK-modulated binary detection, deriving noisy phase reference by narrow band tracking filter, analyzing bit output error as function of SNR

23 p4122 A69-41772

M-ary noncoherent signal structures requiring less transmission bandwidth than conventional FSK, deriving SNR

23 p4122 A69-41773

Combined eye and ear identification of bimodally presented signals in noise over oscilloscope and earphones, noting significance of independent observers model

23 p4111 A69-42168

Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference

23 p4145 A69-42230

Random signal behavior in hybrid correlator with analog and sampling channels, noting SNR expression and weak signal detection

24 p4283 A69-43139

Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength

24 p4384 A69-43197

SIGNAL DETECTORS

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations

02 p0206 A69-11605

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

02 p0206 A69-11606

Noncoherent binary communication detector for slow selective fading channel with additive quasi-stationary noise based on mathematical procedure of non-parametric classification

03 p0390 A69-13215

Closed form solution for two input correlator processing gain with error function transfer characteristics and operating in Gaussian environment

03 p0403 A69-13253

Linear polarization of cosmic radio emission, discussing original measurement method and revised version based on discrimination of useful signal

03 p0501 A69-13705

Phase locked loop discriminator in threshold region, discussing effects of loop parameters, detuning error and modulation

04 p0580 A69-15471

Transistorized single sideband detector-converter operation in presence of large signal and heterodyne voltage levels, deriving equation for transmission coefficient

05 p0730 A69-16220

Asymptotic performance of adaptive receivers and application to signals of unknown frequency, noting SNR role

05 p0722 A69-16727

Maximum transmission coefficient of distributed p-n junction signal detector compared with concentrated detector coefficient using ordinary and tunnel diodes

05 p0736 A69-16787

Temperature dependence of conversion coefficients and sensitivity of n-type InSb detectors in millimeter and submillimeter ranges

07 p1199 A69-18683

Frequency discrimination characteristics of elliptically polarized dual polarization gas laser, discussing intensity crossover phenomenon and frequency stabilization application

07 p1153 A69-19074

[IEEE PAPER P-5]

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold

07 p1156 A69-19332

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage

09 p1460 A69-22645

Error probability distribution density at output of optimal Gaussian random signal detection, using approximate solution of integral equations

11 p1835 A69-24712

Optimal calculator of detection of Gaussian random signal against Gaussian noise background by reducing input signal to white noise

11 p1835 A69-24713

Collision avoidance system for air traffic, discussing false signal discrimination via electronic measurement of light pulse duration from aircraft Xenon discharge beacon lamp

12 p2129 A69-26772

Energy detection of random processes in colored Gaussian noise, discussing filtering, threshold detection, false alarm, probability distribution and density

13 p2220 A69-27937

Noise stability of nonoptimal radar detection system for noise and FM signals, deriving expressions for optimal spectral width

13 p2222 A69-28508

Noise sensitivity of FM discriminator/limiter in digital binary communication system with FM/PCM-FM/

15 p2564 A69-30145

Noise parameters at output of logarithmic detector separating two AM signals with overlapping spectra

15 p2564 A69-30148

Differential equations for optimum reception to synthesize detectors of deterministic signals against nonGaussian background noise using Markov process

15 p2567 A69-30340

Spectral characteristics of pulsed signal with determinate repetition period and amplitude and duration modulation by correlated random processes

15 p2567 A69-30347

Spectral correlation characteristics of amplitude modulated signal with background noise at envelope detector output

15 p2576 A69-30348

Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio

17 p2931 A69-34115

Receiving circuit for AM signal envelope separation in presence of AM interference and fluctuation noise, using converter cascades to effect input signal frequency spectrum symmetry

19 p3277 A69-36568

Quasi-optimal synthesis for reception indicator used in radio interferometers for measuring signal amplitudes in presence of normal noise

20 p3504 A69-37009

Multispectral imaging system to increase contrast using optical mechanical scanner, multielement dispersing spectrometer and electronic signal processing equipment

20 p3540 A69-37737

Error probability of Gaussian signal detector in Gaussian noise background determined from quadratic form of probability distribution density

22 p3901 A69-40955

Automatic discriminator design for identifying distorted image in noise based on ideal transmitter and use of split scanning beam

23 p4163 A69-41551

SIGNAL DISTORTION

Reliability of binary message in Gaussian noise impaired by amplitude limiting in case of evaluation by integration

01 p0031 A69-10736

Gas lens distortion of Gaussian light beam in sequence of lenses with same aberration, using shuttle pulse technique

01 p0120 A69-10849

Pseudorandom scanned TV signal distortion due to flutter and skew introduced by tape recorder, computing system SNR for distortion as additive random noise

01 p0033 A69-10999

Spectrum distortion of intermediate frequency signal in coherent Doppler navigation radar

01 p0034 A69-11013

Fluid amplifier signal noise sources, using large scale model for investigating jet-knife edge interaction

02 p0195 A69-12078

Horn antenna far field radiation pattern distortion by isotropic plasma slab, noting attenuation variation with electron density
02 p0218 A69-12335

Diffraction by rocket exhausts, discussing electromagnetic signal attenuation based on two dimensional straight edge diffraction model
02 p0209 A69-12352

Intermodulation and cross modulation distortions in double balanced modulator
04 p0573 A69-14341

Moving media influence on transient electromagnetic modal wave propagation in dispersive waveguides
04 p0557 A69-14752

Controlled transient signal distortion by shock monitoring instrumentation circuits using piezoelectric accelerometers
04 p0603 A69-15430

Wideband multichannel optical signals nonlinear distortions during transmission by electrooptical modulators using Pockels effect
05 p0718 A69-15655

Waveform distortions of trapezoidal wave passing through Gaussian filter in pulse transmission, discussing ideal filter effects on degradation
05 p0719 A69-16296

Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape
05 p0720 A69-16443

Resonant amplifier response having stages identical to radio pulse with exponential envelope
05 p0720 A69-16444

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network
05 p0721 A69-16531

Signal detection procedures preserving nonparametric detection properties and advantages of sequential procedures, assuming signal corruption by additive noise at input
06 p0888 A69-17531

Error and noise sources in analog differentiators, discussing signal distortion minimization techniques and augmentation with linear phase filter
06 p0897 A69-17702

Frequency modulated signal envelope passage through bandpass filter of inductively coupled circuits described by differential equation
07 p1100 A69-18555

Beam distortion in low order Gaussian-Laguerre modes propagating through saturable laser amplifier, noting uniform and Bessel small signal gain distributions [IEEE PAPER J-3]
07 p1152 A69-19065

Effects, measurement and analysis of flutter in instrumentation recorders
07 p1133 A69-19118

Radome induced distortions of radioelectric axis analyzed by sectional phase analysis
07 p1110 A69-19521

Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave
07 p1088 A69-19746

Wideband signal Doppler distortion influence on parameter estimate accuracy
09 p1454 A69-21725

Probability analysis of distortions caused by pulse noise action on digital information
09 p1476 A69-22678

Radio signal carrier frequency and arrival time measurements, deriving expressions for phase amplitude distortions effects
11 p1835 A69-24959

Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion
11 p1841 A69-25634

Scintillation index variations based on 40 MHz Explorer 22 satellite signals recorded in Germany
12 p2034 A69-27094

Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation
13 p2219 A69-27697

Nonlinear distortions in TWT for communication satellites applications, discussing relationship with efficiency
13 p2232 A69-28060

Nuclear explosions electromagnetic effects on electronic systems, considering signals emitted from

fireball and signal attenuation by changed atmospheric propagation
13 p2234 A69-28344

Deep space telemetry bit errors increased by reference signal phase noises and partial RF signal suppression, calculating equivalent signal to noise ratio degradation
13 p2223 A69-28609

Single-sideband signal nonlinear distortion and graphical methods for calculation of oscillator tube plate current pulse components
14 p2418 A69-28828

FM measurements of angle distortion introduced by single pole bandpass filters compared to theoretical distortion
14 p2416 A69-29552

Time domain method for hybrid simulation to compute interchannel distortions due to linear transducers in FM systems
14 p2417 A69-29556

Linear distortions effect on signals detection in binary communication channel with fluctuating noise, determining error probability
15 p2564 A69-30146

Junction diode field factor, comparing results of dynamic impedance and distortion measurement methods with deduced values of static characteristic
15 p2575 A69-30301

Earth ionosphere cavity model for atmospheric waveform shape, considering ELF pulse distortion after propagation through antipode
16 p2750 A69-31978

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network
16 p2753 A69-32473

Autocorrelation function distortion determined for Barker signal passing through linear system and RC filter, noting passband influence on function shape
16 p2753 A69-32475

Resonant amplifier response having stages identical to radio pulse with exponential envelope
16 p2753 A69-32476

Wideband multichannel optical signals nonlinear distortions during transmission by electro-optical modulators using Pockels effect
16 p2754 A69-32512

Probabilistic analysis of code message distortion due to pulse noise in modulation systems and comparison between linear and quadratic detections
17 p2919 A69-33145

Level crossing signal obtained by magnetic/electric field modulation, tabulating corrections to widths and centers for distortions
17 p3009 A69-34155

Light changes caused by distortion of binary components, computing theoretical brightness variations by numerical integration of emerging atmospheric intensities over visible surface
17 p3044 A69-34179

Neumann-Lommel formula generalization for obtaining Bessel functions product sums illustrated with FM wave distortion calculation in multichannel system
18 p3101 A69-34625

Wideband signal Doppler distortion influence on parameter estimate accuracy
20 p3488 A69-37461

FM data transmission distortion noise and error rate compared with AM and phase step modulation, noting role of bandwidth
20 p3496 A69-37905

Distortion of electromagnetic pulse propagating through inhomogeneous plasma medium with linear electron density variation
20 p3496 A69-38030

Optimum wideband signal for minimum Doppler distortion, describing pulse compression by linear-period modulation
21 p3671 A69-38406

Atmospheric natural turbulence effect of degradation of laser signal phase and amplitude characteristics, noting refractive index inhomogeneities effect on optical tracking system [AIAA PAPER 69-871]
21 p3675 A69-39397

Spatiotemporal signal distortions for multiple scattering from unsteady radiant energy transfer equations
22 p3899 A69-40247

Maximum errors of telemetering systems under interchannel transient distortions in multistage amplifier of video signals
22 p3899 A69-40250

Automatic discriminator design for identifying distorted image in noise based on ideal transmitter and use of split scanning beam
23 p4163 A69-41551

Distortion processes in ear, discussing sound pressure level/SPL/ measurements in rigid-walled couplers
23 p4085 A69-41573

Analog computer used to correct body plethysmographic chamber signal distortion due to inspired/expired air temperature and humidity differences
23 p4111 A69-42081

Numerical computation of rate-distortion function R/D/ for certain memoryless message sources, discussing bounds, reduction to minimization problem and applications
24 p4284 A69-42719

N-dimensional theorem for evaluating time continuous channel capacity or rate distortion function of random process
24 p4284 A69-42721

Correcting deficiencies in parametric expressions for rate distortion function of Gaussian process under weighted square error criterion
24 p4281 A69-42722

SIGNAL ENCODING

Multiple transmission principles, examining linear systems, synchronous and asynchronous codes and channel interference
01 p0026 A69-10068

Monochrome pictorial encoding, discussing pulse code modulation, delta modulation and buffer storage techniques
02 p0213 A69-12154

VLF system simulation for evaluating digital communications systems operating in presence of additive atmospheric noise
03 p0390 A69-13205

Fourier coding method for coding images for digital transmission, achieving bandwidth reduction for televised images
04 p0556 A69-14429

Book on information coding and transmission and error detection and correction
04 p0558 A69-15066

Digital computer optimization of representation of sampled data signals on orthogonal basis, using iterative method
06 p0901 A69-17363

Sequence pulse stuffing technique for rate equalization of digital channels, discussing coding effect and capacity for word signaling
07 p1080 A69-19094

Block coding systems performance in digital PCM data transmission through N-ary discrete channels in white Gaussian noise presence, discussing SNR upper bounds
07 p1080 A69-19096

Bandwidth restriction effect on performance of linear codes for digital communication with space vehicles, noting bit and word error probabilities
08 p1276 A69-20597

Detectability parameter for measuring performance of multiple and random access satellite communication system using PN codes
09 p1457 A69-22460

Color signal light gun for aircraft control at airport towers, noting pilot tests for familiarity with signal code
17 p2914 A69-33185

Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
19 p3273 A69-36267

Block coded telemetry systems design for phase coherent space communication employing double conversion superheterodyne phase locked receivers
19 p3277 A69-36487

Nonlinear encoding for picture transmission using nonlinear analog to digital converter
23 p4119 A69-41747

Flexible format adaptive telemetry encoder design, discussing system design and implementation technique with modular units
23 p4119 A69-41748

Rod signals elicited by flashes in human eye measured, deriving relation between nerve signal size in rods and flashes energy
23 p4099 A69-42119

Optical correlation for radar signals phase modulated by pseudorandom codes
24 p4282 A69-42742

SIGNAL FADING

NT SELECTIVE FADING

Frequency diversity for communication in fading environment, relating performance variance to between channel correlation variance
01 p0026 A69-10177

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
01 p0030 A69-10592

Sequential logic for improved signal detectability in frequency-agile search radars, discussing target echo fading models in radar range performance prediction
01 p0033 A69-11008

Wind measurements by radio observation of meteor trails compared with fading drift results
02 p0275 A69-12042

Fading characteristics of radio waves reflected from two different heights in F region over Ahmedabad, India
03 p0385 A69-12915

Coherent PSK system in multipath environment /Rician fading and additive Gaussian white noise/ with phase locked loop for coherent reference extraction
03 p0393 A69-13255

Phase path variations at three closely spaced points, measuring horizontal drifts at E region level, investigating time shift variability in spaced fading records
03 p0421 A69-13329

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
03 p0394 A69-13378

Nonattenuating signals spectra construction by means of generalized function method and Laplace transforms
04 p0583 A69-15134

Absorption effect on fluctuation of signal level propagating in turbulent atmosphere taking into account absorption in water vapor
05 p0717 A69-15634

Probability density distribution of time shifts in binary signal fronts caused by fading, applying results to FM signal reception
05 p0719 A69-16087

Automatic compensation of unwanted signal level fluctuation in measuring setups including microwave generators and detectors
06 p0903 A69-17489

Incidental modulation effect on accuracy, signal loss and sensitivity of pseudorandom code systems
06 p0890 A69-17824

Interrelation between parameters of statistical distribution of amplitude, angular and phase characteristics of signals scattered by extended body performing oscillations
07 p1085 A69-19154

Scintillation fading of VHF beacons on synchronous satellites, noting amplitude fluctuation depth and rate
09 p1457 A69-22461

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading
10 p1653 A69-23106

Multipath fading reduction on line of sight microwave radio relay links by dual space diversity, noting effects of vertical antenna separation, frequency, etc
[IEEE PAPER 68-TP-350-COM]
10 p1656 A69-23535

Subauroral traveling ionospheric disturbances and fading due to diffraction observed by geostationary satellites
10 p1685 A69-23831

Radio signals and concentrated noise amplitudes probability distributions reflected from ionosphere and scattered in troposphere calculated for Rayleigh and log-normal fading
11 p1833 A69-24440

Analog signal transmission through randomly fading channels, proposing pseudorandom phase reversals method for slowly varying multipath communication channels
11 p1834 A69-24552

Statistical characteristics of photocurrent pulse amplitudes during cathode exposure to gas laser outputs
11 p1834 A69-24611

Millimeter wave propagation over water, discussing fading characteristics and atmospheric absorption effects
11 p1836 A69-24989

Propagated ray paths plotted as functions of frequency and launch angle to predict signal dispersions
11 p1837 A69-25003

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise
11 p1839 A69-25298

VLF signal strength minima during transition fading, considering asymptotic statistical distribution
12 p2032 A69-26862

Polarization diversity analysis to avoid fading in microwave scatter links in D and E layers
14 p2410 A69-28829

Latitudinal cut-off of manmade VLF signals in short path through ionosphere to OGO 2 satellite, noting strong noise following signal cut-off
14 p2434 A69-28958

Electro-optical automatic gain control system to reduce atmospheric turbulence produced fluctuations in received optical signal strength
14 p2459 A69-29491

Binary error investigation in noncoherent FSK communication link with nonselective fading, noting Doppler shift
14 p2414 A69-29498

Sporadic E layer frequency characteristics dependence on reflected signal fading, showing fine structure influence and maximum value of mean electron concentration
14 p2442 A69-29733

Two beam short wave channel capacity with beam separation at receiving end, noting dependence on channel properties and fading correlations
15 p2562 A69-30115

Optical communications experiments for quantitative data at 6328 Å on system fading due to scintillation and atmospheric turbulence effects on coherent propagation at 10.6 micron
16 p2748 A69-31564

SNR changes loss factor effect during passage through MTI coherent receiver followed by video integrator
16 p2753 A69-32438

Absorption effect on fluctuation of signal level propagating in turbulent atmosphere taking into account absorption in water vapor
16 p2754 A69-32492

Integral scalar equation describing signal attenuation by acoustically soft disk for mirror-shadow method of ultrasonic flaw detection
18 p3137 A69-35109

Phase modulation in pseudo-noise ionospheric communication system for reducing F region CW signal fading
18 p3104 A69-35308

Fluctuations of polarization induced fading periods in short wave transmissions of Soviet earth satellites, showing relation to ionospheric inhomogeneities
22 p3942 A69-41095

Daytime drift velocities and signal fading characteristics of equatorial and blanketing sporadic E layer irregularities, noting independence of electrojet intensity
23 p4160 A69-42429

Ionospheric electron content measurement from Faraday fading on satellite BE-B, using computer program for data reduction as function of latitude
23 p4160 A69-42434

Meter and decimeter wavelength range short period fading under conditions excluding optical sights, correlating specular and diffuse reflection
24 p4281 A69-42612

SIGNAL FADING RATE

Influence of winds aloft on fading rate of microwaves propagated beyond horizon
01 p0030 A69-10566

Fading velocity short period characteristics and duration and depth of field strength variations over transhorizon path compared with corresponding atmospheric parameters
12 p2028 A69-25897

Frequency measurement of moving spacecraft RF carrier waves at low SNR by analog recording of noisy signal and HF trigger tone, noting data processing and signal fading rate
12 p2038 A69-26051

Quasi-transverse /Q-T/ point time lag on Faraday rotation records at widely spaced frequencies during satellite pass explained by refraction theory
18 p3100 A69-34251

Periodic fading in 42 MHz auroral backscatter by high speed polarization measurements, discussing scatter bursts and pulsating primary electron flux relationship
18 p3102 A69-34950

SIGNAL FLOW GRAPHS

Transistor circuits analysis with aid of signal flow graphs
04 p0575 A69-14461

Signal flow graphs based on matrix methods, discussing loop currents, systems orientation and transfer functions
09 p1475 A69-22600

Transistor circuits analysis with aid of signal flow graphs
14 p2418 A69-28832

SIGNAL GENERATORS

NT FREQUENCY SYNTHESIZERS

NT FUNCTION GENERATORS

Radar return signal generation for computer simulations of airborne radar systems, using digital computer program for time varying radar backscatter
03 p0429 A69-13199

Properties and methods of generation of pseudorandom binary signals, developing linear modeling for multivariable systems
04 p0583 A69-15113

Electric signals by shock and detonation waves, describing detection technique
[WSCI PAPER 68-44]
07 p1240 A69-18360

Pulse compression radar employing same dispersive line for signal generation and reception
08 p1271 A69-19918

Circuit for generation of square wave with frequency as sum or difference of two periodic signal frequencies, discussing SSB modulation
10 p1665 A69-24047

Pseudorandom uniformly distributed numbers generation from noise-like signals produced by shift register with feedback, noting statistical tests
13 p2218 A69-27248

TEM mode networks design for producing phase coherent pulse modulated microwave signals through spectrum S band
13 p2234 A69-28073

Square wave generator for junction laser power supply
13 p2274 A69-28643

Vibration/acoustics digitally controlled environmental testing, describing random test signal generation and random vibration tests
15 p2587 A69-30389

IR detectors defined as transducers producing electrical signal proportional to IR power incident on detector, classifying types
19 p3310 A69-36068

Voltage variation frequency analysis for narrow-band sweep oscillators circuit design
20 p3486 A69-37010

Fluidic pressure signal generator for use in fluidic system frequency response studies, considering design and performance
[ASME PAPER 69-FLCS-40]
21 p3649 A69-38603

Compatible single sideband /CSSB/ modulation suitability for broadcasting, analyzing signal spectrum, demodulation distortion and signal generation methods
23 p4125 A69-42111

SIGNAL MEASUREMENT

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern
01 p0158 A69-11312

Linear polarization of cosmic radio emission measured near galactic anticenter at centimetric wavelengths
03 p0501 A69-13704

Impulse bandwidth measurement error determination by trapezoidal numerical integration
03 p0398 A69-13902

Spectrum analysis of pulse signals by point to point measurements of magnitude and phase of pulse-like time functions, using narrow band filter output
03 p0399 A69-13939

Optimal filter design for estimating state of linear dynamical system in presence of high measurement noise
04 p0582 A69-14877

Radar echoes signal amplitude and phase digital recording with Radicord /radar digitizing and recording/ device
05 p0721 A69-16618

Radar signal parameters measurements consisting of SNR estimation and optimum energy supply determination from SNR estimation
07 p1085 A69-19153

Signal to noise ratio with stochastic and additive noise and signal, showing block diagram of modified estimator
09 p1452 A69-21320

Weak signal optimization of multilevel quantization and corresponding detection performance, discussing asymptotic limits
09 p1456 A69-22293

Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal
10 p1731 A69-23436

Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence
10 p1657 A69-23913

Count rate meter for statistical frequency of signals applied to input of trigger with Poisson distribution of pulse intervals

11 p1884 A69-24734

Radio signal carrier frequency and arrival time measurements, deriving expressions for phase amplitude distortions effects

11 p1835 A69-24959

Receiver filter nonoptimality effects on accuracy of nonenergetic signal parameter measurements

11 p1835 A69-24960

Vertical parabolic antenna array and receiving system for S band transhorizon signal phase and amplitude measurement

11 p1851 A69-24987

Phase and field strength of transequatorial VLF signals, noting behavior during sunrise, day and nighttime

12 p2032 A69-26860

Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction

14 p2436 A69-29053

TR tubes spurious harmonic power generation investigated for intersystem interference reduction and design criteria, discussing effects of incident power, gas pressure and tube geometry

15 p2573 A69-30032

Signal phase measurement accuracy by discrete phase technique ensured by using wideband signals and automatic control of input SNR

15 p2574 A69-30130

Instrumental accuracy of discrete filter during measurement of initial phase of signal dependent on phase structure

15 p2574 A69-30139

Space radiometers energy characteristics calculation taking into account reflecting surface roughness and antennas directional patterns

15 p2575 A69-30338

Resonance measurement of power percentage in single spurious mode of overmoded waveguide, using back to back transducers and reflection at input

15 p2577 A69-30611

Short and ultrashort waves signals amplitude and phase displacement determination device, stressing sensitivity

15 p2570 A69-31088

Faraday rotation measurements of signals from Explorer 22 analyzed to determine scintillation boundary in auroral ionosphere

15 p2605 A69-31443

Voltage standing wave ratio measurement technique at low power level, including tolerated errors, compared with Roberts-von Hippel method

17 p2918 A69-33031

Amplitude ratio measurement for two AC signals of given relative phase shift and same frequency

17 p2975 A69-33615

PCM bit synchronizer signal to noise ratio measurement by input video signal zero crossings counting

19 p3271 A69-36248

Temporal position of pulse signal on noise background determined by measuring signal passage time through linear filter zero point

19 p3278 A69-36596

Phase amplitude recording of radio waves reflected from D and F regions of ionosphere, reversing smoothing process by Fourier methods

21 p3672 A69-38558

Rod signals elicited by flashes in human eye measured, deriving relation between nerve signal size in rods and flashes energy

23 p4099 A69-42119

Quantization optimization of continuous signals with known probability distribution, using quantizers with limited output values

24 p4288 A69-42671

SIGNAL MIXING

Frequency mixing of IR signals with visible laser light in nonlinear crystals to detect IR signals

01 p0089 A69-10180

Microwave signal nonlinear interaction in isotropic positive column

01 p0127 A69-10282

Nonlinear optics, discussing frequency mixing, induced changes in dielectric constant and parametric amplification in microwave region of spectrum

05 p0772 A69-16229

Dynamics of laser response in IR detection by means of optical mixing in He-Ne laser, noting bandwidth

05 p0776 A69-16331

Difference frequency generation by multiple quantum transition from laser medium considered as resonant optical frequency mixing device

07 p1144 A69-18470

Siting two antennas for combining signals to obtain all-around coverage in aircraft communication

08 p1289 A69-20972

Self steered retrodirective antenna arrays with phase synthesizer, combining signals from individual elements at LF levels

11 p1850 A69-24983

Step-up mixer converting modulated IF signal to HF level by HF high power oscillator signal, discussing efficiency

11 p1854 A69-25615

Tunnel diode harmonic mode mixer having IF

14 p2424 A69-29763

Bisensory auditory and visual signals characteristics effects on human reaction time, noting different results for unilateral and bilateral signal pairs

23 p4083 A69-41454

SIGNAL PROCESSING

Microwave signal nonlinear interaction in isotropic positive column

01 p0127 A69-10282

Pulse code modulation /PCM/ time multiplex system companding by switching, discussing SNR measurement

01 p0031 A69-10739

Phase and amplitude variation at output of tuned amplifier, noting graphs and formulas

01 p0047 A69-10786

Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics

02 p0206 A69-11602

Book on communication systems covering signal design, video signals, communication satellites and threshold decoding techniques

03 p0383 A69-12867

High range resolution by pulse to pulse frequency shifting, utilizing existing low resolution equipment by adding signal processing capability to receiver

03 p0388 A69-13181

Digital modified discrete Fourier transform Doppler radar processor for tactical aircraft

03 p0389 A69-13196

VLF system simulation for evaluating digital communications systems operating in presence of additive atmospheric noise

03 p0390 A69-13205

Sampled data delay-lock loop for synchronizing pulsed envelope RF signals, using digital circuitry

03 p0390 A69-13216

Linear processing effect on digital communications systems performance by channel impulse response and input-output relationship as distributional convolution equation

03 p0391 A69-13226

Adaptive processing limited memory receiver for synchronous detection of signals of unknown amplitude

03 p0400 A69-13228

Fast Fourier-Hadamard transform for digitized signal representation, classification, discrimination and efficiency

03 p0392 A69-13249

Optimum demodulation of PAM-FM signal for case of minimum mean square error as performance criterion

03 p0392 A69-13250

Digital processing of Doppler radar signals using matched filter concept

03 p0393 A69-13291

Signal matching in radio interferometer with autonomous receiver, magnetic tape recorders and memory electron beam tube with target

03 p0431 A69-13706

Linear and nonlinear filtering, discussing models for signal process, linear white noise problem, optimal estimates, colored noise and finite dimensional approximation

04 p0581 A69-14696

Band inversion passive generation in pulse compression radar, noting influence on signal modulation laws

04 p0558 A69-15074

Digital filter design with complex coefficients for analytic signals and complex envelopes

04 p0579 A69-15460

Multiple target monopulse radar signal processing technique

04 p0562 A69-15470

Single two dimensional coherent matched filter optical processor for simultaneous synthetic radar antenna beam sharpening and pulse compression

04 p0562 A69-15470

Digital signal processing in radar, sonar and communication

05 p0718 A69-15749

Static and dynamic performance of pancake vortex flow field and application to signal amplification

05 p0704 A69-16000

Signal detection procedures preserving nonparametric detection properties and advantages of sequential procedures, assuming signal corruption by additive noise at input

06 p0888 A69-17531

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas

[AIAA PAPER 69-73] 06 p0905 A69-18121

Signal conversion by multiple modulation in optical communication system, discussing electrooptic modulators and modulation spectrum

07 p1075 A69-18472

Signal multiplexing within linear algebra framework permitting use of orthonormality in receiver construction without orthonormal functions generation in multiplexer

07 p1078 A69-18830

OMEGA 4 100-k Hz ground station telemetry system for acquiring and processing outputs up to 23 FM and two TDM signals applied simultaneously from instrumentation recorder

07 p1105 A69-19103

Signal processors for implementation of monopulse tracking radar with three instead of four beams, investigating accuracy

08 p1270 A69-19855

Approximate noise analysis of phase locked loop with signal clipping

08 p1270 A69-19857

Filters for sampled signals sequences using design simplicity and signal to noise ratio for evaluation and comparison factors

08 p1274 A69-20127

Design and construction of linear digital filters for signal processing, discussing digital filtering of various signals for space research

08 p1297 A69-20303

Signal processing arrays - Conference, Dusseldorf, July 1966

08 p1287 A69-20957

Literature survey and critique of signal processing arrays, discussing synthetic, self phasing, retrodirective correlation and decision theoretic arrays

08 p1287 A69-20958

Signal processing arrays characterized by Fourier series radiation sources, time gating and signal smoothing by narrow band filtering

08 p1287 A69-20959

Hemispherical scanning with small aperture monopoles, spirals, scimitars and wire antennas, discussing various types for multiple beam operations

08 p1290 A69-20973

Hertzian radiometric antennas and signal processing techniques for aerial mapping project for sun

08 p1290 A69-20976

Space frequency filter antennas, using multiple terminals for signal processing as function of frequency and angle

08 p1290 A69-20977

Electronic optical system to process time-varying signals as optical spectrum analyzer for measuring power spectral density of input time function

08 p1317 A69-21086

Pulse frequency signal processing continuous and discrete differentiators, analyzing time delay, constant frequency, accuracy and codes

09 p1454 A69-21755

Soviet book on statistical theory of discrete signal demodulation, covering demodulator analysis and synthesis methods

09 p1455 A69-21933

Two dimensional signal analog correlation in noise background using optical spatial filtering Fraunhofer hologram and input as functions

09 p1499 A69-22276

Signal processing regenerative technique used for multichannel predetection combining, including carrier suppressed signals

09 p1458 A69-22472

Phase and amplitude variation at output of tuned amplifier, noting graphs and formulas

10 p1662 A69-23115

- Signal conditioning for transducers covering piezoelectric devices, thermocouples, resistance transducers, reluctance and differential transformer sensors
10 p1691 A69-23228
- Signal conditioning amplifiers covering carrier and DC amplifiers, differential amplifiers, charge amplifiers and active filters
10 p1691 A69-23230
- Solid state AC voltage circuitry for measuring and controlling charged particle detector signals
10 p1662 A69-23256
- Specifying electrical isolation and error signals suppression due to presence of common mode voltage in passive signal handling and conditioning equipment
10 p1654 A69-23272
- Radar signal cross correlation function calculation with reference function, applying acousto-optical modulator
10 p1694 A69-23539
- Resolving power increase in multibeam antenna, discussing signal demodulation through incident field breakdown
10 p1664 A69-23797
- Signal processing method for achievement of very rapid space scanning with antenna array noting application to radar system
10 p1657 A69-23801
- Narrow band normal steady state random processes applied to signal dispersion by extended oscillating body, obtaining statistical characteristics
11 p1835 A69-24709
- Two oscillator signal combiner based on mutual synchronization, providing output signal free of phase jumps or amplitude fluctuations
11 p1849 A69-24928
- Optimal multidimensional sequential filtration of signal on background of time correlated noise
11 p1859 A69-24967
- Transistorized assembly for amplification of signals emitted by platinum film probes in shock tubes, discussing application to chronometric device triggering
11 p1887 A69-25095
- Data processing system for satellite telemetry signals, describing hardware construction and operation, data readout, etc
11 p1840 A69-25426
- Observation process optimization in system described by linear differential equations of motion reduceable to optimal control problem
12 p2027 A69-25882
- Optical correlator for radar signal processing based on filtering first order diffracted light and integration on photomultiplier
12 p2028 A69-25911
- Quantization error reduction for stochastic signals processing problems
12 p2051 A69-26201
- Bandwidth potential increase of parametric amplifier obtained by adding active filter elements to signal circuit, noting satellite communication band
12 p2039 A69-26380
- Shift registers with binary switching elements for shaping signal spectrum in data transmission systems without phase distortions
12 p2040 A69-26486
- Mismatch between signal and filter effect on output response of matched filter for pseudorandom phase-manipulated signals in receiver
12 p2031 A69-26487
- Signal processing and DC restoration in line scan devices used in land/water terrain analysis
12 p2096 A69-26980
- Computer simulation program for design and evaluation of digital Doppler processor, analyzing performance limitation due to quantization and white noise
12 p2035 A69-27096
- Control signal correction in microwave ferrite modulators, eliminating losses due to screening effect of feeder
13 p2226 A69-27216
- Singularities of optimal filtration for random signals given by differential equations with variable coefficients and white noise
13 p2218 A69-27251
- Bayes theory and nonclassical variation method to solve optimal energy distribution available for identifying weak signals in background noise
14 p2410 A69-28817
- Input signal piecewise linear approximation for investigating response of dynamic automatic control systems to nonstandard input signal
14 p2426 A69-29143
- Optical signal conversion efficiency and threshold relationships in pulsed rangefinding systems, considering effects of noise obeying Poisson distribution
14 p2412 A69-29324
- Limiting incoherent or coherent interference signals at frequency of biphasic or quadriphase digital signal
14 p2413 A69-29483
- Bearing errors reduction in vertical loop HF direction finders for ionospherically propagated signals in dual channel system
14 p2413 A69-29493
- Continuous IR parametric signal amplification in saturable absorber caused by carbon dioxide laser pumping
14 p2459 A69-29601
- Solid state programmable avionics converter for signal processing, information conversion and aircraft control
14 p2405 A69-29687
- Algorithm for optimal digital processing of pulse signals during multilevel quantization in Markov noise, including error analysis
15 p2571 A69-30126
- Orthogonal signal recognition in set of false signals by resolving devices with limited sensitivity, giving design formulas for error probability
15 p2563 A69-30135
- Digital receiver of radar signals for performing binary quantization of input data with subsequent processing by digital computer
15 p2563 A69-30136
- Pulsed noise sensitivity in radar receivers having noise limiter for simple and complex signals
15 p2563 A69-30137
- Complex pulsed radar signals synthesis with uncertainty function having principal maximum and small secondary maxima for radar stations and wideband communications systems
15 p2563 A69-30140
- Residual phase term influence on compressed signal shape, analyzing linearly frequency modulated signal spectrum and sidelobe suppression in pulsed radar
15 p2564 A69-30143
- CdS films vacuum deposited on optically polished single crystals used for converting microwave radio signals into hypersonic waves
15 p2575 A69-30236
- Algorithm for processing binary-quantized echo signal packets, obtaining useful and noise signals relation
15 p2571 A69-30331
- Subtractor performance for processing correlated random signals with different spectral widths in signal delay time indicator, discussing errors
15 p2572 A69-30346
- Linear high resolution gate function in blocking out analog signals or reproducing signal amplitudes at output, noting semiconductor elements utilization
15 p2581 A69-31523
- Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra
16 p2749 A69-31694
- Long distance FM radar signal relaying to central station image processing, showing wideband sum signal especially suitable for transmission
16 p2750 A69-31862
- Automatic conversion receiver of meteorological radar data, examining reception amplitude sensitivity and frequency characteristics
16 p2791 A69-32280
- Bandwidth requirement of single channel monopulse limiter, discussing signals conversion to IF
16 p2761 A69-32471
- Attainable signal compression coefficient in recirculator and relation to recirculator ring parameters, noting feedback coefficient stability
17 p2931 A69-33907
- Resolving power of spectral analyzer with in-phase storage increased by weighted signal treatment
17 p2931 A69-33908
- Analog signal processing concepts based on models simulating mechanical function of ear cochlea
17 p2911 A69-34092
- Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio
17 p2931 A69-34115
- Analog to digital conversion, describing successive approximation technique with built-in sample and hold and discrete analog amplitude modification
17 p2934 A69-34124
- Data compression using orthogonal functions, design curves for given functions, signal characteristics and error avoidance
18 p3103 A69-35060
- Functional signal conversion operations in microelectronic radio equipment, examining components in analog and pulsed devices synthesis
18 p3109 A69-35162
- Encoding and decoding in IR tracking system, analyzing chopping rotating FM reticle pattern
19 p3268 A69-36058
- High bit rate signal conditioning, bit and group synchronization of NRZ PCM, considering gain and power bandwidth limitations and delays
19 p3271 A69-36247
- Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning
19 p3273 A69-36274
- Binary storage system operation during binary quantization of signal, applying results to storage efficiency improvement
19 p3278 A69-36597
- Holographic system to process signals received by pulse Doppler radar, noting real time operation with availability of instantaneous development image storage media
19 p3314 A69-36598
- Energy criteria inconsistency in evaluating frequency band changes attributed to simultaneous narrowing and broadening of different signal power bands
19 p3278 A69-36716
- Fourier transform techniques applications in optics, converting optical signal amplitude and phase information into electrical signal information
19 p3374 A69-36737
- Book on linear digital filtering and discrete spectrum analysis, emphasizing frequency domain description of signals and systems
20 p3487 A69-37146
- Recording devices for storing bandwidth data in time sequence, studying design parameters using light beam recorder implemented with CRT for read-in process
20 p3540 A69-37640
- Double binary PSK system digital computer simulation for satellite communications, investigating filter and limiting effects on performance in error probability terms
20 p3492 A69-37705
- Analog telemetry signals generalizing frequency and pulse position modulations over coherent channels, noting added degrees of freedom function
20 p3492 A69-37713
- Time division multiplexing of asynchronous digital signals from independent sources in continuous or bit stuffing mode, evaluating reliability and efficiencies
20 p3493 A69-37715
- Multispectral imaging system to increase contrast using optical mechanical scanner, multielement dispersing spectrometer and electronic signal processing equipment
20 p3540 A69-37737
- Pulsar search signal processing and digital techniques, using fast folding /cross correlation/ or fast Fourier transform /FFT/ algorithms
20 p3605 A69-37824
- Near constant phase variable attenuator for RF signal containing Doppler information, centering design around p-i-n diode as control element
21 p3681 A69-38410
- Relation between smoothed and filtered linear least squares estimates of signal process in white noise from deriving resolvable identity of covariance function
21 p3754 A69-38432
- Cross correlation coefficient for submillimeter monochromatic wave amplitude and phase fluctuations in turbulent atmospheric boundary layer
21 p3674 A69-39129
- Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer
21 p3762 A69-39379
- [AIAA PAPER 69-851]
- Nonlinear compensator characteristics determination for modifying compensated system output signal under various disturbances with inputs subjected to white noise
21 p3688 A69-39862
- Agricultural and forestry applications of tethered balloons, discussing observation angle effect on spectral signature response and signal preprocessing
22 p4053 A69-40805
- Digital signal processing electronic device for linearizing signals from sensors with nonlinear frequency output by modifying time signal frequency
22 p3915 A69-40935
- Unisensory and multisensory signal processing in cortical and brain stem regions of albino rat by electronic averaging and time histogram techniques
23 p4092 A69-42055

SIGNAL RECEPTION

Q multiplier UHF device as preselection filter for closely spaced channel signals, discussing channel interference reduction

23 p4141 A69-42220

Adaptive signal processing interference rejection technique for suppression of cochannel AM interference in congested VHF tracking receiver

23 p4128 A69-42503

Optimum signals for high resolution radar and communication systems, using transmitter waveform design of autocorrelation and cross correlation functions

23 p4132 A69-42545

Pseudorandom code development and possibilities for radar applications, considering signal processing, antenna requirements, radar signal phase modulation, etc

24 p4281 A69-42741

RF and microwave signal variable delay and processing using laser-acoustic interactions, photodetector and electrical-to-acoustical transducer

24 p4283 A69-43027

SIGNAL RECEPTION

NT SYMBOLS

NT TELEVISION RECEPTION

Optimal coherent reception of frequency diversity signals in multipath channels investigated for noise immunity

01 p0028 A69-10375

Coherent diversity reception of discrete signals in presence of concentrated noise investigated for use of optimal solution circuits for noise elimination

01 p0028 A69-10376

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background

01 p0030 A69-10589

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading

01 p0030 A69-10592

Optimal reception of quantum signals at recording device aperture

02 p0206 A69-11607

Optical receivers for deep space optical communications link assuming PCM scheme

03 p0389 A69-13194

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception

03 p0394 A69-13376

Multichannel communication received signals irregular components, discussing signal phase and amplitude fluctuations correlation coefficients

03 p0394 A69-13519

Correlation of received signals with diversified angles of arrival due to scattering by turbulently excited ionosphere

03 p0399 A69-14129

Simultaneous recording of radio emission from five sections of solar active region, using parabolic antenna and single amplification/reception channel

04 p0651 A69-14377

Portable amplitude and frequency recording system for studying ionosphere by radio signals from artificial satellites

04 p0597 A69-14748

Noise correlation effect on noise stability of diversity reception receiver with weighted coherent summation of signals

04 p0557 A69-14789

Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver

04 p0631 A69-15280

Sonar receiver reduced averaging processing in presence of extended and point targets compared with full averaging processor

04 p0562 A69-15477

Probability density distribution of time shifts in binary signal fronts caused by fading, applying results to FM signal reception

05 p0719 A69-16087

Asymptotic performance of adaptive receivers and application to signals of unknown frequency, noting SNR role

05 p0722 A69-16727

Satellite picture signal reception from ESSA, Nimbus and ATS to ascertain instrument requirements

06 p0888 A69-17651

VHF space communication signals with radio fluctuations along propagation path through turbulent atmosphere, giving diversity reception effect when transmitting linearly polarized waves

06 p0889 A69-17653

Signal resolution during space diversity reception with nondirective or weakly directive antennas and noncorrelated receiver background noise, discussing signal processing

06 p0890 A69-17800

Sensitivity problems in receiving microwave signals from communications satellite at deep space distances, considering noise factors

07 p1077 A69-18669

VLF radio wave phase time or motion variation emanating from ground based source at arbitrary point on earth

07 p1123 A69-18816

Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center

07 p1081 A69-19101

Bit probability of PCM/FM for receiver with IF bandwidth equal to or greater than data rate, limiter-discriminator detection and postdetection filter

07 p1082 A69-19106

Pulse compression radar employing same dispersive line for signal generation and reception

08 p1271 A69-19918

Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods

08 p1276 A69-20591

Microwave converters structural characteristics, calculating noise figure

08 p1285 A69-20594

Hard limiting effect on sum of three or four sinusoidal signals noting output amplitudes, signal suppression and negative suppression effect

09 p1451 A69-21311

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation

09 p1456 A69-22285

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input

09 p1459 A69-22640

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage

09 p1460 A69-22645

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background

10 p1653 A69-23104

Probabilities of error, correct reception and signal cancellation in radio communication systems channels with signal absorption fading

10 p1653 A69-23106

VHF space communication signals with radio fluctuations along propagation path through turbulent atmosphere, giving diversity reception effect when transmitting linearly polarized waves

10 p1775 A69-23191

Resolving power increase in multibeam antenna, discussing signal demodulation through incident field breakdown

10 p1664 A69-23797

Antenna point and astigmatic sources due to phase centers and phase diagrams relations and antenna caustic curves

10 p1664 A69-23798

Shipborne self pointing antenna for reception of telemetry signals from maneuverable missile, discussing tracking and compensation for ship platform motion

10 p1664 A69-23803

Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity

10 p1686 A69-23911

Optimal reception of quantum signals at recording device aperture

11 p1835 A69-24714

Energy gain during diversity reception in presence of random noise calculated, considering signal and noise amplitudes Rayleigh fluctuations

11 p1835 A69-24968

Visual receiving equipment for consistency determination of Loran-C sky wave signals apparent arrival times

12 p2029 A69-26052

Differential absorption by measurement of phase difference of ionospherically propagated incoherent radio wave signals under quasi-longitudinal conditions

12 p2032 A69-26857

Phase and field strength of transequatorial VLF signals, noting behavior during sunrise, day and nighttime

12 p2032 A69-26861

Received signal phase angle error probability in coherent PSK system in Gaussian noise and interference

13 p2219 A69-27666

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception

14 p2410 A69-28822

Single-sideband signal nonlinear distortion and graphical methods for calculation of oscillator tube plate current pulse components

14 p2418 A69-28822

Random motions velocity of ionospheric inhomogeneities by extreme lines delineation of diffraction pattern during amplitude recording of reflected signal

14 p2444 A69-29872

Two beam short wave channel capacity with beam separation at receiving end, noting dependence on channel properties and fading correlations

15 p2562 A69-30115

Potential noise stability of reception in binary communications system with active pause in channel for unknown signal arrival time

15 p2563 A69-30134

Reference oscillator synchronization inaccuracy influence on SNR at output of correlation receiver during reception of signals with pseudonoise modulation

15 p2563 A69-30141

Wideband PM communication system with synchronous reception and automatic control of reception bandwidth, providing improvement in noise stability

15 p2564 A69-30147

Differential equations for optimum reception to synthesize detectors of deterministic signals against nonGaussian background noise using Markov process

15 p2567 A69-30340

Multifunctional radar errorless operation determined from relations between amount of received information, number of channels and SNR

15 p2576 A69-30354

Aoriste antenna to receive radioelectric signals from satellite emitter at distance of 10,000 km

15 p2580 A69-31095

VLF and particle rocket experiment for group delay time between rocket and ground, discussing wave polarization and energy flows meaning

15 p2571 A69-31424

Received radar signal power maximizing problems in planetary exploration, analyzing abelian group real line and circle problems

17 p2993 A69-32831

Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes

17 p2921 A69-33685

Single radio pulse reception time relations by panoramic receiver, considering short wideband and long narrowband pulses

17 p2931 A69-33910

Coherent phase locked loop receiver as carrier and modulation loops combination with parallel bandpass filter for ranging signal reception and FM demodulation

19 p3274 A69-36277

Quasi-optimal synthesis for reception indicator used in radio interferometers for measuring signal amplitudes in presence of normal noise

20 p3504 A69-37009

Circular or linear polarization diversity reception for VHF earth-station-satellite communications through turbulent ionosphere, assuming Rayleigh distribution fading

23 p4115 A69-41585

Monopulse, high power, three channel antenna feed system design for communication satellites, noting orthogonal polarization of transmit and receive functions

23 p4120 A69-41750

Omega aircraft navigation, discussing digital computer applications, SNR environment, carrier interference and accuracy requirements for signal reception

23 p4186 A69-42539

Book on new concepts in radars covering ideal reception, moving targets, autocorrelation, SNR, amplitude distribution, clutter, etc

24 p4283 A69-43168

SIGNAL REFLECTION

- Multifrequency three layer sandwich radomes design for reflectionless sandwich at second frequency
01 p0034 A69-11037
- VHF transhorizon propagation by double reflection from elevated layer in troposphere
01 p0034 A69-11139
- Backscattering diagram of Venus at 40 cm determined from Doppler spectrum and reflected signals range energy distribution
02 p0314 A69-11639
- Ionospheric radio signal reflection measurements based on ground to rocket pulse propagation
02 p0245 A69-12736
- Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
03 p0505 A69-13082
- Statistical characteristics of multibeam signals reflected obliquely from ionosphere
03 p0396 A69-13708
- Pulsed electromagnetic signal reflection from plane boundary of absorbing medium
03 p0397 A69-13711
- Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
05 p0720 A69-16530
- Multichannel HF resolution spectral analyzer of pulses reflected from ionosphere applied to dependence of cross correlation coefficient on frequency separation
06 p0897 A69-17740
- Interrelation between parameters of statistical distribution of amplitude, angular and phase characteristics of signals scattered by extended body performing oscillations
07 p1085 A69-19154
- Reflected radio wave amplitude distributions related to distributions of curvature at reflector
07 p1086 A69-19225
- Electron concentration at front of anisotropic plasma expanding in axial direction in electrodeless induction discharge from measurements of reflected microwaves
09 p1550 A69-22027
- Radio signal reflection from objects of complex configurations by statistical model
09 p1460 A69-22662
- Phase fluctuations measurements of obliquely incident signal reflected from ionosphere performed over distance of 1300 km, showing amplitude dependence
10 p1657 A69-23913
- Long range ionospheric propagation of ultrashort radio waves, obtaining diurnal and seasonal characteristics of reflected signals amplitude and duration
13 p2255 A69-28543
- Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
14 p2515 A69-28764
- Object shapes automatically classified from reflected radio signals, considering correlation description of object effective dispersion surface diagram
14 p2411 A69-28917
- Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception
14 p2436 A69-29055
- Sporadic E layer frequency characteristics dependence on reflected signal fading, showing fine structure influence and maximum value of mean electron concentration
14 p2442 A69-29733
- Algorithm for processing binary-quantized echo signal packets, obtaining useful and noise signals relation
15 p2571 A69-30331
- Signal reflection elimination from underlying surface during aircraft flights by using two antenna array with identical radiation patterns
15 p2567 A69-30345
- Airborne Doppler radar, estimating velocity distribution and density of pulse signals reflected from air and ground targets
15 p2567 A69-30349
- Photography of laser echoes on satellites, tabulating results
15 p2570 A69-31311
- Vertical incidence pulse dispersion with application to Alouette 1, discussing echo width, sounder system bandwidth and frequency gradient of ionospheric virtual height
16 p2750 A69-31977

- Amplitude distribution and correlation functions of signals reflected from precipitations at various polarizations of waves emitted and received
16 p2807 A69-32269
- Depolarization degree of angel echo signals measured by radar station, indicating insects and other foreign particles in atmosphere as reflection sources
16 p2779 A69-32274
- Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
16 p2753 A69-32472
- Scattered ionospheric reflection distribution at evening/morning periods showing deviation, using coherent method
17 p2927 A69-33860
- Signal wave scattering and transmission by ionized medium disturbed by high power pumping wave, studying wave interactions with Born approximation for bounded medium
17 p2928 A69-33871
- Meteor station photorecorder of reflected radio signals, discussing design and performance during meteor shower
17 p2976 A69-33898
- Reflected signals detection with limited frequency spectrum and minimum velocity resolution considered, analyzing signal properties
18 p3104 A69-35265
- Recording technique for measuring short period variations of radio signal reflections altitudes from ionosphere applicable to fast ionospheric processes
20 p3521 A69-37054
- TEM mode reflection coefficient for symmetric parallel plate waveguide composed of adjacent conducting wedges composition and radiating into perfectly reflecting sheet
20 p3507 A69-37839
- Redirection of time varying signal between specified points by arbitrarily spaced antenna array elements with condition involving time delays for validity of retrodirection
23 p4136 A69-41580
- Radar signal reflectivity and precipitation relationship revised on basis of radio signal damping for improved measurement accuracy
23 p4185 A69-42494
- Ionized meteor trails reflection zone altitudes determination by interferometric measurements of phase differences
24 p4311 A69-43508
- SIGNAL STABILIZATION**
- Carbon dioxide laser stabilization using laser profile and three mirror system
01 p0089 A69-10183
- Random filters and stabilization of periodic signals mixed with noise, establishing second order statistics at output
07 p1089 A69-18281
- Filter circuits for stabilization of solid state microwave devices, noting input matching characteristics
11 p1849 A69-24961
- Phase and amplitude stabilization during phase modulated discrete data transmission
19 p3277 A69-36571
- SIGNAL TO NOISE RATIOS**
- Optimal rank algorithm construction for signal detection in noise investigated for use in information transmission systems
01 p0027 A69-10374
- Coherent diversity reception of discrete signals in presence of concentrated noise investigated for use of optimal solution circuits for noise elimination
01 p0028 A69-10376
- Antenna performance optimization, considering gain dependence on diameter, feed, tolerances, noise temperature, etc
[UN PAPER 68-95813] 01 p0043 A69-10517
- Optimum modulation technique determination for single channel voice communication under severe noise conditions
[UN PAPER 68-95851] 01 p0029 A69-10526
- Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background
01 p0030 A69-10589
- Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals
01 p0031 A69-10780
- Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation
01 p0031 A69-10782

- Spatial filtering effectiveness determination by equivalent spatial operations, deriving expression for SNR
01 p0052 A69-10799
- Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeys Kirchhoff approximation
01 p0032 A69-10886
- Pseudorandom scanned TV signal distortion due to flutter and skew introduced by tape recorder, computing system SNR for distortion as additive random noise
01 p0033 A69-10999
- Optimum linear filters for signal detection against background noise using Hodges-Lehmann method
02 p0223 A69-11565
- Probability density distributions for monaural detection of tonal signal in continuous background of Gaussian noise as modified noncentral chi distribution
02 p1201 A69-11821
- Fluid amplifier signal noise sources, using large scale model for investigating jet-knife edge interaction
02 p0195 A69-12078
- Noise emitted by gas filled cavity perturbed by strong coherent signal computed by Nyquist equation
02 p0211 A69-12448
- Waveguide band transition noise of gas discharge source, discussing measurement methods for establishing excess noise ratio
02 p0212 A69-12461
- VLF system simulation for evaluating digital communications systems operating in presence of additive atmospheric noise
03 p0390 A69-13205
- Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
03 p0463 A69-13214
- Noncoherent binary communication detector for slow selective fading channel with additive quasi-stationary noise based on mathematical procedure of non-parametric classification
03 p0390 A69-13215
- Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
03 p0394 A69-13376
- Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions
03 p0394 A69-13398
- Multichannel communication received signals irregular components, discussing signal phase and amplitude fluctuations correlation coefficients
03 p0394 A69-13519
- Noise susceptibility of integrated circuits in digital systems, discussing sources and specifications
03 p0410 A69-13579
- Electrically small beamed receiving arrays in HF band and random noise
03 p0398 A69-13904
- Maximum probability technique for measuring angular coordinate with unknown signal and noise intensity
03 p0399 A69-14132
- Broadband signal and noise performance of direct detection optical receiver consisting of solid state photodiode and baseband amplifier
04 p0556 A69-14283
- Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
04 p0556 A69-14462
- Constrained layer damping and conventional techniques combination for vibration and noise control
04 p0606 A69-14691
- Weak periodic signal separation from noise using single and multichannel analog adders
04 p0597 A69-14848
- Moving window radar detector design for moving targets, giving chart for SNR derivation to obtain given detection probability
04 p0558 A69-15073
- Modems for high data transmission rates on available voice bandwidth channels, noting point to point and multipoint polled networks and signal to noise ratio
04 p0564 A69-15208
- Phase locked loop discriminator in threshold region, discussing effects of loop parameters, detuning error and modulation
04 p0580 A69-15471
- Low noise shaped beam Casssegrain antenna design for space communications earth station service, noting gain/noise temperature figure and antenna construction
05 p0728 A69-15669

SNR analysis at amplifier output with AGC, noting increase with signal strength

05 p0729 A69-16085

Frequency and noise characteristics of gyrator circuits, analyzing Q factor, stability and oscillation sensitivity

05 p0735 A69-16621

Expressions for calculating filtering errors resulting from insufficient information about useful signal and noise characteristics

05 p0740 A69-16668

Asymptotic performance of adaptive receivers and application to signals of unknown frequency, noting SNR role

05 p0722 A69-16727

Pulse amplitude measurements comparison by sampling signal at given time and pulse peak detection, considering SNR

05 p0722 A69-16730

Signal/noise performance of frequency locked loop FM threshold extension demodulator compared to phase locked loop demodulator and conventional FM discriminator

06 p0886 A69-16934

Phase lock loops design with nonlinear filtering elements in low signal to noise region, considering signal demodulation, lock range and threshold

06 p0902 A69-17398

Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field

06 p0895 A69-17460

Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity

06 p0887 A69-17463

Error probability vs SNR and power spectrum of PCM/PM signal with small phase deviation, noting applications in satellite tracking

06 p0889 A69-17656

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas [AIAA PAPER 69-73]

06 p0905 A69-18121

Random filters and stabilization of periodic signals mixed with noise, establishing second order statistics at output

07 p1089 A69-18281

Pulsating radio source pulse arrival time measurements at 1919 plus 21, determining highest SNR

07 p1214 A69-18665

Sensitivity problems in receiving microwave signals from communications satellite at deep space distances, considering noise factors

07 p1077 A69-18669

Direct coupled monolithic IF amplifier with active gain control, analyzing large signal response, stability, available gain and noise behavior

07 p1104 A69-18885

Photoparametric up-converter with optimum SNR, noting suitability of direct detection of amplitude modulated optical signals

07 p1104 A69-18888

Optimized gain control configuration using field effect transistor with broadband control to maintain high signal to noise ratio with low distortion

07 p1115 A69-18889

SNR enhancement in optical receiver by amplification before detection of carrier of modulated optical signal, using quantum amplifier [IEEE PAPER R-5]

07 p1154 A69-19079

Maximum likelihood bit synchronizer for baseband PCM signals in Gaussian noise, stressing system noise performance analysis and measurements

07 p1105 A69-19093

Block coding systems performance in digital PCM data transmission through N-ary discrete channels in white Gaussian noise presence, discussing SNR upper bounds

07 p1080 A69-19096

Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR

07 p1083 A69-19122

Smooth limiter effect on output of SNR for unbalanced and balanced FM discriminators, noting role of error function

07 p1106 A69-19127

Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests

07 p1084 A69-19132

Radar signal parameters measurements consisting of SNR estimation and optimum energy supply determination from SNR estimation

07 p1085 A69-19153

Communication satellite system design by use of baseband equation relating SNR after detection to CNR at detector input

07 p1085 A69-19180

Optimum linear feedback code for additive noise systems with average power constraint on transmitter to increase channel capacity

07 p1085 A69-19181

Optical heterodyne detection of randomly distorted signal beam, noting time invariant scheme yielding largest average SNR in atmospheric turbulence

07 p1087 A69-19642

Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise

07 p1088 A69-19676

Object restoration, discussing data processing method for single variable functions with small signal to noise ratios

07 p1137 A69-19721

Noise-signal receiver amplitude-limitation effect on noise measurement in presence of pulsed interference

07 p1088 A69-19754

Finite IF filter bandwidth degradation of SNR of receiver for biphasic modulated signals using integrate and dump filter

08 p1270 A69-19851

Signal correlation functions measurement errors due to randomly fluctuating delay, investigating additive and multiplicative noise with periodic and random signals

08 p1296 A69-19923

Filters for sampled signals sequences using design simplicity and signal to noise ratio for evaluation and comparison factors

08 p1274 A69-20127

Analysis and optimization of side-looking synthetic aperture radars carried out for resolution, SNR and least squares estimation of target field

08 p1277 A69-20960

Optimal control synthesis for linear plant operating in noise environment, applying dual control theory

08 p1299 A69-21070

Image orthicon tube to detect low intensity pulsed light signals, formulating SNR in terms of resolvable image points

08 p1317 A69-21085

Signal to noise ratio with stochastic and additive noise and signal, showing block diagram of modified estimator

09 p1452 A69-21320

Channel output SNR optimization in AM/FM telemetry system by using automatic gain control, discussing AGC time response and general characteristics

09 p1454 A69-21799

Phase synchronized oscillators in microwave frequency multipliers with improved SNR

09 p1464 A69-22113

Optimal detection of determinate signal and signal with random amplitude and phase, estimating probability of false and correct detection

09 p1456 A69-22286

Constant envelope threshold detection for establishing signal energy in presence of input noise power density variations

09 p1459 A69-22474

Random data detection method applicable to low voltage SNR cases using real time correlation of probability functions

09 p1459 A69-22593

Transmit-receive device noise contribution effect on receiving system noise factor for device insertion immediately before low noise microwave amplifier

09 p1469 A69-22605

Minimum error probability and optimal system regime relationship to noise rejection in memoryless communication investigated for limited repeated transmissions

09 p1459 A69-22639

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input

09 p1459 A69-22640

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage

09 p1460 A69-22645

Optimal reception methods noise stability for AM radio signals based on nonlinear filtration of information parameters of signals received on noise background

10 p1653 A69-23104

Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals

10 p1653 A69-23109

Optimal AM radio reception in presence of fluctuating noise and one AM interference signal with random initial phase of carrier oscillation

10 p1653 A69-23111

SNR variation with PCM using quantization distortion equations applied to coding-decoding facilities not exactly matched with respect to amplitude

10 p1656 A69-23679

Tracking filter steady state oscillation amplitude and phase distributions determined from Fokker-Planck equation for high and low noise levels

11 p1844 A69-24444

Radar transmitter and receiver antennas polarization parameters selection for obtaining maximum SNR at reception point

11 p1833 A69-24444

Algorithm for calculating Bayes estimates for unsteady Gaussian signals separation in presence of unsteady Gaussian noise by least squares method

11 p1833 A69-24444

Self tuning in active filter for detection of weak LF signals in noisy background

11 p1845 A69-24548

DC conversion amplifier commutation induced noises and signal ratio as function of shunt capacitance across vibrator load investigated for increased noise stability

11 p1845 A69-24555

Signal to noise ratio in spectral composition of FM signals in magnetic recorder channels, taking into account parasitic FM and AM

11 p1834 A69-24612

Solid state sampling circuit for low pulse repetition frequencies to improve signal to noise ratio, noting ratio of holding to learning time

11 p1849 A69-24900

Discrete continuous signals transmission with minimum noise along synchronous and asynchronous channels

11 p1835 A69-24953

Radio signal carrier frequency and arrival time measurements, deriving expressions for phase amplitude distortions effects

11 p1835 A69-24959

Optimal multidimensional sequential filtration of signal on background of time correlated noise

11 p1859 A69-24967

Energy gain during diversity reception in presence of random noise calculated, considering signal and noise amplitudes Rayleigh fluctuations

11 p1835 A69-24968

SNR measurement with time interval counter and computer, discussing accuracy

11 p1839 A69-25299

Telemetry system sensitivity as function of noise figure, noting SNR and noise and bandwidth effects on system information handling capability

11 p1840 A69-25300

Carrier to interference ratio /CIR/ between desired path and every other path within predetermined range in microwave system calculated by computer

11 p1840 A69-25312

Optimal scale factor selection to ensure minimum error variance in signal detection against random noise background for input limited range of measuring instrument

12 p2079 A69-25966

Frequency measurement of moving spacecraft RF carrier waves at low SNR by analog recording of noisy signal and HF trigger tone, noting data processing and signal fading rate

12 p2038 A69-26051

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters

12 p2046 A69-26062

Optimum nonstationary Gaussian signals estimation in presence of noise, generalizing Wiener stationary processes filtering theory

12 p2029 A69-26202

Detection of known signals in general noise, describing sufficient conditions for singular detection and estimation

12 p2029 A69-26203

Error bounds for orthogonal signals in additive white Gaussian noise channels for class of generalized decision strategies permitting variable-size list decoding

12 p2029 A69-26204

Permutation modulation for waveform transmission of quantized bandlimited signal, deriving signal to noise ratio

12 p2030 A69-26386

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeying Kirchhoff approximation

12 p2031 A69-26650

- Pi 2 micropulsations at African low latitude stations, considering damping effect on ionospheric micropulsation transmission signal dispersion and SNR
12 p2074 A69-26959
- Noise rejection and carrying capacity of wideband and narrowband discrete systems transmitting complex signals in concentrated noise spectrum
13 p2218 A69-27213
- Pseudorandom uniformly distributed numbers generation from noise-like signals produced by shift register with feedback, noting statistical tests
13 p2218 A69-27248
- Phase analysis in multiple-sensor receivers with high signal to noise ratio, considering phase difference between two stochastic input signals
13 p2220 A69-27938
- Signal to noise ratio requirements for sharp cut-off biphasic digital communication channel
13 p2221 A69-27959
- Signal to noise ratio at output of three stage radio section with preselector, detector and ideal integrator, noting error
13 p2222 A69-28506
- Coherent signal addition in systems with multibeam channels and incomplete beam separation, deriving expressions for signal shape effect on noise rejection
13 p2223 A69-28551
- Deep space telemetry bit errors increased by reference signal phase noises and partial RF signal suppression, calculating equivalent signal to noise ratio degradation
13 p2223 A69-28609
- Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
14 p2410 A69-28826
- Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits
14 p2410 A69-28833
- SNR improvement during low level turbulence measurements, examining correlation between hot-wire anemometers, including error analysis
14 p2446 A69-29018
- Optical signal conversion efficiency and threshold relationships in pulsed rangefinding systems, considering effects of noise obeying Poisson distribution
14 p2412 A69-29324
- Analog correlator performance interpreted as output SNR dependence on input signals and integrating system characteristics, covering filters and finite time integrators
14 p2413 A69-29485
- Performance of oscillating limiter driven by noise corrupted FM signals covering frequency deviations, carrier to noise ratio, etc
14 p2413 A69-29497
- FM discriminator click widths probability distribution function, defining click widths duration from input noise considerations
14 p2422 A69-29553
- Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
14 p2449 A69-29564
- Signal phase measurement accuracy by discrete phase technique ensured by using wideband signals and automatic control of input SNR
15 p2574 A69-30130
- Reference oscillator synchronization inaccuracy influence on SNR at output of correlation receiver during reception of signals with pseudonoise modulation
15 p2563 A69-30141
- Noise stability of receiver network during detection of finite duration noise signal on white noise background, considering various narrow band preselectors
15 p2563 A69-30142
- Noise stability of FM receiver with automatic control of IF amplifier resonance frequency in presence of weak noise
15 p2564 A69-30144
- Noise sensitivity of FM discriminator/limiter in digital binary communication system with FM/PCM-FM/
15 p2564 A69-30145
- Linear distortions effect on signals detection in binary communication channel with fluctuating noise, determining error probability
15 p2564 A69-30146
- Noise parameters at output of logarithmic detector separating two AM signals with overlapping spectra
15 p2564 A69-30148
- Distribution function of SNR from coherent optimal estimate of signal amplitude
15 p2564 A69-30149
- Adaptive signal pattern dependent feedback delta modulation for improved signal/quantization-noise ratio
15 p2565 A69-30177
- Weak periodic signal separation from noise using single and multichannel analog adders
15 p2607 A69-30241
- Algorithm for processing binary-quantized echo signal packets, obtaining useful and noise signals relation
15 p2571 A69-30331
- Spectral correlation characteristics of amplitude modulated signal with background noise at envelope detector output
15 p2576 A69-30348
- Radial velocities measuring tracking rate meter performance for Doppler frequencies, allowing for multiplicative noise
15 p2576 A69-30350
- Multifunctional radar errorless operation determined from relations between amount of received information, number of channels and SNR
15 p2576 A69-30354
- Power spectrum analyzer of weak periodic signal obscured by white noise by zero interactions count of signal and noise mixture
15 p2579 A69-30945
- HF electromagnetic decoupling pressure gage, using transducer with solid state strain gages as sensing elements
15 p2611 A69-31029
- Unknown channels classes epsilon capacity applied to estimating capacity of channels with additive noise, discussing models and upper and lower bounds
15 p2570 A69-31142
- Logic circuits abstract synthesis for detecting signals against noise background using known conditional quantized signal distributions
16 p2749 A69-31627
- Single balanced modulators using square law resistors/space charge limited diodes/, discussing noise properties, conversion losses and terminating conductance
16 p2758 A69-31756
- Radio emission and absorption of cumulus and stratus clouds at millimeter and centimeter wavelengths, giving maximum SNR defined by brightness temperature
16 p2807 A69-32270
- Error analysis of one bit autocorrelation method of spectral estimation, noting decrease in spectral variance with increased sampling rate
16 p2752 A69-32390
- SNR changes loss factor effect during passage through MTI coherent receiver followed by video integrator
16 p2753 A69-32438
- Optimal control synthesis for linear plant operating in noise environment, applying dual control theory
16 p2765 A69-32485
- Maximum a posteriori estimate of modulation on carrier with noise, discussing iterative technique and FM test
17 p2994 A69-32917
- Voltage standing wave ratio measurement technique at low power level, including tolerated errors, compared with Roberts-von Hippel method
17 p2918 A69-33031
- Unidigit and multidigit communications systems performance and transmission characteristics, emphasizing SNR improvements
17 p2918 A69-33066
- Optical heterodyne communication system with single mode and frequency carbon dioxide laser, noting coherent photon noise limit
17 p2919 A69-33086
- Likelihood ratio for random signals detection in white Gaussian noise based on innovation process
17 p2920 A69-33622
- Optimum detection of stochastic signals in Gaussian noise, obtaining eigenfunctions series expansion associated with probability density function
17 p2921 A69-33623
- Robust detection of binary signal in additive noise, using extreme value theory/EVT/ to estimate probability density function and system error and threshold
17 p2944 A69-33624
- Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
17 p3006 A69-33674
- Phase locked loop with flip-flop error detector compared to analog loop, discussing signal to noise ratio
17 p2931 A69-34115
- Preemphasis analysis for FM system optimization to maintain constant output signal to noise ratio throughout baseband
18 p3103 A69-35088
- Optimum signal design to maximize SNR for pulse communications systems with signal energy detection, considering frequency, transmission and filtering characteristics and signal duration
18 p3104 A69-35484
- Temporal discrimination based on signal fluctuations emphasizing signal detection in presence of noise
19 p3373 A69-36057
- Spectral parameters effect on IR instrument SNR, discussing range equations of point and extended sources and radiation-noise-limited detectors
19 p3310 A69-36061
- Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance
19 p3270 A69-36238
- Telemetry transmitter-receiver RF links quality determination, emphasizing nonlinear effects measurement by notch noise tests
19 p3270 A69-36239
- Parametric amplifier developed for unattended satellite communication ground stations, featuring low noise broadband characteristics
19 p3270 A69-36240
- Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance
19 p3270 A69-36241
- PCM bit synchronizer signal to noise ratio measurement by input video signal zero crossings counting
19 p3271 A69-36248
- Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance
19 p3273 A69-36275
- Antenna high noise temperature reduction in single channel combined transmission and reception of tracking and communication data
19 p3275 A69-36328
- AC technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de Haas effects, noting error reduction
19 p3312 A69-36375
- Receiving circuit for AM signal envelope separation in presence of AM interference and fluctuation noise, using converter cascades to effect input signal frequency spectrum symmetry
19 p3277 A69-36568
- False signals formation during random pulse noise in single command channels with PTM coding, noting code value and redundancy
19 p3278 A69-36595
- Optimal linear recursive estimators for uncertain observation, considering false alarm probability
20 p3485 A69-36922
- Cramer-Rao and split-beam tracker techniques compared for optimum bearing error attainable with linear passive sonar array in spatially incoherent noise environment
20 p3576 A69-37322
- Discrete signal detection providing optimum SNR for frequency and time domain differences between signal and noise
20 p3488 A69-37458
- Signal spectrum and SNR of synthetic aperture terrain imaging radar using model, including two dimensional signal and Gaussian additive noise
20 p3489 A69-37638
- Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios
20 p3489 A69-37639
- Optimum phase reference detector obtained at low SNR with Costas loop for fully modulated PSK signals
20 p3492 A69-37710
- Normalized SNR of aperture antennas determined in terms of random signal and noise fields correlation functions
20 p3494 A69-37845
- Linear antenna synthesis for optimal separation of plane waves providing maximum SNR with allowance for statistical phase distribution of field
20 p3508 A69-37943
- Detection characteristics of coherent pulse packet with random initial phase on Gaussian noise background of unknown intensity
20 p3496 A69-37946

Radio relay FM channel data transmission, evaluating cumulative thermal noise due to IF amplification at each station

21 p3672 A69-38653

QRS complex detection time error in noisy electrocardiograms

21 p3667 A69-39442

Optimum filter design for noisy analog feedback system with forward and feedback disturbances, using mean square error criterion between signal and data

21 p3687 A69-39449

Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter

21 p3676 A69-39450

Error probability of Gaussian signal detector in Gaussian noise background determined from quadratic form of probability distribution density

22 p3901 A69-40955

Envelope detection threshold levels definition for low input SNR based on apparent modulation depth reduction

22 p3902 A69-41225

Automatic discriminator design for identifying distorted image in noise based on ideal transmitter and use of split scanning beam

23 p4163 A69-41551

Partially coherent PSK-modulated binary detection, deriving noisy phase reference by narrow band tracking filter, analyzing bit output error as function of SNR

23 p4122 A69-41772

M-ary noncoherent signal structures requiring less transmission bandwidth than conventional FSK, deriving SNR

23 p4122 A69-41773

Analyzing conditions for variable magnetic and electric noise occurrence at input of nuclear precession magnetometer used in field strengths measurements

23 p4165 A69-41852

Waveguide band filter with reflecting ferrite resonators and frequency matched loads for improved microwave SNR

23 p4139 A69-41945

Combined eye and ear identification of bimodally presented signals in noise over oscilloscope and earphones, noting significance of independent observers model

23 p4111 A69-42168

Natural and man-made radio noise measurements, including formula for calculating signal strength of coherent interference

23 p4126 A69-42217

Interference prediction models of equipment emissions and susceptibility thresholds based on limited spectrum signature data

23 p4126 A69-42223

Phase-locked loop demodulator ability to acquire and remain locked on signal under noise and pulse interference

23 p4145 A69-42230

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters

23 p4146 A69-42447

Digital data transition tracking loop mean square phase noise computed as function of input SNR by Fokker-Planck technique

23 p4130 A69-42514

Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR

23 p4130 A69-42520

Cascaded limiter and phase detector, analyzing SNR transfer characteristics for specific PM signals

23 p4131 A69-42525

Omega aircraft navigation, discussing digital computer applications, SNR environment, carrier interference and accuracy requirements for signal reception

23 p4186 A69-42539

Random signal behavior in hybrid correlator with analog and sampling channels, noting SNR expression and weak signal detection

24 p4283 A69-43139

SNR improvement by antenna array optimization

24 p4287 A69-43140

Integrated circuit digital filters design characterized by weight coefficients containing Lanczos factor for application to processing of signal transmitted from space vehicles

01 p0038 A69-10071

Frequency diversity for communication in fading environment, relating performance variance to between channel correlation variance

01 p0026 A69-10177

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error

01 p0031 A69-10785

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeys Kirchhoff approximation

01 p0032 A69-10886

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes

01 p0032 A69-10887

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

02 p0206 A69-11604

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data

02 p0214 A69-11612

Transient signal propagation in lossless isotropic and homogeneous plasma for Gaussian pulse modulated carrier, discussing amplitude change and carrier phase distortion

02 p0290 A69-12351

Educational TV satellites, considering stationary ASCEND system with high power transmitters

02 p0335 A69-12747

Sequential signal design for feedback channels, emphasizing single set subject to peak and average power constraints in time continuous transmission

03 p0408 A69-12868

Adaptive compression system for predicting and encoding video data for transmission in noiseless channel

03 p0427 A69-12869

Communication satellites systems, discussing Intelsat satellite specifications and modulation methods for multiple access

03 p0383 A69-12870

Atmospheric limitations for laser communications, discussing scattering and absorption effects

03 p0389 A69-13193

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits

04 p0556 A69-14462

Optical waveguide with optimum refractive index distribution for equalizing group velocities of different modes and minimizing waveform distortion

04 p0575 A69-14749

Correlation function and spectrum analysis of passage of random noise and signal through multistage frequency multiplier

04 p0557 A69-14777

Gaussian channels capacity, studying supremum of information transmission rates with small error probability

04 p0558 A69-15006

Waveform distortions of trapezoidal wave passing through Gaussian filter in pulse transmission, discussing ideal filter effects on degradation

05 p0719 A69-16296

Symmetric M-ary signaling scheme, considering given calls signal vector transmission through communication channel

05 p0720 A69-16297

Lower ionospheric diurnal variations in electron density observed by beacon satellite, noting effect on high power VHF forward scatter circuits

05 p0757 A69-16405

Automatic phase control and transient processes in resonant amplifier in presence of phase discontinuities of input signal

05 p0721 A69-16533

Interpolation filters with restricted transmission zeros in transmission function capable of reconstructing continuous function from equidistant sample values

05 p0735 A69-16617

Maximum transmission coefficient of distributed parameter signal detector compared with concentrated detector coefficient using ordinary and tunnel diodes

05 p0736 A69-16787

Radio channel circuit outlined for tracking interplanetary spacecraft and probes with signal delay time prediction

06 p0888 A69-17621

Statistical aspects of uncertainty function of linearly frequency modulated signals for nonstationary random process of phase errors

06 p0889 A69-17798

Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station

06 p0890 A69-17799

Block coding for transmitting across noisy binary symmetric channel accompanied by noiseless delayless feedback channel

06 p0891 A69-17864

Two and three frequency techniques for measuring group delay time of communication channels

07 p1076 A69-18557

World satellite telecommunications network, discussing recommendations with reference to signal transmission, acoustic echoes, etc

07 p1079 A69-18942

Maximum likelihood bit synchronizer for baseband PCM signals in Gaussian noise, stressing system noise performance analysis and measurements

07 p1105 A69-19093

Statistical radomes design, analyzing dielectric constant and wall thickness tolerances effects on amplitude and phase of transmitted wave

07 p1111 A69-19531

Transponders for communication satellites, discussing design constraints, reliability and transmission capacity increase

08 p1279 A69-19905

Signal interference criteria in considering frequency sharing between communication satellite systems and terrestrial radio services

09 p1449 A69-21273

Minimum bandwidth of M real equal energy signals with specified code or correlation matrix, noting optimum waveforms

09 p1452 A69-21313

Error probability for transmission of one of M orthogonal, equally likely, equal energy signals over generalized incoherent channel

09 p1452 A69-21314

Intermittent feedback channel for transmitter using orthogonal signals, noting smaller error probability and improved communication reliability

09 p1452 A69-21315

Coding schemes for memoryless Gaussian channels with feedback considering error probabilities

09 p1454 A69-21794

Radio frequency signal transmission between orbiting spacecraft and vehicle entering VM-10 model atmosphere, examining near wake approximations and plasma-electromagnetic interaction

09 p1455 A69-22002

Optimum selection of modulation indices for multitone phase modulation by graphical method, noting tolerance insensitivity

09 p1457 A69-22463

Joint filter optimization in combination analog-digital hybrid multilevel transmission system

09 p1457 A69-22465

Sunde model of troposcatter channel as transmission medium in computer simulation of adaptive digital communication scheme for selective fading channels

09 p1458 A69-22471

OMEGA VLF navigational transmission phase delay variations and field strength measurements on transatlantic propagation path, noting effect of directional change

09 p1538 A69-22595

Energy spectra and angular dependence characteristics of electromagnetic wave scattered on statistically uneven surface studied by vector form of Kirchhoff integral

09 p1459 A69-22635

Minimum error probability and optimal system regime relationship to noise rejection in memoryless

communication investigated for limited repeated transmissions

09 p1459 A69-22639

Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error

10 p1653 A69-23114

Pressure transducers with variable reluctance and magnetic signal transmission techniques

10 p1690 A69-23226

VLF transequatorial propagation variance from magnetic equator to midlatitude confirmed through phase and amplitude records of multisite observations

10 p1655 A69-23416

Antenna gain increase, using matched pair of Cassegrain reflectors with one primary source

10 p1664 A69-23799

Mechanical damping and electrical matching effects on bandwidth of piezotransducer in ultrasonic flaw detection equipment

10 p1697 A69-24073

Single circuit parametric oscillator excitation by small external narrow band signal, using method of slowly varying amplitudes

11 p1845 A69-24453

Analog signal transmission through randomly fading channels, proposing pseudorandom phase reversals method for slowly varying multipath communication channels

11 p1834 A69-24552

Multistage detection systems probability characteristics with parallel stage realization, taking into account signal losses

11 p1835 A69-24711

Directional antennas gain loss on ground sections calculated on basis of difference-phase measurements data

11 p1847 A69-24719

Discrete continuous signals transmission with minimum noise along synchronous and asynchronous channels

11 p1835 A69-24953

Receiver filter nonoptimality effects on accuracy of nonenergetic signal parameter measurements

11 p1835 A69-24960

Transient signal propagation through cold inhomogeneous plasma with electron density decreasing exponentially in direction of propagation

11 p1836 A69-24990

System switch, separating RF bands according to frequency and polarization for simultaneous transmission from parabolic horn antenna

11 p1854 A69-25618

Wave reflections due to rotationally symmetrical jump in circular waveguide cross section, using orthogonal expansion to solve resulting boundary value problem

11 p1855 A69-25622

Transmission characteristics of narrow band microwave bandpass filters with power cascade and Chebyshev behavior

11 p1857 A69-25677

Optimal communication by signal feedback link between transmitter and receiver based on optimum control and dynamic programming

12 p2046 A69-26060

Control signal interconnection of subsystems at different levels of hierarchical structure systems

12 p2050 A69-26089

Focusing factor in stratified medium with refractive index depending exponentially on height

12 p2029 A69-26100

Transmission system with baseband spectrum divided into subbands, cascade phase modulating carrier in multiplication chain

12 p2030 A69-26385

Permutation modulation for waveform transmission of quantized bandlimited signal, deriving signal to noise ratio

12 p2030 A69-26386

Graphs determining interference levels for optimum shielding, suppression, signal parameters and waveforms for pulses, step functions, CW signals and for military technology

12 p2030 A69-26471

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeying Kirchhoff approximation

12 p2031 A69-26650

Doppler signal envelope cross correlation coefficient in two channel system, determining mutual density distribution for envelopes

12 p2031 A69-26651

Antenna suspension height variation effects on HF signals in ionospheric scattering lines

12 p2032 A69-26705

VLF wave propagation along mixed path in curved earth-ionosphere waveguide, considering reflection and transmission coefficients of modes

12 p2032 A69-26858

VLF signal strength minima during transition fading, considering asymptotic statistical distribution

12 p2032 A69-26862

Monograph on discrete signals transmission by FM, considering secondary signal compression device and wire communication channels

12 p2033 A69-26866

Noise rejection and carrying capacity of wideband and narrowband discrete systems transmitting complex signals in concentrated noise spectrum

13 p2218 A69-27213

Delay time of pulse signals in radio channel transmission described by standard deviation of channel properties

13 p2218 A69-27215

Rms error for reproduction of satellite signal transmitted through continuous Gaussian channel assessed by numerical calculation

13 p2219 A69-27697

Synchronized backward wave oscillator transmitting tube for space communication stations

13 p2232 A69-28058

Simultaneous passage of useful and noise signals through differential frequency discriminator, determining spectrum by phase detection and detuned circuits

14 p2410 A69-28833

Large signal transit time effects in MOS transistor, noting drain current response

14 p2418 A69-28891

Computer based data handling and display for relating remote sensor signals to ground truth information derived from aerial photographs

14 p2416 A69-29534

Monograph on wave propagation and multiple scattering in random continuum, emphasizing scalar wave equation solutions

15 p2564 A69-30150

Spectral correlation characteristics of amplitude modulated signal with background noise at envelope detector output

15 p2576 A69-30348

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms

16 p2751 A69-32103

Signal propagation in channel subject to static investigated using Fokker-Planck type equation in statistical mechanics methods

16 p2753 A69-32437

Automatic phase control and transient processes in resonant amplifier in presence of phase discontinuities of input signal

16 p2753 A69-32474

Interstellar communication in search for extraterrestrial intelligence, discussing radio objects, OH emission regions and pulsating stars

17 p3028 A69-32971

Unidigit and multidigit communications systems performance and transmission characteristics, emphasizing SNR improvements

17 p2918 A69-33066

Differential equations as Hamiltonian function for signal path, travel time and frequency variation in anisotropic nonpermanent absorbing medium

17 p2924 A69-33836

Phase and amplitude stabilization during phase modulated discrete data transmission

19 p3277 A69-36571

Temporal position of pulse signal on noise background determined by measuring signal passage time through linear filter zero point

19 p3278 A69-36596

Transient oscillations in ammonia maser oscillator observation based on switching achieved by signal injection into cavity at molecular resonance frequency

19 p3339 A69-36825

Tropospheric influence on pulse signal propagation, measuring pulse function of propagation path, hypothesizing signal reflection from tropospheric boundary layers

19 p3279 A69-36879

Asymptotic evaluation of complex frequency integrals in theory of radiation from transient sources in dispersive media, interpreting results in terms of space-time rays

20 p3494 A69-37841

Monopulse, high power, three channel antenna feed system design for communication satellites, noting

orthogonal polarization of transmit and receive functions

23 p4120 A69-41750

Numerical computation of rate-distortion function R/D/ for certain memoryless message sources, discussing bounds, reduction to minimization problem and applications

24 p4284 A69-42719

Static and dynamic characteristics of fluid pressure signal transmitter between members with relative rotary motion

24 p4256 A69-43300

Hologram transmission by heterodyne scanning reference beam technique

24 p4283 A69-43333

SIGNATURES

NT MAGNETIC SIGNATURES

NT RADAR SIGNATURES

Mechanical, electromagnetic and chemical signatures monitoring and analysis during system operation

06 p0932 A69-17875

Electromagnetic field signatures in optical IR spectrum of satellite-borne sensors, analyzing spectral, spatial and temporal distributions, polarization and phase

19 p3309 A69-36060

SIGNS (SYMBOLS)

U SYMBOLS

SIGNS AND SYMPTOMS

NT BRADYCARDIA

NT VERTIGO

Decompression disease symptoms from standpoint of gas bubbles formation in blood vessels, examining factors preventing air metabolism

24 p4269 A69-43414

SIKHOTE-ALIN METEORITE

Sikhote-Alin iron meteorite high temperature oxidation and ablation and simulation with Fe-Ni alloy, noting phase compositions and structure

01 p0025 A69-11373

Meteorite dust spherules at Tungusk and Sikhote-Alin falls investigated for mineral composition using X ray analysis

01 p0160 A69-11383

SIKORSKY AIRCRAFT

NT CH-34 HELICOPTER

NT CH-54 HELICOPTER

NT S-61 HELICOPTER

NT SH-3 HELICOPTER

Self excited rotor blade oscillation at high subsonic Mach numbers during flight tests of Sikorsky NH-3A compound helicopter

07 p1053 A69-18870

Sikorsky ABC/advancing blade concept/ helicopter program, discussing advantages and small scale wind tunnel experiments

07 p1055 A69-19558

Skorsky HH-3F helicopters electronic equipment, discussing communication and navigation aids, search and recovery missions, etc

10 p1662 A69-23222

SIKORSKY HSS-2 HELICOPTER

U SH-3 HELICOPTER

SIKORSKY MILITARY HELICOPTERS

U MILITARY HELICOPTERS

SIKORSKY S-61 HELICOPTER

U S-61 HELICOPTER

SIKORSKY S-64 HELICOPTER

U CH-54 HELICOPTER

SILANES

NT CHLOROSILANES

Silane coupling effect on composite properties of glass fiber filled injection molded polypropylene, noting interface phenomenon

08 p1337 A69-20482

Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation

16 p2803 A69-31806

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C

19 p3328 A69-36161

SILENCERS

Gas turbine exhaust silencer performance correlated in laboratory and in service

05 p0812 A69-16144

Power generation in combat environment by tested self contained organic Rankine silent engine, discussing working fluid properties

07 p1058 A69-18309

SILICA

U SILICON DIOXIDE

SILICA GLASS

Silica glass hardness relationship to pressure induced densification at low temperatures

03 p0453 A69-13616

Gettering effect in silicon of phosphosilicate glass surface layer and underlying phosphorus layer on gold and copper

03 p0487 A69-13640

Silicon dioxide glass thermal conductivity at very low temperature

09 p1493 A69-21426

Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hyper-velocity from low energy impacts [AIAA PAPER 69-367]

13 p2366 A69-28299

Composite laminated glass structures employed to improve safety characteristics of glass or to achieve special optical properties

21 p3752 A69-38934

Silicate glass impurity droplet formations on alumina single crystals polished surfaces analyzed by electron microprobe as function of high temperature

23 p4176 A69-41597

Cross sections of charge carrier capture by ions in gamma irradiated P-Al-Si glass with metal oxides additions measured for evaluating radiation stability improvement

23 p4180 A69-42470

Gamma radiation effect on AgCl-Cu redox state in AgCl activated, heat treated Na-Al-B-Si glass, using EPR method

23 p4180 A69-42471

SILICATES

NT ALUMINUM SILICATES

NT ANDESITE

NT BERYL

NT CORDIERITE

NT ENSTATITE

NT FAYALITE

NT FELDSPARS

NT GARNETS

NT MONTMORILLONITE

NT NEPHELINE

NT PYROXENES

NT YTTRIUM-ALUMINUM GARNET

NT YTTRIUM-IRON GARNET

Gettering effect in silicon of phosphosilicate glass surface layer and underlying phosphorus layer on gold and copper

03 p0487 A69-13640

Magnesium silicate crystal structure, discussing transformations under high pressure, crystallochemistry and implications for physics of earth mantle

08 p1267 A69-19904

Radiation ages of silicate inclusions in iron meteorites based on Sr evolution diagrams

08 p1405 A69-20927

IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder

10 p1778 A69-23414

Reddened M supergiant 119 Tauri IR spectra and IR absorption by CO and SiO molecules in stellar atmosphere and silicate mineral in interstellar grains

10 p1786 A69-24104

Chemical and mineralogical study of Kodaikanal meteorite silicate and metal phases, using optical, X ray and electron microprobe techniques

11 p1953 A69-24335

Electrostatic charge distribution on ultrahigh vacuum cleaved silicates including instrumentation, UV irradiation, half life, Paschen relation, etc

13 p2322 A69-28018

Percorite phase in nickel analog of clinchrosytile formed under hydrothermal conditions in Wolf Creek meteorite cracks

18 p3199 A69-34824

Moon composition and similarities to Mars explained by silicates in solar system raw material

20 p3604 A69-37563

Interstellar grains formation and composition, suggesting mixture of graphite particles in carbon stars and silicates in oxygen-rich giants

20 p3615 A69-38260

Data evaluation, measurement accuracy and statistical procedure, using silicates chemical analysis

22 p3897 A69-40984

Shear load, cohesion and internal friction measurements of low bulk density particulate silicates of complex shape, noting significance for lunar comparison

24 p4383 A69-43040

SILICIDES

NT DISILICIDES

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures

02 p0264 A69-11883

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration

09 p1523 A69-21740

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures

18 p3156 A69-35043

Temperature effect on grain size, crystal orientation, microhardness and heat resistance of diffusion Si coatings on Mo

20 p3560 A69-37361

Microstructure and X ray structure compared for two and three component chromide, titanide and silicide diffusion layers on Nb, discussing phase composition

20 p3563 A69-37820

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration

20 p3585 A69-38216

Oxidation resistant silicide coatings for tantalum and tungsten alloys at elevated temperatures

21 p3730 A69-38673

Silicide and B-modified coatings on Mo, noting improved high temperature oxidation resistance under thermocycling

22 p3957 A69-40972

SILICON

Temperature dependence of hot electron drift velocity in silicon at high electric fields, using space charge perturbation theory

01 p0135 A69-10120

Radiation, Stark and van der Waals level broadening constants for Mg I and Si I calculated to interpret solar and stellar spectral line widths

02 p0310 A69-11454

Boron diffusion in silicon, using nitrogen carrier and boron trichloride diffusant at high temperature for determination of critical oxygen flow rate

02 p0297 A69-11994

Localized vibration modes of defects and IR absorption bands in compensated Si doped GaAs

02 p0299 A69-12402

Structure of /111/ single crystal Si surface after chemical-mechanical polishing and ultrahigh vacuum annealing, noting presence of Fe impurity

02 p0301 A69-12660

Carbon formation during production of high purity semiconductor Si, using C 14 tagged hydrogen impurities and methylated chlorine silanes contained in silicochloroform

03 p0486 A69-13635

Heat capacity of diamond-like semiconducting Si, GaAs and GaP calculated on basis of quasi-chain dynamics of covalent crystals

03 p0490 A69-13943

Si and iron impurities effects on duraluminum alloy structure and mechanical and plastic properties for fabrication from granules and rolling from ingots

03 p0452 A69-14120

Luminescence spectra due to radiative recombination of optically injected carriers in Co 60 gamma ray and neutron irradiated Si at low temperature

03 p0494 A69-14243

Direct reading instrument using four point probe and two analog computing circuits for Si and Ge resistivity measurements

04 p0599 A69-15019

Distribution of current carrier concentration and mobility in p-type silicon doped with phosphorus ions

04 p0643 A69-15254

N-type Si surface photopotential, conductivity and capacitance during anodic oxidation in absolute ethylene glycol

04 p0643 A69-15260

Si diffusion rate in single crystal and polycrystalline Mo, using various donor materials

05 p0780 A69-15990

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion

05 p0808 A69-16216

Shot noise in Si Schottky barrier diodes for frequencies between 100 Hz and 50 kHz

05 p0734 A69-16564

Recovery of carrier concentration and lifetime in n- and p-type Si during annealing after irradiation by 10 Mev electrons, noting impurities effects

06 p0974 A69-16865

Disordered regions in electron irradiated silicon noting defect clusters concentration effect on electrical properties

06 p0974 A69-16866

Neutron irradiation produced defects in p-type Si at 76 K, measuring Hall effect and electrical conductivity

06 p0975 A69-16867

Majority and minority carrier trapping in neutron irradiated Si diodes, measuring transient junction capacitance recovery

06 p0975 A69-16868

Oxygen absorption coefficients for atomic silicon in spectral range of Schumann-Runge bands

06 p0960 A69-17009

Oxide impurity effects causing potential shifts in covered by thick oxide layer studied with metal-oxide Si electrical measurement and radiochemical analysis

07 p1072 A69-18272

Forward transient response characteristics of high resistivity, long base, low lifetime p-n-n silicon diodes doped with Au, noting voltage oscillations

07 p1101 A69-18652

Majority carrier concentration changes in P-doped n-type Si during fast electron bombardment, discussing relative effect of A and E centers

07 p1199 A69-18684

Optical parameters for system of isotropic nonabsorbing film on isotropic absorbing substrate determined by ellipsometric method, noting Si optical constants

07 p1201 A69-19648

Li atoms and O interactions with electron radiation produced defects in Si studied by IR spectroscopy

09 p1554 A69-21337

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials

09 p1462 A69-21477

Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps

09 p1555 A69-21478

Strong p-type conductivity of silicon doped with beryllium by thermal diffusion, giving electrical and optical measurements

09 p1556 A69-21652

Forward volt-ampere characteristics and differential resistance peak of Schottky barrier diode on doped Si

09 p1557 A69-21744

Effects of opacity arising from silicon bound-free transition on emergent fluxes and hydrogen line profiles for A and late B stellar atmospheres

09 p1604 A69-22403

O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations

09 p1543 A69-22404

Silicon vidicon for near IR and visible radiation viewing describing spectral response, energy transfer characteristics, resolution and dark leakage currents

09 p1466 A69-22456

Impurity heterogeneities in unoxidized and oxidized silicon slices from electron probe X ray microanalyzer, discussing thermal oxidation effects

10 p1743 A69-23171

Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects

10 p1747 A69-23713

Electronic properties of beryllium doped silicon studied with IR absorption spectroscopy and electrical measurements, describing Be thermal diffusion

10 p1747 A69-23989

Annealing temperature of radiation defects in phosphorus doped silicon, discussing isochronal recovery characteristics of solar cells with different donor and oxygen concentrations

10 p1747 A69-24006

Si IMPATT diode current and voltage waveforms of oscillation, noting small signal theory inapplicability

12 p2036 A69-25914

Relative intensities of selected Si two multiplets calculated and compared with solar spectrum and plasma source ZETA values

13 p2326 A69-27551

Relative transition probabilities for visible Si atom lines, noting disagreement with LS coupling predictions and solar Si abundance determination

13 p2340 A69-27580

Stellar Si burning at constant temperature studied for various initial abundance compositions, noting convergence toward pure Si relaxation

14 p2529 A69-29983

Validity range of nuclear quasi-equilibrium approximation for stellar silicon burning, discussing time rates of nuclear abundance changes and temperature effect
14 p2529 A69-29984

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials
15 p2578 A69-30722

Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps
15 p2669 A69-30723

Glass ceramic coated and bonded silicon semiconductor material in integrated circuits devices fabrication, noting matched thermal expansion
15 p2669 A69-31040

Oscillator strengths calculated for transitions in Si III using dipole length and velocity matrix elements, comparing many electron correlation problem approximations
15 p2656 A69-31158

Silicon in iron meteorites and earth core determined by activation analysis on octahedrites, hexahedrites and ataxites
16 p2865 A69-32807

Si planar IMPATT diodes anomalous mode continuous wave UHF oscillations, noting DC density and DC/RF power conversion efficiency
17 p2934 A69-32846

Widths measurements of van der Waals broadened Si I spectral lines by shock tube and scanning Fabry-Perot interferometer, using argon as perturbing gas
18 p3116 A69-34449

Oxygen 18 adsorption on silicon activation analysis measurements used to obtain kinetic curve for chemisorption from monolayers
18 p3183 A69-35107

Nanosecond pulse generator circuits based on four layer Si diodes designed for semiconductor laser excitation
18 p3153 A69-35257

Lithium-doped silicon solar cells development for radiation environments, discussing contractor functions, dopants, etc
19 p3251 A69-35692

Imperfection photoconductivity in electron irradiated Li-doped Si annealed at room temperature, noting level rearrangement in O rich material
19 p3382 A69-35696

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals
19 p3377 A69-36178

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values
19 p3383 A69-36447

Optical pumping in pure Si at 77 K, noting dichroism conditions for dipolar electric transitions in cubic crystal
19 p3389 A69-36548

GaAs IMPATT diodes breakdown voltage, impurity density and outer layer thickness compared with Si IMPATT diodes
20 p3504 A69-36914

Electrical conductivity anisotropy in isotropic germanium and silicon semiconductors, noting effect of metallic contact insertion
20 p3584 A69-37786

Metal-polymer-metal and metal-polymer-silicon thin film structures analysis for polymers bulk properties and insulator-silicon interface, noting dipole-like relaxation
21 p3782 A69-39464

Strong doping criterion for Si with deep level impurity centers based on electron spectra of fast surface traps
22 p3992 A69-40604

Microwave reflection technique for transient and quiescent electrical conductivity of Si, noting nonohmic contacts
22 p3997 A69-41226

Lithium doped silicon acceptor concentration resulting from electron irradiation damage decreased by annealing at 300 degrees K
23 p4197 A69-41498

Spacecraft Si cell solar array using self rigidizing folded panels with flexible substrates for increased power/weight and power/stowage volume ratios
23 p4073 A69-42290

Electron irradiation-temperature dependence of introduction rate and room temperature annealing of carrier-removal defects in Li-doped Si
24 p4360 A69-42647

SILICON ALLOYS

Electroreflectance spectra of Ge-Si alloys, noting concentration dependence and band structure of Si and Ge
02 p0295 A69-11784

Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation
04 p0614 A69-14575

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies
04 p0614 A69-14578

IR photoconductivity spectra at surface of gold doped silicon, establishing monopolarity
08 p1373 A69-21073

Primary silicon crystals content and grain size effect on wear of high silicon aluminum alloys
09 p1526 A69-22281

V phase structure and V and E phase lattice constants for ternary systems /Ti, Zr, Nb or Ta/-Ni, Co or Fe/-Si or Ge/
10 p1708 A69-22992

Silicon particle sizes in Al-Si system investigated for interactions with dislocations as function of strain and for effect in dispersion hardening
10 p1714 A69-23980

Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation
15 p2638 A69-30276

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies
15 p2638 A69-30279

Cu, Ni, Co, Cr and Ti effect on high temperature mechanical properties and stability after prolonged annealing of Al-Si alloy with added 1 percent Mg
22 p3968 A69-40063

SILICON CARBIDES

Silicon carbide filament fabrication by chemical vapor deposition, noting physical and mechanical properties and application to other refractories
01 p0097 A69-10645

High aspect ratio submicroscopic whiskers of beta-SiC, investigating rheological properties of suspensions in various fluids
01 p0102 A69-11260

X ray diffraction used to measure alpha-SiC whiskers orientation in polymeric matrices
01 p0102 A69-11262

Silicon carbide deposition from liquid organic compounds using film boiling applied on heated tungsten wire substrate
02 p0252 A69-11804

High temperature tensile strengths of uncoated boron filament and filament coated with silicon carbide
02 p0270 A69-12731

Laminates and filament wound structures using carbon fibers with silicon carbide whiskerized surfaces, noting compositing and laminating techniques
08 p1339 A69-20501

Whiskerizing technique for growing small beta SiC single crystals on graphite filament surfaces, noting changes in interface geometry and chemistry
08 p1341 A69-20511

Silicon carbide fiber surfaces nature and interaction with coupling agents, epoxy and resin components, noting chemical and electron microprobe analysis
08 p1341 A69-20515

Cubic /beta/ silicon carbide films deposition by volatilization in presence of acetylene
09 p1554 A69-21350

Chemical processes in silicon carbide due to reactive deposition and chemical conversion, noting silicon growth mechanism involving outward diffusion
09 p1554 A69-21351

Silicon carbide filaments strength at high temperatures noting vapor deposition, mechanical properties and applications
09 p1524 A69-22072

Mass spectrometric analysis of silicon carbide for inhomogeneity in sample, noting metallic impurities
09 p1448 A69-22313

SiC part fabrication by chemical vapor deposition through pyrolysis of chlorosilanes from vapor state onto machined substrates of graphite and metals
09 p1509 A69-22344

High performance silicon carbide backward diode, discussing device design and operational characteristics
09 p1470 A69-22787

Current voltage characteristics in silicon carbide diodes having negative differential resistance
10 p1663 A69-23571

Silicon carbide particle growth and motion in carbon star atmospheres
10 p1781 A69-23678

SiC and GaP diodes used as low power light sources, studying electroluminescence in p-n region under pulsed excitation
14 p2419 A69-29325

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes
15 p2573 A69-30062

Macrostructural differences between filaments of B and SiC vapor deposited onto small diameter W wire, discussing radial cracks due to dilatation
18 p3160 A69-34266

Silicon and boron carbides wettability with liquid metals during contact reactions at various temperatures, discussing wetting mechanism
18 p3156 A69-35153

Multiaxial stress effect at room temperature on fracture strength of silicon carbide tubular specimens
20 p3565 A69-36939

Silicon carbide compact coatings deposition on graphite by silicon tetrachloride, H and benzene gaseous mixture, relating layer thickness to temperature and process duration
20 p3566 A69-37368

SILICON COMPOUNDS

NT ALUMINUM SILICATES
NT ANDESITE
NT BERYL
NT CHLOROSILANES
NT CORDIERITE
NT DISILICIDES
NT ENSTATITE
NT FAYALITE
NT FELDSPARS
NT GARNETS
NT MONTMORILLONITE
NT NEPHELINE
NT ORGANIC SILICON COMPOUNDS
NT PYROXENES
NT QUARTZ
NT SILANES
NT SILICATES
NT SILICIDES
NT YTTRIUM-ALUMINUM GARNET
NT YTTRIUM-IRON GARNET

Organosilicon-containing derivatives of 2-aminoethanethiols and 2-aminoethanethiosulphuric acids as radiation protective agents
13 p2210 A69-28486

Protective coatings of oxygen-free high melting point Si compounds and silicate binder, noting chemical stability in corrosive media
20 p3566 A69-37371

Landing shock struts of Surveyor 6, emphasizing silicone liquid springs role as absorbers and stabilizers
20 p3466 A69-38180

Fluosilicic acid in chemical milling of Ti and Ti alloys
21 p3669 A69-38966

SILICON CONTROLLED RECTIFIERS

High power sinusoidal pulsed current generator using Si controlled rectifiers /thyristors/ as switches
03 p0404 A69-13262

Electronic controller with integrated circuits and inexpensive SCR as coupler or interface between card reader and frequency synthesizer designed for untended operation
06 p0897 A69-17704

Single phase bidirectional AC/DC power converter based on back-to-back SCR hybrid bridge
13 p2209 A69-28178

High temperature electronic tensile testing device utilizing SCR to study strain rate effect on metals properties
21 p3727 A69-39811

SILICON DIOXIDE

NT QUARTZ

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions
02 p0205 A69-12322

Silicon dioxide dielectric isolation for high speed low power circuits, noting saturation resistance and transient characteristics
02 p0221 A69-12470

Aluminum-silica fiber reinforced metal composite, discussing mechanical behavior and effect upon engineering applications
06 p0940 A69-16949

Oxide impurity effects causing potential shifts in Si covered by thick oxide layer studied with metal-oxide-Si electrical measurement and radiochemical analysis
07 p1072 A69-18272

SILICON FILMS

Doped silicon dioxide films as controlled reproducible diffusion sources for silicon devices fabrication 07 p1198 A69-18620

Instability in pyrolytic silicon dioxide films on Ge substrate under bias at room temperature consisting of positively charged ion motion 07 p1200 A69-19010

Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers 08 p1341 A69-20700

Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps 09 p1555 A69-21478

Electron irradiation effect on surface potential of thermally grown silicon dioxide layers, noting conductivity and annealing effects 09 p1557 A69-21743

Combined electron microprobe and ellipsometric study of thin silicon dioxide films on silicon, noting reliability and accuracy 10 p1742 A69-22946

Positive space charge buildup produced in silicon dioxide by low energy electrons as function of beam energy and oxide thickness 10 p1743 A69-23172

Interfacial stress between thermally grown silicon dioxide and single crystal silicon correlated with oxide compressive strength 10 p1744 A69-23177

Molar heat and entropy of adsorption and activity coefficient of adsorbed phase for methane-ethane-silica gel system 10 p1652 A69-23370

Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions 10 p1652 A69-23371

Silicon single crystal substrate, preoxidation, oxidation and low temperature heat treatment effects on MOS transistor compared with Silicon-Silicon dioxide interface characteristics 10 p1665 A69-24051

Silicon dioxide coated Al reflectance, solar absorptivity and total normal and hemispherical thermal emissivity, noting application to satellite temperature control 11 p1918 A69-24835

Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps 15 p2669 A69-30723

X ray detectable preferred disorder in solids by shock loading studied in Ainsworth meteorite and in hexagonal alpha silicon dioxide 15 p2671 A69-31538

Andalusite crystals as active media in paramagnetic quantum amplifiers, discussing design and performance 19 p3333 A69-35881

Silicon dioxide film doped with Al to increase MOS structure radiation resistance 20 p3584 A69-38070

Equilibrium absorption and desorption rates of carbon dioxide-argon mixtures from silica gel measured as function of temperature using gas dynamics method 21 p3848 A69-38707

Pressure and temperature effects on reversal transitions of stishovite, noting meteoritic impact formation at Meteor Crater, Arizona 22 p4021 A69-40412

Slush H and N gels preparation and characteristics, including measurements of weight bearing capacity of gel as function of percent mass silica gelant 22 p3998 A69-40632

SILICON FILMS

Silicon nitride gate insulator in metal-insulator-silicon (MIS) devices, noting sandwich structures with thermally grown oxides removes limitations 02 p0299 A69-12244

Relaxation effect in epitaxial silicon MOS structures, formulating differential equation for doping distribution in epitaxial layer 03 p0490 A69-13947

Technique for obtaining flawless silicon single crystal films on sapphire bases by vacuum deposition, noting base temperature effect on film quality 07 p1198 A69-18509

Instability in pyrolytic silicon dioxide films on Ge substrate under bias at room temperature consisting of positively charged ion motion 07 p1200 A69-19010

Combined electron microprobe and ellipsometric study of thin silicon dioxide films on silicon, noting reliability and accuracy 10 p1742 A69-22946

MOS transistor Hall voltage, mobility and constant verified by magnetoelectric measurements of Si p-inversion layer 13 p2323 A69-28331

Thin silicon solar cells environmental tests, evaluating temperature and humidity effects on various contacts and coatings 19 p3252 A69-35699

SILICON JUNCTIONS

Avalanche multiplication in abrupt silicon p-n junctions analyzed using ionization coefficient measurements for holes and electrons 01 p0135 A69-10038

Surface charge distribution in silicon p-n junctions noting luminescence of microplasmas and inhomogeneous properties 02 p0294 A69-11629

Anisotropic pressure influence on silicon diodes parameters 02 p0223 A69-12839

Transit time effects in Si n-nu-n space charge limited current solid state devices 03 p0483 A69-12852

Temperature and current distribution in avalanching silicon p-n junctions 03 p0487 A69-13637

Multiplication effects on noise in Si avalanche diodes, noting high resolution apparatus for measurement of spatial variations 04 p0573 A69-14332

High efficiency microwave oscillations in Si p-n and p-n-n positive avalanche diodes under pulsed conditions 04 p0580 A69-15491

Incremental conductance of heavily doped n-type Si semiconductor barrier tunneling as function of bias voltage, indicating Fermi level dependence on dopants 05 p0808 A69-16285

Microwave absorption and series resistance of silicon mesa parametric amplifier diodes, discussing p-n junction and dielectric loss mechanism 05 p0732 A69-16347

Si IMPATT diode oscillator and amplifier for CW operation at 50 GHz noting fabrication, performance and phase locking properties 05 p0733 A69-16560

Recovery rate at room temperature in Li-doped p-n Si diodes and solar cells after 1 Mev electron irradiation, noting capacitance changes 06 p0974 A69-16867

Nearly abrupt X band Si avalanche IMPATT diodes irradiated by fast neutrons, noting effects on DC and microwave characteristics 06 p0976 A69-16874

Solid state diodes made by pulsed laser irradiation of polished silicon surfaces, discussing application to integrated circuit design 06 p0893 A69-17157

Low temperature technique for preparing solid-solid diffusion sources for silicon device fabrication based on gaseous hydrides as reagents 07 p1198 A69-18619

Relaxation oscillations in Si p-n junction diode reverse-biased into avalanche calculated by computer program 07 p1101 A69-18651

Silicon on sapphire semiconductor technology for diode arrays used as read-only memories, discussing capacitance, resistance and pattern encoding by laser 07 p1113 A69-19767

Microwave amplification using silicon diodes in avalanche resonance pumped modes 08 p1279 A69-19909

Failure mechanism in high-voltage semiconductor diodes explained by effect of reverse voltage pulses, considering design reliability 08 p1294 A69-21116

Positive and negative sloped current-voltage characteristics of silicon tunnel diodes with p-n junctions 10 p1746 A69-23574

Silicon n-p solar cell behavior during electron radiation, describing radiation resistant solar cell 11 p1825 A69-24871

High current density filaments formation in silicon p-n avalanche diodes caused by incremental negative resistance in static current-voltage characteristics 12 p2036 A69-25916

Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance 13 p2236 A69-28549

Spectral distribution of photosensitivity for p-n junctions in silicon doped GaAs, showing agreement with state density model and absorption data 15 p2666 A69-30067

Transit time effects in silicon space charge limited diodes, studying frequency characteristics of small signal equivalent circuit 15 p2575 A69-30181

Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence 17 p2936 A69-32893

Gold donor level impurity photovoltaic effect in silicon, noting solar cell efficiency reduction due to minority carrier recombination 19 p3381 A69-35679

Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence 19 p3251 A69-35694

Silicon junction radiation detectors applications in cryogenics, measuring junction response to beta particles at low temperatures 20 p3546 A69-38275

Active Ni centers properties in Si with emphasis on increasing and reducing minority carrier lifetime in silicon integrated circuits, discussing energy levels 24 p4560 A69-42759

SILICON NITRIDES

Silicon nitride gate insulator in metal-insulator-silicon (MIS) devices, noting sandwich structures with thermally grown oxides removes limitations 02 p0299 A69-12244

Pressurized fluid journal bearing with fluid fed into space between shaft and shell from plenum chamber in bearing housing through circumferential slots 06 p0931 A69-17529

Silicon nitride as ambient alkali barrier liner analogous to silicon carbide in MIS devices for thermal growth of silicon oxide 12 p2142 A69-25935

Silicon nitride vaporization and thermodynamic properties analyzed using Langmuir and Knudsen methods 12 p2118 A69-26261

Refractory materials based on BN and silicon nitride, studying effect of sintering conditions and chemical composition on mechanical properties 15 p2643 A69-31244

Silicon nitride staple fibers synthesis, development and characterization, noting tensile strength and sonic modulus 19 p3354 A69-35517

Silicon nitride ceramics fabrication technology and dimensional stability during nitridation, discussing applicability to aerospace precision or joined ceramic shapes 24 p4336 A69-43211

SILICON OXIDES

NT QUARTZ

Physical and physicochemical properties of anodic silica obtained by silicon oxidation in organic bath, discussing possible applications 05 p0810 A69-16589

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology 06 p0930 A69-17152

Flame emission spectrophotometric method for ultramicro sodium contamination detection in thin silicon oxide films and cleaned silicon surfaces [ECS PAPER 306] 08 p1314 A69-20367

Impurity heterogeneities in unoxidized and oxidized silicon slices from electron probe X ray microanalyzer, discussing thermal oxidation effects 10 p1743 A69-23171

Three layer vacuum deposited silicon monoxide films current voltage and conduction current density temperature dependence 10 p1745 A69-23324

Silicon nitride as ambient alkali barrier liner analogous to silicon carbide in MIS devices for thermal growth of silicon oxide 12 p2142 A69-25935

Lower oxides of Si, studying chemical composition, formation conditions, stability and chemical and physical properties 15 p2643 A69-31245

Dissociation energy and ionization potential measured for gaseous SiO and GeO 22 p3896 A69-40725

SILICON POLYMERS

NT SILICONE RESINS

NT SILICONES

Isothermal secant and tangent bulk moduli of silicon fluids and correlation with pressure, volume and temperature 01 p0102 A69-10913

SILICON RADIATION DETECTORS

Celestial navigation system using photodetectors, comparing numbers and brightness of S4, S20 and silicon stars

10 p1775 A69-23190

SILICON RECTIFIERS

U CRYSTAL RECTIFIERS

SILICON SOLAR CELLS

U SOLAR CELLS

SILICON TRANSISTORS

Step recovery switching silicon transistor combining planar and mesa technologies, discussing charge storage and fall times

02 p0215 A69-11937

Base transit time of minority carriers in double diffused Si transistors with small emitter area, discussing cut-off frequency

02 p0297 A69-11995

Wafer chip assembling technique for high density interconnection of silicon devices in large monolithic electronic systems, noting application to MOS shift register

02 p0222 A69-12472

Substrate terminal current anomalous enhancement observed in n-channel Si MOS transistors beyond pinch-off

04 p0574 A69-14348

Current carrier concentration temperature dependence in Te-doped silicon single crystals by analyzing photoconductivity spectra

04 p0644 A69-15267

Emitter base lateral diode carrier injection effect on current gain properties of small area double diffused planar transistors

05 p0728 A69-15808

Statistical studies of current-voltage characteristics of zinc-doped silicon diodes

05 p0732 A69-16425

Double diffused Si transistors, discussing temperature dependence of gain, injection efficiency, emitter and base regions energy gaps and excess noise

05 p0733 A69-16558

Si transistor I sub CE sub 0 characteristics measurement on curve tracer, discussing generation of loop by junction capacitances and emitter base diode

05 p0734 A69-16569

Rapid annealing data for silicon transistors after reactor neutron pulse, deriving equation for defect recombination in cluster and subsequent diffusion outside cluster

06 p0975 A69-16870

Recombination statistical model for neutron irradiated Si transistors, considering diffusion potential, junction voltage, temperature, activation energy and capture ratio for holes and electrons

06 p0975 A69-16871

Neutron irradiated Si transistors radiation and annealing characteristics determined for inverse configuration

06 p0975 A69-16872

Thermal time constant in Si diffused transistors decreases with increased neutron dosage

06 p0975 A69-16873

Recovery and long term reliability of Si n-p-n transistors subject to gamma radiation, using military specifications for failure

06 p0976 A69-16878

Prediction technique for surface effect causing Si bipolar transistors gain degradation under ionizing radiation

06 p0976 A69-16879

Threshold failure levels of semiconductor diodes and transistors due to pulse voltages

06 p0977 A69-16883

Destructive breakdown in Schottky barrier diodes by evaporating contact metal through mask onto silicon, showing local heating by thin wax layer

08 p1286 A69-20860

Field effect transistors with Schottky-barrier gates using epitaxial layers of silicon on substrates and gallium arsenide on semiinsulating substrates

08 p1286 A69-20863

Microwave silicon technology applied to fabrication of high gain high efficiency transistor

09 p1462 A69-21410

N enhancement silicon MOST saturation current as function of temperature

10 p1743 A69-23175

Interfacial charges in MOS transistors determined as function of surface potential by measuring channel conductance as function of temperature

10 p1744 A69-23178

Electrical parameters measurement for homogeneous batches of planar silicon transistors subjected to cobalt 60 gamma rays, considering isochronal and isothermal annealing

15 p2625 A69-30827

Mass-produced silicon transistors reliability, presenting tables and curves of lifetime tests

15 p2626 A69-30833

Silicon MOS transistor characteristics, discussing stability, temperature effects and inherent noise, noting applications to amplifier circuits

18 p3109 A69-35161

Generation-recombination noise due to trapped charge fluctuation at impurity centers in Si junction gate field effect transistors transition regions, using lumped equivalent circuit

22 p3911 A69-40009

Bipolar HF p-type Si transistors preparation by B and P ion beams and planar technology masking technique, obtaining p-n-p structure

22 p3916 A69-40960

SILICONE RESINS

High temperature organic sealants for repairing small gas leakages in vacuum devices, tabulating test results for alkyd, epoxy, silicone and polyimide resins

11 p1907 A69-24742

Gravimetric and IR absorption spectra analysis for determining heat resistance and chemical changes in organosilicone resins during heating

17 p2992 A69-33744

Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions

19 p3281 A69-35549

SILICONE RUBBER

High strength room temperature vulcanizing silicone rubber for tooling and fabrication of aircraft and missile components

09 p1507 A69-22331

Controlled expansion of captive silicone rubber used to achieve pressure control for adhesive bonding interface

09 p1512 A69-22367

Room temperature vulcanizing silicone rubber adhesive sealants strength and self bonding, describing primerless adhesion to Ti and Al alloys, Al, Ni and stainless steels

19 p3356 A69-35532

Low viscosity/density RTV silicone rubber sealants obtained by using glass microballoon fillers

24 p4337 A69-43454

RTV silicone rubber for corrosion control coatings, high strength adhesives and low density sealants in aircraft structures

24 p4338 A69-43457

SILICONES

Silicone polymers and polymer formations for electrical applications including silicones for molded devices and components, potting resins, dielectric gel, RTV rubbers, etc

13 p2286 A69-27990

Thermal silicone grease type filler materials for heat transfer across bolted or clamped sheet metal surfaces in electronic equipment for space applications

16 p2794 A69-32560

SILICONIZING

Structural features and electrical resistivity of siliconated pyrolytic graphite, analyzing dependence on preparation conditions using X ray diffraction measurements

24 p4335 A69-42926

SILOS [MISSILE STORAGE]

U MISSILE SILOS

SILVER

Electrical resistance temperature dependence below room temperature for polycrystalline epitaxially grown Au and Ag films, noting effects of alpha irradiation

03 p0486 A69-13582

Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation

04 p0640 A69-14449

Ag-GaAs Schottky barrier photodiodes, describing fabrication and use as UV radiation detectors

09 p1462 A69-21334

Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance

22 p3992 A69-40574

Mean adsorption lifetimes and activation energies of Ag and Au on polycrystalline tungsten substrate in ultrahigh vacuum system free of hydrocarbon contamination

23 p4198 A69-41542

SILVER ALLOYS

Plastic deformation of internally oxidized dispersion strengthened silver magnesium alloys, noting hardening effect dependence on oxidation temperature

07 p1159 A69-18627

Stored energy of cold work and electrical resistivity of Ag-Mg solid solution alloys measured as functions of strain, Mg concentration and initial state of order

24 p4332 A69-43029

SILVER CADMIUM BATTERIES

Nickel-cadmium and Ag-Cd storage batteries performance, discussing methods to lengthen battery life and improvement of characteristics

08 p1261 A69-21051

Ni-Cd and Ag-Cd storage batteries for space applications, discussing performance, life and reliability

16 p2740 A69-32422

SILVER COMPOUNDS

Gamma irradiated silver carbonate EPR at liquid nitrogen temperatures

05 p0716 A69-15915

Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects

15 p2561 A69-30442

Doped silver carbonate defect structure and doping effect on reaction kinetics by X rays and electron paramagnetic resonance, finding new crystal structure

22 p3993 A69-40720

SILVER HALIDES

High resolution silver halide photoemulsions analyzed by holographic resolvolmetry using Ne-He laser to obtain interference patterns

15 p2606 A69-30052

SILVER IODIDES

Cloud seeding effects due to inhomogeneous distribution of freezing nuclei, discussing silver iodide distributions by Gaussian plume diffusion model

09 p1535 A69-21639

Solid state battery utilizing high conductivity solid electrolytes /metal silver iodide/, demonstrating cell performance improvements

10 p1640 A69-23998

SILVER NITRATES

Gamma radiolysis of silver nitrate ice forming neutral Ag in magnetically distinct sites, discussing water dipoles rotation and electron paramagnetic resonance

22 p3992 A69-40574

SILVER ZINC BATTERIES

Highly resistant separator performance in Zn-Ag oxide battery, discussing zinc electrode limitations on battery performances

10 p1640 A69-23996

SIMICOR [IMAGE CORRELATOR]

U IMAGE CORRELATORS

SIMILARITIES

U ANALOGIES

SIMILARITY NUMBERS

Geostrophic adjustment for neutral and lapse conditions, discussing similarity arguments based on appropriate length and velocity scales

02 p0276 A69-12699

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps

16 p2772 A69-32145

SIMILARITY THEOREM

Similarity theory results for turbulent diffusion in atmospheric surface layer compared with concentration measurements from Project Prairie Grass

02 p0276 A69-12695

Asymptotic similarity in neutral barotropic planetary boundary layers, solving Ekman flow by singular perturbation methods

03 p0460 A69-13336

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution

03 p0528 A69-13798

Similarity law for ionization waves noting relations for frequency, wavelengths, amplification, propagation velocities and phase shifts

05 p0799 A69-15633

Similarity functions defined for laminar or turbulent separation in nonuniform supersonic flow [ONERA-TP-659F]

07 p1050 A69-18417

SIMILITUDE LAW

Holography and similarity criterion for developing image recognition algorithm
08 p1314 A69-20417

Self similar solutions for collapse of empty cylindrical cavity in gas with given equation of state, describing gas motion past cavity
10 p1679 A69-23367

Similar boundary layers in Prandtl approximation determining similarity conditions for second order effects due to curvatures and outer vorticity
10 p1632 A69-23700

Neon discharges, discussing similarities in type p plasma ionization waves generated by pulsing
10 p1740 A69-23721

Global characteristics and similarity of ventilated cavity flows by injecting air behind immersed profiles of symmetrical wedge at zero incidence
10 p1680 A69-23788

Convective heat transfer, discussing coordinate transformation, similarity analysis similitude and Meksyn integration of boundary layer equations
13 p2376 A69-28139

Nonreacting turbulent far wake problems, discussing centerline decay of viscosity models, similarity profiles and radial distributions at various Mach numbers
13 p2200 A69-28500

Similarity theory similar to Nusselt and Stanton numbers obtained by triple analogy for heat, mass and momentum transfer
13 p2380 A69-28560

Similar solution for free convective flow past vertical porous wall and unsteady flow past porous wall with dissipation term, using group transforms
15 p2592 A69-31010

Similarity criteria for plastic deformation theory of body under pressure and nonuniform temperature field, considering strength calculations
15 p2714 A69-31200

Similarity concepts extended to shock initiated flux compression devices for magnetic flux concentration
16 p2768 A69-31665

Transformation of two dimensional boundary value equations for laminar power law nonNewtonian fluid flow to yield similar solutions
17 p2957 A69-34016

Similarity solutions of viscous transonic equation describing spiral and radial flows, containing shock-like transitions of corresponding inviscid solutions
18 p3121 A69-34787

Similarity solutions describing buoyancy effect on laminar and turbulent wakes of heated body in incompressible fluid vertically ascending flow
19 p3296 A69-35761

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields
19 p3256 A69-36717

Similarity method applied to linear integrodifferential equations of neutron transport in homogeneous space
19 p3361 A69-36774

Transformation groups used to find similarity solutions for partial differential equations and heat equation
20 p3630 A69-36915

Similarity rule in hydrodynamically transcritical regime in ionized multifluid gas
20 p3515 A69-37594

Supersonic flows past blunt bodies, formulating approximate similarity law for shock layers in subsonic regions
24 p4246 A69-43495

Similarity solutions to massive blowing problem, discussing inviscid flow model compatible with no-slip condition
24 p4305 A69-43658

SIMILITUDE LAW

Electric arc properties, investigating volt-ampere characteristics by approximate similitude and dimensional analysis
01 p0125 A69-10099

Convective heat transfer, discussing coordinate transformation, similarity analysis similitude and Meksyn integration of boundary layer equations
13 p2376 A69-28139

Similitude applied to dynamics of disperse media, discussing role of dimensionless numbers in mechanics of suspensions and two phase flows in porous media
19 p3300 A69-36775

SIMPLE HARMONIC MOTION

Runway roughness effects on aircraft, formulating relationship between weight and resonant frequency through simple harmonic motion analogy
01 p0057 A69-11274

Finite length cylindrical shell dynamic response to uniform radial impulse, noting simple harmonic motion and flexural mode excitation instability
02 p0347 A69-12517

SIMULATED ALTITUDE

Mild hypoxia effect on selective attention performance of human subjects at simulated 8000 ft altitude
09 p1445 A69-22553

Human mental performance impairment at simulated 8000 ft altitude indicated in increasingly difficult tests
23 p4102 A69-41680

SIMULATION

NT ACOUSTIC SIMULATION
NT ALTITUDE SIMULATION
NT ANALOG SIMULATION
NT ATMOSPHERIC ENTRY SIMULATION

NT DIGITAL SIMULATION
NT ENVIRONMENT SIMULATION
NT EXHAUST FLOW SIMULATION
NT FLIGHT SIMULATION
NT LANDING SIMULATION
NT RHEOELECTRICAL SIMULATION
NT SOLAR SIMULATION
NT SPACE ENVIRONMENT SIMULATION
NT THERMAL SIMULATION
NT WEIGHTLESSNESS SIMULATION

Monte Carlo method used to construct optimal algorithms for simulating homogeneous Markov chains whose trajectories reach absorbing state with probability of one
01 p0105 A69-10726

Wind gust simulation procedures, discussing high altitude clear air turbulence and simulation of air perturbations
03 p0461 A69-13647

Water droplet simulation by glass spheres used in study of light scattering at cloud particles
06 p0953 A69-17992

Shock tunnel simulation of scramjet combustion chamber performance
06 p0985 A69-18165

Circularly polarized waveguide mode simulation for multislot leaky waveguide harmonic content measurement
07 p1105 A69-19046

Experimental circuit for simulating radar target tracking system based on split range gating, noting tracking role of error signal
08 p1300 A69-20109

Composite transistor simulation of circuit inductor effect for synthesizing frequency selective circuits
08 p1286 A69-20834

Electrical analogs with passive elements in combination with stepping switches for simulation of plants with distributed parameters
09 p1471 A69-21436

Microwave antennas optical simulation, discussing given phase amplitude distribution problems
09 p1469 A69-22625

Mississippi Test Facility /MTF/ hardware data acquisition system error analysis from extensive simulated static firing tests
10 p1673 A69-23287

Spectral measurement of luminous trails produced by injecting high velocity submicron diameter iron particles into gaseous targets compared with meteor spectra
10 p1790 A69-24142

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study
12 p2077 A69-25767

Modified scheme for simulation of delay with transient period independent of amount of delay, considering polynomial input
12 p2120 A69-25922

Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
12 p2055 A69-26265

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
12 p2144 A69-26722

Human behavior simulation - NATO Conference, Paris, July 1967
12 p2024 A69-27079

Cosmic shock waves simulation through correlations between shock equations in classical and relativistic fluid dynamics, using shock tube tests
14 p2433 A69-29981

Magnetic materials simulation for satellite stabilization device based on magnetic hysteresis, using mathematical models and direct magnetic measurements
17 p2945 A69-33235

Flow simulation on wind tunnel test models for aerodynamic characteristics of aircraft design, discussing boundary layer and external flow coupling
17 p2945 A69-33471

Ball bearing lubrication simulation by rolling disk apparatus, emphasizing surface slip and related thermal effects alterable by geometric expansion
17 p2945 A69-33471

Earth atmospheric large scale motion simulated in laboratory and by numerical technique
18 p3127 A69-34668

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
21 p3781 A69-39135

Time-similar and isotropic geodesic curves simulating paths of test bodies in Riemann space corresponding to gravitational field
21 p3772 A69-39621

Low melting point material selected model melt simulating shrinking process in castings of melt with broad liquidus-solidus interval
21 p3733 A69-39720

Monte Carlo methods for electromagnetic showers simulation, noting electron track length distribution in Pb glass absorber
22 p4007 A69-41057

Dynamic simulation for gas turbine engine components design to assure stable operation and rapid response characteristics
23 p4200 A69-41655

Man machine relationship in V/STOL control display, discussing inflight simulators, emphasizing NASA X-14 and CH-5C programs
01 p0010 A69-10452

Variable properties aircraft for flying simulator, discussing flight control system and stability behavior
07 p1052 A69-18254

Micrometeorite simulation by wire explosion plasma, discussing energy requirements and simulator performance
16 p2821 A69-31839

SIMULTANEOUS EQUATIONS

Simultaneous partial integro-differential equations governing natural vibrations of arbitrary cross section cylindrical tubes, suggesting Fourier series solution
01 p0164 A69-10065

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid
02 p0272 A69-12223

Doubly infinite sets of simultaneous linear equations used in electromagnetic boundary value problems solved by Asymptotic Anticipation Method
04 p0560 A69-15214

Simultaneous nonlinear equation solving in absence of Jacobian elements
08 p1344 A69-20832

Kutta-Merson algorithm for converting partial differential equation for two dimensional unsteady state heat conduction to simultaneous ordinary differential equations
09 p1623 A69-22280

Matrix eigenvalues for nonlinear simultaneous algebraic equations, discussing computer program for numerical integration
13 p2289 A69-28227

Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of nonlinear structural systems using finite differences or elements
15 p2711 A69-30871

Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
15 p2660 A69-30913

Book on solution of linear ordinary differential equations and simultaneous systems using bar statics-equivalent beam method
15 p2711 A69-30929

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid

SIMULTANEOUS IMAGE CORRELATOR
U IMAGE CORRELATORS

SINE
U TRIGONOMETRIC FUNCTIONS

SINE SERIES

Hyperbolic sine creep law, discussing limiting stresses for approximation by linear or exponential relationship
07 p1235 A69-19384

Sine series solution for flexural vibration of rectangular isotropic plates applied to free vibration of orthotropic plates
13 p2363 A69-28128

SINE WAVES

Quasi-sinusoidal tunnel diode oscillator studied for frequency and amplitude of harmonic voltage components
01 p0038 A69-10070

Amplitude modulation factors expressed as carrier and sideband power for sinusoid and square wave signals, considering negative clipping by modulator cut-off
01 p0028 A69-10419

Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals
01 p0031 A69-10780

Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
03 p0442 A69-14189

First and second passage times of stationary random process consisting of sinusoidal signal with stationary Gaussian noise
04 p0561 A69-15453

Sine wave oscillator circuits and performance prediction for NERO thrust measurement test stand
08 p1300 A69-20155

Hard limiting effect on sum of three or four sinusoidal signals noting output amplitudes, signal suppression and negative suppression effect
09 p1451 A69-21311

Signal to cross modulation noise ratio in TWT tube during amplification of sinusoidal signals
10 p1653 A69-23109

Waveforms analyzer for mixtures of exponentially damped sine waves, noting application to interferometer curves in plasma wave propagation
17 p2970 A69-32852

Pulsating flow analysis in finite and infinite conical nozzles under sinusoidal pressure disturbances [ASME PAPER 69-APM-16]
18 p3214 A69-34392

Pulses and sine waves coupling between parallel transmission lines obtained using Oliver elementary coupling theory
19 p3266 A69-35768

Coherent radiation detection using laser optical sine waves, considering detection by heterodyning, laser preamplifier and parametric amplification
19 p3335 A69-36070

SINGLE CRYSTALS
NT WHISKERS [SINGLE CRYSTALS]

Ground state population modulation in trivalent rare earth doped single crystals by means of optical double resonance, noting applications
01 p0134 A69-10013

Gallium arsenide single crystal epitaxy with doping/concentrations into semiinsulating microwave circuits
01 p0040 A69-10196

Mechanical properties of lithium fluoride single crystals, taking into account equilibrium lattice defect structures
01 p0138 A69-10602

Interstitial impurity effects on mechanical properties of molybdenum single crystals, considering temperature dependence of flow stress in bcc metals
01 p0095 A69-10609

Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum
01 p0139 A69-10833

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
01 p0139 A69-10889

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes
01 p0140 A69-11109

Diffusion process in dislocation-free doped and undoped GaAs single crystals
02 p0296 A69-11792

Vanadium dioxide reflection spectra dependence on incident quantum energies during semiconductor/metal phase transition
02 p0298 A69-12100

Ni-Cr-Ti-Al /Nimonic/ alloy single crystal mechanical properties at room temperature, determining importance of structure
02 p0268 A69-12192

Strain rate effect on dislocation substructure in deformed niobium single crystals, investigating relationship between mechanical properties and dislocation substructure
02 p0268 A69-12287

Free flight impact tests showing deformation curve for aluminum and copper single crystals representable as 1/4 power law
02 p0344 A69-12288

Friction induced plastic deformation of Be-Co-Zn single crystals with HCP structure
02 p0254 A69-12627

Ammonium perchlorate thermal decomposition, studying point defects role
03 p0494 A69-12896

InAs-InP phase diagram taking into account equilibrium pressure of vapor over melts in preparing single crystals by controlled crystallization
03 p0483 A69-13024

Directional solidification and composite structures, discussing structure changes effect on mechanical properties
03 p0449 A69-13877

Single crystal cells for construction of large deployable solar cell arrays
03 p0368 A69-13993

Quantum paramagnetic amplifier using andalusite single crystal and operating with three level pumping system
04 p0577 A69-14780

Quantum paramagnetic amplifier using natural andalusite single crystal and operating with four level pumping
04 p0577 A69-14781

Temperature dependence of electrical properties of In and Cu doped CdSb single crystals prepared by zone refining
04 p0643 A69-15264

Te and Zn doped p-type GaAs single crystals optical homogeneity, using interferometry
04 p0644 A69-15266

Current carrier concentration temperature dependence in Te-doped silicon single crystals by analyzing photoconductivity spectra
04 p0644 A69-15267

Refractive index temperature dependence of cadmium sulfide single crystals grown from gas phase
04 p0644 A69-15268

Homogeneous electroluminescence at 77 K in n-type GaAs single crystals without artificial p-n junctions, noting effects of electric field strength and Zn doping
04 p0644 A69-15271

Work hardening of fcc single crystals, emphasizing transmission electron microscopy of thin foils, X ray topography and etch pitting techniques
05 p0778 A69-15753

Work hardening in quenched fully hardened and overaged Mg-Mn alloy single crystals as function of temperature and strain rate
05 p0778 A69-15757

Work hardening characteristics of Ta and Ta-base alloy single crystals as function of temperature and interstitial concentration
05 p0778 A69-15758

Surface photovoltaic effect in copper electroplated single crystal CdS solar cells, discussing Fermi level and Hall effect
05 p0704 A69-15958

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
05 p0808 A69-16215

Semiconductor laser generation efficiency increased by using external resonator and by signal amplification
05 p0777 A69-16378

Composites reinforcement with single crystal flakes of aluminum diboride
05 p0785 A69-16581

Gunn effect verification using n-type semiconductor single crystals in DC field, noting microwave field polarization plane rotation
06 p0978 A69-16902

Magnetoresistance of tellurium single crystals with various current carrier concentration at liquid helium temperatures
06 p0978 A69-16986

Fatigue hardening in fcc metals, discussing dislocation distribution in unidirectionally deformed single crystals
06 p0944 A69-17503

Domain structure of barium titanate single crystals during polarization reversal by sinusoidal AC field
06 p0981 A69-17893

Emission of Nd giant pulse laser with high repetition rate and peak power to generate second harmonic radiation in lithium niobate single crystals
07 p1144 A69-18469

Technique for obtaining flawless silicon single crystal films on sapphire bases by vacuum deposition, noting base temperature effect on film quality
07 p1198 A69-18509

CdSe single crystal films vacuum deposition for use of photocells base with p-n heterojunctions
07 p1198 A69-18512

Dislocation redistribution during annealing and shock deformation in liquid nitrogen of chromium, molybdenum and tungsten single crystals
07 p1159 A69-18534

Approximate solution to differential equations describing primary radiation defects transformation into secondary defects in semiconductors
07 p1199 A69-18679

Friction and wear tests of synthetic rutile single crystals against diamond styli and spherical sliders of ruby, sapphire and hardened steel [ASLE PAPER 68-LC-3]
07 p1140 A69-19307

Differential capacity of Li doped zinc oxide single crystals between vapor deposited asymmetrical In electrode contacts
08 p1371 A69-19883

Subgrain diameter relation to misorientation in melt-grown aluminum single crystals from etch pitting and X ray techniques, discussing critical shear stress
08 p1330 A69-20011

Thermal faceting of tungsten single crystal surfaces in oxygen, using vibrating-capacitor work function probe with low energy electron diffraction
08 p1330 A69-20137

Temperature dependence of single crystal elastic constants of nickel aluminide determined by ultrasonic wave propagation measurement
08 p1332 A69-20288

Tensile deformation properties of copper single crystals strengthened by fine dispersions of BeO particles
08 p1334 A69-20575

CdS single crystals excess conductivity observed at room temperature
08 p1374 A69-21083

Dark and photocurrent volt-ampere characteristics induced by capture of carriers injected into illuminated CdS single crystals
09 p1555 A69-21506

Face effect in p- and n-type gallium antimonide single crystals doped with zinc and tellurium
09 p1558 A69-21870

Slow recombination centers parameters in CdSe single crystals during heat treatment in vacuum or hydrogen atmosphere
09 p1560 A69-22664

Dislocation substructure near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy
10 p1797 A69-23079

Interfacial stress between thermally grown silicon dioxide and single crystal silicon correlated with oxide compressive strength
10 p1744 A69-23177

Chromium concentrations induced line shift in ruby single crystals spectra, determining principal lines position
10 p1744 A69-23321

Drawn n-p and p-n junctions obtained in Te and Zn doped GaSb single crystals prepared in pure He atmosphere by Czochralski method
10 p1745 A69-23329

Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions
10 p1652 A69-23371

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties
10 p1712 A69-23630

Dislocations velocity in high purity aluminum single crystals determined as function of applied stress at 74 and 83 K
10 p1713 A69-23840

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests
11 p1936 A69-24537

Silicon doped p-n GaAs single crystals and epitaxial layers energy spectrum, studying shift in position of emission band maximum
11 p1936 A69-24700

Single crystal solar cell degradations in space, duplicating radiation effect on minority carriers lifetime by laboratory tests
11 p1826 A69-24876

Silicon resistance strain gage sensitivity dependence on crystallographic orientation following cut-off from single crystal
11 p1887 A69-25209

Resonators made of YIG single crystals exhibiting lowest linewidth in ferromagnetic resonance at microwave frequencies
11 p1855 A69-25627

Structure of epitaxial single crystal layers of CdS vacuum deposited on mica surface at various temperatures
11 p1939 A69-25709

Etched surfaces inhomogeneity of n-type GaAs single crystals, noting oxide layers formation
12 p2142 A69-25980

Nimonic alloy single crystals strengthening during plastic deformation, analyzing jump phenomenon at high and low temperatures
12 p2112 A69-26038

Raman effect in potassium dichromate single crystal, discussing symmetrical and antisymmetrical internal vibrations of free ions
12 p2105 A69-26285

Thermodynamic method for determination of conditions for CdS single crystal synthesis from gas phase, analyzing equilibrium between solid and gas phases
12 p2144 A69-26585

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals at temperature range measured by ferromagnetic resonance techniques
12 p2144 A69-26721

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
12 p2144 A69-26722

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition
12 p2145 A69-26724

Saturation and distortion effects on magnetoelastic wave excitation in yttrium garnet single crystals by large amplitude microwave frequency field
12 p2145 A69-26725

Stress and plastic deformation influence on allotropic transformation of cobalt-nickel single crystals studied by X ray diffraction
13 p2279 A69-27761

Capture levels at photosensitive CdS crystals surface determined by studying field effect mobility dependence on electric field
13 p2318 A69-27884

Gallium distribution in YIG single crystals by X ray spectral analysis, observing concentration fluctuations
13 p2321 A69-28002

Optical measurement method for burning surface temperature of condensed systems, realizing radiation from surface of combustion by light guide of monocrystalline aluminum oxide
13 p2379 A69-28453

CdS single crystals spectral dependence of photocurrent, photoconductivity quantum yield and photoelectromotive force in excitation absorption region
14 p2504 A69-28990

Langmuir S curves for tungsten single crystals in presence of adsorbed cesium, discussing orientation, theoretical and experimental correlation and instrumentation
14 p2506 A69-29271

Work function changes of tungsten single crystals as function of oxygen and CO gas pressure at high temperatures, using emission microscope
14 p2506 A69-29272

Negative dispersion of light in neodymium activated calcium tungstate single crystal using neodymium glass laser source, analyzing interferential bands in spectral diagrams
15 p2632 A69-30051

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface
15 p2670 A69-31046

Diffuse Zn layers structure in GaAs single crystals, showing dislocations formation by anomalous Zn diffusion
15 p2670 A69-31048

Nonuniform electrical resistivity distribution in InSb single crystals as function of growth direction
15 p2670 A69-31049

Electrical conductivity of cesium iodide single crystals with anion and cation impurities noting temperature dependence
16 p2824 A69-31573

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals
16 p2796 A69-31822

Ta single crystal growth condition by zone melting, discussing orientation and purity relationship
16 p2803 A69-32490

Thermionic emission parameters for faces of W-Re, Mo-Re and Ta-Mo single crystals determined by Richardson method of straight lines
17 p3015 A69-33630

Dielectric constants of barium titanate single crystals as function of electric field intensity at different frequencies
18 p3182 A69-34720

Nb single crystals plastic deformation influencing tensile strength, noting rolling directions
18 p3160 A69-35454

Molybdenum single crystals deformation in direct shear, determining stress temperature dependence and critical regions for various slip systems
19 p3342 A69-35811

Possibility of combining individual yttrium ferrite single crystals to obtain noninteracting element for quantum paramagnetic traveling-wave amplifier operating at liquid nitrogen temperature
19 p3334 A69-35883

Electron spin resonance spectra of gamma irradiated single crystals of 9-methyladenine, analyzing H abstraction radical and temperature effects
19 p3264 A69-35974

Two photon excitation of luminescence in complex uranyl compound single crystals using Q switched ruby laser
19 p3334 A69-35982

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals
19 p3377 A69-36178

Antimony trisulfide natural light reflection and transmission in and near IR region, noting spectral temperature and time dependence peculiarities
19 p3384 A69-36481

InSb single crystals impurities incorporation and distribution, concluding electrical properties vary with homogeneity or heterogeneity of dopant microdistribution
19 p3389 A69-36547

Crystallization front topography and stratified structure of melt extracted n-type GaAs single crystals from anodic etching method
20 p3582 A69-37013

Single crystal line block electro-optical shutter reflector operation based on double reflection and birefringence in anisotropic media, noting application to Nd glass laser
20 p3554 A69-37611

Repolarization processes in barium titanate single crystals by variable sinusoidal voltage pulses
20 p3584 A69-37785

Injection and excitation of charge carriers in CdS single crystals, analyzing current-voltage characteristics dependence on electrode separation, temperatures and electric field
21 p3779 A69-38423

Transient current change with minor change in voltage with double injection of electrons and holes in CdS single crystals, obtaining time dependence
21 p3780 A69-38833

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals measured by ferromagnetic resonance techniques
21 p3781 A69-39134

Photosimulation of electron hole and exciton mechanisms of NaI-Tl and KI-Tl single crystal scintillations
21 p3781 A69-39135

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition
21 p3781 A69-39137

Saturation and distortion effects on magnetoelastic wave excitation in yttrium garnet single crystals by large amplitude microwave frequency field
21 p3782 A69-39138

Dislocations multiplication and rearrangement structure in thermal fatigue of Mo single crystals produced by electron beam zone melting
21 p3746 A69-39162

Impurities effect on domain structure of barium titanate single crystals grown from solution in KF melt determined by inner stresses
21 p3783 A69-39559

YIG single crystal disk instability, noting dispersion of magnetoelastic and plane spin waves from supplementary absorption and LF oscillations recording
21 p3783 A69-39561

Single crystals dislocation dynamics and plasticity theory, discussing current tensor, conservation equation, slip systems, etc
21 p3845 A69-39676

Impurities effects on single crystal film formation of fcc metals on alkali-halide cleavage planes, stressing stacking fault energy importance
22 p3992 A69-39899

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mev and reactor fast neutrons
22 p3993 A69-40728

Compton profile from single crystal of LiH measured with X ray scattering, noting valence- electron momentum distribution role
22 p3993 A69-40730

Antimony trisulfide single crystals spectral dependence of impurity and stimulated impurity photoconductivities, comparing optical and thermal activation energies
22 p3994 A69-41042

Piezoelectric characteristics of surface layers of Ba titanate single crystals, using static and dynamic electromechanical methods
22 p3995 A69-41156

Dielectric constant and IR spectra of Ba titanate single crystals doped with hydroxyl, showing dependence on temperature and crystal thickness
22 p3995 A69-41157

Waveguide-resonance investigation of temperature dependence of dielectric constant and paraelectric dispersion of Ba and Sr titanate single crystals at millimeter wavelengths
22 p3995 A69-41158

Selenium distribution along GaSb single crystals during oriented crystallization determined by radiometry
23 p4198 A69-41725

Surface films effect on friction coefficient of sodium chloride and Zn single crystals under normal pressure loads, noting film thickness role
23 p4170 A69-42343

Nb single crystals oxidation in dry oxygen at high pressure and temperature indicating suboxide platelets existence as function of temperature
23 p4177 A69-42357

Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate
23 p4178 A69-42358

High temperature single crystal X ray studies of natural Fe-rich orthopyroxene, detecting high-low clinopyroxene inversions
24 p4311 A69-43218

Luminescence, I-V and pulse characteristics of high resistivity Ni doped GaAs single crystals, noting injection conductivity
24 p4362 A69-43734

SINGLE SIDEBAND TRANSMISSION

Transistorized single sideband detector-converter operation in presence of large signal and heterodyne voltage levels, deriving equation for transmission coefficient
05 p0730 A69-16220

Meridional radio communication between radio station at South Geomagnetic Pole and amateur SSB radio stations in U.S.S.R.
06 p0889 A69-17753

Single sideband modulation theory explained by sum representation of sampling theorem, comparing different signal generating methods
09 p1456 A69-22290

Circuit for generation of square wave with frequency as sum or difference of two periodic signal frequencies, discussing SSB modulation

10 p1665 A69-24047

Optical modulation through Doppler frequency shift obtained by rotating radial diffraction grating [AOLR-69-1]

11 p1889 A69-25394

Twin image elimination in holography using single sideband object waves without offset reference wave introduction

12 p2090 A69-26253

Single-sideband signal nonlinear distortion and graphical methods for calculation of oscillator tube plate current pulse components

14 p2418 A69-28828

Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc

14 p2413 A69-29489

Multiple access techniques of SSB-PM and PCM-PM frequency translation for satellite communication system, comparing performance characteristics

21 p3678 A69-39807

Compatible single sideband /CSSB/ modulation suitability for broadcasting, analyzing signal spectrum, demodulation distortion and signal generation methods

23 p4125 A69-42111

SINGLE STAGE ROCKET VEHICLES

NT AGENA ROCKET VEHICLES

NT BLACK BRANT 2 SOUNDING ROCKET

NT BLACK KNIGHT ROCKET VEHICLE

Single stage rocket vehicle design for rapid global air transportation noting size, range and economics

09 p1433 A69-21303

Space flight cost analysis, relative costs of various types of transportation and need for reusable single stage to orbit vehicles

15 p2719 A69-30186

Single stage rocket control and trajectories for maximum target strike probability within given range

21 p3818 A69-38857

Single stage rocket body finite bending stiffness effect on pitching moment using approximate equation, noting applicability to multistage rockets

22 p4037 A69-41048

SINGULAR INTEGRAL EQUATIONS

Contact problem of pair of nonhomogeneous semicircular regions solved by singular integral equations solution method

02 p0336 A69-11553

Approximate solution of linear functional, singular integral and integrodifferential equations by general theory of approximate methods

02 p0272 A69-12163

Radiative transfer equations solved for electron scattering stellar atmosphere, using transformation of integrodifferential transfer equations into singular integral equations

03 p0466 A69-13351

Soviet book on theory of approximate methods and applications to numerical solution of singular integral equations

07 p1174 A69-19580

Singular integral method in approximation for synthesizing sequence of functions with spectrum of limited length

09 p1460 A69-22642

Analytic functions representation and application to theory of singular integral equations in continuum mechanics, noting Cauchy kernels and boundary value problems

19 p3361 A69-36813

Diffraction of plane polarized electromagnetic wave incident on dielectric wedge formulated as singular integral equation, discussing electric field amplitude

22 p3903 A69-41258

SINGULARITY [MATHEMATICS]

Structure of shock waves from MHD jet injected into zero viscosity, finite thermal and electrical conductivity medium analyzed by nonlinear differential equation system

01 p0130 A69-10774

Paradoxes associated with elastic-plastic limit load analysis of material satisfying Drucker stability postulates

02 p0337 A69-11562

Unsteady pressure field in zone of aerodynamic proximity of free moving airscrew investigated with propeller blades replaced by surface singularities

02 p0192 A69-12827

Numerical solution of elliptic equations by iteration result in convergence prevention and solution of Laplace and Poisson equations with singular Laplace operator

04 p0625 A69-15133

Electrical impedance of semiconductor supporting two waves contains entire complex transcendental function with complex parameter and infinity of zeros in left half z plane

07 p1196 A69-18268

Differential equations with singular problem solutions analyzed by reducing problem to solution of integral equation

07 p1174 A69-19004

Axially symmetric static solutions of Einstein equations with singularities on z axis allowing for higher multipole moments in general relativity

08 p1350 A69-19783

Space time structure conditions derived for compatibility with simultaneous fulfillment of causality and equivalence principles

08 p1351 A69-19948

Supersonic flows past slender bodies, calculating pressure by means of moving singularities

08 p1252 A69-20721

Singular perturbation problem for elliptic linear partial differential equation, studying asymptotic expansion of solution in vicinity of singular points in nonconvex domain

08 p1352 A69-20751

Finite difference schemes of high order of accuracy for Strum-Liouville and boundary value problems with regular singularity

10 p1719 A69-23365

Singular perturbations for Cauchy and boundary value problems, considering differential operators and Hilbert space

10 p1720 A69-23635

Differential game for determining singular fuel optimal control of plant with uncertainty in dynamic equation

10 p1667 A69-24041

Singularity of Schwarzschild spherically symmetrical solution to Einstein equations of general relativity theory, exemplifying Lemaître coordinate system

12 p1219 A69-25974

Singularities of optimal filtration for random signals given by differential equations with variable coefficients and white noise

13 p2218 A69-27251

Weak superconducting contacts volt-ampere characteristics current steps and emission spectra, showing singularities due to superconducting current nonharmonicity

14 p2504 A69-28994

Singularity-free global solutions to nonlinear differential equations associated with variational principles, deriving necessary condition for existence from dilatation invariance considerations

14 p2470 A69-29367

Physical singularity reduced to imaginary by introducing arbitrary function in form of perturbation into gravitational equations general solution

18 p1373 A69-35018

Singular perturbations and boundary layer theory for approximating solutions to simple ordinary differential equations

20 p3515 A69-37583

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms

21 p3685 A69-38451

First order linear differential equations subject to linear constraints, discussing solution uniqueness dependence on matrix nonsingularity

21 p3754 A69-38744

Nonlinear incompressible potential flow with unbounded free surfaces, analyzing singularities in finite part of space

21 p3696 A69-39295

Jacobi polynomial series analytical expansion, studying relationship to Taylor series singular points

21 p3757 A69-39537

Numerical integration of double integral with Cauchy type singularity for calculation of aerodynamic or hydrodynamic load on lifting body

23 p4182 A69-41913

Spherically rotating symmetric body gravitational collapse within Schwarzschild radius, presenting trapped surface concept for asymmetrical cases and generalization of space-time singularities

23 p4219 A69-42333

Free vertical shear layers structure solutions singularities in rotating fluids, considering motion by rising or spinning axisymmetric body

23 p4153 A69-42356

Supersonic flows around slender bodies calculated by method of moving singularities

23 p4061 A69-42407

Volterra problem with given singularities for exterior of circle applied to fluid mechanics

24 p4339 A69-42679

Singular optimal control problems theoretical and computational aspects

24 p4292 A69-43282

SINKS

NT HEAT SINKS

Source and sink method application to direct axisymmetric problems of hydrodynamics

05 p0747 A69-16039

SINTERED ALUMINUM POWDER

Vacuum heating and thermal cycling influence on mechanical and structural properties of aluminum sheets fabricated from sintered powder

02 p0266 A69-12126

Powdering temperature effect on mesh size, structure and mechanical properties of pressed semifinished sintered Al-Cr and Al-Fe alloys

03 p0452 A69-14119

Cold rolling and annealing effects on tensile strength, heat resistance and ductility of sintered Al powder sheets

03 p0452 A69-14121

Yielding of matrix material and cell size of substructure relationship to dry abrasion resistance of SAP type aluminum alloy at room temperature

08 p1319 A69-19995

Creep behavior of aluminum-alumina alloys analyzed using rupture time to determine deformation speed influence on elongation and crack formation

12 p2120 A69-26938

SINTERING

Preparation of refractory alloys in powders, fibers and sintered billets by thermochemical method [ONERA-TP-636]

02 p0251 A69-11625

Sintered molybdenum deoxidation effect with C, B and Si, analyzing hardness, tensile strength and ductility

02 p0265 A69-12002

Anomalous discontinuous stress relaxation in sintered tantalum

02 p0265 A69-12003

Exothermal effects during sintering of nickel-aluminum powder mixture

02 p0269 A69-12838

Exothermal effects during sintering of nickel-aluminum powder mixture, showing role of liquid phase decomposition and intermetallics

02 p0269 A69-12843

Fabrication of Cu-W composites with discontinuous fibers based on sintering and rolling

03 p0444 A69-13349

Hardenability of ShKh-15 steel, establishing relationship of porosity to sintering method

04 p0619 A69-15390

Two stage thermal treatment inhibiting influence on swelling and porosity linked to Kirkendall effect during sintering of Fe-Ni powder mixtures

05 p0782 A69-16616

Properties of electrolytic and reduced titanium powders and sinterability of porous compacts

05 p0782 A69-16795

Sintered W-Ni-Fe alloys strength and precipitation hardening characteristics for various compositions and cooling conditions

05 p0782 A69-16798

Microstructural changes during liquid phase sintering of alloys, considering temperature effect on carbide grain growth and activation energies

07 p1168 A69-19599

Polymorphic characteristics of titanium pentoxide prepared by reducing titania, examining oxidation products with X ray diffraction

07 p1168 A69-19601

Porous structures, using spherical tungsten powders, discussing metallurgy, sintering, temperature effects and performance characteristics in ion engines

10 p1710 A69-23166

Molybdenum fiber sintering activation by adding nickel, noting decrease in impact viscosity

10 p1711 A69-23336

Added metal oxides solid solutions effect on creep kinetics and strain rate of zirconia samples during sintering

12 p2118 A69-26260

Room temperature WC-Co compacts oxidation resistance in air noting increase with preliminary sintering temperature

13 p2275 A69-27345

Be billets fabrication from powders by cold hydrostatic pressing and pressureless sintering, noting hardness, density and grain size dependence on temperature

14 p2465 A69-29681

SINUSES

Sintered mixtures of Ni-Mo powder noting electrical resistance, alloy and shear strength and impact viscosity 15 p2638 A69-30280

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects 15 p2643 A69-31188

Ti and Zr diborides sintering with Cr, Mo, W and Re additions, discussing activation, pressure effects and density 22 p3968 A69-39888

Recrystallization during sintering of free flowing Nb and Ti carbide powders, determining grain growth dependence on temperature and activation energy 22 p3970 A69-40636

Surface chemistry effect on physical properties of pressure sintered Be metal, suggesting surface alloying approach by powder metallurgical techniques 24 p4332 A69-42963

SINUSES

Valsalva maneuver produced abrupt onset of ptosis and proptosis caused by ethmoidal air cell rupture, discussing etiologies 17 p2909 A69-33186

SINUSOIDS

U SINE WAVES

SITE DATA PROCESSORS

IMP-1 experiment, describing design and applications of SDP-3 computer 19 p3280 A69-36265

SDP-3-A general purpose stored program computer designed for small scientific spacecraft onboard data system, noting computerized simulation 20 p3500 A69-37385

SITES

NT LANDING SITES
NT LAUNCHING SITES
NT LUNAR LANDING SITES

Soil resistivity survey at earth telecommunication installation site to determine optimal grounding or electrode system 07 p1117 A69-19348

SIZE [DIMENSIONS]

Dimensional effects on thermodynamic and kinetic properties of thin semiconductor and semimetal films, noting quantization influence 01 p0136 A69-10186

Venus diameter determination from optical measurements, noting cloud layer height and height of suspended particles in upper atmosphere 05 p0818 A69-15621

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances 05 p0753 A69-16050

Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight 06 p1026 A69-18017

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants [AIAA PAPER 69-175] 06 p0983 A69-18152

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant [AIAA PAPER 69-144] 06 p0983 A69-18162

Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements 09 p1590 A69-21378

Ground station receiving antenna design and size for indirect distribution of TV programs by geostatic satellites 10 p1654 A69-23389

Helical and log conical helical antenna width reduction by loading of traveling wave antenna elements with isotropic material 11 p1852 A69-25315

Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions 12 p2114 A69-26496

Dimensions of 19 variable eclipsing binaries from published photometric and spectral orbital elements 18 p3198 A69-34766

Weight estimation and forecast in manned spacecraft design, noting size and weight relationship [SAE PAPER 793] 18 p3208 A69-34864

Far and near side lunar crater chains regularities in distribution and size 18 p3202 A69-35329

Cargo aircraft future design regarding engine development, structural flexibility, airport compatibility, cargo handling, etc 18 p3092 A69-35467

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances 20 p3532 A69-37959

SIZE DETERMINATION

NT PRECIPITATION PARTICLE MEASUREMENT

Particle size frequency distributions and lunar surface materials, showing impossibility of distinguishing between impact fragmentation of surface and pyroclastic rock deposition 02 p0325 A69-12567

Human visual systems ability to encode retinal images produced by different size objects 03 p0369 A69-13359

Lunar libration clouds, discussing visual observation at small phase angles for estimation of dominant cloud particle size 05 p0827 A69-16527

Photoelectric observation of star occultation by Neptune for mean radius determination 06 p1007 A69-17693

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125] 06 p1018 A69-18076

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine 06 p0984 A69-18117

Spatial size and velocity distributions for liquid or solid aerosols suspended in air flow using Q spoiled ruby laser and holography 09 p1492 A69-21418

Glass fibers size, finish and surface treatment identification by pyrolysis attenuated total reflectance IR spectroscopy 09 p1448 A69-22315

Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment 11 p1829 A69-25643

Radio sources angular dimensions determined by microwave interferometry, discussing distinctions between quasars, galaxies and unidentified sources 12 p2166 A69-27039

Vertically polarized log periodic antenna consisting of unipole vertical radiators with side radiators for achieving minimum size 16 p2763 A69-32580

X ray source Cyg XR-1 angular diameter upper limit determined from balloon experiment data obtained with collimated X ray telescopes 17 p3026 A69-32860

Venusian cloud layer radius, discussing error in determination of occultation level height of Regulus by Venus 18 p3203 A69-35331

Diameter density and atmosphere of Neptune revised based on star eclipse, noting altitude and temperature 18 p3205 A69-35438

Particle size, velocity and position in moving streams measured by tilted film plane optical system with pulsed light source 19 p3306 A69-35733

Dynamic cathode ray tube spot size measurement by two slit technique, noting relationship to beam current and luminance 21 p3719 A69-38329

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125] 21 p3828 A69-39770

SIZE PERCEPTION

U SPACE PERCEPTION

SIZE SEPARATION

Galaxies classified by matter content of nucleus, discussing evolution 11 p1953 A69-24351

Sorting particles by shape using sieving equipment, noting results with crushed gravel 21 p3731 A69-38950

SIZING [SEPARATION]

U SIZE SEPARATION

SIZING [SHAPING]

Titanium hot forming and sizing die fabrication concepts for aircraft structures [ASM PAPER D8-26.1] 07 p1143 A69-19671

Computer aided design analysis program to provide weight and sizing data for entry spacecraft [SAE PAPER 797] 18 p3208 A69-34903

SKELETON

U MUSCULOSKELETAL SYSTEM

SKEWNESS

Stress field for skew hole determined from plane stress field for equivalent right hole, considering elastic plate penetrated by oblique circular cylinder 04 p0674 A69-14581

Natural frequencies and modes of skew membranes obtained by Rayleigh-Ritz method 06 p1021 A69-17166

Clamped skew plates natural frequencies analyzed using Galerkin method, expressing deflections as double series of beam characteristic functions, stating eigenvalues and eigenvectors 20 p3621 A69-37210

Simultaneous lateral skewing regions existence in low speed three dimensional turbulent incompressible boundary layer flow [ASME PAPER 69-FE-24] 20 p3517 A69-37995

SKID LANDINGS

Steerable landing gear system consisting of freely casting corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft [AIAA PAPER 69-790] 19 p3243 A69-35633

Aircraft braking, discussing systems, brakes, tires, runway interface, heat sink materials, friction measurements, skid control, cooling and recovery equipment [SAE PAPER 690376] 23 p4063 A69-11670

SKIDDING

High speed ball bearing skidding, proposing analytical model as design tool, discussing effects of thrust load, speed, oil temperature and flow rate [ASME PAPER 69-LUBS-20] 18 p3140 A69-34377

Aircraft tire skidding on wet surfaces, measuring interstitial water pressure for various treads, velocities and surface textures 19 p3247 A69-35910

SKIN [ANATOMY]

NT EPIDERMIS
NT EPITHELIUM

Light transmission through body wall of living colorable desert iguanas measured by spectrophotometry, discussing skin pigment effects 07 p1059 A69-18373

Limits of human tolerance to localized skin exposure to IR irradiation of various intensities from pain threshold observations, noting skin temperature role 10 p1647 A69-23589

Histological changes in rat skin after 13 Mev proton irradiation, evaluating biopsies in tissue culture 14 p2407 A69-29299

Photographic and photometric study of absorption and reflection of ruby laser light incident on biological objects 21 p3665 A69-39060

Monomethylhydrazine absorption through canine skin noting metabolic aftereffects and methemoglobinemia 22 p3887 A69-41191

Insensible water loss from human skin as function of ambient vapor concentration using IR gas analysis, applying results to water loss model revision 23 p4077 A69-41293

Forearm skin capacity vessels tonus as function of intrapulmonary pressure during positive and negative pressure breathing 23 p4093 A69-42068

X band pulsed microwaves effect on skin metabolism including respiratory activity, biochemistry and biosynthesis of intercellular materials, etc 24 p4270 A69-42575

Albino guinea pigs respiration rates and ear skin histology after exposures to coherent ruby laser light 24 p4270 A69-42578

SKIN [STRUCTURAL MEMBER]

Skin panel stresses for random acoustic loading, determining aircraft structure responses 03 p0530 A69-14092

Titanium fuselage skin contouring to shallow compound curvature of supersonic aircraft by elastic draping, shot peen forming and cold stretching, discussing residual stresses 09 p1512 A69-22374

Damping of response of integrally stiffened skin structures to random acoustic pressures, reducing rms stress in case of broad band excitation [ASME PAPER 69-VIBR-26] 10 p1806 A69-24172

Aerodynamic skin heating at high Mach numbers affecting structural design, noting use of high temperature materials, insulation systems and shell construction method 21 p3646 A69-38460

SKIN FRICTION

NT AERODYNAMIC DRAG
NT FRICTION DRAG

NT SUPERSONIC DRAG
NT VISCIOUS DRAG

Transverse curvature effect on skin friction and heat transfer in laminar flows past slender circular cylinders 02 p0232 A69-12210

Thin film heated Pt resistance thermometer for skin friction or velocity measurements in air, water or blood 04 p0601 A69-15118

Differential rotation of sphere in viscous incompressible liquid, discussing pressure and skin friction drag between two hemispheres with different angular velocities 04 p0590 A69-15278

Local pressure and skin friction distribution around circular cylinder in cross flow in large range of Reynolds numbers 05 p0744 A69-15716

Incompressible turbulent boundary layer properties with arbitrary pressure gradient calculated by integral method resulting in single equation for skin friction coefficient [ASME PAPER 68-WA/FE-22] 05 p0749 A69-16098

Boundary layer transition detection at supersonic speeds, using thin film gages to infer local laminar and turbulent supersonic skin friction [AIAA PAPER 69-9] 06 p0912 A69-18075

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate [AIAA PAPER 69-164] 06 p0914 A69-18163

Constant property turbulent boundary layer flow, developing finite difference solution for prediction of velocity profiles and skin friction coefficient 09 p1482 A69-21950

Axisymmetric bodies longitudinal contours for hypersonic flow minimum drag, considering Newtonian pressure distribution and skin friction 10 p1632 A69-23886

Skin friction measurement with rectangular mouthed Preston tubes of constant thickness ratio, analyzing calibration curves and difference from circular tubes 11 p1880 A69-24376

Heat transfer and skin friction in convective and stagnation flow laminar film boiling in boundary layer flows with appreciable radiation 11 p1873 A69-25242

Skin friction drag coefficient for right circular cylinder calculation coefficient on basis of Blasius solution for flow 11 p1819 A69-25384

Skin friction coefficient relation to pressure distribution in turbulent flow and development of momentum thickness along flow 11 p1819 A69-25385

Floating element skin friction meter designed for adverse pressure gradients, discussing wall shear stress measurement 11 p1889 A69-25557

Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation [AIAA PAPER 69-345] 13 p2249 A69-28280

Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces 14 p2427 A69-29029

Three dimensional laminar boundary layer on semiinfinite permeable flat plate in viscous incompressible fluid flow, calculating velocity profiles and skin friction components 14 p2433 A69-29898

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient 15 p2589 A69-30002

Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction [AIAA PAPER 69-387] 15 p2591 A69-30477

Three dimensional effects on Stanton tube data for skin friction determination for small protuberances drag immersed in turbulent boundary layer 16 p2771 A69-31920

Analytical expressions validity for skin friction in compressible turbulent boundary layer over wide range of Reynolds numbers and heat transfer conditions 16 p2771 A69-31926

Swept wing attachment line boundary layer, measuring skin friction in full turbulence and velocity profiles with and without trip wire 17 p2958 A69-34047

Viscous incompressible fluid flow around semiinfinite oscillating plate and skin friction on infinite cylinders oscillating parallel to length 19 p3237 A69-35620

Skin friction balance in Mach 5 wind tunnel with high heat transfer, measuring shear forces 19 p3292 A69-35734

Skin friction balance for shear stress measurements in presence of ablation, describing balance construction, calibration, flexure range, etc 19 p3292 A69-35735

Turbulent skin friction coefficients of compliant surfaces on flat plates determined as function of speed for different materials 21 p3695 A69-39039

Skin friction results from free stream velocity boundary layers with varying injection and suction wall conditions, describing flow characteristics 21 p3696 A69-39431

Velocity profile and skin friction in boundary layer on flat plate with periodic vorticity near leading edge 22 p3929 A69-40015

Hypersonic flow for low Reynolds number, including magnetic field and wall temperature effects on heat transfer and skin friction for blunt shapes 22 p3860 A69-40540

Laminar viscous flow and skin friction near trailing edge of flat plate analyzed by modified Oseen approximation, noting accuracy for high Reynolds numbers 22 p3930 A69-40683

Skin friction and mean velocity profiles measured for fully developed 1000-10,000 Reynolds number flows in pipes and channels 22 p3932 A69-40897

Velocity defect profile and skin friction law for incompressible equilibrium turbulent boundary layer, using mixing length relation 22 p3934 A69-41180

Laminar boundary layers on slender paraboloids, analyzing skin friction formula and extension for transverse curvature ranges 23 p4152 A69-41904

Rough surface skin-friction relations expanded to provide turbulent boundary layer growth prediction in pressure gradient 24 p4304 A69-43580

Turbulent skin friction on compliant skins stretched over damping fluid in shallow bath in flat plate [AIAA PAPER 69-164] 24 p4306 A69-43685

SKIN FRICTION DRAG
U FRICTION DRAG

SKIN TEMPERATURE [BIOLOGY]

Aircrew members skin temperature changes in response to intense diffuse thermal radiation, noting psychological response to exposure [AGARDOGRAPH-111] 08 p1264 A69-20669

Skin and subcutaneous temperature during exposure to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data [AGARDOGRAPH-111] 08 p1264 A69-20671

Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer [AGARDOGRAPH-111] 08 p1266 A69-20677

Skin temperature and cutaneous pain during warm water immersion, refuting subcutaneous thermal gradient hypothesis for stimulation of heat pain 08 p1267 A69-20683

Passive thermal control system for space suit use in extravehicular environment, discussing skin temperature control at varying heat flow rates 12 p2023 A69-26549

Skin temperature change rate influence on sweating in male subjects, discussing role of central thermosensitive structures 22 p3874 A69-40210

Human sweat glands reflex responses to diverse skin cooling rates in hot room, discussing bath temperature step decrease effect on lower limb 23 p4082 A69-41446

Subjective feeling of dampness correlation with relative humidity of air at zero and below zero C temperatures 23 p4109 A69-41870

Central circulatory responses of humans to rapid skin temperature changes during continuous exercises 24 p4258 A69-42633

SKIN TEMPERATURE [NON-BIOLOGICAL]

Conductive heat transfer between aerodynamically heated skin and barrel of Aerobec 150 sounding rocket telescope, noting effect of residual gas pressure 09 p1610 A69-22005

Thermocouples dynamic response attached to thin skinned model under constant heating rate, considering error reduction in temperature measurement 13 p2375 A69-27785

Unsteady temperature field in plane skin of aerodynamic body in case of temperature dependent thermophysical characteristics of skin material 18 p3092 A69-34982

Corrections for eliminating anomalous skin effect on IR emissivity for Ag, Cu, Au and Al 23 p4177 A69-42212

SKIRTS

Skirts on hovercraft, noting rough water drag, plough in and overturning, and skirt oscillation and wear problems 10 p1634 A69-23629

Small hovercraft simple and bag skirts design characteristics, considering materials 13 p2202 A69-27545

Multicell air cushion vehicle technology based on 1/4 scale and full scale tests, noting comparison with plenum systems and costs 13 p2202 A69-27547

Flexible skirt design for air cushion vehicle consisting of semicylindrical elements and permitting horse power and cost reductions 13 p2203 A69-28179

Mountbatten /SR.N4/ hovercraft development, seakeeping, skirt design and service introduction 15 p2550 A69-30479

SKUA ROCKET VEHICLES

Meteorological and sounding British rockets Skylark, Petrel and Skua, showing capabilities, payloads and experiments [UN PAPER 68-95785] 01 p0161 A69-10530

Mesospheric fine winds structure, discussing data obtained by Skua II rocket with chaff payload 15 p2604 A69-31415

SKULL

NT CRANIUM

Ultrasound-echo-encephalography in diagnosis of posttraumatic intracranial hemorrhage of skull and brain trauma, noting neuroradiological techniques 21 p3652 A69-38790

Sound evoked DC changes on intact skull of adult humans using data from AgCl electrodes, investigating intensity function, analyzing data by computer 23 p4098 A69-42101

SKY

U NIGHT SKY

SKY BRIGHTNESS

Soviet rocket and satellite night, twilight, airglow and auroral studies, discussing day sky brightness, night airglow and atmospheric stratification 01 p0066 A69-10941

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability 01 p0074 A69-11185

Automatic spectroelectrophotometer for measuring sky spectral brightness at 6910-4040 angstroms, determining point of minimum brightness 01 p0074 A69-11187

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness 01 p0074 A69-11188

Twilight sky brightness measurements at 5200 angstroms for estimating upper atmospheric dust component, discussing error rates 01 p0075 A69-11191

Linear integral equations for brightness coefficients and auxiliary functions in semiinfinite atmosphere, expressing atmospheric albedo using moments and Chandrasekhar function 04 p0662 A69-15237

Dayglow determination from aerosol spectrum obtained through data of brightness and polarization of day sky 07 p1211 A69-18545

Cosmic radio noise brightness distribution in Southern Hemisphere at 10.02 MHz, noting spectra of sources observed 07 p1206 A69-19272

Night sky surface brightness and polarization measurements as basis for zodiacal dust cloud particle density distribution normal to ecliptic plane 07 p1222 A69-19588

Clear atmosphere model based on path of sight equilibrium radiance and nonabsorption permitting integration of equation of transfer 07 p1130 A69-19643

SKY RADIATION

Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature
08 p1392 A69-20562

Upper atmosphere temperature distribution estimation on basis of twilight zenith sky intensity measurements, discussing influence of various parameters on accuracy
09 p1487 A69-21653

Irregular pulsations in morning sky brightness using all-sky photographic airborne auroral observations along auroral oval
09 p1594 A69-21666

Photoelectric polarimeter to record sky light intensity in form of polarized components, detailing construction and operation
12 p2078 A69-25892

Visual mapping and photometric scanning of Saturn with rings from earth, noting ring brightness edgewise linear dependence on rings opening
15 p2697 A69-31256

Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
17 p3037 A69-33664

Sky brightness temperature spectra searched for neutral intergalactic atomic hydrogen radio emission, using horn-reflector antenna
18 p3190 A69-34285

Search for diffuse galactic light component between 2100-2800 A by rocket measurements of night sky brightness, showing low albedo of interstellar dust
18 p3202 A69-35210

Visibility degree of noctilucent cloud determined from ratio of brightness contrast against sky to eye contrast threshold
19 p3362 A69-36410

Daylight sky spectral radiance in ruby laser spectral range as functions of scattering angle, height over horizon of observed point and sun altitude
21 p3734 A69-38397

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres
21 p3716 A69-39116

SKY RADIATION

NT AIRGLOW
NT DAYGLOW
NT GEOCORONAL EMISSIONS
NT NIGHTGLOW
NT TWILIGHT GLOW

French radio astronomy, presenting sky background radiation and solar emission results from Rubis 02 and 04 rockets
02 p0316 A69-11908

Stratospheric dust effect on twilight sky color, evaluating scattered radiation chromaticity for atmospheric models containing ozone
02 p0243 A69-12014

X ray airglow in daytime sky, suggesting origin in atmospheric N and O K alpha lines due to fluorescent excitation by solar X rays
02 p0307 A69-12022

Double scattering effects of sky radiation and outgoing radiation balance in disturbed atmosphere, using homogeneous plane parallel atmospheric model
07 p1175 A69-18270

Soviet monograph on UV radiation of sun and sky emphasizing biological effects
07 p1221 A69-19506

Sky background light automatic compensation in stellar photography, using single or double channel photometer
08 p1313 A69-20247

Sky background of soft X ray emission in spectral band explained by emission lines from galaxies
08 p1380 A69-20769

Daytime sky radiation measurements by high altitude vehicles with spectrophotometer noting spectral radiance, luminance, polarization, albedo and near IR
08 p1317 A69-21071

Daytime clear sky light polarization in UV and visual spectral regions calculated with considerations for aerosol components polarization effect
09 p1491 A69-22708

Multiple scattering of solar radiation in turbid atmosphere, considering equations of sky radiation and radiative transfer
11 p1911 A69-24587

Northern sky scan for discrete sources of gamma rays in 240 to 1000 kev energy region by telescope on balloon flight
11 p1946 A69-24593

Sky polarization neutral points around sunset /spring-summer 1968/ at Bedford, Mass., inferring continuation and variations of enhanced stratospheric turbidity
12 p2067 A69-26343

Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra
12 p2131 A69-27072

Sky mapping in IR, using IR photometer on TD1 ESRO satellite
13 p2260 A69-27606

Incoming IR flux measurements at high altitude, noting flux increase due to water vapor condensation in troposphere
13 p2256 A69-28647

Absorption band observation near 0.43 mu in solar spectra and scattered radiation of sky, determining nontelluric origin
14 p2441 A69-29407

Sky cosmic radio emission absolute temperature measured at decimeter wavelengths and at two zenith angles to minimize atmospheric influence
15 p2687 A69-30544

Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electrons, giving clue about diffuse sky background of X rays
22 p4006 A69-40643

SKY WAVES

NT WHISTLERS

Propagation tests of skywave field strength reduction by orthogonal transmission
03 p0395 A69-13597

Visual receiving equipment for consistency determination of Loran-C sky wave signals apparent arrival times
12 p2029 A69-26052

Forward and backscatter soundings compared to verify focusing mechanism of HF sky waves
14 p2435 A69-28967

Ground conductivity effects on MF sky wave transmission strength, discussing transmission over open sea
17 p2918 A69-33029

SKYCRANE HELICOPTER

U CH-54 HELICOPTER

SKYLARK ROCKET VEHICLE

Meteorological and sounding British rockets Skylark, Petrel and Skua, showing capabilities, payloads and experiments
[UN PAPER 68-95785] 01 p0161 A69-10530

Pyrotechnics applications to Skylark upper atmosphere sounding rocket, discussing payload heads, nose cones, sensor covers, etc
10 p1792 A69-23029

SKYRAIDER AIRCRAFT

U A-1 AIRCRAFT

SKYVAN AIRCRAFT

U SC-7 AIRCRAFT

SLABS

Transient temperature distribution for finite slab in phase transformations via single face temperature changes
[ASME PAPER 68-WA/HT-37] 05 p0848 A69-16128

Discrete radiative transfer in nonhomogeneous slabs, giving matrix solution
05 p0849 A69-16480

Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program
18 p3177 A69-35179

Gas dynamics of material slab under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency
19 p3449 A69-36355

SLANT

U SLOPES

SLANT PERCEPTION

U SPACE PERCEPTION

SLATS

U LEADING EDGE SLATS

SLEDS

U ROCKET PROPELLED SLEDS

SLEEP

NT HYPNOSIS

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude
06 p0874 A69-17835

Computer analysis of cortical and subcortical activity in yellow bellied marmot during sleep, hibernation and hypothermia
10 p1643 A69-23122

Space crew performance subsequent to sudden sleep arousal, noting selection between simultaneous and staggered sleep schedules
19 p3263 A69-36453

Human sleep during prolonged rotation, discussing electroencephalograms, acoustic signal frequency producing waking reaction, cutaneous galvanic reflex and deepness of sleep
20 p3472 A69-37261

Sleep habits of radar operators working in alternate crews in radar station on continuous watch
21 p3666 A69-39269

Functional changes of somatosensory pathway from periphery to cortex during rapid eye movement /REM/ and non-REM periods of deep sleep
22 p3872 A69-40161

EEG, ocular movements, gastric mobility and pH during human sleep from data transmitted by swallowed radio transmitter
23 p4093 A69-42063

Human arterial pressure reflex regulation during sleep, assessing baroreflex sensitivity
24 p4257 A69-42626

SLEEP DEPRIVATION

Aircrew fatigue and sleep loss factors, discussing transition through various time zones and flying through normal sleeping times
21 p3666 A69-39275

Prolonged wakefulness effect on human work capacity in isolated chamber, determining physical, intellectual and sensory capacities
22 p3877 A69-40280

Psychological, psychophysiological and biochemical effects of prolonged sleep deprivation in human males, noting transient ego disruption
23 p4099 A69-42195

Hypnotic compounds properties influencing REM /rapid eye movements/ stage, discussing insomnia problems with jet flight crew and passengers
24 p4277 A69-43389

SLEEVES

Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints
08 p1320 A69-20529

SLENDER BODIES

Dense plasma with plasma frequency greater than cyclotron frequency, discussing flow past slender bodies
01 p0126 A69-10226

Vortex method within slender body theory for aerodynamic interference between missile in both captive and dropped positions and carrying aircraft
01 p0007 A69-11026

Hall effect in unperturbed flow of fluids near thin profiles at infinity
01 p0132 A69-11133

Transverse curvature effect on skin friction and heat transfer in laminar flows past slender circular cylinders
02 p0232 A69-12210

Lift from unsteady flow past cascade of slender profiles with stagger angle reduced to solution of Fredholm integral equation
02 p0190 A69-12575

Curved bodies substitution in unsteady hypersonic flow past slender sharp nosed bodies within framework of plane sections
02 p0191 A69-12576

Shock waves collision with supersonically moving axisymmetric slender bodies analyzed by integral transform method, noting application to shock-shock interaction
03 p0413 A69-13010

Velocity field generated by shock wave incident on slender symmetrical body resting in infinite compressible medium
03 p0362 A69-13418

Kinematic parameters for elastic slender body aid in description of motion of body
04 p0668 A69-14271

Stokes-like region around yawed needle in hypersonic strong interaction regime, discussing asymptotic analysis under Stewartson conditions
04 p0542 A69-14732

Sting diameter and cylindrical protuberance length effects on base pressure of axisymmetric body in turbulent supersonic flow
05 p0697 A69-15712

Axisymmetric hypersonic flow of model gas over slender bodies with strong viscous interaction and shock wave extended to power law viscosity variation
05 p0744 A69-15720

Model kinetic integral equation for describing flow in transition region at leading edge of tapered body in rarefied gas

05 p0697 A69-16040

MHD aligned flow of compressible fluid past slender body in wind tunnel

06 p0861 A69-17719

Turbulent density fluctuations in near wake of hypersonic axisymmetric slender body measured photometrically with near UV absorption of sulfur dioxide in flow [AIAA PAPER 69-70]

06 p0864 A69-18158

Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations

07 p1234 A69-19382

Supersonic flows past slender bodies, calculating pressure by means of moving singularities

08 p1252 A69-20721

Pressure coefficients determination on slender body surface to estimate effects of quadratic terms, considering body of revolution with thin cruciform lifting surfaces

10 p1632 A69-22911

Mean flow measurements in supersonic wake of slender two dimensional body at zero incidence and heat transfer rate, noting predictability from similarity analysis

11 p1817 A69-24281

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion

11 p1970 A69-24609

Unsteady heat conduction of semiinfinite thin rod with mobile end face, ideally insulated lateral surface and convective heat transfer on uninsulated portion

11 p2002 A69-25229

Steady linearized aligned fields flow of collisionless plasma past slender body, noting effect of tensor conductivity

11 p1930 A69-25278

Hypersonic viscous gas flow past thin bodies, deriving equations for interactions between boundary layer and external flow

11 p1820 A69-25472

Axisymmetric detached flow past slender solid of revolution by ideal incompressible fluid at zero angle of attack and with small cavitation numbers

11 p1877 A69-25741

Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves

13 p2248 A69-28170

Near wake in axisymmetric supersonic flow past slender body with/without base injection, obtaining pressure, temperature, Mach number, velocity and concentration distributions

14 p2389 A69-29017

Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters

15 p2681 A69-30376

Turbulent and transitional near wake of adiabatic slender wedge with and without base injection at Mach 4 in supersonic wind tunnel

16 p2732 A69-31882

Mean near wake flow of adiabatic two dimensional wedge at Mach 4 with tripped turbulent boundary layers and base mass addition

16 p2733 A69-32147

Mixed supersonic/subsonic type steady wake flow fields in flat based slender bodies, using finite difference method

17 p2892 A69-33468

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation

17 p2894 A69-33501

Rarified gas dynamics of blunt and sharp-jointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum

18 p3123 A69-34924

Vortex breakdown on slender sharp edged and modified delta wings with varying sweep angles investigated in wind tunnel using schlieren system for flow visualization

19 p3237 A69-35644

Nose bluntness effect on hypersonic flow for slender blunt bodies with arbitrarily shaped lateral surfaces at small attack angle

19 p3239 A69-36402

Second order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thickness

20 p3458 A69-37182

Slender profile oscillations in subsonic flow near solid boundary, calculating pressure gradients by dipole method

23 p4058 A69-41713

Laminar boundary layers on slender paraboloids, analyzing skin friction formula and extension for transverse curvature ranges

23 p4152 A69-41904

Supersonic flows around slender bodies calculated by method of moving singularities

23 p4061 A69-42407

Two dimensional diverging flow of ideal compressible fluid past slender profile, using Prandtl-Glauert rule and linearized equation

24 p4243 A69-42584

Velocity and pressure fields produced by deformable load carrying filament studied for unsteady gas motion past slender body with nonpotential external forces

24 p4246 A69-43483

SLENDER CONES

Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime

[AIAA PAPER 68-2]

02 p0189 A69-12520

Shoulder pressure on slender cone/afterbody combinations in hypersonic inviscid flow of perfect gas

04 p0542 A69-14735

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas

05 p0699 A69-16673

Lift drag ratio attainable by optimal transversal contour slender conical lifting body at hypersonic speeds

06 p0861 A69-17640

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers

[AIAA PAPER 69-133]

06 p0862 A69-18050

Ballistic range tests to study ablation effects on aerodynamic characteristics of ablating and nonablating slender cones

[AIAA PAPER 69-179]

06 p1036 A69-18083

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests

[AIAA PAPER 69-12]

06 p0863 A69-18112

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique

[AIAA PAPER 69-140]

06 p0865 A69-18184

Nonequilibrium three dimensional boundary layer over slightly yawed cone analyzed for air dissociation and ionization parameters, noting binary scaling application

09 p1430 A69-21965

Electromagnetic plane wave scattering from slender semiinfinite cone, obtaining contribution to tip return arising from direct diffraction

11 p1836 A69-24988

Mass transfer cooling data correlation for estimating mass injection effect on slender cone drag

13 p2199 A69-28224

Unsteady pressure on oscillating slender cone in hypersonic flow derived by expanding flow equations in powers of shock density parameter

14 p2389 A69-29020

Flow field around sharp slender cones with surface mass transfer at zero angle of attack in low density supersonic and hypersonic flow

[AIAA PAPER 68-66]

16 p2732 A69-31887

Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds

17 p2890 A69-33250

Hypersonic slender cone zero angle of attack drag in rarefied continuum and noncontinuum flow in shock tunnel, indicating body dimension influence in transition regime

[AIAA PAPER 69-711]

17 p2891 A69-33445

Hypersonic boundary layer transition on blunt slender cones at M equal 10 obtained independent Reynolds number

[AIAA PAPER 69-705]

17 p2954 A69-33455

Nonuniform heating rates during laminar boundary layer transition on slender cone at hypersonic speeds

18 p3085 A69-34435

Monte Carlo simulation for studying rarefied hypersonic gas flow about slender cones and flat plates

20 p3459 A69-37902

Three dimensional laminar boundary layer hypersonic flow about slender conical vehicles, analyzing transverse surface curvature effect, studying Reynolds number, cone angle, etc

[ASME PAPER 69-FE-23]

20 p3460 A69-37992

Fluid mechanical structure of laminar hypersonic wake behind sharp circular cone, investigating flow field at zero angle of attack and adiabatic wall temperature

24 p4247 A69-43576

Hypersonic viscous interaction, studying axisymmetric flow over slender sharp nose cones at zero angle of attack and three dimensional flow over sharp flat plate

24 p4248 A69-43579

Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel

24 p4248 A69-43588

Free flight telemetry base pressure measurements on slender cones and domed afterbodies in hypersonic laminar flow, using shock tunnel test facility

[AIAA PAPER 68-698]

24 p4249 A69-43675

Pressure distribution correlation over blunt slender cone at various angles of attack by tangent cone method, describing hypersonic wind tunnel tests

24 p4249 A69-43681

SLENDER WINGS

Test of similarity theory of leading edge vortices above slender wings in subsonic conical flow

04 p0543 A69-14820

Slender wing theory extension to not-to-slender wings approached as singular perturbation problem, using matched asymptotic expansions method

04 p0544 A69-14891

Vortex motion of separated flow from slender wings and rotor loading, discussing computer role in low speed aerodynamic research

05 p0696 A69-15562

Zhukovskii lifting force theorem application to slender wing profile and airfoil lattice in linearized supersonic flow

05 p0697 A69-16023

Lifting force and moments acting on slender wing of finite span and arbitrary planform moving at constant mean velocity in unsteady flow

06 p0858 A69-17338

Aerodynamic properties calculations of arbitrary slender supersonic wings using sum of simple integrals

15 p2548 A69-31170

Three dimensional velocity field disturbed by shock wave traveling across slender wing at supersonic speed

19 p3242 A69-36797

SLIDING

Stress fields in Hertzian contact of parallel cylinders composed of anisotropic materials and transversely isotropic spherical bodies

08 p1414 A69-20524

Runways slipperiness and grooving, discussing influence of wetness, tire form and speed on friction coefficient

10 p1674 A69-23707

Sliding behavior of nonmetallic bearing materials /plastics, ceramics and cermets/, discussing non-lubricated bearing application

14 p2454 A69-28851

Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability

18 p3147 A69-34531

Linear oscillations of sphere in compressible viscous fluid with slip at surface, noting drag variation

19 p3297 A69-35836

Optimal sliding regimes for controlling dynamic systems, proposing control parameters system extension

21 p3768 A69-39826

SLIDING CONTACT

Microslip between concentrated contacts and design charts for maximum pressure, closing-in of contacting bodies and optimized shapes, giving computer programs

15 p2629 A69-30903

Stochastic model extension of interface temperature of solids in sliding contact to include transients, noting interface activities dependence

22 p3955 A69-40404

SLIDING FRICTION

Surface fatigue significance in sliding wear studied from damage on copper single crystal using electron microscope techniques

01 p0085 A69-10368

Sliding surface tracks from hardened steel sliders on flat PTFE examined for molecular orientation with electron microscope

01 p0085 A69-10369

Friction and wear behavior of mechanical face seals, considering techniques and lubricants for increasing product of pressure and sliding velocity

02 p0253 A69-12160

Idealized slider bearings with Maxwell liquid as lubricant, analyzing elasticity effects on pressure, load capacity and friction

02 p0253 A69-12413

Metal strip angled profile shaping by sliding application of forces with draw plate, analyzing friction effect with thin plastic shell engineering theory

03 p0432 A69-12962

Grain boundary sliding influence on gross mechanical behavior and stress distributions, emphasizing creep behavior

03 p0450 A69-13882

Stability of high speed rotors with sliding bearings

04 p0607 A69-15163

Dry sliding friction and wear in ultrahigh vacuum, emphasizing slip rings and brushes for space applications [IME PAPER 7]

07 p1138 A69-18561

Surface preparation effects on Ni-Cr-Fe alloy boundary friction studied by repeated sliding of cylinders on hard Pd-Pt-Au alloy cylinder [ASLE PREPRINT 68AM 6D-4]

07 p1139 A69-18625

Friction and wear tests of synthetic rutile single crystals against diamond styli and spherical sliders of ruby, sapphire and hardened steel [ASLE PAPER 68-LC-3]

07 p1140 A69-19307

Sliding friction technique to determine contact area and surface microtopography between abraded metals and polymers

08 p1319 A69-19994

Hypersonic slipper bearing problem in rocket boosted sleds, discussing flow model consisting of laminar stagnation region and boundary layers [AIAA PAPER 68-736]

09 p1477 A69-22003

Wear and friction properties of nylon and polyethylene sliding over unlubricated steel, considering adhesion theory

11 p1892 A69-25021

Fatigue strength reduction in Ti alloy in sliding friction contact with metallic materials caused by fretting corrosion

12 p2113 A69-26125

Calculated and experimental surface wear damage data correlated for materials under friction conditions

15 p2618 A69-30106

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity [ASLE PREPRINT 69AM 5C-2]

15 p2619 A69-30473

Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals [ASLE FICFS PREPRINT 27]

15 p2621 A69-30492

Corrosive wear due to atmospheric O in sliding metal systems, noting oxidation rate relation to wear rate and activation energy [ASLE PAPER 68-LC-11]

15 p2622 A69-30605

Sliding friction tests of Cu and Cu-Be alloy plates in contact with various alloy sliders in air and vacuum [ASLE PAPER 68-LC-5]

15 p2622 A69-30610

Boron effect on sintered porous Ni friction at high sliding velocities and temperatures, analyzing oxide film destruction restraint by decreased Ni plasticity

15 p2641 A69-31187

Sliding friction and wear properties of metal ceramic composites applied to aircraft brakes

17 p2987 A69-33375

Jet aircraft runway friction due to mud and water noting relation to takeoff length

17 p2903 A69-34216

Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems

18 p3149 A69-35183

Friction coefficient and elastic deformation magnitudes relation in polyurethane during sliding friction in various liquids/lubricants

18 p3149 A69-35362

Full circle Be brake disks in C-5 aircraft, discussing properties at elevated temperature and fastening of friction lining

18 p3095 A69-35424

MHD pivoted slider bearing with convex pad surface under azimuthal magnetic field

21 p3733 A69-39744

Electrical sliprings assembly development with low dynamic resistance and long lifetime for space simulation testing, noting wear rate of rings and brushes [AIAA PAPER 69-1035]

22 p3925 A69-40402

Seizing characteristics of metals using electrical resistance as measure of lattice imperfection density due to friction

22 p3957 A69-41111

Pressure distribution in gas lubrication layer of infinite radial sliding bearings, approximating differential equation by simple formulas

23 p4168 A69-41412

Elastohydrodynamic lubrication of cylindrical rubber surface sliding over glass plate, using optical interference technique

23 p4171 A69-42531

SLIP

Slip geometry in bcc metals, discussing slip-line observations by light and electron microscopy techniques

05 p0781 A69-16537

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Longitudinal modulus of interlaminar slip during creep of fiberglass reinforced plastic determined by bending tests of beams under concentrated force

18 p3163 A69-35365

Cage and roller slip in high speed roller bearings over steady radial loads by measurement and theory

20 p3547 A69-37066

Deformation localization and slip functions in statistical theory of plasticity, discussing approximations and untenability of Yosimura theory criticism

22 p4044 A69-40742

Relative slip effect on fretting fatigue strength, deriving stress initiating fatigue cracks

24 p4404 A69-43628

SLIP BANDS

U EDGE DISLOCATIONS

SLIP CASTING

Slip casting powder mixture of zirconium carbide and tungsten, discussing optimum composition

10 p1716 A69-24056

SLIP FLOW

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]

05 p0698 A69-16089

Slip flow problem for general specular-diffuse boundary condition in kinetic theory of gases, noting molecular distribution function

11 p1869 A69-24893

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas

12 p2061 A69-25887

Gas molecular mean free path effect on performance of spiral grooved thrust bearing, discussing slip flow factor and He Knudsen number [ASME PAPER 68-LUBS-17]

13 p2266 A69-27273

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]

14 p2390 A69-29445

Fringing effects on electric efficiency variation with slip for cylindrical induction MHD device operable as accelerator, generator or Joule heater [AIAA PAPER 67-714]

16 p2736 A69-32152

SLIPPERS

U SHOES

SLIPSTREAMS

NT PROPELLER SLIPSTREAMS

Supersonic jet impingement on flat plate, showing shock wave profiles and slipstream surface at stations parallel to nozzle axis

08 p1252 A69-20841

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field

14 p2501 A69-29917

Aerodynamic characteristics of turbulent twisted jet in slipstream in open jet wind tunnel, determining static pressure, temperature and velocity component profiles

21 p3645 A69-39848

Jet dynamic characteristics injected into supersonic air slipstream incident on flat body, calculating configuration, shock wave geometry and parameters distribution in flow field

24 p4250 A69-43710

SLOPES

NT GLIDE PATHS

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains

06 p0895 A69-17461

Radio source counts log N-log S diagram slope uncertainty due to finite source number, discussing statistical analysis methods accuracy

08 p1383 A69-20048

Parallel flow of viscous liquid film with free surface down inclined plane, noting growth of initially infinitesimal amplitude waves and finite amplitude wave stability

11 p1869 A69-24891

Regional slope measurement from two monoscopic radar images of same terrain area, discussing accuracy and applications to geomorphology and hydrology

15 p2610 A69-30710

Slope optimization of antenna array difference radiation patterns coinciding with antenna directive gains

20 p3508 A69-37944

SLOSHING

U LIQUID SLOSHING

SLOT ANTENNAS

Radiation pattern shaping from circular aperture antenna with constant illumination amplitude [UN PAPER 68-95756]

01 p0029 A69-10524

Dual band shunt slot linear array for S and X band radiation patterns generated from single aperture

02 p0219 A69-12344

Impedance sheet approximation to plasma slab, considering plane wave propagation, plasma covered slot antenna and transmission loss

02 p0209 A69-12348

Diffraction coefficient for higher order edge-edge interaction terms in two dimensional diffraction by narrow slit and small circular aperture

03 p0396 A69-13631

Input impedance of slot antenna in primary resonance region

04 p0577 A69-14784

Difference radiation patterns of circular aperture with axisymmetric amplitude distribution

05 p0717 A69-15636

Backfire log periodic cavity-backed slot array, giving H plane power patterns with near field plots along array

08 p1281 A69-20035

Center feed system for broadening frequency bandwidth in X-band edge slotted waveguide array antenna

08 p1286 A69-20836

Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method

11 p1851 A69-24986

Radiation pattern of axial slot on circular conducting cylinder based on wedge diffraction and creeping wave theory

11 p1836 A69-24993

Complete electric field of idealized infinite slot antenna with uniform excitation in infinite conducting plane

11 p1851 A69-24994

Radiation pattern as function of asymmetry in amplitude of secondary source excitation by primary aperture antenna

11 p1852 A69-25117

Far field radiation pattern, radiation resistance, power gain, directivity and effective aperture for center feed dipole antenna with feed points displaced arbitrarily

12 p2039 A69-26352

Difference radiation patterns of circular aperture with axisymmetric amplitude distribution

16 p2754 A69-32494

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model [AIAA PAPER 69-701]

17 p2920 A69-33461

Reciprocal theorem for obtaining relations between transmitting antenna effective area, radiation pattern and aperture distribution

19 p3281 A69-35765

Geometrical configuration for synthetic aperture terrain imaging radar scanning system, noting scanning methods in range and azimuth directions

20 p3489 A69-37634

Synthetic aperture radar principles, using periodic pulse modulation to construct terrain imaging radar

20 p3489 A69-37635

Normalized SNR of aperture antennas determined in terms of random signal and noise fields correlation functions

20 p3494 A69-37845

Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory

22 p3914 A69-40703

Edge diffraction effects in TEM axially slotted finite ground plane on radiation pattern in waveguides of different geometries

23 p4116 A69-41588

Simple antenna with good circular polarization over wide space sector, showing geometry, normalized orthogonal field distributions and beamwidth range, considering slot combinations

23 p4137 A69-41590

Slot antenna radiation patterns in presence of aperture RF plasma breakdown sheath measured for various gas pressures and breakdown power levels

23 p4116 A69-41595

Synthesis of antenna arrays of longitudinal passive slot radiators on metallic cylinder excited by single active slot, including experimental patterns

23 p4138 A69-41936

Directional couplers applied to excitation of non-protruding surface wave antennas, examining ridge slot system

23 p4139 A69-41946

Antenna losses produced by metal space frame radome determined by considering end effects, member junctions circulating currents, mutual scattering and near field effects

23 p4149 A69-42127

Beam wave propagation in conducting hollow circular cylinder applied to shielding cylinders design for aperture antenna transmission

24 p4282 A69-42987

Asymmetric metal flanges effect on beam tilt of aperture antennas

24 p4288 A69-43765

SLOTS

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance

[ASME PAPER 69-GT-6] 09 p1432 A69-22507

Asymmetrical waves diffraction field at wide slots in circular waveguides determined in Huygens- Kirchhoff approximation

15 p2570 A69-30955

Circulation controlled rotor aerodynamics with tangentially ejected air from surface slots of lifting body, noting performance at advance ratios and thrust coefficients

18 p3089 A69-35232

Rectangular waveguides coupled by oblique subresonant slots in common face, discussing slot orientation and geometry roles

23 p4123 A69-41941

Electromagnetic wave propagation in rectangular and plane parallel waveguides coupled by common wall with periodic transverse slots

23 p4124 A69-42037

Slot type jet interaction flow tests at free stream Mach 4 and 5, describing equipment, procedure and results

24 p4249 A69-43686

SLOTTED ANTENNAS

U SLOT ANTENNAS

SLOTTED WIND TUNNELS

Optimal V/STOL wind tunnel through interference study of slotted tunnel walls, including porosity and height to width ratio effects

[AIAA PAPER 69-171] 06 p0908 A69-18203

Subsonic wind tunnel solid and ventilated wall interference on air flow around aerodynamic models, discussing data corrections and slotted wall tests

[AIAA PAPER 68-360] 12 p2059 A69-26766

SLOW NEUTRONS

U THERMAL NEUTRONS

SLUDGE

Protective layer material for high sludge capacity filters for fine purification of liquids used in aircraft hydraulic system

22 p3869 A69-40637

SLUSH

Drag and spray effects due to slush and water on runways during aircraft takeoffs

01 p0011 A69-11048

Slush hydrogen for spacecraft propulsion, discussing fabrication, conservation and storage

17 p3017 A69-33339

Slush H and N gels preparation and characteristics, including measurements of weight bearing capacity of gel as function of percent mass silica gelant

22 p3998 A69-40632

SLV [SOFT LANDING VEHICLES]

U SOFT LANDING SPACECRAFT

SMALL PERTURBATION FLOW

Three dimensional flow at large distance and in front of shock wave for three dimensional body traveling at sonic velocity

01 p0005 A69-10159

Linear stability of parallel flow in concentric annulus for infinitesimal axisymmetric disturbances

01 p0061 A69-11201

Matched asymptotic expansions method applied to magnetic field induction in thin toroidal wire and flow past circular cylinder at small Reynolds number

07 p1180 A69-18811

Thin spherical layer flow stability with respect to small disturbances, showing unsteady motion above critical Reynolds numbers and secondary flow features

11 p1875 A69-25486

Small disturbances distribution in flow parameters along two dimensional combustion zone of finite width using thermal diffusion theory

14 p2537 A69-28986

Linear small perturbation approximation for supersonic nonequilibrium flows past oscillating airfoil in two dimensional wind tunnel, noting Laplace transform solution

23 p4061 A69-42349

SMEAR

Alphanumeric characters to identify radar targets on PPI display for air traffic control, considering technique for reducing smear

09 p1495 A69-21675

SMELL

U OLFACTORY PERCEPTION

SMITH CHART

Book on Smith chart electronic applications in waveguide, circuit and component analysis and synthesis

22 p3915 A69-40780

SMOKE

Polarization of laser radiation scattered forward and back in artificial fog and smoke

03 p0393 A69-13275

Gas turbine engines smoke emission, considering smoke measurement, flame structure, carbon production, pressure effects fuel-air ratio, etc

09 p1573 A69-22622

Polarization of laser radiation scattered forward and back in artificial fog and smoke

14 p2410 A69-28783

Short laser pulses reflection from artificial fog and smoke, showing dependence on reflecting medium attenuation coefficient

15 p2562 A69-30077

Noise abatement and smoke emission reduction from aircraft engines

[AIAA PAPER 69-489] 16 p2746 A69-32764

Gas turbine engines smoke reduction, aerated fuel sprays for smoke control on engine design and factors affecting visibility of exhaust plumes

17 p3020 A69-33350

Karman vortex street formation indicated by smoke visualization method study of laminar wake behind single cylinder

21 p3644 A69-38687

SMOKE ABATEMENT

Low smoke emission combustors for aircraft turbine engines, discussing effects on ignition and exit temperature distribution

[AIAA PAPER 69-493] 19 p3394 A69-36299

SMOKE TRAILS

Aerated fuel spray effect on smoke reduction from high pressure ratio aircraft gas turbine engines, including smoke measurement and visibility

19 p3395 A69-36770

SMOOTHING

NT DATA SMOOTHING

Differentiability of fundamental solution to elliptic equations based on exact theorems of smoothness

01 p0106 A69-10955

SMS

U SYNCHRONOUS

SATELLITE

METEOROLOGICAL

SLAKING

U LATERAL OSCILLATION

SNAP

U SPACE POWER UNIT REACTORS

SNAP 8

SNAP 8 developmental reactor vacuum system providing space environment simulation for nuclear reactor ground testing

13 p2241 A69-28086

SNAP 10A

Zirconium hydride thermoelectric power system for space missions, discussing compactness, shield weight, temperature capability, reliability and SNAP 10A program

16 p2809 A69-31723

SNAP 13

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times

14 p2481 A69-29191

SNAP 21

SNAP 21 radioisotope powered thermionic generator with multiple couple Pb-Sn-telluride/Bi-Sb-telluride flat plate configuration for deep sea applications

23 p4069 A69-42248

SNAP 27

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities

[AIAA PAPER 68-1166] 03 p0465 A69-13561

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities

[AIAA PAPER 68-1166] 22 p3979 A69-40551

SNAP 27 radioisotope thermoelectric generator system designed as prime power supply for Apollo lunar surface experiment package [ALSEP]

23 p4187 A69-42249

SNATCHING

U SPACECRAFT RECOVERY

SNOW

Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces

15 p2596 A69-30455

Satellite photography for snow cover mapping and depth estimation

18 p3167 A69-35084

SNOWFLOW EFFECT

U PLASMA DYNAMICS

SOAPS

Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior

17 p2951 A69-33253

SOCIAL FACTORS

Aerospace technology role in economic and social benefits

[UN PAPER 68-95321] 01 p0178 A69-10467

Aerospace management technology transferability to problems of society and government

02 p0355 A69-11754

National tasks in civil aeronautical research and development noting technological and social factors

08 p1422 A69-20171

Man machine integration, detailing sensory input and motor /or output/ systems, control loop and social structure impact

11 p1831 A69-25656

Engineer performance related to organizational factors, discussing colleague contact, work diversity, number of subordinates and involvement in work

15 p2721 A69-31069

Legal, social and physical effects of supersonic flight, discussing damage claims validity and recovery resulting from breaking of sound barrier

17 p3075 A69-32841

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2

18 p3233 A69-35055

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 1

18 p3234 A69-35070

Social entrainment of feeding rhythms in Rhesus monkeys with light, temperature and sound held constant

24 p4260 A69-42704

Bigemini pattern in baboon social behavior, noting diurnal rhythm independence from social deprivation, light cycling and food supply

24 p4260 A69-42705

Feedback effects and social facilitation of human vigilance performance, evaluating mere coaction vs potential evaluation

24 p4271 A69-42751

SOCIAL ISOLATION

Daily sleep and wakefulness periodicity changes effect on heart rate, respiration and body temperature diurnal rhythms in human males under isolation conditions

03 p0377 A69-14203

Leisure time and recreation facilities during long duration space missions, discussing astronaut selection procedure, active recreation, passive enjoyment and exercise programs

06 p0880 A69-17209

Social isolation and other sensory deprivations effects on human organism 08 p1263 A69-19937

Underwater experiment to determine man capability to perform scientific mission during 60 days isolation, noting task performance, social interaction and personal adjustment 08 p1300 A69-20113

Barbamyl effect with and without somatotropic hormone injection in mice during prolonged isolation and hypokinesia, noting sleep duration 10 p1646 A69-23576

Isolation of scientific and technical personnel and effect on lateral communication and intellectual cross fertilization in research and development program 11 p2004 A69-25303

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects 13 p2216 A69-28612

Social and visual isolation effect on rat blood pressure, pulse pressure, heart rate, behavior and response to epinephrine 14 p2407 A69-29296

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement 17 p2906 A69-32936

Desynchronization and resynchronization of human circadian rhythms of activity, body temperature and urine excretion during isolation in underground bunker in various conditions 21 p3660 A69-39173

Subjects confined in caves for two to six months to note physiological rhythms time evolution and associated desynchronization and resynchronization 23 p4107 A69-41818

Physiological circadian rhythms in isolated and nonisolated Macaca Nemestrinas living under varied light intensities, noting telemetered deep body temperature, urine volume and sodium, etc 24 p4261 A69-42707

SOCIAL PSYCHIATRY

Flying safety and human factors relationships from job classification survey oriented toward social psychology 06 p0884 A69-18035

Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview 12 p2023 A69-26492

SOCIOLOGY

NT SOCIAL FACTORS

National programs relationship to progress in technological societies 03 p0536 A69-14245

UFOs from sociological viewpoint, stressing need for international cooperation in exobiological research 17 p3076 A69-32974

Technology and social progress - ASS Conference, Washington, D.C., March 1968 17 p3076 A69-34039

Technical communication patterns in R and D laboratories, discussing effects of work structure, social relations, etc 20 p3640 A69-38019

Universities and public service education noting NASA requirements and programs 20 p3641 A69-38282

Ecological foundations of Haley metalaw and implications of interstellar golden rule, discussing social interaction with alien life forms 23 p4240 A69-41304

SODIUM

NT LIQUID SODIUM

Seasonal variation of evening-morning difference in maximum density heights of twilight sodium layer 01 p0063 A69-10275

Automatic remotely operated sodium D line reversal temperature measuring apparatus, analyzing systematic errors 06 p1035 A69-17932

Intrarenal capillary hydrostatic pressure effect on hemodynamically induced changes in sodium excretion 07 p1063 A69-18629

Two stage sodium thermal reduction of Ti tetrachloride to metallic Ti, determining process parameters 07 p1164 A69-18785

Photoionization cross section measurements for sodium line by analyzing electron-ion recombination radiation from sodium seeded plasma, determining electron temperatures and concentrations 07 p1184 A69-19164

Flame emission spectrophotometric method for ultraminate sodium contamination detection in thin silicon oxide films and cleaned silicon surfaces [ECS PAPER 306] 08 p1314 A69-20367

Atmospheric sodium measured at night by tuned laser radar, giving average column number density 09 p1484 A69-21464

Physical factors affecting proximal and distal tubular sodium reabsorption in dogs undergoing water diuresis 13 p2210 A69-28482

Sodium atoms and NO molecules role in atomic O 6300 and 5577 A emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination 14 p2523 A69-29707

Partial wave description for calculating cross sections of fine structure transitions of Na in collision with He, discussing shape resonances 15 p2655 A69-30198

Number and mass of sodium atoms in comet Ikeya-Seki 1965f head calculated from spectral observations, ascribing D lines to resonance scattering of photospheric radiation 15 p2685 A69-30526

Time resolved Stark broadened spectral profiles for Na I 5882-88 A and 4978-82 A lines of plasma, comparing electron densities 15 p2656 A69-31155

Aldosterone and hydrocortisone introduced into bladders of adrenalectomized dogs to restore sodium metabolism contributing to normal water-salt homeostasis 21 p3656 A69-38965

Free Na atoms production for spectral line reversal procedure, facilitating procedure by replacing NaCl, NaI and chromium carbonyl by sodium azide 24 p4297 A69-43589

SODIUM AZIDES

Free Na atoms production for spectral line reversal procedure, facilitating procedure by replacing NaCl, NaI and chromium carbonyl by sodium azide 24 p4297 A69-43589

SODIUM CARBONATES

Motion sickness prophylactic action of sodium hydrocarbonate in dogs subjected to vertical accelerations, using intravenous administration 20 p3473 A69-37269

SODIUM CHLORIDES

Titanium alloy stress corrosion behavior in atmospheric salt environments at elevated temperatures related to aircraft engine part failures 01 p0099 A69-11056

Proton energy distributions for passage through NaCl, KCl, KBr, Si and Ge single crystals at various angles relative to /100/ and /110/ crystallographic planes 01 p0140 A69-11009

Properties of superdense NaCl plasmas as model working substance for MHD generator, discussing ion concentration and collisions, charge reversal and conductivities 10 p1739 A69-23493

Substructural patterns of epitaxial PbTe films obtained by condensation of vaporized PbTe on NaCl crystal surfaces, discussing formation kinetics and morphology 12 p2144 A69-26675

Stress corrosion in smooth and prenotched maraging steels exposed to sodium chloride solution and natural sea water 14 p2467 A69-29940

Hyperfine spectrum analysis of NaCl at low field using molecular beam electric resonance method, discussing Hamiltonian function representation 16 p2815 A69-32794

Electrode potentials of pure metals, Ni-Cr and Ni base alloys in molten salts applied to corrosion studies 17 p2990 A69-33650

SODIUM COMPOUNDS

NT CRYOLITE

NT NEPHELINE

Temperature dependent far IR absorption of ferroelectric sodium nitrite, discussing single and multiphonon processes 03 p0490 A69-13940

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission 09 p1515 A69-21354

SODIUM D-LINE

U D LINES

SODIUM ISOTOPES

Pionic 2p-1s X ray transition energy and natural linewidth and muonic 2p-1s X ray transition energy measurements for Na 23 01 p0122 A69-10035

Quadrupole splitting of Na 23 nuclear magnetic resonance /NMR/ to investigate spontaneous polarization, coercive field and domain characteristics in Rochelle salt ferroelectric phase 09 p1559 A69-22283

SODIUM VAPOR

Electron density in arc discharge between carbon electrodes and in discharge with Na vapor, noting relation to temperature and current 01 p0128 A69-10433

Initial production of metallic gases associated with sporadic E layers by processes other than vaporization or photodissociation, discussing Na atom production mechanisms 01 p0071 A69-11167

Rocket observations of ionospheric E layer winds using Na release method 20 p3529 A69-37796

Turbulent field structure between 90-120 km estimated from sodium clouds diameters variation ejected from rockets 21 p3713 A69-38524

Heat transfer capability and startup behavior of sodium heat pipes, studying heat transfer limit due to vapor velocity at evaporator end [ASME PAPER 69-HT-21] 24 p4412 A69-43547

SODIUM 22

Na 22 and H 3 production rates determined in stone meteorites exposed to 3 Gev isotropic protons, using radionuclide distribution data of exposed thick stone target 19 p3425 A69-36423

SOFT LANDING

Constant thrust deceleration formula for gravity turn soft landing maneuvers expressed in elementary and trigonometric functions of initial conditions for descent 02 p0335 A69-12531

FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models 10 p1654 A69-23279

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer 13 p2356 A69-27685

Cylindrically shaped projectiles low velocity impact upon horizontal surface of dry commercial Ottawa sand mass, estimating penetration for soft landing 21 p3839 A69-39231

Fuel-time optimal retrothrust control for vertical and gravity turn ballistic trajectories of soft landing nonlifting bodies based on Pontryagin principle [AIAA PAPER 69-868] 21 p3809 A69-39394

NT SURVEYOR 7 LUNAR PROBE

NT VOSKHOD 1 SPACECRAFT

NT VOSKHOD 2 SPACECRAFT

NT VOSKHOD MANNED SPACECRAFT

Multiengine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation 02 p0277 A69-11740

Direct analysis of lunar surface chemical composition, considering soft landing probe and X ray isotope fluorescence method 11 p1832 A69-24629

Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles 13 p2352 A69-27908

SOFTENING

Cycle dependent fatigue hardening and softening of metals in terms of crystal structure and stress amplitude 01 p0165 A69-10133

Phase softening transformations heat resisting alloys during cyclic heating, using X ray and electron microscope analyses 21 p3746 A69-38957

Alloy softening in bcc Fe-N and Fe-Ni, discussing causes of thermal stress component reduction in interstitial and substitutional alloys 22 p3969 A69-40164

Solid solution softening in bcc alloys, discussing alloy atoms intervention in low temperature deformation process
22 p3969 A69-40165

Bcc metals strengthening and alloy softening mechanisms, studying temperature and additives effects
22 p3970 A69-40166

SOFTWARE [COMPUTERS]
U COMPUTER PROGRAMS

SOIL MECHANICS
Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo
20 p3613 A69-38248

Lunar morphology evolution by dust transport on surface, discussing possibility of fluidization
23 p4221 A69-42392

SOIL SCIENCE
Soil resistivity survey at earth telecommunication installation site to determine optimal grounding or electrode system
07 p1117 A69-19348

Bioorganic comparative analysis of desert soils, Precambrian shales and meteorites by automated pyrolysis-gas chromatography-mass spectrometry system for future Mars soil analysis [JPL-TR-32-1368]
11 p1832 A69-25640

Sterile soil from Antarctica found to contain organic carbon, noting significance for biological exploration of Mars
16 p2746 A69-31552

Lunar surface bulk density determined from laboratory and spacecraft measurements of static bearing capacity as functions of depth and solids percentage
18 p3193 A69-34366

Urease activity determined by using C 14 urea in stored, preserved /Permafrost/ and irradiated soils
18 p3095 A69-34543

Consecutive reaction equations for idealized soil column solved for nitrifying metabolite concentrations as functions of time and depth
19 p3264 A69-35606

Adenosine triphosphate /ATP/ content of terrestrial soils, based on firefly bioluminescent reaction, for Mars soil problems
20 p3473 A69-37567

Environmental neutron flux measured by various techniques, studying effects of soil and moisture on density
22 p4002 A69-40094

NT SANDSTONES
NT SHALES

Pedoscope use in soil microbiological studies including ecology, infection susceptibility, etc
01 p0021 A69-11092

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery
12 p2075 A69-26989

Microwave radiometric brightness temperature relationship to soil moisture content for estimating bearing strength
12 p2099 A69-27008

Gravitational fields and atmospheric pressure effects on soils subjected to static and dynamic loading, using aircraft parabolic gravity simulation [AIAA PAPER 69-1009]
22 p3921 A69-40382

SOLAR ACTIVITY
NT FACULAE
NT SPICULES
NT SUNSPOTS

Solar and geophysical activity during February 1965 and March 1966 indicating geomagnetic activity on 27-day recurrence diagram
01 p0068 A69-11118

Solar X-ray high activity level during spring 1966 connected with gamma type magnetic solar regions and correlated with ionospheric effects
01 p0146 A69-11119

Solar, interplanetary and magnetospheric electromagnetic events before and during magnetic storm from ground observatory and earth satellite data
01 p0156 A69-11120

Chromospheric and photospheric solar observations made in Belgium in 1967, noting heliographic sunspot latitudes
02 p0313 A69-11533

Longitudinal distribution of cycle sunspots in initial phase of solar activity from Greenwich Observatory data
02 p0314 A69-11647

Solar and galactic cosmic rays measurement data to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
02 p0306 A69-11658

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center
02 p0314 A69-11676

Relation between solar activity and cyclic variation of pearl pulsations excitation frequency during sunspot cycle
02 p0239 A69-11696

Charts summarizing daily solar phenomena, cosmic rays, geomagnetic variation, ionosphere, radiowave propagation and airglow observations in Japan
02 p0315 A69-11732

Primary cosmic radiation charge spectrum measurement during 1965 minimum solar activity, using balloon-borne Cerenkov scintillation counter
02 p0308 A69-12043

Book containing 1960-1965 /including IQSY/ chronological tables of solar and geophysical events, discussing solar activity, geomagnetic, ionospheric, auroral and cosmic ray research
02 p0321 A69-12165

Cosmic MHD, discussing mechanisms responsible for solar phenomena and dynamics of interstellar medium
02 p0293 A69-12789

Ionospheric parameters variation during SC effect as function of solar and magnetic activities
03 p0423 A69-13534

Absorption as factor influencing correlation between solar activity, sporadic E layer probability of occurrence and reflection stability
03 p0423 A69-13537

Geomagnetic field quiet day solar variations current system calculated, using 2000 LT as zero level basis
03 p0424 A69-13541

Horizontal and vertical downward velocity components in developed solar active regions
04 p0651 A69-14370

Daily solar indices monthly averages errors due to evaluation for days presenting favorable weather conditions
04 p0657 A69-14700

Slowly varying solar radio emission caused by bremsstrahlung and cyclotron mechanisms within limits of active region model
04 p0662 A69-15240

Polarization degree of type solar radio bursts dependent on heliographic longitude
04 p0649 A69-15242

UK space research in 1970s emphasizing solar observations in UN, cosmic X ray astronomy, solar space astronomy and ionospheric investigation
06 p0997 A69-16853

Cosmic ray daily variations relationship to geomagnetic activity, sector structure of interplanetary magnetic field and sunspot activity
06 p0990 A69-17291

Flare-like phenomena in chromosphere, discussing moustaches, dashes and spicules and relation to changes in magnetic field
06 p0994 A69-17433

Solar disk surge distribution difference between eastern and western disk parts
06 p0995 A69-17440

Sunspot ejection of filaments, flare surges and flare sprays, discussing bright and dark matter divergence from western spot
06 p0995 A69-17441

Solar type stellar activity, considering solar activity origin and correlation with stellar distances
06 p0996 A69-17447

Long lived streams of low energy solar electrons and protons and association with bright flares or solar active regions
07 p1206 A69-19249

Bow shock and magnetopause boundary observations with IMP 2 plasma detector
07 p1129 A69-19372

Soviet monograph on diurnal solar cosmic ray variations from maximum to minimum solar activity, discussing model based on anisotropic particle scattering theory
07 p1209 A69-19500

Hydrogen concentration above earth surface during minimum solar activity from ionospheric rocket and satellite measurements
07 p1129 A69-19612

Solar radio astronomy, discussing quiet sun radio emission, solar activity, slowly varying radio emission, radio bursts and possibility of observing lines
08 p1388 A69-20218

Sunspot activity dependence on phase of eleven year cycle and heliographic latitude, discussing fine structure of butterfly diagrams
08 p1379 A69-20611

Proton flares statistical analysis regarding isolated and near activity complexes for long term forecasting
08 p1379 A69-20614

Dispersion and average monthly numbers of whistlers for propagation trajectories during solar activity minimum, discussing electron concentrations in magnetosphere
09 p1485 A69-21531

Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
09 p1575 A69-21550

Zero reference field for quiet day solar variations, considering magnetic field levels and errors
09 p1575 A69-21551

Type 3 solar radio noise bursts at hectometer wavelengths, deducing coronal electron temperatures from decay rates
09 p1594 A69-21665

Galactic cosmic ray modulation and solar activity analyzed on basis of cosmic ray measurement in stratosphere
10 p1758 A69-22832

Solar diurnal variation amplitude and phase instability, considering anisotropic cosmic ray fluxes superposition
10 p1759 A69-22837

Solar activity and 19 to 24 day variations in cosmic ray intensity
10 p1759 A69-22843

Solar activity forecasting methods
10 p1777 A69-23312

Solar radio astronomy in Australia including solar atmosphere, bursts, instruments, etc
10 p1777 A69-23383

Solar activity complex development based on magnetic, photospheric, chromospheric and coronal observations
11 p1964 A69-25418

Iono-index about hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions
12 p2148 A69-26107

Linear extrapolation of stationary stochastic process predicting fluctuations of minimum and maximum periods in solar cycle
12 p2149 A69-26221

Interplanetary plasma flow directional velocity distribution from solar atmosphere active regions found inhomogeneous
12 p2149 A69-26698

Solar quiet currents in three dimensional ionosphere, considering ionospheric conductivity and horizontal layer equations
12 p2074 A69-26955

Coronal features prediction compared to maximum solar activity observations, discussing variations in force free field
13 p2354 A69-28472

Solar activity forecasting methods based on sunspots and flares
13 p2333 A69-28657

Solar and galactic cosmic rays measurement data used to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
13 p2333 A69-28689

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

13 p2355 A69-28707

Relation between solar activity and cyclic variation of pearl pulsations excitation frequency during sunspot cycle

13 p2258 A69-28727

Solar proton flux in two energy intervals measuring by ATS detectors during January 1967 event compared with data from satellites outside magnetosphere

14 p2509 A69-28935

Solar activity indices based on Ca IIoculi, emphasizing index representing emission excess over chromospheric emission

14 p2525 A69-29722

Solar activity and large scale magnetic field distribution in discrete latitude zones, including interplanetary magnetic field above ecliptic

14 p2528 A69-29966

Solar activity history and morphology 1964-1965/

15 p2679 A69-30006

Solar ionizing radiation sources, discussing activity at sunspot minimum, temperature, density and solar wind effects, X ray and UV spectra, etc

15 p2673 A69-30007

Cosmic ray variation theory, presenting data on coupling of solar activity with large scale characteristics of solar wind during 11-year cycle

15 p2673 A69-30015

Solar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements

15 p2600 A69-31351

Exospheric temperature variations by Thomson scattering related to solar and geomagnetic activity, discussing seasonal effect on thermospheric variables

15 p2604 A69-31409

Book on cosmic ray variations and solar activity during IQSY covering energy spectrum, outer space radiation, magnetosphere, etc

16 p2849 A69-32052

Trieste astronomical observatory optical and radio solar photosphere observations in 1967, including solar cycle and north-south symmetry

16 p2858 A69-32206

Dispersion and average monthly numbers of whistlers for propagation trajectories during solar activity minimum, discussing electron concentrations in magnetosphere

16 p2783 A69-32526

Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization

16 p2851 A69-32545

Zero reference field for quiet day solar variations, considering magnetic field levels and errors

16 p2851 A69-32546

Turbulent diffusion inside sun as explanation of solar spindown, Li depletion at surface and neutrino discrepancy, discussing diffusion coefficient and stellar evolution

16 p2866 A69-32814

Photospheric granulation near center of quiet sun, analyzing morphological properties from high definition Stratoscope photographs

17 p3029 A69-33045

Finite resolution effect on solar granulation simulated by numerical experiments using two dimensional smeared pattern

17 p3029 A69-33046

Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines

17 p3040 A69-33801

Solar radio sources heights at 1424 and 696 MHz during near minimum solar activity

17 p3040 A69-33808

Auroral absorption maximum frequency correlation with years of solar activity reduction and magnetic activity from riometric data long term variations

17 p2968 A69-33991

Time dependent diffuse reflections related to solar activity, showing diffusion intensity variations with sporadic E layer height and electron concentration

17 p2968 A69-33997

Low altitude trapped protons in inner radiation belt during solar minimum period, using emulsion detectors on polar-orbiting satellite

18 p3187 A69-34944

Solar activity /Madrid 1967/, detailing Wolf numbers, sunspots, chromospheric faculae, H filaments and prominences

18 p3202 A69-35290

Umbral chromosphere flashes visual and photometric observations at 5 sec intervals on K line filtergrams using Halle filter

18 p3204 A69-35390

Cosmic rays nucleonic component latitude at solar minimum activity, using IGY neutron monitor

19 p3396 A69-36411

Solar and geomagnetic activity persistence by variance spectrum analysis, noting sunspot numbers and radiation flux autocorrelation functions

20 p3601 A69-37508

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

20 p3591 A69-38042

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity

20 p3607 A69-38045

Solar activity center characteristics in floccula stage during eleven year sunspot cycle

20 p3616 A69-38302

Babcock solar activity periodicity theory, correlating spots displacement and coronal magnetic field intensity changes

23 p4208 A69-41283

Day-to-day variability of daily variation of cosmic ray intensity during quiet solar activity period using high latitude neutron monitor data

23 p4204 A69-41484

Solar physics outline, discussing composition, quiet and active sun characteristics, radiation, etc

24 p4379 A69-42781

Solar activity empirical correlation with planetary positions used for long range forecast of solar flare proton events

24 p4366 A69-42880

Solar activity long term forecasts determined from comparison between Mount Wilson magnetic field synoptic chart latitude zones and sunspot groups

24 p4374 A69-43625

Interplanetary and geophysical conditions forecasting based on repetitions of low latitude photospheric background magnetic field patterns during solar activity cycles

24 p4387 A69-43626

SOLAR ACTIVITY EFFECTS

Ionic composition and temperature of nighttime topside ionosphere from analysis of incoherent backscatter spectra, discussing solar activity effects

01 p0076 A69-11233

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity

02 p0237 A69-11662

Unusual stratification of F region during solar activities, noting role of traveling inhomogeneities

02 p0237 A69-11663

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers

02 p0238 A69-11680

E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods

02 p0239 A69-11683

Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions

02 p0239 A69-11694

Magnetic storm of January 1967 due to 3B solar flare noting spacecraft observations, intensity, magnetospheric distortions and solar wind dynamics

03 p0500 A69-13430

Cosmic rays intensity increase due to meteor showers noting maximum solar activity effects

03 p0500 A69-13509

Ionospheric midday radio wave absorption as function of geomagnetic latitude, season and solar activity from pulsed vertical radar sounding data

03 p0394 A69-13521

Solar flares effect on ozonosphere, calculating time necessary for solar radiation to increase ozone concentration by 50 percent

03 p0424 A69-13542

Cosmic ray intensity after solar flare shown greater than during quiet periods from balloon data at Murmansk and Mirny

04 p0648 A69-14375

Geoelectric field over polar cap based on proton flux detection

04 p0648 A69-14682

Delay between solar activity and density changes in upper atmosphere using Harris-Priester model

04 p0594 A69-15121

Electromagnetic radiation from solar flares based on rocket and satellite observations of 10-100 keV X ray emission and ground observation of cm-wavelength bursts

05 p0813 A69-15603

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature

05 p0824 A69-16060

Solar modulating function form changes resulting in hysteresis near solar minimum

05 p0815 A69-16249

Zodiacal light, cometary contribution and solar activity

05 p0826 A69-16391

Solar cycle influence on winds in lower ionosphere

05 p0759 A69-16421

Solar flare influence on potential gradient and air-earth current properties at high mountain stations

05 p0759 A69-16634

Thermoelastic effects on gravity gradient stabilization of artificial satellites, including role of solar activity

06 p1025 A69-17613

Ionization index, electron formation and effective recombination coefficient in E 2 layer, noting solar activity effect

06 p0920 A69-17725

Vertically moving ionized formations relation to solar and magnetic activity

06 p0920 A69-17730

Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft

06 p0996 A69-18113

Quasi-periodic variations of solar radio emission intensity related to solar activity variations

07 p1211 A69-18516

Solar end and lateral pumping apparatus for neodymium doped YAG crystal lasers, noting applicability to space communication

07 p1150 A69-18953

Local interstellar electron spectrum limits from measurements of cosmic ray electrons, nonthermal galactic radio emission and solar modulation effects

07 p1206 A69-19269

Solar activity modulation of galactic cosmic rays with more than 1 GeV energy

08 p1378 A69-20224

Long term modulation of cosmic rays by solar activity explained by Parker solar wind model, noting confirmation by direct satellite measurements

08 p1379 A69-20533

Solar phenomena correlation with brightness variations of comet Alcock 1963b, noting sunspot maximum followed by maximum in absolute magnitude of comet

08 p1394 A69-20620

Fast and slow neutron latitude variation at aircraft altitudes during solar minimum, noting environment effects on measurement

09 p1574 A69-21402

Interplanetary medium parameters strong variations during low solar activity derived from Mariner 2 data

09 p1575 A69-21522

Mach number values and propagation rates of wear disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity

09 p1575 A69-21523

Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations

09 p1486 A69-21549

Eleven year cyclicity of geomagnetic activity from Sverdrlovsk Observatory data, noting possible relation with structural features of solar activity cycles

09 p1486 A69-21552

Solar modulation of galactic cosmic rays, discussing disagreements between convection diffusion theory and observation

09 p1581 A69-22744

Solar flare relation to interplanetary scintillation indices and power spectra

09 p1582 A69-22751

Short term variability of solar proton flux in interplanetary space during solar flare activity, using data from cosmic ray detector on Pioneer 7

09 p1582 A69-22754

Toroidal magnetic fields in ionosphere associated with solar quiet daily variations producing electric current and equatorial auroral electrojets

10 p1681 A69-22805

Galactic and solar cosmic ray modulation in interplanetary space during different phases of 11 year solar activity cycle

10 p1758 A69-22833

Forbush effects energy spectra and cosmic ray anisotropy beyond magnetosphere analyzed during solar activity minimum, using data from neutron monitors global network

10 p1758 A69-22835

Solar activity effect on interplanetary electromagnetic field according to cosmic ray modulation data, noting ineffective correlation and solar wind effects

10 p1759 A69-22841

Sudden ionospheric disturbance effects of solar X ray emission from active region with proton flare

10 p1764 A69-23744

Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation

10 p1683 A69-23770

Forbush decrease associated with July 7 1966 proton event from cosmic ray intensity variation measurements by neutron monitors

10 p1768 A69-23774

Interplanetary plasma subsequent to July 7, 1966 flare monitored by detectors on Pioneer 6 and Explorer 33

10 p1783 A69-23775

F region response to solar proton flare characterized by two phase ionospheric storm as measured at ground base stations

10 p1684 A69-23783

Incoherent scatter measurements of F region electron concentrations at solar activity minimum

10 p1684 A69-23825

Secondary muon flux from primary cosmic ray particles monitored during minimum solar activity by telescopes at 60 mwe underground

10 p1769 A69-23827

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters for analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity

10 p1769 A69-23900

Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity

10 p1686 A69-23911

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters

10 p1687 A69-23919

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies

10 p1687 A69-23927

Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level

10 p1689 A69-23939

Solar wind flux near earth observed by Venera 2 /1965/ and Venera 4 /1967/ probes, noting solar activity effects

10 p1771 A69-24201

Various glacial periods mechanism ascribed to combination of long term solar activity cycle and polar migration

11 p1877 A69-24409

Photoelectric measurements of nightglow intensities during sunspot minima by zenith photometer, considering background continuum

11 p1877 A69-24584

Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks

11 p1958 A69-24591

Jupiter red spot visibility, establishing partial dependence on solar activity

11 p1964 A69-25404

Recurrent geophysical disturbances associated with solar active regions and low latitude background field pattern on solar surface magnetic fields

11 p1964 A69-25415

Cometary, lunar and solar effects on precipitation, considering joint influence of meteoric streams and moon

11 p1965 A69-25420

Monochromatic midlatitude auroral arc /M arc/ observation on 28-29 September 1967 at Moscow, Idaho

12 p2065 A69-26105

Variable solar activity effect on earth upper atmosphere rotation at altitudes from 200 to 300 km

12 p2069 A69-26442

Solar chromospheric flares effect on temperature of upper atmosphere observed by satellite at perigee altitude

12 p2149 A69-26447

Oscillation cycle of atmospheric circulation, analyzing solar activity effects on lunar and solar semidiurnal tides and transition from zonal to meridional circulation

12 p2070 A69-26692

Frequent periodic variations existence in daytime ozone content associated with solar activity

12 p2070 A69-26693

Solar control of day-to-day variability in phase of solar diurnal variation of horizontal magnetic intensity on quiet days

12 p2073 A69-26954

Relation between north-south asymmetry of F 2 region critical frequencies and geomagnetic axis inclination angle, establishing increase in asymmetry during increased solar activity

13 p2256 A69-28693

Unusual stratification of F region during solar activities, noting role of traveling inhomogeneities

13 p2256 A69-28694

11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers

13 p2257 A69-28711

E region electron concentration measurements during large solar zenith angles, noting anomalous behavior during low solar activity periods

13 p2258 A69-28714

Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions

13 p2258 A69-28725

Solar radio emission data during IGY covering solar terrestrial disturbances, broadband bursts, solar indices, etc

14 p2513 A69-29321

Solar flare effect on polar chorus variation determined by comparing Antarctica VLF data with low latitude magnetograms

14 p2514 A69-29385

Polar auroras temporal and spatial variations and relation to solar activity

14 p2442 A69-29719

Epochs in atmospheric circulation development over Northern Hemisphere, emphasizing solar activity roles in epochs appearances

14 p2478 A69-29837

Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory

14 p2515 A69-29967

Solar corpuscular radiation characterization by stable four streamer structure at near minimum solar activity

15 p2674 A69-30517

Solar cycle effect on high latitude magnetic activity, discussing annual variations and Lassen auroral zone model confirmation

15 p2598 A69-31207

Atmospheric density and temperature variations between 200-600 km from Cosmos satellite data, noting solar activity effect

15 p2599 A69-31343

ESRO 2 satellite observations of solar proton event of 9 June 1968, comparing flux profile variations across polar cap with magnetic changes at earth surface

15 p2677 A69-31347

Upper atmosphere structure and variations including density and composition in lower thermosphere, diurnal variations, variations with solar activity, etc

15 p2600 A69-31355

Atmospheric density dependence on solar and geomagnetic activity at low latitudes, discussing atmospheric expansion

15 p2605 A69-31441

Book on ionospheric radio waves covering geomagnetism and sun, whistler propagation, oblique propagation, satellite sounding, etc

16 p2749 A69-31715

Polar Ionosphere Beacon Satellite S-66 signals measured for large scale horizontal gradients in total electron content of Antarctic ionosphere at sunspot minimum and maximum

16 p2774 A69-31989

Lunar surface characteristics, discussing light polarization, lunar radiation, solar radiation and meteorite impact effects, etc

16 p2856 A69-32069

Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects

16 p2849 A69-32082

Geomagnetic storms generation interpreted using solar coronal arrangements above central meridian

16 p2777 A69-32100

Low latitude asymmetric disturbance field analyzed using equivalent current vectors during magnetic storms, allowing for solar quiet day variation and declination

16 p2778 A69-32184

Earth atmosphere effect on cosmic ray variations, considering relation between extensive air showers and cosmic ray spectrum

16 p2851 A69-32381

Lunar components in mean values of geomagnetic field daily variations, discussing lunar phase during selected quiet days

16 p2782 A69-32458

Semiannual variation in amplitude of solar daily quiet geomagnetic variation, discussing sunspot dependence of seasonal secondary minimum and maxima

16 p2782 A69-32459

Interplanetary medium parameters strong variations during low solar activity derived from Mariner 2 data

16 p2851 A69-32517

Mach number values and propagation rates of weak disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity

16 p2851 A69-32518

Geomagnetic field quiet solar variations variability explained by model, noting agreement with observations at various stations

16 p2784 A69-32544

Eleven year cyclicity of geomagnetic activity from Sverdlvsk Observatory data, noting possible relation with structural features of solar activity cycles

16 p2784 A69-32547

Cosmic ray electron spectrum data obtained by balloon flights, showing electron flux reduction above 500 Mev with increasing solar activity

16 p2851 A69-32566

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects

16 p2784 A69-32613

Fast atmospheric neutrons flux and spectrum measurement during two balloon flights, tabulating results and evaluating albedo flux during quiet sun period

16 p2851 A69-32616

Solar and terrestrial phenomena correlated for March 1966 events

16 p2852 A69-32621

F region stratification during solar minimum and maximum, discussing regularities of plasma frequencies and diurnal variations

17 p2959 A69-33005

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances

17 p2959 A69-33006

Ozone concentration worldwide anomaly above 40 km in annual variations, noting dissimilarity in seasonal maximum and minimum with lower level

17 p2960 A69-33166

Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations

17 p3035 A69-33627

E region horizontal drift measurements at Ahmedabad from 1956 to 1966, noting solar activity and seasonal influences

17 p2962 A69-33678

Circular polarization in moving type 4 burst compared to stationary type 4 burst and related to preceding type 2 sources

17 p3024 A69-33806

Polar auroras appearance at solar activity maximum /IGY/ and minimum /IQSY/ at oval zone latitudes

17 p2963 A69-33955

High latitude geomagnetic field quiet solar diurnal variations during magnetically quiet IGY winter days, relating type and amplitude at low and midlatitudes

17 p2964 A69-33960

Geomagnetic disturbances intensity spatiotemporal distribution at Northern Hemisphere high latitudes during IGY and IQSY

17 p2965 A69-33966

Annual variations of postsunset altitude peak of equatorial F region noting correlation with solar activity

17 p2966 A69-33983

Solar flares with subcosmic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration
17 p3025 A69-34226

Cosmic ray diurnal anisotropy variations, correlating component annual means with magnetic activity
18 p3186 A69-34934

Surges statistical properties observed in Sweden /1957-1967/ noting latitude distribution pattern, radio emission association, rate dependence on solar cycle, etc
18 p3204 A69-35393

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity
20 p3587 A69-37036

Ion production rates vertical distribution and temporal changes at midlatitudes during solar activity minimum and maximum above F 2 layer
20 p3525 A69-37656

Altitude variations at and near maximum electron concentration in quiet F 2 layer during solar activity maximum from sounding at southern geomagnetic pole
20 p3526 A69-37662

Solar activity effect on F 2 layer geometrical parameters, plotting prognostic maps using nomographic methods
20 p3526 A69-37663

Seasonal anomaly of F 2 layer critical frequency in Northern and Southern Hemispheres during high and low solar activity, discussing geomagnetic effect
20 p3526 A69-37667

Latitudinal variations in conditions for F 1 layer occurrence probability and stability during solar activity minimum period
20 p3527 A69-37669

Diurnal F 1 layer development over Irkutsk, Siberia, during minimum and maximum solar activity, using semiquantitative method
20 p3527 A69-37670

F zero layer occurrence relation to solar, magnetic and ionospheric activity levels variations from Ashkhabad observations /1958- 1964/
20 p3527 A69-37671

Time-space variations in occurrence probability of ionospheric E-2 layer during solar activity maximum and minimum
20 p3527 A69-37672

Sporadic E layer structure and behavior during solar cycle from vertical sounding, discussing semioaque region, reflection multiplicity, active height, wind effects, etc
20 p3528 A69-37681

Solar activity effect on short term meteorological processes and dynamic state of mesosphere and ionosphere, emphasizing relationship to entire atmosphere dynamics
20 p3590 A69-37684

High latitude stations vertical ionograms in absence of ionospheric reflections due to low solar activity periods, discussing interpretation methods
20 p3529 A69-37690

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature
20 p3591 A69-37970

Sudden frequency deviations of HF radio waves propagated through ionosphere correlated with solar microwave bursts and optical flare events
20 p3592 A69-38101

Photodissociation of diatomic hydrogen by solar radiation for Venus atmosphere investigation, considering H atoms production rate by Stecher-Williams process
20 p3609 A69-38102

Lower ionosphere over geomagnetic equator during evening twilight characterized by solar disturbances, using rocket-borne Langmuir and plasma noise probes
21 p3702 A69-38353

Twilight airglow excitations governed by solar radiation, indicating presence of alkali metals, positive calcium ions and H lines, positive sodium ion bands, etc
21 p3711 A69-38515

Primary cosmic rays solar diurnal modulation, measuring relative amplitudes and phases over full cycle
21 p3788 A69-38547

Daytime electron and ion composition model for height range from 150 to 1500 km at moderate latitudes and minimum solar activity
21 p3714 A69-38555

Ariel 3 satellite observations, including topside ionospheric variations with time and solar activity, electron density, temperature measurements, etc
21 p3716 A69-39257

Soviet book on synoptic climatological and heliogeophysical long term weather forecasts, discussing monthly and seasonal anomalies, sun-earth interrelations, solar corpuscular elements, etc
21 p3759 A69-39523

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
21 p3814 A69-39584

Explorer 30 /Solrad 8/ satellite observation of 0.5-3 A solar X ray emission related to magnetic configuration in sunspot group
22 p4003 A69-40298

Geomagnetic disturbances and cosmic ray storm of 25-26 May 1967 caused by McMath plage region 8818, noting Forbush decreases and ring current effect
22 p4004 A69-40307

Sun and moon effects on earth satellite orbit
22 p4030 A69-40901

Midlatitude ionospheric electron density rocket data survey, including nighttime and daytime N/h/ profiles for specific solar activities
23 p4155 A69-41563

Sudden and gradually developing geomagnetic storms with 27 day recurrence period and relation to 11 year solar activity cycle
23 p4156 A69-41849

Apollo 11 observations of lunar surface glazing, considering radiation heating due to solar outbursts, rocket exhaust effects, shock heating or volcanism, erosion, etc
23 p4216 A69-42202

Solar quiet and lunar electric current systems deduced from geomagnetic data, discussing electrical conductivities and wind models in dynamo region
23 p4160 A69-42427

Equatorial anomaly during declining solar activity, treating seasonal and daily variations, longitude dependence and geomagnetic storm-time distortions
23 p4161 A69-42436

Cosmic ray electron energy spectrum and intensity measurements indicating time variations attributed to solar modulation effects
24 p4367 A69-43175

Solar flares associated optical phenomena including filaments enhancement, destabilization and distortion, high speed ejections, explosions and loop prominences
24 p4371 A69-43607

Solar X-ray spectrum as function of sunspot group type based on Solrad satellites flux data, discussing relationship to lower ionosphere characteristics variations
24 p4372 A69-43615

Solar energetic particle effects during polar cap absorption observed in earth upper atmosphere and at ground level
24 p4373 A69-43618

Solar wind disturbances associated with flares
24 p4373 A69-43620

SOLAR ATMOSPHERE

Solar flare mechanism from analysis of energy transfer in quiet solar atmosphere, discussing convection, radiation, mechanical and MHD waves and thermal conduction
01 p0145 A69-10990

Goldberg-Unno method for determining Doppler width, microturbulence velocity and convection errors, considering photosphere as hot ascending and cold descending columns
02 p0328 A69-12752

Solar atmosphere from two dimensional study of solar spectrum, discussing satellite observations of corona and upper chromosphere
02 p0329 A69-12785

Solar atmosphere physical properties tabulated to interpret radio bursts and noise storms
02 p0329 A69-12786

Solar chromosphere dark mottles size, shape and evolution, using high resolution photography near solar disk center
03 p0515 A69-14038

Chromosphere fine structure in Lyman alpha intensity, compiling isophote map
03 p0515 A69-14039

Energy release by Joule magnetic field dissipation in solar atmosphere
03 p0516 A69-14041

Be I and Be II lines in solar spectra show no evidence for Be 7 and Be 10 in solar atmosphere
04 p0655 A69-14666

Local hydromagnetic mechanism to increase magnetic fields and shape into bipolar sunspot group configuration, discussing applicability to solar atmosphere
04 p0662 A69-15243

Lithium abundance in sunspots and undisturbed solar atmosphere from measurements of solar atmosphere and spot spectra
05 p0821 A69-15850

Micro and macroturbulent motions velocity in solar photosphere based on Fraunhofer lines analysis
05 p0823 A69-16014

Model for Evershed effect postulating unipolar symmetrical sunspot surrounded by magnetic knots of opposite polarity
06 p0999 A69-16977

SH above photosphere in solar atmosphere, discussing dissociation equilibrium of diatomic molecules and possible abundances
06 p1002 A69-17317

Chromospheric /optical/ flares caused by dense material falling from corona into chromosphere
06 p0993 A69-17430

Small scale mass motions in chromospheric structures surrounding solar flare indicating changes in magnetic field
06 p0993 A69-17431

Flare-like phenomena in chromosphere, discussing moustaches, dashes and spicules and relation to changes in magnetic field
06 p0994 A69-17433

Solar flares acceleration processes related to solar atmospheric currents
06 p0995 A69-17442

Model to account for flare and sunspot phenomena, discussing uni- and bipolar spots
06 p0995 A69-17443

Beryllium abundance in solar atmosphere from spectra observed at Oslo Solar Observatory
06 p1010 A69-17971

Solar supergranules and hydrogen convection zone analysis based on polytropic atmosphere convection physics
07 p1211 A69-18408

Solar photosphere model with two stream columnar representation of granulation for predicting continuous radiation field
07 p1217 A69-19238

Solar spectral line profiles for photosphere disturbed by short period acoustic waves
07 p1217 A69-19239

Chromospheric velocity field temporal characteristics in quiet region of sun, determining power spectra of Doppler shifts of H alpha spectra
07 p1217 A69-19240

Quiescent solar prominences horizontal oscillations, explaining periods, damping times and prominence shape changes by model of freely oscillating prominence in corona
07 p1205 A69-19245

Solar flare initial development model assuming high temperature chromospheric point explosion, noting subsequent expansion and large density gradient effects
07 p1205 A69-19246

Solar atmosphere model calculations of solar oblateness, discussing flux difference and Dicke experiment on general relativity
08 p1383 A69-19899

Chemical composition and element abundance in solar atmosphere and photosphere, noting solar absorption and emission and energy spectrum data
08 p1402 A69-20905

Viscosity coefficients approximation for chemical compositions in chromosphere and coronal gas
09 p1602 A69-22217

Growth rates for convective disturbances propagation in atmosphere with linear entropy variation, noting WKB approximation
11 p1957 A69-24422

Book on stellar atmospheres covering radiation theories, thermal equilibrium, measurement techniques, spectral analysis, etc, emphasizing sun
11 p1961 A69-25084

Ionization equilibrium for ions of solar abundant elements between C and Ni calculated as function of electron temperature
11 p1928 A69-25262

Solar chromosphere and corona heat intensity above 1000 km attributed to tongues of turbulence, considering convective zone exciting MHD waves mechanism
13 p2337 A69-27549

Solar atmosphere five minute oscillations observed by Frazer divided into two harmonic atmospheric model for studying oscillation region height and mean temperature
13 p2343 A69-27627

Solar 3 cm flux density sensitivity to physical conditions in solar atmosphere related to maximum ex-

- p>
istence in flux density spectrum F gamma in active regions
-
- 13 p2327 A69-27721
-
- Solar atmosphere surface radiation intensity determined by initial value theory including source function and resolvent
-
- 13 p2350 A69-27859
-
- Tentative solar photospheric model meeting Noyes and Withbroe criticism
-
- 14 p2518 A69-29131
-

Li variation effects on solar cell properties indicating cell performance control by amount introduced near p-n junction

19 p3252 A69-35695

Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation

19 p3252 A69-35697

Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons

19 p3252 A69-35698

Thin silicon solar cells environmental tests, evaluating temperature and humidity effects on various contacts and coatings

19 p3252 A69-35699

Attitude control rocket exhaust plume impingement effect on electrical performance and mechanical damage of commercial silica covered silicon solar cells

19 p3252 A69-35700

Proton irradiation effects on current degradation at fixed voltages of silicon solar cells with coverslips

19 p3252 A69-35701

Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage

19 p3253 A69-35702

Solar cell integral covers optical losses in vacuum as function of degradation by UV exposure, noting accelerated testing for time-cost reduction

19 p3253 A69-35703

Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields

19 p3253 A69-35704

Cadmium sulfide solar cells and Kapton coverslips under proton irradiation, noting annealing of damage in samples exposed to air

19 p3253 A69-35705

Energy dissipation of solder-covered and solderless solar cells with TiAg contacts as function of storage time, temperature and humidity

19 p3253 A69-35706

560 W deployable solar array consisting of very thin Si solar cells mounted on polyimide film, initiating deployment by duplicated pyrotechnic actuators

19 p3253 A69-35707

Large area Si solar cell arrays design, considering environment, cell layout, thermal expansion, coverslips fabrication, costs, etc

19 p3253 A69-35708

Shadow effects on current-voltage characteristics of solar cell array circuits, developing mathematical models

19 p3254 A69-35709

Integrated thin film solar cell array consisting of CdS cells deposited on Kapton single sheets connected in series and covered by Mylar single sheet

19 p3254 A69-35710

Solar cell retractable array for spacecraft multikilowatt power generation

19 p3254 A69-35711

Solar cells volt-ampere characteristics calibrated at various solar incidence angles on LES-6 satellite in synchronous orbit

19 p3254 A69-35712

Solar cell degradation experiments on LES 4 and 5 satellites, discussing decay values and times for Si and CdTe cells with different cover thicknesses

19 p3254 A69-35713

Secondary power sources for space applications in solar arrays, static and dynamic thermal systems, high power batteries and fuel cells, discussing NASA machinery procurement

19 p3255 A69-36323

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1]

19 p3255 A69-36418

Aluminum doped silicon solar cell energy loss coefficient under proton and high energy electron irradiation

20 p3465 A69-37911

Optimization of RF ion thruster cluster engines for ascending trajectory, discussing unfolding mechanism of solar cell panels

23 p4203 A69-41933

Solar cell power systems for manned space stations, summarizing studies of battery power system designs

23 p4068 A69-42242

Fuel cell /battery and solar array/battery systems for manned Apollo Applications Program /AAP/ space vehicles, considering mission and power requirements

23 p4069 A69-42244

Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc

23 p4070 A69-42271

Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering

23 p4070 A69-42272

Hot spot failure modes in solar cell arrays noting protection through I-V characteristic control

23 p4142 A69-42273

Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling

23 p4070 A69-42274

Apollo Telescope Mount /ATM/ solar cell module electrical performance testing using sunlight simulation

23 p4072 A69-42286

Solar cells arrays degradation in Intelsat spacecraft at synchronous altitude, noting shielding gaps and low energy proton influence

23 p4072 A69-42287

Solar array configurations and performance on Martian surface, including hard lander design and surviving shock levels

23 p4073 A69-42289

Spacecraft Si cell solar array using self rigidizing folded panels with flexible substrates for increased power/weight and power/stowage volume ratios

23 p4073 A69-42290

Lightweight large area solar cell arrays for space programs with multikilowatt predicted performance, noting rollout array orbital flight testing

23 p4073 A69-42291

Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor

23 p4075 A69-42303

Asteroid exploration by solar photovoltaic powered ion propelled probe, discussing spacecraft design, mission and 1975 Mariner utilization [AAS PAPER 69-322]

24 p4381 A69-42868

Solar protons and alpha particles measurements at synchronous orbit altitudes providing data for solar cell shield design to prevent radiation damage

24 p4369 A69-43265

SOLAR CHROMOSPHERE U CHROMOSPHERE

SOLAR COLLECTORS

Computation and optimization of energy distribution over randomly oriented elements of radiation receiving surface of hollow collector of concentrator type solar device

09 p1442 A69-22534

Solar simulator with 20 kw xenon lamps, discussing performance, versatility and problems with collectors, folding mirrors and cooling system

15 p2586 A69-30384

Solar power concentrator-absorber system, discussing flux distribution in focal plane and cavity heater optimization

17 p3022 A69-33795

SOLAR COMPASSES

U BEACONS
U GYROCOMPASSES
U MAGNETIC COMPASSES
U RADAR BEACONS
U RADIO BEACONS

SOLAR CONSTANT

Clear atmosphere model based on path of sight equilibrium radiance and nonabsorption permitting integration of equation of transfer

07 p1130 A69-19643

Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere

09 p1575 A69-21645

Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range

09 p1576 A69-21646

Solar constant measurement, reviewing instruments and results of Eppley-JPL program using high altitude jet aircraft and rocket research vehicle

09 p1576 A69-21647

Solar constant and spectral irradiance curve for zero air mass obtained from aircraft measurements

23 p4216 A69-42191

SOLAR CORONA

Geomagnetic disturbance activity forecasting method using solar coronal streams, noting reliability of test forecasts

01 p0150 A69-10372

Solar corona electron density, polarization, temperature and monochromatic emission during November 1966 eclipse

02 p0310 A69-11457

Space observations of solar intermediate corona, discussing balloon and rocket experiments and limitation of ground based observations [AAS PAPER 68-217]

02 p0313 A69-11483

Solar coronal ion abundance analyses from extreme UV emission lines

02 p0327 A69-12719

Solar corona delay effects on pulsar signals due to inhomogeneities in coronal electron density

02 p0328 A69-12727

Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation

03 p0505 A69-13082

Mean annual intensity distribution of 5303 angstrom coronal line on solar limb determined for 11-year solar activity cycle

03 p0506 A69-13084

Optical narrow bandpass filter designed for precision solar corona observations, utilizing interferential polarization and thermooptical compensation

03 p0506 A69-13085

Temperature dependence of O VIII Lyman alpha/Lyman beta radiation ratio in solar corona, noting coronal temperature

03 p0516 A69-14042

Solar wind abundance measurements at earth orbit related to solar corona

03 p0503 A69-14047

Collisional ionization cross section for Fe ions evaluated to estimate solar corona temperature

04 p0651 A69-14365

Inner corona Fraunhofer lines invisibility at solar eclipses, emphasizing uncertainty of photospheric absorption lines appearance as electron scattering

04 p0654 A69-14628

Gyro synchrotron emission spectrum and intensity from energetic solar electrons radiating in coronal magnetic fields applied to type IV solar radio bursts

04 p0650 A69-15529

Coronal X ray emission near limbs in 16-40 A during solar eclipse

04 p0650 A69-15531

Coronal structure predicted for September 22, 1968 solar eclipse by model constructed for large structure of coronal and interplanetary magnetic fields

05 p0818 A69-15602

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature

05 p0824 A69-16060

Type 2 radio bursts and corona magnetic field over active center

06 p0985 A69-16979

Solar corona effects on tail of comet Ikeya-Seki, describing model for interaction between tail and corona

06 p1000 A69-16982

Solar wind, discussing corona, radio sources, radio bursts, comet tails, cosmic rays, etc

06 p1012 A69-18239

Solar wind and magnetosphere, discussing hydrodynamic expansion of solar corona

07 p1207 A69-19353

Solar corona X ray emission during flares and under quiet sun conditions investigated by satellite with X ray heliograph

07 p1210 A69-19614

Hartree-Fock calculations of coronal forbidden transition lines in Ar I isoelectronic sequence, obtaining wavelengths, magnetic dipole and electric quadrupole transition probabilities

08 p1385 A69-20071

Excitation cross sections of Fe XIV lines in solar coronal spectra, comparing computations with Coulomb-Born approximation

08 p1392 A69-20563

Dimensions, temperature and electron density of quiet solar corona from radio interferometer measurements, noting activity and temperature at solar maximum and minimum

08 p1393 A69-20573

Spectrum variations of type 4 radio burst as source rises through solar corona, determining electron density and magnetic field distributions in corona

08 p1380 A69-20775

Formation ratios of light isotopes in spallation reactions compared to observed stellar and solar abundances of lithium, beryllium and boron, discussing astrophysical implications

08 p1401 A69-20902

Present state of abundance determination in solar corona, discussing forbidden and UV lines analysis
08 p1402 A69-20907

Type 3 solar radio noise bursts at hectometer wavelengths, deducing coronal electron temperatures from decay rates
09 p1594 A69-21665

Quantum mechanical description of ionizing reactions of highly charged positive ions in solar corona, obtaining approximate sum and selection rules
09 p1596 A69-22054

Solar moving type 4 burst emitting synchrotron radiation, noting electron acceleration in collisionless shock wave in corona
09 p1578 A69-22058

Coronal open helmet streamer configurations, noting minimum temperature requirement for constriction to true geometrical throat
09 p1598 A69-22177

Green and red coronal line polarization observed during solar eclipses, discussing nonpolarization of red line and observation instrument error
09 p1600 A69-22204

Outer solar coronal IR radiance measured by ground telescope and stratosphere balloon flight, noting interplanetary dust thermal emission
09 p1600 A69-22205

Viscosity coefficients approximation for chemical compositions in chromosphere and coronal gas
09 p1602 A69-22217

Solar outburst and storm accompanying 9 June 1968 flare, noting radio evidence for coronal instability before flare
09 p1582 A69-22747

Radio ray scattering resulting from traversing anisotropically turbulent solar corona, noting refraction effect on signal pulse arrival time
10 p1773 A69-22960

Total solar eclipse of September 22, 1968 in Siberia, discussing instrumentation and solar light radiation, corona, prominences, spicules, etc
10 p1782 A69-23696

Simultaneous photometric observations of coronal emission lines during July 1966 solar proton flare plotted on synoptic charts
10 p1763 A69-23731

Coronal line intensity distribution for period of proton flare
10 p1763 A69-23732

K coronameter observations used to construct electron density models of corona above proton flare region of July 1966
10 p1763 A69-23733

Coronal IR observations during solar eclipse revealing thermal emission zone at predicted interplanetary dust vaporization region
10 p1789 A69-24131

Type 2 radio burst dynamic spectra determination for finding shock wave and magnetic field parameters above active corona region
11 p1945 A69-24243

Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
11 p1958 A69-24429

Monograph on internal structure of sun corona covering variations in intensity and width of coronal lines, inhomogeneity, quasi-homogeneous and anisothermic coronas, etc
11 p1961 A69-25103

Magnetic fields, green corona emission and filaments relationship at high solar latitudes using synoptic charts
11 p1964 A69-25416

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase
11 p1964 A69-25417

Solar activity complex development based on magnetic, photospheric, chromospheric and coronal observations
11 p1964 A69-25418

Forbidden solar corona lines transition probability in vacuum UV region
12 p2157 A69-26334

Solar polar faculae observations, discussing relation to general solar magnetic field and coronal properties, solar high latitude rotation and susceptibility to atmospheric conditions
12 p2160 A69-26897

Solar corona 5303 and 6374 A emission enhancements correlated to 169 MHz S-component, discussing coronal temperature
13 p2347 A69-27717

Coronal features prediction compared to maximum solar activity observations, discussing variations in force free field
13 p2354 A69-28472

Radar observations of sun, determining reflected radio signal component formed by combination scattering in coronal plasma oscillation
14 p2515 A69-28764

Mean annual intensity distribution of 5303 A coronal line on solar limb determined for 11-year solar activity cycle
14 p2515 A69-28766

Optical narrow bandpass filter designed for precision solar corona observations utilizing interferential polarization and thermo-optical compensation
14 p2515 A69-28767

Forbidden transition probabilities of solar corona lines in vacuum UV range
14 p2519 A69-29355

Solar corona magnetic field and polar rays, emphasizing field topology and local magnetic structure
14 p2525 A69-29718

Solar wind origins, discussing corona composition, corpuscular streams, R and M disturbances, etc
15 p2673 A69-30009

Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
15 p2679 A69-30010

Hydromagnetic fast shock strength and direction in inhomogeneous gravitational atmosphere with uniform magnetic field, discussing heating in solar corona
15 p2680 A69-30202

Surveyor lunar landing procedures and results including instrumentation, lunar topography, selenology, chemical and physical properties, solar corona and earth laser output observations
15 p2681 A69-30324

Solar corpuscular radiation characterization by stable four streamer structure at near minimum solar activity
15 p2674 A69-30517

Type 3 radio bursts time profile for estimating magnetic field strength in solar corona
15 p2675 A69-30554

Plane electromagnetic wave refraction and scattering in solar corona during eclipsed observations of cosmic sources, calculating angular distribution of radiation intensity
15 p2688 A69-30555

Unsuccessful attempt to observe high charge ion lines generated by dielectronic recombination in solar corona at 5-cm wavelength
15 p2689 A69-30568

Coronal structure during 22 September 1968 eclipse from photographs, showing agreement with prediction by model
15 p2690 A69-30696

Coronal limb enhancement photometric study by spectroheliograms, comparing maximum brightness profiles in lines of different temperature in extreme UV
15 p2693 A69-30781

Temperature and density models for coronal green line enhancements with and without magnetic field effects, using graded height spectrograms
15 p2693 A69-30782

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Solar wind and solar breeze theories distinguished, discussing applications to geocoronal hydrogen emission and solar corona expansion
15 p2676 A69-30858

Solar corona observations on eclipse day by Aerobee rocket launched in New Mexico correlated to Siberian total eclipse photograph
15 p2696 A69-31099

Solar corona observed by X ray instrumentation of SOLRAD 8 satellite crossing moon penumbra during solar eclipse of 20 May 1966
15 p2698 A69-31363

Pioneer 6 S band telemetry carrier Faraday rotation during corona occultation measured by deep space tracking antenna
15 p2700 A69-31419

Coronal Fe ionization lines X, XIII and XIV photographed by UV coronagraph
16 p2847 A69-31661

Geomagnetic storms generation interpreted using solar coronal arrangements above central meridian
16 p2777 A69-32100

Nondivergent oscillations in solar atmosphere forming normal modes or free oscillations, assuming free surface of chromosphere coronal interface and large density in convective zone
17 p3029 A69-33048

Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations
17 p3030 A69-33059

Solar corona heating ascribed to Landau damping of ionacoustic waves generated in motion of photospheric granules
17 p3030 A69-33060

Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines
17 p3040 A69-33801

Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines
17 p3025 A69-34224

Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
18 p3186 A69-34301

Radio echoes relationship to active parts of solar corona, noting agreement with data on type 3 radio bursts source location
18 p3201 A69-35207

White light solar corona brightness distribution observations /1964-1967/, considering solar radio flux relationship and equatorial electron densities
18 p3205 A69-35394

Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
19 p3406 A69-36074

Forbidden lines in solar corona, discussing ionization equilibrium and excitation of levels in highly ionized atoms
19 p3422 A69-36216

Emission line spectrum for ionization and excitation in solar coronal structures, tabulating intensities from ground based eclipses observations
19 p3422 A69-36217

Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
19 p3396 A69-36218

Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
19 p3422 A69-36219

H alpha filtergrams and spectra of solar corona arch filament systems indicating downward and upward motions produced by magnetic field
20 p3588 A69-37543

Stability analysis of Kippenhahn-Schluter model of solar corona filaments against arbitrary perturbations treated in MHD approximation using Bernstein energy principle
20 p3588 A69-37544

Monochromatic coronal emission line photographs improved by composite technique
20 p3539 A69-37547

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities
20 p3589 A69-37557

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature
20 p3591 A69-37970

Solar magnetic field measurements for fine structure of magnetic asymmetry at different heights and within sunspots, discussing asymmetry for corona and interplanetary space
22 p4010 A69-39990

Solar corona photographic study during 1961 total eclipse using quadruple camera, providing intensities, amount and direction of polarization
22 p4001 A69-40001

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona
22 p4002 A69-40002

Medium sized solar radio events from peak intensities, spectrum characteristics and coronal magnetic field role
22 p4020 A69-40299

Type 3 solar radio bursts observed during April-October 1967 for two alternative models of active region streamers in outer corona
22 p4003 A69-40300

SOLAR CORPUSCULAR RADIATION

Coronal jet resulting from chromospheric burst observed during 22 September 1968 total solar eclipse
22 p4028 A69-40716

Thermal continuum radiation from coronal plasmas at soft X ray wavelengths, investigating variations effect in element abundances
23 p4207 A69-42406

Solar corona instabilities and shock waves indicated by type 3 and 2 bursts, considering electrons ejection
24 p4378 A69-42689

SOLAR CORPUSCULAR RADIATION

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body
03 p0374 A69-13500

Solar particle events of May 23 and 28 1967, noting related solar and terrestrial phenomena
03 p0516 A69-14046

Solar neutron production and propagation to earth, discussing particle detectors
06 p0989 A69-17281

Long lived streams of low energy solar electrons and protons and association with bright flares or solar active regions
07 p1206 A69-19249

Null solar neutrino flux possible relation to 2 year solar cycle, discussing energetic disturbances at solar core and sunspots
08 p1377 A69-19902

Coronal open helmet streamer configurations, noting minimum temperature requirement for constriction to true geometrical throat
09 p1598 A69-22177

Ionization in lower ionosphere over polar cap under solar corpuscular fluxes measured by radio wave absorption
10 p1759 A69-22838

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
10 p1769 A69-23904

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters
10 p1687 A69-23919

Solar neutron flux measurement at earth in energy region 20-120 Mev by detector in balloon flight
11 p1945 A69-24421

Solar wind particles acceleration and transformation into radiation belt particles
11 p1948 A69-24855

Solar wind origins, discussing corona composition, corpuscular streams, R and M disturbances, etc
15 p2673 A69-30009

Solar corpuscular radiation component from satellite and interplanetary space probe geophysical data, discussing interplanetary magnetic field geometry and corpuscular fluxes
15 p2684 A69-30516

Solar corpuscular radiation characterization by stable four streamer structure at near minimum solar activity
15 p2674 A69-30517

Solar corpuscular and UV radiation variation relationship to midlatitude airglow intensity in O I line
16 p2850 A69-32322

Magnetic storm energy balance, assessing solar corpuscular flux energy consumption in and beyond magnetosphere
17 p2964 A69-33959

F region during earth passage through solar corpuscular stream, analyzing critical frequencies, virtual height, magnetogram H component and ionospheric storm effects attributed to downward drift
17 p2967 A69-33989

Geomagnetic storms and Forbush decreases accounted for by interplanetary solar corpuscular streams effects described by interplanetary magnetic field structure, noting independence of flares
18 p3187 A69-34937

Stream structure in interplanetary magnetic field during 1966, analyzing geomagnetic activity and solar particles and Forbush decrease anisotropy
18 p3199 A69-34938

Cosmic ray approach directions computation for high latitude stations, discussing results for low rigidity galactic cosmic rays and solar corpuscular events detection
18 p3187 A69-34940

Solar neutrons upper limits measured for 28 July 1967 importance I flares
18 p3187 A69-34959

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity
20 p3587 A69-37036

Lepton nonconservation implications for experiments involving solar neutrinos, showing effect on capture rate at earth for pep neutrinos
23 p4194 A69-41596

Solar flare-associated radio bursts, reviewing solar radio measurements based on X ray and particle observations
24 p4372 A69-43614

Solar energetic particle effects during polar cap absorption observed in earth upper atmosphere and at ground level
24 p4373 A69-43618

SOLAR COSMIC RAYS

Solar cosmic rays diffusion relationship to interplanetary magnetic field power spectrum from high energy proton and electron observations
01 p0147 A69-11243

Sudden ionospheric disturbance development and characteristics of solar cosmic ray flares, associated X ray emissions and high energy particle generation
02 p0308 A69-12398

Spatial variations in particle intensity near and inside magnetosphere during September 1966 solar cosmic ray events, noting magnetosphere screening effectiveness
02 p0309 A69-12740

Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun to earth
03 p0498 A69-12934

Biological effects in man due to heavy particles emission during major solar cosmic ray events, noting protective effect of human body
03 p0374 A69-13500

Solar proton flares injecting cosmic ray bursts into solar system, discussing optical, radioastronomical and satellite observations
04 p0649 A69-15327

Isotopic composition in near-surface regions of meteorites due to nuclear processes with low energy solar particles
06 p0989 A69-17282

Solar cosmic rays anisotropies including solar flare particles propagation
06 p0990 A69-17288

Electron formation in lower ionosphere due to cosmic ray-atmosphere interaction, analyzing ionization of subrelativistic and relativistic solar and galactic cosmic rays
06 p0920 A69-17726

Solar cosmic ray dose rate and total dose magnitude predictions based on Epeak and isotropic diffusion models
06 p0997 A69-18160

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing
07 p1135 A69-19197

Sunspot groups area changes relationship to cosmic ray flare occurrences
07 p1206 A69-19252

Soviet monograph on diurnal solar cosmic ray variations from maximum to minimum solar activity, discussing model based on anisotropic particle scattering theory
07 p1209 A69-19500

Diffusion model for propagation of solar cosmic rays in interplanetary space, obtaining injection spectra for solar flare protons
08 p1379 A69-20613

Low energy solar cosmic ray proton flux characteristics observed by Injun 1 satellite after July 1961 sudden commencement magnetic storm
09 p1576 A69-21707

Peaks and time intensity profile of energetic X rays and cosmic rays observed by OGO-C ion chamber on May 23, 1967 flare event
09 p1579 A69-22182

Solar cosmic rays proton intensity time variations and diffusion coefficient obtained by satellites, balloons and ground stations observations
10 p1755 A69-22812

Radioactivity levels estimation at surface and in bulk of solar system planets caused by galactic and solar cosmic rays
10 p1756 A69-22813

Diffusion coefficient and cosmic ray motion in solar system, using satellite data of interplanetary magnetic field
10 p1757 A69-22822

Galactic and solar cosmic ray modulation in interplanetary space during different phases of 11 year solar activity cycle
10 p1758 A69-22833

Forbush effects energy spectra and cosmic ray anisotropy beyond magnetosphere analyzed during solar activity minimum, using data from neutron monitors global network
10 p1758 A69-22835

Solar diurnal variation amplitude and phase instability, considering anisotropic cosmic ray fluxes superposition
10 p1759 A69-22837

Proton flares of July 7, 1966, September 2, 1966 and January 28, 1967, noting energy spectra and time dependence of proton flux
10 p1767 A69-23764

Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation
10 p1683 A69-23770

Solar cosmic ray event of July 7 1966, noting sudden cosmic noise absorption reduction and particle absorption domination start at 0120 UT
10 p1768 A69-23771

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
10 p1769 A69-23904

Galactic and relativistic and subrelativistic solar cosmic rays effect on electron production rate in ionosphere, detailing low energy SCR-atmosphere interactions
13 p2333 A69-28544

Solar cosmic ray flare of 28 January 1967 observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary
14 p2513 A69-29066

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component
14 p2513 A69-29067

Soviet book on solar cosmic rays covering origin, propagation, energy spectrum, diffusion dependence on particle energy and distance, solar flares, etc
14 p2514 A69-29816

Electron production rate in low ionosphere, discussing parameters of ionizing solar cosmic rays and earth environment
17 p3022 A69-33035

Solar flares with subcosmic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration
17 p3025 A69-34226

Solar cosmic ray anisotropies in terms of model with particles propagating along interplanetary magnetic field undergoing pitch-angle scattering
18 p3189 A69-35400

Solar system low energy particle flux at 2-3 AU distance during last 10 million years, discussing cosmic radiation flux
19 p3411 A69-36097

Cosmic rays nucleonic component latitude at solar minimum activity, using IGY neutron monitor
19 p3396 A69-36411

Chemical composition of galactic and solar cosmic rays, discussing differences from universal cosmic abundances, using Cerenkov counters, emulsions, etc
22 p4002 A69-40090

Diurnal variations in solar cosmic ray muon component near sea level, using scintillation counters assembled in muon telescope array
23 p4207 A69-42498

Solar cosmic ray anisotropy measurement by Explorer 34 satellite during solar flare events
24 p4373 A69-43619

Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
24 p4373 A69-43621

SOLAR CYCLES

NT SUNSPOT CYCLE

Chromospheric flares photometric measurements during near minimum solar activity, discussing characteristics
01 p0149 A69-10127

Cosmos satellites monitoring electrons distribution in inner radiation belt suggest intensity stability for solar activity cycle
01 p0147 A69-11309

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency

02 p0207 A69-11684

Mean annual intensity distribution of 5303 angstrom coronal line on solar limb determined for 11-year solar activity cycle

03 p0506 A69-13084

Diurnal, magnetic and solar cycle dependences of auroral emission variations and auroral occurrence

03 p0420 A69-13325

F layer disturbance showing pronounced difference in corpuscular flux effect on day and nighttime ionosphere

03 p0512 A69-13517

Solar flux variations in 44-60 A band during ascent of current solar cycle /Number 20/ measured by Solrad 8 satellite

04 p0650 A69-15530

Solar modulating function form changes resulting in hysteresis near solar minimum

05 p0815 A69-16249

Sunspot group classifications made at Zurich and Catania during 19th solar cycle compared to determine seeing influence

05 p0826 A69-16388

Solar cycle influence on winds in lower ionosphere

05 p0759 A69-16421

Semiannual variations in exospheric density near 1100 km derived from Echo 2 orbit, noting phases during solar cycle

06 p0918 A69-17385

Central Fraunhofer line intensities near solar minimum compared to Soviet results for possible solar cycle variation

08 p1386 A69-20075

Sunspot activity dependence on phase of eleven year cycle and heliographic latitude, discussing fine structure of butterfly diagrams

08 p1379 A69-20611

Eleven year cyclicity of geomagnetic activity from Sverdlovsk Observatory data, noting possible relation with structural features of solar activity cycles

09 p1486 A69-21552

Solar activity influence on cosmic ray intensity 11 year variation, taking into account heliolatitudinal movement of sunspot regions in solar cycle as evidence of density gradient

10 p1754 A69-22802

Numerical decile value maps of sporadic E layer ionization critical frequency for each month of solar cycle minimum and maximum year

10 p1682 A69-23418

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters

10 p1687 A69-23919

Solar and lunar/solar harmonics determination, noting effects of moon on values of horizontal magnetic component

11 p1965 A69-25555

Linear extrapolation of stationary stochastic process predicting fluctuations of minimum and maximum periods in solar cycle

12 p2149 A69-26221

Cosmic rays during 11-year solar cycle, short term variations and radial gradient based on Luna, Zond and Venera probes and Cosmos observations

13 p2326 A69-27351

Solar cycle kinematical model based on field amplification by solar differential rotation including fluctuations in eruption rate

13 p2337 A69-27548

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency

13 p2224 A69-28715

Mean annual intensity distribution of 5303 A coronal line on solar limb determined for 11-year solar activity cycle

14 p2515 A69-28766

Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory

14 p2515 A69-29967

Solar activity history and morphology /1964-1965/

15 p2679 A69-30006

Cosmic ray variation theory, presenting data on coupling of solar activity with large scale characteristics of solar wind during 11-year cycle

15 p2673 A69-30015

Solar cycle effect on high latitude magnetic activity, discussing annual variations and Lassen auroral zone model confirmation

15 p2598 A69-31207

Latitude variations of delays between spread F and magnetic activity shown to be different at various parts of solar cycle

16 p2779 A69-32194

Trieste astronomical observatory optical and radio solar photosphere observations in 1967, including solar cycle and north-south symmetry

16 p2858 A69-32206

Eleven year cyclicity of geomagnetic activity from Sverdlovsk Observatory data, noting possible relation with structural features of solar activity cycles

16 p2784 A69-32547

Lunar tidal oscillations in F 2 layer critical frequency and F region minimum virtual height at Huancayo during IGY/IGC to study solar cycle effects

16 p2784 A69-32613

Surges statistical properties observed in Sweden /1957-1967/ noting latitude distribution pattern, radio emission association, rate dependence on solar cycle, etc

18 p3204 A69-35393

Solar cycle line in horizontal force of earth magnetic field resolved by power spectrum analysis suggesting 80 year cycle

18 p3205 A69-35414

Solar cycle variation of extreme UV radiation from total solar disk under nonflare conditions by photoelectric measurements

20 p3592 A69-38103

Critical frequency variations of F 2 layer and M/3000/F 2 with sunspot number for 19th solar cycle, noting dependence on geomagnetic latitude

21 p3715 A69-38560

Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements

22 p4004 A69-40504

Ionospheric vertical columnar electron content at midlatitudes near solar cycle minimum based on Faraday rotation data from Explorer 22

22 p3939 A69-40505

Babcock solar activity periodicity theory, correlating spots displacement and coronal magnetic field intensity changes

23 p4208 A69-41283

Sudden and gradually developing geomagnetic storms with 27 day recurrence period and relation to 11 year solar activity cycle

23 p4156 A69-41849

Geomagnetic activity hourly and daily variations during solar cycle at Huancayo

23 p4162 A69-42442

Diurnal and solar cycle variations of thermosphere density and temperature generated by solar EUV input and tidal wave, using two dimensional model

24 p4367 A69-43003

SOLAR DISK

U SUN

SOLAR ECLIPSES

Solar corona electron density, polarization, temperature and monochromatic emission during November 1966 eclipse

02 p0310 A69-11457

Solar eclipse effect on geomagnetic field at and near dip equator observed at Huancayo Observatory, Peru

02 p0241 A69-11727

Solar eclipse effects on ionospheric conductivity and geomagnetic field at and near dip equator observed at Huancayo, Peru

02 p0241 A69-11728

Sunrise effects in lower D region by solar eclipse, discussing anomaly in ionospheric absorption due to negative ion factor or recombination coefficient

02 p0246 A69-12767

Narrowing of ionospheric absorption anomaly in D region during solar eclipses in long and medium wave ranges due to recombination equation variability

02 p0246 A69-12770

Inner corona Fraunhofer lines invisibility at solar eclipses, emphasizing uncertainty of photospheric absorption lines appearance as electron scattering

04 p0654 A69-14628

Coronal X ray emission near limbs in 16-40 A during solar eclipse

04 p0650 A69-15531

Solar X ray source identification using D layer ionization behavior during eclipse

04 p0650 A69-15533

Coronal structure predicted for September 22, 1968 solar eclipse by model constructed for large structure of coronal and interplanetary magnetic fields

05 p0818 A69-15602

Stratospheric temperature, wind and ozone concentration measurement during solar eclipse by sounding rocket system

06 p0916 A69-17008

Lunar umbra interception by Titus rockets during solar eclipse, measuring UV and IR flux

06 p0986 A69-17101

Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation

07 p1204 A69-18823

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963

09 p1490 A69-21771

Solar occulting disk diameter at radio wavelengths derived from consideration of slightly deviated rays

09 p1607 A69-22432

Total solar eclipse of September 22, 1968 in Siberia, discussing instrumentation and solar light radiation, corona, prominences, spicules, etc

10 p1782 A69-23696

Lower ionosphere electron densities measured during solar eclipse by Nike-Apache rockets

12 p2073 A69-26861

Vertical drift velocity of ionospheric F region during eclipse and on control day based on chemical reaction coefficients models, discussing electron density distribution

12 p2077 A69-27109

Solar eclipses phases and elements calculation by Fortran language computer, using least squares method

13 p2336 A69-27447

E layer fine scale structure, F 1 reactions and F 2 reflected signals analysis during 20 May 1966 solar eclipse

13 p2255 A69-28541

Rocket sounding measurements of ionospheric D region electron density profile during 20 May 1966 solar eclipse, discussing D region ionization source

14 p2439 A69-29116

Collection of Soviet papers on annular solar eclipse of 20 May 1966

15 p2685 A69-30530

Geometric shape of lunar profile from annular phase of 20 May 1966 annular solar eclipse coronagraph plates, applying Fourier series and Pascal limaçon approximation

15 p2686 A69-30531

Lunar coordinate corrections from solar ring coronagraphic observations of 20 May 1966 annular solar eclipse

15 p2686 A69-30532

Error assessment for 20 May 1966 annular eclipse observation point and observation time determination

15 p2686 A69-30533

High speed plate holder and shutter mechanisms for observing 20 May 1966 annular solar eclipse

15 p2686 A69-30534

Coronal structure during 22 September 1968 eclipse from photographs, showing agreement with prediction by model

15 p2690 A69-30696

Solar corona observations on eclipse day by Aerobee rocket launched in New Mexico correlated to Siberian total eclipse photograph

15 p2696 A69-31099

Solar radiation actinometric and pyranometric observations during 20 May 1966 eclipse, examining IR component and spectral radiation energies

15 p2697 A69-31257

Solar corona observed by X ray instrumentation of SOLRAD 8 satellite crossing moon penumbra during solar eclipse of 20 May 1966

15 p2698 A69-31363

Equatorial electrojet north-south cross sections in Pacific observed by airborne equipment during magnetically quiet day, moderately disturbed day and solar eclipse

16 p2777 A69-32182

Chromospheric spectrum outside of eclipse, wave lengths 3040 to 9266 A, listing emission lines taken at McMath solar telescope

16 p2861 A69-32257

Radio observation of 20 May 1966 solar eclipse at 9470 and 3300 MHz, discussing brightness distribution of S component sources

17 p3030 A69-33057

Solar eclipse of 20 May 1966, comparing satellite-borne X ray and UV photometry with radio astronomical observations

17 p3023 A69-33058

Radio observations of 30 May 1965 total solar eclipse at Manue Island, discussing radio brightness

20 p3616 A69-38304

Radio emission data from 20 May 1966 partial solar eclipse, giving radio noise and brightness distribution data

22 p4010 A69-39986

Solar corona photographic study during 1961 total eclipse using quadrupole camera, providing intensities, amount and direction of polarization

22 p4001 A69-40001

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona

22 p4002 A69-40002

Identification, position and temperature of solar X ray sources derived from D layer ionization radio absorption behavior during eclipses and lunar reflection

22 p4004 A69-40308

Photoelectric spectrometer observations of 1966 total solar eclipse, discussing limb darkening curves for regions of continuum 1.5 Å wide around 5728 and 6404 Å

22 p4027 A69-40659

Coronal jet resulting from chromospheric burst observed during 22 September 1968 total solar eclipse

22 p4028 A69-40716

Ionospheric electron content satellite measurements during 20 May 1966 annular solar eclipse

22 p4007 A69-40916

Total solar eclipse of 5 February 1962 observed for spectrophotometry of flash spectrum, finding abnormal intensity gradients of H alpha and D3 lines

24 p4388 A69-43636

SOLAR ENERGY

Satellite power generation and transmission system for solar energy conversion, noting estimates of surface area and weight of collectors

02 p0323 A69-12296

Near mesopause atmospheric layer energy balance, noting atomic oxygen diffusion role in redistributing absorbed solar energy among atmospheric layers

03 p0422 A69-13408

Gyro synchrotron emission spectrum and intensity from energetic solar electrons radiating in coronal magnetic fields applied to type IV solar radio bursts

04 p0650 A69-15529

Sun as calibration signal source for L and S band telemetry, discussing receiving system noise temperature determination and antenna gains

07 p1082 A69-19113

Liquid mercury cathode thrusters characteristics satisfying constraints imposed by solar flux variations with distance from sun

[AIAA PAPER 69-237]

09 p1565 A69-21246

Radiant flux reflected by mirror and incident on receiver for paraboloidal solar devices, obtaining heat loads and radiant energy formulas

09 p1436 A69-21803

Solar radio emission bursts periodicity relation to burst intensity

12 p2157 A69-26234

Solar array energy performance as function of orbital parameters and spacecraft attitude

13 p2203 A69-27419

Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid

16 p2736 A69-31814

Digital simulation of transient solar still processes, using finite difference approach for heat flow to and from soil

16 p2765 A69-31816

Satellite solar power station proposed for power generation for future requirements, discussing world energy needs and finiteness of fossil fuel reserves

16 p2867 A69-31817

Earth-reflected solar energy /albedo energy/ distribution model, assuming isotropic scattering by homogeneous atmosphere

[AIAA PAPER 69-591]

17 p2961 A69-33292

Solar energy release by quark fusion catalysis of alpha reaction without production of neutrinos, noting temperature dependent reaction rate

18 p3186 A69-34643

SOLAR ENERGY ABSORBERS

Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range

09 p1576 A69-21646

Computation and optimization of energy distribution over randomly oriented elements of radiation receiving surface of hollow collector of concentrator type solar device

09 p1442 A69-22534

Solar power concentrator-absorber system, discussing flux distribution in focal plane and cavity heater optimization

17 p3022 A69-33795

Earth albedo in lower latitudes measured by satellites and surface stations, comparing solar energy absorption by oceans and atmosphere

20 p3591 A69-38058

SOLAR FACULAE

U FACULAE

SOLAR FLARES

Chromospheric flares photometric measurements during near minimum solar activity, discussing characteristics

01 p0149 A69-10127

Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares

01 p0154 A69-10894

Solar flare mechanism from analysis of energy transfer in quiet solar atmosphere, discussing convection, radiation, mechanical and MHD waves and thermal conduction

01 p0145 A69-10990

Solar X ray flare absolute flux correction, taking into account geometric obliquity factor variation with angle between satellite spin axis and satellite-sun line

01 p0147 A69-11242

Powerful flares close connection with filaments and loop prominences, discussing differences in physical characteristics

02 p0306 A69-11633

Solar flare X ray line and continuum spectra measured with crystal spectrometers aboard orbiting solar observatory

02 p0308 A69-12297

Sudden ionospheric disturbance development and characteristics of solar cosmic ray flares, associated X ray emissions and high energy particle generation

02 p0308 A69-12398

Solar flare model assuming open magnetic field configuration, discussing flare properties by application of tearing mode instability and nonlinear development

02 p0309 A69-12788

Solar X ray flares measurement by rocket and satellite, discussing X ray spectrum hardening, hard flares and SID

03 p0500 A69-13225

Magnetic storm of January 1967 due to 3B solar flare noting spacecraft observations, intensity, magnetospheric distortions and solar wind dynamics

03 p0500 A69-13430

Solar flare radiation hazard in long duration space flight, discussing radiation distribution and dosage in human body

03 p0371 A69-13480

Solar flares effect on ozonosphere, calculating time necessary for solar radiation to increase ozone concentration by 50 percent

03 p0424 A69-13542

Dynamic H alpha phenomena in projection on solar disk for simultaneously appearing flare and eruptive prominence on January 29, 1968

03 p0516 A69-14043

Solar particle events of May 23 and 28 1967, noting related solar and terrestrial phenomena

03 p0516 A69-14046

Chromospheric flare development and motion with respect to magnetic field of sunspot clusters

04 p0648 A69-14371

Cosmic ray intensity after solar flare shown greater than during quiet periods from balloon data at Murmansk and Mirny

04 p0648 A69-14375

Solar flares and sunspots number decrease near central meridian

04 p0660 A69-15040

Solar proton flares injecting cosmic ray bursts into solar system, discussing optical, radioastronomical and satellite observations

04 p0649 A69-15327

Cosmic ray intensity increase of January 28, 1967, noting pressure corrected hourly data and lack of association with visible solar flare

04 p0649 A69-15442

Radio bursts at 3.3 mm and H alpha emission during flares, proposing thermal enhancement

04 p0650 A69-15527

Interplanetary relativistic electrons from solar flare events

04 p0650 A69-15528

Electromagnetic radiation from solar flares based on rocket and satellite observations of 10-100 keV X ray emission and ground observation of cm-wavelength bursts

05 p0813 A69-15603

Space observations needed for solar flares study

05 p0814 A69-15859

Space observation of flare sprays and solar limb surges, stressing X ray research

05 p0814 A69-15860

Solar gamma rays measurement role in knowledge of solar flares, discussing simultaneous satellite and ground based observations

05 p0814 A69-15863

Sudden VHF phase anomalies produced by solar flare induced ionospheric disturbances during July 1968

05 p0719 A69-15980

Solar flare influence on potential gradient and air-earth current properties at high mountain stations

05 p0759 A69-16634

Intense continuum bursts energy, flux density and energetic proton production, noting V-spectrum in proton flares

06 p0985 A69-16980

Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei

06 p0989 A69-17280

Solar cosmic rays anisotropies including solar flare particles propagation

06 p0990 A69-17288

Mass motions in solar flares - Conference, Anacapri, Italy, June 1968

06 p0992 A69-17426

Mass motions in solar flares using line profiles and filtergrams

06 p0993 A69-17427

Optical evidence for mass motions in solar flares /1937-1967/

06 p0993 A69-17428

Mass motion in solar flares, discussing loop flares from emission line profile characteristics

06 p0993 A69-17429

Chromospheric /optical/ flares caused by dense material falling from corona into chromosphere

06 p0993 A69-17430

Small scale mass motions in chromospheric structures surrounding solar flare indicating changes in magnetic field

06 p0993 A69-17431

Mass motions in flares and moustaches indicated by spectral features, discussing red asymmetry of line emission

06 p0994 A69-17432

Spectrographic H alpha observations indicating effects of rotary mass motion in flares and prominences

06 p0994 A69-17434

Solar flares and surges origin, discussing role of supergranular convection, field gradients and spicules

06 p0994 A69-17437

Mass motions in flares, quiescent filaments or other eruption phenomena at solar surface, noting loops, sprays, surges, etc

06 p0994 A69-17438

Sprays in solar flares, discussing production in explosive and normal flares, occurrence, energy and relation to surges

06 p0995 A69-17439

Solar flares acceleration processes related to solar atmospheric currents

06 p0995 A69-17442

Model to account for flare and sunspot phenomena, discussing uni- and bipolar spots

06 p0995 A69-17443

Solar flare eruptions due to current disruption, leading to magnetic energy transfer from whole current circuit to very small volume

06 p0995 A69-17444

Solar flares, discussing transformation of magnetic energy into ion and electron kinetic energy by acceleration in high impedance region in current filaments

06 p0995 A69-17445

Solar flares and plages free energy origin in magnetic field dissipation

06 p0996 A69-17446

- Injection spectra of protons accelerated on sun to billion-trillion ev, discussing acceleration mechanisms 06 p0996 A69-17741
- Earth electromagnetic field micropulsations associated with proton flare, evaluating data from polar caps, auroral zones and midlatitudes 06 p0996 A69-17754
- Solar flare radiation protection requirements, considering bulk and plasma radiation shielding [AIAA PAPER 69-15] 06 p0884 A69-18079
- Solar flare in-flight radiation detection and warning system for Concorde SST, noting radiation hazards due to solar cosmic rays 07 p1131 A69-18551
- Solar flare initial development model assuming high temperature chromospheric point explosion, noting subsequent expansion and large density gradient effects 07 p1205 A69-19246
- Class 3 plus solar proton flare of August 28, 1966 and class 2 solar flare of August 30, 1966, summarizing stages of growth 07 p1205 A69-19247
- Proton flare activity dependence on Bartel active longitudes and sector structure boundaries of interplanetary magnetic field 07 p1205 A69-19248
- Atlas of energetic solar flare X rays and tentative atlas of proton events observed by OGO-1 and OGO-3 ionization chambers 07 p1206 A69-19251
- Sunspot groups area changes relationship to cosmic ray flare occurrences 07 p1206 A69-19252
- Electron density measurement in solar flare spray using discrepancy between measured and theoretical polarization 08 p1378 A69-20244
- Diffusion model for propagation of solar cosmic rays in interplanetary space, obtaining injection spectra for solar flare protons 08 p1379 A69-20613
- Proton flares statistical analysis regarding isolated and near activity complexes for long term forecasting 08 p1379 A69-20614
- High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation 09 p1588 A69-21362
- Correlated microwave and energetic X ray emission from solar flare with 16-sec periodic pulsations, discussing energy during modulation peaks 09 p1574 A69-21457
- Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity 09 p1576 A69-21699
- Solar flare energetic electron access to polar zones from measurements made by nine channel magnetic spectrometer on polar orbiting vehicle 09 p1577 A69-21709
- Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions 09 p1578 A69-22169
- Flares and chromospheric absorption features locations: compared with H alpha magnetograms, noting double emission ribbons development 09 p1579 A69-22179
- Energetic solar proton and electron event observed in July 1966 by Explorer 33 and OGO-C, noting association with invisible solar hemisphere flare 09 p1579 A69-22181
- Peaks and time intensity profile of energetic X rays and cosmic rays observed by OGO-C ion chamber on May 23, 1967 flare event 09 p1579 A69-22182
- Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares 09 p1580 A69-22203
- Solar X ray bursts observed by proportional counter on IMP-F satellite to correlate optical H alpha flares and radio bursts 09 p1582 A69-22746
- Solar outburst and storm accompanying 9 June 1968 flare, noting radio evidence for coronal instability before flare 09 p1582 A69-22747
- Meter wave radio spectrum observations during 9 June 1968 solar flare, suggesting sudden intensity and frequency change due to shock wave 09 p1582 A69-22748
- Two solar flare initiated type 4 radio bursts on 4 and 6 May 1968, noting prominence activity leading to meter wave generation 09 p1582 A69-22749
- Solar flare event on 17 June 1968 consisting of two type 2 bursts followed by enhanced emission /possibly type 4/ 09 p1582 A69-22750
- Solar flare relation to interplanetary scintillation indices and power spectra 09 p1582 A69-22751
- Short term variability of solar proton flux in interplanetary space during solar flare activity, using data from cosmic ray detector on Pioneer 7 09 p1582 A69-22754
- Two dimensional flat geometry for initial solar flare development stage, discussing tearing mode energy source for solar flares and plasma compressibility effects 09 p1583 A69-22757
- Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt 10 p1723 A69-23164
- Collection of articles on proton flare project /July 1966 event/ during IQSY, covering solar magnetic field, chromosphere, photosphere, solar activity, etc 10 p1760 A69-23725
- Magnetic fields and proton flare, showing isogauss maps of longitudinal and transverse fields for active region 10 p1762 A69-23726
- Solar magnetic fields compared in chromospheric and photospheric layers using magnetograph measurements, noting correlation with solar event 10 p1762 A69-23727
- Alpha hydrogen plane 20934 /McMath no. 8362/ associated with July 1966 proton flare development and configuration along sunspot group axis 10 p1762 A69-23728
- Two component calcium plage associated with proton flare of July 1966, describing initial development in old region periphery and component merging 10 p1763 A69-23729
- Sunspot group associated with proton flare of July 1966, describing formation of spot cluster pairs on borders of adjoining network cells 10 p1763 A69-23730
- Simultaneous photometric observations of coronal emission lines during July 1966 solar proton flare plotted on synoptic charts 10 p1763 A69-23731
- Coronal line intensity distribution for period of proton flare 10 p1763 A69-23732
- K coronameter observations used to construct electron density models of corona above proton flare region of July 1966 10 p1763 A69-23733
- Synoptic radio interferometer observations of July 1966 solar proton flare at microwave frequencies, correlating observed radio source with proton event 10 p1783 A69-23734
- Solar radio emission S component at short waves, discussing role of higher frequency spectrum in proton flare occurrence 10 p1763 A69-23735
- Proton flares during July 1966, discussing flare magnitude classes on disk, behind west limb, in active region and proximity to sunspots 10 p1763 A69-23737
- H alpha, H beta and D sub 3 /helium/ emission photographs of active prominence of July 9, 1966 using monochromatic filters for characteristic emissions from hydrogen and helium 10 p1764 A69-23738
- Active prominence during solar flare with loop-like shape of spectral line profiles, discussing turbulent velocities and limb flares 10 p1764 A69-23739
- Polarization measurements of July 1966 proton flare, considering electron scattering and density 10 p1764 A69-23740
- Solar west limb activity observations in H alpha line, noting July 9, 1966 loop system and July 11, 1966 twisted eruptive prominence 10 p1764 A69-23741
- Radio bursts and proton flares associated with active region McMath 8362 of July 1966, discussing wavelengths 10 p1764 A69-23742
- Summation curves method for development of active region and time dependence of energy loss during proton flare 10 p1764 A69-23743
- Sudden ionospheric disturbance effects of solar X ray emission from active region with proton flare 10 p1764 A69-23744
- Variable solar X ray emission from subflare activity in plage region producing polar cap absorption proton flare of July 7, 1966 10 p1764 A69-23745
- Behavior of active region prior to proton flare based on lambda sweep records, considering emission and absorption 10 p1765 A69-23746
- Variations in active region around McMath plage 8362 prior to proton flare, noting disk structure and nearby prominence modification 10 p1765 A69-23747
- Sunspot group evolution after proton flare, discussing decay of central umbrae 10 p1765 A69-23748
- Optical observations of proton flare, discussing flash phase and sunspot umbrae 10 p1765 A69-23749
- Dynamic spectrum of July 7, 1966 proton flare, considering short wave fadeout at 0027 UT and intense burst of spectral Type 2 10 p1765 A69-23750
- Decametric radio spectra from 0053 to 0200 UT during July 7, 1966 solar proton flare, discussing Type 4 phase 10 p1765 A69-23751
- Dynamic spectrum of Type 4 solar radio burst during July 7, 1966 proton flare, noting limb effect 10 p1765 A69-23752
- Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin 10 p1766 A69-23753
- Solar X ray flare of July 7, 1966 with Explorer 33 satellite attributed to McMath plage region 8362, discussing solar and cosmic radio noise 10 p1766 A69-23754
- Solar X ray emission and decay during proton flare of July 7, 1966 noting start of polar cap absorption 10 p1766 A69-23755
- X ray and extreme UV radiation deduced from sudden ionospheric disturbances during proton flare, discussing time dependence of emission 10 p1766 A69-23756
- Geomagnetic crochet of July 7, 1966, discussing pulsations, recombination coefficient and electron density of ionospheric D region 10 p1683 A69-23757
- Optical observations of later development of center of activity of July 7, 1966 proton flare 10 p1766 A69-23758
- Magnetic field decay in sunspot group 21034 during July 7, 1966 proton flare 10 p1766 A69-23759
- Proton flare event of July 1966, summarizing active region birth, evolution of spots, configuration and activity of center and general development 10 p1766 A69-23760
- Low energy cosmic ray intensity increase on July 7, 1966 registered with high latitude neutron monitors 10 p1766 A69-23762
- Solar protons balloon measurements following flare, noting integral proton flux and energy spectra 10 p1767 A69-23763
- Proton flares of July 7, 1966, September 2, 1966 and January 28, 1967, noting energy spectra and time dependence of proton flux 10 p1767 A69-23764
- Solar proton event of July 7 1966, discussing sea level observations 10 p1767 A69-23765
- Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history 10 p1767 A69-23766
- Energetic proton and electron fluxes spatial gradients after July 7, 1966 solar flare, noting satellite observations and injection mechanism geometry 10 p1767 A69-23767
- Time histories of Mev proton and alpha particle intensities during and after July 7, 1966 solar flare, noting abundance ratio and geophysical effects 10 p1768 A69-23768
- Time dependence, anisotropy and spectral composition of cosmic radiation generated during series of flares during July 5-20, 1966 by Pioneer 6 observations 10 p1768 A69-23769
- VLF observations of July 7 1966 solar flare and PCA event 10 p1657 A69-23772
- Magnetospheric perturbations as aftermath of proton flare discovered by whistlers, noting plasmopause movement toward earth 10 p1683 A69-23776

Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites

10 p1683 A69-23777

Protons emitted by July 7, 1966 solar flare observed by low altitude high latitude injun 4 satellite

10 p1768 A69-23778

Earth electromagnetic micropulsations in connection with July 7 1966 proton flare, discussing peculiarities in occurrence of pearls before and after flare

10 p1683 A69-23779

Geomagnetic field variations in middle and high latitudes during proton flare event, discussing UV radiation and period and energy spectra

10 p1683 A69-23780

Ionospheric conditions following solar proton flare observed with topside sounders of Alouette satellites, showing electron density depletion and hydromagnetic wave relationship

10 p1684 A69-23781

Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement

10 p1684 A69-23782

F region response to solar proton flare characterized by two phase ionospheric storm as measured at ground base stations

10 p1684 A69-23783

Ionospheric disturbances after July 7, 1966 proton flare noting flare ionizing radiation, high energy solar proton effects and low energy solar plasma

10 p1684 A69-23784

Energetic particles observed during proton flare noting relativistic electrons, protons to alpha particles ratio, low energy particles and bidirectional proton stream

10 p1768 A69-23785

Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity

10 p1768 A69-23786

Proton flare project covering magnetic structure of active center, photosphere and corona white light observations, interferometric and spectrometric records, etc

10 p1769 A69-23787

Sudden cosmic noise absorption /SCNA/ in polar cap during July 7, 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

10 p1770 A69-23907

Flares development in form of loop tunnel, discussing role of filaments

11 p1945 A69-24238

Line spectrum of flare gamma radiation due to atmosphere nuclei excitation by high energy proton acceleration

11 p1945 A69-24241

Type 3 solar flare circular and linear polarization at 23.5 MHz frequency

11 p1945 A69-24244

Sunspot groups large scale configuration in complex proton region, investigating probability of occurrence of accompanying groups/satellites/ in flare generation

11 p1946 A69-24427

Solar flares theories, discussing data acquisition by space research and solar radio astronomy

11 p1946 A69-24516

Space radiation phenomena, discussing auroral precipitations and characteristics and solar flare particle ejection

11 p1948 A69-24859

Supersonic aircraft radiation hazard due to solar flare proton exposure, using Monte Carlo method to estimate dosage as function of tissue slab

11 p1949 A69-24864

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations

11 p1950 A69-25160

Solar flare and magnetic storm signals from ATS 1 geostationary satellite on May 28, 1967, deriving total electron content

11 p1951 A69-25161

Solar chromospheric flares effect on temperature of upper atmosphere observed by satellite at perigee altitude

12 p2149 A69-26447

Solar flare proton radiation effects on earth satellites and solar probes, considering sunspot cycle 20, earth magnetic field shielding and Van Allen radiation belts

12 p2151 A69-26873

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity

14 p2512 A69-29044

Solar cosmic ray flare of 28 January 1967 observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary

14 p2513 A69-29066

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component

14 p2513 A69-29067

Solar X ray flux deduced from flare effects on VLF propagation, showing total energy content as measure of ionizing radiation

14 p2411 A69-29105

Solar flare effect on polar chorus variation determined by comparing Antarctica VLF data with low latitude magnetograms

14 p2514 A69-29385

Geomagnetic storms caused by plasma streams impinging on earth related to preceding cosmic flares, discussing polar cap absorption and ground level effects

14 p2514 A69-29416

Fe and Ti line growth in 12 July 1961 solar flare spectrum, finding ionized titanium, neutral and ionized iron excitation temperatures

14 p2514 A69-29720

Soviet book on solar cosmic rays covering origin, propagation, energy spectrum, diffusion dependence on particle energy and distance, solar flares, etc

14 p2514 A69-29816

General algorithm for eruptive plasma instabilities in fusion plasmas, flares and novae, yielding time behavior and dissipative effects

14 p2499 A69-29850

Solar flares associated with intensive sodium D lines emission observed photoelectrically with telescope in unperturbed region, analyzing possibilities of comets solar origin

15 p2674 A69-30506

Rocket observations of protons and alpha particles energy spectra after solar flares, noting riometer and magnetometer recordings

15 p2677 A69-31329

Low energy solar protons and alpha particles from 28 May 1967 solar flare used as probes of interplanetary medium

16 p2847 A69-31965

Numerical simulation of flare generated shock wave propagation through solar wind, noting transit time and shock strength agreement with observations

16 p2848 A69-31970

Explorer 33 and Explorer 35 observations of solar flare of 8 July 1969 soft X rays, discussing absolute flux

16 p2849 A69-31988

Sudden enhancement of atmospherics recorded during IGY, noting time lag between flare and SEA maximum

16 p2778 A69-32192

Solar flares and bursts correlation, taking into account sunspot type associated with flare and frequency range of bursts

16 p2850 A69-32213

Active longitudes of indices for sunspot activity and solar flares detected and investigated by isoline method for period 1957 to 1962

17 p3022 A69-33049

Ca 2 resonance line profiles in large disk flares and in surrounding plage, discussing H and K line behavior

17 p3023 A69-33054

Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations

17 p3035 A69-33627

Fine structure of 9 June 1968 solar flare related to nonflare chromosphere in active regions

17 p3024 A69-33802

Homology within solar flare associated type 2 radio events from dynamic spectra

17 p3024 A69-33803

Solar flare flux density and dynamic spectrum on 30 October 1968 at 80 MHz, showing noise storm positions and type II-III burst sources

17 p3025 A69-33807

Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines

17 p3025 A69-34224

Solar magnetic field strength distribution in active region during proton flares, using statistical analysis

17 p3025 A69-34225

Solar flares with subsonic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration

17 p3025 A69-34226

Geomagnetic crochets time relations to solar X rays, radio bursts and flares

17 p3025 A69-34227

High temperature regions cooling as applied to solar flares, considering energy losses due to heat conduction, bremsstrahlung, line emission and recombination radiation

18 p3197 A69-34752

Geomagnetic storms and Forbush decreases accounted for by interplanetary solar corpuscular streams effects described by interplanetary magnetic field structure, noting independence of flares

18 p3187 A69-34937

Solar neutrons upper limits measured for 28 July 1967 importance I flares

18 p3187 A69-34959

Solar flare model based on force-free currents in solar atmosphere, noting rapid energy release due to exceeding current density critical limit

18 p3188 A69-35392

Hydrodynamics of gas flow due to solar flares using point explosion model, determining shock wave travel time to earth orbit

18 p3189 A69-35397

Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface

18 p3189 A69-35415

Solar flares less than 10 A X rays effect on ionospheric ionization between 60 and 100 km

19 p3397 A69-36754

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

20 p3587 A69-37045

Solar proton flare June 1968 analysis, discussing geophysical effects and possible polar cap absorption

20 p3587 A69-37332

Solar flares plasma turbulence mechanisms suggested from magnetic energy release studies of Petschek model of magnetic field annihilation

20 p3589 A69-37549

Kinetic energy of sunspot rotational motion transferred to electromagnetic energy in filamentary currents, noting time variations in solar atmosphere preconditioning for flare

20 p3589 A69-37550

Solar flares microwave and hard X ray bursts, discussing gyrosynchrotron plasma, nonthermal electron bremsstrahlung and electron relaxation

20 p3589 A69-37551

Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations

20 p3590 A69-37558

Magnetic structure of active solar region as function of time for correlation between flares and magnetic field evolution

20 p3590 A69-37827

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

20 p3591 A69-38042

Spectral characteristics of solar proton flare on 2 September 1966, noting light intensity variations

20 p3591 A69-38043

Auroral absorption relation to visual aurora and measured particle fluxes

21 p3707 A69-38488

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars

21 p3790 A69-38823

Solar flare origin theories, considering energy storage, trigger mechanisms, shock profiles, particle emission, etc

21 p3791 A69-39507

Solar flares and prominences emission lines equivalent width correlated with relative differential velocity between filaments

22 p4001 A69-39994

Statistical analysis of chromospheric flares connections with sunspots, using frequency distributions of flares occurrences in sunspot groups

22 p4001 A69-39996

Solar flare optical, neutron and gamma emission, discussing ionization losses and nuclear interaction of accelerated particles in flares

22 p4003 A69-40296

Solar soft X rays observed from OSO-3, correlating to solar flares and radio bursts

22 p4003 A69-40297

Type V continuum emissions from solar flares suggested as due to synchrotron radiation from protons spiraling in magnetic field, noting Type III emission
22 p4003 A69-40301

Photoelectric photometer monitoring of flare star UV Cet, comparing time intervals between flares to those of YZ CMi
22 p4032 A69-40945

Continual photoelectric monitoring of flare star YZ CMi by photoelectric photometer attached to reflector, giving light curves for flares
22 p4032 A69-40947

Emerging magnetic tube type proton flare of 26 September 1963, investigating tube dynamic properties for lower flare and ascending turbulent emission ribbons
23 p4208 A69-41282

Absorbed dose and dose equivalent radiation rates at various depths in atmosphere due to proton spectrum of energetic solar flare
23 p4204 A69-41337

Solar flare radiation hazard to SST crew and passengers, discussing onboard and ground based warning systems and ICAO requirements
23 p4063 A69-41830

Biological effects by cosmic ray heavy ions and solar flares, using direct correlation between damages caused and trajectories
23 p4089 A69-41831

Solar flares energy supply origin from studying magnetic field behavior, flare position and initial evolution
24 p4366 A69-42687

Solar flares spectra X ray portion, considering spatial distribution, relation to magnetic fields and time sequence of emitting region
24 p4366 A69-42688

Solar flare and space research - COSPAR Conference, Tokyo, May 1968
24 p4369 A69-43603

Solar flares properties noting cool optical flare and high energy flare plasma, energy sources, generating regions, particle emission, etc
24 p4370 A69-43604

Optical solar flares, discussing flare classification, proton flares, development, limb observation, spectra, line broadening, electron density, etc
24 p4370 A69-43605

Magnetic field energy supply to solar flares from consideration of energies in solar active regions
24 p4370 A69-43606

Solar flares associated optical phenomena including filaments enhancement, destabilization and distortion, high speed ejections, explosions and loop prominences
24 p4371 A69-43607

Solar flares accompanied X ray emission temporal and spectral variations, showing departure from thermal equilibrium
24 p4371 A69-43608

Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts
24 p4371 A69-43609

Solar X ray flux measurements from OGO 4, comparing peak fluxes before, during and after flares with IQSY data
24 p4371 A69-43611

Solar flare-associated radio bursts, reviewing solar radio measurements based on X ray and particle observations
24 p4372 A69-43614

Single frequency microwave solar bursts correlation with flares and associated active regions based on spectral grouping
24 p4372 A69-43616

High energy nucleons and electrons accelerated in solar flares, considering interplanetary magnetic field effect on radiation properties near earth orbit
24 p4372 A69-43617

Solar cosmic ray anisotropy measurement by Explorer 34 satellite during solar flare events
24 p4373 A69-43619

Solar wind disturbances associated with flares
24 p4373 A69-43620

Solar flare models in terms of energy storage and release mechanisms
24 p4374 A69-43622

Solar flare energy source derived from energetic protons trapped in sunspot magnetic field prior to flare occurrence
24 p4374 A69-43623

Oscillatory convection, energy transport and structure of sunspots, suggesting fast changes in equilibrium conditions for magnetic reconstruction and solar flares origin
24 p4374 A69-43624

SOLAR FLUX

Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
03 p0368 A69-13076

Solar flux variations in 44-60 Å band during ascent of current solar cycle /Number 20/ measured by Solrad 8 satellite
04 p0650 A69-15530

Statistical study of solar radio flux fluctuations incidence, observing absorption and polarization effects
07 p1215 A69-18819

Solar atmosphere model calculations of solar oblateness, discussing flux difference and Dicke experiment on general relativity
08 p1383 A69-19899

Null solar neutrino flux possible relation to 2 year solar cycle, discussing energetic disturbances at solar core and sunspots
08 p1377 A69-19902

Solar constant measurement, reviewing instruments and results of Eppley-JPL program using high altitude jet aircraft and rocket research vehicle
09 p1576 A69-21647

Geocoronal Lyman alpha short term and 27-day variations observed by OGO 4 spacecraft attributed to flux variability at solar emission line center
15 p2699 A69-31404

Surface roughness effects on equilibrium temperature of isolated adiabatic plane surface illuminated by collimated and uniform solar flux
22 p4050 A69-40558

Interplanetary magnetic field role in interaction between terrestrial magnetosphere, solar plasma and solar flux energy transfer
23 p4214 A69-41865

Solar high energy gamma ray flux abrupt increase detected by neutral particle plastic scintillators at balloon altitude
24 p4371 A69-43612

Heat conduction problems associated with radiant exchange in shells under discontinuous solar flux, considering spacecraft structures, illumination theory and astrophysics
24 p4416 A69-43689

SOLAR FLUX DENSITY

Microwave spectra of peak flux of solar radio bursts of March and July 1966, relating plage regions to spectral characteristics
01 p0069 A69-11121

Solar X ray flare absolute flux correction, taking into account geometric obliquity factor variation with angle between satellite spin axis and satellite-sun line
01 p0147 A69-11242

Solar neutrino flux dependence on rotation rate of solar core and fractional mass involved in interior mixing
02 p0325 A69-12600

Photospheric brightness differences and structure of large scale intensity fluctuation, discussing association with solar supergranulation and chromospheric network
03 p0515 A69-14037

Chromosphere fine structure in Lyman alpha intensity, compiling isophote map
03 p0515 A69-14039

Microwave solar burst data, analyzing flux intensity and polarization distributions
04 p0652 A69-14417

Isotropic background cosmic X ray flux measurements using low latitude balloon to minimize atmospheric background, obtaining hard solar X ray flux upper limits
06 p0992 A69-17311

Solar intensity measurements at 1.2 mm during partial solar eclipse, noting solar limb brightening and intense solar outburst near end of eclipse
07 p1217 A69-19243

Liquid mercury cathode thrusters characteristics satisfying constraints imposed by solar flux variations with distance from sun
09 p1565 A69-21246

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase
11 p1964 A69-25417

Solar 3 cm flux density sensitivity to physical conditions in solar atmosphere related to maximum existence in flux density spectrum F gamma in active regions
13 p2327 A69-27721

Solar atmosphere surface radiation intensity determined by initial value theory including source function and resolvable
13 p2350 A69-27859

Solar flare flux density and dynamic spectrum on 30 October 1968 at 80 MHz, showing noise storm positions and type II-III burst sources
17 p3025 A69-33807

Solar microwave flux density during solar activity cycle tabulated, noting discrepancies in absolute flux levels
22 p4001 A69-39987

Daily measurement of solar radio intensity at 810 MHz during 1964 minimum solar activity period
22 p4010 A69-39989

Radiometer for measuring solar flux variations, discussing design, performance tests and use for spacecraft measurements
24 p4313 A69-42858

SOLAR FURNACES

Solar furnace for metal soldering, brazing and welding, using Pb-Sn solder for various joint types, twisted wires and rod-flange joining
16 p2793 A69-31818

SOLAR GENERATORS

Direct energy conversion and materials limitations, discussing thermoelectricity, solar cells, thermionics and fuel cells
02 p0194 A69-11801

Satellite power generation and transmission system for solar energy conversion, noting estimates of surface area and weight of collectors
02 p0323 A69-12296

Solar cell generator design problems for solar probes, discussing increased operational temperature
02 p0197 A69-12665

Design and performance equations for panel type solar thermoelectric generator, based on single thermocouple as generator unit
05 p0704 A69-15675

ESRO satellites power supply design, operation and characteristics
05 p0829 A69-15919

Electrical testing of six converter solar energy thermionic generator, discussing overheating and dual current mode anomalies
09 p1439 A69-21823

Electric and ion propulsion with solar array or nuclear reactor energy sources, discussing thermal thrusters, electrostatic thrusters and plasma thrusters
11 p1944 A69-25592

Heat conversion coefficients and initial temperature of active elements of solar powered electric devices
13 p2209 A69-28314

Solar conversion efficiencies of p-n and n-p diodes calculated for specified semiconductor heterojunctions using Anderson diffusion model
15 p2552 A69-30034

Solar and nuclear electric power technology for electric propulsion
16 p2741 A69-32709

Thermal contacts effects on optimum operating conditions of solar thermoelectric power generator, discussing losses due to low thermal conductivity coefficient of insulating layers
16 p2741 A69-32797

Faceted reflector for solar power installations with photoelectric converters, discussing reflector construction, efficiency and energy balance
16 p2741 A69-32798

Reradiation and multiple reflection effects on radiant flux density distribution in cylindrical receivers of solar power installations
16 p2741 A69-32799

Solar power concentrator-absorber system, discussing flux distribution in focal plane and cavity heater optimization
17 p3022 A69-33795

Large solar array systems in space, discussing design and operation
18 p3094 A69-35056

Solar cell power systems for manned space stations, summarizing studies of battery power system designs
23 p4068 A69-42242

Hot spot failure modes in solar cell arrays noting protection through I-V characteristic control
23 p4142 A69-42273

Design, fabrication and evaluation of lunar base solar array power modules, emphasizing structural/dynamic, thermal vacuum and acoustic tests
23 p4072 A69-42288

SOLAR GRAVITATION

Pulsar frequency Doppler shift due to general relativistic corrections to optical path of photons in field of sun
02 p0315 A69-11836

Stability of elliptical Venus orbits with solar gravitational perturbations, using equation accuracy and influence on mission planning

02 p0331 A69-12819

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework

03 p0506 A69-13091

Taurus A 21 cm absorption line frequency decrease during optical path approach to sun, discussing gravitational and electromagnetic origin

04 p0661 A69-15148

Circumpolar satellite orbits under lunar and solar perturbations based on two fixed centers problem, considering large amplitude disturbances

10 p1780 A69-23616

Solar gravitational field influence on annual trigonometric parallaxes within relativistic theory framework

14 p2516 A69-28773

Solar and lunar effects on motions of polar orbiting satellites, discussing variable intermediate orbits

14 p2521 A69-29460

SOLAR HEAT FLOW U HEAT FLUX

SOLAR HEATING

Simulated solar radiation heating of cesium vapor thermionic converters with multicapillary transmitters

07 p1058 A69-18951

Empirical determination of heating efficiency of extreme solar UV radiation interacting with carbon dioxide atmosphere of Mars and Venus

12 p2155 A69-26019

Axial support system for controlling thermal distortion of 82 inch heliostat mirror for Kitt Peak solar telescope

12 p2058 A69-26422

Plane and cylindrical thermionic converters, considering electricity generation by heating through flame, solar radiation and nuclear flux

14 p2419 A69-29178

Self thermostatic phase-change coatings for active and passive spacecraft temperature control, discussing temperature dependent changeability in solar absorptance

14 p2530 A69-29434

Diurnal thermospheric density, temperature and wind variations due to direct solar EUV heat input and tidal wave from lower atmosphere

15 p2605 A69-31439

Thermal stresses in rotating cylindrical interplanetary body heated by solar radiation

16 p2871 A69-31901

Temperature distribution of solid spherical satellite under solar radiant heating solved by variational calculus or point matching methods

16 p2877 A69-31922

Solar corona heating ascribed to Landau damping of ionacoustic waves generated in motion of photospheric granules

17 p3030 A69-33060

Temperature determination of thick flat plate rotating in space in solar flux with one surface insulated compared with Apollo heat shield results [AIAA PAPER 69-614]

17 p3071 A69-33266

Temperatures of radiantly heated sun and shade leaves of white oak measured in low speed wind tunnel, considering differences in convective heat dissipation

18 p3095 A69-34540

Rotation of antenna pattern of radio telescope parabolic mirror subjected to thermoelastic deformations due to asymmetric solar heating

20 p3497 A69-38307

SOLAR INSTRUMENTS NT SPECTROHELIOGRAPHS

Instrument technology for solar optical astronomy from space, noting rocket and satellite vehicles, far UV detectors, filters, photographic film fogging, etc

05 p0762 A69-15838

Multilens spectroheliograph for nonstabilized rockets, obtaining consecutive points recording along solar image chord

08 p1313 A69-20252

Solar research from rockets and satellites, considering solar instruments including EUV spectrographs

10 p1772 A69-22867

Apollo telescope mount (ATM) for solar experiments conducted from manned earth orbiting laboratory

10 p1791 A69-22871

Magnetic field inhomogeneities effect on line contours and magnetographic measurements, constructing

two stream models using Unno solution of transfer equations

22 p4019 A69-40288

Solar image selection device based on statistical analysis of photospheric contrast, noting use for electronic photography and location impaired observatory

23 p4213 A69-41697

SOLAR LONGITUDE

Proton flare activity dependence on Bartel active longitudes and sector structure boundaries of interplanetary magnetic field

07 p1205 A69-19248

Local solar magnetic fields longitudinal component correlation with central intensities in various Fraunhofer lines, noting chromospheric levels effect

07 p1219 A69-19285

Active longitudes of indices for sunspot activity and solar flares detected and investigated by isoline method for period 1957 to 1962

17 p3022 A69-33049

SOLAR MAGNETIC FIELD

OSO-4 solar UV spectrum measurements, correlating chromospheric line intensity and photospheric magnetic field strengths [AAS PAPER 68-219]

02 p0313 A69-11485

Interactions of moving solar plasmas and solar magnetic fields, discussing solar velocity fields and fine structure observations

02 p0329 A69-12784

Solar flare model assuming open magnetic field configuration, discussing flare properties by application of tearing mode instability and nonlinear development

02 p0309 A69-12788

Velocity dispersion and temperature anisotropy with respect to magnetic field direction, discussing inertial solar wind cooling effects

03 p0500 A69-13525

Energy release by Joule magnetic field dissipation in solar atmosphere

03 p0516 A69-14041

High resolution magnetograph study of solar magnetic field, showing magnetic asymmetry and fluctuations

04 p0651 A69-14367

Longitudinal component of solar facular magnetic field measured by high resolution spectrograms

04 p0651 A69-14368

Time dependent variations in magnetic fields of active sunspot clusters in photosphere observed by magnetograph

04 p0651 A69-14369

Horizontal and vertical downward velocity components in developed solar active regions

04 p0651 A69-14370

Chromospheric flare development and motion with respect to magnetic field of sunspot clusters

04 p0648 A69-14371

Interplanetary magnetic field intensities, solar and stellar fields measured by Zeeman effect, discussing fields of Jupiter, Mars, Venus and moon

04 p0657 A69-14810

Dissipation time of sunspot magnetic field determined as function of minimum spot value

04 p0660 A69-15039

Spatial distribution of background magnetic fields of quiet sun from photoelectric magnetograph observations, noting relation to supergranulation

04 p0663 A69-15396

Photospheric network obtained by spectroheliograms, discussing Fraunhofer lines weakening, nonsunspot magnetic fields and Zeeman sensitivity

04 p0664 A69-15523

Large scale pattern in solar magnetic field correlated with interplanetary magnetic field

04 p0665 A69-15532

Coronal structure predicted for September 22, 1968 solar eclipse by model constructed for large structure of coronal and interplanetary magnetic fields

05 p0818 A69-15602

Solar and interplanetary magnetic fields and plasmas, noting in situ observations by satellites and space probes of sector patterns, solar cosmic rays and wind

05 p0821 A69-15841

Time independent solar wind equations applied to spherical symmetry and radial magnetic field at solar surface, noting thermal conductivity anisotropy

05 p0817 A69-16703

Model for Evershed effect postulating unipolar symmetrical sunspot surrounded by magnetic knots of opposite polarity

06 p0999 A69-16977

Magnetic field surface in isolated symmetrical sunspot during motion across solar disk, determining field vector angle of inclination variation as related to solar surface

06 p0999 A69-16978

Type 2 radio bursts and corona magnetic field over active center

06 p0985 A69-16979

Small scale mass motions in chromospheric structures surrounding solar flare indicating changes in magnetic field

06 p0993 A69-17431

Flare-like phenomena in chromosphere, discussing moustaches, dashes and spicules and relation to changes in magnetic field

06 p0994 A69-17433

Solar flares and surges origin, discussing role of supergranular convection, field gradients and spicules

06 p0994 A69-17437

Solar flares and plages free energy origin in magnetic field dissipation

06 p0996 A69-17446

Solar type stellar activity, considering solar activity origin and correlation with stellar distances

06 p0996 A69-17447

Magnetic knots /intergranular space strong small scale magnetic fields near sunspot/, longitudinal and transversal fields and radial velocities

07 p1217 A69-19244

Local solar magnetic fields longitudinal component correlation with central intensities in various Fraunhofer lines, noting chromospheric levels effect

07 p1219 A69-19285

Solar magnetic fields distribution regularity with autocorrelation analysis of magnetic synoptic charts

08 p1394 A69-20610

Solar wind model including effects of rotation, magnetic fields and anisotropic heat conduction

08 p1380 A69-20643

Spectrum variations of type 4 radio burst as source rises through solar corona, determining electron density and magnetic field distributions in corona

08 p1380 A69-20775

Magnetic fields of solar supergranulation convective cells based on electromagnetic induction equation, indicating bipolar sunspots occurrence

09 p1588 A69-21366

Solar magnetic field observations with high resolution equipment compared with results by Mount Wilson Observatory

09 p1593 A69-21582

Slowly varying component height for microwave radio emission during IQSY, noting magnetic field changing strength effect

09 p1598 A69-22176

Flares and chromospheric absorption features locations compared with H alpha magnetograms, noting double emission ribbons development

09 p1579 A69-22179

Topology of solar magnetic field differential rotation, using hydromagnetic equations

09 p1606 A69-22425

Magnetically aligned flows between sunspots, considering Evershed effect on umbrae and penumbrae

10 p1772 A69-22907

Magnetograph in Italian observatory for weak solar magnetic field longitudinal components avoiding differential amplifier by electronic compensation

10 p1693 A69-23311

Magnetic fields and proton flare, showing isogauss maps of longitudinal and transverse fields for active region

10 p1762 A69-23726

Solar magnetic fields compared in chromospheric and photospheric layers using magnetograph measurements, noting correlation with solar event

10 p1762 A69-23727

Magnetic field decay in sunspot group 21034 during July 7, 1966 proton flare

10 p1766 A69-23759

Flares development in form of loop tunnel, discussing role of filaments

11 p1945 A69-24238

Type 2 radio burst dynamic spectra determination for finding shock wave and magnetic field parameters above active corona region

11 p1945 A69-24243

Solar radio bursts observations with multielement compound interferometers, noting polarization distribution and magnetic field change

11 p1946 A69-24428

Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface

11 p1958 A69-24429

Plasma and magnetic field measurements of tangential discontinuities in solar wind by Pioneer 6, considering velocity shears and rotation of sun

11 p1946 A69-24430

Spectroheliograph technique, obtaining high resolution magnetic maps of solar magnetic fields directly in single image without photographic subtraction

11 p1880 A69-24432

Stationary Babinet compensator for measuring longitudinal solar magnetic fields by means of fringes introduced in spectroheliograms

11 p1880 A69-24433

Recurrent geophysical disturbances associated with solar active regions and low latitude background field pattern on solar surface magnetic fields

11 p1964 A69-25415

Magnetic fields, green corona emission and filaments relationship at high solar latitudes using synoptic charts

11 p1964 A69-25416

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase

11 p1964 A69-25417

Solar activity complex development based on magnetic, photospheric, chromospheric and coronal observations

11 p1964 A69-25418

Circular polarization of solar microwave radio emission in Southern and Northern Hemispheres due to solar magnetic field

13 p2326 A69-27550

Solar corona magnetic field and polar rays, emphasizing field topology and local magnetic structure

14 p2525 A69-29718

Solar photosphere and sunspot magnetic fields structure and strength dependence on sunspot area

14 p2528 A69-29965

Solar activity and large scale magnetic field distribution in discrete latitude zones, including interplanetary magnetic field above ecliptic

14 p2528 A69-29966

Type 3 radio bursts time profile for estimating magnetic field strength in solar corona

15 p2675 A69-30554

Short period pulsations in solar magnetic fields and chromosphere, determining optimum conditions for formation of standing oscillations

15 p2688 A69-30556

Plasma viscosity relation to stellar magnetic fields generation, taking into consideration angular momentum transfer

15 p2700 A69-31492

Equations of transformation for hourly data harmonic terms used in computation and representation of solar and lunar daily magnetic variations

16 p2782 A69-32457

Splintering loop prominences, noting 7 October 1967 prominence interpretable as ejected prominence streamer capture by transverse magnetic fields of loop

17 p3029 A69-33052

Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines

17 p3040 A69-33801

Solar magnetic field strength distribution in active region during proton flares, using statistical analysis

17 p3025 A69-34225

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar magnetograph, noting noncorrelated data along latitudinal strip

18 p3205 A69-35399

Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface

18 p3189 A69-35415

Bright regions with loops (BRLS) in sunspot group development, discussing survey of time lapse movies from 1968

19 p3403 A69-35967

H alpha filtergrams and spectra of solar corona arch filament systems indicating downward and upward motions produced by magnetic field

20 p3588 A69-37543

Solar flares plasma turbulence mechanisms suggested from magnetic energy release studies of Petschek model of magnetic field annihilation

20 p3589 A69-37549

Magnetic structure of active solar region as function of time for correlation between flares and magnetic field evolution

20 p3590 A69-37827

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

20 p3591 A69-38042

Magnetic field and radial gas motion in sunspots from Crimean magnetograph observations at different depths of solar atmosphere

20 p3615 A69-38299

Magnetic field fluctuations and radial velocity in undisturbed photosphere, discussing magnetic field relation to radial velocity, cross correlation asymmetry, etc

20 p3535 A69-38300

Solar magnetic field measurements for fine structure of magnetic asymmetry at different heights and within sunspots, discussing asymmetry for corona and interplanetary space

22 p4010 A69-39990

Magnetic measurements of active regions at various levels of solar atmosphere, discussing chromospheric cold and hot region, faculae magnetic fields, etc

22 p4010 A69-39991

Dynamo action origin of stellar and planetary magnetic fields, considering turbulent helical motions of H convection zone of sun

22 p4011 A69-39998

Variable magnetic field effect on rotation of solar outer layers, applying to spectroscopic observations of rotation velocity at solar limb

22 p4019 A69-40293

Horizontally flowing eddies or Rossby waves in solar convection zone and photosphere, giving mathematical models showing hydromagnetic dynamo effects inducing reversing magnetic fields

22 p4019 A69-40294

Explorer 30 /Solrad 8/ satellite observation of 0.5-3 A solar X ray emission related to magnetic configuration in sunspot group

22 p4003 A69-40298

Babcock solar activity periodicity theory, correlating spots displacement and coronal magnetic field intensity changes

23 p4208 A69-41283

Solar flares energy supply origin from studying magnetic field behavior, flare position and initial evolution

24 p4366 A69-42687

Solar flares spectra X ray portion, considering spatial distribution, relation to magnetic fields and time sequence of emitting region

24 p4366 A69-42688

Sunspots microstructure, discussing penumbra and umbral properties with respect to magnetic field configuration

24 p4378 A69-42690

Phenomenological sunspot model describing granules, supergranules, magnetic fields and photospheric convection

24 p4378 A69-42691

Magnetic field energy supply to solar flares from consideration of energies in solar active regions

24 p4370 A69-43606

Solar flare energy source derived from energetic protons trapped in sunspot magnetic field prior to flare occurrence

24 p4374 A69-43623

Oscillatory convection, energy transport and structure of sunspots, suggesting fast changes in equilibrium conditions for magnetic reconstruction and solar flares origin

24 p4374 A69-43624

Interplanetary and geophysical conditions forecasting based on repetitions of low latitude photospheric background magnetic field patterns during solar activity cycles

24 p4387 A69-43626

Solar chromospheric spicules acceleration mechanism based on magnetic field structure on supergranulation boundaries

24 p4374 A69-43635

SOLAR OBSERVATORIES

NT OSO

NT OSO- 3

NT OSO-C

Space observations of solar intermediate corona, discussing balloon and rocket experiments and limitation of ground based observations

[AAS PAPER 68-217] 02 p0313 A69-11483

Chromospheric and photospheric solar observations made in Belgium in 1967, noting heliographic sunspot latitudes

02 p0313 A69-11533

Solar granules structural and correlation functions indicate homogeneous random field within photograph and regular component in intensity fluctuations spatial distribution

02 p0317 A69-11958

Instrument technology for solar optical astronomy from space, noting rocket and satellite vehicles, far UV detectors, filters, photographic film fogging, etc

05 p0762 A69-15838

Space observations needed for solar flares study

05 p0814 A69-15859

Space observation of flare sprays and solar limb surges, stressing X ray research

05 p0814 A69-15860

UV solar spectra observation, discussing coordination of ground based and satellite programs

05 p0822 A69-15861

Hard solar X ray bursts characteristics and coordination of ground and space observations

05 p0814 A69-15862

Aerospace Corp. solar observatory /California/ compound telescope, vacuum spectroheliograph, instrumentation and applications

11 p1862 A69-24792

Atmospheric attenuation of solar radiation, discussing submillimeter astronomy at low altitude observatories

13 p2327 A69-27590

Soviet stratospheric solar observation projects compared with American

13 p2355 A69-27640

Solar research objectives and instrumentation of Einstein turret in Potsdam

15 p2682 A69-30437

Solar telescope in Berlin observatory for prominences and other solar phenomena observations by public

15 p2611 A69-30881

Sayan Sun Observatory experimental equipment, discussing instruments for solar observation, earth currents measurement and cosmic ray neutron components recording

22 p3943 A69-39997

SOLAR ORBITS

NT PERIHELIONS

Secular perturbations produced by comet belt beyond Neptune on orbits of periodic comets of large aphelion

01 p0158 A69-11327

Planet Mercury rotation, showing reminiscence of apparent path of sun to Ptolemaic concept of planetary system

03 p0509 A69-13368

Interplanetary orbits for probe launched from earth to reencounter earth, noting relationship to three body problem

03 p0514 A69-13782

Solar motion in distant objects kinematics, suggesting simultaneous solutions of local motion and galactic rotation parameters

04 p0654 A69-14627

Mathematical analysis for mechanism of spherical comet nucleus division as effect of nonuniform surface heating during rotation

04 p0659 A69-14997

Orbit corrections for lost minor planets 457, 1038, 1161, 1297, determining new ephemerides for oppositions

05 p0829 A69-16704

11 Canis Minor meteor stream orbit computed, noting retrograde orbit and 4.2 million km perihelion

08 p1394 A69-20621

Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites

08 p1405 A69-20928

Asteroidal and cometary orbits and origin of meteorites, discussing eccentricities, exposure ages and mass yield

08 p1406 A69-20929

Photographic and reflector observations of comets including orbit determinations and recoveries

08 p1408 A69-21140

Spacecraft trajectory using microthrust and lunar gravitational attraction for acceleration into heliocentric orbit

09 p1593 A69-21620

Catalog of orbital elements for periodic comets during perihelion passage

10 p1777 A69-23396

- Intermediate orbits to construct motion theory of natural satellites of all planets 11 p1952 A69-24253
- Zodiacal light models /including spherical and nonspherical models/, discussing mechanisms for orientation of particles in solar orbits 15 p2698 A69-31366
- Outer planets exploration during 1976-80 period of unique solar system alignment 16 p2854 A69-31630
- Perturbations of planet motion in planetary coordinates, noting unperturbed motion 18 p3199 A69-34912
- Hill method applied to motion theory for minor planet 11 Parthenope using computerized first order perturbations from principal planets 20 p3596 A69-37316
- Numerical integration of lunar motion equations to investigate lunar theory for high precision applications and to examine motion departures from gravitational theory 20 p3603 A69-37560
- Hypothetical planet captured by earth, becoming earth satellite /moon/, discussing Mercury orbits peculiarities 20 p3603 A69-37562
- Periodic orbits for interplanetary flight, using patched conic analysis for determining inclined elliptic free fall trajectory shutting between earth and Venus [AAS PAPER 68-102] 21 p3804 A69-39203
- Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting [AIAA PAPER 69-932] 21 p3809 A69-39361
- ### SOLAR PHYSICS
- Solar growth curves constructed for solar disk center using various metal lines 02 p0314 A69-11637
- French solar research program, emphasizing protosphere-chromosphere transition zone 02 p0316 A69-11905
- Goldberg-Unno method for determining Doppler width, microturbulence velocity and convection errors, considering photosphere as hot ascending and cold descending columns 02 p0328 A69-12752
- Type 4 bursts mobile spectrum of september 14, 1966 interpreted by considering plasma effects on synchrotron emission mechanism 02 p0309 A69-12754
- Plasma instabilities covering astrophysical phenomena, Rayleigh-Taylor instability, anisotropic and LF MHD, electrostatic and electromagnetics, warm plasmas, etc 02 p0293 A69-12783
- Interactions of moving solar plasmas and solar magnetic fields, discussing solar velocity fields and fine structure observations 02 p0329 A69-12784
- Solar atmosphere physical properties tabulated to interpret radio bursts and noise storms 02 p0329 A69-12786
- Force free magnetic fields and solar filaments, describing model for explaining filament characteristics 02 p0329 A69-12787
- Solar flare model assuming open magnetic field configuration, discussing flare properties by application of tearing mode instability and nonlinear development 02 p0309 A69-12788
- Cosmic MHD, discussing mechanisms responsible for solar phenomena and dynamics of interstellar medium 02 p0293 A69-12789
- Wilson effect in sunspots, interpreting penumbra distortion near solar disk limb in terms of radiation transport 03 p0504 A69-12893
- Sunspot structure from two dimensional radiative transfer analysis of center limb intensity profiles made at several heliocentric angles 03 p0516 A69-14040
- Nonlinear mechanism for solar surge involving rapid acceleration of high electrical conductivity and macroscopic dimension plasma regions 03 p0516 A69-14044
- Solar microwave type 4 bursts spectra and decay rate time variations 04 p0648 A69-14364
- Slowly varying solar radio emission caused by bremsstrahlung and cyclotron mechanisms within limits of active region model 04 p0662 A69-15240
- Mixing effect on solar neutrino fluxes, assuming solar convective core with rapid thorough mixing 06 p1001 A69-17192
- Solar flares and surges origin, discussing role of supergranular convection, field gradients and spicules 06 p0994 A69-17437
- Magnetic fields of solar supergranulation convective cells based on electromagnetic induction equation, indicating bipolar sunspots occurrence 09 p1588 A69-21366
- Solar magnetic field observations with high resolution equipment compared with results by Mount Wilson Observatory 09 p1593 A69-21582
- Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient 09 p1579 A69-22175
- Solar interior rotational angular velocity influence on solar oblateness, noting reduction by turbulent mixing 09 p1600 A69-22201
- Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law 11 p1955 A69-24390
- Solar flares theories, discussing data acquisition by space research and solar radio astronomy 11 p1946 A69-24516
- Ionization equilibrium for ions of solar abundant elements between C and Ni calculated as function of electron temperature 11 p1928 A69-25262
- Light saturation development of line profile component of normal Zeeman triplet in sunspot umbrae 14 p2528 A69-29964
- Convergent solutions of inviscid solar wind equations in expansions form including dimensionless distance from sun 14 p2515 A69-29968
- Asymptotic power series solutions of viscous solar wind equations 14 p2515 A69-29969
- Solar-terrestrial physics, Solar aspects - IQSY/COSPAR Conference, London, July 1967, Part 1 15 p2672 A69-30005
- Solar research objectives and instrumentation of Einstein turret in Potsdam 15 p2682 A69-30437
- Excitation sources distribution in chromosphere from observed H alpha line contour, considering resonant scattering and internal excitation 15 p2683 A69-30509
- Chromospheric spicules formation, density, pressure gradient, vertical motion, velocity fluctuations and luminosity 15 p2675 A69-30551
- Solar neutrino fluxes sensitivity to localized changes in opacity and equation of state, discussing solar models 15 p2675 A69-30768
- Temperature fluctuations in solar photosphere, noting transition from convective to radiative energy transport 17 p3040 A69-33810
- Solar flare model based on force-free currents in solar atmosphere, noting rapid energy release due to exceeding current density critical limit 18 p3188 A69-35392
- Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition 20 p3594 A69-37018
- Criteria to prove incorrectness of two column model for photospheric granulation proposed by Margrave and Swihart /1969/ 20 p3603 A69-37541
- Limb effect of solar Fraunhofer lines determined by telescope equipped with autocollimated type diffraction spectrograph 20 p3607 A69-38044
- Solar neutrinos emission mechanism for information on central region of sun, discussing detection and flux density 21 p3790 A69-38827
- Solar flare origin theories, considering energy storage, trigger mechanisms, shock profiles, particle emission, etc 21 p3791 A69-39507
- Solar physics and hydromagnetics - Conference, Sopot, Poland, September 1966 22 p4009 A69-39982
- Sunspot penumbra model in hydrostatic equilibrium accounting for continuum and Fraunhofer lines observations 22 p4019 A69-40290
- Extraterrestrial objects composition in defining cosmic abundance curve, including solar and meteoritic data 22 p4032 A69-40982
- Solar flares energy supply origin from studying magnetic field behavior, flare position and initial evolution 24 p4366 A69-42687
- Solar physics outline, discussing composition, quiet and active sun characteristics, radiation, etc 24 p4379 A69-42781
- Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law 24 p4390 A69-43780
- ### SOLAR POSITION
- Variation in critical E layer frequencies at large solar zenith angles 06 p0921 A69-17748
- Rotation and orientation parameters of earth satellites based on qualitative analysis of solar direction indicator readings 07 p1230 A69-19604
- Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction 09 p1486 A69-21538
- Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction 16 p2783 A69-32533
- Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32 20 p3534 A69-38087
- Ionospheric nondeviative radio wave absorption, noting roles of collisional and working frequencies and solar zenith angle 23 p4127 A69-42425
- ### SOLAR PROBES
- Solar cell generator design problems for solar probes, discussing increased operational temperature 02 p0197 A69-12665
- Technological requirements for solar probe with close perihelion, discussing solar approach and space environment problems 03 p0519 A69-12855
- Space flight launches, interplanetary transfer orbits, flyby orbits and capture orbits for solar probe with 0.3 AU perihelion and Jupiter satellite probe 04 p0657 A69-14826
- German-American interplanetary vehicle to investigate interplanetary space and solar characteristics 06 p1012 A69-16970
- Solar flare proton radiation effects on earth satellites and solar probes, considering sunspot cycle 20, earth magnetic field shielding and Van Allen radiation belts 12 p2151 A69-26873
- Interplanetary dust and distribution study by micrometeorite analyzer and by zodiacal light observations using solar probe 15 p2694 A69-30879
- Thermal control coatings for solar cells of solar probe Helios 16 p2867 A69-31741
- Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations 17 p3050 A69-33797
- Jupiter swingby flight mode application to probe missions requiring solar polar regions overflight at close perihelion distances 19 p3401 A69-35915
- Two dimensional gravity assisted trajectories for solar probe missions in ecliptic plane, discussing Venus and Jupiter assist missions 21 p3804 A69-39022
- Spacecraft central data system for deep space solar probe data management 24 p4284 A69-42621
- ### SOLAR PROMINENCES
- Powerful flares close connection with filaments and loop prominences, discussing differences in physical characteristics 02 p0306 A69-11633
- Fabry-Perot etalon for obtaining monochromatic weak solar prominences 02 p0248 A69-11634

Dynamic H alpha phenomena in projection on solar disk for simultaneously appearing flare and eruptive prominence on January 29, 1968

03 p0516 A69-14043

Space observation of flare sprays and solar limb surges, stressing X ray research

05 p0814 A69-15860

Solar limb prominence areas variation with latitude and solar activity cycle, noting changes in yearly mean latitude of prominences during cycle

05 p0816 A69-16390

Spectrographic H alpha observations indicating effects of rotary mass motion in flares and prominences

06 p0994 A69-17434

Solar prominence structures observed in H alpha emission, determining radial velocities as function of distance from limb

06 p0994 A69-17436

Mass motions in flares, quiescent filaments or other eruption phenomena at solar surface, noting loops, sprays, surges, etc

06 p0994 A69-17438

Quiescent solar prominences horizontal oscillations, explaining periods, damping times and prominence shape changes by model of freely oscillating prominence in corona

07 p1205 A69-19245

Emission spectrum analysis of faint solar prominences noting kinetic temperature, turbulent velocity and electron density

07 p1210 A69-19718

Electron density measurement in solar flare spray using discrepancy between measured and theoretical polarization

08 p1378 A69-20244

Synoptic charts of chromosphere, giving position and magnitude of sunspots, facula plages and prominences during synodic revolution of sun

08 p1379 A69-20378

Flares and chromospheric absorption features locations compared with H alpha magnetograms, noting double emission ribbons development

09 p1579 A69-22179

H alpha, H beta and D sub 3 /helium/ emission photographs of active prominence of July 9, 1966 using monochromatic filters for characteristic emissions from hydrogen and helium

10 p1764 A69-23738

Active prominence during solar flare with loop-like shape of spectral line profiles, discussing turbulent velocities and limb flares

10 p1764 A69-23739

Solar west limb activity observations in H alpha line, noting July 9, 1966 loop system and July 11, 1966 twisted eruptive prominence

10 p1764 A69-23741

Flares development in form of loop tunnel, discussing role of filaments

11 p1945 A69-24238

Solar quiescent prominences spectra with bright metallic lines, discussing turbulent angular velocity and kinematic temperature of filaments

11 p1945 A69-24387

Mercury transits in 1970 and 1973 to resolve prominence threads and spicules, sunspot fine structures, etc

11 p1958 A69-24434

Spectral emission of active prominences, showing looplike lines during quiet phases and differences in turbulent velocities magnitude

15 p2674 A69-30510

Solar telescope in Berlin observatory for prominences and other solar phenomena observations by public

15 p2611 A69-30881

H alpha/D3 intensity ratio variations in peripheral regions of prominences may be due to dynamic conditions of material emitting radiations

17 p3029 A69-33051

Splintering loop prominences, noting 7 October 1967 prominence interpretable as ejected prominence streamer capture by transverse magnetic fields of loop

17 p3029 A69-33052

Two flare unconnected prominence eruptions on 15, 29 January 1968, discussing emission at arch top

17 p3023 A69-33053

Solar flares and prominences emission lines equivalent width correlated with relative differential velocity between filaments

22 p4001 A69-39994

Mean intensity profiles of photospheric H alpha radiation illuminating solar prominences moving at different heights

22 p4011 A69-39995

Optical and mechanical systems of Wroclaw Observatory Lyot type coronagraph for prominence observations in H alpha line

22 p3943 A69-39999

Diffuse coronal emission observation during total eclipse of February 1961 near solar prominences and polar ray form investigation in northern part of corona

22 p4002 A69-40002

Solar flares associated optical phenomena including filaments enhancement, destabilization and distortion, high speed ejections, explosions and loop prominences

24 p4371 A69-43607

Solar quiescent prominences spectra with bright metallic lines, discussing turbulent angular velocity and kinematic temperature of filaments

24 p4375 A69-43777

SOLAR PROPULSION

Multimission interplanetary probe using solar electric propulsion

06 p0984 A69-17593

Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system [AIAA PAPER 69-253]

09 p1585 A69-21244

Solar electric propulsion mission simplification by staging concept, discussing thrust combination, weight tradeoffs, design and Jupiter flyby probe [AIAA PAPER 69-251]

09 p1586 A69-21245

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs [AIAA PAPER 69-252]

09 p1568 A69-21729

Solar electric propulsion system performance consisting of thrusters with thrust vector aligning actuators, switching network and flight type power conditioner [AIAA PAPER 69-498]

16 p2843 A69-32708

Solar and nuclear electric power technology for electric propulsion [AIAA PAPER 69-826]

16 p2741 A69-32709

SOLAR PROTONS

Explorer 26 observations of solar proton penetration inside trapped radiation near geomagnetic equator

01 p0146 A69-11122

Solar proton observations by Satellite 1963 38C in polar regions at high altitude during spring 1966

01 p0146 A69-11123

Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay

01 p0146 A69-11124

Solar proton flares injecting cosmic ray bursts into solar system, discussing optical, radioastronomical and satellite observations

04 p0649 A69-15327

Energy flux into earth thermosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H

05 p0817 A69-16654

Intense continuum bursts energy, flux density and energetic proton production, noting V-spectrum in proton flares

06 p0985 A69-16980

Injection spectra of protons accelerated on sun to billion-trillion ev, discussing acceleration mechanisms

06 p0996 A69-17741

Earth electromagnetic field micropulsations associated with proton flare, evaluating data from polar caps, auroral zones and midlatitudes

06 p0996 A69-17754

Partial reflections from ionosphere, analyzing electron number densities, noting relation between D region ionization increases and small solar proton events

07 p1205 A69-18956

Class 3 plus solar proton flare of August 28, 1966 and class 2 solar flare of August 30, 1966, summarizing stages of growth

07 p1205 A69-19247

Atlas of energetic solar flare X rays and tentative atlas of proton events observed by OGO-1 and OGO-3 ionization chambers

07 p1206 A69-19251

Proton flares statistical analysis regarding isolated and near activity complexes for long term forecasting

08 p1379 A69-20614

Solar proton monitoring by particle detectors on-board rockets and IMP satellite

08 p1318 A69-21142

Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity

09 p1576 A69-21699

Low energy solar cosmic ray proton flux characteristics observed by Injun 1 satellite after July 1961 sudden commencement magnetic storm

09 p1576 A69-21707

Energetic solar proton and electron event observed in July 1966 by Explorer 33 and OGO-C, noting association with invisible solar hemisphere flare

09 p1579 A69-22181

Short term variability of solar proton flux in interplanetary space during solar flare activity, using data from cosmic ray detector on Pioneer 7

09 p1582 A69-22754

Collection of articles on proton flare project /July 1966 event/ during IQSY, covering solar magnetic field, chromosphere, photosphere, solar activity, etc

10 p1760 A69-23725

Magnetic fields and proton flare, showing isogauss maps of longitudinal and transverse fields for active region

10 p1762 A69-23726

Solar magnetic fields compared in chromospheric and photospheric layers using magnetograph measurements, noting correlation with solar event

10 p1762 A69-23727

Alpha hydrogen plage 20934 /McMath no. 8362/ associated with July 1966 proton flare development and configuration along sunspot group axis

10 p1762 A69-23728

Two component calcium plage associated with proton flare of July 1966, describing initial development in old region periphery and component merging

10 p1763 A69-23729

Sunspot group associated with proton flare of July 1966, describing formation of spot cluster pairs on borders of adjoining network cells

10 p1763 A69-23730

Simultaneous photometric observations of coronal emission lines during July 1966 solar proton flare plotted on synoptic charts

10 p1763 A69-23731

Coronal line intensity distribution for period of proton flare

10 p1763 A69-23732

K coronameter observations used to construct electron density models of corona above proton flare region of July 1966

10 p1763 A69-23733

Synoptic radio interferometer observations of July 1966 solar proton flare at microwave frequencies, correlating observed radio source with proton event

10 p1783 A69-23734

Solar radio emission S component at short waves, discussing role of higher frequency spectrum in proton flare occurrence

10 p1763 A69-23735

Proton flares during July 1966, discussing flare magnitude classes on disk, behind west limb, in active region and proximity to sunspots

10 p1763 A69-23737

Polarization measurements of July 1966 proton flare, considering electron scattering and density

10 p1764 A69-23740

Solar west limb activity observations in H alpha line, noting July 9, 1966 loop system and July 11, 1966 twisted eruptive prominence

10 p1764 A69-23741

Radio bursts and proton flares associated with active region McMath 8362 of July 1966, discussing wavelengths

10 p1764 A69-23742

Summation curves method for development of active region and time dependence of energy loss during proton flare

10 p1764 A69-23743

Sudden ionospheric disturbance effects of solar X ray emission from active region with proton flare

10 p1764 A69-23744

Behavior of active region prior to proton flare based on lambda sweep records, considering emission and absorption

10 p1765 A69-23746

Variations in active region around McMath plage 8362 prior to proton flare, noting disk structure and nearby prominence modification

10 p1765 A69-23747

Sunspot group evolution after proton flare, discussing decay of central umbrae

10 p1765 A69-23748

Optical observations of proton flare, discussing flash phase and sunspot umbrae

10 p1765 A69-23749

Dynamic spectrum of July 7, 1966 proton flare, considering short wave fadeout at 0027 UT and intense burst of spectral Type 2

10 p1765 A69-23750

Decametric radio spectra from 0053 to 0200 UT during July 7, 1966 solar proton flare, discussing Type 4 phase

10 p1765 A69-23751

Dynamic spectrum of Type 4 solar radio burst during July 7, 1966 proton flare, noting limb effect

10 p1765 A69-23752

Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin

10 p1766 A69-23753

Solar X ray emission and decay during proton flare of July 7, 1966 noting start of polar cap absorption

10 p1766 A69-23755

Optical observations of later development of center of activity of July 7, 1966 proton flare

10 p1766 A69-23758

Magnetic field decay in sunspot group 21034 during July 7, 1966 proton flare

10 p1766 A69-23759

Proton flare event of July 1966, summarizing active region birth, evolution of spots, configuration and activity of center and general development

10 p1766 A69-23760

Ground level solar proton event recorded by neutron monitors

10 p1766 A69-23761

Low energy cosmic ray intensity increase on July 7, 1966 registered with high latitude neutron monitors

10 p1766 A69-23762

Solar protons balloon measurements following flare, noting integral proton flux and energy spectra

10 p1767 A69-23763

Proton flares of July 7, 1966, September 2, 1966 and January 28, 1967, noting energy spectra and time dependence of proton flux

10 p1767 A69-23764

Solar proton event of July 7 1966, discussing sea level observations

10 p1767 A69-23765

Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history

10 p1767 A69-23766

Energetic proton and electron fluxes spatial gradients after July 7, 1966 solar flare, noting satellite observations and injection mechanism geometry

10 p1767 A69-23767

Time histories of Mev proton and alpha particle intensities during and after July 7, 1966 solar flare, noting abundance ratio and geophysical effects

10 p1768 A69-23768

Forbush decrease associated with July 7 1966 proton event from cosmic ray intensity variation measurements by neutron monitors

10 p1768 A69-23774

Magnetospheric perturbations as aftermath of proton flare discovered by whistlers, noting plasmopause movement toward earth

10 p1683 A69-23776

Protons emitted by July 7, 1966 solar flare observed by low altitude high latitude Injun 4 satellite

10 p1768 A69-23778

Earth electromagnetic micropulsations in connection with July 7 1966 proton flare, discussing peculiarities in occurrence of pearls before and after flare

10 p1683 A69-23779

Geomagnetic field variations in middle and high latitudes during proton flare event, discussing UV radiation and period and energy spectra

10 p1683 A69-23780

Ionospheric conditions following solar proton flare observed with topside sounders of Alouette satellites, showing electron density depletion and hydromagnetic wave relationship

10 p1684 A69-23781

Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement

10 p1684 A69-23782

F region response to solar proton flare characterized by two phase ionospheric storm as measured at ground base stations

10 p1684 A69-23783

Ionospheric disturbances after July 7, 1966 proton flare noting flare ionizing radiation, high energy solar proton effects and low energy solar plasma

10 p1684 A69-23784

Energetic particles observed during proton flare noting relativistic electrons, protons to alpha particles ratio, low energy particles and bidirectional proton stream

10 p1768 A69-23785

Proton flare project covering magnetic structure of active center, photosphere and corona white light observations, interferometric and spectrometric records, etc

10 p1769 A69-23787

Sudden cosmic noise absorption (SCNA) in polar cap during July 7, 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

10 p1770 A69-23907

Sunspot groups large scale configuration in complex proton region, investigating probability of occurrence of accompanying groups/satellites/ in flare generation

11 p1946 A69-24427

Supersonic aircraft radiation hazard due to solar flare proton exposure, using Monte Carlo method to estimate dosage as function of tissue slab

11 p1949 A69-24864

Solar flare proton radiation effects on earth satellites and solar probes, considering sunspot cycle 20, earth magnetic field shielding and Van Allen radiation belts

12 p2151 A69-26873

Solar proton flux in two energy intervals measuring by ATS detectors during January 1967 event compared with data from satellites outside magnetosphere

14 p2509 A69-28935

Auroral electrojet index in relation to magnetic storm sudden commencements, ring current main phase and energetic solar protons

14 p2511 A69-28954

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase

14 p2512 A69-29045

Rocket observations of protons and alpha particles energy spectra after solar flares, noting riometer and magnetometer recordings

15 p2677 A69-31329

ESRO 2 satellite observations of solar proton event of 9 June 1968, comparing flux profile variations across polar cap with magnetic changes at earth surface

15 p2677 A69-31347

Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra

15 p2652 A69-31522

Low energy solar protons and alpha particles from 28 May 1967 solar flare used as probes of interplanetary medium

16 p2847 A69-31965

Solar energetic proton penetration into magnetotail from proton data collected by Vela 4 energetic particle telescopes, comparing proton fluxes inside and outside magnetotail

16 p2847 A69-31966

Solar protons nonuniformity over polar caps observed by OGO 2 ionization chamber during 24 March 1966 solar proton events

16 p2848 A69-31967

Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control

16 p2849 A69-31984

Diurnal variations in gamma rays produced by proton bombardment ascribed to geomagnetic time dependence for low energy solar proton cut-off

16 p2850 A69-32308

Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time

16 p2850 A69-32321

Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines

17 p3025 A69-34224

Solar magnetic field strength distribution in active region during proton flares, using statistical analysis

17 p3025 A69-34225

Solar wind model for studying long wavelength turbulence as heat source for alpha particles and protons in solar plasma

18 p3186 A69-34299

Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface

18 p3189 A69-35415

Solar protons captured in earth dipole trap, discussing conditions for nonadiabatic escape

20 p3587 A69-37042

Solar protons in subpolar stratosphere during solar activity minimum indicated from proton measurements at Tiksi Bay

20 p3587 A69-37044

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

20 p3587 A69-37045

Solar proton flare June 1968 analysis, discussing geophysical effects and possible polar cap absorption

20 p3587 A69-37332

Satellite observations of solar proton events with halo structure or energetic storm proton event and SSC, noting similarity in origin

20 p3589 A69-37555

Solar protons intensity increase observed by balloon-borne instruments over Antarctica, describing decay phases

20 p3589 A69-37556

Spectral characteristics of solar proton flare on 2 September 1966, noting light intensity variations

20 p3591 A69-38043

Solar proton bombardment of lunar surface, discussing luminescence and chemical effects

22 p4012 A69-40089

Type V continuum emissions from solar flares suggested as due to synchrotron radiation from protons spiraling in magnetic field, noting Type III emission

22 p4003 A69-40301

Cosmic ray proton cut-off increase at high latitudes during magnetospheric substorms, using balloon time observations of nuclear gamma ray flux

22 p4005 A69-40509

Charge exchange of solar wind protons passing shock front, noting turbulent subsonic motion of randomized hot solar wind protons in shadow cone

22 p4008 A69-41208

Emerging magnetic tube type proton flare of 26 September 1963, investigating tube dynamic properties for lower flare and ascending turbulent emission ribbons

23 p4208 A69-41282

Absorbed dose and dose equivalent radiation rates at various depths in atmosphere due to proton spectrum of energetic solar flare

23 p4204 A69-41337

Incident proton flux atmospheric altitude profile during PCA period, comparing balloon observations with preliminary satellite data

23 p4204 A69-41485

Solar protons delayed access into polar regions during 2 November 1967 solar particle event, discussing north-south asymmetry

24 p4368 A69-43183

Solar protons and alpha particles measurements at synchronous orbit altitudes providing data for solar cell shield design to prevent radiation damage

24 p4369 A69-43265

Solar flare energy source derived from energetic protons trapped in sunspot magnetic field prior to flare occurrence

24 p4374 A69-43623

SOLAR RADAR ECHOES

Radio echoes relationship to active parts of solar corona, noting agreement with data on type 3 radio bursts source location

18 p3201 A69-35207

SOLAR RADIATION

NT SUNLIGHT
NT TYPE 2 BURSTS
NT TYPE 3 BURSTS
NT TYPE 4 BURSTS
NT TYPE 5 BURSTS

Atmospheric noise at millimeter wavelengths, discussing solar radiation and antenna near and far field patterns

01 p0028 A69-10420

Spacecraft illuminance by reflected solar radiation calculated by computer method

01 p0151 A69-10576

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

01 p0152 A69-10577

Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation

01 p0176 A69-10847

Soviet investigations of solar and cosmic electromagnetic and charged particle radiations by balloon, rocket and satellite measurements

01 p0145 A69-10945

Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation

01 p0018 A69-11087

- Radiation, Stark and van der Waals level broadening constants for Mg 1 and Si 1 calculated to interpret solar and stellar spectral line widths
02 p0310 A69-11454
- Global solar radiation flux measurements over India during IQSY
02 p0307 A69-11819
- French radio astronomy, presenting sky background radiation and solar emission results from Rubis 02 and 04 rockets
02 p0316 A69-11908
- Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model
02 p0318 A69-12041
- Iris satellite experiments in astrophysics including nuclear and solar induced electromagnetic radiation
03 p0427 A69-12849
- Wilson effect in sunspots, interpreting penumbra distortion near solar disk limb in terms of radiation transport
03 p0504 A69-12893
- Thermal tidal oscillations in earth atmosphere using circulation model attributed to solar radiation absorption by atmospheric vapor and ozone
03 p0457 A69-13030
- Submillimeter wave observation of sun to study anomalous absorption region
03 p0513 A69-13774
- Aircraft cockpit and surface temperatures after solar radiation exposure in desert, showing inadequacies of meteorological data for thermal stress predictions
03 p0381 A69-14077
- Solar and terrestrial thermal radiometer absolute calibration noting standards and methods
04 p0602 A69-15429
- Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection
04 p0666 A69-15511
- Solar gamma rays measurement role in knowledge of solar flares, discussing simultaneous satellite and ground based observations
05 p0814 A69-15863
- Spectrophotometer and integral methods to determine solar radiation absorptivity for steady/ unsteady thermal regimes in solids
05 p0846 A69-15901
- Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
05 p0824 A69-16252
- Atmospheric turbidity coefficient distribution in Northern Hemisphere from direct solar radiation measurements, noting application to IGY data
05 p0789 A69-16585
- Australian sounding rocket programs carried out in conjunction with U.S. satellite experiments [UN PAPER 68-95214]
06 p1013 A69-17076
- Mixing effect on solar neutrino fluxes, assuming solar convective core with rapid thorough mixing
06 p1001 A69-17192
- Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei
06 p0989 A69-17280
- Inflatable solar shields for thermal protection of space vehicles utilizing cryogen propellants
06 p1017 A69-17609
- Solar absorptance and hemispherical emittance of metals at space conditions determined with cyclic incident radiation technique [AIAA PAPER 69-60]
06 p0945 A69-18154
- Storable tubular extendible member /STEM/ booms for gravity gradient applications, emphasizing reflective coatings to minimize deflection by solar radiation
07 p1226 A69-18327
- Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation
07 p1227 A69-18333
- Spherical and single axis passive oscillation energy dampers for gravity gradient oriented satellites, utilizing earth gravity field or solar pressure
07 p1229 A69-18347
- Simulated solar radiation heating of cesium vapor thermionic converters with multicapillary transmitters
07 p1058 A69-18951
- Solar photosphere model with two stream columnar representation of granulation for predicting continuous radiation field
07 p1217 A69-19238
- Soviet monograph on UV radiation of sun and sky emphasizing biological effects
07 p1221 A69-19506
- Energy dissipation of solar particles in atmosphere for 3914 and 5577 A bands, computing light emissions associated with PCA
08 p1378 A69-20186
- Solar particles and radiation - Conference, Kiel, October 1968
08 p1379 A69-20531
- Albedo over Antarctic, measuring solar radiation reflected by surface and atmosphere by Eppley radiometer
09 p1484 A69-21404
- Solar neutrinos and convective core mixing on short time scale resulting in flux reduction
09 p1574 A69-21453
- Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere
09 p1575 A69-21645
- Solar constant measurement, reviewing instruments and results of Eppley-JPL program using high altitude jet aircraft and rocket research vehicle
09 p1576 A69-21647
- Solar radiation absorption measurements by balloon for atmospheric water vapor distribution
09 p1536 A69-21864
- Helium-like ion resonance satellite lines in laboratory and solar plasmas, noting coincidence between solar satellite energy and energy level interval
09 p1598 A69-22158
- Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
09 p1578 A69-22167
- Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics
09 p1578 A69-22168
- Earth reflected solar radiation and stability of satellite thermal control coatings, noting intensity distribution shifting toward UV region and coatings degradation rate
09 p1579 A69-22174
- Modified nonstationary method for determining materials absorptivity with respect to incident solar radiation through heating and cooling rate measurements
09 p1528 A69-22720
- Solar Lyman alpha radiation scattering into antisolar geocorona, noting inaccessibility of region to solar wind
09 p1583 A69-22760
- Daily observational results of solar phenomena, cosmic rays, geomagnetic variations, ionosphere, radio wave propagation and airglow arranged according to solar rotation number
10 p1771 A69-22808
- Neutrino groups generation in internal regions of sun, analyzing flux ambiguities due to error of cross section parameter of nuclear reactions
10 p1757 A69-22827
- Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration
10 p1759 A69-22840
- Solar Lyman alpha, Lyman beta and Balmer alpha lines of He 2 for electron temperature and density and optical thickness of emitting layer
10 p1772 A69-22859
- Explorer 30 satellite monitoring of solar X ray emission during July 1-15 1966, noting plage region activation with increasing emission
10 p1763 A69-23736
- Polyesters reaction with dimethyl p-phenylene diamine compared under UV exposure from carbon arc and natural sunlight
10 p1716 A69-23978
- Mean absolute solar spectrum energy distribution from 1800 A to 4 mm, noting solar constant and radiation intensity determination
11 p1951 A69-24242
- Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles
11 p1956 A69-24397
- Solar UV radiation measurements by balloon-borne monochromatic illuminator, using Cd-cathode photomultiplier detector
11 p1945 A69-24410
- Center to limb variations of sunspot-photosphere brightness ratio, considering umbra darkening and radiative equilibrium
11 p1946 A69-24426
- Multiple scattering of solar radiation in turbid atmosphere, considering equations of sky radiation and radiative transfer
11 p1911 A69-24587
- Temperature field in thin walled rods with spiral coil cross section in solar radiation, considering radiant heat exchange
11 p1999 A69-24779
- Silicon dioxide coated Al reflectance, solar absorptivity and total normal and hemispherical thermal emissivity, noting application to satellite temperature control
11 p1918 A69-24835
- Biological radiation doses and protection from galactic, solar particle and trapped radiation in space, noting secondary radiation and bremsstrahlung in absorber
11 p1831 A69-24866
- Microorganism survival in space for exposure to solar UV radiation on balloons, rockets and satellites
11 p1828 A69-25457
- Thermally induced oscillatory instabilities in spacecraft booms, rederiving thermal torque equation to predict finite twist response
11 p1994 A69-25531
- Empirical determination of heating efficiency of extreme solar UV radiation interacting with carbon dioxide atmosphere of Mars and Venus
12 p2155 A69-26019
- Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere
12 p2067 A69-26333
- Solar radiation in short wave, UV and X ray range recorded by rockets, probes and satellites, notably Elektron 2 probe
13 p2326 A69-27355
- Atmospheric attenuation of solar radiation, discussing submillimeter astronomy at low altitude observatories
13 p2327 A69-27590
- Solar atmosphere surface radiation intensity determined by initial value theory including source function and resolvent
13 p2350 A69-27859
- Human expansion in space, discussing moon landing and exploitation
13 p2352 A69-27901
- Semiconductor luminescent devices and laser pumping by solar radiation modulated to interact resonantly with solid state plasma oscillations and electric field in crystal
13 p2272 A69-27969
- Structure and thermometry of solar interior from measuring neutrino fluxes intensities emitted by unit surface
13 p2333 A69-28434
- Saturated signals of GM counter from solar radiation monitoring satellite, showing Van Allen belt high energy particle origin
14 p2514 A69-29383
- Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth
14 p2447 A69-29404
- Absorption band observation near 0.43 mu in solar spectra and scattered radiation of sky, determining nontelluric origin
14 p2441 A69-29407
- Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae
14 p2447 A69-29408
- Solar radiation pressure effects on satellite models in circular equinoctial orbits
14 p2522 A69-29595
- Solar UV radiation effects on processes in comet head, interpreting surface brightness distribution of comet 1959k in terms of photodissociation
14 p2525 A69-29717
- Solar ionizing radiation sources, discussing activity at sunspot minimum, temperature, density and solar wind effects, X ray and UV spectra, etc
15 p2673 A69-30007
- Bidirectional reflectance of solar radiation and IR temperature data from Nimbus 2 satellite to differentiate clouds above snow surfaces
15 p2596 A69-30455
- Reflected and absorbed solar radiation by planetary atmosphere and surface determined as function of atmosphere and surface optical properties
15 p2689 A69-30564

Earth reflected solar radiation spatial, angular and spectral distributions measured by telephotometers on-board Cosmos 149

15 p2596 A69-30650

Ozonosphere inhomogeneities from UV spectra of reflected solar radiation, studying latitude dependence of seasonal behavior at different heights

15 p2597 A69-30654

Spacecraft illuminance by reflected solar radiation calculated by computer method

15 p2691 A69-30746

Scattered solar Lyman alpha radiation measurement by Vertical Space Probe station in upper atmosphere including UV radiation

15 p2691 A69-30747

Solar neutrino fluxes sensitivity to localized changes in opacity and equation of state, discussing solar models

15 p2675 A69-30768

Solar radiation actinometric and pyranometric observations during 20 May 1966 eclipse, examining IR component and spectral radiation energies

15 p2697 A69-31257

Earth albedo instrument on OSO 3 spacecraft to measure solar reflectance of earth at various wavelengths

15 p2614 A69-31279

Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies

16 p2861 A69-32300

He I/1.083 mu/ and O I/5577 A/ absolute brightness measured in solar aurora for various shadow heights of solar radiation, considering primary electron precipitation

16 p2780 A69-32311

Aircraft measurements and computer calculations of downward and upward solar radiation fluxes related to albedo, altitude and sun angle

17 p3023 A69-33158

Attenuation statistics due to rain measured on earth-space path at 16 and 30 GHz, using sun as signal source

17 p2920 A69-33398

Solar thermonuclear reactions studied by emitted neutrinos detection, plotting energy spectra for sensitivity of CI 37 detection system

18 p3185 A69-34278

Instantaneous and integral solar irradiance of earth oriented satellite surface, noting solar illumination nomogram representation

19 p3432 A69-36629

Solar disk edge polarization rate determined by applying Feautrier method to transfer equations for polarized radiation

19 p3427 A69-36728

UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures

20 p3595 A69-37136

Soviet book on methods of calculating characteristics of solar radiation covering short wave radiation, relationship to meteorological factors, applications, etc

20 p3570 A69-37233

Mesosphere and lower thermosphere molecular O density from solar radiation atmospheric absorption, using satellite measurements

20 p3523 A69-37413

Solar neutrinos capture rate estimation by using Li 7 as detector

20 p3588 A69-37420

Solar bremsstrahlung intensity dependence on heliographic longitude, noting maximum intensity shift toward electron beam direction

20 p3589 A69-37552

Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations

20 p3590 A69-37558

Hg injection lamp with high power and variable spectral energy distribution as light source for testing solar radiation effects

20 p3510 A69-37630

Atmospheric ozone detection by three-color photometer measurements of solar UV radiation attenuation in Hartley continuum

20 p3543 A69-37802

Solar cycle variation of extreme UV radiation from total solar disk under nonflare conditions by photoelectric measurements

20 p3592 A69-38103

Solar UV emission lines from high resolution rocket observations

20 p3612 A69-38167

Angular dependence of ocean surface-cloudless atmosphere reflectance for solar radiation studied with digitized camera signals from ATS 1 satellite

21 p3704 A69-38372

Twilight airglow excitations governed by solar radiation, indicating presence of alkali metals, positive calcium ions and H lines, positive sodium ion bands, etc

21 p3711 A69-38515

OH emission rise after sunset and decay at sunrise attributed to strong solar dissociation of ozone

21 p3712 A69-38520

Solar neutrinos emission mechanism for information on central region of sun, discussing detection and flux density

21 p3790 A69-38827

Molecular O distribution in thermosphere from Ariel 3 observations of solar radiation attenuation, showing large and systematic variation with longitude

21 p3717 A69-39263

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies

21 p3814 A69-39584

Mean intensity profiles of photospheric H alpha radiation illuminating solar prominences moving at different heights

22 p4011 A69-39995

Solar flare optical, neutron and gamma emission, discussing ionization losses and nuclear interaction of accelerated particles in flares

22 p4003 A69-40296

Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications [AIAA PAPER 69-1021]

22 p3923 A69-40392

Curvature and temperature distribution in nonrotating long solid cylinders under solar radiation in interplanetary space

22 p4043 A69-40546

Radiative heat input to artificial satellite in orbit due to solar and earth radiations calculated and presented in graphs for satellite temperature calculation

22 p4006 A69-40589

Zenith atmospheric attenuation in 183-325 GHz region measured by wideband Ge bolometer detector and spectral convolution technique

23 p4115 A69-41586

Qualitative model of atmospheric mass circulation constructed from radar meteor trail drifts observations, considering solar thermal radiation and zonal wind direction

23 p4214 A69-41862

Total solar radiation correlation with bright sunshine hours measured monthly on solarimeters and Campbell-Stokes recorders at various tropical stations

23 p4206 A69-42178

Human habitation conditions on moon from viewpoint of solar and lunar radiation, vacuum and gravitation effects including solar energy utilization

23 p4111 A69-42213

Type 4 bursts maximum intensities at different frequencies compared for centimeter and decimeter waves

24 p4366 A69-42964

Absorption observation of solar radiation at sunset by nitric acid in three wavelength intervals on different balloon flights

24 p4308 A69-42969

Solar grazing ray absorption calculated by tracing through earth atmosphere, noting extinction for arbitrary ozone and aerosol profile

24 p4350 A69-43013

Solar radiation pressure on interplanetary dust particles calculated as function of radius and density, noting asteroidal origin of dielectric and absorbing particles

24 p4390 A69-43787

SOLAR RADIATION SHIELDING

Gaseous hydrates formation in comet nuclei, discussing stability at given temperatures and pressures and solar radiation shielding by dust sheath

03 p0515 A69-14032

Solar flare radiation protection requirements, considering bulk and plasma radiation shielding [AIAA PAPER 69-15]

06 p0884 A69-18079

Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt

10 p1723 A69-23164

SOLAR RADIO BURSTS

NT TYPE 2 BURSTS

NT TYPE 3 BURSTS

NT TYPE 4 BURSTS

NT TYPE 5 BURSTS

Power spectral indices of March 6, 1968 solar radio burst, suggesting Razin effect

01 p0148 A69-10054

Microwave spectra of peak flux of solar radio bursts of March and July 1966, relating plage regions to spectral characteristics

01 p0069 A69-11121

Solar noise storms structure and movement, discussing localization of type 1 burst emission into zones in solar corona

02 p0315 A69-11824

Solar atmosphere physical properties tabulated to interpret radio bursts and noise storms

02 p0329 A69-12786

Meter and decimeter solar radio bursts and sudden cosmic noise observed at Ahmedabad, India

03 p0518 A69-14259

Microwave solar burst data, analyzing flux intensity and polarization distributions

04 p0652 A69-14417

Radio bursts at 3.3 mm and H alpha emission during flares, proposing thermal enhancement

04 p0650 A69-15527

Electromagnetic radiation from solar flares based on rocket and satellite observations of 10-100 keV X ray emission and ground observation of cm-wavelength bursts

05 p0813 A69-15603

Space radio astronomy techniques for problems in galactic radio emission, solar studies and planetary observations

05 p0821 A69-15844

Hard solar X ray bursts characteristics and coordination of ground and space observations

05 p0814 A69-15862

Intense continuum bursts energy, flux density and energetic proton production, noting V-spectrum in proton flares

06 p0985 A69-16980

Solar radio spectroscopy for 40 to 240 MHz frequency range, noting dynamic spectra of solar radio bursts

06 p0925 A69-17318

Solar wind, discussing corona, radio sources, radio bursts, comet tails, cosmic rays, etc

06 p1012 A69-18239

Outstanding solar type 4 radio burst from spectrographic records at metric and decametric wavelengths from Weissenu Observatory

09 p1578 A69-22157

Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density

09 p1579 A69-22178

Solar X ray bursts observed by proportional counter on IMP-F satellite to correlate optical H alpha flares and radio bursts

09 p1582 A69-22746

Radio bursts and proton flares associated with active region McMath 8362 of July 1966, discussing wavelengths

10 p1764 A69-23742

Solar radio bursts observations with multielement compound interferometers, noting polarization distribution and magnetic field change

11 p1946 A69-24428

Time splitting of solar radio bursts observed at Oslo Solar Observatory with high resolution radio spectrographs

11 p1946 A69-24590

Solar radio emission bursts periodicity relation to burst intensity

12 p2157 A69-26234

Solar flares and bursts correlation, taking into account sunspot type associated with flare and frequency range of bursts

16 p2850 A69-32213

Solar microwave radiation burst of 29 October 1968 from active region behind west limb

16 p2865 A69-32811

Solar radio bursts spectra fine structure, discussing observations of fast drift storm, drift pair and split pair bursts

17 p3024 A69-33607

Correlated bursts from separate distant sources on sun, noting occurrence in quiet periods and strength

17 p3024 A69-33804

Solar radio burst fringes at 21 cm observed with high angular resolution using two element E-W interferometers

17 p3040 A69-33809

Solar soft X ray bursts observed by Solrad 8 satellite, considering relationship to microwave radio bursts

17 p3025 A69-34055

Geomagnetic crochets time relations to solar X rays, radio bursts and flares

17 p3025 A69-34227

Multielement compound high resolution quick scan interferometer for rapidly changing solar burst observations at 3.75 GHz

18 p3118 A69-34968

Occurrence frequency distributions at microwave frequencies as function of peak intensity and directivities of solar bursts

18 p3187 A69-34969

Radio echoes relationship to active parts of solar corona, noting agreement with data on type 3 radio bursts source location

18 p3201 A69-35207

Solar radio bursts polarization measured with microwave correlation polarimeter, noting output recording rate

18 p3188 A69-35213

Daily solar radio noise intensity at 10.7 cm with slowly varying components and quiet sun emission, revealing rise only and absorption bursts

19 p3401 A69-35758

Soviet monograph on large solar radio bursts covering global observation networks, monochromatic recordings, spectral classifications and catalog of IGY and IQSY observations

20 p3588 A69-37444

Solar flares microwave and hard X ray bursts, discussing gyrosynchrotron plasma, nonthermal electron bremsstrahlung and electron relaxation

20 p3589 A69-37551

Solar hard and soft X rays time-intensity profiles showing homology with centimeter radio bursts, suggesting origin from same electrons

20 p3589 A69-37553

Type I solar radio bursts linked in chains, giving graphical data for chain distributions frequency, photospheric height and lifetime

22 p4010 A69-39985

Medium sized solar radio events from peak intensities, spectrum characteristics and coronal magnetic field role

22 p4020 A69-40299

Synchrotron radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type IV solar radio bursts

22 p4006 A69-40577

Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts

24 p4371 A69-43609

Solar flare-associated radio bursts, reviewing solar radio measurements based on X ray and particle observations

24 p4372 A69-43614

Single frequency microwave solar bursts correlation with flares and associated active regions based on spectral grouping

24 p4372 A69-43616

SOLAR RADIO EMISSION

NT TYPE 2 BURSTS

NT TYPE 3 BURSTS

NT TYPE 4 BURSTS

NT TYPE 5 BURSTS

Solar radio emission slowly varying component theory, discussing main characteristics of cyclotron and bremsstrahlung radiations of thermal electrons

02 p0314 A69-11636

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

02 p0314 A69-11676

Spectrum and diameter of source of slowly varying component of solar radio emission between 3.3 mm and 21 cm

03 p0516 A69-14045

Simultaneous recording of radio emission from five sections of solar active region, using parabolic antenna and single amplification/reception channel

04 p0651 A69-14377

Slowly varying solar radio emission caused by bremsstrahlung and cyclotron mechanisms within limits of active region model

04 p0662 A69-15240

Solar radio emission sources associated with sunspot groups and flocculi at 1.6 cm

04 p0649 A69-15241

Polarization enhancements in solar microwave radiation, noting correlation with other solar events and geophysical effects

05 p0813 A69-15761

Solar radio emissions analysis using radio telescope measurements, observing quasi-periodic LF fluctuations caused by chromospheric processes

06 p1004 A69-17535

Quasi-periodic variations of solar radio emission intensity related to solar activity variations

07 p1211 A69-18516

Statistical study of solar radio flux fluctuations incidence, observing absorption and polarization effects

07 p1215 A69-18819

Solar intensity measurements at 1.2 mm during partial solar eclipse, noting solar limb brightening and intense solar outburst near end of eclipse

07 p1217 A69-19243

Solar radio astronomy, discussing quiet sun radio emission, solar activity, slowly varying radio emission, radio bursts and possibility of observing lines

08 p1388 A69-20218

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars

08 p1407 A69-21125

Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation

09 p1461 A69-21283

Correlated spectra of related sunspot number and solar 10.7 cm radiation component, noting variance for solar rotation periods

09 p1574 A69-21397

Correlated microwave and energetic X ray emission from solar flare with 16-sec periodic pulsations, discussing energy during modulation peaks

09 p1574 A69-21457

Upper atmospheric density relation to AE indices sum and solar radio flux during geomagnetic disturbances

09 p1488 A69-21657

Slowly varying component height for microwave radio emission during IQSY, noting magnetic field changing strength effect

09 p1598 A69-22176

Peaks and time intensity profile of energetic X rays and cosmic rays observed by OGO-C ion chamber on May 23, 1967 flare event

09 p1579 A69-22182

Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares

09 p1580 A69-22203

Solar occulting disk diameter at radio wavelengths derived from consideration of slightly deviated rays

09 p1607 A69-22432

Solar radio astronomy in Australia including solar atmosphere, bursts, instruments, etc

10 p1777 A69-23383

Synoptic radio interferometer observations of July 1966 solar proton flare at microwave frequencies, correlating observed radio source with proton event

10 p1783 A69-23734

Solar radio emission S component at short waves, discussing role of higher frequency spectrum in proton flare occurrence

10 p1763 A69-23735

Photospheric magnetic fields, coronal emission and filaments distribution relationship with 1420 MHz radio emission, noting brightness and plasma density increase

11 p1964 A69-25417

Upper atmosphere density variations investigation using Eurobs system, correlating density to geomagnetic activity and 10.7 cm solar radio emission

12 p2069 A69-26437

Circular polarization of solar microwave radio emission in Southern and Northern Hemispheres due to solar magnetic field

13 p2326 A69-27550

Solar corona 5303 and 6374 A emission enhancements correlated to 169 MHz S-component, discussing coronal temperature

13 p2347 A69-27717

Solar 3 cm flux density sensitivity to physical conditions in solar atmosphere related to maximum existence in flux density spectrum F gamma in active regions

13 p2327 A69-27721

Troposphere effects on millimeter wave radio astronomy measurements, discussing solar noise fluctuations due to clouds and precipitation

13 p2223 A69-28607

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

13 p2355 A69-28707

Solar radio emission data during IGY covering solar terrestrial disturbances, broadband bursts, solar indices, etc

14 p2513 A69-29321

Slowly varying component of solar radio emission, evaluating resolution of radio telescopes in sunspot studies and localized areas luminescence

15 p2674 A69-30503

Slowly varying component of solar radio emission /S component/, correlating 35 GHz S component flux and corresponding plage, discussing magnetic fields and electron density

17 p3030 A69-33056

Solar radio emission sources position changes observed in solar storm center

17 p3024 A69-33805

Solar radio sources heights at 1424 and 696 MHz during near minimum solar activity

17 p3040 A69-33808

Surges statistical properties observed in Sweden /1957-1967/ noting latitude distribution pattern, radio emission association, rate dependence on solar cycle, etc

18 p3204 A69-35393

White light solar corona brightness distribution observations /1964-1967/, considering solar radio flux relationship and equatorial electron densities

18 p3205 A69-35394

Solar radio emission during quiet sun years 1964-1965 mapped using Stanford spectroheliograph, attributing slowly varying component to electron density enhancement

18 p3188 A69-35395

Solar microwave emission heliographic distribution during pronounced geomagnetic recurrence, noting brightness temperature nonuniformity due to coronal depression through polytropic models for solar wind

18 p3188 A69-35396

Solar radio emission parameters calculated, determining basic 327 MHz emission component and flux density-sunspot area correlation coefficient

20 p3588 A69-37478

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities

20 p3589 A69-37557

Radio observations of 30 May 1965 total solar eclipse at Manue Island, discussing radio brightness

20 p3616 A69-38304

Solar atmosphere radio emission generation by hydrodynamic shock wave interaction with coronal plasma, treating corona as ideal gas consisting of protons and electrons

22 p4009 A69-39984

Radio emission data from 20 May 1966 partial solar eclipse, giving radio noise and brightness distribution data

22 p4010 A69-39986

Solar microwave flux density during solar activity cycle tabulated, noting discrepancies in absolute flux levels

22 p4001 A69-39987

Solar observations at 21 and 43 cm during solar minimum by grating cross and total power radiometer, giving radio map of solar emission

22 p4001 A69-39988

Daily measurement of solar radio intensity at 810 MHz during 1964 minimum solar activity period

22 p4010 A69-39989

Solar radio emission /S component/ observations with 22-m radio telescope at Crimean Astrophysical Observatory

22 p4020 A69-40295

Solar soft X rays observed from OSO-3, correlating to solar flares and radio bursts

22 p4003 A69-40297

Distinction between faint and bright sources of slowly varying solar microwave emission components applied to geomagnetic activity statistics

22 p4020 A69-40306

Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements

22 p4004 A69-40504

Polarization measurement of slowly varying component of sun by pencil-beam antenna at 8.6 mm, analyzing data by magnetoionic theory

22 p4027 A69-40660

SOLAR REFLECTORS

Radiant flux reflected by mirror and incident on receiver for paraboloidal solar devices, obtaining heat loads and radiant energy formulas

09 p1436 A69-21803

SOLAR ROTATION

- Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density
09 p1579 A69-22178
- Solar simulator with 20 kw xenon lamps, discussing performance, versatility and problems with collectors, folding mirrors and cooling system
15 p2586 A69-30384
- Faceted reflector for solar power installations with photoelectric converters, discussing reflector construction, efficiency and energy balance
16 p2741 A69-32798

SOLAR ROTATION

- Geomagnetic response asymmetry related to solar direction of polarity in interplanetary magnetic field
01 p0077 A69-11236
- Solar neutrino flux dependence on rotation rate of solar core and fractional mass involved in interior mixing
02 p0325 A69-12600
- Solar wind model including effects of rotation, magnetic fields and anisotropic heat conduction
08 p1380 A69-20643
- Correlated spectra of related sunspot number and solar 10.7 cm radiation component, noting variance for solar rotation periods
09 p1574 A69-21397
- Solar interior rotational angular velocity influence on solar oblateness, noting reduction by turbulent mixing
09 p1600 A69-22201
- Topology of solar magnetic field differential rotation, using hydromagnetic equations
09 p1606 A69-22425
- Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law
11 p1955 A69-24390
- East-west asymmetry in solar wind velocity due to solar rotation effects on interaction between fast and slow streams
11 p1950 A69-25148
- Solar oblateness and differential rotation time development due to solar wind torque
12 p2157 A69-26308
- Solar polar faculae observations, discussing relation to general solar magnetic field and coronal properties, solar high latitude rotation and susceptibility to atmospheric conditions
12 p2160 A69-26897
- Solar cycle kinematical model based on field amplification by solar differential rotation including fluctuations in eruption rate
13 p2337 A69-27548
- Solar rotation measured as function of latitude using Doppler compensator with magnetograph, noting daily rotation rate difference in H alpha and metallic lines
14 p2528 A69-29974
- Finite electrical conductivity effect on sun angular momentum loss due to solar wind
18 p3189 A69-35398
- Solar oblateness observed by Dicke and Goldenberg as interaction between slow uniform rotation and turbulent convection
22 p4017 A69-40175
- Variable magnetic field effect on rotation of solar outer layers, applying to spectroscopic observations of rotation velocity at solar limb
22 p4019 A69-40293
- Hydrodynamic equations for radial solar wind expansion linearized and specialized to treat co-rotating perturbations
22 p4003 A69-40302
- Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law
24 p4390 A69-43780

SOLAR SAILS

- Solar sail structural design, discussing application as propulsion system for heliogyro interplanetary spacecraft
06 p1015 A69-17591
- Feasibility of automatic stationkeeping for synchronous satellites by using solar sailing techniques and low thrust systems
[AAS PAPER 68-151] 19 p3429 A69-35950
- Reduced flight time interstellar round trip propulsion system with relativistic velocity capabilities, discussing vehicle with solar sail and magnetic course reversal
[AAS PAPER 69-388] 24 p4363 A69-42829

SOLAR SENSORS

- Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors
03 p0427 A69-12980
- Balloon for in situ measurements of atmospheric optical parameters using two axis sun pointer, spectropolarimeter and airborne telemetry
15 p2615 A69-31288
- Precision autocollimating solar sensor design for attitude alignment changes, including detector calibration and sounding rocket flight test results
[AIAA PAPER 69-858] 21 p3762 A69-39386
- Total solar radiation correlation with bright sunshine hours measured monthly on solarimeters and Campbell-Stokes recorders at various tropical stations
23 p4206 A69-42178
- Parallel wire array fluidic sun sensor for solar pointing fluidic attitude control, discussing design and breadboard test
24 p4348 A69-43297

SOLAR SIMULATION

- Multichannel radiometers calibration and testing for spacecraft and solar simulation applications, noting exposure to sun onboard X-15 aircraft at high altitudes
06 p0926 A69-17620
- Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680
- Solar wind interaction with geomagnetic field simulation practically unrealizable, discussing partial simulation covering neutral magnetic layer formation on night side
12 p2149 A69-26681
- Space environment simulation for vacuum, solar radiation, heat sink and orbital motion, discussing oil contamination of optical surfaces
13 p2241 A69-28079
- Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite
15 p2587 A69-30391
- Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc
21 p3690 A69-38894
- Variable optical system with remote and continuous adjustment of beam for solar simulation, permitting maximum test facility utilization
[AIAA PAPER 69-997] 22 p3920 A69-40375

SOLAR SIMULATORS

- Simulated solar radiation heating of cesium vapor thermionic converters with multicapillary transmitters
07 p1058 A69-18951
- Simulated solar EUV laboratory spectrophotometry used in preparing optical space flight experiments, discussing instrumentation and calibration
08 p1267 A69-19888
- Filtering system for xenon arc solar simulator to provide operation at air-mass-two /average sea level/ sunlight
09 p1476 A69-21648
- Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature
[AIAA PAPER 69-312] 09 p1479 A69-22386
- Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
15 p2586 A69-30383
- Solar simulator with 20 kw xenon lamps, discussing performance, versatility and problems with collectors, folding mirrors and cooling system
15 p2586 A69-30384
- Solar simulator with pulsed Xe arc tube, describing operating characteristics, spectral emission and simulator-sunlight correlation
15 p2586 A69-30385
- Boeing A-7000 Solar Simulator for Space Environment Simulation Laboratory, noting output characteristics
15 p2588 A69-30403
- Xenon high wattage short arc lamps for space/solar simulators, describing seals, electrodes shapes and cooling, operating characteristics, etc
[AIAA PAPER 69-998] 22 p3920 A69-40376
- Solar simulator built into multiwall ultrahigh vacuum chamber, describing simulator and chamber modifications
[AIAA PAPER 69-1001] 22 p3921 A69-40377

SOLAR SPECTRA

- Paschen series line contours for hydrogen in solar spectrum plotted from IR spectrophotometric data
01 p0148 A69-10126
- Solar copper abundance determined from measuring Cu I and 2 and resonance lines transition probabilities in electric arc emission under LTE conditions
02 p0204 A69-11456
- Fraunhofer lines hyperfine structure effect on solar abundances of V, Mn, Co, Cu and Ba, calculating equivalent line widths by ALGOL program
02 p0311 A69-11458
- OSO-4 solar UV spectrum measurements, correlating chromospheric line intensity and photospheric magnetic field strengths
[AAS PAPER 68-219] 02 p0313 A69-11485
- Solar flare X ray line and continuum spectra measured with crystal spectrometers aboard orbiting solar observatory
02 p0308 A69-12297
- Solar coronal ion abundance analyses from extreme UV emission lines
02 p0327 A69-12719
- Type 4 bursts mobile spectrum of september 14, 1966 interpreted by considering plasma effects on synchrotron emission mechanism
02 p0309 A69-12754
- Solar atmosphere from two dimensional study of solar spectrum, discussing satellite observations of corona and upper chromosphere
02 p0329 A69-12785
- Mean annual intensity distribution of 5303 angstrom coronal line on solar limb determined for 11-year solar activity cycle
03 p0506 A69-13084
- Fraunhofer lines in solar spectrum in 2950-8770 A wavelength region, noting 8000 additional unidentified lines
03 p0507 A69-13170
- Line identification methods in solar extreme UV and X ray regions
03 p0507 A69-13171
- Electron temperature and concentration and solar UV absorption data from sounding rockets, estimating ion exchange rate, recombination coefficient and heat flux
03 p0422 A69-13508
- Solar emission line absorption by oxygen and nitrogen atomic lines, discussing effect on upper atmosphere composition measurements
03 p0425 A69-14019
- Analysis of equivalent widths as function of disk position for six photospheric neutral atomic oxygen Fraunhofer multiplets, noting O abundance
03 p0515 A69-14034
- Spectra of hydrides of Mg 25 and Mg 26 in photosphere, searching for weak lines on basis of isotope shifts
03 p0515 A69-14035
- Solar Fe abundance from photospheric permitted Fe and forbidden Fe II lines, noting equivalent widths of two Fe II lines
03 p0515 A69-14036
- Spectrum and diameter of source of slowly varying component of solar radio emission between 3.3 mm and 21 cm
03 p0516 A69-14045
- Solar microwave type 4 bursts spectra and decay rate time variations
04 p0648 A69-14364
- Time variations of chromospheric network of bright points covering solar disk in spectrograms, noting contrast and interspaces variation with 11-year solar cycle
04 p0651 A69-14372
- Balloon observations of solar far IR spectrum and brightness temperature
04 p0652 A69-14419
- Be I and Be II lines in solar spectra show no evidence for Be 7 and Be 10 in solar atmosphere
04 p0655 A69-14666
- Instrument profile of birefringent Lyot filter for H alpha line determined from photographic spectra with grating spectrograph
04 p0664 A69-15524
- Bright streaks in H alpha disk chromosphere, noting predominantly horizontal loop structures
04 p0664 A69-15525
- Lithium abundance determination difficulties for undisturbed solar photosphere, noting Li I resonance line identification and model choice
05 p0821 A69-15849

Lithium abundance in sunspots and undisturbed solar atmosphere from measurements of solar atmosphere and spot spectra

05 p0821 A69-15850

UV solar spectra observation, discussing coordination of ground based and satellite programs

05 p0822 A69-15861

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature

05 p0824 A69-16060

Limb darkening and central intensity of solar disk measured in UV

05 p0827 A69-16466

Continuum position location and total line absorption in solar spectrum, using Houtgast high dispersion intensity measurements of UV region

05 p0828 A69-16611

Mass motions in solar flares using line profiles and filtergrams

06 p0993 A69-17427

Solar moustaches H alpha profiles spectroscopic studies indicating near symmetry

06 p0994 A69-17435

Solar prominence structures observed in H alpha emission, determining radial velocities as function of distance from limb

06 p0994 A69-17436

Communications of Lunar and Planetary Laboratory, Volume 7, covering IR solar spectrum atlas reports and solar spectrometer for airborne IR observations

06 p1008 A69-17807

Arizona-NASA atlas of IR solar spectrum, reproducing photometric tracings obtained from CV-990 aircraft flights

06 p1008 A69-17808

IR solar spectrum tables and graphs covering 10,657-12,857 A

06 p1008 A69-17809

NASA atlas of IR solar spectrum, reporting B and 4 meter spectrometer recordings over band containing methane telluric absorptions

06 p1008 A69-17810

Beryllium abundance in solar atmosphere from spectra observed at Oslo Solar Observatory

06 p1010 A69-17971

Forbidden S I lines due to transitions within ground configuration identified in Fraunhofer spectrum of sun, noting photospheric abundance of S

07 p1217 A69-19237

Solar spectral line profiles for photosphere disturbed by short period acoustic waves

07 p1217 A69-19239

Central Fraunhofer line intensities near solar minimum compared to Soviet results for possible solar cycle variation

08 p1386 A69-20075

Scattered light reduction in sunspot photometry, noting eliminating effect when observing spectral lines or narrow spectral regions

08 p1389 A69-20251

Wing of solar line H-alpha for levels population of hydrogen atom in solar photosphere, discussing excitation temperature, absorption coefficient and thermodynamic equilibrium

08 p1390 A69-20394

Excitation cross sections of Fe XIV lines in solar coronal spectra, comparing computations with Coulomb-Born approximation

08 p1392 A69-20563

Spectrum variations of type 4 radio burst as source rises through solar corona, determining electron density and magnetic field distributions in corona

08 p1380 A69-20775

Chemical composition and element abundance in solar atmosphere and photosphere, noting solar absorption and emission and energy spectrum data

08 p1402 A69-20905

Solar element abundances from nucleosynthesis standpoint, discussing measurements with high resolution spectrometer used in double pass with intermediate slit

08 p1402 A69-20906

Present state of abundance determination in solar corona, discussing forbidden and UV lines analysis

08 p1402 A69-20907

Correlated spectra of related sunspot number and solar 10.7 cm radiation component, noting variance for solar rotation periods

09 p1574 A69-21397

Stigmatic profiles of solar C II doublet resonance lines obtained by rocket-borne echelle spectrograph

09 p1592 A69-21456

Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere

09 p1575 A69-21645

Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range

09 p1576 A69-21646

Outstanding solar type 4 radio burst from spectrographic records at metric and decametric wavelengths from Weissenau Observatory

09 p1578 A69-22157

Solar far UV emissions observed from OSO-C by grazing incidence grating spectrometer, noting temporal variations and atmospheric absorption characteristics

09 p1578 A69-22168

Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions

09 p1578 A69-22169

Solar soft X ray components observed with ion chamber photometer, studying components relation to transient and slowly varying phenomena at other wavelengths

09 p1578 A69-22170

Impulsive solar microwave bursts observed by parabolic reflector, obtaining bursts spectra and total flux density

09 p1579 A69-22178

Green and red coronal line polarization observed during solar eclipses, discussing nonpolarization of red line and observation instrument error

09 p1600 A69-22204

Rotational Raman scattering in planetary atmospheres, analyzing spectra of deep solar Fraunhofer lines

09 p1601 A69-22207

Stellar evolution, computing sequences to establish solar model of primordial composition, comparing models with spectroscopic observations

10 p1788 A69-24126

Mean absolute solar spectrum energy distribution from 1800 A to 4 mm, noting solar constant and radiation intensity determination

11 p1951 A69-24242

Solar quiescent prominences spectra with bright metallic lines, discussing turbulent angular velocity and kinematic temperature of filaments

11 p1945 A69-24387

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location

11 p1955 A69-24388

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations

11 p1955 A69-24389

Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks

11 p1958 A69-24591

Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control

11 p1884 A69-24838

Monograph on internal structure of sun corona covering variations in intensity and width of coronal lines, inhomogeneity, quasi-homogeneous and anisothermic coronas, etc

11 p1961 A69-25103

Solar X ray bursts analyzed by dynamic spectra based on time history of intensity of bursts

11 p1951 A69-25419

Relative intensities of selected Si two multiplets calculated and compared with solar spectrum and plasma source ZETA values

13 p2326 A69-27551

Atmosphere effects on solar IR spectra, discussing role of absorbing molecule distribution in transmittance calculations

13 p2341 A69-27589

Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum

13 p2341 A69-27591

Indium, Rb and Cs abundances obtained from sunspot spectra by comparison with Zr and Ti lines

13 p2343 A69-27626

Solar corona 5303 and 6374 A emission enhancements correlated to 169 MHz S-component, discussing coronal temperature

13 p2347 A69-27717

Solar 3 cm flux density sensitivity to physical conditions in solar atmosphere related to maximum excitation in flux density spectrum F gamma in active regions

13 p2327 A69-27721

Spectrometric and photometric investigation of spectral characteristics of large sunspot 45 degrees from solar disk center, tabulating characteristics of 134 spectral lines

13 p2218 A69-28324

Mean annual intensity distribution of 5303 A coronal line on solar limb determined for 11-year solar activity cycle

14 p2515 A69-28766

Absorption band observation near 0.43 mu in solar spectra and scattered radiation of sky, determining nontelluric origin

14 p2441 A69-29407

Arcturus and solar rubidium abundance compared using Mount Wilson photographic spectrograms of Arcturus

14 p2522 A69-29589

Fe and Ti line growth in 12 July 1961 solar flare spectrum, finding ionized titanium, neutral and ionized iron excitation temperatures

14 p2514 A69-29720

Source functions of IR Fraunhofer lines obtained using solar disk equivalent width method, noting LTE role

14 p2528 A69-29961

Ca II forbidden lines in photospheric spectrum identified with weak Fraunhofer line by photoelectric spectrometer scans

14 p2528 A69-29962

Solar rotation measured as function of latitude using Doppler compensator with magnetograph, noting daily rotation rate difference in H alpha and metallic lines

14 p2528 A69-29974

Solar ionizing radiation sources, discussing activity at sunspot minimum, temperature, density and solar wind effects, X ray and UV spectra, etc

15 p2673 A69-30007

Spectral emission of active prominences, showing looplike lines during quiet phases and differences in turbulent velocities magnitude

15 p2674 A69-30510

CO absorption lines in solar spectrum analyzed theoretically and experimentally indicating random distribution of molecules

15 p2688 A69-30552

Unsuccessful attempt to observe high charge ion lines generated by dielectronic recombination in solar corona at 5-cm wavelength

15 p2689 A69-30568

Solar Mg b and Na D line spectra, computing profiles for Doppler cores of lines for multilevel model atoms and selected chromospheric parameter ranges

15 p2693 A69-30779

Coronal limb enhancement photometric study by spectroheliograms, comparing maximum brightness profiles in lines of different temperature in extreme UV

15 p2693 A69-30781

Temperature and density models for coronal green line enhancements with and without magnetic field effects, using graded height spectrograms

15 p2693 A69-30782

Fe II forbidden lines profiles and equivalent widths prediction for solar photospheric spectrum, deducing photospheric Fe abundance

16 p2854 A69-31652

Center limb observations of Ca II emission core interpretations, discussing chromospheric thickness effects on Doppler width

16 p2854 A69-31653

Coronal Fe ionization lines X, XIII and XIV photographed by UV coronagraph

16 p2847 A69-31661

Chromospheric spectrum outside of eclipse, wave lengths 3040 to 9266 A, listing emission lines taken at McMath solar telescope

16 p2861 A69-32257

Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator

16 p2861 A69-32261

Solar image motion frequency spectra analysis via photoelectric equipment, showing influence on photographic pictures, spectra and modulation transfer functions for diffraction telescope

17 p3029 A69-33047

H alpha/D3 intensity ratio variations in peripheral regions of prominences may be due to dynamic conditions of material emitting radiations

17 p3029 A69-33051

Solar radio bursts spectra fine structure, discussing observations of fast drift storm, drift pair and split pair bursts

17 p3024 A69-33607

Power spectral analysis of chromospheric inhomogeneities in July 1967 and June 1968, tabulating mean heights of formation in solar atmosphere

17 p3040 A69-33811

Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines

17 p3025 A69-34224

Solar Fe II lines theoretical equivalent widths calculations, estimating influence of photosphere model on iron abundance data

18 p3191 A69-34305

Spectroheliograms interpretation obtained in line cores of neutral oxygen IR multiplets

18 p3204 A69-35388

Forbidden transitions in absorption spectra of sun and normal and peculiar stars

19 p3422 A69-36215

Forbidden lines in solar corona, discussing ionization equilibrium and excitation of levels in highly ionized atoms

19 p3422 A69-36216

Emission line spectrum for ionization and excitation in solar coronal structures, tabulating intensities from ground based eclipses observations

19 p3422 A69-36217

Solar rare earth abundances determined from high resolution tracings of solar spectrum, comparing results with nucleosynthesis theories

20 p3602 A69-37539

Solar atmosphere line source function showing frequency dependence as consequence of spectral line disappearance at solar limb

20 p3588 A69-37540

H alpha filtergrams and spectra of solar corona arch filament systems indicating downward and upward motions produced by magnetic field

20 p3588 A69-37543

Solar photography at extreme UV wavelengths using pinhole camera instrumentation on stabilized Skylark rocket

20 p3539 A69-37545

Solar far UV images systematic photometry for thin solar models in terms of quiet sun intensity

20 p3603 A69-37546

Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density

20 p3603 A69-37548

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature

20 p3591 A69-37970

Spectral characteristics of solar proton flare on 2 September 1966, noting light intensity variations

20 p3591 A69-38043

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity

20 p3607 A69-38045

Ce II line reversal from absorption to emission in solar spectrum, noting reversal position dependence on wavelength and line source function scattering term

20 p3613 A69-38168

Solar Fraunhofer spectrum, observing Fe 5576 and 6678, K 7699 and Ni 5436, 6129, 5847 and 6130 A lines

20 p3615 A69-38297

Sunspot size and shape in continuous spectrum regions from photometric observations in UV and red ranges

20 p3616 A69-38301

Atmospheric transmission determined in submillimeter solar radiation spectra using Bouguer law, identifying absorption lines in nocturnal and diurnal spectra

21 p3796 A69-38472

Revised solar iron abundance by photospheric Fe I lines analysis using Garz and Kock f values, noting influence on solar photospheric model

21 p3796 A69-38475

Intensity integral inversion for Doppler core of strong solar absorption lines to obtain line source function for solar atmosphere

21 p3796 A69-38478

Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency

21 p3796 A69-38479

Papers of Lunar and Planetary Laboratory, Volume 9, covering IR solar spectrum

21 p3800 A69-38681

Solar spectrum data covering wavelength intervals from 13138-14707 and 12187-17731 A and 1.4 micron water band

21 p3800 A69-38682

Solar IR spectrum recorded by LPL B spectrometer on NASA CV-990 aircraft using one micron grating, noting resolution

21 p3800 A69-38683

Trial and error procedure applied to instrumental profile of Liege Solar Atlas, convoluting instrumental profile with telluric A band profile

21 p3722 A69-38698

First order profile of Utrecht Solar Atlas from second order profile and oxygen band refining procedure, deducing instrumental profile for first order spectra

21 p3722 A69-38699

Solar X rays observations, describing instrumentation, radiation characteristics, association with flares, spectrum analysis, etc

21 p3791 A69-39506

Core profiles of H alpha, H beta, H and K from spectrograms of plagues

22 p4010 A69-39993

Tabulation of solar UV spectrum features between 3650 and 3000 A from intercomparison of photoelectric records and Second Revised Rowland, indicating wavelength relocations

22 p4014 A69-40146

Fourier spectrum analysis of solar line oscillation sequences, discussing power spectra and lifetime of oscillation phase

22 p4019 A69-40286

Solar Zeeman triplet for excited atomic state comparable to or shorter than Larmor precession period, discussing polarization

22 p4019 A69-40287

Solar Zeeman triplet pseudo-pi-component at 5250 A /Fe I/, using Unno theory to calculate visibility, contrast and displacement

22 p4019 A69-40289

Sunspot position in H alpha core relative to continuum, discussing height differences between H alpha core and continuum levels

22 p4019 A69-40291

Sunspot spectra near solar limb for difference between Fraunhofer line continuum and line core formation levels, finding geometrical height scale and pressure equilibrium

22 p4019 A69-40292

Medium sized solar radio events from peak intensities, spectrum characteristics and coronal magnetic field role

22 p4020 A69-40299

Solar He abundance determined from solar model photospheres line and continuum radiation

22 p4031 A69-40911

Solar constant and spectral irradiance curve for zero air mass obtained from aircraft measurements

23 p4216 A69-42191

Thermal continuum radiation from coronal plasmas at soft X ray wavelengths, investigating variations effect in element abundances

23 p4207 A69-42406

Solar flares accompanied X ray emission temporal and spectral variations, showing departure from thermal equilibrium

24 p4371 A69-43608

Solar X-ray spectrum as function of sunspot group type based on Solrad satellites flux data, discussing relationship to lower ionosphere characteristics variations

24 p4372 A69-43615

Total solar eclipse of 5 February 1962 observed for spectrophotometry of flash spectrum, finding abnormal intensity gradients of H alpha and D3 lines

24 p4388 A69-43636

Solar quiescent prominences spectra with bright metallic lines, discussing turbulent angular velocity and kinematic temperature of filaments

24 p4375 A69-43777

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location

24 p4390 A69-43778

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations

24 p4390 A69-43779

SOLAR SPECTROMETERS

Positive feedback of spring mass system for mirror control on spectroheliometer of Apollo Telescope Mount flight

02 p0248 A69-11738

Solar flare X ray line and continuum spectra measured with crystal spectrometers aboard orbiting solar observatory

02 p0308 A69-12297

Solar image or spectrum focal plane scanning technique with output beam displaced but undeviated relative to input beam for solar spectrophotometry

04 p0602 A69-15378

Solar radio spectroscopy for 40 to 240 MHz frequency range, noting dynamic spectra of solar radio bursts

06 p0925 A69-17318

Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners

06 p0883 A69-17841

IMP F and G solar cosmic ray spectrometer utilizing FET analog multiplier for onboard particle identification data processing

07 p1135 A69-19197

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph

07 p1217 A69-19241

Solar research from rockets and satellites, considering solar instruments including EUV spectrographs

10 p1772 A69-22867

Apollo telescope mount (ATM) for solar experiments conducted from manned earth orbiting laboratory

10 p1791 A69-22871

Laser beam for determining instrumental profile of high resolution double pass solar spectrograph, noting influence of slits width

11 p1893 A69-24431

Solar spectroscopic techniques, discussing instrumentation problems affecting photosphere line spectra, SNR in absorption spectra and near IR spectra

13 p2341 A69-27588

Guiding system of Spectro-Stratoscope /balloonborne solar telescope/, describing hydrostatic bearing and torque motor

13 p2262 A69-27957

Solar IR spectrum recorded by LPL B spectrometer on NASA CV-990 aircraft using one micron grating, noting resolution

21 p3800 A69-38683

Short region scanning of Arcturus spectrum with McMath solar spectrometer double pass system at Kitt Peak National Observatory compared to single pass system

21 p3721 A69-38697

Photoelectric spectrometer observations of 1966 total solar eclipse, discussing limb darkening curves for regions of continuum 1.5 A wide around 5728 and 6404 A

22 p4027 A69-40659

SOLAR STORMS

Solar noise storms structure and movement, discussing localization of type 1 burst emission into zones in solar corona

02 p0315 A69-11824

Nonlinear mechanism for solar surge involving rapid acceleration of high electrical conductivity and macroscopic dimension plasma regions

03 p0516 A69-14044

Solar type 4 bursts characteristics accounted for by cyclotron mechanism, assuming models of spot magnetic field configuration and electron density distribution

07 p1205 A69-18959

Solar outburst and storm accompanying 9 June 1968 flare, noting radio evidence for coronal instability before flare

09 p1582 A69-22747

Recurrent Forbush decrease association with proton enhancement, discussing energetic storm particle events

09 p1582 A69-22752

Solar radio emission sources position changes observed in solar storm center

17 p3024 A69-33805

Satellite observations of solar proton events with halo structure or energetic storm proton event and SSC, noting similarity in origin

20 p3589 A69-37555

SOLAR SYSTEM

Monograph on nature of planets and solar system origin covering meteorite observations and age determination, chondrite composition, metallic elements, etc

01 p0152 A69-10702

Solar system origin and evolution by future space mission experiments, discussing theories and mission objectives

01 p0153 A69-10823

[AAS PAPER 68-191]

Introduction to planetary physics, Terrestrial planets, covering solid interior constituents, solar system dynamics and origin and evolution
01 p0154 A69-10920

Stability characteristics of small and moderately sized short period Trojan librations in sun-Jupiter restricted three body problem
01 p0158 A69-11329

NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
02 p0200 A69-12804

French atlas of planets covering ancient and modern planetary system and discoveries, physical nature and movement, etc
03 p0513 A69-13778

Life probability and origin on Milky Way planets with emphasis on solar system, discussing molecular biology role
05 p0707 A69-15966

Solar system evolution, noting angular momentum in planets and solar system and hypothesis of gravitationally contracting gaseous nebula
05 p0826 A69-16389

Pu 244 and I 129 abundances in early solar system and continuous galactic synthesis model of element formation in stars
08 p1397 A69-20695

S-process nucleosynthesis and temperature averaged neutron capture cross sections studied in relation to solar system, considering elemental and specific isotopic abundances
08 p1357 A69-20896

Plutonium-244 existence in early solar system concluded from relative abundance ratios of excess meteoritic heavy Xe isotopes
08 p1401 A69-20900

Model for nucleosynthesis of Li, Be and B in solar system from mass spectrometric measurements of high energy proton production of light elements
08 p1401 A69-20901

Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars
08 p1401 A69-20903

Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908

Primitive elemental abundances in solar system, discussing composition of sun, meteorites and lunar maria
08 p1403 A69-20914

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissiogenic xenon and solar system nucleosynthesis
08 p1405 A69-20924

Meteoritic materials structure, composition and magnetic properties, supporting theory for solar system formation from supernova outbursts
09 p1593 A69-21581

Radar probing of solar system noting contributions to knowledge on planets
09 p1595 A69-21765

Solar system plasmas and X ray astronomy - Conference, Adelaide, Australia, August 1968
09 p1581 A69-22742

Primordial solar system chemical composition for studies of origin and evolution, compiling solar composition data
09 p1608 A69-22745

Radioactivity levels estimation at surface and in bulk of solar system planets caused by galactic and solar cosmic rays
10 p1756 A69-22813

Resonance relations of rotational and orbital frequencies of solar system planets and satellites estimated for statistical significance
10 p1771 A69-22852

Total planet interaction energy of comets passing through solar system, showing non-Gaussian shape of distribution
10 p1774 A69-22970

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
11 p1955 A69-24393

Monograph on world of planets covering solar planetary system, atmospheres, water, seasons, organic life, etc
11 p1958 A69-24666

Solar system age based on decay rate of natural radioactive elements
11 p1961 A69-24972

Jupiter red spot visibility, establishing partial dependence on solar activity
11 p1964 A69-25404

Solar system light elements investigated assuming Li, Be and B abundance as nuclear reaction products of high energy particles accelerated in early sun formation
13 p2354 A69-28495

Atmospheric dynamics parameters of Mercury, Venus, Mars and Jupiter, discussing generalized circulation theory
14 p2526 A69-29841

Comets considered as natural interplanetary space probes, stressing need for international cooperation on solar system studies
15 p2679 A69-30011

Interstellar particle penetration into solar system, discussing impact ionization of earth ionosphere by interstellar neutral hydrogen and helium
15 p2699 A69-31390

Outer planets exploration during 1976-80 period of unique solar system alignment
16 p2854 A69-31630

Tabulation of basic solar system data and formulas concerning trajectory length, escape velocity, orbits, etc
16 p2856 A69-32074

Solar system physical environments surveyed from exobiological viewpoint
17 p2907 A69-32968

Monograph on solar system space flight trajectory calculations covering solutions to differential equations, error analysis and gravitational effects
17 p3039 A69-33798

Protosun and solar system angular momentum losses analyzed from equations for convective star rotation change, noting almost total protosun initial momentum loss possibility
18 p3203 A69-35346

Meteorites data in planetary cosmogony, discussing iron meteorite ages, Xe retention in chondrites and synchronism of sun and protoplanetary cloud forming
19 p3406 A69-36075

Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes
19 p3406 A69-36076

Terrestrial planets high temperature evolution from solar system genesis theory, discussing meteorite chemical composition, petrography, mineralogy and age determination
19 p3407 A69-36079

Meteorite Li isotopic composition variations to determine neutron role in nucleosynthesis of solar system light elements
19 p3408 A69-36084

Solar system low energy particle flux at 2-3 AU distance during last 10 million years, discussing cosmic radiation flux
19 p3411 A69-36097

Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind
19 p3419 A69-36209

Radio and radar astronomy with reference to extragalactic sources and solar system, noting astronomical instrumentation
19 p3425 A69-36430

Soviet book on cosmos and hypotheses covering origin and physical characteristics of earth, moon, Venus and Mars
20 p3596 A69-37234

Moon composition and similarities to Mars explained by silicates in solar system raw material
20 p3604 A69-37563

Planet Mars opposition to earth, Jupiter and Saturn, including table showing Mars-Jupiter conjunctions
21 p3801 A69-38788

Chemical processes responsible for transformation of vast gas and dust cloud into planetary system
21 p3804 A69-39200

Optimum midcourse impulses effects on heliocentric launch window, comparing two and three impulse delta 5 performance for two and three dimensional solar system models
21 p3804 A69-39201

Stony meteorite composition and structure studied for conditions of preplanetary stage of solar system
22 p4012 A69-40084

Cometary nuclei composition as last samples of early solar system composition, discussing dirty snowball model and radical lifetime problem
22 p4013 A69-40097

Fractionation mechanisms in early phases of planetary evolution sought to explain abundance problem in terrestrial planets
22 p4018 A69-40185

Strategy for exploration of inner solar system leading to origin and history, detailing lunar exploration program
22 p4022 A69-40449

Antimatter motion in solar system and earth atmosphere, discussing vaporization and annihilation energy in collisions with interplanetary gas atoms
22 p4034 A69-41100

Nuclear propulsion for solar system exploration, discussing NERVA solid core nuclear fission rocket, nuclear-electric rockets and hybrid nuclear rocket/nuclear electric rocket systems
24 p4349 A69-42871

[AAS PAPER 69-330]
24 p4349 A69-42871

Mars and Venus flyby missions and Mercury planetary exploration plans, discussing future conditions permitting Jupiter, Saturn, Uranus, Neptune, Pluto flybys
24 p4384 A69-43137

Model for accumulation of earth and planets from primitive solar nebula, implying inhomogeneous chemical composition of bodies in solar system
24 p4385 A69-43215

Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
24 p4390 A69-43783

SOLAR VELOCITY

Tachoheliograph /modified spectroheliograph/ for obtaining two dimensional solar velocity maps, discussing construction and theory of operation
17 p3030 A69-33061

SOLAR WIND

VLF electric field measurements from 1 AU heliocentric orbit, noting field oscillations in solar wind and large amplitude HF noise bursts
01 p0035 A69-11224

Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
01 p0076 A69-11234

Free access of low energy galactic particles to solar wind lines of force due to stochastic nature of lines
01 p0147 A69-11238

Polar wind, describing upward plasma expansion of topside polar ionosphere and acceleration of positive H and He ions
01 p0077 A69-11239

Solar wind directional fluctuation derived from wavy structure of comet Morehouse ionic tail rays, noting solar wind bulk velocity
02 p0311 A69-11459

Planetary magnetic field measurements near Venus, Mars, and moon, noting magnetic dipole comparison with earth and solar wind interactions
02 p0311 A69-11471

[AAS PAPER 68-186]
02 p0311 A69-11471

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
02 p0306 A69-11657

Parameters of solar wind responsible for geomagnetic activity, relating magnetic storm features to physical structure of interplanetary space and solar wind bubbles
02 p0240 A69-11725

Subsolar magnetosphere dimensions from ground observations of geomagnetic micropulsation period changes during magnetosphere deformations caused by solar wind inhomogeneities
02 p0244 A69-12356

Collisionless plasma heating by hydromagnetic waves in solar wind
02 p0309 A69-12714

Aurora displays distribution over earth, analyzing magnetosphere dependence on astronomical orientation of geomagnetic field in relation to solar wind
02 p0247 A69-12772

Cosmic ray and solar wind properties, discussing solar wind measurements, interplanetary magnetic field and solar wind sounding by cosmic rays
03 p0500 A69-13355

Velocity dispersion and temperature anisotropy with respect to magnetic field direction, discussing inertial solar wind cooling effects
03 p0500 A69-13525

Solar wind turbulence properties deduced from radio astronomical measurements
03 p0502 A69-14001

High latitude electrons boundary dependent on geomagnetic axis orientation, noting role of coupling between solar wind and magnetosphere
03 p0502 A69-14003

Solar wind interaction with moon, discussing core/surface layer conductivity and lunar limb shock wave formation
03 p0502 A69-14006

Lunar wake in solar wind at large distances, noting no satellite evidence of lunar magnetic field and evidence for lunar generated turbulence
03 p0514 A69-14007

Solar wind abundance measurements at earth orbit related to solar corona
03 p0503 A69-14047

F 2 layer formation and fast neutral particles ionization source due to charge exchange between solar wind protons and moving interstellar hydrogen
04 p0592 A69-15009

Solar and interplanetary magnetic fields and plasmas, noting in situ observations by satellites and space probes of sector patterns, solar cosmic rays and wind
05 p0821 A69-15841

Detached lunar compression wave, noting positive evidence from solar wind flux and direction measurements near lunar wake
05 p0824 A69-16251

Solar wind electron component detection by plasma experiment on Pioneer 6, particularly class 2B flare and quiet period
05 p0816 A69-16275

Time independent solar wind equations applied to spherical symmetry and radial magnetic field at solar surface, noting thermal conductivity anisotropy
05 p0817 A69-16703

Solar wind directional fluctuations at middle heliographic latitude, comparing Vela satellite measurements with comet Morehouse tail beam undulations
06 p0985 A69-16981

Solar wind model for electrons and collisionless ions temperatures and anisotropies
06 p0986 A69-16983

Plasma physics in space research, discussing solar wind, planetary atmosphere bow shock and convective motions of magnetosphere plasma
[ISAS-431] 06 p1000 A69-17026

27-day cosmic ray intensity variations related to solar wind velocity nonuniformity due to longitudinal distribution of coronal active regions
06 p0990 A69-17292

Simulation of solar wind interaction with earth magnetic field, discussing selection of dimensionless parameters
06 p0919 A69-17550

Solar wind, discussing corona, radio sources, radio bursts, comet tails, cosmic rays, etc
06 p1012 A69-18239

Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma
07 p1215 A69-18832

High electron-proton temperature ratios effect on solar wind double shock wave structure, using one dimensional and two fluid models
07 p1205 A69-18849

Model experiment on plasma flow about obstacle to simulate solar wind interaction with moon
07 p1205 A69-18851

Magnetosphere dynamical properties, discussing atmosphere, ionosphere, magnetopause, magnetosheath, bow shock, solar wind, collisionless plasmas, etc
07 p1127 A69-19352

Solar wind and magnetosphere, discussing hydrodynamic expansion of solar corona
07 p1207 A69-19353

Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream
07 p1128 A69-19360

Solar wind, bow shock and magnetosheath observations by charged particle analyzers on Vela satellites
07 p1208 A69-19361

Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
07 p1128 A69-19364

Interplanetary scintillations of 3C 279 and CTA 21 combined to derive solar wind density fluctuation model, using random thin screen theory
08 p1385 A69-20069

Geomagnetic storms, substorms and auroral displays as functions of processes in solar wind and upper atmosphere
08 p1307 A69-20188

Long term modulation of cosmic rays by solar activity explained by Parker solar wind model, noting confirmation by direct satellite measurements
08 p1379 A69-20533

Solar wind model including effects of rotation, magnetic fields and anisotropic heat conduction
08 p1380 A69-20643

Chemical effects of solar wind and cosmic protons on solid bodies in space, discussing possible relation to origin of life
08 p1407 A69-20935

Captured particles magnetic drift envelopes in magnetosphere calculated by model considering perpendicular geomagnetic dipole to solar wind
09 p1574 A69-21521

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
09 p1575 A69-21524

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
09 p1592 A69-21540

Photoelectric ejection of grain electrons by solar quanta balance with solar wind electron capture by grain for interplanetary grain equilibrium potential
09 p1593 A69-21655

Interplanetary scintillation of radio sources to determine size and motion of plasma irregularities in solar wind for fine structure
09 p1594 A69-21658

Solar wind-magnetosphere pressure balance and proton density of solar wind
09 p1577 A69-21711

Galactic cosmic ray scattering and energy loss through solar wind interaction
09 p1580 A69-22202

Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
09 p1607 A69-22426

Cosmic ray variations as means of studying solar wind characteristics and interplanetary medium
10 p1755 A69-22811

Solar wind and galactic magnetic field buffer layer, analyzing cosmic rays effect and space-time distribution
10 p1757 A69-22825

Cosmic ray anisotropy and diurnal density variation, analyzing influence of interplanetary magnetic field and subsonic solar wind
10 p1757 A69-22828

Solar activity effect on interplanetary electromagnetic field according to cosmic ray modulation data, noting ineffective correlation and solar wind effects
10 p1759 A69-22841

Cosmic ray modulation by solar wind, discussing anisotropic diffusion during propagation through interstellar magnetic field
10 p1759 A69-22842

Asymmetrical solar wind volume variations of magnetic inhomogeneities and cosmic ray absorption in earth atmosphere, including barometric coefficients of neutron component
10 p1760 A69-22844

Primary cosmic rays, radiation belts and solar wind studies by semiconductor detectors installed on orbiting satellites
10 p1662 A69-23294

Ionospheric disturbances after July 7, 1966 proton flare noting flare ionizing radiation, high energy solar proton effects and low energy solar plasma
10 p1684 A69-23784

Steady state spherically symmetric model for solar plasma acceleration with distance, showing essential role of viscosity
10 p1769 A69-23899

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae
10 p1686 A69-23903

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes
10 p1741 A69-23961

Solar wind flux near earth observed by Venera 2 /1965/ and Venera 4 /1967/ probes, noting solar activity effects
10 p1771 A69-24201

Plasma and magnetic field measurements of tangential discontinuities in solar wind by Pioneer 6, considering velocity shears and rotation of sun
11 p1946 A69-24430

Solar wind particles acceleration and transformation into radiation belt particles
11 p1948 A69-24855

East-west asymmetry in solar wind velocity due to solar rotation effects on interaction between fast and slow streams
11 p1950 A69-25148

Solar oblateness and differential rotation time development due to solar wind torque
12 p2157 A69-26308

Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680

Solar wind interaction with geomagnetic field simulation practically unrealizable, discussing partial simulation covering neutral magnetic layer formation on night side
12 p2149 A69-26681

Solar wind interaction with geomagnetic field, considering bow shock, field confinement in magnetosphere and stretching out of lines of force
12 p2072 A69-26735

Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
12 p2150 A69-26736

Laboratory models for solar wind and magnetosphere interactions with similarity laws of Vlasov theory as reference system
12 p2150 A69-26737

Solar wind induced magnetospheric convection for interpretation of geomagnetic storms, aurora and trapped particle belts, noting electric fields
12 p2073 A69-26749

Solar-terrestrial environment, discussing mathematical development of solar wind, satellite measurement, magnetic storms, aurora and cosmic rays
12 p2161 A69-26941

Interplanetary scintillation and angular spectrum of radio waves scattered by solar plasma, noting magnetospheric tail and solar wind
12 p2161 A69-26942

Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
12 p2151 A69-26943

Magnetosphere model for plasma pressure by solar wind, discussing plasma drift from neutral sheet into geomagnetic tail
12 p2076 A69-27106

Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions
13 p2349 A69-27817

Cosmic ray propagation in interplanetary space taking into account reverse effect on solar wind, deriving integrodifferential equation
13 p2333 A69-28688

Correlation coefficients between radial components of interplanetary magnetic field and solar wind velocity from Mariner 5 data due to Alfvén waves
14 p2510 A69-28949

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents
14 p2512 A69-29041

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity
14 p2512 A69-29044

Solar wind quiet state thermal properties and chemical composition compared with coronal expansion hydrodynamic model predictions
14 p2513 A69-29098

Electron plasma oscillations and electron whistler of solar wind near Jupiter orbit
14 p2513 A69-29115

Magnetospheric plasma motion associated with Alfvén mode time fluctuations of magnetic field in solar wind
14 p2521 A69-29382

Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory
14 p2515 A69-29967

Convergent solutions of inviscid solar wind equations in expansions form including dimensionless distance from sun
14 p2515 A69-29968

Asymptotic power series solutions of viscous solar wind equations
14 p2515 A69-29969

Solar wind Helmholtz-type velocity discontinuities, noting plasma density and temperature stabilities from Explorer 34 observations
14 p2515 A69-29971

Solar wind origins, discussing corona composition, corpuscular streams, R and M disturbances, etc
15 p2673 A69-30009

Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
15 p2679 A69-30010

Cosmic ray variation theory, presenting data on coupling of solar activity with large scale characteristics of solar wind during 11-year cycle
15 p2673 A69-30015

Solar wind and solar breeze theories distinguished, discussing applications to geocoronal hydrogen emission and solar corona expansion
15 p2676 A69-30858

Neutral point theory applied to solar wind and magnetospheric physics, discussing magnetic field reconstructions
16 p2846 A69-31596

Solar wind direction by analysis of data from IMP 1 satellite, noting anticorotation tendency
16 p2847 A69-31962

Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI
16 p2847 A69-31963

Interplanetary magnetic field radial dependence from Mariner 4 measurements between earth and Mars, indicating fluctuations produced by dynamic processes in solar wind
16 p2856 A69-31964

Numerical simulation of flare generated shock wave propagation through solar wind, noting transit time and shock strength agreement with observations
16 p2848 A69-31970

Electrostatic heating of solar wind ions from instability in two fluid solar wind model leading to preferential heating of protons over electrons
16 p2848 A69-31971

Solar wind speed transverse variation effect on cosmic ray intensity at earth analyzed using mathematical model
16 p2849 A69-32088

Solar wind velocity distribution anisotropy at earth explained by low density
16 p2849 A69-32097

Captured particles magnetic drift envelopes in magnetosphere calculated by model, considering perpendicular geomagnetic dipole to solar wind
16 p2851 A69-32516

Approximate solution of nonlinear differential equation describing interaction between galactic cosmic rays and solar wind, obtaining four domains
16 p2851 A69-32519

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma
16 p2864 A69-32535

Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments [AIAA PAPER 69-642]
17 p2991 A69-33273

Solar wind phenomenon, discussing angular momentum loss to sun, fluctuations at earth orbit and wind conditions at terminus and regions unvisited by spacecraft
17 p3023 A69-33370

European highly eccentric orbit satellite /HEOS/ cisunar probe to explore interplanetary space for magnetic fields, cosmic radiation, solar wind and earth shock wave
17 p3050 A69-33397

Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments [AIAA PAPER 69-641]
17 p2993 A69-33762

Magnetized solar wind model to evaluate temperature, density, velocity and magnetic field for various boundary conditions
17 p3041 A69-33812

Gas particle concentrations on moon due to solar wind, surface emissions and atmospheric contamination by lunar operations and rocket motor products
18 p3189 A69-34236

Solar wind model for studying long wavelength turbulence as heat source for alpha particles and protons in solar plasma
18 p3186 A69-34299

Cosmic ray intensity short term stochastic variations in solar system related to turbulent solar wind day-to-day variations
18 p3186 A69-34300

Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
18 p3186 A69-34301

Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
18 p3128 A69-34947

Comet-solar wind interaction model, determining contact discontinuity size and shape around comet nucleus and ion specular reflection
18 p3188 A69-35190

Finite electrical conductivity effect on sun angular momentum loss due to solar wind
18 p3189 A69-35398

Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind
19 p3419 A69-36209

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form
19 p3396 A69-36631

Spherical, cylindrical and toroidal electrostatic analyzers with symmetrical angular characteristics for solar wind investigations
19 p3396 A69-36632

Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition
20 p3594 A69-37018

Solar wind velocity cycles from fluid MHD viewpoint, applying Kelvin theorem on circulation stability in closed fluid system
20 p3587 A69-37041

Comet tails orientation determination for solar wind and interplanetary plasma investigation, considering geometrical difficulties and suggesting computation procedure
20 p3599 A69-37467

Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions
20 p3609 A69-38095

Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions
21 p3794 A69-38379

Venus magnetosphere induced by piling up magnetic field from solar wind due to ionospheric conductivity and collisions with planetary atmospheric particles
21 p3794 A69-38381

Helium in atmosphere, aurora and solar wind, discussing geophysical problems, interplanetary neutral H, etc
21 p3710 A69-38509

Geomagnetic field horizontal component daily variations in relation to solar wind, noting effects of ambient field night side decrease
21 p3714 A69-38549

Interstellar matter, considering objects size, solar wind structure, galactic parameters, magnetic fields and cosmic ray heating
21 p3802 A69-38819

Hydrodynamic equations for radial solar wind expansion linearized and specialized to treat co-rotating perturbations
22 p4003 A69-40302

Solar wind north-south component sector dependent asymmetry implied from tangential discontinuities orientations as observed by Mariner 4
22 p4004 A69-40303

Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations
22 p4020 A69-40304

Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
22 p4004 A69-40305

Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations
22 p4023 A69-40518

Charge exchange of solar wind protons passing shock front, noting turbulent subsonic motion of randomized hot solar wind protons in shadow cone
22 p4008 A69-41208

Solar wind sample collection, describing experiment to determine ion flux capture efficiency for various metal foils
23 p4205 A69-41539

Outer anisotropic galactic cosmic particle flux distortion in interplanetary space, analyzing scattering in solar wind by isotropic diffusion equations
23 p4205 A69-41837

Cosmic ray flux intensity increases, discussing effects of solar wind, corpuscular flux velocity and interplanetary magnetic field
23 p4205 A69-41838

Disagreement between Mariner 2 and IMP 1 data concerning interrelation between solar wind velocity and geomagnetism ascribed to instrumental errors and changes in magnetospheric properties
23 p4205 A69-41848

Interplanetary magnetic field role in interaction between terrestrial magnetosphere, solar plasma and solar flux energy transfer
23 p4214 A69-41865

Solar wind kinetic energy density using geomagnetic field horizontal component daily variation, treating earth as plasma probe
24 p4308 A69-42968

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere
24 p4368 A69-43178

Thermal nonequilibrium state and effective collision frequency between protons and electrons in solar wind plasma, explaining abnormal dissipation
24 p4368 A69-43187

Primordial hydrogen and helium concentration in Pesyanoe meteorite measured by gas chromatography, indicating solar wind injection source
24 p4384 A69-43213

Magnetic dipole field variations effects on planetary atmosphere erosion by solar wind, discussing Mars and Venus atmospheres above ionosphere
24 p4385 A69-43224

Solar wind disturbances associated with flares
24 p4373 A69-43620

SOLAR X-RAYS

Solar X-ray high activity level during spring 1966 connected with gamma type magnetic solar regions and correlated with ionospheric effects
01 p0146 A69-11119

Solar X ray flare absolute flux correction, taking into account geometric obliquity factor variation with angle between satellite spin axis and satellite-sun line
01 p0147 A69-11242

Sudden ionospheric disturbance development and characteristics of solar cosmic ray flares, associated X ray emissions and high energy particle generation
02 p0308 A69-12398

Line identification methods in solar extreme UV and X ray regions
03 p0507 A69-13171

Solar X ray control of D layer based on Explorer 33 data, computing electron production rates due to typical X ray flux
03 p0500 A69-13224

Solar X ray flares measurement by rocket and satellite, discussing X ray spectrum hardening, hard flares and SID
03 p0500 A69-13225

Coronal X ray emission near limbs in 16-40 A during solar eclipse
04 p0650 A69-15531

Solar X ray source identification using D layer ionization behavior during eclipse
04 p0650 A69-15533

Electromagnetic radiation from solar flares based on rocket and satellite observations of 10-100 kev X ray emission and ground observation of cm-wavelength bursts
05 p0813 A69-15603

X ray astronomy techniques, discussing X ray spectrographs, heliographs and nonsolar celestial X ray sources
05 p0762 A69-15840

Isotropic background cosmic X ray flux measurements using low latitude balloon to minimize atmospheric background, obtaining hard solar X ray flux upper limits
06 p0992 A69-17311

Solar eclipse variations of E layer critical frequency explained by quasi-equilibrium between electron density and ionizing soft X ray radiation
07 p1204 A69-18823

Solar X ray bursts decay curves and spectra in 10 to 150 kev range interpreted as hot coronal condensation during flare and electron bremsstrahlung
07 p1206 A69-19250

Atlas of energetic solar flare X rays and tentative atlas of proton events observed by OGO-1 and OGO-3 ionization chambers
07 p1206 A69-19251

Solar corona X ray emission during flares and under quiet sun conditions investigated by satellite with X ray heliograph

07 p1210 A69-19614

Spectral intensities and time variations of solar X ray bursts, discussing model for high energy flare plasma and resulting X ray flare

08 p1379 A69-20532

Correlated microwave and energetic X ray emission from solar flare with 16-sec periodic pulsations, discussing energy during modulation peaks

09 p1574 A69-21457

Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions

09 p1578 A69-22169

Solar soft X ray components observed with ion chamber photometer, studying components relation to transient and slowly varying phenomena at other wavelengths

09 p1578 A69-22170

Solar and cosmic X rays observed by OSO-C, stressing galaxy M 87 upper limits and Lupus XR-1 power law spectral form

09 p1578 A69-22171

Hard solar and cosmic X rays measured with satellite-borne telescope, considering flux and time variations

09 p1579 A69-22173

Hard X ray event spectrum representation by thermal bremsstrahlung spectrum emitted by energetic electrons, determining various physical parameters of source

09 p1579 A69-22180

Peaks and time intensity profile of energetic X rays and cosmic rays observed by OGO-C ion chamber on May 23, 1967 flare event

09 p1579 A69-22182

Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares

09 p1580 A69-22203

K alpha lines in solar soft X ray spectra noting instrumental effect

09 p1580 A69-22232

Solar X ray bursts observed by proportional counter on IMP-F satellite to correlate optical H alpha flares and radio bursts

09 p1582 A69-22746

Explorer 30 satellite monitoring of solar X ray emission during July 1-15 1966, noting plage region activation with increasing emission

10 p1763 A69-23736

Sudden ionospheric disturbance effects of solar X ray emission from active region with proton flare

10 p1764 A69-23744

Variable solar X ray emission from subflare activity in plage region producing polar cap absorption proton flare of July 7, 1966

10 p1764 A69-23745

Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin

10 p1766 A69-23753

Solar X ray flare of July 7, 1966 with Explorer 33 satellite attributed to McMath plage region 8362, discussing solar and cosmic radio noise

10 p1766 A69-23754

Solar X ray emission and decay during proton flare of July 7, 1966 noting start of polar cap absorption

10 p1766 A69-23755

X ray and extreme UV radiation deduced from sudden ionospheric disturbances during proton flare, discussing time dependence of emission

10 p1766 A69-23756

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations

11 p1950 A69-25160

Solar X ray bursts analyzed by dynamic spectra based on time history of intensity of bursts

11 p1951 A69-25419

Iono-index about hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions

12 p2148 A69-26107

Proportional counter array for detection of soft X ray photons from OSO-4 observations, discussing solar event energy spectra

12 p2151 A69-26936

Solar X ray flux deduced from flare effects on VLF propagation, showing total energy content as measure of ionizing radiation

14 p2411 A69-29105

Solar X rays intensity and spectrum effects on c layer critical frequency and D region ionospheric absorption

15 p2677 A69-31346

Explorer 33 and Explorer 35 observations of solar flare of 8 July 1969 soft X rays, discussing absolute flux

16 p2849 A69-31988

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances

17 p2959 A69-33006

Center to limb variation of solar hard X ray bursts, suggesting inverse Compton effect and bremsstrahlung from anisotropic electrons

17 p3023 A69-33055

Solar eclipse of 20 May 1966, comparing satellite-borne X ray and UV photometry with radio astronomical observations

17 p3023 A69-33058

Pulse height distributions, gain and counting rate characteristics of two magnetic strip multipliers and two channel multipliers in 1.5 to 44 A region of soft solar X-rays

17 p2972 A69-33082

Solar soft X ray bursts observed by Solrad 8 satellite, considering relationship to microwave radio bursts

17 p3025 A69-34055

Solar flares with subcosmic radiation in proton active region of May 1967, discussing X ray emission effects, calculating D region recombination coefficient and electron concentration

17 p3025 A69-34226

Geomagnetic crochets time relations to solar X rays, radio bursts and flares

17 p3025 A69-34227

Solar flares less than 10 A X rays effect on ionospheric ionization between 60 and 100 km

19 p3397 A69-36754

X ray data in 44-60, 8-16 and 1-8 A bands telemetered by Solrad 9 satellite

20 p3588 A69-37473

Solar flares microwave and hard X ray bursts, discussing gyrosynchrotron plasma, nonthermal electron bremsstrahlung and electron relaxation

20 p3589 A69-37551

Solar hard and soft X rays time-intensity profiles showing homology with centimeter radio bursts, suggesting origin from same electrons

20 p3589 A69-37553

X ray heliography by Fresnel-Soret type zoneplate camera to obtain solar photographs from rockets

20 p3544 A69-37803

Solar X-ray events observed by scintillation counter telescope on OSO 3 satellite, discussing X ray spectra during burst initial and decay phases

20 p3593 A69-38166

Solar X rays observations, describing instrumentation, radiation characteristics, association with flares, spectrum analysis, etc

21 p3791 A69-39506

Anomalous X ray signals from Explorer 30 satellite showing saturation in ionization chamber possibly due to enhanced solar and atmospheric X rays

21 p3792 A69-39808

Solar soft X rays observed from OSO-3, correlating to solar flares and radio bursts

22 p4003 A69-40297

Explorer 30 /Solrad 8/ satellite observation of 0.5-3 A solar X ray emission related to magnetic configuration in sunspot group

22 p4003 A69-40298

Identification, position and temperature of solar X ray sources derived from D layer ionization radio absorption behavior during eclipses and lunar reflection

22 p4004 A69-40308

Atmospheric ionization rates due to attenuation of 1-100 A nonflare solar X rays, giving solar fluxes and absorption cross sections

22 p4004 A69-40447

Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements

22 p4004 A69-40504

Solar X ray detector aboard OGO 5 satellite observing two components in energetic solar X ray bursts, attributing impulsive component to bremsstrahlung

22 p4007 A69-40775

Solar L alpha and X ray emission contribution to lower ionosphere ion production, discussing altitudinal, latitudinal and temporal variations

22 p4008 A69-41096

Solar flares spectra X ray portion, considering spatial distribution, relation to magnetic fields and time sequence of emitting region

24 p4366 A69-42688

Solar flares accompanied X ray emission temporal and spectral variations, showing departure from thermal equilibrium

24 p4371 A69-43608

Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts

24 p4371 A69-43609

Time structure of solar X ray bursts from OSO 3 satellite observations showing impulsive and gradual components

24 p4371 A69-43610

Solar X ray flux measurements from OGO 4, comparing peak fluxes before, during and after flares with IQSY data

24 p4371 A69-43611

Solar X ray bursts decay curves and spectra in 10 to 150 kev range interpreted as hot coronal condensation during flare and electron bremsstrahlung

24 p4372 A69-43613

Solar flare-associated radio bursts, reviewing solar radio measurements based on X ray and particle observations

24 p4372 A69-43614

Solar X-ray spectrum as function of sunspot group type based on Solrad satellites flux data, discussing relationship to lower ionosphere characteristics variations

24 p4372 A69-43615

SOLDERED JOINTS

Hysteresis properties of membrane structures with soldered or rolled edges noting superiority of added elastic element in clamped area

01 p0087 A69-10828

Solder joint cracking in discrete component assemblies, discussing cracking mechanism and crack elimination methods

07 p1140 A69-19102

Wave soldering reliability and cost saving potential in miniature circuits manufacture for aerospace applications, noting process control and machine design relationship

18 p3146 A69-34512

Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling

23 p4070 A69-42274

SOLDERING

Microsoldering techniques for thin and thick film hybrid circuits and microminiature printed circuit boards

09 p1510 A69-22349

Wire-wrap solderless joints production technology in electronic equipment

16 p2763 A69-32579

Wave soldering reliability and cost saving potential in miniature circuits manufacture for aerospace applications, noting process control and machine design relationship

18 p3146 A69-34512

Diffusion welding and soldering of metallic wire with graphite and graphitized viscose applied to chromel, copel, chromel-alumel, Mo, W and W-Re

21 p3728 A69-38617

SOLENOIDS

High homogeneity sixth order superconducting solenoids with coil inner surface notch correction, describing graphical design techniques

10 p1665 A69-23857

Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems

12 p2016 A69-26497

Book on solenoid magnet design covering magnetic and mechanical aspects of resistive and superconducting systems

20 p3464 A69-37145

SOLID ARGON

U SOLIDIFIED GASES

SOLID LUBRICANTS

Synthetic solid lubricants impurity detection by X ray diffraction and oxidation thermogravimetry

01 p0102 A69-10909

Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures [ASLE PREPRINT 68AM 7C-2]

01 p0087 A69-10912

Atmospheric influence on friction endurance of solid powdered lubricants at constant layer thickness [IME PAPER 3]

07 p1138 A69-18563

Surface finish and hardness effects on wear life of inorganic solid lubricant film [ASLE PREPRINT 68AM 7C-3]

07 p1139 A69-18623

Film thickness effect on wear life of resin bonded solid lubricant film compared for various load test conditions [ASLE PREPRINT 68AM 7C-4]

07 p1139 A69-18624

Solid lubricant compacts for ball bearing separator materials, describing fabrication, design and friction and wear properties in air and vacuum
[ASLE PAPER 68-LC-16] 07 p1139 A69-18626

Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] 07 p1140 A69-19308

Antifriction characteristics of hard lubricating coatings based on molybdenum disulfide and graphite in inert gas atmosphere and vacuum, determining thermal stability temperature ranges
13 p2269 A69-28053

Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
14 p2454 A69-29001

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests
15 p2642 A69-30328

Solid lubricant films friction and wear life determined under various conditions of contact, temperature, load and atmosphere
[ASLE PREPRINT 69AM 6C-1] 15 p2619 A69-30471

Load, speed and coating thickness effect on wear life of resin bonded solid lubricant, using oscillating motion and low pressure blocks
[ASLE PREPRINT 69AM 5C-3] 15 p2619 A69-30474

Microfibrous boehmite as binder for molybdenum disulfide in formation of ductile water resistant dry lubricant films
[ASLE PAPER 68-LC-14] 15 p2642 A69-30606

Solid lubricants on molybdenum disulfide base at various temperatures and low pressures, noting film mass losses and possible use with organic materials under high vacuum
16 p2793 A69-31561

Load capacities of graphite lined journal bearings, discussing factors affecting wear rates
[SAWE PAPER 68-LC-9] 18 p3148 A69-35002

Molybdenum disulfide dry film lubricant wear theory and test correlation problems, considering sintering self propagation due to chemical effect of environment
19 p3323 A69-35580

Low temperature adhesive shear tests to measure force to break ice away from stainless steel surfaces coated with various bonded solid lubricants
19 p3323 A69-35581

Wear protection of pressure loaded Ti-Mn alloy by heat diffused lubricated electrodeless Ni coatings
24 p4331 A69-42786

Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions
24 p4321 A69-43126

SOLID NITROGEN

U SOLIDIFIED GASES

SOLID PHASES

A15 type phase in vapor deposited W-Re alloys identified by X ray diffraction, metallography and hardness measurements
01 p0098 A69-10649

Sulfur organic compound formation effect on composition and structure of solid phase formed during hydrocarbon jet fuels oxidation
01 p0142 A69-11097

Nickel-rich region of Al-Ni-Y ternary system, emphasizing identification of solid phase equilibria through analysis of equilibrated alloy specimens
02 p0265 A69-12004

Book on properties of liquid and solid helium 3 and 4 physical characteristics, phase behavior and experimental techniques
04 p0630 A69-14688

Structural microheterogeneities in monophase Ti alpha alloys, using complex phase analysis method
04 p0617 A69-14939

Martensitic transformation in Ti-Al-Mo alloys, noting specific features and effects of Mo content
04 p0617 A69-14940

Solid phase equilibria in nickel-aluminum-scandium system at 1000 C
05 p0779 A69-15833

Chemical composition and phase identification in commercial grades of cemented carbides
05 p0780 A69-15989

Transient temperature distribution for finite slab in phase transformations via single face temperature changes
[ASME PAPER 68-WA/HT-37] 05 p0848 A69-16128

Ti alloy beta phase variations in quantity, composition and dispersion during quenching, thermomechanical treatment and aging
07 p1163 A69-18777

Thermodynamic consequences of Lindemann mechanism for fusion of pure body, discussing application to isolated equilibrium system of solid and liquid phases
07 p1242 A69-19322

Structure of spinodal decomposition in Al-Zn alloys by X ray diffraction noting anisotropy, periodicity and stability
09 p1522 A69-21502

Microstructure for spinodal decomposition in Al-Zn alloys noting Zn precipitation, fracture mechanics, dislocations and transmission electron microscopy results
09 p1522 A69-21503

Nonmetalized composite propellant solid phase heterogeneities effect on oscillatory combustion, inducing coherent burning rate oscillations with external pressure oscillations
09 p1622 A69-22085

V phase structure and V and E phase lattice constants for ternary systems /Ti, Zr, Nb or Ta/-Ni, Co or Fe/-Si or Ge/
10 p1708 A69-22992

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations
10 p1776 A69-23214

Solid hydrogen condensation on graphite grains for microwave background, discussing hydrogen grain promotion of galactic and stellar formation
10 p1776 A69-23216

Near boundary zones in VT15 Ti alloy not involved in beta phase decomposition during aging below 500 C attributed to vacancy concentration decrease
11 p1902 A69-24275

Hydrogen solubility in solid and liquid Ti close to melting point, showing no effect on welds and castings porosity
11 p1905 A69-24963

Solid titanium surface energy determination, taking into account grain boundaries effect on accuracy
12 p2113 A69-26045

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures
13 p2277 A69-27405

Quantitative separation of elements in gamma prime from precipitation hardened high temperature nickel-base alloys by anodic dissolution
13 p2277 A69-27408

Thermal conductivity prediction technique for two and three phase solid heterogeneous mixtures
13 p2378 A69-28337

Mu phase lattice constants and cell volume in Nb-Zn system
15 p2636 A69-30086

Crystal structures of intermediate phases in La-Co and Nd-Co systems by powder X ray diffraction technique
15 p2667 A69-30087

Creep experiments on Mg alloys, discussing dispersed phases influence on creep cavitation and grain boundaries mobility
17 p2985 A69-32907

Orientation relationships between phases in Co-TaC pseudobinary eutectic alloy, discussing Co fcc-hcp allotropic transformation
[ONERA-TP-714] 17 p2988 A69-33395

Gaseous and solid phase properties of atomic and molecular systems, treating statistical energy distribution, kinetics, excited states and relaxation
18 p3178 A69-35406

Sigma phase and temperature effects on toughness of austenitic stainless steel weldments
18 p3150 A69-35429

Ti sub 3, Rh sub 5 and Hf sub 3, Rh sub 5 existence and isomorphism confirmed by crystallographic and X ray methods
19 p3343 A69-35920

Ti transition metals alloys omega phase precipitation, discussing composition, morphology, coherency, formation, etc
19 p3344 A69-35928

Cosmic ray produced radionuclides P 32, Cl 36, Ar 37 and Ar 39 determined in separate mineral phases of meteorites, emphasizing ratios in metals
19 p3410 A69-36094

Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
19 p3346 A69-36440

Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions
19 p3383 A69-36445

Electrical conductivity of rare earth metals La, Ce, Pr and Nd in solid and liquid states by rotating magnetic field method
21 p3781 A69-39070

Soviet book on heat treatment of Ti alloys emphasizing structural and phase composition changes
21 p3749 A69-39526

Hydrogen permeability in Pd alpha phase measured, coupling with grain size measurements for grain boundary to bulk diffusivity ratio
23 p4175 A69-41502

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites
24 p4361 A69-42993

SOLID PROPELLANT IGNITION

Temperature distribution and vaporization rate boundary conditions on metal particle surface during preignition heating in oxygen containing medium
02 p0355 A69-12670

Ignition pressure transient for solid propellant rockets predicted by computer program
[WSCIP PAPER 68-35] 07 p1203 A69-18352

Composite solid propellants ignition response measured by imbedded hot wires indicating distributed reaction
[WSCIP PAPER 68-36] 07 p1201 A69-18354

One dimensional lattice model for heterogeneous explosive detonation, discussing hot spots, grain burning ignition time, ignition site types and RDX detonation
[WSCIP PAPER 68-30] 07 p1240 A69-18357

Igniter design guidelines, types and characteristics of igniter materials
[WSCIP PAPER 68-32] 07 p1202 A69-18361

Ammonium perchlorate exothermic decomposition control noting effects of preheating and ammonium fluoborate additives
[WSCIP PAPER 68-25] 07 p1202 A69-18363

Empirical and analytic modeling of propellant role in ignition, discussing ignition transient prediction to describe propellant ignitability characteristics
[WSCIP PAPER 68-34] 07 p1202 A69-18364

Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading
[WSCIP PAPER 68-33] 07 p1203 A69-18365

Aluminum effect on ammonium perchlorate/polyformaldehyde mixtures combustion properties noting heat transfer decrease into k phase
08 p1375 A69-20338

Hypergolic filling materials for solid fuels with hybrid propellant combinations, discussing ignition and combustion of ethylenimine derivatives
10 p1753 A69-24023

Flame front propagation over solid fuel surface with hot igniting material injected into end-to-end cavity, discussing heat transfer by convection and radiation
11 p2001 A69-25193

Theoretical model of homogeneous solid propellant ignition in neutral nonflow environment, discussing ignition time
13 p2324 A69-28218

Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule
16 p2877 A69-31896

Solid fuel ignition with gaseous oxygen in presence of copper chromate and other catalysts
16 p2829 A69-31913

Accidental ignition during solid propellant processing in terms of hazard to facilities and personnel, emphasizing mixing operation
16 p2829 A69-31993

Solid propellant rocket motors ignition and igniter performance, discussing ignition interior ballistics
16 p2829 A69-31997

Combustion of isolated aluminum particles ignited by laser and burning in controlled gas mixture observed by cinephotomicrography
[WSCIP PAPER 69-3] 16 p2830 A69-32344

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching
[AIAA PAPER 69-444] 16 p2842 A69-32695

Gas phase ignition shock tube analysis of solid propellant taking into account changing surface temperature and fuel vapor consumption
18 p3183 A69-34463

SOLID PROPELLANT ROCKET ENGINES

Combustion instabilities in solid propellant rocket engines, emphasizing acoustic types for longitudinal and tangential modes

02 p0303 A69-11531

Multipulse thruster module design and development tests for spacecraft attitude control, noting micropulse solid propellant rocket motor

02 p0194 A69-11762

Combustion oscillations in liquid and solid propellant engines, noting destructive effect of LF vibrations and acoustic instability

02 p0305 A69-12494

Pressure and velocity couplings effects on oscillatory and transient motions in solid propellant rocket motors, emphasizing unsteady burning calculations

02 p0305 A69-12501

Solid propellant rocket engine designs for ELDO-PAS apogee motors, discussing use of advanced materials to improve mass ratio and strap-on boosters

03 p0495 A69-12890

Apogee stage and strap-on booster applications of solid propellant rocket motors, discussing configuration, functioning and performance

03 p0494 A69-12891

Solid propellant rocket motor thrust vector control by swiveling or gimbaled exhaust nozzles or by secondary injection

03 p0495 A69-12892

Solid propellants formulation, processing physical properties, testing and rocket motor inspection

04 p0646 A69-14583

Sublimation solid reaction control, discussing propellants, nozzle performance, sublimation area, power, pressure drop, response and valueless design [AIAA PAPER 68-516]

04 p0552 A69-15322

Soviet book on gas dynamics of solid fuel rocket motors covering combustion chamber flow, nozzle and thrust characteristics, pressure relaxation and channel charge

04 p0647 A69-15493

Material requirements for uncooled nozzles of solid propellant rocket motors burning aluminized propellants, discussing successful testing of pyrolytic graphite

06 p0946 A69-17530

Test program for solid propellant rockets capability to withstand space environments

06 p0982 A69-17594

Scout launch vehicle for launching small research satellites in near earth orbits, describing solid propellant stages, guidance, telemetry and beacon systems

06 p1016 A69-17597

Tank collection and spectrophotometric tests in determining aluminum oxide particle size produced by small rocket engine [AIAA PAPER 69-146]

06 p0984 A69-18117

Ignition pressure transient for solid propellant rockets predicted by computer program [WSCI PAPER 68-35]

07 p1203 A69-18352

Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading [WSCI PAPER 68-33]

07 p1203 A69-18365

Direction changing of large solid propellant motors by changing jets angle or gas injection

07 p1230 A69-19291

Optical absorption index for molten beryllium oxide based on measurements of small beryllium/ solid propellant rocket motor exhaust plumes

08 p1351 A69-20149

Variation in spinning velocity around axis of last stage of solid propellant rocket in flight

08 p1409 A69-20160

Pyrotechnical devices for two stage solid propellant ballistic rocket, discussing self priming electric cells and auxiliary power and gas generators

10 p1752 A69-23024

Hot gas ignition devices for solid propellant rocket motors, discussing ignition rod and microrockets

10 p1752 A69-23025

Rocket motors for ejection of instruments from sounding rocket payloads, considering powder cartridges and solid propellant motor characteristics

10 p1635 A69-23032

Solid propellant motors nozzle design, analyzing structural and material problems, high temperature exhaust gases effects, thermal insulation, etc

10 p1716 A69-23403

Fluidic secondary injection thrust vector control systems for solid propellant and hydrogen-oxygen rocket engines

10 p1753 A69-23561

Solid propellant rockets, discussing composite and double base propellants and use of polymers

11 p1941 A69-25588

Combustion instability problems in rocket motors, emphasizing strongly coupled pressure oscillations in combustion chambers

11 p2003 A69-25597

Solid propellant rocket engine design for combustion stability, discussing length, pulse induced and acoustic instability types [AIAA PAPER 68-532]

12 p2191 A69-26788

Soviet book on solid propellant guided/unguided rocket design with emphasis on thrust control, including trajectory calculations, optimal parameters and components estimation by weight analysis

12 p2175 A69-27077

Gun projectiles assisted by solid propellant motor to increase range, discussing construction, performance and free-wheeling rotation band use

15 p2702 A69-30592

Chemical processing for manufacture of solid propellant motors, discussing mixing, casting and curing of composite propellants

16 p2829 A69-31992

Solid fuel rocket engine thrust and chamber pressure development curves from charge and engine geometry, heat of explosion and kinetic characteristics

16 p2836 A69-31994

Solid propellant rocket motors ignition and igniter performance, discussing ignition interior ballistics

16 p2829 A69-31997

Solid fuel propulsion systems for tactical rockets design, discussing microwave attenuation, acceleration-combustion interactions and performance optimization

16 p2836 A69-31998

Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents [AIAA PAPER 69-425]

16 p2832 A69-32653

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields [AIAA PAPER 69-732]

16 p2840 A69-32674

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization [AIAA PAPER 69-823]

16 p2840 A69-32675

Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts [AIAA PAPER 69-573]

16 p2840 A69-32677

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations [AIAA PAPER 69-446]

16 p2841 A69-32687

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching [AIAA PAPER 69-444]

16 p2842 A69-32695

Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation [AIAA PAPER 69-461]

16 p2869 A69-32749

Thermal stability elements in solid propellant liner insulation system for heat sterilized solid rocket motors used in unmanned planetary landers [AIAA PAPER 69-437]

16 p2869 A69-32750

Aerothermodynamic problems during transition after activation of thrust inverter in solid propellant rocket engines

17 p3018 A69-33327

Solid propellant thrusters fabrication procedures, design considerations and quality control, stressing stress analysis and propellant choice with respect to geometry

17 p3018 A69-33331

Directional thrust control for solid propellant rockets, describing swiveling, bent rotating nozzles and secondary injection

17 p3019 A69-33332

Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy

17 p3021 A69-33355

ELDO/PAS rocket motor for satellite launching from elliptic orbit apogee to synchronous orbit powered by ammonium perchlorate with organic binder and Al

17 p3022 A69-33604

Solid propellant motor extinction by depressurization, determining extinction conditions by electrical analogy [ONERA-TP-722]

18 p3184 A69-34637

Cost and weight optimization for solid rocket motors using various steel casings [SAWE PAPER 777]

18 p3208 A69-34871

Solid propellant rocket motor predictive design by correlating performance and weight statistics via computer program [SAWE PAPER 775]

18 p3184 A69-34873

Glass overlaid B filament laminates interleaved with C and silica fabrics, evaluating ablative properties in solid rocket motor tests

19 p3354 A69-35515

Ablative materials for solid rocket nozzles, discussing static firing tests, rating system, equipment design and cost reduction

19 p3357 A69-35537

Pyrolytic graphite coated composite as nozzle throat material for high energy metallized solid propellant motors

19 p3357 A69-35539

Liquid, solid, hybrid propellant and nuclear, electric and air breathing rocket engines, discussing orbiting payload cost, controllability, operating environments, velocity, etc

19 p3395 A69-36321

Nonsteady propellant burning theory for Al melting role in suppressing combustion instability in solid propellant rocket motors

19 p3393 A69-36814

Laboratory unsteady burning data applied to analysis of small amplitude combustion instability in solid propellant rockets

20 p3586 A69-37224

Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers [AIAA PAPER 68-815]

21 p3819 A69-39031

Acceleration effects on solid propellant rocket motors combustion characteristics [AIAA PAPER 68-530]

21 p3786 A69-39217

Nonstationary solid rocket fuel combustion scheme, using unsteady combustion model for quantitative analysis of rocket engine irregularities attributed to excessive fuel

22 p4050 A69-40457

Solid rocket motor static firing tests in low pressure environment, presenting data concerning vacuum chamber pressure, diffusers pressure distribution, chamber wall temperature distribution, etc

22 p4000 A69-40593

Solid rocket motors failure during static firing, discussing sequence of events

24 p4365 A69-43260

SOLID PROPELLANTS

NT CASE BONDED PROPELLANTS

NT COMPOSITE PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT METAL PROPELLANTS

NT PLASTIC PROPELLANTS

Specific acoustic admittance of solid propellant burning surface for determining burning instability under rocket motor conditions

02 p0302 A69-11521

Solid propellant cartridges, discussing uses for starting large engines and providing auxiliary power in missiles or actuating devices

02 p0302 A69-11524

Gas chromatography used to determine residual solid propellant stabilizers content and nitro derivatives, including thin film chromatography

02 p0303 A69-11528

Solid propellant combustion instability models describing combustion zone dynamics applied to acoustic and nonacoustic instability in LF regime [WSCI PAPER 67-13]

02 p0352 A69-12311

Perturbation behavior of solid propellant combustion, discussing relevance of analytical models and use of qualitative models

04 p0685 A69-14726

Altitude effects on radar attenuation in nonequilibrium solid propellant afterburning rocket exhaust plumes

04 p0685 A69-14730

Deflagration of solid and hybrid propellants in steady state for missile and rocket propulsion applications

06 p0982 A69-17422

Burning rates of solid propellants by variable pressure method, taking into account environmental heat loss and gaseous condensation

06 p0982 A69-17505

Solid propellant burning rate behavior during abrupt environmental pressure excursions, using transient combustion model [AIAA PAPER 69-172]

06 p1036 A69-18046

Extinction by depressurization of AP composite solid propellants theory to predict rate of pressure decrease required to achieve flameout
[AIAA PAPER 69-176] 06 p0983 A69-18102

Oxidizer particle size and binder type effects on nonacoustic combustion instability of solid propellants
[AIAA PAPER 69-175] 06 p0983 A69-18152

Solid propellant burning rates from condensed phase decomposition kinetics, discussing kinetic rates of thermal decomposition
[AIAA PAPER 69-145] 06 p1039 A69-18182

Solid propellant combustion, calculating burning, flame standoff distance, flame thickness, heat transfer, energy losses, and distributed and unsteady combustion
09 p1623 A69-22091

Pressure waves interaction with solid fuel hot surface at HF based on linear theory of acoustic instability in condensed systems
13 p2371 A69-27383

Solid propellants formulation quantitative predictability for algorithmic modeling of functional selection, discussing specific impulse and burning rate
[AIAA PAPER 69-432] 16 p2828 A69-31845

Regression rate of solid fuel in hybrid combustion determined as eigenvalue by Rayleigh flow model with evaporating boundary
16 p2879 A69-32013

Composite solid propellant combustion using differential scanning calorimeter and mechanical model of steady state combustion
[AIAA PAPER 69-504] 16 p2833 A69-32679

Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 16 p2844 A69-32723

Low thrust reaction control for space missions, summarizing range and specific impulse characteristics for solid and hybrid systems
[AIAA PAPER 69-433] 16 p2834 A69-32745

Turbulent process employing product constituents dilute suspensions in inert carrier /Quickmix/ to obtain solid propellant mixtures, discussing plant design and analysis, economics, etc
[AIAA PAPER 69-517] 17 p2978 A69-33033

Hybrid propulsion chemical and technical problems, discussing solid fuel fragmentation and defining typical combustion modes
17 p3021 A69-33358

Solid propellant rocket motor predictive design by correlating performance and weight statistics via computer program
[SAWE PAPER 775] 18 p3184 A69-34873

Hydrodynamic stability of solid fuel combustion in presence of acoustic disturbances in gas phase, considering material erosion and particle dispersion
18 p3231 A69-35150

Combustion considerations in fuel rich solid and hybrid propellant systems in air breathing propulsion for comparison with metal ignition requirements
23 p4199 A69-41894

Burning solid propellant behavior under pressure fluctuations expressed in response function terms defining small mass flux change ratio to small pressure change
23 p4201 A69-41922

Solid fuel ablation by nitric acid, controlling reaction interface displacement rate by mass and heat transfer phenomena
24 p4363 A69-43568

Solid fuel ablation and supersonic combustion processes for various propulsion configurations, testing plastic models in wind tunnel
24 p4414 A69-43569

SOLID ROCKET BINDERS

Ammonium perchlorate base propellant and polyurethane binder heat stability, dangers of aging under abnormal conditions and reaction products for components and tolylene diisocyanate
02 p0303 A69-11529

Binder polymer network and microstructure effects on solid rocket propellant properties, emphasizing choice of polymer ingredients
[AICHE PAPER 37A] 17 p3017 A69-33668

SOLID ROCKET PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT METAL PROPELLANTS

Shock sensitivity of solid explosives and propellants, using calibrated gap testing techniques
02 p0302 A69-11520

Rocket propellant safety, discussing thermal, mechanical and impact sensitivity tests of solid and liquid propellants
02 p0302 A69-11525

Ammonium perchlorate base propellant and polyurethane binder heat stability, dangers of aging under

abnormal conditions and reaction products for components and tolylene diisocyanate
02 p0303 A69-11529

Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light photoelastic technique coupled with transparent rocket motor model
[AIAA PAPER 68-512] 02 p0345 A69-12371

French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems
03 p0518 A69-12851

Solid propellants formulation, processing physical properties, testing and rocket motor inspection
04 p0646 A69-14583

Point matching method for analysis of stress in incompressible solids of revolution, noting application to solid propellant rocket charges
04 p0683 A69-15518

Laminar and turbulent regimes of flame propagation studied by blowing explosive gas mixture through porous wall, determining Reynolds number by hot-wire anemometer
06 p1034 A69-17626

Unstable combustion of ammonium perchlorate /AP/, discussing correlation between propellant particle diameter and frequency in burning rate
[AIAA PAPER 69-177] 06 p1036 A69-18063

Ionizing radiation effects on combustion of ammonium perchlorate compacts with and without fuel addition, considering X ray, electron and plasma radiation
11 p1941 A69-25194

Deformations of thick walled cylinder with internal surface subjected to uniform pressure and externally connected to rigid chamber, calculating solid rocket booster charge
11 p1942 A69-25347

Limiting pressure for deflagration related to initial solid temperature of single crystals and pressed pellets of ammonium perchlorate
13 p2324 A69-27364

Polyester/ammonium perchlorate combustion, determining degradation rate by loss in weight method at different intervals
13 p2324 A69-28234

Solid rocket propellants tests, considering propulsion performance measurements, altitude simulation problems, internal flow patterns, nozzle geometry, etc
16 p2765 A69-31751

Solid rocket motor propellant burning rate increased by adding special fine ammonium perchlorate /SFAP/ to optimize particle size distribution
[AIAA PAPER 69-519] 16 p2793 A69-31850

Solid propellants steady state combustion with emphasis on heterogeneous propellants
16 p2829 A69-31995

Combustion instability characteristics of solid propellants, discussing small scale testing methods
16 p2829 A69-31996

Nonnewtonian solid propellant viscosity and pseudoplasticity utilizing rheological characterization for optimal casting and pot life determination
[AIAA PAPER 69-518] 16 p2833 A69-32665

Solid rocket motor performance prediction including motor pressure, thrust and propellant parameters, discussing mathematical modeling of flow fields
[AIAA PAPER 69-732] 16 p2840 A69-32674

Flame propagation in narrow slit and fine hole of solid propellant grain
[AIAA PAPER 69-561] 16 p2833 A69-32680

Linear and nonlinear pressure coupled combustion instability of solid propellants
[AIAA PAPER 69-479] 16 p2834 A69-32725

Stability criteria for longitudinal combustion instability tested for generality using data from various solid propellant formulations
[AIAA PAPER 69-480] 16 p2834 A69-32736

Thermal stability elements in solid propellant liner insulation system for heat sterilized solid rocket motors used in unmanned planetary landers
[AIAA PAPER 69-437] 16 p2869 A69-32750

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space
17 p3021 A69-33359

Monograph on solid rocket propellants covering composition, combustion characteristics and energetic, mechanical and operational properties
20 p3585 A69-37441

Nonstationary solid rocket fuel combustion scheme, using unsteady combustion model for quantitative analysis of rocket engine irregularities attributed to excessive fuel
22 p4050 A69-40457

Mathematical analysis of dendrite design of solid propellant grains for variant of modified wagon wheel design
22 p3997 A69-40553

Stress analysis of incompressible solid propellant rocket charges by point matching technique, considering differential thermal shrinkage and axial acceleration cases
24 p4402 A69-43263

Solid propellant flame zone radiant energy flux emitted through side port of internal burning cylindrical rocket motor related to total heat flux at burning surface
24 p4415 A69-43595

SOLID ROTATION

U ROTATING BODIES

SOLID-SOLID INTERFACES

Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites
01 p0171 A69-11261

Heat transfer dependence on direction of heat flow in stainless steel/aluminum interfaces, showing surface roughness and flatness influence
01 p0177 A69-11406

Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases
02 p0265 A69-11896

Thermodynamic evaluation of interaction between solid metals and dispersed high melting point oxides, stressing isobaric potentials
03 p0446 A69-13571

Metal/alumina interfaces strength, examining correlation with wetting and bonding and martensitic transformations
03 p0447 A69-13612

Low temperature technique for preparing solid-solid diffusion sources for silicon device fabrication based on gaseous hydrides as reagents
07 p1198 A69-18619

X ray and photomicrographic study of metal layer-ceramic seal interface reaction products, discussing phase transformations, temperature effects and time dependence
08 p1320 A69-20375

Polymeric composites mechanical energy dissipation dependence on dimensions of interfacial region between matrix and filler phases, considering particle size and strain magnification
10 p1794 A69-23037

Interfacial stress between thermally grown silicon dioxide and single crystal silicon correlated with oxide compressive strength
10 p1744 A69-23177

Screw dislocation interaction with partially bonded bimetallic interface, using isotropic elastic continuum approximation
10 p1802 A69-24027

Silicon single crystal substrate, preoxidation, oxidation and low temperature heat treatment effects on MOS transistor compared with Silicon-Silicon dioxide interface characteristics
10 p1665 A69-24051

Friction coefficient dependence on interfacial potential between solids
12 p2129 A69-25982

Heat flow resistance between solid bodies in contact in vacuum
13 p2378 A69-28338

Adhesive metal bonding methods including continuous surface bonds, core to face bonds, lap joints and structural adhesive materials
14 p2454 A69-28847

Contact problem between elastic cylinder and rigid punch analyzed using integral equation, singularity isolation and series expansion
14 p2532 A69-28972

Semiconductor films synthesis and properties, discussing single crystal films, epitaxial nucleation, nuclei surface distribution, layer kinetics, doping and film-substrate interface
15 p2670 A69-31046

Stress waves propagation through elastic-plastic medium with uniaxial displacement, discussing wave interactions and interface conditions
16 p2870 A69-31809

Test structure model for studying semiconductor-insulator interface related failure mechanisms in large scale integrated circuitry
17 p2936 A69-32894

Book on solid bodies collision theory covering elastic bodies with ruled surfaces, dynamic effects associated with Rayleigh surface waves, thermodynamic effects, etc
18 p3210 A69-34259

Nylon wear curves and friction coefficients for steel-on-nylon pairs determined as function of normal load
19 p3329 A69-36495

Dislocation effects on stress corrosion of metals, discussing behavior of porous structure and metal/corrosion film interface under applied stress
19 p3349 A69-36886

Electrostatically accelerated iron spheres interaction with thin metal and nitrocellulose foils to develop detectors for cosmic dust collection and recording
21 p3719 A69-38344

Orthogonal polynomials in three dimensional contact problems without friction, discussing construction of kernels over finite and semiinfinite intervals
22 p4041 A69-40113

Stochastic model extension of interface temperature of solids in sliding contact to include transients, noting interface activities dependence
22 p3955 A69-40404

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material
22 p4047 A69-41101

Heat transfer and surface thermal conduction characteristics of contact of two solid bodies, discussing pressure effect, measurement and analytical techniques
23 p4237 A69-41327

Contact stability of hollow cylinder compressed between parallel planes measured optically, compared to approximation of elasticity theory
23 p4162 A69-41416

SOLID SOLUTIONS

Chemical composition effect on duraluminum supersaturated solid solution stability, presenting time vs temperature C curves of isothermal decomposition
01 p0094 A69-10396

Thermoelectric properties of GeTe-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence
01 p0138 A69-10404

Nb-W alloy solution hardening and deformation, noting flow stress dependence on strain rate and temperature plus activation energy of deformation
01 p0095 A69-10488

Deformation in aged Fe-Cr alloy studied for rate-controlling solid solution mechanism as function of stress
01 p0095 A69-10601

Omega phase and beta solid solution in Zr-V-Ta alloys quenched from 900 C
02 p0263 A69-11850

Solid solutions microstructure and electrical conductivity in InAs-CdS and InAs-CdS and InAs-CdSe systems
02 p0297 A69-11882

Dislocations effect on decomposition rates of solid solutions of InAs and Au, Ag or Cu
03 p0484 A69-13283

Surface precipitation of carbides in solution treated and cooled molybdenum and tungsten
03 p0451 A69-14000

Energy structure parameters for ZnTe-CdTe and ZnSe-ZnTe crystals, obtaining forbidden bandwidth dependence on composition
03 p0492 A69-14173

Phenomena in III-V compounds and III-V compound-other compound solid solutions, examining equilibrium phase diagrams
04 p0641 A69-14505

Solid solutions of O in Ti and Zr, noting superstructure formation and physical properties
04 p0618 A69-15078

Structural characteristics of Ni-Mo alloys analyzed using electron microscopy and X ray diffusion scattering
05 p0782 A69-16808

InAs solid solutions reflection spectra with CdTe, CdS, CdSe and ZnTe compounds, determining conduction bands
07 p1198 A69-18511

Ti rich Ti-Al-Mo-Zr alloys phase diagrams at high temperatures, noting presence of solid solutions
07 p1161 A69-18769

Ti-Zr-Sn alloys phase equilibria and interaction between titanium stannide and solid solution of Ti and Zr
07 p1162 A69-18770

Cobalt-tungsten solid solutions thermodynamic properties calculated by Borelius method using phase diagram
07 p1165 A69-18941

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content
07 p1200 A69-19013

Rhenium effect on lattice solid solubility of oxygen in tungsten, calculating rhenium-oxygen cluster minimum binding free energy
08 p1329 A69-20007

Increased Ti heat resistance by forming solid solutions and compounds having various dispersions and bond strength
09 p1525 A69-22140

Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases
10 p1707 A69-22987

Nb H alloys embrittlement, discussing hydride formation and resistance variation with temperature
10 p1707 A69-22989

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature
10 p1708 A69-22993

Repeated stepwise annealing process to obtain homogenized InSb-GaSb alloys continuous solid solutions
10 p1745 A69-23331

Solid solution decomposition effect on binary Mg alloys recrystallization temperature containing Al and Nd, using X ray and microstructural analysis
11 p1902 A69-24272

Zr-W high temperature phase relationships, noting Zr-zirconium tungstide eutectic temperature, zirconium tungstide peritectic temperature and Zr solubility in W
11 p1903 A69-24578

Precipitated phase composition and structure of Co-Ti solid solution during aging
12 p2112 A69-26037

Added metal oxides solid solutions effect on creep kinetics and strain rate of zirconia samples during sintering
12 p2118 A69-26260

InAs-InP solid solutions diffusion rate and lattice constant for various compositions
12 p2144 A69-26587

Mixed state of type 2 superconductors, stressing alloying elements effects in solid solution and structural inhomogeneities
12 p2145 A69-27119

Gamma prime phase coherent equilibrium solubilities in Ni alloys of Al, Si and Ti from magnetic studies of particle coarsening and electron metallographic observations
13 p2276 A69-27370

Supplementary absorption and Hall effect temperature dependence in solid solutions of gallium arsenic phosphide
13 p2318 A69-27894

Oriented composites obtained from organic system under various directional solidification conditions
13 p2287 A69-28680

Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys
14 p2465 A69-29749

Discontinuous yielding characteristics of 2024 Al alloy determined for different conditions of solution, heat treatment and age hardening
15 p2639 A69-30598

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions
15 p2668 A69-30629

GaAs zinc gallium selenide solid solutions properties, analyzing lattice constant, microhardness, forbidden zone and concentration relationships
15 p2670 A69-31050

Lattice components of heat conductivity and chemical composition relations of magnesium alloy solid solutions
16 p2824 A69-31567

Vibrational excess entropy in dilute solid solutions alloys calculated by changes in potential fields surrounding impurity atoms
16 p2798 A69-31706

Alloying elements effects on low temperature metal fracture, considering changes in ductile-brittle transition flow due to solute
17 p2988 A69-33551

Solid solutions microstructure and electrical conductivity in InAs-CdS, InAs-CdS and InAs-CdSe systems
18 p3182 A69-35042

Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems
18 p3149 A69-35183

Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role
18 p3157 A69-35246

Ni-Cr alloy unidirectionally solidified, grain and eutectic structure and alloy strength
19 p3343 A69-35921

Ni base superalloy stacking fault energy, studying effects of various solute additions
19 p3343 A69-35925

InSb-InAs, InSb-GaSb, InP-GaAs and InP-GaP quasi-binary systems solid solutions optical and electrical properties, determining energy gap change as function of composition
19 p3390 A69-36554

Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra
19 p3391 A69-36606

Supersaturated solid solution decomposition in Ni-Cr-Ti system, discussing precipitation mechanism of eta phase
20 p3558 A69-36968

Ti and V sesquioxides and TiO-VO solid solutions crystallography and defect chemistry over entire range of compositions
20 p3484 A69-37526

Thermal expansion properties of oxides and oxide solid solutions measured for improved expansion coefficient search
20 p3567 A69-38066

Flow stress temperature dependence of Ni-Cr-Al alloys consisting of gamma prime dispersion in Ni base solid solution
21 p3744 A69-38738

Melt cooling rates effect on supersaturated solid solutions in Al ternary systems
21 p3745 A69-38955

Pumping and excitation spectra of solid solutions of cryptocyanine in glycerine irradiated by ruby laser, discussing population inversion and scattering and vibrational transitions
21 p3740 A69-39546

Nb supersaturated solid solution in Co precipitation mechanism analyzed by X rays and electron microscope, noting diffusive scattering effects
21 p3750 A69-39788

Solid solution softening in bcc alloys, discussing alloy atoms intervention in low temperature deformation process
22 p3969 A69-40165

Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature
22 p3996 A69-41163

Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate
23 p4178 A69-42358

Niobium solution hardening by nitrogen and oxygen, noting grain size effects in electron beam refining
23 p4178 A69-42362

Serrated flow characteristics in gold-indium solid solutions at various strain rates and temperatures
24 p4361 A69-43028

Stored energy of cold work and electrical resistivity of Ag-Mg solid solution alloys measured as functions of strain, Mg concentration and initial state of order
24 p4332 A69-43029

Temperature dependence of equilibrium solid solubility of C in Au, Cu and Ag foils with respect to graphite
24 p4334 A69-43413

SOLID STATE

Very far IR techniques applications in molecular and solid state spectroscopy and relationship with impurity band conduction
02 p0296 A69-11791

Optimal body shape determination by mathematical-mechanical relations derivation, discussing variational problems and variational principles applicability
03 p0526 A69-13739

Nonlinear problems in mechanics of deformable media and qualitative analysis of properties of mathematical models of physical processes involved
03 p0467 A69-13749

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence
10 p1678 A69-23209

Anharmonic lattice vibrations, specific heats and coefficient of linear expansion of solids at high temperatures, noting interatomic spacing
10 p1809 A69-23653

Solid W enthalpy from 2800 K to melting point measured with drop calorimeter, tabulating heat capacity, entropy and free energy function
17 p2987 A69-33075

Proton and deuteron energy used to study solid state chemical reactions effects on meteorites composition and properties, obtaining hydroxyl ions and hydrocarbons
19 p3414 A69-36114

SOLID STATE DEVICES

NT AVALANCHE DIODES
NT CRYOTRONS
NT CRYSTAL RECTIFIERS
NT FIELD EFFECT TRANSISTORS
NT GALLIUM ARSENIDE LASERS
NT GERMANIUM DIODES
NT JUNCTION DIODES
NT JUNCTION TRANSISTORS
NT METAL OXIDE SEMICONDUCTORS
NT PARAMETRIC DIODES
NT PHOTODIODES
NT PHOTOVOLTAIC CELLS
NT RUBY LASERS
NT SEMICONDUCTOR DEVICES
NT SEMICONDUCTOR LASERS
NT SILICON TRANSISTORS
NT THERMISTORS
NT THYRISTORS
NT TRANSISTOR AMPLIFIERS
NT TRANSISTORS
NT VARACTOR DIODES

Phased array radar cost improvement based on solid state devices and microwave integrated circuits application
01 p0048 A69-11039

Electron tubes in phased array radar systems, discussing replacement limits by solid state devices, reliability and cost reduction
01 p0048 A69-11040

Technique for combining large numbers of solid state energy sources by using dense array of radiating elements
02 p0217 A69-12148

Dispersive two port components for application to microwave pulse compression, coupling YIG crystal magnetoelastic spin wave mode to acoustic transducer
02 p0217 A69-12149

Air gap isolated microcircuit beam-lead devices fabrication, operation, electrical performance and radiation resistance
02 p0221 A69-12469

RF voltage breakdown in solid state telemetry transmitters on sounding rocket, noting glow discharge initiated by energetic dissociated electrons
02 p0222 A69-12691

Transit time effects in Si n-nu-n space charge limited current solid state devices
03 p0483 A69-12852

Microwave energy generation with solid state equipment, noting Gunn effect diodes, avalanche diodes and limited space charge accumulation /LSA/ devices
03 p0402 A69-12971

Diamond abrasive process for preparation of microminiature devices for metallographic analysis
03 p0402 A69-13007

Solid state power supplies for turbine control and instrumentation, discussing control system manufacturer requirements and reliability specifications
03 p0368 A69-13432

Solid state precision frequency standard for L multiplex carrier equipment, using four precision quartz crystal oscillators
04 p0561 A69-15451

Onboard solid state neon cryostat for IR detector, noting resistance to missile vibration, acceleration and shock tests
06 p0906 A69-17103

Avalanche detector radioisotope X ray fluorescence analyzer development for XRF analysis of potassium and calcium, noting precision
[IEEE PAPER 3B-9] 07 p1135 A69-19201

Solid state electrochemical cells, discussing electrodes composition, battery construction and low, medium and high drainage under temperature extremes
[AICHE PAPER 22D] 08 p1256 A69-19848

Microwave silicon technology applied to fabrication of high gain high efficiency transistor
09 p1462 A69-21410

Microwave solid state power sources including transistors, varactor harmonic generator chains, tunnel diodes, avalanche transit time devices, etc
10 p1662 A69-23144

Solid state AC voltage circuitry for measuring and controlling charged particle detector signals
10 p1662 A69-23256

Solid state ozone generator for preparing ozone in known concentrations to 1000 ppm in air for laboratory studies
10 p1693 A69-23346

Solid state battery utilizing high conductivity solid electrolytes /metal silver iodide/, demonstrating cell performance improvements
10 p1640 A69-23998

Solid electrolyte batteries development and current research, detailing Sprague cell and iodine complexes
10 p1640 A69-23999

Solid logic technology /SLT/ computer circuits, discussing IBM 360 computer reliability, failure analysis information retrieval, SLT module and failure rate
11 p1843 A69-24341

Solid state synchro data interfaces for angular information, noting synchro to digital and digital to synchro conversion techniques and synchro repeaters
11 p1842 A69-24543

Microwave tube development, discussing cold cathodes, ferrite and semiconductor integration into tubes, tube failure physics, etc
11 p1847 A69-24745

Solid state sampling circuit for low pulse repetition frequencies to improve signal to noise ratio, noting ratio of holding to learning time
11 p1849 A69-24900

Filter circuits for stabilization of solid state microwave devices, noting input matching characteristics
11 p1849 A69-24961

Solid state IR imaging using monolithic Ge mosaics of isolated sensor elements, discussing design, structure, fabrication, system readout and operation
11 p1938 A69-25307

Solid state radar feasibility, discussing circuit components, circuit design problems involving striplines and monoblocks, phase controlled antenna, solid state computers, etc
13 p2230 A69-27928

SHF solid state phased array radar with Gunn effect modular microwave IC design, discussing air and ground applications
14 p2420 A69-29435

Solid state programmable avionics converter for signal processing, information conversion and aircraft control
14 p2405 A69-29687

Amplifier working in conjunction with solid state phase sensitive detector replacing existing commutator in Dobson ozone spectrophotometer
16 p2792 A69-32641

Scanning electron microscopy to study device failure and performance, discussing limitations and progress
17 p2936 A69-32890

Device quantity failure kinetics or time dependence effect on time-to-failure distribution resulting from given device degradation coefficients distribution
17 p2936 A69-32895

Solid state single unit digital control computer performing stability augmentation, pilot relief functions and generating minimum fuel flight paths for VTOL landing
17 p2934 A69-34075

Airborne communication receiver solid state interference blanker circuitry comprising black box insertable between antenna and RF input
17 p2943 A69-34132

Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments
18 p3134 A69-34537

Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint
19 p3267 A69-35996

Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level
19 p3283 A69-36021

Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance
19 p3270 A69-36238

Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability
19 p3284 A69-36676

Photon actuated switch consisting of 10 input binary logic gate and solid state relay to reduce aerospace vehicles self generated noise
20 p3505 A69-37289

Solid state SHF transmission amplifiers design using rectangular waveguides and biased bulk GaAs
21 p3683 A69-39452

MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes
22 p3912 A69-40067

Power combining network for high power UHF solid state satellite transmitters with low loss, compact size and input port selection capability
23 p4137 A69-41743

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights
23 p4070 A69-42275

Microcircuit phased array electronic countermeasures system design and hardware techniques for aerospace applications, analyzing adaptive, retrodirective and combination array systems
24 p4287 A69-43110

SOLID STATE LASERS

NT RUBY LASERS

Continuous wave solid state lasers active elements temperature fields calculated by differential equations
01 p0089 A69-10105

Optical pulse generator consisting of solid state laser with saturable absorber at cavity end using perturbation theory and Maxwell equations
01 p0089 A69-10179

Solid state liquid and semiconductor lasers, detailing conditions for producing stimulated emission and applications
01 p0092 A69-11068

Deuterium gas ionization over high pressure range under action of short pulse Q switched neodymium glass laser, noting breakdown wave existence
02 p0255 A69-11545

Oppositely moving waves interaction during nonlinear transient process of oscillations buildup in annular solid state laser found dependent on coupling via scattering
02 p0259 A69-12648

Solid state laser Q switched by rotating prism emitting giant pulse before two mirrors in parallel
03 p0440 A69-13365

Ring laser field space-time pattern from light waves scattered at discontinuities, discussing equations of motion of solid state laser
03 p0441 A69-14140

Optical pumping distortion compensation in glass laser rod by changing coolant temperature, obtaining mode locked laser pulses
04 p0609 A69-14286

Refractive index and expansion thermal coefficients along axis of oriented Nd-YAG laser rod
04 p0609 A69-14293

Laser with combined active medium resulting from investigation of autoresonant energy transfer in composite crystals with optical centers
04 p0611 A69-14546

Passive Q switching of solid state lasers based on stimulated Mandelstam-Brillouin light scattering
05 p0770 A69-15699

Glass lasers, discussing neodymium properties in glass, flexibility of glass in size, shape and optical excellence, temperature coefficient of index of refraction, etc
05 p0772 A69-16227

Frequency and polarization selection of neodymium glass laser oscillators by directing secondary radiation into laser cavity and duplicating spectral properties [IEEE PAPER P-3]
05 p0775 A69-16324

Fast digitalized scan laser using Nd-YAG as active medium and containing crossed array of lithium niobate electro-optic switches for mode selection [IEEE PAPER R-2]
05 p0775 A69-16326

Active region doping effect on laser diode threshold current, noting current dependence on loss coefficient in interband transition model without selection rule
06 p0933 A69-17257

CW room temperature laser using lanthanum sodium molybdate crystals with positive trivalent Nd ion impurity
06 p0934 A69-17262

Dynamics of Q spoiled neodymium laser created plasma expanding in vacuum magnetic field
06 p0970 A69-17952

Optical pumping of solid state lasers, reviewing processes involved and properties of lasers
06 p0937 A69-18007

Q switching of continuously pumped Nd/YAG laser using variable spacing Fabry-Perot interferometer as variable output coupler
06 p0938 A69-18229

Subpicosecond structure in output spikes of Nd-glass laser observed by employing two photon fluorescence displays inside laser cavity
06 p0938 A69-18231

Giant pulse generation by switched laser rapid pumping of neodymium doped glass laser
07 p1146 A69-18486

Tandem amplifier system of glass and selenium-ox-ychloride liquid lasers, discussing input power/output pulse relation and population inversion density measurement
07 p1147 A69-18487

Pulse synchronism of solid state lasers Q switched by same rotating prism, discussing pulse shifting to obtain radiation in filaments
07 p1147 A69-18488

Synchronizing ruby and Nd-glass laser pulses by means of passive bleachable dye solution liquid Q switch
07 p1147 A69-18530

Solar end and lateral pumping apparatus for neodymium doped YAG crystal lasers, noting applicability to space communication
07 p1150 A69-18953

Giant pulse production of Nd-glass laser with aid of coherent pumping by second harmonic of Q switched laser, noting pulse duration
07 p1156 A69-19333

Amplitude modulation of radiation pulses of two level paramagnetic maser as affected by inhomogeneous broadening and spinning of resonance line
07 p1158 A69-19751

Doped crystal and gas lasers, discussing resonant cavities, axial modes, relaxation oscillation, mode locking and Lamb theory
08 p1323 A69-19869

Stimulated emission of laser employing crystal and glass lasers doped with neodymium ions, using high temperature spectroscopy
08 p1323 A69-19944

Nonlinear amplification of powerful light pulses in Nd glass
08 p1323 A69-19946

Picosecond light pulse generation by solid state laser interpreted by fluctuating intensity spikes arising from random emission interference in out-of-phase modes
08 p1326 A69-20548

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis
08 p1328 A69-21190

Mode locking via nonlinear polarizations in multimode solid state lasers
09 p1514 A69-21344

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission
09 p1515 A69-21354

Solid state lasers, noting normal, continuous and single mode oscillations, Q switching, power output limitations, mode locking and liquid lasers
09 p1517 A69-22120

Periodic mode variations in ruby and neodymium lasers with tilted mirrors, discussing factors in resonator misalignment
09 p1520 A69-22663

Luminescence quantum yield in neodymium glass, noting independence to stimulating light frequency
10 p1702 A69-23211

Pulsed and CW lasers glass crystals temperature fields determination, including tangential and axial thermal stresses
10 p1702 A69-23428

Stimulated emission of trivalent Nd ions in glass base, explaining connection between efficiency and emission polarization by interaction of laser modes with ions
10 p1703 A69-23618

Nd glass laser for emission of high radiance diffraction limited pulses, noting long path air breakdown and second harmonic generation
10 p1704 A69-23654

Isotope shifts in 4416 Å cadmium laser, showing change of double peaked to single peaked profile with doubled active tube length
10 p1705 A69-23812

Neodymium doped YAG laser efficiency dependence on pump power level and spectral filtering of pump light
10 p1705 A69-23814

Elliptical cylindrical chambers optimum design for optical pumping of solid state lasers, discussing transfer efficiency and approximation by circular cylindrical chambers
10 p1706 A69-24010

Q switching techniques for solid state lasers at room temperature for high peak power, discussing mechanical systems, electro-optic and magneto-optic shutters
10 p1706 A69-24018

Damping of solid state laser relaxation oscillations in power output due to diffusion of excitation
10 p1706 A69-24079

Population inversion distribution and wave processes in optical amplifier, showing beam transformation of constant section and dependence on crystal characteristics
11 p1893 A69-24447

Pulsed solid state Nd doped calcium tungstate fundamental longitudinal modes selection by insertion of Fabry-Perot interferometers, lenses and diaphragms into resonator
11 p1894 A69-24471

Output power losses in lasers with inhomogeneous active rods, deriving formulas for losses in ruby and Nd-glass laser rods
11 p1926 A69-24603

Giant pulse buildup time in Nd-glass laser with passive shutter determined by comparing Q factor and peak power ratios of different modes
11 p1894 A69-24621

High power short duration diffraction limited laser pulse generation with optically swept laser glass slab forming amplifier chain
11 p1897 A69-25036

Glass lasers with trivalent rare earth ions noting properties, characteristics and recent developments
11 p1898 A69-25043

Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method
11 p1938 A69-25049

Electro-optically Q switched Nd doped calcium tungstate laser for producing two controlled pulses, noting application to other solid state lasers
11 p1899 A69-25052

Transformation of Q switched neodymium laser radiation into Stokes component during stimulated combination scattering in liquid nitrogen
11 p1900 A69-25751

Second harmonic conversion of giant pulse Nd laser emission related to beam divergence and space-time distribution of radiation, noting energy relationship
12 p2104 A69-26022

Emission from solutions of organic luminophores excited by harmonics of Q switched neodymium laser
12 p2104 A69-26030

Off axial mode selection in circular cross section solid state lasers due to nonuniformity of excitation by focusing of pump power
12 p2106 A69-26320

Transverse passive mode locking by dye technique for neodymium glass laser with confocal cavity
12 p2107 A69-26327

Nd-doped glass pulsed laser with selected second harmonic radiation and KDP crystal frequency converter operating T 12Hz and 530 nm
12 p2108 A69-26594

YAG-Nd laser continuous operation using incoherent injection luminescent pumping by gallium arsenide phosphide light emitting diodes at liquid nitrogen temperature
13 p2270 A69-27192

Ruby and neodymium glass traveling wave laser free generation spectra kinetics, noting mode transitions as function of pumping levels
13 p2271 A69-27655

Quasi CW solid state doped lasers excited by pyrotechnic pump sources with potassium perchlorate oxidant and zirconium fuel, noting power to weight ratio
13 p2272 A69-28116

CW lasers based on composite yttrium fluoride type crystals, noting large number of intense emission bands
13 p2273 A69-28316

Ruby and neodymium glass lasers applicability to metal working, investigating factors affecting integral pulse power stability
13 p2273 A69-28431

Fluorite crystal laser activated by divalent samarium, discussing characteristics in pulsed operation mode
14 p2458 A69-29328

Emission spectrum width of solid state lasers as function of temperature, investigating effects of active medium parameters, pumping and cavity
14 p2459 A69-29389

Stimulated emission of cerium trifluoride-positive trivalent Nd ion laser noting absorption, luminescence, excitation, emission spectra and metastable state lifetime
14 p2460 A69-29645

Neodymium laser having adjustable pulse duration and homogeneous spatial radiation structure developed by two photon absorption
14 p2460 A69-29670

Solid state and gas lasers operational parameters tabulation including pulse durations, powers, energy flux densities, electric and magnetic field strengths, etc
15 p2633 A69-30708

Characteristics of neodymium-glass laser with unstable resonator noting transverse modes and radiation angular distribution
15 p2634 A69-30730

Pumping energy absorbed by active element of neodymium glass during laser emission related to activator concentration
15 p2635 A69-31104

Power supplies for ruby, YAG and glass lasers, emphasizing design equations and component selection
15 p2636 A69-31527

Monomode giant pulse generation from neodymium glass laser by coherent pumping
16 p2797 A69-32018

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix
16 p2798 A69-32480

Laser effect in neodymium glass, estimating efficiency of light energy output vs electric energy input
17 p2979 A69-32828

Kr and Ar flash lamps pumping efficiencies compared for Nd-doped YAG and glass lasers
17 p2980 A69-32958

Angular structure of second optical harmonic for cylindrical lens focusing of Nd laser beam into negative KDP crystal
17 p2981 A69-33110

Single frequency lasers using thin metal film mode selection filters, discussing film properties and experiments with Ar ion and Nd-YAG lasers
17 p2982 A69-33399

Polymethine dyes in passive Q switches of neodymium lasers, noting effects of absorption band intensity, width and position on single pulse laser energy yield
17 p2983 A69-33968

Stable passive Q-switch of neodymium laser, presenting single pulses energy, time and spectral characteristics
17 p2983 A69-33969

Polarized emission from Nd activated glasses, establishing S and P polarization component energy dependence on pumping energy
17 p2984 A69-33974

Reliability block diagrams for laser systems, discussing failure modes of solid state, semiconductor and gas lasers
18 p3151 A69-34523

Neodymium laser emission temporal structure in mode self locking regime with Q switching by saturable filter
18 p3152 A69-35016

Solid state laser radiation damage in polymers during tensile and compression loads using microstructural analysis
18 p3152 A69-35159

Gas and solid state lasers optical resonance and radiation generation, frequency properties, frequency shift, spectra and Zeeman effect
18 p3154 A69-35408

Solid state CW laser frequency control during operation, discussing emission properties and laser applications
19 p3331 A69-35864

Solid state laser emission frequency control and retuning using dispersive resonators, analyzing interference methods for wavelength measurement
19 p3331 A69-35865

Weak displacements of opaque objects and optical distortion in solid state lasers analyzed by holographic interferometry
19 p3308 A69-35909

Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc
19 p3284 A69-36433

Single crystal line block electro-optical shutter reflector operation based on double reflection and birefringence in anisotropic media, noting application to Nd glass laser
20 p3554 A69-37611

Neodymium glass laser emission spatial characteristics, investigating higher laser modes excitation
20 p3554 A69-37725

Differential equations for field amplitude and level populations applicable to solid state lasers output power pulsations
20 p3554 A69-37726

Simultaneous mode locking of Nd YAG laser and intracavity second harmonic generation in high temperature Li niobate or BaNa niobate
20 p3555 A69-37731

Glass lasers development, operation, composition, applications, etc
21 p3734 A69-38407

Solid state traveling medium laser pulsed emission characteristics and nonlinear intensity distribution
21 p3735 A69-38438

Solid state traveling wave optical quantum amplifier for conversion of modulated signal carrier frequency, applying to frequency conversion in laser communication links
21 p3739 A69-39540

Lummer-Gehrcke plate type polarizer made of birefringent material for Nd glass laser, discussing reflection coefficients in quartz crystals
21 p3739 A69-39541

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics
21 p3739 A69-39542

Time characteristics and second harmonic of radiation of Nd laser containing lens systems, producing second harmonic in KDP crystal
21 p3740 A69-39544

Transverse mode selection in rotating mirror neodymium doped calcium tungstate laser by inserting slit and edge into resonator
22 p3961 A69-40316

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission
22 p3964 A69-40793

Neodymium activated glass laser efficiency as function of absorption of pumping and emission energy by glass
22 p3964 A69-40797

High output laser amplifier consisting of glass and selenium oxychloride/Nd liquid lasers
23 p4173 A69-41565

Optimum design of spherical and ellipsoidal pumping chambers for solid state lasers determined from numerical calculation of radiation transfer efficiency
24 p4327 A69-42986

Optical properties of neodymium-doped YAG and glass laser materials including fluorescence lifetime and conversion efficiency, absorption spectra, sensitization effects, etc
24 p4329 A69-43751

SOLID STATE PHYSICS

Solid state physics - Conference, Alta Lake, British Columbia, August-September 1967
05 p0809 A69-16552

Cyclotron waves interaction when propagating in solid state plasma in magnetic field, determining amplification zones and factors
08 p1374 A69-21078

Collection of papers on solid state physics
11 p1935 A69-24524

Book on ultrasonic methods in solid state physics covering stress wave propagation in solids, pulse methods of velocity change and attenuation measurements and causes of losses
12 p2145 A69-26870

Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics
13 p2316 A69-27221

Book on elements of solid state energy conversion covering quantum mechanics, thermodynamics, thermoelectricity and photovoltaic energy conversion
13 p2322 A69-28038

LF electrostatic oscillations of inhomogenous solid state plasma with small number of current carriers in parallel external electric and magnetic fields
15 p2665 A69-30042

Book on semiconductor devices physics covering principles and operational characteristics, carrier distribution and transport properties, materials, junctions, thin films, etc
15 p2670 A69-31062

Physics of solids in intense magnetic fields - Conference, Chania, Crete, July 1967
16 p2826 A69-31819

Single particle and collective excitations of plasmas in solids and interactions with acoustic and electromagnetic waves in magnetic field
16 p2821 A69-31820

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events
17 p3015 A69-32822

Book on solid state electronics, discussing quantum mechanical approach, Fermi-Dirac statistics, electron theory of metals, semiconductors and magnetism
18 p3182 A69-34653

Physics of semiconductors - Conference, Moscow, July 1968, Volume 1
19 p3384 A69-36513

Semiconductor physics - Conference, Moscow, July 1968, Volume 2
19 p3387 A69-36540

Semiconductor devices development based on amorphous materials, reviewing solid state physics implications
23 p4198 A69-41560

SOLID SURFACES

NT CRYSTAL SURFACES

Streak interferometry method for measuring transient deformation data on metallic solid surfaces
01 p0078 A69-10117

Seismic refraction study of internal structure of volcanic cinder cone
02 p0236 A69-11465

Nonstationary wing motion in gas stream near solid surface, analyzing differential equation for acceleration potential
02 p0188 A69-12134

Electric potential effects on heat transfer from plasma to solid wall, measuring heat input rates
02 p0290 A69-12423

Plane electromagnetic wave scattering from slightly rough surface tilted away from reference plane, noting polarization effects
03 p0395 A69-13625

Interaction of rarefied gas with solid surface, analyzing accommodation coefficients, energy and impulse exchange as function of atomic bulk size
04 p0632 A69-14991

Solid insulator performance in vacuum, analyzing breakdown factors
05 p0731 A69-16243

Gas adsorption on solids, discussing statistical mechanical theory assuming localized adsorption for first adlayer and nonlocalized mobile layer adsorption on top
06 p0980 A69-17387

Chemical effects of solar wind and cosmic protons on solid bodies in space, discussing possible relation to origin of life
08 p1407 A69-20935

Heat transfer in solid bodies, deriving thermal conductivity equation and surface boundary conditions in presence of radiative energy transfer
13 p2373 A69-27584

Spatial distribution patterns of gaseous argon atoms scattered from solid argon surface
13 p2300 A69-28658

Velocity field in turbulent flow based on momentum transfer, determining velocity distribution for flow near solid surface
16 p2772 A69-32128

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential [AIAA PAPER 69-699]
17 p3011 A69-33475

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
19 p3377 A69-36179

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle
19 p3377 A69-36180

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction
19 p3377 A69-36181

Unsteady heat transfer between gas flow and solid surface during melting
20 p3631 A69-37088

Heat conduction in thin layer near boundary surface of solid by approximating one dimensional conduction in half space with allowance for curvature
20 p3633 A69-38213

SOLID SUSPENSIONS

Heat conduction in viscous fluid flows with large concentration of suspended solid particles
02 p0351 A69-12052

Heat transfer involving particulate suspension, discussing characteristics of flowing suspension, inertia effects, impingement, deposition, radiation and electric charges
13 p2377 A69-28151

SOLIDIFICATION

Dendrite formation and solidification relationship in highly alloyed materials from quantitative determination of controlling factors for segregation
01 p0098 A69-10899

Directional solidification and composite structures, discussing structure changes effect on mechanical properties
03 p0449 A69-13877

Directional solidification of multicomponent metal alloys for matrix in fiber reinforced composites, using monovariant eutectic reactions
07 p1166 A69-19145

Nodal precipitation and cellular solidification substructure in commercial purity nickel, discussing supercooling, NiO and eutectic composition
08 p1332 A69-20289

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes
13 p2276 A69-27402

Oriented composites obtained from organic system under various directional solidification conditions
13 p2287 A69-28680

Stress analysis during solidification of binders in glass fiber reinforced plastic materials, using resin coated glass film simulation
22 p3973 A69-40746

SOLIDIFIED GASES

Temperature field in plate heated at one end and situated in solidifying gas, leading to gas layer formation by sublimation
16 p2878 A69-31957

Star formation in interstellar solid hydrogen clouds originating from cellular pressure created by hydrogen condensation onto interstellar grains
16 p2862 A69-32375

Intensities of translational lattice mode absorptions of alpha phase solid molecular nitrogen in far IR, noting temperature dependence
20 p3579 A69-37346

Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
20 p3601 A69-37492

Raman spectrum of solid alpha-nitrogen at low temperatures, calculating scattering intensities and Raman active librational lattice vibrations
23 p4194 A69-42204

Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model
23 p4194 A69-42205

High temperature plasma generation by high power laser beam irradiation on small solidified gas particle, detailing experimental equipment and procedures
24 p4354 A69-42645

Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
24 p4350 A69-43119

Dry ice ablating models for unheated supersonic and hypersonic wind tunnel tests, noting mass addition rate extension
24 p4297 A69-43255

Proton ejection as hydrogen ion clusters by low energy electron bombardment of solid hydrogen
24 p4389 A69-43747

Raman scattering during external and internal motion of oxygen molecules condensed phases, observing

gamma and liquid phase bandwidths during stretching vibrations 24 p4353 A69-43808

SOLIDS NT SOLIDIFIED GASES

Temperature evolution velocity parameter effect on behavior of elastoviscoplastic solids, noting demonstration by work hardening tests at variable temperatures [ONERA-TP-644] 01 p0164 A69-10036

Small oscillations in solid body with arbitrary cavity partially filled with viscous incompressible fluid 01 p0165 A69-10084

Solid body motion about fixed point representable by two dimensional motion of two points on complex plane 01 p0116 A69-10356

Radiative heat transfer through transmission layers sandwiched between black bodies with variable blackness spectra 02 p0350 A69-11578

Integration for equations governing linearized thermoelastic transformations of incompressible solids 02 p0340 A69-12033

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution 03 p0528 A69-13798

Motion and stability of solid body with cavity containing rotor and two incompressible nonmixing liquids with surface tension 03 p0418 A69-13814

Model of creep in solids based on Markov process, discussing dislocation movement by means of thermal activation 03 p0529 A69-13942

Dilatometer for measuring thermal expansion of solid bodies over temperature range at various gas media pressures 03 p0432 A69-14151

Dynamics of structured solids - ASME Conference, New York, December 1968 04 p0675 A69-14684

Approximate method to determine nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature 04 p0688 A69-15409

Dynamic response of solids induced by charged particle interaction noting laser interferometric measurement of surface stresses 05 p0771 A69-15817

Reciprocal theorem for displacements of solid skeleton caused by fluid sources action in infinite consolidating space 05 p0835 A69-15869

Coupled heat equation to calculate transient and steady state temperature distributions in viscoelastic solids under cyclic deformations 05 p0836 A69-15878

Regular thermal conditions in solid bodies with radiative heat transfer 05 p0845 A69-15896

Spectrophotometer and integral methods to determine solar radiation absorptivity for steady/ unsteady thermal regimes in solids 05 p0846 A69-15901

Integrability of equations for problem of motion of heavy solid body about fixed point 05 p0794 A69-16206

Mass spectrometric studies of plasmas produced by laser beam interaction with solid materials 06 p0932 A69-16921

Free energy in linear viscoelastic solids 06 p1022 A69-17241

Detonations in gases and solids, discussing limits, speed, initiation by deflagration, chemical factors, dimensional effects, etc 06 p1032 A69-17424

Approximate expression for temperature distribution during heat transient in infinite solids of plane, cylindrical and spherical geometry 06 p1025 A69-17779

Solid body surface temperature relation to heat flux during cooling by fluid flow solved on computer 07 p1241 A69-18923

Steady state thermal stress distributions near external crack in solid, treating temperature distributions with respect to plane of crack 07 p1232 A69-19172

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion 07 p1183 A69-19678

Mathematical models of crack propagation in solids noting similarity for equilibrium crack length 07 p1238 A69-19692

Consistency of high temperature equation of state of solids, considering Gruneisen parameter and lattice dynamics 08 p1419 A69-19814

Constitutive equations for propagation of plane waves of finite amplitude in nonsimple elastic solids, discussing holohedral isotropic solids and transverse harmonic circularly polarized waves 08 p1411 A69-20141

Proton electrolyte application to fuel cells, discussing proton diffusion in solids and materials with vacancies /proton conductors/ in structures 08 p1269 A69-21053

Heat transfer mechanism in solid body, deriving integrodifferential equation with classical equation and hyperbolic equation of heat propagation as special case 09 p1621 A69-21587

Ordinary and inverse variational methods for stress-strain state of solid body, using Lagrange multipliers to reduce variational problem 10 p1793 A69-22885

Relaxation method for configurations and energies of atoms and stress induced crack opening displacements in crystalline solids 10 p1796 A69-23067

Damping properties of nonlinear viscoelastic solids with applications to vibrating continua, using Gauss principle of least constraints 11 p1970 A69-24605

Dynamic and fatigue crack propagation theories for brittle and quasi-brittle solids and plates 11 p1975 A69-24672

Nonlinear resonance formation during spatial nonlinear vibrations of solid bodies, establishing relations between vibration and excitation frequencies 11 p1919 A69-25167

Mechanical model for oscillatory motion of solid body in Newtonian central force field 11 p1919 A69-25179

Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method 11 p1986 A69-25244

Stress wave propagation in thermoviscoelastic solids using extended Ritz method 11 p1993 A69-25527

Solid body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body 12 p2061 A69-25884

Three dimensional problems in crack theory for unbounded brittle body, deriving critical loads from limiting equilibrium equation 12 p2178 A69-25997

Elastic stress created by perpetual motion of isotropic elastic solid in static space-time 12 p2130 A69-26283

Incompressible elastic-plastic solid flow through rough converging conical channel analyzed using Mises yield condition and Prandtl-Reuss equations 12 p2063 A69-27114

Controllable motions of compressible homogeneous isotropic solids, anisotropic solids and fluids with memory under constant body force 12 p2189 A69-27118

Book on microscopic and macroscopic fundamentals of fracture of solids covering structural, metallographic and physical aspects, dislocations, brittle fracture, etc 13 p2274 A69-27220

Solid state physics applications to fracture problems and structure of solids, considering crystallography, lattice vibrations, defects, electron bands, alloys and surface physics 13 p2316 A69-27221

Fracture and equilibrium position of dislocations in discrete and continuously distributed dislocations arrays including stress due to crack, energy considerations and crack initiation 13 p2358 A69-27222

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition 13 p2274 A69-27225

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks 13 p2359 A69-27290

Shock waves in solids, discussing gas gun firing and explosive detonating at specimen, transformations measurement and materials processing applications 13 p2360 A69-27341

Analytical expressions for nonlinear partial differential equation of heat conduction in solids, giving temperature as function of time and location 13 p2372 A69-27434

Diffraction images of coherently illuminated objects in presence of aberrations stressing images of edges, disks and bars 13 p2297 A69-27451

Unsteady temperature distribution in solid sphere with variable internal heat source and surface subjected to variable heat flux 13 p2373 A69-27773

Transient one dimensional temperature distribution determined for bodies with internal heat generation and nonlinear boundary condition, using Biot variational method [ASME PAPER 68-HT-6] 13 p2374 A69-27775

Friction wear of solid bodies based on microscopic contact system model, deriving particle distribution law from physico-statistical analysis 13 p2268 A69-28051

Transport processes under adiabatic conditions between external magnetic field and thermal and electrical gradients in solid, defining galvanomagnetic and thermomagnetic effects 13 p2299 A69-28129

Variational principle based on assumed stress hybrid method suitable for finite element analysis of incompressible solids 13 p2368 A69-28348

Periodic solutions for small nutation angle of quasi-linear autonomous system of equations of motion of heavy solid body moving around fixed point 14 p2445 A69-28896

Gas-surface interaction for trapping and energy exchange, comparing continuum and discrete lattice models for solids 14 p2409 A69-29092

Ultrasonic pulse-echo-overlap method modified for simultaneous measurement of time delay and relative voltages in determining sound velocities and attenuation of solids 14 p2450 A69-29567

Nonlinear oscillations stability of solid body connected to base by elastic springs of different rigidities under external forces 14 p2536 A69-29745

Soviet book on partially liquid filled solid body dynamics from viewpoint of space and aircraft applications 14 p2530 A69-29815

Variational principles of solid mechanics for finite element analysis of solid continua 15 p2705 A69-30429

Cylindrical wave propagation in thermoelastic incompressible isotropic solids, considering cases of zero and nonzero coefficient of thermic dilation 15 p2707 A69-30626

Integrable cases of equations of motion of solid body around fixed point located in potential field of elastic supports 15 p2653 A69-31194

Similarity criteria for plastic deformation theory of body under pressure and nonuniform temperature field, considering strength calculations 15 p2714 A69-31200

High temperature ultrasonic testing to measure and control solid materials early in processing 15 p2632 A69-31514

Double shock method for detecting pressure limits in magnetic phase transition of solids 16 p2825 A69-31696

Solid materials erosion rate as function of cumulative damage generated by liquid droplets impingement 16 p2794 A69-31904

Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts 16 p2872 A69-31906

Temperature distribution of solid spherical satellite under solar radiant heating solved by variational calculus or point matching methods 16 p2877 A69-31922

Inhomogeneity effects on elastic waves generated by impulsive loading of surface using asymptotic method, discussing high stress intensification regions 16 p2873 A69-32157

Radiation effect on inorganic solids isothermal decomposition induction period, deriving equations for conditions representing various kinetics combinations during irradiation [WSCI PAPER 69-21] 16 p2832 A69-32359

Book on mechanics of deformable media covering fluid and solid mechanics and applications to irrotational flows of compressible and incompressible fluids 16 p2813 A69-32789

Wave generation in infinite micropolar elastic solid body analyzed by linearized equations of motion
17 p3053 A69-33018

Linear pyrolysis of condensed materials in presence of heat loss into ambient medium expressed in terms of thermoneutral and thermal reactions
17 p3069 A69-33134

Stable motions determination of solid bodies with liquid filled cavities and satellites motions stability in central Newtonian force field
17 p3005 A69-33228

Dynamic model of bodies with microstructure and nondissipative energy motion, discussing action steadiness, invariance conditions and Galilean relativity
17 p3067 A69-34149

Shock wave propagation induced by nonuniform instantaneous internal heating of nonlinear elastic strain hardening solid material [SAWE PAPER 69-APM-17]
18 p3214 A69-34393

Rotary motion stability of axisymmetric solid body or gyroscope suspended on string and containing ellipsoidal cavity filled with liquid
18 p3135 A69-34558

Inertial characteristics determination error influence of solid body on damping system parameters
18 p3171 A69-34562

Transposition formula for finite displacements of solid body having fixed point relative to fixed axes
18 p3172 A69-34589

Fixed point reaction force in mobile system of solids coupled kinematically, examining zero dynamic components
18 p3172 A69-34590

Torque calculations about joints of rigidly chain-like arranged clusters of flying bodies
18 p3208 A69-34776

Strains in solids of any form, using moire method combined with holographic interferometry
18 p3139 A69-35280

Limiting equilibrium of infinite brittle body weakened by internal plane elliptical crack, determining critical loads and stresses at crack
18 p3226 A69-35379

Longitudinal and transverse wave propagation in homogeneously deformed isotropic elastic solids, considering Hadamard and Green materials
19 p3440 A69-36588

Solid and structural mechanics theories noting continuum mechanics role
19 p3443 A69-36776

Body relations in continuum mechanics of solids, examining temperature influence varying in time and space
19 p3444 A69-36805

Thermal stresses in solids, discussing spaces and half spaces, thick walled systems, shells, plates, disks and bars
19 p3447 A69-36856

Continuum mechanics of micropolar fluids and solids, discussing thermodynamical restrictions on elasticity and viscosity coefficients, deriving field equations and boundary conditions
20 p3624 A69-37582

Viscoelastic nonlinear and linear solids models and rheological equations, studying stress-strain states of various complex Hookean, Kelvin, Maxwellian and Zener elements
20 p3625 A69-37601

Monograph on motion of solid body with cavities containing viscous liquid, covering kinetics involving completely or partly filled fluids
20 p3578 A69-38200

Forced recombination scattering of light on Rayleigh polarization waves in isotropic solid body with small elastooptical constants
21 p3770 A69-38963

Reaction forces calculated for system of connected solid bodies of various composition during accomplishment of given motion
21 p3771 A69-39085

Differential equations for variable mass solid body motion about fixed point having cavities filled with ideal fluid
21 p3771 A69-39106

Equations governing stress waves generated by rapid nonuniform heating of solids, comparing elastoplastic with purely elastic solutions
21 p3837 A69-39158

Rodrigues formula derivation procedure and summation formula derivation for finite rotations of solid body, noting simplifications from kinematic considerations
21 p3772 A69-39183

Constitutive equations for homogeneous viscous fluid and Kelvin-Voigt viscoelastic solid in electromagnetic field, using linear irreversible thermodynamics and continuum mechanics
21 p3851 A69-39289

Dynamic plasticity of nonsymmetrical free flight collision impact of crystalline solids, using linear temperature dependent stress-strain function and finite amplitude wave expansion
21 p3840 A69-39298

Gas dynamic processes during vaporization of solid material under Nd laser emission, using high speed photography
21 p3740 A69-39551

Coupled acoustic and spiral EM waves drift instabilities in bounded plasma of solid body found to be convective
21 p3782 A69-39556

Solid body filled with ideal incompressible liquid, analyzing stability of permanent rotations
21 p3773 A69-39837

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation
22 p4047 A69-41123

Deformation tractions in undeformed and curved cuboid flexure and inverse flexure determined by stress-strain relations for homogeneous isotropic compressible materials
23 p4226 A69-41521

Stress-strain state in infinite medium with cavity under triaxial tensile force obtained from integrodifferential equation deduced from equilibrium equation
23 p4226 A69-41703

System asymptotic motion stability for given parameter values using algorithms with aid of R functions
23 p4191 A69-41704

Time and plasticity effects on fracture determining solids strength as function of crack dimension
23 p4236 A69-42530

Semiinverse method involving plane wave expansions to solve elliptical crack expansion and self similar phase transformation in anisotropic solid
24 p4397 A69-42749

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient
24 p4246 A69-43485

SOLIDS FLOW
Small strain plasticity theory for planar slip in specific nickel base alloy deformation
13 p2362 A69-28120

SOLIDUS
Subsolidus equilibrium study in potassium tantalate K niobate system for dry and hydrothermal runs, using X ray powder diffraction and petrography
08 p1332 A69-20373

Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247

SOLUBILITY
Saturation solubility of carbon in cobalt and nickel with respect to graphite determined by vapor transport experiments over large temperature range
01 p0092 A69-10060

Solubility of helium in liquid fluorine increases with temperature exhibiting reverse order
01 p0142 A69-11258

Nitrogen solubility measured in liquid Fe-Cr-Ni-Al alloys, noting solubility increase with increasing Al content
06 p0942 A69-17228

Nitrogen solubility in liquid Fe-Cr-Ni alloys increases with increased Cr concentration between 1550-1700 C and at one atm N pressure
06 p0942 A69-17229

Alloying elements effect on nitrogen solubility in liquid Fe-Cr-Ni alloys, defining quantitatively changes in solubility
06 p0943 A69-17234

Pressure-temperature dependence of nitrogen solubility in tungsten at 2400-3000 C
07 p1168 A69-19602

Rhenium effect on lattice solid solubility of oxygen in tungsten, calculating rhenium-oxygen cluster minimum binding free energy
08 p1329 A69-20007

Hydrogen solubility in solid and liquid phases of nickel-molybdenum and nickel-tungsten alloys at high temperatures
08 p1333 A69-20448

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects
09 p1555 A69-21470

Nonpolar gases solubilities in aqueous KOH solutions in temperature range 25 to 100 C, noting activity coefficients, salting out coefficients and heats of solution
10 p1651 A69-22937

Nitrogen solubility in molten niobium and molybdenum at high temperatures in argon flow
10 p1710 A69-23213

Hydrogen solubility in solid and liquid Ti close to melting point, showing no effect on welds and castings porosity
11 p1905 A69-24963

Group 4A carbides and nitrides formation in Mo by arc melting, determining threshold solute metal-interstitial atom ratios
12 p2117 A69-27136

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects
15 p2669 A69-30715

Model compounds and polymers solubility parameters correlated with refractive index data
21 p3751 A69-38552

SOLUTES
Field ion microscope study of imaging solute atoms of dilute Pt-based W, Pd, Co, Ni and Au alloys
01 p0092 A69-10055

Solute vertical stabilizing gradient inhibition of thermal convection of fluid layer under temperature gradient, discussing effects on two dimensional flows motion
03 p0532 A69-13012

Lifetime of highly soluble isolated dense spherical solute particle in solvent, taking into account molecular diffusion, kinetic limitations, etc
10 p1651 A69-22939

SOLUTION
Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition
06 p0961 A69-17141

SOLUTIONS
NT DETONABLE GAS MIXTURES
NT GAS MIXTURES
NT NUCLEAR EMULSIONS
NT PHOTOGRAPHIC EMULSIONS
NT SOLID SOLUTIONS

Nonpolar gases solubilities in aqueous KOH solutions in temperature range 25 to 100 C, noting activity coefficients, salting out coefficients and heats of solution
10 p1651 A69-22937

Nondestructive thermal tests using liquid crystals thermal sensitivity for measurement of temperature changes and visualization of temperature gradients
11 p1892 A69-25293

Helix to coil transition for triple stranded macromolecule in solution, calculating ring weighting and partition functions and intact bonds
24 p4353 A69-43812

SOLVENTS
Solution velocity and turbulence effects on solvent cleaning of corrosion resistant steel tubing, discussing fluidity forces and cleaning formulation
08 p1318 A69-19807

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect
08 p1341 A69-20513

Solvent effect in catalytic hydrogenation reaction of Schiff bases of alpha-keto acids with optically active alpha-alkylbenzylamine
12 p2026 A69-25779

SOMMERFELD APPROXIMATION
Eigenvalues for Orr-Sommerfeld equation by difference technique for Reynolds number range 5780-729000, determining Poiseuille flow stability in plane channel
03 p0416 A69-13654

Sommerfeld type and Fermi type approximation analytical solutions of Thomas-Fermi differential equations for positive ions
10 p1726 A69-23525

Relativistic generalization for polar Sommerfeld rosette of Fourier series expansions by Lagrange and Bessel for particle motion in Keplerian field
16 p2811 A69-31607

Asymptotic theory of Orr-Sommerfeld problem for symmetric channel flow stability
17 p2958 A69-34151

SONAR

- Visual sonar target detectability probability function of retinal position and brightness contrast
02 p0203 A69-12218
- Sonar receiver reduced averaging processing in presence of extended and point targets compared with full averaging processor
04 p0562 A69-15477
- Digital signal processing in radar, sonar and communication
05 p0718 A69-15749
- Stationary coherent /hologram/ radar and sonar using zone plate action to provide range information
05 p0721 A69-16578
- Hologram form of forward scatter bistatic radar or sonar
07 p1078 A69-18866
- Remote oceanographic sensing from ships, aircraft and spaceborne platforms, using active /radar and laser/ and passive sensors in visible, IR and microwave regions
12 p2075 A69-26997
- Cramer-Rao and split-beam tracker techniques compared for optimum bearing error attainable with linear passive sonar array in spatially incoherent noise environment
20 p3576 A69-37322

SONDES

- NT DROPSONDES
- NT IONOSONDES
- NT RADIOSONDES
- NT RAWINSONDES
- Ozoneonde based on modified Brewer electrochemical sonde
01 p0079 A69-10218
- Meteorological PTU /pressure, temperature, humidity/ probe for lower atmospheric layers, discussing detectors and assembly qualities
04 p0601 A69-15229
- Acoustic sounding of atmospheric structure, utilizing energy backscattered from temperature fluctuations in turbulent regions
14 p2448 A69-29527
- Vertical ozone distribution determination discrepancies between Brewer-Mast electrochemical sonde and Umkehr methods, discussing influence of seasonal and diurnal variations
16 p2786 A69-32630
- Optical probe for determining ozone vertical distribution at high altitudes, discussing optical method requirements and ozoneonde construction
16 p2792 A69-32637

SONIC ANEMOMETERS

- Sonic anemometer for wind velocity through pulse communication transducers noting applications to aerospace vehicle design
10 p1692 A69-23255
- Sonic anemometers for atmospheric turbulence, discussing variance spectra of vertical wind component and temperature in atmospheric surface layer
16 p2808 A69-32600

SONIC BOOMS

- Sonic bang intensities in stratified atmosphere obtained by geometrical acoustics and linear theory modifications to take account of nonlinear effects
01 p0008 A69-10056
- Aerodynamic configurations to reduce sonic boom at supersonic speeds
01 p0007 A69-11028
- Spikes on sonic boom pressure waveforms due to simultaneous focusing and diffraction of planar N wave by inhomogeneous atmosphere layer
01 p0011 A69-11280
- Air coupled seismic waves generated by jet fighters flying at high altitudes and supersonic speeds
01 p0077 A69-11281
- Sonic boom effect on corticosteroid level in human blood, noting no changes
03 p0378 A69-14209
- Human orienting reaction to sonic boom, determining degree of discomfort
03 p0378 A69-14210
- Concorde and Boeing supersonic transport overland sonic booms, discussing social, political and legal reactions
06 p0868 A69-17899
- Sonic boom reduction devices, discussing supersonic electroaerodynamic flow with shock waves, gas discharge one dimensional continuum analysis, power expenditure and aerodynamic interaction
[AIAA PAPER 69-38] 06 p0869 A69-18150

Sonic boom minimum achievable shock front pressure rise and overpressure level prediction for given aircraft and flight conditions
08 p1253 A69-19903

Sonic boom reduction by azimuthal redistribution of supersonic aircraft pressure field variation
[AIAA PAPER 68-159] 09 p1434 A69-21948

Acoustical, psychological, sociological and political aspects of human reaction to SST sonic booms over populated areas, tabulating Boeing and Concorde boom intensities
14 p2408 A69-29151

Human tolerance to SST sonic booms through scheduled community exposure, discussing physiological effects and acceptability level
14 p2541 A69-29153

Sonic boom damage legal claims, discussing causal relationship validity and claims processing
14 p2541 A69-29155

Sonic boom produced earth particle velocities, noting seismic effect limitation to boom pressure envelope area and earth surface boundary
14 p2393 A69-29880

Fast visual task performance indoors found dependent on sound pressure level
15 p2550 A69-30305

Aircraft created pressure patterns responsible for sonic boom, discussing design techniques for noise reduction
15 p2550 A69-30369

Sonic boom damage to structures from supersonic aircraft overflights using inductive and deductive approaches
15 p2585 A69-30370

Sonic boom simulation methods using shock tube, booth type simulators, ballistic ranges and explosives, discussing unmanned data recorder as monitoring device
15 p2585 A69-30371

Slender body aerodynamics combined with wave propagation theory for sonic booms of aircraft configurations, propeller and helicopter noise, sonic boom alleviation, etc
16 p2732 A69-31867

Bow shock wave during rectilinear flight with varying acceleration, describing sonic boom loop mechanism
16 p2734 A69-32005

Legal, social and physical effects of supersonic flight, discussing damage claims validity and recovery resulting from breaking of sound barrier
17 p3075 A69-32841

Sonic boom theory for steady flight in atmosphere without winds, discussing sonic boom reduction by aerodynamic means
17 p2902 A69-34017

Passenger transport cruising at low supersonic speeds without sonic boom generation on ground, discussing overpressures, signature characteristics and corridor widths
[AIAA PAPER 69-776] 19 p3244 A69-35647

Scattering equations for sonic boom waveform spike perturbations produced by atmospheric turbulence, discussing supersonic aircraft pressure signatures
21 p3646 A69-38689

Damped mass spring system response to sonic booms, considering effects of structural damping, total/ positive phase duration ratio and N wave rise time
21 p3647 A69-38987

Acoustoelastic interaction effects of sonic bangs on natural frequencies response of large windows backed by closed cavity
21 p3836 A69-38988

Supersonic aircraft sonic bangs loudness level calculations by model waveforms with allowance for interaction between incident and ground reflected shock waves
23 p4063 A69-42454

Supersonic aircraft design data, costs and benefits, discussing origin and significance of sonic boom
24 p4252 A69-42997

Sonic boom signatures produced by diverse SST configurations during cruise, indicating aircraft length as overpressure limit factor
24 p4253 A69-43661

Sonic boom lower bounds determination in midfield based on modification of Jones results by minimizing overpressure or shock strength of boom wave positive component
24 p4254 A69-43662

Isobaric inhomogeneous atmosphere effect on sonic boom determined, using analytic equation relating transmitted wave intensity to local free stream Mach number
24 p4254 A69-43728

SONIC FLOW

U TRANSONIC FLOW

SONIC NOZZLES

Sonic nozzle optimal profile determination with and without cylindrical throats, noting sonic line curvature importance on discharge coefficient
02 p0188 A69-12037

Sonic nozzle mass flow measurement errors at high supply pressures and moderate temperatures due to real gas effects
[ASME PAPER 68-WA/FM-4] 05 p0699 A69-16114

Controllable sonic flow orifice, discussing mass flow rate, area and upstream stagnation pressure
10 p1693 A69-23343

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas
[AIAA PAPER 69-657] 17 p2892 A69-33465

Rarefied gas dynamics for continuous medium and discrete molecules assemblage, discussing flow over blunt model and free jet flow from sonic orifice
18 p3122 A69-34812

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem
19 p3241 A69-36721

Flowfield properties of two dimensional supersonic jet near sonic nozzle exit by numerical method of characteristics
22 p3860 A69-40920

SONIC SPEED

U ACOUSTIC VELOCITY

SONIC WAVEGUIDES

U ACOUSTIC DELAY LINES

SOOT

Oxygen addition to fuel stream effect on formation of soot and polycyclic aromatic hydrocarbons in ethane-air and ethylene-air diffusion flames
02 p0205 A69-12318

Optical constants of soot applied to heat flux calculations, discussing soot particles concentration determination in hydrocarbon combustion products
[ASME PAPER 68-HT-13] 13 p2374 A69-27777

SORBENTS

Experimental program to evaluate regenerable sorbents for carbon dioxide removal in space cabin environments
09 p1447 A69-22552

SORPTION

NT ADSORPTION

NT CHEMISORPTION

Cesium sorption in materials for thermionic converters reservoirs, discussing dimensional stability of porous alumina, W and C samples
14 p2463 A69-29220

SORTING

U CLASSIFYING

SOUND

U ACOUSTICS

SOUND AMPLIFICATION

Ultrasound propagation amplification coefficient in high permittivity semiconductors with electric field based electron-phonon interaction
05 p0809 A69-16372

Absorption and amplification of sound in many valley semiconductors in strong electric field, noting dependence on electron heating and relaxation times
07 p1199 A69-18681

Sound amplification role in increasing spread of bounded two dimensional smoke jet studied for application to fluid amplifiers
[ASME PAPER 69-VIBR-3] 10 p1640 A69-24161

SOUND BARRIER

U ACOUSTIC VELOCITY

SOUND FIELDS

Stability of tangential velocity discontinuity between two media with different densities situated in acoustic field
06 p0910 A69-17344

Broadband sound field generated aerodynamically by relatively smooth disk rotating in own plane, noting turbulent boundary layer flow and surface roughness effect
09 p1539 A69-21718

Boundary layer suction sound emission, analyzing turbulent flow past elastic plate with reinforced slots performing flexural and torsional vibrations
09 p1483 A69-22638

Sound generation by unsteady rotational flow as singular perturbation problem solved by matched asymptotic expansions, discussing flow and radiation fields 13 p2299 A69-28187

Acoustic hologram recorded by laser flying spot scanner 13 p2265 A69-28662

Ultrasound holography for imaging opaque structures, noting distortion due to long wavelength of sound field and distortion reduction techniques 13 p2265 A69-28663

Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields 15 p2631 A69-31505

Monograph on interaction between flow and sound fields as singular perturbation problem, using matched asymptotic expansion 17 p2949 A69-32998

Far field helicopter rotor noise radiation, analyzing blade slap, rotation noise, vortex noise effects and loading harmonics utilizing computer program 18 p3090 A69-34322

Hydrodynamic noise as pseudosound field resulting from pressure variations in turbulent fluid flow, using Lighthill acoustic analogy 18 p3123 A69-34921

Helicopter rotor rotational and vortex noises prediction methods and trends 18 p3088 A69-35224

Fluctuating heat transfer and flow measurements for circular cylinder in crossflow with simultaneously imposed transverse standing sound field 18 p3124 A69-35384

Acoustic field due to jet aircraft in motion, describing convection parameter modification in generalized sound pressure equation 20 p3462 A69-37757

SOUND GENERATORS

Sound radiation from vibrating bodies, noting errors in Lighthill conclusion 02 p0282 A69-12800

Anomalous infrasonic signals observed during launching of space vehicles with thrust greater than 200,000 lb, noting supersonic and subsonic group velocity spreads 07 p1078 A69-18853

Analytical model of spoiler generated sound in jet pipe, presenting data on level, spectrum and directivity of sound 07 p1183 A69-19462

Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona 08 p1380 A69-20645

Broadband sound field generated aerodynamically by relatively smooth disk rotating in own plane, noting turbulent boundary layer flow and surface roughness effect 09 p1539 A69-21718

Turbulent boundary layer sound emission effect on elastic plate, discussing pressure pulsation spectrum reflection 13 p2246 A69-27538

Rolls Royce noise and compressor test facility for continual lowering of engine sound pressure levels, considering sound generating mechanisms 13 p2240 A69-27616

Monograph on sound generation by turbulence and surfaces in arbitrary motion, discussing sound and multipole fields and governing equations 13 p2247 A69-27974

Acoustic power transferred to plane homogeneous elastic structures and cylindrical shells by neighboring sound sources 13 p2363 A69-28186

Sound generation by unsteady rotational flow as singular perturbation problem solved by matched asymptotic expansions, discussing flow and radiation fields 13 p2299 A69-28187

Vibration/acoustics environmental testing, discussing advantages of digital computer control system and digital noise generation techniques 15 p2586 A69-30387

Vibration/acoustics digitally controlled environmental testing, describing configuration and operation of control system and statistical requirements for noise generation 15 p2587 A69-30388

Acoustic fluidic sensor /sonicell/ combining sonic generator based on edgetone principles with sensor dependent on laminar stream acoustic disturbance 15 p2616 A69-31302

Turbulent boundary layer sound emission effect on elastic plate, discussing pressure pulsation spectrum reflection 20 p3518 A69-38204

SOUND INTENSITY

Intense transverse resonant acoustic field interaction with viscous fluid flows [ASME PAPER 68-WA/FE-8] 05 p0748 A69-16091

Intense transverse resonant acoustic field interaction with viscous fluid flows [ASME PAPER 68-WA/FE-8] 14 p2430 A69-29444

Helicopter rotor vortex noise data analyzed for noise suppression, obtaining sound power equations 17 p2896 A69-34034

Sound evoked DC changes on intact skull of adult humans using data from AgCl electrodes, investigating intensity function, analyzing data by computer 23 p4098 A69-42101

SOUND MEASUREMENT

U ACOUSTIC MEASUREMENTS

SOUND PERCEPTION

U AUDITORY PERCEPTION

SOUND PRESSURE

Rotating spectral and spatial sound pressure distribution in propeller duct calculated on basis of propulsion quantities, noting effect of tip clearance 04 p0544 A69-14867

Fast visual task performance indoors found dependent on sound pressure level 15 p2550 A69-30305

Acoustic pumping system for propellant control at zero gravity, describing system operation by hydraulic analogy for liquid sloshing prevention 20 p3548 A69-37294

Acoustic field due to jet aircraft in motion, describing convection parameter modification in generalized sound pressure equation 20 p3462 A69-37757

SOUND PROPAGATION

NT VOICE

Kinetic theory of sound propagation in rarefied gas using generalized orthogonal polynomial expansion, evaluating adequacy of nonequilibrium distribution postulated by Mintzer 03 p0466 A69-13156

Cylindrical sound pulse propagation in homogeneous layer under inhomogeneous half space 04 p0630 A69-14531

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency 04 p0679 A69-14906

Equations for electron scattering by sound in n-type semiconductors, giving corrections to sound propagation velocity during interactions 07 p1199 A69-18680

Anomalous infrasonic signals observed during launching of space vehicles with thrust greater than 200,000 lb, noting supersonic and subsonic group velocity spreads 07 p1078 A69-18853

Acoustic holographic measurement of surface deformation generated by sound waves impinging on gas-liquid interface, discussing acoustic amplitude components 10 p1695 A69-23542

Plane wave solutions for acoustic propagation in polyatomic gas by using Sirovich-Thurber method for polyatomic kinetic models 11 p1920 A69-24287

Monochromatic flexural waves passage through elastic insert between plates, determining wave absorptivity dependence on wave frequency 12 p2182 A69-26659

Dissipative fluid sphere motion due to impulsive point source calculated by finite difference scheme, assuming Voigt and Maxwell type internal friction mechanisms limitations 14 p2485 A69-29026

Discrete sound radiation theory considering rotational noise as dominant rotor noise and stressing fluctuating forces as typical of helicopter rotor 18 p3090 A69-34323

Ion density, electric field and electron temperature responses to gas density perturbation calculated for acoustic wave propagation in gas discharge using hydrodynamic equations 20 p3578 A69-38243

Superluminal group velocities in relation to causality axion, considering sound propagation in ultradense matter and particles of imaginary mass /tachyons/ 21 p3769 A69-38543

SOUND RANGING

Waveguide arc location by sound ranging to determine RF breakdown onset in high power microwave system, describing experiment determining feasibility 04 p0576 A69-14762

SOUND TRANSDUCERS

NT ELECTROACOUSTIC TRANSDUCERS

NT HYDROPHONES

Vibrational characteristics of sonar transducer analyzed by optical holographic interferometry 04 p0598 A69-14871

Acoustic bulk-surface wave transducer for shear or longitudinal wave transformation in nonpiezoelectric material at HF 15 p2607 A69-30167

Acoustic fluidic sensor /sonicell/ combining sonic generator based on edgetone principles with sensor dependent on laminar stream acoustic disturbance 15 p2616 A69-31302

SOUND TRANSMISSION

NT TELEPHONY

Acoustic and electromagnetic energy propagation in lower ionosphere and atmosphere for energy pulse generation by chemical explosion 07 p1078 A69-18844

Sonic transmission of diatomic nitrogen during nozzle flow, presenting density dependence of natural oscillation energies and temperature 10 p1632 A69-22912

Atmospheric LF and HF sound transmission anomalies, discussing Tyndall paradox for fog signals propagation over ocean 13 p2301 A69-28666

Weak shock wave structure in temperature relaxation media determined using theory of sound absorption in fluids 19 p3301 A69-36842

Frequency and space averaging effect on variability and standard deviation of multimode media transmission responses, with application to reverberant media 23 p4115 A69-41576

SOUND VELOCITY

U ACOUSTIC VELOCITY

SOUND WAVES

NT AERODYNAMIC NOISE

NT AIRCRAFT NOISE

NT ELECTROACOUSTIC WAVES

NT ENGINE NOISE

NT JET AIRCRAFT NOISE

NT LAMB WAVES

NT NOISE [SOUND]

NT SONIC BOOMS

NT THERMAL NOISE

Electrostatic polarization field formation by acoustic wave propagation through ionosphere, calculating effect on ionization drift velocity 01 p0068 A69-11110

Ion acoustic wave dispersion in highly ionized Ar plasma in longitudinal magnetic field, noting effects of several phenomena 01 p0133 A69-11216

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas 02 p0292 A69-12555

Acoustoelectric domains in CdS, making time evolution visible by means of modified optical strain birefringence and stroboscopic illumination 02 p0258 A69-12618

Sound radiation from vibrating bodies, noting errors in Lighthill conclusion 02 p0282 A69-12800

Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number 03 p0414 A69-13137

Electron fluid compression coefficient from simultaneous measurement and correlation of absolute magnitudes of ion acoustic wave potential and accompanying plasma density perturbation 03 p0475 A69-13148

Kinetic theory of sound propagation in rarefied gas using generalized orthogonal polynomial expansion, evaluating adequacy of nonequilibrium distribution postulated by Mintzer 03 p0466 A69-13156

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations 03 p0459 A69-13274

Infrasonic waves recordings from Saturn 5 vehicle, observing signal reversal occurrence 03 p0509 A69-13358

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
03 p0491 A69-14054

Submerged rigid circular cylinder displacement under influence of plane acoustic pressure wave solved by operational method
04 p0667 A69-14261

Long distance propagation of acoustic gravity waves ducted in thermosphere, noting effect of seasonal variations in polar region
04 p0595 A69-15437

HF plane sound waves in ideal gases with internal dissipation, considering particular applications to dissociating diatomic and vibrational relaxing gases
05 p0792 A69-15723

Acoustic holograms, describing electronic method of reconstructing holographic image in order to avoid multiple image problem
06 p0923 A69-16933

Longitudinal acoustic waves propagation in partially ionized gas in external electric field, taking into account ionic collisions with electrons and neutral particles
06 p0963 A69-17079

Time averaged optical holographic interferometry of standing longitudinal acoustic waves in square cross section duct
06 p0923 A69-17150

Spatial distribution of vertically moving ionized formations in ionosphere suggests acoustic gravity waves excited in polar regions as cause
06 p0922 A69-17749

Solar spectral line profiles for photosphere disturbed by short period acoustic waves
07 p1217 A69-19239

Elastic constants of composite materials by dispersion relation of sound waves for long wavelength, assuming periodicity in three dimensional rectangular lattice
07 p1236 A69-19457

Acoustic emission from welds in stainless steel plates used for detecting defects in single and multiple pass machine welds
08 p1318 A69-19963

Landau damping of long wavelength ion acoustic waves in collision-free one dimensional plasma with gravity field
08 p1359 A69-19983

Ion-acoustic wave excitation in plasma layer affected by relatively smooth disk rotating in own plane, noting turbulent propagation layer flow and surface roughness effect
08 p1370 A69-21025

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
09 p1484 A69-21528

Broadband sound field generated aerodynamically by relatively smooth disk rotating in own plane, noting turbulent propagation layer flow and surface roughness effect
09 p1539 A69-21718

Holographic technique application to radio and sound wave ranges, discussing incoherent holography development to overcome difficulties in image reconstruction of stationary objects
09 p1498 A69-22133

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
09 p1492 A69-22710

Combination backscattering on ionic sound waves assumed responsible for unexpected features of radio signals reflected from sun
10 p1776 A69-23219

Magnetoionic formulas similarity in ionospheric radio propagation and atmospheric acoustic gravity wave propagation above electron gyrofrequency
10 p1655 A69-23419

Microwave frequency room temperature acoustic surface wave propagation losses in lithium niobate measured by laser light deflection, discussing propagation and insertion losses
10 p1703 A69-23511

Acoustical transparencies illuminated by sound waves for optical imaging and ultrasonic diffraction, noting application to visualization of inhomogeneities in samples
10 p1695 A69-23546

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by super-sonic carrier drift currents
11 p1926 A69-24641

Sound field generation by isotropic turbulence through finite strength shock, estimating acoustic energy flux from supersonic jet containing shock waves
11 p1872 A69-25130

Unstable ion sound wave propagation across magnetic field in collisionless shock waves, noting drift instability
11 p1930 A69-25273

Acoustic frequency of longitudinal self oscillations during vibrational fuel combustion in afterburner, taking into account nonlinear properties of heat supply zone
11 p2002 A69-25339

Multiple information storage in sampled hologram in space division multiplexing holography, constructing hologram with sound waves and reconstructing images with laser light
12 p2079 A69-25921

Acoustic wave generation in neutral particle component of weakly ionized gas by variation of electron temperature with low power RF signal
12 p2134 A69-26096

Acoustic waves in ionosphere relation to electron content fluctuations detected from beacon satellite BE-B signals
12 p2065 A69-26104

Velocity dependence of temperature waves /second sound/ in liquid He II measured as function of relative velocity for normal and superfluid
13 p2297 A69-27460

Planetary long waves behavior in atmospheric models, explaining unsteady components by means of filtered equations
14 p2472 A69-28782

VHF surface acoustoelectric amplifier investigated in DC drift field using composite spatially adjacent structure of lithium niobate and silicon film
14 p2422 A69-29559

Moving striations relations to ion acoustic waves in DC discharge in neon at various pressures, discharge currents and measurement excitation modes
14 p2494 A69-29695

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
15 p2658 A69-30252

Substitute kernel approximation for acoustic waves radiative transfer equations for nongray gas near equilibrium
15 p2717 A69-30791

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves
15 p2662 A69-30947

Ion-acoustic oscillations effect on weakly ionized plasma electrical conductivity, using BGK collision integral model
15 p2662 A69-30970

Disturbance currents from penetration of acoustic waves in weakly ionized gas, analyzing wave interaction with DC glow discharge
15 p2665 A69-31547

Single particle and collective excitations of plasmas in solids and interactions with acoustic and electromagnetic waves in magnetic field
16 p2821 A69-31820

Discrete layers criterion for multilayer approximation to real atmosphere in acoustic gravity wave propagation
16 p2774 A69-31980

Discharge parameters modulation caused by acoustic wave propagating in partially ionized plasma, deriving perturbation current density and irradiated light intensity
16 p2752 A69-32364

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
16 p2782 A69-32489

Charged particles concentration change during vertical propagation of acoustic wave in F layer found transforming electric field into circularly polarized wave
16 p2783 A69-32523

Decimeter waves Doppler shift shown inversely proportional to wave frequency from electron density variation caused by acoustic wave propagation in ionosphere
16 p2755 A69-32610

Shear layer effect on plane sound waves, discussing reflection and refraction at velocity discontinuity between two regions of fluid
17 p3005 A69-32954

Sound effects on turbulent flame in gasoline-air mixture jet in Toeppler device with pulsed light source, measuring ionization in combustion zone
17 p3069 A69-33141

Electronically tunable lithium niobate optical filter utilizing collinear acousto-optic diffraction in anisotropic medium
17 p2943 A69-34157

Elastic circular cylindrical panel behavior in fluid with acoustic shock wave, allowing for propagation waviness of elastic stresses
18 p3216 A69-34579

Acoustic gravity waves generated in isothermal atmosphere by ground energy source calculated using stationary phase method and kinematic theory
18 p3129 A69-34953

Atmospheric whistlers and ion acoustic waves interaction in nonisothermal plasma, determining damping frequencies, decrements and wave polarization
18 p3180 A69-35024

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
18 p3182 A69-35047

Fluid-shell interactions, using piston theory and cylindrical-wave approximations
18 p3223 A69-35174

Scanned receiver acoustical holography for mapping or imaging sources of radiated acoustic energy on complex vibrator in water, noting application in air
20 p3576 A69-37323

Parametric excitation theory involving Langmuir and ion-acoustic waves for homogeneous plasma slab with specular particle reflection at slab walls
20 p3582 A69-38245

Acoustoclastic interaction effects of sonic bangs on natural frequencies response of large windows backed by closed cavity
21 p3836 A69-38988

Small amplitude acoustic waves propagating in compressible fluid with parallel shear flow and within constant gravitational field
21 p3772 A69-39241

Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
21 p3813 A69-39521

Coronae around helium stars and X ray sources, calculating acoustic energy generation rates in convection zones
21 p3813 A69-39522

Coupled acoustic and spiral EM waves drift instabilities in bounded plasma of solid body found to be convective
21 p3782 A69-39556

Collisionless damping of large amplitude ion acoustic waves excited externally in thermally ionized Cs plasma
22 p3991 A69-41008

Acoustical ray tracing in horizontally layered and vertically sectioned atmosphere on digital computer using shifting Cartesian coordinate system
23 p4154 A69-41532

Acoustic gravity waves propagation over spherical earth with isothermal windless atmosphere, determining pressure perturbations
23 p4158 A69-42175

Stimulated Brillouin scattering application to measurement of hypersonic velocities and absorption in gigahertz frequency range, laser frequency shifting and Q switching, etc
23 p4167 A69-42183

Acoustical holography principles and reconstruction techniques, noting advantages of liquid-surface and temporal reference holography over optical counterpart
23 p4167 A69-42199

Optimal focusing of acoustic system for tube defectoscopy with circular normal waves
24 p4296 A69-42655

SOUNDERS

U SOUNDING

SOUNDING

NT BALLOON SOUNDING

NT IONOSPHERIC SOUNDING

NT ROCKET SOUNDING

Monograph on method and results of measurements of mobilities spectrum ion density and conductivity in upper troposphere and stratosphere
11 p1877 A69-24636

SOUNDING ROCKETS

NT AEROBEE ROCKET VEHICLE

NT BLACK BRANT 2 SOUNDING ROCKET

NT KAPPA ROCKET VEHICLES

NT SKUA ROCKET VEHICLES

NT SKYLARK ROCKET VEHICLE

Paraglider as recoverable sounding rocket dropped from helicopter, describing system design and flight tests
[UN PAPER 68-95445]

01 p0161 A69-10465

Meteorological rocket soundings and global synoptic observations, noting influence of atmospheric middle region
[UN PAPER 68-95405] 01 p0109 A69-10484

Japanese space research organizations, sounding rockets, meteorology, satellite communications, geodesy, etc
[UN PAPER 68-95563] 01 p0151 A69-10501

Destructible low cost meteorological sounding rocket Dart for global observation of upper atmosphere
[UN PAPER 68-95467] 01 p0161 A69-10510

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
01 p0144 A69-10586

Soviet studies of ionospheric electron densities by means of geophysical rockets and satellites
01 p0067 A69-10944

Balloon, rocket probe and satellite payloads, noting French contributions and CNES role
02 p0333 A69-11914

French /LRBA, ONERA and Sud-Aviation/ sounding rocket design emphasizing meteorological rockets and standard equipment
02 p0333 A69-11916

Canadian program of scientific rocket sounding of auroral phenomena, outlining systems approach, engineering and scientific cooperation requirements, etc
02 p0335 A69-12689

Astronomical alignment accuracy by rocket Casiopeia system, discussing scientific payload rotation and orientation by celestial bodies
03 p0462 A69-12850

French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems
03 p0518 A69-12851

Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors
03 p0427 A69-12980

European space research program, discussing government, science and industry in developing satellites and sounding rockets
03 p0520 A69-13584

Lower thermosphere composition over New Mexico, discussing rocket flight mass spectrometer measurements during summer 1967
03 p0425 A69-14009

Hybrid electropneumatic and electrohydraulic servosystem for actuation of gas jet nozzles of sounding rocket automatic pointing system
04 p0550 A69-15182

Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] 05 p0763 A69-16105

Suborbital probes, discussing UK sounding rockets Skylark, Petrel and Skua configurations, capabilities and performances
06 p1012 A69-16859

Meteorological rockets for space meteorology, aeronomy and weather forecasting, noting international programs involving U.S.S.R.
06 p1043 A69-17056

Interamerican Experimental Network of Meteorological Investigation with Rockets/EXAMET-NET/, discussing atmospheric parameters measurement at high altitude
[UN PAPER 68-95903] 06 p0950 A69-17062

Australian sounding rocket programs carried out in conjunction with U.S. satellite experiments
[UN PAPER 68-95214] 06 p1013 A69-17076

Separable payload control for three axis orientation of sounding rocket instruments, discussing error sensors and pointing accuracies
06 p1014 A69-17583

Rocket transportation for upper atmospheric measurements, discussing sensors and cost effectiveness
[AIAA PAPER 69-159] 06 p1018 A69-18066

Trajectory calculation of unguided meteorological rocket by digital computers and by equations of motion, discussing wind influence on ceiling and horizontal ranges
08 p1409 A69-20457

Macaque monkeys in weightless state on sounding rocket, noting vigilance level and characteristics
09 p1445 A69-22724

Rocket motors for ejection of instruments from sounding rocket payloads, considering powder cartridges and solid propellant motor characteristics
10 p1635 A69-23032

Meteorological rocket probes in Spain for wind and temperature measurements, including stratospheric circulation data
11 p1877 A69-24519

European space research program, discussing government, science and industry in developing satellites and sounding rockets
11 p1966 A69-25102

Second tacite sounding rocket test for measuring UV radiation in transition zone between upper ionosphere and space
11 p1887 A69-25213

European Space Research Organization projects including satellites and sounding rocket launchings for various missions
12 p2175 A69-26922

Meteorological rocket measurement of ionizing radiation flux in upper atmosphere, noting flux decrease with increasing electron energy
15 p2675 A69-30756

Hybrid motor in sounding rocket using amino plastic as fuel and nitric acid as oxidizer, discussing advantages in cost, handling, thrust, performance, etc
16 p2835 A69-31744

ASTRID high altitude sounding rockets orientation system aligning payload cones to target outside earth atmosphere, discussing software simulation with analog and digital computers, etc
17 p3001 A69-33424

Fluidic attitude control systems performance prediction from conventional control analysis emphasizing steady state positioning accuracy
17 p2904 A69-34069

Sounding rocket S band telemetry antenna operation, proposing quasi-isotropic pattern criterion to reduce effects of shadowing and interference
19 p3271 A69-36252

Cassiopee device for spacecraft or sounding rocket attitude control, describing gyroscopic control unit, sensor element and jet control devices
[ONERA-TP-707] 19 p3432 A69-36686

Sounding rocket aerodynamic stability as function of nose length and mass, discussing wind tunnel test data
19 p3432 A69-36761

Auroral sounding rocket research and instrumentation in Scandinavia, discussing auroral particles, optical measurements, probe experiments and scientific objectives
20 p3542 A69-37794

Japanese meteorological sounding rocket for atmospheric temperature and wind from 60 km down to balloon observation level, discussing principles and payload separation
20 p3543 A69-37795

Mesospheric wind measurement by meteorological rockets based on radar determination of drift trajectories of chaff clouds
20 p3529 A69-37797

Magnetically focused electronographic image converters for far UV photography and spectroscopy from sounding rockets, discussing stellar observations
20 p3543 A69-37801

VLF electric and magnetic fields observed in auroral zone with Javelin 8.46 sounding rocket, noting HF electrostatic noise bursts
20 p3533 A69-38080

Air launched sounding rockets design, development and testing noting aerodynamic loading and surface, propulsion unit, cost effectiveness, etc
21 p3820 A69-39218

Recovery system for high altitude sounding rocket payloads, noting air inflated flotation device, payload separation and parachute deployment
[AIAA PAPER 68-959] 21 p3820 A69-39227

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
22 p3934 A69-39964

Thrust optimization for sounding rocket to reach maximum altitude with given initial and propellant weight, using polygonal time function and multiple-parameter numerical technique
22 p4037 A69-41050

IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis
23 p4133 A69-41764

Sounding rocket measurements of electric and magnetic fields near auroral electrojet
24 p4310 A69-43188

SOUTH AMERICA

Educational TV coverage extension via synchronous satellites to areas of limited coverage, emphasizing South American countries
19 p3268 A69-36163

SOUTHERN HEMISPHERE NT ANTARCTIC REGIONS

Meteorological satellite observations value to Southern Hemisphere
[UN PAPER 68-95213] 01 p0109 A69-10513

Meteorological observations of Mars northern polar cap and Southern Hemisphere from northern summer solstice to early autumn
05 p0825 A69-16302

Atmospheric wind velocity in Northern and Southern Hemisphere, noting increase with height
06 p0921 A69-17747

Southern Hemisphere galactic H II regions continuum thermal radiation at 6 cm, noting maps for 28 of 36 sources, peak temperatures and emission and half intensity widths
07 p1206 A69-19271

Cosmic radio noise brightness distribution in Southern Hemisphere at 10.02 MHz, noting spectra of sources observed
07 p1206 A69-19272

Cosmic gamma radiation with energies above 100 Mev in southern sky, discussing results of balloon-borne spark chamber flight
08 p1377 A69-19787

Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data
09 p1534 A69-21405

Absolute flux density of five radio sources and relative flux densities of 37 sources defining absolute flux density scale for Southern Hemisphere
10 p1772 A69-22857

Tropospheric zonal wind semiannual oscillations in Southern Hemisphere tropics with westerly maxima and easterly minima in May and November
12 p2064 A69-26011

Spiral galaxies with connectors observed in Southern Hemisphere, noting galactic nuclei differences and nucleus relation to galaxy morphological type
12 p2165 A69-27030

Blocking processes synchronous development involving atmospheric circulation disturbances in Northern and Southern Hemispheres, noting localization in Pacific and Atlantic oceans
13 p2292 A69-27840

Temperatures and geopotentials of isobaric surfaces in Northern and Southern Hemispheres compared for summer and winter seasons
14 p2473 A69-29724

Troposphere behavior and stratosphere structure over Southern Hemisphere based on rocket measurements, comparing hemispheric atmospheric circulation intensities
14 p2477 A69-29832

Secular fluctuations of atmospheric circulation over Northern Hemisphere analyzed using isobaric and composite-kinematic surface maps, discussing analogies with Southern Hemisphere
14 p2478 A69-29836

Southern Milky Way spectral survey for selection, classification and photometry of interesting objects
17 p3031 A69-33101

Zonal winds in temperate latitude analyzed as function of latitude and month from GHOST balloon flights in Southern Hemisphere at 200 mb
17 p2997 A69-33163

Zonal flow intensity, velocity and kinetic energy of standing and traveling waves compared for Northern and Southern Hemispheres
17 p2997 A69-33392

F 2 region critical frequencies obtained during winter at Northern and Southern Hemisphere stations located in auroral and polar zones, correlating changes with ionization
20 p3526 A69-37665

F 2 layer seasonal anomaly, discussing global distribution observed by network of ionospheric stations
20 p3526 A69-37666

Long term computer produced multiple image satellite photomosaics for Southern Hemisphere, analyzing circulation, meridional bands, polar ice, cloud cover variations, etc
22 p3977 A69-40733

SOVEREIGNTY

1967 space Treaty Article 11, discussing provisions concerning private exploitation and supernatural body authority
20 p3635 A69-37107

SOYBEANS

Rats on casein, soybean and Chlorella diets for protein source noting soybean diet produced no appreciable changes in intestinal flora
02 p0197 A69-11490

SOYUZ SPACECRAFT

Soviet space program /1969/ objectives, Soyuz vehicle and future missions

06 p1002 A69-17265

Upper atmosphere and outer space investigations by Zond and Soyuz spacecraft

15 p2724 A69-31451

SPACE BIOLOGY

U EXOBIOLOGY

SPACE BUSES

U FERRY SPACECRAFT

SPACE CAPSULES

NT ESCAPE CAPSULES

NT MERCURY SPACECRAFT

Mars capsule feasibility model terminal dry heat thermal sterilization cycle determined from microbial data

02 p1201 A69-11772

Design of interface between Mariner Mars spacecraft and Mars planetary entry/landing capsule [AIAA PAPER 68-1162]

03 p0521 A69-13671

Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule

16 p2877 A69-31896

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization [AIAA PAPER 69-823]

16 p2840 A69-32675

Thermal control of Mars entry capsule with fiberglass honeycomb sandwich shell analyzed with and without aft thermal curtain, emphasizing cruise-flight phase

[AIAA PAPER 68-1082]

19 p3429 A69-35949

SPACE CHARGE

Silicon p-n junction avalanche current temperature dependence calculation by considering space charge current and multiplication factor as function of temperature

01 p0136 A69-10245

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity

01 p0137 A69-10258

Limited space-charge accumulation mode efficiency for gallium-arsenide diodes, taking into account electron-lattice relaxation processes

01 p0137 A69-10321

Space charge limited operation of insulated gate field effect transistors, discussing maximum transconductance and minimum parasitic capacitances

01 p0402 A69-10322

Klystron bunching analysis, adding electron overtaking formulation to existing nonlinear space-charge wave theory

02 p0215 A69-11939

Cavity excitation and support of limited space-charge accumulation mode oscillations in n-GaAs epitaxial diode

02 p0297 A69-11940

Fundamental microwave oscillations at high frequencies in GaAs epitaxial sandwich layers, using space charge growth control

02 p0297 A69-11941

Nonisothermal space charge wave analysis of transit time mode oscillations in bulk GaAs, studying device reactance at given negative resistance

02 p0299 A69-12240

Scanning electron beam display of space charge of defects and junction behavior of edge dislocation array in Ge and Si monocrystals

02 p0301 A69-12661

Transit time effects in Si n-nu-n space charge limited current solid state devices

03 p0483 A69-12852

Microwave energy generation with solid state equipment, noting Gunn effect diodes, avalanche diodes and limited space charge accumulation/LSA/ devices

03 p0402 A69-12971

Diffusion in conduction process in dielectric fluids, discussing space charge limited current-voltage characteristics

03 p0415 A69-13140

Generation of UHF space charge waves by nonlinear interaction of two microwave signals in magnetoplasma, predicting optical mixing

03 p0475 A69-13146

Space charge limited square law diodes as HF mixers, noting low conversion loss of asymmetrical type

03 p0404 A69-13580

Carrier generation-recombination in space charge region of asymmetrical p-n junction, noting experimental results for InSb diodes

03 p0487 A69-13641

Space charge layer thickness determination in plasma filled capacitor by capacitance measurement, noting thickness dependence on plasma potential

03 p0477 A69-13714

Space charge plasma acceleration in axially nonuniform magnetic field

03 p0477 A69-13760

Nonlinear cross sectional space charge density distribution in electron beam of traveling wave tube

03 p0407 A69-13984

Hybrid Gunn domain and LSA mode operation in oversized bulk and epitaxially grown GaAs, noting large signal impedance data

04 p0639 A69-14339

Aircraft charge measurements in stratus clouds, noting charge sign is independent of cloud space charge

04 p0549 A69-15108

Potential gradient, small ion density and space charge density measurements for atmosphere on Atlantic Ocean during 1965

04 p0594 A69-15159

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices

05 p0799 A69-15646

Equivalent capacitance derivation of space charge limited current from filamentary cathode

05 p0734 A69-16567

Limited space charge accumulation/LSA/ oscillations in GaAs, noting frequency independent power interrelationships

05 p0810 A69-16568

Static problem of electric field intensity and space charge density distribution in semiconductor with hot electrons and holes

06 p0978 A69-16989

Immobile space charge in MOS semiconductors as function of external voltage

06 p0979 A69-17153

Rates of charging of thermionically emitting particles in space charge

06 p1035 A69-17928

Electrostatic field strength and conductivity dependence of expansion and contraction of space charge cloud in process of discharging during static electrification

06 p0959 A69-18219

Wall space charge layer effect on ion extraction from weakly ionized plasma, using quadrupole mass spectrometer

07 p1188 A69-18276

Traveling wave amplifiers beam defocusing by RF circuits and space charge fields under large signal operating conditions, discussing magnetic field strength

07 p1094 A69-18424

Current and voltage waveforms of transit time, resonant domain and LSA modes of operation of transferred-electron oscillators

07 p1097 A69-18443

Pulse power from X band LSA devices at centimeter through millimeter wavelengths

07 p1097 A69-18445

Domain oscillations removal in n-type gallium arsenides by externally applied microwave field, noting doping effect on LSA conversion efficiency

07 p1196 A69-18446

Minority carrier distribution in doped semiconductors space-charge layer assuming relation between diffusion and Debye length

07 p1198 A69-18506

Field effect in Ge and Si, noting relation between dependence of space charge on surface level charge and on surface potential

07 p1199 A69-18682

Analytic integration of Langmuir equation for spherical space charge flow obtained in terms of Airy equation or Bessel functions solution

07 p1115 A69-18864

Ionizing radiation effects on space charge of MOS devices, showing electron-hole pairs within oxide and electron injection from cathode

08 p1373 A69-20864

Space charge sheath electric thruster principles, construction and performance using laboratory test model [AIAA PAPER 69-282]

09 p1563 A69-21235

Finite ion mass effect on stability of space charge neutralized electron beam

09 p1545 A69-21342

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method

09 p1554 A69-21469

Energy distribution in electron gun with single crystal spherical cathode, noting work function, space charge cloud and beam overlapping effects

09 p1464 A69-22396

Space charge limited currents in SbSI single crystals with gallium electrodes during phase transition, discussing sticking probability and photoconductivity

09 p1559 A69-22651

Positive space charge buildup produced in silicon dioxide by low energy electrons as function of beam energy and oxide thickness

10 p1743 A69-23172

Breakdown voltage and avalanche drift instability factors in planar passivated p-n junctions as function of oxide thickness and mobile charge

10 p1743 A69-23174

Transmission line analogs and kinetic power theorems for space charge waves amplification in semiconductors, considering internal effect and wave excitation

10 p1748 A69-24052

Space charge waves amplification in semiconductors on coupling with forward circuit wave by transmission line analog, noting application to electromagnetic and acoustic waves

10 p1748 A69-24053

Coupling constants of fast space charge waves in three frequency parametric TWT amplifier and of stress waves in slow wave structure, using graphical methods

11 p1844 A69-24446

Unrippled space-charge flow in dense axially symmetric electron beams as basis for electron gun design

11 p1846 A69-24598

Electrical conductivity of space charge surface layer in semiconductors with many-valley energy spectra of current carriers, discussing scalar relaxation time

11 p1937 A69-24915

Voltage and current waveforms of resonant domain and limited space charge accumulation modes in transferred electron oscillators, noting drift current

12 p2036 A69-25908

Paraxial electron beams from Pierce gun and spreading due to thermal velocities and space charge in nonuniform potential

12 p2036 A69-25920

Negative resistance effects computed for HF operation of SCL diodes, based on quantitative analysis of small signal response

12 p2038 A69-26349

Atmospheric electricity and space charges ionization and equilibrium in earth atmosphere, discussing electric fields in lower atmosphere, ionosphere and magnetosphere

12 p2076 A69-27105

Near electrode layer calculation in low temperature plasma, solving kinetic ion equation for quasi-neutral and Poisson equation for space charge regions

13 p2312 A69-28117

Rasor phenomenological theory of space ionization in arc mode regime of Cs thermionic converter

14 p2402 A69-29242

Cesium plasma electron temperature in narrow electrode space of thermionic converter determined using electrode and changeable space diode

14 p2491 A69-29243

Noble gas thermionic converters, discussing auxiliary discharge compensation of negative space charge, I-V characteristics, efficiency and comparison to ignited mode cesium vapor converter

14 p2403 A69-29249

Ionization mechanisms in ignited mode cesium thermionic converter, discussing positive ions production for electron space charge neutralization and ion density calculations

14 p2404 A69-29258

Radiation effects on Cs thermionic converter, discussing radiation interaction with alkaline atoms to complete space charge neutralization by supplementary ion creation

14 p2404 A69-29261

Injection phase-locking characteristics of LSA/limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit

14 p2421 A69-29544

Space charge effects on trigger current and reflector voltages of reflex klystron

15 p2574 A69-30131

Transit time effects in silicon space charge limited diodes, studying frequency characteristics of small signal equivalent circuit

15 p2575 A69-30181

Space charge formation in MHD generator channels ascribed to gas parameters nonuniformity and magnetic induction vector presence, assuming steady flow
15 p2659 A69-30635

Selenium diffusion in indium antimonide, determining concentration gradients in junction space charge region by capacitance method
15 p2669 A69-30714

High temperature effects on electron and X ray irradiated MOS transistors for space charge analysis and defects in silica films
15 p2625 A69-30828

Integral charge neutrality effect on local space charge density of MHD generator channel, examining electrode couple for Faraday generators
15 p2664 A69-31055

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization
15 p2581 A69-31521

Single balanced modulators using square law resistors /space charge limited diodes/, discussing noise properties, conversion losses and terminating conductance
16 p2758 A69-31756

Unsuccessful space charge noise suppression measurements on field emission tubes, obtaining diffusion and shot noise measurements at high currents
16 p2752 A69-32384

Electron bunching improvement by combined effect of space charge and inhomogeneous electrostatic field on velocity modulated electron flux in microwave devices
16 p2823 A69-32503

Electrostatically focused klystron /EFSK/ small signal gain calculations based on lens cell space charge wave analysis
18 p3109 A69-35294

Conducting medium steady one dimensional motions determined by assuming space charge-electric field interaction, considering electrohydrodynamic behavior of medium
18 p3181 A69-35315

Self consistent flow calculation in dense space charge beams, including electrode design for portions isolation
22 p3985 A69-40668

Space charge wave propagation induced by electron beam moving in annular waveguide, considering radiated field and current redistribution
23 p4124 A69-42034

SPACE COMMUNICATION
NT INTERPLANETARY COMMUNICATION
NT LUNAR COMMUNICATION
NT REENTRY COMMUNICATION
NT SPACECRAFT COMMUNICATION

Critical parameters for optimum design of Cassegrain antenna used in space communications
[UN PAPER 68-95280] 01 p0043 A69-10481

Space broadcasting possibilities and problems, considering home reception and group participation at community centers
[UN PAPER 68-95287] 01 p0028 A69-10497

Signal absorption in negative ionospheric ions effect on maximal frequency for space radio communication
[UN PAPER 68-95272] 01 p0029 A69-10529

Space age communication, use of satellites by mass media - UNESCO Conference, Paris, December 1965
03 p0534 A69-13132

Optical receivers for deep space optical communications link assuming PCM scheme
03 p0389 A69-13194

Coherent PSK system in multipath environment /Rician fading and additive Gaussian white noise/ with phase locked loop for coherent reference extraction
03 p0393 A69-13255

Bibliography of interstellar travel and communication
03 p0510 A69-13397

Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions
03 p0394 A69-13398

Man-made and natural spatial communications
03 p0394 A69-13577

Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
03 p0397 A69-13721

Millimeter waves in communication navigation and research, discussing radar range resolution and remote sensing
03 p0397 A69-13722

Graphical data on atmospheric and rainfall attenuation of spacecraft earth signal, emphasizing transmission via satellites
03 p0397 A69-13727

Analog FM subcarrier modulation selected for real time TV picture transmission via electro-optic space communication system
04 p0562 A69-15474

Low noise shaped beam Cassegrain antenna design for space communications earth station service, noting gain/noise temperature figure and antenna construction
05 p0728 A69-15669

Traveling wave maser and cooled parametric amplifier for ultralow noise preamplification in satellite communication earth terminal installations
05 p0728 A69-15670

Low noise room temperature satellite broadcast receiver for UHF, using room temperature parametric amplifiers
05 p0728 A69-15672

Radio channel circuit outlined for tracking interplanetary spacecraft and probes with signal delay time prediction
06 p0888 A69-17623

VHF space communication signals with radio fluctuations along propagation path through turbulent atmosphere, giving diversity reception effect when transmitting linearly polarized waves
06 p0889 A69-17653

Signal resolution during space diversity reception with nondirective or weakly directive antennas and noncorrelated receiver background noise, discussing signal processing
06 p0890 A69-17800

Multiring antenna arrays for space telemetry and communication, analyzing distant field, radiation resistance, directive gain and mutual impedance
06 p0899 A69-17827

Space communication, discussing global network of Intelsat satellites ground facilities, regional switching, RF channels, etc
06 p0890 A69-17860

High power microwave oscillator /carpitron/ for pure or FM signal amplification, noting low output noise level
07 p1096 A69-18437

Desired laser characteristics for space communications compared to existing lasers
07 p1146 A69-18483

Solar end and lateral pumping apparatus for neodymium doped YAG crystal lasers, noting applicability to space communication
07 p1150 A69-18953

Lincoln experimental satellites, discussing transition to UHF bands and orbital launching
07 p1087 A69-19630

Data transmission techniques for aerospace and industrial applications, discussing radio link
08 p1271 A69-19906

Local oscillator for space telecommunications F9 repeater, operating principles, design calculations and test results
08 p1286 A69-20596

RF selection for interspacecraft or earth-spacecraft communication
09 p1449 A69-21270

Communication satellite systems role in world telecommunication network, discussing traffic type, volume and routing, earth stations location and capacities and orbit selection
09 p1449 A69-21271

Frequency modulation methods and multiple access for communication satellite systems, considering bandwidth for space station transponder
09 p1449 A69-21274

Multiple access in communication satellite systems for achieving maximum flexibility of interconnection between earth stations
09 p1450 A69-21276

VHF space communication signals with radio fluctuations along propagation path through turbulent atmosphere, giving diversity reception effect when transmitting linearly polarized waves
10 p1775 A69-23191

Hardware limitations on communications, instrumentation and data handling for manned deep space missions
13 p2219 A69-27666

Synchronized backward wave oscillator transmitting tube for space communication stations
13 p2232 A69-28058

SPACE ELECTRIC ROCKET TESTS

Short term frequency stability measured for Doppler radar and space tracking communication applications, reviewing FM theory for spectral purity relationship
18 p3100 A69-34277

Optimum receiver design for binary coded data detection in two channel space communication system, discussing phase error distribution and optimum decision function
19 p3275 A69-36286

Block coded telemetry systems design for phase coherent space communication employing double conversion superheterodyne phase locked receivers
19 p3277 A69-36487

ITU space communication projects, discussing frequency registration, progress reports from member countries and committees, UN resolutions, communication satellites, etc
19 p3456 A69-36821

INTELSAT 1964 agreements consistency with multilateral international agreements, including UN General Assembly and International Telecommunication Union
20 p3638 A69-37122

International cooperation regarding space telecommunication systems, discussing INTEL-SAT and INTERSPUTNIK roles in achieving international coordination and equality
20 p3638 A69-37125

NASA program for radio spectrum utilization in aerospace communication systems
23 p4128 A69-42502

Space attenuation at VHF and UHF telemetry frequencies
24 p4281 A69-42622

Nonblocking switching networks operating in ordinary and in simultaneous switching regime, including control algorithms for optimal space communication
24 p4289 A69-43138

SPACE DEBRIS
Gegenschein measurements for determining upper limit on asteroidal debris spatial density
02 p0324 A69-12545

Spacecraft debris atmosphere effects on observations, discussing contamination of exposed optical surfaces and light scattering by ice particles from cabin water vapor leakage
09 p1487 A69-21654

Linearly polarized radiation from supernova remnants 3C 10, Taurus A, 3C 358 and Cassiopeia A, determining distributions by synthesizing fan beam
09 p1598 A69-22185

Integrodifferential equation derived and solved for evolution of collisional model of asteroids and debris
14 p2526 A69-29879

Space contamination due to manned vehicles and debris atmosphere effects on dim light source observations
21 p3793 A69-38341

Undulating dunelike deposits of surface debris similar to base-surge deposits in maar volcanoes and tuff rings, discussing underground ice existence
23 p4216 A69-42203

SPACE DENSITY
Statistical data on space density of bright elliptical galaxies, radio galaxies, quasars, noting relation between space density and age
12 p2165 A69-27033

Stellar densities and luminosity function determined from stellar data concerning sphere with 20 pc radius around sun
13 p2351 A69-27869

Density perturbation mode in Lifshitz relativistic theory for expanding universe gravitational instability, adopting Lagrangian coordinate condition to eliminate physically meaningless solution
15 p2652 A69-30203

Satellite measurements of small particles near-earth space density compared with chemical estimates of terrestrial cosmic material, suggesting particles origin in meteoroid ablation
21 p3701 A69-38342

SPACE ELECTRIC ROCKET TESTS
Emissive probes for measuring plasma potentials over different ion density ranges on SERT spacecraft, detailing calibration and mechanical and electronic configurations
[AIAA PAPER 69-272] 09 p1492 A69-21217

SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] 09 p1561 A69-21221

SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements
09 p1566 A69-21255

- Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring 12 p2148 A69-26787
- Kaufman ion thruster ESKA 18 operation principles and design compared to RIT 10 and SERT 2, discussing discharge and focusing characteristics and propulsion parameters 17 p3022 A69-33605
- Power conditioner for use with SERT II mercury ion thruster, describing electrical and mechanical design and operation 23 p4075 A69-42301
- SPACE ENVIRONMENT**
- U AEROSPACE ENVIRONMENTS**
- SPACE ENVIRONMENT SIMULATION**
- NT WEIGHTLESSNESS SIMULATION**
- Human behavior during stressed underground confinement, discussing adaptation processes 01 p0020 A69-10757
- Molecular flow in space simulation chambers with cryowalls, noting nonuniform flux density distribution 01 p0057 A69-11153
- Cryogenic plants for space simulation chambers, examining processes for cooling shroud below 100 K at given temperature differences 01 p0057 A69-11154
- Prolonged decompression stress effects on humans in simulated orbital flight or extravehicular activity, investigating endocrine-metabolic disturbance by urinalysis 01 p0022 A69-11336
- Human endocrine-metabolic response to sequential decompression exposure during simulated orbital flight or extravehicular activity 01 p0022 A69-11337
- Space simulation tests in TFS/Technological Feasibility Spacecraft/ program, discussing two interplanetary cruise modes and deorbit mode selected for simulation 02 p0227 A69-11757
- Work and rest scheduling effect on working capacity and physiological state of male subjects in sealed chamber 03 p0381 A69-14201
- Daily sleep and wakefulness periodicity changes effect on heart rate, respiration and body temperature diurnal rhythms in human males under isolation conditions 03 p0377 A69-14203
- Residual gas effect on fatigue behavior of pure iron subjected to alternating bending load in ultrahigh vacuum 04 p0616 A69-14846
- Self balancing single degree of freedom free fall space environment simulator, discussing coincidence of mass and rotation centers 04 p0586 A69-15468
- Simulation of solar wind interaction with earth magnetic field, discussing selection of dimensionless parameters 06 p0919 A69-17550
- Test program for solid propellant rockets capability to withstand space environments 06 p0982 A69-17594
- Space radiation effect on spacecraft components and materials simulated by proton and fast electron bombardment of silicon, glass and skin materials 06 p0906 A69-17612
- Multichannel radiometers calibration and testing for spacecraft and solar simulation applications, noting exposure to sun onboard X-15 aircraft at high altitudes 06 p0926 A69-17620
- Ablative and insulative performance of reference heat shield materials under transient heating simulating ballistic vehicle reentry trajectory, using plasma jet facility [AIAA PAPER 69-150] 06 p0907 A69-18110
- Thermal radiative reflectance characteristics of low density charring ablators subjected to planetary entry environment simulation [AIAA PAPER 69-61] 06 p0947 A69-18148
- Miniature ball and jewel bearings and gear lubrication in ultrahigh vacuum tests for space environment operation [IME PAPER 6] 07 p1138 A69-18562
- Astronauts increased heart beat, respiration rates and higher blood pressure subsides during repeated weightlessness tests 07 p1061 A69-18582
- Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C 07 p1065 A69-18974
- Group observers magnitude estimation judgements of stationary spacecraft model apparent distance in

simulated space, obtaining psychophysical functions for three stimulus ranges 07 p1069 A69-19501

AZUR satellite movement simulator for thermal control tests, describing assembly 08 p1300 A69-20095

Man in loop computer facility for programmers to check out flight programs in simulated space flight environment [AIAA PAPER 69-324] 09 p1479 A69-22384

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature [AIAA PAPER 69-312] 09 p1479 A69-22386

Space vehicle explosive components, discussing identification, screening and final qualification of explosives and severe environment simulation methods 10 p1749 A69-23008

Space flight hypokinesia simulation experiments to study oxygen balance in man 10 p1646 A69-23507

Low energy charged particle detectors reliability, analyzing windowless electron multipliers and effects of secondary emission layers on sensitivity 11 p1848 A69-24868

D-2 satellite radiation dose based on upper atmosphere electron and proton distribution model, simulating electron bombardment and aging of materials and subsystems 11 p1949 A69-24869

Laboratory simulation methods for cosmic nuclear radiation, discussing dosimetry methods 11 p1862 A69-24875

Single crystal solar cell degradations in space, duplicating radiation effect on minority carriers lifetime by laboratory tests 11 p1826 A69-24876

Distance discrimination in simulated space environment, studying just noticeable difference /JND/ to determine relations between distance threshold and observation distance 12 p0222 A69-26372

Thermostructural simulation of lifting vehicle panel design, considering safety and trajectory shaping of flying laboratory 12 p0260 A69-26836

Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels 13 p2231 A69-28048

Vacuum pumping methods for large space simulation chambers, discussing cryopumping, economic and operational considerations 13 p2241 A69-28078

Space environment simulation for vacuum, solar radiation, heat sink and orbital motion, discussing oil contamination of optical surfaces 13 p2241 A69-28079

Three meter spherical volume heat balance test facility for space vehicles at European Space Technology Center, describing vacuum system, solar simulation, etc 13 p2241 A69-28080

Molecular gas flows in containers for space environment simulation, discussing flux distribution 13 p2241 A69-28081

SNAP 8 developmental reactor vacuum system providing space environment simulation for nuclear reactor ground testing 13 p2241 A69-28086

Meteoroid perforation effects on space cabin design, discussing simulated destructive environmental tests [AIAA PAPER 69-365] 13 p2357 A69-28297

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept [AIAA-PAPER-69-366] 13 p2213 A69-28298

Coriolis effect in rotating spacecraft simulation, discussing optokinetic reflex responses as function of head turning angle with spin axis 14 p2409 A69-29300

Space environment simulation tests of cadmium sulfide thin film solar cells, noting output loss 14 p2405 A69-29538

Continuous-channel electron multipliers degradation in spacecraft environment simulation laboratory equipment 14 p2449 A69-29565

Space Environment Simulation (SES) facility at Goddard Space Flight Center, discussing operations and maintenance 15 p2586 A69-30386

Thermal vacuum /TV/ manned-test operations related to Apollo lunar module in simulated space environment 15 p2558 A69-30394

Simulation of two phase hydrogen venting to space environment, discussing thrust effect measurements, flow instabilities and instrumentation 15 p2701 A69-30396

Boeing A-7000 Solar Simulator for Space Environment Simulation Laboratory, noting output characteristics 15 p2588 A69-30403

Escherichia coli B/r survival in high vacuum at different temperatures irradiated with UV or X rays tested as colony forming ability 15 p2557 A69-31388

600 Mev proton synchrocyclotron at Space Radiation Effects Laboratory for space radiation environment simulation, discussing beam energy spread 16 p2814 A69-32201

Visual perception of three dimensional objects under simulated solar illumination in space considered in relation to manned spaceflight maneuvers 17 p2913 A69-33174

Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments [AIAA PAPER 69-642] 17 p2991 A69-33273

Specification requirements for space vacuum simulation, considering vacuum requirements for simulating various effects 17 p2946 A69-33659

Low pressure and background radiation conditions via cryogenically cooled surfaces, citing data on cryopumping under vacuum conditions for space simulation chambers 17 p3006 A69-33683

EEG electrode stimulated simian mental activity in problem solving during simulated space flight, discussing skull implantation and EEG recordings of hippocampus activity 17 p2910 A69-33749

Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments [AIAA PAPER 69-641] 17 p2993 A69-33762

Bjerhammer gravity reduction method applied to gravity in space, analyzing two test models with mass focused between topographical and reference surface 18 p3173 A69-35197

Future combined environment space simulation tests duplicating environment interaction encountered during earth orbits, deep space probes and manned flights 19 p3288 A69-35531

Instrumentation in aerospace simulation facilities - Conference, Farmingdale, New York, May 1969 19 p3289 A69-35714

Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests 19 p3291 A69-35720

Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis 19 p3430 A69-36009

Space environmental simulation facilities, discussing digital computers and equipment for simulating oxygen atmosphere, vacuum, heating and cooling, etc 19 p3295 A69-36326

Rats locomotion in centrifugally generated gravity fields determined for in-space behavioral studies of earth organisms gravity requirements 19 p3263 A69-36457

Combined angular and centrifugal acceleration effects on human and animal eyes motion studied to explain weightlessness effects on humans 20 p3471 A69-37257

Device for equipment insertion into space vacuum simulation chamber to minimize interaction with walls [ONERA-TP-676] 20 p3510 A69-37405

Moving model target for laboratory measurements of radar cross section to simulate satellite or reentry vehicle precession motion, noting signature data analysis 20 p3511 A69-37850

Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C 20 p3479 A69-38222

Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc 21 p3690 A69-38894

Space mission sensitivity to parameters of interest determined by Monte Carlo simulation samples 21 p3804 A69-39036

Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters [AIAA PAPER 69-991] 22 p3920 A69-40369

Solar simulator built into multiwall ultrahigh vacuum chamber, describing simulator and chamber modifications [AIAA PAPER 69-1001] 22 p3921 A69-40377

Speed conditions of environmental simulation of thermal scale models of reentry vehicles, considering ablatives with phase-change and involved chemical reaction [AIAA PAPER 69-1011] 22 p3922 A69-40384

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits [AIAA PAPER 69-1012] 22 p3922 A69-40385

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation [AIAA PAPER 69-1024] 22 p3923 A69-40394

RF voltage breakdown facility for studying spacecraft antenna characteristics in space and planetary atmosphere environments [AIAA PAPER 69-1028] 22 p3924 A69-40397

Aerodynamic forces under space-like conditions measured by swing balance, using large scale molecular beams for rarefied hypersonic gas flow simulation [AIAA PAPER 69-1032] 22 p3924 A69-40400

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation [AIAA PAPER 69-1033] 22 p3924 A69-40401

Electrical sliprings assembly development with low dynamic resistance and long lifetime for space simulation testing, noting wear rate of rings and brushes [AIAA PAPER 69-1035] 22 p3925 A69-40402

Space simulation tests of satellite-borne quartz crystal oscillators for tracking based on Doppler effect 22 p3927 A69-40590

Cs contact ion engine with tubular W ionizer tested for performance and reliability in vacuum chamber 22 p4000 A69-40592

Arc-heated hypersonic wind tunnel for simulated spacecraft reentry environment, aerodynamic heating characteristics and research applications 22 p3927 A69-40595

Space cabin environment simulation effects on resistance to infection caused by pneumonia and influenza virus in rats 23 p4108 A69-41832

SPACE ENVIRONMENTAL LUBRICATION
U SPACECRAFT LUBRICATION

SPACE ERECTABLE STRUCTURES
NT BEACON SATELLITES
NT EXPLORER 22 SATELLITE

Expandable D 21 airlock scheduled for testing on NASA Orbital Workshop Flight based on elastic materials technique, noting more complex chemically rigidized concept [IAF PAPER SD-49] 02 p0334 A69-11949

Testing program using electrical measurements for determining adequacy of erectable parabolic reflector for space missions 02 p0223 A69-12812

Wire screen deployable boom concept for avoiding thermal bending of slender tubes problem in application to gravity gradient stabilization and antennas of spacecraft 07 p1229 A69-18350

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope 11 p1994 A69-25530

Multidimensional mode shapes and frequencies of 100 ft space erectable parabolic antenna 11 p1994 A69-25532

Erectable metal booms and meshes structural analysis, design and mounting and deployment techniques for space applications 19 p3433 A69-35544

Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth 19 p3433 A69-35585

Curved shell elements in shell and plate analysis, discussing quadratic and cubic elements for space structures design 21 p3845 A69-39329

Space erectable microwave truss antenna automatically deploying rigid parabolic reflector 22 p3913 A69-40696

Spacecraft phase array designed for use on synchronous communication satellite, discussing low structural weight packaging and unfurling problems and helix approach 22 p3915 A69-40705

Zero g deployment dynamics of erectable truss parabolic antennas, obtaining latchup loads as function of reflector mechanical energy [AAS PAPER 69-336] 24 p4398 A69-42827

Large space erectable structures rigidity, stiffness, thermal stability, structural efficiency and integrity [AAS PAPER 69-152] 24 p4398 A69-42877

SPACE EXPLORATION

National space program management, discussing NACA and NASA, lunar mission planning, procedures and program flexibility and responsibility 01 p0178 A69-10468

Soviet space astronomy including rocket, satellite and space probe measurements for solar, stellar, planetary and lunar studies 01 p0155 A69-10946

Life sciences and space research - COSPAR Conference, London, July 1967 01 p0016 A69-11073

Radio links between earth and deep space probes, summarizing bistatic radar astronomy results [AAS PAPER 68-182] 02 p0311 A69-11467

Scientists involvement in planetary spacecraft missions, considering organization for particular instruments and more complex payloads [AAS PAPER 68-192] 02 p0311 A69-11473

U.S. space program projections, discussing earth orbit operations, lunar and planetary explorations, costs and timetable 02 p0355 A69-11744

Unmanned planetary exploration using Mariner class spacecraft for solar system and life origin 02 p0334 A69-12302

Manned Mars and Venus missions role in overall planetary exploration program 02 p0324 A69-12304

Planetary exploration strategy for form and origin of universe, unified field theory and abiogenesis, discussing mission planning group 02 p0324 A69-12305

Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations [AIAA PAPER 68-344] 04 p0683 A69-15507

Permissible development direction for space research, discussing space station, required systems and cost estimates 05 p0829 A69-15920

Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles 05 p0712 A69-15935

Simulation experiments using artificial plasma for astrophysical rocket exploration, discussing experiments leading to barium-copper oxide mixture choice for plasma cloud 06 p0999 A69-16973

Soviet satellite exploration of space magnetic fields and charged particles, noting Proton satellites and protons and carbon nuclei inelastic interactions [UN PAPER 68-95768] 06 p0986 A69-17031

Biological aspects of space exploration, analyzing human response to artificial environment in prolonged space missions [UN PAPER 68-95715] 06 p0873 A69-17035

Satellite and space communications and data transmission systems, emphasizing improvements in amount and rate of information for future requirements 06 p0886 A69-17045

U.S.S.R. international cooperation in outer space exploration for peaceful purposes, stressing space meteorology, communications, biology and medicine [UN PAPER 68-95669] 06 p1043 A69-17054

Soviet explorations of moon, Venus, Mars and interplanetary space, noting objectives of future lunar explorations [UN PAPER 68-95719] 06 p1000 A69-17055

Manned space flight programs, discussing U.S. technological, scientific and practical contributions 06 p1001 A69-17074

Soviet achievements in space research, comparing satellites with U.S. counterparts 06 p1005 A69-17561

U.S. space research program and achievements, describing practical aspects 06 p1005 A69-17562

Interplanetary Pioneer spacecraft development and systems engineering aspects 06 p1017 A69-17605

Photoelectronic imaging systems in space exploration emphasizing acquisition time, storage capacity and transmission time 07 p1136 A69-19591

Cybernetic theory application to automatic spacecraft, discussing control problems in Mariner 4 and Surveyor 7 missions and attitude stabilization system 08 p1409 A69-20583

Common nuclear propulsion modules for wide spectrum of manned planetary missions, discussing payload, mission and program flexibility [AIAA PAPER 68-590] 09 p1539 A69-21984

Search theory application to planetary exploration overall strategy for improving landing site decisions 09 p1595 A69-21994

Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility 10 p1811 A69-22863

Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability 10 p1652 A69-22984

Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence 11 p1965 A69-25644

Space research in U.S.S.R. including Venera 4 soft landing mission for measuring temperature, pressure, density and atmospheric composition of Venus 12 p2160 A69-26921

Collection of Soviet papers on U.S.S.R. outer space studies /1957-1967/ covering rocket and satellite sounding, meteorology, radiation belts, etc 13 p2335 A69-27346

Soviet space efforts /1957-1967/, discussing rocket, probe, spacecraft and satellite launchings and scientific results 13 p2336 A69-27358

Integrated device to detect biological growth and catabolic and anabolic activity in extraterrestrial exploration 15 p2556 A69-31306

Upper atmosphere and outer space investigations by Zond and Soyuz spacecraft 15 p2724 A69-31451

Outer planets exploration during 1976-80 period of unique solar system alignment 16 p2854 A69-31630

Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program 17 p3043 A69-34044

Advanced space experiments - AAS Conference, Ann Arbor, September 1968 18 p3192 A69-34359

Space exploitation for experimental research - AAS Conference, Dedham, Mass., May 1968, Volume 24 18 p3193 A69-34367

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments 18 p3198 A69-34795

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2 18 p3233 A69-35055

Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc 18 p3235 A69-35077

Mars exploration by 1969 Mariner 6 and 7 flyby, discussing mission and instrumentation 18 p3201 A69-35141

Soviet space exploration including Cosmos and Proton satellites, Luna project and Zond and Venera probes 18 p3201 A69-35163

Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data 19 p3267 A69-35940

Philosophy of law in space following exploration by man 19 p3455 A69-36332

Juridical norms defined by Madrid, Belgrade and Washington conferences regulating exploration and utilization of extraterrestrial bodies and space, considering satellite communications networks 20 p3638 A69-37123

Space law and space research, detailing UN law proposals 20 p3638 A69-37129

Space law for outer space exploration applications, defining outer space and space activity for legal purposes 20 p3639 A69-37130

International space law basic ideas and future trends, considering freedom of exploration, UN proposals, space demilitarization, etc

20 p3639 A69-37131

Space law code based on space accomplishments by nations as acts involving welfare of humanity

20 p3639 A69-37135

Microbial contamination release from impact-fractured solids, examining bacterial spores growth in fractured methyl methacrylate plastic for application to space exploration

20 p3475 A69-37614

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts

20 p3586 A69-38118

Gravity gradient phenomena in orbiting vehicle used to explore planetary gravity

[AIAA PAPER 68-851]

21 p3804 A69-39024

Nonintegral burn of solid core nuclear rockets, discussing modular stage concepts approach to low cost space exploration

[AIAA PAPER 68-589]

21 p3768 A69-39026

PostApollo space goals based on manned and unmanned planetary exploration and space science programs, considering human factors and propulsion problems

21 p3856 A69-39167

Exploration capabilities provided by Jupiter gravity assisted trajectories compared to direct ballistic flight trajectories

[AAS PAPER 68-116]

21 p3805 A69-39224

Strategy for exploration of inner solar system leading to origin and history, detailing lunar exploration program

22 p4022 A69-40449

Trajectory analysis of multiplanet Grand Tour mission to four large outer planets on single flight, discussing mission planning

[AIAA PAPER 68-1055]

22 p4023 A69-40544

Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc

23 p4211 A69-41477

Spatial region accessible to earth launched probes determined for mission planning for exploration of aperiodic comets, discussing orbit parameters

23 p4212 A69-41536

Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers

23 p4212 A69-41611

Optical activity measurement for exobiology applications, considering polarimetry, gas-liquid chromatography, mass spectrometry and radioactivity detection

23 p4213 A69-41622

Venus atmosphere and clouds exploration by entry probes, discussing ground temperature, greenhouse model, cloud layer, etc

23 p4216 A69-42201

Planetary exploration and NASA program objectives

[AAS PAPER 69-286]

24 p4379 A69-42810

Manned flyby/orbiter of Mars providing scientific information at low incremental cost

[AAS PAPER 69-180]

24 p4379 A69-42813

Space research in past and expected scientific knowledge from manned and automated earth orbital science missions

[AAS PAPER 69-036]

24 p4379 A69-42825

Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration

[AAS PAPER 69-359]

24 p4418 A69-42828

Manned flyby and stopover missions to Mars and Venus with chemical propulsion and Saturn 5 launch vehicles, noting short duration low energy missions

[AAS PAPER 69-492]

24 p4380 A69-42839

Technology flow for future manned earth orbit and lunar operations and planetary exploration

[AAS PAPER 69-494]

24 p4380 A69-42840

Manned space flight history and spacecraft development

[AAS PAPER 69-501]

24 p4380 A69-42852

Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment

[AAS PAPER 69-290]

24 p4381 A69-42863

Reconnaissance missions for outer planets exploration, discussing spacecraft design constraints, multiple planet fly-by, planetary orbiter, etc

[AAS PAPER 69-291]

24 p4381 A69-42864

Nuclear propulsion for solar system exploration, discussing NERVA solid core nuclear fission rocket, nuclear-electric rockets and hybrid nuclear rocket/nuclear electric rocket systems

[AAS PAPER 69-330]

24 p4349 A69-42871

Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc

[AAS PAPER 69-066]

24 p4381 A69-42883

Mars and Venus flyby missions and Mercury planetary exploration plans, discussing future conditions permitting Jupiter, Saturn, Uranus, Neptune, Pluto flybys

24 p4384 A69-43137

SPACE FLIGHT

NT APOLLO FLIGHTS

NT APOLLO 10 FLIGHT

NT APOLLO 11 FLIGHT

NT APOLLO 7 FLIGHT

NT APOLLO 8 FLIGHT

NT APOLLO 9 FLIGHT

NT GEMINI 11 FLIGHT

NT HYPERBOLIC REENTRY

NT HYPERSONIC REENTRY

NT INTERPLANETARY FLIGHT

NT INTERSTELLAR TRAVEL

NT LUNAR FLIGHT

NT MANNED REENTRY

NT MANNED SPACE FLIGHT

NT RETURN TO EARTH SPACE FLIGHT

NT SPACECRAFT REENTRY

Physiological measurements onboard Soviet bioprobes and biosatellites including electrocardiography, phonocardiography, sphymography, seismocardiography and pneumography

01 p0015 A69-10947

Cytological analysis of *Tradescantia paludosa* microspores for space flight influence onboard Cosmos 110

01 p0018 A69-11317

Meteoroid hazard, discussing possible future collisional dangers for space traffic

01 p0160 A69-11412

Benefits accruing from swingby operation, considering space flights past Jupiter, Saturn and other planets

02 p0326 A69-12663

Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis

04 p0652 A69-14519

Automatic processing of electrocardiograms recorded during space flight by computer

05 p0715 A69-16524

Leisure time and recreation facilities during long duration space missions, discussing astronaut selection procedure, active recreation, passive enjoyment and exercise programs

06 p0880 A69-17209

Flour beetle under irradiation and weightlessness during space flight, analyzing effects on somatic wing development, germ cells and pupal period

06 p0876 A69-18177

Electronic tubes utilization in space flight, summarizing characteristics and satellite applications

07 p1093 A69-18421

Oculomotor activity of cosmonauts during orbital flight, analyzing electrooculograms taken during vestibular tests

07 p1063 A69-18594

Human motor reactions during weightlessness based on parabolic or orbital space flight observations, noting cosmonaut writing performance

07 p1063 A69-18595

Optimum physiological parameters selection criteria for medical control of crew during space flights

07 p1071 A69-18978

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt

08 p1377 A69-19843

IR camera determining surface temperatures, discussing construction and space applications

08 p1315 A69-20455

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion

09 p1584 A69-21205

Space flight trajectory analysis of aerospace systems, discussing Analytical Trajectory Optimization Model

09 p1585 A69-21207

Space flight fuel consumption optimization as function of acceleration of nozzle control

10 p1666 A69-22919

Automatic computer processing of physiological data during space flights, discussing choice of computers and computer programs

10 p1649 A69-23509

Flat plate in two dimensional low density hypersonic flow wind tunnel tested for aerodynamic effects on spacecraft reentry

11 p1819 A69-25424

Book on reentry and planetary entry physics and technology covering entry dynamics, thermodynamics, radiation, ablation and heat transfer

11 p1967 A69-25573

Spacecraft propulsion systems comparison and evaluation, discussing quality, schedules and costs in relation to mission requirements

11 p1965 A69-25600

Electrochemical energy storage and conversion for space flight, emphasizing hydrogen oxygen and silver zinc batteries, Gemini and Apollo programs, etc

12 p2015 A69-25866

Space flight research programs including stellar and biological evolutions and environmental control

12 p2155 A69-26003

Biotelemetry of human physiological processes in space for assuring psychophysiological control and immediate intervention for emergencies, discussing application in Mercury and Gemini projects

12 p2023 A69-26491

X-15 research aircraft program piloting problems, ground facilities, heat transfer, space flight and steep reentry

12 p2014 A69-26872

Financial, political and engineering considerations influencing space flight programs implementation, including nuclear systems examination for propulsion and power capability

13 p2334 A69-27296

Boosters and space vehicles including earth satellites, lunar probes and interplanetary spacecraft

13 p2356 A69-27914

Propulsion systems for boosters and space vehicles including chemical, electric and nuclear

13 p2325 A69-27915

Space flight cost analysis, relative costs of various types of transportation and need for reusable single stage to orbit vehicles

15 p2719 A69-30186

Refrigeration system for space flight use of cryogenic gas storage, suggesting mission time increase

15 p2587 A69-30395

Liquid free surface response to mass force variation during space flight near zero-g, discussing effects on ignition

16 p2866 A69-31735

Monograph on solar system space flight trajectory calculations covering solutions to differential equations, error analysis and gravitational effects

17 p3039 A69-33798

Flight failure analysis, discussing methods and restrictions due to hardware unavailability, minimum data, urgency and publicity

18 p3145 A69-34502

Automatic processing of electrocardiography recorded during space flight by computer

18 p3098 A69-34743

Space flight optimization - Conference, Liege, Belgium, June 1967

19 p3398 A69-35662

Operational missile flight program validation plan noting mission analysis, computer programming, program preparation and performance prediction

19 p3279 A69-35955

Radiation exposure during orbital flight assessed for adverse effect on space stations and laboratories personnel, discussing shielding and dose rate tables

20 p3481 A69-37339

Insects mutational responses to space flight and associated radiation on biosatellite 2 compared with ground based controls

20 p3476 A69-37618

Optimum physiological parameters selection criteria for medical control of crew during space flights

20 p3483 A69-38226

Real time operating system (RTOS/ 360 for spaceflight control, describing hardware, applications, task management and capacity, etc

21 p3679 A69-39602

Space transportation cost saving options including booster systems, spacecraft/payload systems and support systems, discussing recovery and launching operations

21 p3857 A69-39690

Launch systems evolution, cost reduction breakthrough approach and application to future space transportation

21 p3857 A69-39692

Collection of papers on space flight mechanics covering trajectories, motion about center of mass, optimization, control systems

21 p3828 A69-39816

Long range space flight trajectory correction problem, obtaining algorithm for determining minimum number of corrections
21 p3818 A69-39822

SPACE FLIGHT FEEDING

Biological problems in prolonged space voyages including oxygen replacement, water supply and food regeneration
01 p0020 A69-11075

Chlorella and Scenedesmus unicellular algae mixture tested for biological protein value in humans for possible food source
01 p0021 A69-11079

Cell and tissue cultivation outside living organisms, discussing applications in space biology, space medicine and food protein sources
02 p0198 A69-11501

Physicochemical method for converting human urine and feces into carbohydrates in closed ecological systems
03 p0381 A69-14199

Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques
04 p0554 A69-15388

Test dogs feeding through enteropancreatic fistula homogenized mixture containing juice excretion stimulating agents during long space flight
08 p1265 A69-19829

Sweet potatoes productivity and nutritive value as carbohydrates source in manned spaceflights
13 p2216 A69-28619

Higher plants utilization as nutrition source in space missions, comparing weight requirements for cultivation equipment and food storage
15 p2560 A69-31408

Astronaut feeding in space and NASA criteria for space foods, eliminating foods in metal tubes and directing development efforts to dehydrated foods
15 p2560 A69-31459

Human requirements for nutrients under stress responses to space flight, considering synthetic food and hothouse plants
15 p2560 A69-31462

Space flight food evaluation by metabolic balance techniques during space flight simulation, considering food consumption during weightlessness
15 p2560 A69-31470

Monosaccharide production from carbon dioxide from respiration or human waste incineration, evaluating toxicological effects of synthetic monosaccharides
15 p2557 A69-31471

Human performance and adaptation to space flight effects under low calorie diet including optimal proportion of basic nutrients and amino acids
20 p3482 A69-37621

Fire hazard in closed chamber associated with intestinal hydrogen and methane formed by space diets, comparing Gemini-type and bland diets
20 p3482 A69-37622

Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
20 p3477 A69-37623

Nutritive value of mycelium of *Cantharellus cibarius* mushroom on rats compared with eggs and fresh and sour milk
22 p3892 A69-40273

SPACE FLIGHT STRESS

Extraterrestrial vestibular research, discussing human otolith apparatus regulation subjected to change from geocentric to heliocentric orientation [UN PAPER 68-95389]
01 p0014 A69-10508

Soviet book on space physiology covering space flight and laboratory data on cerebral cortex function, digestive system, tissue changes, etc
01 p0014 A69-10743

Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems
01 p0017 A69-11074

Differential and threshold sensitivity of acoustic analyzer of humans under space flight factors
02 p0197 A69-11500

Physiological processes occurring in voluntary movements of animals under space flight weightlessness conditions
02 p0199 A69-11827

Physiological causes and prevention of motion sickness during space flight, emphasizing conditioned reflex, different analyzer interactions and vestibular-vegetative changes during weightlessness
02 p0200 A69-12122

Solar flare radiation hazard in long duration space flight, discussing radiation distribution and dosage in human body
03 p0371 A69-13480

Antimotion sickness drugs tested in slow rotation room with controlled Coriolis accelerations, noting summation effect of dextroamphetamine sulfate and scopolamine hydrobromide
03 p0381 A69-14079

Simulation of regulatory function of cardiovascular system during weightlessness
03 p0376 A69-14193

Cardiovascular system, respiratory system and metabolism of cosmonauts on three man flight of Voskhod, noting physiological and biochemical studies
03 p0377 A69-14195

Changes in blood circulation, external respiration and gas exchange rates in humans during prolonged hypodynamia
03 p0377 A69-14204

Cardiac function changes during orthostatic tests and problems in predicting reactions of cosmonauts in flight
03 p0381 A69-14229

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
05 p0708 A69-16510

Book on space clinical medicine covering hypoxia, ebullism, decompression, aerotitis, dehydration, hypothermia, cabin atmosphere contamination, urinary calculus, etc
05 p0711 A69-16801

Reactions of respiratory and cardiovascular system of dogs in biocompartment of ballistic missiles, discussing biopotential of myocardium, arterial pressure, etc
07 p1060 A69-18576

Recessive lethal mutations frequency in gametes of male and female *Drosophila melanogaster* onboard Vostok spacecraft
07 p1063 A69-18598

Radiation hazards during long duration space flights and suitable radiation shield design through radiobiological investigation
08 p1261 A69-19826

Biomedical experiment onboard Cosmos 110 concerning nonpathological changes
08 p1261 A69-19827

Dogs cardiovascular activity mathematical analysis from physiological indices during long space flight
08 p1261 A69-19828

Dogs blood coagulation system functional state after 22 day space flight onboard Cosmos 110
08 p1262 A69-19830

Change in content of dry matter, sugars and ascorbic acid in plants after action of space flight factors on seeds of these plants
10 p1645 A69-23495

Hypokinesia effects on human neurology on extended space flights simulated by 72-day bed rest
10 p1646 A69-23506

Weightlessness effects on human external respiration, gas exchange and energy expenditure indices during flight of Voskhod 2
12 p2020 A69-26563

Pharmacology for long term manned space flights
13 p2211 A69-28613

Transient and long lasting space environment stresses, discussing accelerations, vibrations, shocks, rapid descent in vacuum, temperature variations, gravity, etc
15 p2625 A69-30824

Human requirements for nutrients under stress responses to space flight, considering synthetic food and hothouse plants
15 p2560 A69-31462

Space research centrifuge counteracting null gravity physiological deconditioning, discussing linear and angular accelerations sensitivity and deconditioning effect on reentry task performance
18 p3114 A69-34368

Space flight factors, ionizing radiation and combined effects on vitamin C content in onion bulbs
18 p3095 A69-34729

Astronaut vestibular and motor analyzer functions during flight and simulation tests, discussing illusory space orientation and role of cortical dynamics
20 p3469 A69-37241

Human performance and adaptation to space flight effects under low calorie diet including optimal proportion of basic nutrients and amino acids
20 p3482 A69-37621

Physiological experiments to investigate aerospace flight stresses effects on oculomotor equilibrium, not-

ing cardiovascular reaction and mechanism for interpretation
23 p4087 A69-41804

Insect gametes response to space flight and radiation in reduced gravity including plants and microorganisms
23 p4091 A69-42050

Environmental stress effects on medical leech studied to determine tolerance to spacecraft launching, orbiting and reentry
24 p4268 A69-43403

SPACE FLIGHT TRAINING

Space flight crew efficiency during prolonged weightlessness, stressing preflight adaptation and space vehicle technology improvement
07 p1063 A69-18596

Astronauts physical training for space flight requirements
13 p2215 A69-28611

Astronaut selection and training in U.S. and U.S.S.R.
13 p2216 A69-28636

SPACE GLIDERS

U LIFTING REENTRY VEHICLES

SPACE LABORATORIES

NT MANNED ORBITAL LABORATORIES

NT MANNED ORBITAL RESEARCH LABORATORIES

Space station design requirements, Apollo applications program and various experimental programs
01 p0163 A69-11395

Moon environment for scientific experiments, emphasizing lunar surface properties, lack of man-made electromagnetic waves, vacuum and weak gravity force
13 p2240 A69-27910

Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
17 p2912 A69-32970

Lunar physics and chemistry - IAA Conference, Belgrade, September 1967
18 p3112 A69-34234

Lunar laboratory physical and chemical experiments including scattering phenomena, molecular and atomic beams and gas cloud photochemistry
18 p3113 A69-34237

Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods [AAS PAPER 69-486]
24 p4380 A69-42844

SPACE LAW

Legal problems in space navigation and solution through international law including air and outer space limits, regulating authority and damage liability [UN PAPER 68-95475]
01 p0179 A69-10511

International liability for damage caused by launching of objects into outer space [UN PAPER 68-95337]
01 p0180 A69-10525

Book on international law and uses of outer space covering effects of UN General Assembly Resolutions and Outer Space Treaty
02 p0356 A69-12676

Legal problems in space navigation and solution via international law including air and outer space limits, regulating authority and damage liability
07 p1244 A69-19233

Yearbook of air and space law /1966/ covering documents on legal doctrines, treaties, regional arrangements, national bibliographies, Warsaw Convention, Hague Protocol, etc
10 p1811 A69-23986

International space law definitions, technology, regulations, role of industry and government, etc
13 p2381 A69-27529

International law governing aerospace activities /1966 to 2066/
13 p2382 A69-27829

Outer space law principle sources including divine law, UN and NASA contractors regulations
15 p2720 A69-31052

Philosophy of law in space following exploration by man
19 p3455 A69-36332

Space law - Conference, New York, October 1968
20 p3634 A69-37102

Treaty on Outer Space interpretation regarding establishment of international space agency with sufficient authority
20 p3635 A69-37103

Space Treaty interpretation of ambiguity of term peaceful due to differing concepts of U.S. and U.S.S.R.
20 p3635 A69-37104

Juridical meaning of peaceful in 1967 Space Treaty interpreted in terms of real purpose of given space activity

20 p3635 A69-37105

Interpretation of peaceful uses of outer space in Space Treaty, emphasizing provision forbidding individual military space activities whether aggressive or nonaggressive

20 p3635 A69-37106

1967 space Treaty Article 11, discussing provisions concerning private exploitation and supernational body authority

20 p3635 A69-37107

ESRO and legal liability in damage suits concerning satellite protection and environmental control

20 p3635 A69-37108

Outer Space Treaty of 1967, discussing Article 4 and arms control

20 p3636 A69-37109

Space law legal liability definitions for damage caused by space objects, discussing juridical principle and procedure

20 p3636 A69-37110

1967 Space Treaty legal aspects of consultation, suggesting international permanent body setup for resolving technical and political matters

20 p3636 A69-37111

1967 Space Treaty peaceful activities definition, suggesting explicit provisions regarding treaty province, enforcement machinery and implementation

20 p3636 A69-37112

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, discussing unintended landing

20 p3636 A69-37113

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, noting humanitarian considerations and indemnity for services rendered

20 p3636 A69-37114

Amendments considered for international law regarding earth and space rescue services as result of contemporary U.S. manned space flight programs

20 p3637 A69-37115

UN agreement provisions on international cooperation for rescuing astronauts and objects in case of accident, distress, emergency or unintended landing

20 p3637 A69-37116

Space vehicles registration within Treaty on Outer Space to provide protection for vehicle and third parties in cases of damage

20 p3637 A69-37117

International lawyers proposal for compulsory registration of space activities in connection with astronauts rescue and damages liability

20 p3637 A69-37118

Manned lunar bases from legal viewpoint, discussing national jurisdiction, personnel policies, mineral rights, etc

20 p3637 A69-37119

INTELSAT 1964 agreements consistency with multilateral international agreements, including UN General Assembly and International Telecommunication Union

20 p3638 A69-37122

Juridical norms defined by Madrid, Belgrade and Washington conferences regulating exploration and utilization of extraterrestrial bodies and space, considering satellite communications networks

20 p3638 A69-37123

Space law as foreseen in light of expected scientific progress in astronautics

20 p3638 A69-37126

International legal liability for personal injury or property damage caused by space activities

20 p3638 A69-37127

Space law history, discussing Space Treaty and UN Declaration of Legal Principles

20 p3638 A69-37128

Space law and space research, detailing UN law proposals

20 p3638 A69-37129

Space law for outer space exploration applications, defining outer space and space activity for legal purposes

20 p3639 A69-37130

International space law basic ideas and future trends, considering freedom of exploration, UN proposals, space demilitarization, etc

20 p3639 A69-37131

Domestic and international law compared in connection with space program, considering legal aspects of using satellites in discovering and exploiting earth resources

20 p3639 A69-37132

Multiple use doctrines in space law for resource utilization, discussing formation of planning commissions and licensing agencies

20 p3639 A69-37133

Planetary resources control and use from legal and policy standpoints, discussing space treaty effects on international law

20 p3639 A69-37134

Space law code based on space accomplishments by nations as acts involving welfare of humanity

20 p3639 A69-37135

Ecological foundations of Haley metalaw and implications of interstellar golden rule, discussing social interaction with alien life forms

23 p4240 A69-41304

Liability for personal and property damage due to space activities

[AAS PAPER 69-042] 24 p4418 A69-42826

SPACE LOGISTICS

Integrated management information system (IMIS), discussing logistics, reliability and quality assurance disciplines

11 p2005 A69-25304

SPACE MAINTENANCE

Split-seam process for inserting sterile objects into isolated sterile environment without contamination as method for sterile spacecraft repair

05 p0714 A69-15950

Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services

09 p1451 A69-21290

Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model

[AIAA PAPER 68-1059] 12 p2174 A69-26797

Lunar based optical workshop and repair facility, using ion beam technique to polish and repair optical element surfaces

18 p3113 A69-34243

Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc

18 p3208 A69-35067

Ground controlled remote manipulator spacecraft system to perform unmanned satellite orbital maintenance, discussing refurbishment, laboratory simulation, system cost effectiveness and feasibility

19 p3430 A69-36001

Satellite onboard computers automatic reconfiguration and self repair

20 p3503 A69-37399

Orbital mechanics of near earth satellite arrangements/clusters for satellite service vehicle (SSV)/accessibility from orbital space stations

[AIAA PAPER 69-929] 21 p3809 A69-39358

Self testing and repairing (STAR)/aerospace computer for automatic maintenance of unmanned interplanetary spacecraft

[AIAA PAPER 69-966] 22 p3906 A69-40347

Neutral buoyancy simulation of astronaut performing module replacement and repair task in zero-g environment

[AIAA PAPER 69-1005] 22 p3921 A69-40379

Tools and equipment for extra- and intravehicular activities in space and on lunar surface

[AAS PAPER 69-438] 24 p4319 A69-42802

Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods

[AAS PAPER 69-486] 24 p4380 A69-42844

Remote manipulator spacecraft system for refurbishing synchronous communication satellite, emphasizing compatibility with standard shroud Titan 3C launch vehicle

24 p4297 A69-43041

SPACE MECHANICS

NT ASTRODYNAMICS

NT CELESTIAL MECHANICS

NT KEPLER LAWS

NT ORBITAL MECHANICS

Autonomous canonical system with two degrees of freedom, determining equilibrium position stability in resonance case, calculating earth satellite rotational stability

14 p2482 A69-28813

Flight and space mechanics problems from engineer standpoint, discussing flight path calculation, stability and control characteristics and experimental techniques for high reliability

17 p3076 A69-33041

Homogeneous deformations of space and Cauchy problem for homogeneous free molecular motions, considering velocity fields and accelerations

19 p3444 A69-36803

SPACE MISSIONS

Solar system origin and evolution by future space mission experiments, discussing theories and mission objectives

[AAS PAPER 68-191] 01 p0153 A69-10823

Scientific mission of ESRO 2/IRIS satellite, study of X rays and particles from sun and galaxy and primary cosmic ray electron measurement

01 p0163 A69-11102

Book on electric propulsion systems for spacecraft covering thermoelectric, electromagnetic, electrostatic, plasmacore, thermonuclear and photon systems

02 p0305 A69-12233

Manned reusable space transportation systems development, discussing requirements for future space mission planning

03 p0519 A69-13395

Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions

03 p0394 A69-13398

Space rendezvous problem as applicable to interplanetary missions, discussing steps in rendezvous maneuvers to permit final docking

03 p0511 A69-13401

Lunar Orbiter mission objectives and orbit design

[AIAA PAPER 68-47] 04 p0664 A69-15503

Fluid support by capillary forces, fluid support by pressure with surface tension stabilization and capillary gas barriers for long life missions

[AIAA PAPER 68-465] 04 p0646 A69-15505

Technological base for planning space flight missions to obtain data on earth resources, detailing earth resources technology satellites/ERTS/

05 p0830 A69-15921

Permissible radiation doses for extended space missions, discussing clinical tests on dogs

05 p0708 A69-16508

Efficient life support systems for prolonged space missions, discussing scientific and experimental research

[UN PAPER 68-95778] 06 p0879 A69-17040

Multimission interplanetary probe using solar electric propulsion

06 p0984 A69-17593

Manned space flight safety, discussing astronaut exposure to danger on ground, in training and in space mission

06 p0882 A69-17650

Apollo 4, 5 and 6 space missions, with preview of Apollo 7, 8 and 9 missions

06 p1017 A69-17672

Gravity gradient stabilization role in space missions in 1970s and 1980s

07 p1229 A69-18348

Feasibility of nuclear stage for space missions, discussing Saturn 5 third stage replacement, payload gain, reactor and engine size

08 p1409 A69-20158

Spacecraft electric propulsion parameters and launching vehicle characteristics in low thrust mission simulation, discussing spacecraft path

09 p1584 A69-21202

Electric propulsion missions analysis for spacecraft design engineer, discussing out-of-ecliptic and Jupiter flyby probes

09 p1584 A69-21203

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization

09 p1585 A69-21211

Monograph on requirements for high speed interplanetary flights with nuclear engines and refueling at destination

09 p1586 A69-21298

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs

[AIAA PAPER 69-252] 09 p1568 A69-21729

Human adaptation to various environments, emphasizing experimental space psychoneurology role in human behavior examinations during space missions

10 p1647 A69-23587

High energy radiation effects on electronic components in space missions, noting simulation tests and shielding

11 p1946 A69-24521

Space experiments analysis involving standardization for economy and mission thesis compromise, detailing aeronomic satellite project with integrated utilization 12 p2173 A69-26128

Problem areas within cryogenic chemical and nuclear propulsion systems for space missions, noting available technology and limitations [AIAA PAPER 67-454] 12 p2174 A69-26782

Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model [AIAA PAPER 68-1059] 12 p2174 A69-26797

Soviet space program, discussing launch sites, series of launch vehicles and mission identification 13 p2381 A69-27303

Esro 1 satellite program management, discussing scientific mission, structure, tracking system and history 13 p2355 A69-27360

Logic family with low power consumption subjected to 1 Mev electrons analyzed within telemetry circuit concept for space application 15 p2625 A69-30830

Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities 15 p2559 A69-31124

Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission 15 p2613 A69-31269

NASA planetary program, discussing Mars, Jupiter, Mercury, Venus and Saturn missions 15 p2723 A69-31318

Book on space age management, considering large scale approach 16 p2881 A69-31766

System state phase modeling as method for evaluating safety and reliability by analysis of system states in mission phases through logic diagram 18 p3142 A69-34480

Permissible radiation doses for extended space missions, discussing clinical tests on dogs 18 p3095 A69-34727

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments 18 p3198 A69-34795

Integrated test program based on mission requirements, failure mode and effects analysis with feedback from testing to design and development functions 19 p3327 A69-36014

Missile and space support planning, objectives, technology development, functions, maintenance and in-flight maintainability 19 p3295 A69-36327

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program 19 p3432 A69-36750

Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation 20 p3573 A69-38120

Space mission sensitivity to parameters of interest determined by Monte Carlo simulation samples 21 p3804 A69-39036

CircumJovian powered and free return trajectories, analyzing round trip missions and departure opportunity [AAS PAPER 68-117] 21 p3805 A69-39207

Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies [AIAA PAPER 68-854] 21 p3767 A69-39764

Laboratory prototype of RF ion engines for space test, discussing components optimization 22 p3998 A69-39904

Aerodynamic deceleration systems for space missions, considering deployment of subsonic parachute and inflatable configuration following atmospheric entry [AIAA PAPER 68-1081] 22 p4036 A69-40542

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design 23 p4108 A69-41833

Navigation systems analysis for space missions planning, discussing onboard equipment and lunar landing accuracies [AAS PAPER 69-406] 24 p4347 A69-42833

Separation system for collecting wash and waste water from gaseous environment and separating liquid and gaseous phases during space missions [AAS PAPER 69-473] 24 p4272 A69-42845

SPACE NAVIGATION
NT INTERPLANETARY NAVIGATION

Legal problems in space navigation and solution through international law including air and outer space limits, regulating authority and damage liability [UN PAPER 68-95475] 01 p0179 A69-10511

Apollo landmark sighting by astronaut using Apollo onboard navigation system, simulating cloud cover effects with Monte Carlo technique 01 p0110 A69-10692

Autonomous solution to orbital navigation problem yielding direct measure of orbital parameters 01 p0114 A69-11005

Two dimensional representation of Venus entry probe target data for determining probe capability to provide real time data transmission to earth 02 p0331 A69-12820

Ground based guidance systems for supplementing onboard guidance of manned space vehicles 06 p0955 A69-17580

Sight reduction tables for orbital plane determination checked out by sextant sightings onboard Gemini 7 07 p1177 A69-19206

Legal problems in space navigation and solution via international law including air and outer space limits, regulating authority and damage liability 07 p1244 A69-19233

Manual onboard computation procedures and devices for determination of maneuvers for orbital navigation and guidance 08 p1348 A69-21184

Pure inertial navigation system support by supplying additional or redundant navigational information, considering space flight applications and earth related problems 12 p2128 A69-25873

Space vehicles and marine navigation using navigation satellites, radar, Doppler navigation, etc 13 p2296 A69-27918

Optimal linear space navigation policies including integrated nongravitational acceleration output from inertial measuring unit 14 p2479 A69-29487

Satellite space navigation system providing three component position in geodetic coordinates instantly and accurately on or near earth 15 p2650 A69-30088

Initial-convergence examination of Kalman filter for various autonomous navigation modes [AIAA PAPER 67-623] 16 p2809 A69-31875

Peano-Baker method for integration of variational equations to produce partial derivatives used in satellite trajectory estimation 19 p3398 A69-35616

Space navigation - Conference, Houston, April 1969 19 p3368 A69-35789

Mars autonomous entry navigation, discussing flight path angle control with onboard sensors using realistic sun, Canopus and planet line of sight tracker accuracies 19 p3368 A69-35790

Earth orbit estimation by manual stadimeter, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties 19 p3369 A69-35793

Masking and standby redundancy approach to fault tolerance in space navigation computers with illustrations, discussing automatic maintenance 19 p3279 A69-35798

Star/horizon measurements for onboard spacecraft navigation without cloud cover obscuration, discussing sightings, data processing and evaluation 19 p3369 A69-35800

Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases 19 p3369 A69-35801

Strapdown electrostatic aerospace navigator /SEAN/ using electrostatically suspended gyros /ESG/ for inertial reference, including drift and computer tests 19 p3369 A69-35802

Navigational accuracy dependence on spacecraft geometry, determining information content and critical error sources of earth based Doppler radio tracking data [AAS PAPER 69-112] 19 p3402 A69-35935

Approach navigation accuracy for planetary atmosphere braking to orbit about Mars and Venus [AAS PAPER 68-122] 19 p3402 A69-35937

Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering [AAS PAPER 68-144] 19 p3402 A69-35939

Missile and spacecraft guidance navigation and control, discussing fluidics, self adaptive and digital control and Kalman filtering 19 p3370 A69-36316

Horizon definition for Apollo space navigation references from examining earth atmosphere visible and far IR spectrum [AIAA PAPER 69-869] 21 p3763 A69-39395

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits [AIAA PAPER 69-880] 21 p3763 A69-39406

Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure [AIAA PAPER 69-883] 21 p3764 A69-39409

Guidance and control in space - Conference, Warsaw, June 1969 21 p3825 A69-39628

Navigation systems analysis for space missions planning, discussing onboard equipment and lunar landing accuracies [AAS PAPER 69-406] 24 p4347 A69-42833

Manual method for navigating and guiding spacecraft to rendezvous with orbiting target, using hand-held unpowered optical instruments and manual computations [AIAA PAPER 68-859] 24 p4348 A69-43243

SPACE ORIENTATION

Soviet astronaut experiences and visual impressions during space walk outside Voskhod 2, noting dominance of optical analyzer in space perception and orientation [UN PAPER 68-95717] 06 p1000 A69-17049

Human perception in space as function of nervous relationships involving optic, kinesthetic, vestibular and other analysors 08 p1263 A69-19938

Visual systems of hamster brain, discussing relative visual localization and discrimination blindness produced by ablation of cortical or tectal areas 08 p1265 A69-20685

Visual orientation near moon and at surface, considering terrestrial and lunar objects reflectivity and light reflection at various angles of incidence 14 p2525 A69-29750

SPACE PERCEPTION
NT AUTOKINESIS

Hyperstereoscopic and hypostereoscopic hologram images with doubled or halved interocular distance, noting effect on image depth 02 p0249 A69-11931

Soviet astronaut experiences and visual impressions during space walk outside Voskhod 2, noting dominance of optical analyzer in space perception and orientation [UN PAPER 68-95717] 06 p1000 A69-17049

Visual distortion in discrimination of figure proportion 06 p0875 A69-18022

Coriolis stimulus effect during centrifugal g load on spatial orientation and accompanying stick performance 06 p0876 A69-18023

Spatial disorientation as factor in accidents in operational command, noting relatively high experience level of involved pilots 07 p1072 A69-19431

Group observers magnitude estimation judgements of stationary spacecraft model apparent distance in simulated space, obtaining psychophysical functions for three stimulus ranges 07 p1069 A69-19501

Human perception in space as function of nervous relationships involving optic, kinesthetic, vestibular and other analysors 08 p1263 A69-19938

Maximum indicative absolute magnitudes of 33 supernovae, discussing usefulness as distance indicators 10 p1774 A69-22967

Jet fighter pilot spatial disorientation during flight and on ground, emphasizing vestibular neuronitis diagnosis 10 p1649 A69-23382

Distance discrimination in simulated space environment, studying just noticeable difference /JND/ to determine relations between distance threshold and observation distance 12 p2022 A69-26372

SPACE PHOTOGRAPHY

Visual orientation near moon and at surface, considering terrestrial and lunar objects reflectivity and light reflection at various angles of incidence
14 p2525 A69-29750

Luminescence effects on apparent size and shape of foveally fixated targets of various forms
19 p3259 A69-36458

Orientation reflexes of animals in weightlessness, analyzing turnover, vestibular and cervix reactions using motion pictures
20 p3470 A69-37248

Red shift-distance relation for galaxies, discussing time dependence
20 p3597 A69-37411

Mathematical models of human vestibular system for dynamic space orientation, using control theory
21 p3662 A69-38728

Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff
22 p3892 A69-40282

Target distance and direction monocular estimates with stabilized and nonstabilized retinal images, finding eye movements not improving spatial judgment accuracy
22 p3878 A69-40838

Stereoscopic shadow caster application to photographic stereoscopic projection for studying binocular stereopsis under kinetic viewing conditions in vision research
22 p3893 A69-40839

Device for studying stereoscopic field of vision applied to determining field of vision standards for healthy individuals
22 p3886 A69-41113

Head movement affecting visual and kinesthetic localization accuracy, discussing free and fixed head conditions
24 p4275 A69-43118

Mathematical input-output model for vestibular system, relating linear and angular motions to non-visual perception of orientation, motion and nystagmus for physiological characteristics
24 p4276 A69-43274

SPACE PHOTOGRAPHY

U SPACEBORNE PHOTOGRAPHY

SPACE POWER UNIT REACTORS

NT SNAP 8
NT SNAP 10A

Lunar surface power plants, considering weight constraint for various systems using nuclear power, solar cell/fuel cells and H-O reactant regeneration
01 p0013 A69-11396

Out-of-core thermionic space power generators using heat pipes, discussing feasibility in geometry, heat pipes, reactor, shield, heat exchanger and radiator
08 p1256 A69-19856

Thermionic space power reactor design, detailing Critical Experiment problems
09 p1441 A69-21835

Soviet space astronomy including rocket, satellite and space probe measurements for solar, stellar, planetary and lunar studies
01 p0155 A69-10946

Radio links between earth and deep space probes, summarizing bistatic radar astronomy results
[AAS PAPER 68-182] 02 p0311 A69-11467

S-band radio occultation for probing atmospheres of Mars and Venus
[AAS PAPER 68-185] 02 p0311 A69-11470

Satellites use in French space meteorology, discussing evolution, achievements, Eole project, etc
02 p0275 A69-11911

Temporary launching sites for rocket probes, discussing CNES activity, Dragon and Titus programs and mobile launching units
02 p0228 A69-11921

HORA, flexible upper rocket stage, noting variable fuel tank capacity and high energy propulsion
08 p1409 A69-20094

Low thrust space probe mission to Halley comet, utilizing nuclear electric propulsion
10 p1772 A69-22864

Tabular listing of Soviet satellites, spacecraft, probes and rockets launched between October 1957 and October 1967
13 p2355 A69-27359

Venusian atmospheric model based on Venera 4 measurements, calculating probe distance travel, temperature, density and pressure profiles
13 p2345 A69-27688

German solar and space probe Hora, discussing payload and propellant
13 p2357 A69-28638

Comets considered as natural interplanetary space probes, stressing need for international cooperation on solar system studies
15 p2679 A69-30011

IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra
15 p2673 A69-30014

Earth sensor for spin stabilized spacecraft to maintain specific orientation with earth, discussing use of blue and red filters
15 p2609 A69-30593

Zodiacal light brightness and polarization measurements from space probes approximated by Mie scattering of interplanetary dust particles
16 p2857 A69-32092

Tacite rocket probe to study space IR radiation, using passive stellar sensor for recording reference stars positions to recalibrate gyroscope kinetic motion for attitude restoration
[ONERA-TP-731] 17 p3001 A69-33220

Future combined environment space simulation tests duplicating environment interaction encountered during earth orbits, deep space probes and manned flights
19 p3288 A69-35531

Optimal control stationkeeping for maintaining space probe stability around collinear points in three body problem
[AIAA PAPER 69-906] 21 p3807 A69-39338

Spatial region accessible to earth launched probes determined for mission planning for exploration of aperiodic comets, discussing orbit parameters
23 p4212 A69-41536

Spacecraft probes design for mapping meteoroid environment and penetration hazard through asteroid belt
[AAS PAPER 69-321] 24 p4392 A69-42867

Asteroid exploration by solar photovoltaic powered ion propelled probe, discussing spacecraft design, mission and 1975 Mariner utilization
[AAS PAPER 69-322] 24 p4381 A69-42868

SPACE PROGRAMS

NT APOLLO PROJECT

NT LUNAR PROGRAMS

NT SURVEYOR PROJECT

Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] 01 p0178 A69-10472

Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] 01 p0109 A69-10483

Space program effects in education, science and engineering, noting impact of first satellite on U.S. research and technology
01 p0179 A69-10500

Japanese space research organizations, sounding rockets, meteorology, satellite communications, geodesy, etc
[UN PAPER 68-95563] 01 p0151 A69-10501

NASA university program, discussing participation in space and aeronautics development based on project oriented research grants and Sustaining University grants
[UN PAPER 68-95413] 01 p0179 A69-10506

NASA programs and opportunities for international cooperation in space
[UN PAPER 68-95367] 01 p0179 A69-10516

U.S. space program projections, discussing earth orbit operations, lunar and planetary explorations, costs and timetable
02 p0355 A69-11744

Space simulation tests in TFS /Technological Feasibility Spacecraft/ program, discussing two interplanetary cruise modes and deorbit mode selected for simulation
02 p0227 A69-11757

Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
02 p0324 A69-12303

Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
02 p0326 A69-12680

French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems
03 p0518 A69-12851

NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
03 p0511 A69-13427

U.S.-European cooperation in space activities, discussing implementation by COSPAR and jointly owned industrial corporations
03 p0535 A69-13586

Cooperation in developing space programs between Western Europe and U.S.
03 p0535 A69-13588

Cooperation between U.S. and Europe in space programs, discussing contracts and conditions
03 p0535 A69-13590

U.S.-European cooperation, stressing unsatisfactory role of European industry and governments in space projects
03 p0536 A69-13595

National programs relationship to progress in technological societies
03 p0536 A69-14245

Canadian upper atmosphere and space research programs organization, management and results
[UN PAPER 68-95551] 06 p1042 A69-17034

Australian sounding rocket programs carried out in conjunction with U.S. satellite experiments
[UN PAPER 68-95214] 06 p1013 A69-17076

Stimulating effects of space hypersonic experiments on technical and scientific progress, discussing steel degassing, welding, electroforming and geological applications
[UN PAPER 68-95459] 06 p0857 A69-17083

U.S. aerospace programs, reviewing manned space missions, space applications, space science, transportation, strategic and tactical warfare and influence on aerospace industry
07 p1243 A69-18376

Future launch vehicle programs for automated space missions, discussing higher launch velocities and economics
[AIAA PAPER 68-447] 09 p1610 A69-21983

Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
10 p1811 A69-22863

Space flight research programs including stellar and biological evolutions and environmental control
12 p1555 A69-26005

Space experiments analysis involving standardization for economy and mission thesis compromise, detailing aeronomic satellite project with integrated utilization
12 p1273 A69-26128

Boosters and space vehicles including earth satellites, lunar probes and interplanetary spacecraft
13 p2356 A69-27914

Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing
13 p2240 A69-27947

Integrated circuits failure analysis in space program applications, describing electrical analog for notification, fact gathering, part analysis and corrective action functions
15 p2580 A69-31132

Indonesian space activities covering sounding rocket program, communication satellite ground station erection, etc
15 p2723 A69-31428

Report on Canadian space activities to COSPAR covering scientific satellite program, high altitude sounding rocket program, space radio communications, international cooperative programs, etc
15 p2723 A69-31429

Report on U.S. space science program to COSPAR on stellar and solar astronomy, lunar and planetary research, upper atmospheric physics, etc
15 p2723 A69-31430

Scientific research report on cosmic ray and X ray astronomy by constant altitude stratospheric plastic balloons, etc
15 p2723 A69-31431

Brazilian space activities covering launching sites, rocket experiments in meteorology, ionosphere and X ray astronomy, balloon experiments and ground observations
15 p2724 A69-31434

Australian space research including space flight programs in cooperation with NASA
15 p2724 A69-31450

Argentina space research report to COSPAR covering Orion II sounding rocket, balloon experiments, cosmic rays, X ray astronomy, international cooperative programs, etc
15 p2724 A69-31452

Pakistan space research covering meteorological rocket program, Na/K vapor experiment, satellite tracking, etc
15 p2724 A69-31455

Japan space research covering sounding rockets, balloons, satellites and facilities
15 p2725 A69-31466

Manned space stations role in future space plans, discussing prototypes and conceptual design
16 p2866 A69-31736

Space program design, discussing NASA centers and NASA R and D life sciences, technological developments and federal action
17 p3076 A69-34042

Commercial utilization of space - Conference, Dallas, May 1967
17 p3041 A69-34043

General technology history, stressing space technology and programs influencing developments in other fields
17 p3076 A69-34045

Scientific space research program /1968-1978/ outlining advanced lunar orbiter and Mars, Venus and Mercury probes
18 p3193 A69-34360

Frequency bands allocations for space research and radio astronomy development, noting Inter Union Commission of Frequency Allocations recommendations
18 p3100 A69-34376

Manufacturing in space based on nongravity and hard vacuum environment, considering crystal growth and refinement, perfectly shaped bodies, refractory metals ultrapurification, etc
18 p3234 A69-35066

Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
18 p3208 A69-35067

AIAA view on Post-Apollo space program, considering multiple goals, unmanned application satellites and manned space flight objectives
18 p3236 A69-35136

Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems
19 p3430 A69-36010

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program
19 p3432 A69-36750

Juridical meaning of peaceful in 1967 Space Treaty interpreted in terms of real purpose of given space activity
20 p3635 A69-37105

International lawyers proposal for compulsory registration of space activities in connection with astronauts rescue and damages liability
20 p3637 A69-37118

INTELSAT program, discussing U.S. proposals regarding domestic services, separate satellite programs, etc
20 p3637 A69-37121

Domestic and international law compared in connection with space program, considering legal aspects of using satellites in discovering and exploiting earth resources
20 p3639 A69-37132

Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
20 p3618 A69-38117

PostApollo space goals based on manned and unmanned planetary exploration and space science programs, considering human factors and propulsion problems
21 p3856 A69-39167

Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests
[AIAA PAPER 68-610] 21 p3768 A69-39219

Space transportation cost factors, discussing payload characteristics, carrier utilization, program duration, government participation and control, carrier design, hardware costs, launch costs, etc
21 p3857 A69-39687

Strategy for exploration of inner solar system leading to origin and history, detailing lunar exploration program
22 p4022 A69-40449

Satellite data management systems design, considering user-designer cooperation aspects for space programs
[AAS PAPER 69-366] 24 p4417 A69-42806

Fiscal requirements forecasting for space systems involving data analysis
[AAS PAPER 69-166A] 24 p4417 A69-42814

Space program planning, noting market requirements, acceptability and future characteristics
[AAS PAPER 69-083] 24 p4418 A69-42820

Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] 24 p4379 A69-42825

Economic aspects of future space activities noting systems analysis, operations research, manned and unmanned space capabilities, etc
[AAS PAPER 69-113] 24 p4418 A69-42878

Cape Kennedy space research and national priorities, indicating performance and progress of future space operations
[AAS PAPER 69-110] 24 p4419 A69-42879

Space flight programs management cooperation and limited competition advantages, emphasizing single management team responsibility for effective multi-lateral activities
24 p4419 A69-43043

SPACE RADIATION
U EXTRATERRESTRIAL RADIATION

SPACE RADIATORS
U SPACECRAFT RADIATORS

SPACE RATIONS
Higher plants utilization as nutrition source in space missions, comparing weight requirements for cultivation equipment and food storage
15 p2560 A69-31408

SPACE RENDEZVOUS
NT ORBITAL RENDEZVOUS

Space rendezvous problem as applicable to interplanetary missions, discussing steps in rendezvous maneuvers to permit final docking
03 p0511 A69-13401

Minimum fuel consumption for low thrust jet engine propelled space vehicles maneuvering in circular trajectories
05 p0829 A69-15879

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required
05 p0789 A69-16047

Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust
16 p2852 A69-31558

Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses
16 p2857 A69-32177

Optimal low thrust coplanar rendezvous control for thrusting vehicle and passive vehicle in elliptical orbit using linearized equations of motion and polar coordinates
20 p3617 A69-37192

Parallel rendezvous of space vehicles in central gravitational field, discussing relative motion of space vehicle and supplementary force required
20 p3574 A69-37956

Halley Comet rendezvous mission, comparing low thrust mode with ballistic Jupiter or Saturn swingby mode
[AIAA PAPER 69-933] 21 p3809 A69-39360

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories
[AIAA PAPER 69-890] 21 p3678 A69-39415

Space rendezvous methods from developmental environment to operational method
21 p3824 A69-39474

Rendezvous, intercept and injection optimal control laws derived from inhomogeneous linear differential equations with quadratic performance index
23 p4224 A69-41921

Quasi-optimum control law for minimum-time bounded acceleration rendezvous in central force field using Friedland technique, with application to lunar flight
24 p4349 A69-43313

SPACE RENDEZVOUS MANEUVERS
U SPACECRAFT MANEUVERS

SPACE SCIENCES
U AEROSPACE SCIENCES

SPACE SIMULATORS
NT HIGH VACUUM ORBITAL SIMULATOR

Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite
15 p2587 A69-30391

Selectively pumped thermal vacuum test chamber for orbital heat transfer and environment simulation for flight vehicle performance prediction
15 p2587 A69-30392

Test facility for space vehicles simulating outer space gas pressure, heat sink behavior and relative motion to sun, detailing design and operation
21 p3689 A69-38420

Space simulation facility assembly and operational testing
22 p3919 A69-39959

Xenon high wattage short arc lamps for space/solar simulators, describing seals, electrodes shapes and cooling, operating characteristics, etc
[AIAA PAPER 69-998] 22 p3920 A69-40376

Space simulator vacuum facility for optical satellite tests, construction, operation and maintenance, emphasizing noncontaminating environment and pumping systems
[AIAA PAPER 69-1026] 22 p3924 A69-40396

Molecular beams for simulating orbital flight through planetary atmospheres, considering various nozzle beam systems
[AIAA PAPER 69-1031] 22 p3926 A69-40437

Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator
[AAS PAPER 69-516] 24 p4272 A69-42850

SPACE STATIONS
NT ORBITAL SPACE STATIONS
NT ORBITAL WORKSHOPS

Synchronous observations of satellites by photographic techniques from satellite stations, discussing reference stars plane coordinates and exposure time recording
01 p0027 A69-10224

Space station design requirements, Apollo applications program and various experimental programs
01 p0163 A69-11395

Buoyant station with science package designed for long duration missions with horizontal mobility in Venus atmosphere
02 p0333 A69-11745

Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds
[AIAA PAPER 68-142] 02 p0334 A69-12373

Permissible development direction for space research, discussing space station, required systems and cost estimates
05 p0829 A69-15920

Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis
05 p0827 A69-16476

Efficient life support systems for prolonged space missions, discussing scientific and experimental research
[UN PAPER 68-95778] 06 p0879 A69-17040

Wideband uncooled two stage reflecting parametric amplifiers with low noise temperature, noting application to space stations for telecommunications by satellites
07 p1099 A69-18463

SPACE STORAGE

Coriolis acceleration in rotating environment, discussing origins and role in human existence in rotating space station 09 p1540 A69-21891

Model simulation in program planning for space station with emphasis on accommodation of logistics 10 p1669 A69-22976

Large power systems integration in manned space stations, discussing design, selection and application criteria 13 p2209 A69-27939

Manned space stations role in future space plans, discussing prototypes and conceptual design 16 p2866 A69-31736

Satellite solar power station proposed for power generation for future requirements, discussing world energy needs and finiteness of fossil fuel reserves 16 p2867 A69-31817

Space station observations of stars, galaxies and quasars, stressing electromagnetic spectrum role in astronomy 18 p3194 A69-34370

Space docking, personnel placement on space stations, rescue stations, etc 18 p3196 A69-34630

Technological possibilities of gravity free production in space environment, discussing containerless manufacture of glass, liquid metal manipulation and defect free fibers 18 p3206 A69-35490

Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems 19 p3430 A69-36010

Manned lunar bases from legal viewpoint, discussing national jurisdiction, personnel policies, mineral rights, etc 20 p3637 A69-37119

Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology 21 p3827 A69-39691

Electric power system selection for long duration manned space station [AIAA PAPER 68-1034] 22 p3869 A69-40549

Space station safety, discussing damage containment and control, escape and rescue, etc [AAS PAPER 69-518] 24 p4392 A69-42842

SPACE STATION

Thermal protection system optimization for storage of cryogenic propellants in space, noting vented systems [AIAA PAPER 69-27] 06 p1039 A69-18211

Space storable propulsion system comparison, discussing liquid propellants performance and thermodynamic analysis [AIAA PAPER 68-614] 09 p1570 A69-21981

Mathematical model of closed biological cycle regenerating part of life support products, incorporating astronaut, storage and regenerating waste disposal units 10 p1649 A69-23580

Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage 12 p2191 A69-26793

Thermal insulation for cryogenic storage in space, discussing Apollo service module conversion to cryogenic service module 12 p2175 A69-26827

Combustion performance evaluation program demonstrating high performance with space storable propellant combination of FLOX, methane and ethane [AIAA PAPER 69-507] 16 p2829 A69-31848

Space storable regenerative cooling with FLOX/methane under conditions for small pump fed engine, describing injector and chamber design [AIAA PAPER 69-509] 16 p2844 A69-32718

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane [AIAA PAPER 69-505] 16 p2845 A69-32762

Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution [AIAA PAPER 69-507] 16 p2835 A69-32772

Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants [AIAA PAPER 69-506] 16 p2846 A69-32778

Payload optimization factors for orbital storage of liquid hydrogen, considering payload cost of agitation, tank pressure, pressurant weight, etc [AIAA PAPER 69-1007] 22 p4021 A69-40381

SPACE SUITS

Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility 03 p0379 A69-12993

Sensible heat exchange from Gemini and Apollo space suits determined in environmental test facilities, presenting data for heat flux distributions 06 p0880 A69-17089

Astronaut extravehicular protection systems, discussing space suit, life support and thermal control subsystems and micrometeoroid protection 06 p0882 A69-17643

Space and immersion suits physiological evaluation by pulse duration multiplexing telemetry, using commercial FM receiver 06 p0883 A69-17845

Improved suit for lunar wear, noting production and qualifying schedule and astronaut tests 08 p1267 A69-21146

Discharge rates of metabolic products in men confined in pressure chamber wearing airtight suits and gas masks 10 p1646 A69-23508

Passive thermal control system for space suit use in extravehicular environment, discussing skin temperature control at varying heat flow rates 12 p2023 A69-26549

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept [AIAA-PAPER-69-366] 13 p2213 A69-28298

Heat pipe devices applied to radiative body heat transfer in space suit temperature control [AIAA PAPER 69-619] 17 p2914 A69-33293

Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability 21 p3665 A69-39170

Hard space suit temperature history during lunar operational task simulation 21 p3666 A69-39182

Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation 22 p3890 A69-40212

Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator [AIAA PAPER 69-992] 22 p3893 A69-40370

Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests [AIAA PAPER 69-993] 22 p3893 A69-40371

Computerized mass spectrometer for monitoring atmosphere in astronaut suits and cabin [AIAA PAPER 69-1016] 22 p3922 A69-40388

EVA/IVA fluid umbilical improved stowability and flexibility, discussing cross section development and tests [AAS PAPER 69-470] 24 p4272 A69-42847

SPACE SURVEILLANCE

Space surveillance radar system sensor misassociation of one space object for another, noting applicability to sonar and optical sensors 02 p0210 A69-12388

SPACE SURVEILLANCE [GROUND BASED]

Lake Kickapoo Space Surveillance Transmitting Station in Texas, discussing surroundings, equipment, operating range, VHF transmission, etc 03 p0411 A69-13209

Multiradar system development for total view of air situation from single air views, using digital computers interconnected with central computer 05 p0719 A69-15932

SPACE SURVEILLANCE [SPACEBORNE]

Photometric-polarimetric observations of planetary surfaces, discussing geological environment interpretation and spacecraft reconnaissance system mission planning 03 p0421 A69-13394

Ground coverage of oblate planets by spin stabilized satellites, determining ground areas visible to satellite by solution of quadratic equations 03 p0522 A69-14244

Aeronautical service satellites, considering communications, surveillance for navigation, traffic control, collision avoidance and search and rescue, weather and border control functions 04 p0666 A69-15295

Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution 12 p2192 A69-26978

Correlation spectrometer for air pollution surveillance from airborne and spaceborne platforms, noting scanning satellite system for continuous global coverage 12 p2096 A69-26981

Remote oceanographic sensing from ships, aircraft and spaceborne platforms, using active /radar and laser/ and passive sensors in visible, IR and microwave regions 12 p2075 A69-26997

Experimental SST terminal for satellite L band communications/surveillance ATC system, establishing terminal requirements for NASA and FAA studies 17 p2932 A69-34118

Tracking and data relay satellite system /TDRSS/ compared to ground based mission support, considering altitude coverage capability, economy and communication requirements 23 p4120 A69-41756

SPACE SYSTEMS ENGINEERING

U AEROSPACE ENGINEERING

SPACE-TIME CONTINUUM

U RELATIVITY

SPACE-TIME FUNCTIONS

Killing fields applied to nonsymmetric spaces specify coordinate lines with slowest possible metric tensor variation and gravitational radiation 01 p0115 A69-10018

Random temperature fields in plates and shells in thermal contact with two media with temperatures as separable random space-time functions 01 p0173 A69-10077

Asymptotic behavior of curvature and conformal curvature tensors on asymptotically flat space-time 01 p0116 A69-10393

Field theory of gravitation, discussing consequence of universality of gravitation /space-time geometry determination/ 01 p0116 A69-10443

Electromagnetic fields in vacuum extended to fields in presence of matter, deriving field equations covariant under Lorentz proper and improper transformations 02 p0281 A69-12196

Equations of motion for arbitrary first order perturbations around any spherically symmetric metric 02 p0328 A69-12730

Static locally flat solutions of Einstein vacuum field equation with line singularities and global space curvature, noting analogy to electromagnetic fields 03 p0466 A69-13389

Conformal change and connection relations in Einstein unified field theory, noting tensor applications 03 p0467 A69-13756

Ring laser field space-time pattern from light waves scattered at discontinuities, discussing equations of motion of solid state laser 03 p0441 A69-14140

Canonical equations for Lagrangian form of gravitational field equations in empty space 04 p0658 A69-14899

Existence theorem for periodic solutions of parabolic boundary value problem for infinite space time cylinder 04 p0624 A69-15004

Cosmology, experiments on gravitation, space-time theory and model of universal history 04 p0661 A69-15157

Space-time function for joint probability distribution of velocity and magnetic fields from hydromagnetic turbulence equations 04 p0638 A69-15277

Space-time diffraction for asymptotic solution of Klein-Gordon equation, studying one dimensional dispersive medium 05 p0802 A69-15930

Existence of cosmic time functions based on stable causality condition /absence of closed timelike or null curves in Lorentz metric/ 06 p0957 A69-17471

Necessary and sufficient conditions for Einstein spaces of second embedding class 06 p0957 A69-17547

Optimum length of Fourier time series approximating diurnal F2 critical frequency variation on planetary scale 06 p0921 A69-17746

Equation describing statistically trapped particle motion under influence of fields varying in time and space 07 p1209 A69-19375

Petrov classification of cylindrically symmetric space-time, giving Weyl conformal curvature tensor and surviving Ricci tensor components 07 p1182 A69-19409

Riemann metric leading to empty flat space from Rainich equations of already unified field theory
07 p1182 A69-19418

Plane symmetric perfect fluid cosmological model derived from class 1 considerations, evaluating scalar invariants for line element
07 p1222 A69-19586

Space-time evolution of one Petrov type into another, obtaining algorithm, flow diagram and discontinuous hypersurfaces results
08 p1350 A69-19789

Space time structure conditions derived for compatibility with simultaneous fulfillment of causality and equivalence principles
08 p1351 A69-19948

Primordial magnetic field effects on spatially homogeneous cosmological models with anisotropic Euclidean metric
08 p1383 A69-20049

Einstein space time concepts for unified formalism of matter interactions from elementary particles to astronomical bodies, discussing relativity theory
08 p1352 A69-20730

Analytical description of planetary distribution of space-time variations of fOF2, deriving Fourier series as function of UT
09 p1486 A69-21545

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves
09 p1486 A69-21547

General theory of relativity and tensor field equations relating space time characteristics to local properties of matter and vacuum, using Palatini Lagrangian method
09 p1593 A69-21572

Kerr type metric empty space times starting from fixed reference system and associated Killing vectors
09 p1540 A69-22050

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
09 p1492 A69-22710

Four dimensional space-time immersion in conformally flat six dimensional space or flat eight dimensional space, noting group of isometries of tangent spaces
10 p1774 A69-23162

Relativity theory examined critically, discussing spherical space, Lorentz transformation and Einstein conclusions
10 p1725 A69-23317

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies
10 p1687 A69-23927

Book on relativity and cosmos, space and time in physics, astronomy and cosmology covering theoretical and empirical research
10 p1784 A69-24019

Wave propagation in connected space-time for linear second order hyperbolic partial differential equation, describing unitary invariant theory
11 p1908 A69-24356

Space-time hypersurfaces representations of shock waves of relativistic MHD, discussing compressibility role in proving consistency with relativistic theory
11 p1928 A69-25246

Elastic stress created by perpetual motion of isotropic elastic solid in static space-time
12 p2130 A69-26283

Cosmic radiation recorder designed for use onboard satellite to measure intensity space-time distribution under geomagnetic effect
12 p2094 A69-26697

Space-time characteristics of coherent light giant pulse development in laser with instantaneous Q switching, deriving equations to describe linear and nonlinear phases
12 p2110 A69-26909

Einstein theory of space and time analyzed with emphasis on inertial systems
13 p2297 A69-27633

Computer program for compressible fluid flows with space and time dependent variables, discussing hypervelocity impact
[AIAA PAPER 69-353] 13 p2365 A69-28286

Categorical structures in theoretical thinking for philosophical fundamental physical laws analysis, including space-time concept changes in classical physics and in theories of relativity
14 p2484 A69-28861

Physical space-time defined as four dimensional Riemann space based on available information for physical measurements
14 p2484 A69-28862

Macroscopic space-time meaning in theoretical physics in terms of mathematical definition and philosophical concept
14 p2484 A69-28864

Space-time interpretation of static Einstein universe model and Friedmann space with variable positive curvature
14 p2484 A69-28865

Asymmetry causes on cosmogonic scale in view of symmetry in small space-time regions /microworlds/ determinable within framework of Einstein theory
14 p2516 A69-28866

Seasonal variation in ionospheric radiation absorption related to time variation between sunrise and constant angle attainment of sun
14 p2437 A69-29072

Electron density, temperature and dimensions of helium breakdown induced by Q switched ruby laser beam as function of space and time
14 p2492 A69-29636

Successive approximations method applied to system of independent equations describing electromagnetic wave propagation in space with gravitational wave metric
14 p2487 A69-29669

Inertial systems in homogeneous isotropic expanding universe model, giving expression for line element accounting for Hubble effect
15 p2654 A69-31495

Monograph on creation and evolution of physico-theoretical concepts of space, time and matter
16 p2812 A69-32110

Magnetized minerals studied to investigate space-time structure and reversal of main geomagnetic field
16 p2782 A69-32462

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum
16 p2782 A69-32489

Analytical description of planetary distribution of space-time variations of fOF2, deriving Fourier series as function of UT
16 p2783 A69-32540

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves
16 p2784 A69-32542

Cylindrical concentric detonation front and stability mechanism space-time measurement
20 p3632 A69-37215

Thomas wave equation in fluid mechanics, examining coordinates system with normal hyperbolic metric of universe tube having given signature
20 p3598 A69-37430

Metric state-time dynamical polysystem with sequentially compact topological space, noting sliding state trajectories
22 p3975 A69-40573

Space-time behavior of random pressure field of turbulent boundary layer on plane plate surface
22 p3933 A69-41027

Spherically rotating symmetric body gravitational collapse within Schwarzschild radius, presenting trapped surface concept for asymmetrical cases and generalization of space-time singularities
23 p4219 A69-42333

Real space-time Green functions applied to turbulence induced infinite thin elastic plate vibration, analyzing mechanical dissipation effects
24 p4395 A69-42597

Weak magnetic field amplification in turbulent flow with velocity field as random function of space and time
24 p4375 A69-42657

SPACE TOOLS

Electrical explosive devices for space applications including explosive bolts, primers and igniters
01 p0141 A69-10544

Tools and equipment for extra- and intravehicular activities in space and on lunar surface
[AAS PAPER 69-438] 24 p4319 A69-42802

SPACE VEHICLE CHECKOUT PROGRAM

ESRO 2/IRIS satellite launching checkout, countdown and breakdown of operations
01 p0163 A69-11104

Digital computer systems design optimization based on operational experience in development of Saturn S-1C stage Automatic Test and Checkout System
03 p0400 A69-13233

Automatic checkout of space systems, discussing cost effectiveness tradeoffs, ground and onboard equipment utilization, vehicle design and mission success risk
03 p0411 A69-13392

Interpretive Checkout Test Language /CTL/ designed in near English form for aerospace checkout tasks
04 p0569 A69-15364

Apollo/Saturn V automatic checkout test verification and debug program using real time computer simulation with digital space vehicle system model
[AIAA PAPER 69-321] 09 p1478 A69-22378

Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance /ADAM/ concept
[AIAA PAPER 69-307] 09 p1478 A69-22382

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements
[AIAA PAPER 69-308] 09 p1479 A69-22385

Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection
11 p1866 A69-25081

Space vehicle checkout, launch control and data monitoring by general purpose ground system providing flexible stimuli generation, measurement acquisition, computation and information display
18 p3118 A69-35064

Apollo Guidance, Navigation and Control system prelaunch checkup, flight experience and error analysis
[AIAA PAPER 69-89] 21 p3824 A69-39416

Integrated systems testing for unmanned spacecraft electromagnetic compatibility, discussing identification and elimination of interference sources
21 p3683 A69-39438

Space vehicle data system synthesizer /SVDS/ for dynamic calibration of automatic control and checkout systems during prelaunch and countdown operations
21 p3680 A69-39633

Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequences
[AIAA PAPER 69-946] 22 p3974 A69-40329

Programming and checkout of computer for Eldo inertial guidance system, including flight simulation and autopilot tests
[AIAA PAPER 69-961] 22 p3978 A69-40342

Mariner Mars 1969 spacecraft real time test support system and recorded data analysis including routing to printers, CRT displays and incremental plotters
[AIAA PAPER 69-982] 22 p3907 A69-40362

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements
[AIAA PAPER 69-308] 22 p3927 A69-40552

SPACE VEHICLE CONTROL

U SPACECRAFT CONTROL

SPACE VEHICLES

U SPACECRAFT

SPACE WEAPONS

Outer Space Treaty of 1967, discussing Article 4 and arms control
20 p3636 A69-37109

SPACEBORNE PHOTOGRAPHY

NT SATELLITE-BORNE PHOTOGRAPHY

Satellite photography applications to geography and cartography based on Gemini 7 photographs
[UN PAPER 68-95401] 01 p0178 A69-10489

Soviet space astronomy including rocket, satellite and space probe measurements for solar, stellar, planetary and lunar studies
01 p0155 A69-10946

Spacecraft device for photographing and transmitting TV pictures noting limitations and spatial conditions adaptations
02 p0207 A69-11829

Global cloud models construction techniques, discussing vertically pointing radars, airborne panoramic cameras, radiometry, meteorological satellites and light detection and ranging
02 p0275 A69-12381

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs
03 p0506 A69-13087

Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements
[SMPT PAPER 104-21] 04 p0650 A69-14361

Interpretation technique for weather satellite photographs of spatially coherent cloud distributions
04 p0628 A69-15090

Unified lunar control photogrammetric network produced by mapping satellite in 28 day polar orbit, using recurrent partitioning

05 p0819 A69-15628

Photographic system in Lunar Orbiter spacecraft

05 p0829 A69-15857

Photographic results of Lunar Orbiter program noting possible Apollo sites

05 p0822 A69-15858

Space observations needed for solar flares study

05 p0814 A69-15859

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations

05 p0763 A69-16054

Geophysical investigations on manned orbital space laboratories, discussing space photography, spectrophotometry, terrain pictures and aerosol layers

05 p0759 A69-16633

Blurred spaceborne photographic image reconstruction by spatial frequency filtration [UN PAPER 68-95240]

06 p0923 A69-17080

Mars surface features identification from comparison of Mariner 4 and ground bases telescopic photographs

07 p1213 A69-18605

Space photography as sedimentological research tool demonstrated by space photographs application to projected Mars mission

09 p1490 A69-21797

Apollo 7 and weather satellite observation photographs of hurricane Gladys and typhoon Gloria

10 p1722 A69-22944

Planetary imaging systems design problems illustrated by Mars orbiter reconnaissance, discussing radiation effect on film, shielding, stereo method comparisons, color bands, etc [SMPTE PAPER 105-78]

12 p2078 A69-25770

Low light level slow scan Owl TV camera system with secondary electron conduction camera tube for satellite-borne observation of auroral light emission

12 p2079 A69-25904

Wobble-spin technique for spacecraft inversion for earth photography using flywheel

12 p2174 A69-26780

Space photography for natural resource inventory, describing Gemini photographs role in assessing vegetation, geological, metal and soil resources in Western Hemisphere

12 p2097 A69-26987

Martian canals nature based on high contrast photographs obtained by Mariner 4 space probe

12 p2171 A69-27133

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters

13 p2296 A69-27696

Cartographic interpretation of TV cloud pictures transmitted by Molniia 1 satellite

13 p2292 A69-27730

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs

14 p2515 A69-28769

Apollo 9 multispectral photography compared with photographs taken simultaneously by aircraft using same film filter combinations

15 p2608 A69-30452

Apollo 8 photooptics, considering TV camera and broadcasts, photographic equipment and visual observation

15 p2609 A69-30469

Magnetically focused electronographic image converters in far UV photography and spectroscopy in space astronomy applications

17 p2972 A69-33084

Tropical storms wind speeds related statistically to characteristics as pictured from satellites

17 p2997 A69-33690

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction

18 p3133 A69-34335

NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing

18 p3133 A69-34336

Automated crop surveys from integrating observations made at different times (time dimensioning) during growing season, noting earth resources satellites role

18 p3126 A69-34337

Aerospace images information suppressing and enhancing methods to aid interpreter in making more accurate recognition and measurement of earth resources subjects

18 p3133 A69-34338

Environmental studies using orbital photography, discussing color, color IR, black and white applications from Gemini and Apollo programs

18 p3132 A69-35275

Hyperaltitude photographs from Gemini spacecraft for geological mapping

18 p3132 A69-35276

Earth space image interpretation in various spectral regions, discussing effectiveness of photography, spectrophotometry, radar and microwave observations

20 p3545 A69-37964

Lunar surface photographic mapping by Ranger, Surveyor and Lunar Orbiter projects, emphasizing image resolution and coverage

21 p3719 A69-38325

Diurnal entrainment deviations and atmospheric turbulence effects on flash photographs from Geos 1

21 p3793 A69-38339

Cloud velocity computations from ATS 1 and 3 satellites spin-scan photographs for prediction of neph systems motion and thunderstorms

21 p3757 A69-38370

Satellite phase and aberration corrections in processing photographic observations for geodetic purposes

21 p3720 A69-38606

Hyperlatitude photographs for geological mapping from Gemini spacecraft, noting remote sensing imagery

22 p3935 A69-40040

Apollo 6 multisensor imagery of Wilcox Playa /prehistoric lake remnant/ in Arizona, using IR scanner, microwave radiometer, vidicon system and cameras

22 p3942 A69-40988

Multiple exposure averaging technique summarizing satellite cloud photographs for various periods, presenting entire earth cloud cover atlas

24 p4343 A69-42897

SPACECRAFT

Digital data processing equipment for space flight PCM telemetry

03 p0393 A69-13290

Aeronautics - Conference, Beverly Hills, September 1968

06 p0866 A69-17658

Real time pressure simulation chambers for testing space vehicles, discussing slow and rapid evacuation and pumping systems

13 p2240 A69-28077

SPACECRAFT ANTENNAS

Triangulated pantograph structure for deploying antennas, special equipment and instruments from spacecraft, noting structural design and strength characteristics

02 p0252 A69-11752

C and S band waveguide impedance measurements taken in flight in reentry plasma, noting results for plasma

02 p0218 A69-12333

Mars and Venus probes antenna problems in environments of near earth space, deep space and nonearth planetary atmospheres

02 p0223 A69-12811

Testing program using electrical measurements for determining adequacy of erectable parabolic reflector for space missions

02 p0223 A69-12812

Current antenna system technology, particularly airborne and spaceborne applications

04 p0576 A69-14767

Decoupling techniques for antennas on aerospace vehicles, noting effects on far field radiation pattern and antenna gain

05 p0729 A69-15977

Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation

07 p1227 A69-18333

Wire screen deployable boom concept for avoiding thermal bending of slender tubes problem in application to gravity gradient stabilization and antennas of spacecraft

07 p1229 A69-18350

Onboard digital computer evaluation of trigonometric functions for antenna pointing

07 p1089 A69-19745

Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors

12 p2044 A69-26977

Helix antennas for phased arrays for spacecraft, discussing performance and development

13 p2228 A69-27632

Retrodirective antennas for spacecraft, discussing design, operations and applications

16 p2762 A69-32557

Spacecraft antennas properties, structure and problems including frequency ranges, external influences, omnidirectional radiation, input impedance, etc

16 p2763 A69-32584

Bandwidth limitations for phase steered planar arrays in satellite applications, discussing weight reduction by modulo 2 pi beam steering

17 p2941 A69-34082

RF impedance probe digital system for ionospheric measurements based on antenna resonance phenomena

20 p3542 A69-37791

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period

22 p3934 A69-39964

RF voltage breakdown facility for studying spacecraft antenna characteristics in space and planetary atmosphere environments [AIAA PAPER 69-1028]

22 p3924 A69-40397

Deployable cross log periodic dipole /LPD/ array on conducting cone as potential application to spacecraft or missile requiring frequency independence in VHF-UHF band

22 p3913 A69-40693

Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns

22 p3913 A69-40697

Radiation and impedance characteristics of spherically capped conical and monopole antennas protruding from spherical vehicle related to cone height, angle and vehicle diameter

22 p3908 A69-40699

Antenna design considerations for spacecraft at relativistic velocities, discussing gain function, receiver power density and source apparent frequency and direction

22 p3914 A69-40700

Mars entry capsule ionized wake producing circularly polarized antenna radiation null region, noting effect on communication blackout time

22 p3914 A69-40701

Prolate spheroidal antennas operation in isotropic plasmas, studying effects of collision frequency, electron temperature and antenna length on admittance, radiation and current distribution

22 p3914 A69-40702

Spacecraft phase array designed for use on synchronous communication satellite, discussing low structural weight packaging and unfurling problems and helix approach

22 p3915 A69-40705

Frequency diversity technique simplifying airborne antennas for UHF telemetry, useful on spin stabilized vehicles requiring omnidirectional antenna coverage

23 p4122 A69-41777

Space vehicle multibeam Cassegrain antenna system design meeting radiometric mapping requirements in microwave frequency range, discussing mounting, degrees of freedom, etc [ONERA-TP-713]

23 p4143 A69-42527

Swept frequency X band reflectometer for measuring antenna properties in simulated reentry environments [AAS PAPER 69-282]

24 p4313 A69-42861

SPACECRAFT CABIN ATMOSPHERES

Flight vehicle cabins ventilation for undesirable gas contaminants removal, discussing contaminant concentration calculation and automatic control

02 p0200 A69-11512

Physiological effects of space cabin environment variables during long and hazardous space missions with regard to engineering constraints and radiobiology

03 p0380 A69-13504

Corona and breakdown voltage in helium-oxygen atmospheres, analyzing conditions for manned space flight vehicles

05 p0730 A69-16241

Oxygen-helium cabin atmosphere effect on speech communication analyzed during simulated space mission

07 p1066 A69-19420

- Resistance to bacterial pneumonia and influenza infection in space cabin environment tested on mice in simulation chamber
07 p1067 A69-19432
- Spacecraft debris atmosphere effects on observations, discussing contamination of exposed optical surfaces and light scattering by ice particles from cabin water vapor leakage
09 p1487 A69-21654
- Digital computer program for heat and mass transfer characteristics of spacecraft carbon dioxide adsorption beds, discussing surface pressure of absorbent material [AICHE PAPER 19C]
09 p1446 A69-21931
- Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications
09 p1531 A69-22366
- Experimental program to evaluate regenerable sorbents for carbon dioxide removal in space cabin environments
09 p1447 A69-22552
- Physiological effects on men of 10 hour exposure to nitrogen-oxygen mixture followed by pure oxygen 4 hour exposure, simulating conditions during EVA
17 p2912 A69-32940
- Artificial life support systems for sealed environments with application to specific missions, noting cryogenics use
17 p2915 A69-33682
- Infectious diseases in space flight, considering environment role in infection transmission, occurrence and severity
20 p3479 A69-37973
- Space cabin and suit pressures for decompression sickness avoidance and fire hazard alleviation
22 p3890 A69-40212
- Computerized mass spectrometer for monitoring atmosphere in astronauts suits and cabin [AIAA PAPER 69-1016]
22 p3922 A69-40388
- Space cabin environment simulation effects on resistance to infection caused by pneumonia and influenza virus in rats
23 p4108 A69-41832
- Separation system for collecting wash and waste water from gaseous environment and separating liquid and gaseous phases during space missions [AAS PAPER 69-473]
24 p4272 A69-42845
- SPACECRAFT CABIN SIMULATORS**
- Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity-optics display [SMPT E PAPER 105-74]
12 p2055 A69-25768
- Photographic system for astronaut training in Apollo Mission Simulator, using fixed camera and moving earth model coincident with strip color film past exposure slit
16 p2792 A69-32787
- SPACECRAFT CABINS**
- Mathematical simulation of temperature and humidity changes in compartments of hermetically sealed space vehicle cabins
02 p0200 A69-11489
- Low profile bulkheads for launch vehicles and spacecraft compartments to obtain structural weight reduction [AIAA PAPER 68-355]
02 p0334 A69-12370
- Meteoroid perforation effects on space cabin design, discussing simulated destructive environmental tests [AIAA PAPER 69-365]
13 p2357 A69-28297
- Parametric thermal control weight and power requirements for spacecraft life support systems, considering number of cabins, crew activity, heating, cooling and regeneration [AIAA PAPER 69-621]
17 p2914 A69-33305
- Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire [AIAA PAPER 69-618]
17 p3074 A69-33704
- SPACECRAFT COMMUNICATION**
- NT REENTRY COMMUNICATION**
- Integrated circuit digital filters design characterized by weight coefficients containing Lanczos factor for application to processing of signal transmitted from space vehicles
01 p0038 A69-10071
- Satellites and ocean platforms for civil aviation operations over North Atlantic, noting cost justification dependence on supersonic traffic increase [UN PAPER 68-95887]
01 p0113 A69-10521
- Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects
01 p0030 A69-10581
- Performance characteristics of hard limited and linear repeaters for satellite communications systems
01 p0032 A69-10966
- Dynamic tracking filter analysis and capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system
01 p0034 A69-11140
- Frequency feedback receiver capabilities as low threshold demodulator in frequency modulated frequency division multiplexing satellite system
01 p0034 A69-11141
- Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
02 p0206 A69-11661
- Maser for satellite communication consisting of traveling wave ruby maser and closed cycle liquid helium refrigerator, discussing design, operation and performance characteristics
02 p0256 A69-11992
- Ultra cone system for ultralow noise reception of RF space communication from Mariner 5 during occultation by Venus [JPL-TR-32-1340]
02 p0220 A69-12429
- Low noise microwave amplifiers for radio astronomy and satellite communications receiving system preamplification
03 p0402 A69-13017
- Communications system considerations for lunar libration point relay satellite to support Apollo lunar far side mission
03 p0388 A69-13180
- Low altitude satellite relay system, discussing modulation, antennas, frequency plans, telemetry, tracking, command and earth terminals
03 p0391 A69-13241
- High gain self steering repeater for multibeam microwave array system for earth-satellite communications
04 p0573 A69-14330
- AN/TSC-54 military satellite communications terminal for contingency deployment, discussing design, system tradeoffs and performance [AIAA PAPER 68-439]
04 p0579 A69-15367
- Earth station system for ground based communications with Intelsats 2 and 3 noting antennas, receivers, transmitters and power supplies
05 p0741 A69-15667
- High power transmitting tubes for INTEL SAT satellite communication earth stations, including multicavity klystrons and wideband TWT
05 p0728 A69-15668
- Teichmann cost analysis extended to include frequency dependent and diversity dependent rain losses for satellite communication, using Bayes strategy
05 p0721 A69-16580
- Transistorized receiver for satellite communications having adjustable receiver center frequency within 20 MHz
05 p0734 A69-16594
- Measurement methods at IF and baseband sections of microwave links, calculating noise superimposed on each swept measurement curve
05 p0722 A69-16728
- Ground station electronic environment, telemetry encoding and radio links for spacecraft communications and tracking
06 p0886 A69-16860
- Satellite communication channel number and distribution optimization, obtaining malfunction probability for telephone service communication system [UN PAPER 68-95772]
06 p0886 A69-17030
- Satellite and space communications and data transmission systems, emphasizing improvements in amount and rate of information for future requirements
06 p0886 A69-17045
- Communication satellites application to domestic live TV, telephone and data communication and long distance telecommunication in Canada [UN PAPER 68-95501]
06 p0887 A69-17075
- Coherent frequencies method for irregular component of satellite signal phase lead due to ionospheric inhomogeneities between satellite and ground station
06 p0890 A69-17799
- Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding
06 p0890 A69-17862
- High power coupled cavity traveling wave tube for satellite communication, noting design techniques and performance characteristics
07 p1094 A69-18427
- Satellite communications antenna system at Fucino earth station, describing transmitting and receiving equipment, facilities, power supply, etc
07 p1075 A69-18493
- Time division multiple access satellite communication system employing pulse code modulation of voice channels and phase shift keying of RF carrier
07 p1077 A69-18759
- High latitude transition or scintillation boundary between high and low amplitude fluctuations of satellite radio beacon signals examined as function of time
07 p1125 A69-18846
- Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware
07 p1083 A69-19124
- Mariner 1969 multimission high rate deep space telemetry system design, hardware and application
07 p1083 A69-19125
- Design aspects of 20 ft air transportable satellite earth station
08 p1272 A69-19926
- Large aperture low noise aerial design for satellite communication earth stations, discussing expected performance of 85-ft antenna at 4 GHz
08 p1279 A69-19956
- Ionospheric and tropospheric effects on microwave propagation including Faraday rotation, atmospheric refraction, attenuation and noise
08 p1272 A69-19958
- Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods
08 p1272 A69-19959
- Reliability effect on operating costs of satellite communications system ground stations, calculating annual cost of channel with continuous time carry-over
08 p1276 A69-20586
- Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods
08 p1276 A69-20591
- Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers
08 p1276 A69-20592
- Bandwidth restriction effect on performance of linear codes for digital communication with space vehicles, noting bit and word error probabilities
08 p1276 A69-20597
- RF selection for interspacecraft or earth-spacecraft communication
09 p1449 A69-21270
- Interference noise in communication satellite receivers and terrestrial radio relay receivers, noting interference reduction transfer factor
09 p1450 A69-21279
- Coordination distances and interference probabilities to control interference in frequency sharing between communication satellite systems and terrestrial radio services
09 p1450 A69-21280
- Earth station antennas for communication satellite service, discussing design, fabrication, main lobe gain, side and back lobe suppression and noise performance
09 p1461 A69-21281
- Direct radio and TV broadcasting from satellite-borne radio transmitter to general public, giving visibility, gains, frequencies and bandwidths tables
09 p1586 A69-21286
- Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287
- Propagation and noise effects on frequency choice for communication satellite service to aircraft and ships, noting tropospheric and ionospheric attenuation considerations
09 p1451 A69-21288
- Radiocommunications for Tiros and Nimbus meteorological satellites, noting weather data communications and hydrological experiments
09 p1451 A69-21289
- Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services
09 p1451 A69-21290
- Communication problems due to natural and artificial plasmas in spacecraft vicinity, discussing plasma effect theory
09 p1451 A69-21292

Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons
09 p1451 A69-21293

Sensitivity of microwave earth stations for analog and digital communications
09 p1453 A69-21409

Construction of large parabolic antennas for radio astronomy and satellite communication, noting dimensional accuracy, directional precision and dynamical behavior
09 p1476 A69-21650

Orbiting Data Relay Network communications system provides continuous wideband communication between ground and earth orbiting spacecraft via synchronous satellite repeaters
[AIAA PAPER 68-432] 09 p1455 A69-21989

Large aperture satellite communication antenna gain measurement technique, using extraterrestrial radio wave source or satellite
09 p1456 A69-22116

Detectability parameter for measuring performance of multiple and random access satellite communication system using PN codes
09 p1457 A69-22460

Optimum time interval for constant data transmission rate during single pass of satellite over ground station
09 p1457 A69-22462

Frequency modulation feedback demodulator design procedure for satellite communications, noting importance of nonideal implementation
09 p1457 A69-22464

Commercial communication satellite earth station at Australia, noting antenna, autotracking capability, preamplifiers, and computer for control and monitor functions
09 p1458 A69-22469

Low noise wideband amplifier system for commercial satellite communication ground terminal receiver, noting cryogenically cooled parametric amplifier
09 p1458 A69-22470

Power requirements for tracking, telecommand and telemetry of spacecraft over interplanetary distances, considering transmission problems, equipment weight and reliability
10 p1652 A69-22984

Luna 9 automatic station flight control complex, detailing communication, orientation and stabilization systems operation after separation from acceleration module
10 p1792 A69-24197

High gain self steering microwave repeater for earth-satellite communications noting design, performance and results of color TV transmissions
11 p1839 A69-25294

Data relay satellite concept, discussing orbits, communications between widely separated earth stations, and satellite tracking, telemetry and commanding
11 p1839 A69-25295

Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
11 p1839 A69-25296

Multimode tracking /SYMMTRAC I and II/ feeds for low noise antennas, noting feed performance
11 p1852 A69-25317

Data processing system for satellite telemetry signals, describing hardware construction and operation, data readout, etc
11 p1840 A69-25426

Intermodulation noise distorting arbitrary frequency-modulated multicarrier microwave signal in satellite transponder, emphasizing nonlinear energy dissipation and AM-FM conversion
11 p1841 A69-25634

Electrical power requirements in spacecraft, discussing communication, engine and control systems, data processing, electrochemical and nuclear sources
12 p2015 A69-25863

Data compression, redundancy reduction and applications to space flight technology
12 p2027 A69-25876

Satellite technology for government and defense communications systems, noting effects of rainfall attenuation, weather and solar interference on performance and reliability
12 p2028 A69-25932

Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
12 p2028 A69-25933

Frequency measurement of moving spacecraft RF carrier waves at low SNR by analog recording of noisy signal and HF trigger tone, noting data processing and signal fading rate
12 p2038 A69-26051

Meteorology and space vehicle capabilities noting earth, outer space and earth atmosphere observations and measurements, relaying telecommunication signals, etc
12 p2126 A69-26126

Digital logic techniques for high speed satellite communications, noting general purpose logic cards
12 p2040 A69-26465

Traveling wave tube for European communication satellite power amplifiers, showing nonlinear distortions dependence on RF input/output power and helix voltage
[AIAA PAPER 68-430] 12 p2041 A69-26786

Number 2 ground communications antenna system on Goonhilly Downs for British Post Office earth station
12 p2044 A69-26923

ESRO 1 communication system and telemetering system compared to ESRO 2
13 p2220 A69-27749

Phase distortion, conversion of delay coefficients into channel noise and determination of waveguide delay coefficients for FM satellite communication systems
[IEEE PAPER 68-TP-382-COM] 13 p2222 A69-28153

Ionosphere formed waveguide electromagnetic field determined by expression, accounting for radio wave absorption during communications via artificial satellites
13 p2224 A69-28692

Latitudinal cut-off of manmade VLF signals in short path through ionosphere to OGO 2 satellite, noting strong noise following signal cut-off
14 p2434 A69-28958

Deep space data return, discussing system function, design, operational interfaces and interplanetary spacecraft data compression methods
14 p2517 A69-29096

Optimum thermal and nonlinear noise intensities distributions in frequency division multiplex satellite communications systems, relating relay station power, frequency band and channels
14 p2412 A69-29426

Computer program for STV-F9 satellite communication parameters, using ELDO forecasting values as input data
14 p2530 A69-29689

Communications mission of Symphonie project and satellite communications subsystem design
15 p2562 A69-30084

Spacecraft pencil beam parabolic antenna design and installation, discussing directivity factor variation with diameter and orientation accuracy effects
15 p2568 A69-30751

ESRO Aurorae satellite telecommunication system, detailing information nature, PCM telemetry and remote control system standard
15 p2702 A69-31084

ESRO 1/Aurorae satellite telemetry system constraints, discussing encoder, pulsed operation and integrated circuit assembly
15 p2702 A69-31085

Radio waves behavior along paths between satellites and earth, studying preferred frequency bands for spacecraft transmitters used as beacons
15 p2570 A69-31227

Global communication techniques and trends, discussing radio telephone and telegraph, submarine systems, satellite communications, line of sight links, tropospheric scatter, waveguide transmission, etc
16 p2750 A69-31755

Global satellite communication networks design by computer simulation, discussing politicotechnical interface problems, ground stations, atmospheric factors, system optimization, etc
16 p2750 A69-31852

AZUR research satellite HF communications system, describing telemetry transmitter, command receiver and data transmission
16 p2759 A69-31854

German ground station commercial receiving system for satellite broadcast reception
16 p2766 A69-31855

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System
16 p2759 A69-31856

Attenuation statistics due to rain measured on earth-space path at 16 and 30 GHz, using sun as signal source
17 p2920 A69-33398

Satellite system TDM techniques and prototype equipment capable of combining 12 unrelated start-stop and synchronous telegraph channels
17 p2920 A69-33420

Experimental SST terminal for satellite L band communications/surveillance ATC system, establishing terminal requirements for NASA and FAA studies
17 p2932 A69-34118

Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
18 p3169 A69-34855

Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
19 p3273 A69-36267

Legal principles observed for international telecommunication systems establishment by means of artificial satellites regarding states interests and rights
20 p3638 A69-37124

Soviet book on modern systems of wireless telecommunication covering radio communication and tropospheric, ionospheric and satellite wireless systems
20 p3487 A69-37235

Double binary PSK system digital computer simulation for satellite communications, investigating filter and limiting effects on performance in error probability terms
20 p3492 A69-37705

Data acquisition and processing ionograms from Alouette satellites telemetered sweep frequency top-side sounding data
20 p3503 A69-37860

Communications, instrumentation and data handling for manned planetary missions, discussing data rate limitations
21 p3674 A69-39018

Daily communication link geometry between spacecraft in elliptical orbit and landed capsule, establishing spacecraft visibility contours for landing site latitude
[AAS PAPER 68-110] 21 p3805 A69-39223

Discrete filters for optimal processing of down-linked satellite data, considering inverse filter development by Kalman filtering techniques
21 p3677 A69-39462

Residuals from earth based coherent two way radio Doppler data from Lunar Orbiter three orders of magnitude larger than observations from spacecraft
[AAS PAPER 68-131] 21 p3828 A69-39766

Data compression and transmission technique for real time system to monitor manned space missions, noting Apollo telemetry data
[AIAA PAPER 69-970] 22 p3906 A69-40350

Moree earth station equipment and design for satellite communication in INTELSTAT network including antenna, feed and tracking, interconnect system, etc
22 p3900 A69-40679

Antenna design considerations for spacecraft at relativistic velocities, discussing gain function, receiver power density and source apparent frequency and direction
22 p3914 A69-40700

Circular or linear polarization diversity reception for VHF earth-station-satellite communications through turbulent ionosphere, assuming Rayleigh distribution fading
23 p4115 A69-41585

Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
23 p4120 A69-41758

Apollo Extravehicular Communication Telemetry System for monitoring astronaut portable life support system, space suit performance and body functions on lunar surface
23 p4121 A69-41767

EHF earth-satellite link communication channel emphasizing down link, discussing weather models, atmospheric absorption and temperature, channel coherence bandwidth, etc
23 p4129 A69-42506

Deep space communication capability projection, considering data volume and rate, channel frequency, large apertures, data enhancement and system losses
23 p4129 A69-42507

Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system
23 p4129 A69-42508

Short term frequency stability and spectral purity measurements of ATS 1 multiple access communication system
23 p4129 A69-42509

S-band pin-diode switch for high CW power satellite and deep space probe communication, using multiple quarter-wave transformers to stepdown diode impedance
23 p4143 A69-42518

Satellite communication system capacity for segment of geostationary orbit extended to models involving two angular dimensions
23 p4131 A69-42521

Satellite communication system high speed sequential decoder design, discussing parameters, simulation and test results on satellite channels
23 p4131 A69-42523

UHF satellites for mobile, broadcast and low cost services, discussing bandwidth expansion, interference effects, ground linking, UHF partition, satellite antenna sizes, etc
[AAS PAPER 69-333] 24 p4282 A69-42872

PCM satellite communication systems signal power and frequency bandwidth requirements, noting PCM-psk superiority over FDM-FM
24 p4283 A69-43200

SPACECRAFT COMPONENTS
NT LANDING MODULES
NT LUNAR LANDING MODULES
NT LUNAR MODULE
NT MARS EXCURSION MODULE

Space vehicle explosive components, discussing identification, screening and final qualification of explosives and severe environment simulation methods
10 p1749 A69-23008

Two way pyrotechnic high pressure gas valve for D2 satellite, noting resistance to leakage due to nearly monolithic construction
10 p1635 A69-23033

Wing section of high lift/drag test vehicle for 2500 F reentry, describing design, manufacture and testing
12 p2103 A69-26837

Space vehicle subcontracted components reliability attainment, discussing reliability process specifications, motivation, product reliability and feedback programs
15 p2723 A69-31139

Constant temperature heat pipe for thermal control of spacecraft components by direct coupling to external radiator
[AIAA PAPER 69-632] 17 p3070 A69-33262

Agna rocket vehicle production reliability evaluation program, testing specific representative equipment randomly selected from production stores
18 p3146 A69-34510

Lunar Orbiter Parts Program for selection and control of electronic and electrical parts, discussing reliability and flight failures
18 p3207 A69-34520

Spacecraft and components testing methods critical reassessment, discussing cost reduction, vacuum and thermal cycle tests
18 p3118 A69-35082

Handbook of electronic packaging including rigid and flexible printed wiring, soldering and mechanical interconnections, bonding, computer and military applications, etc
22 p3911 A69-40046

Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

Spacecraft single wall cryogenic storage system, discussing cost, pressure vessel and components, thermal and performance characteristics
24 p4393 A69-43045

Carbon fiber reinforced plastic components aerospace applications, discussing honeycomb sandwich satellite structure for investigating lamination methods, shapes, bonding and machining
24 p4336 A69-43209

SPACECRAFT CONFIGURATIONS
NT SATELLITE CONFIGURATIONS

Shock layer gas radiation influence on deep space missile shape, noting evaluation by flow equations
01 p0007 A69-11070

Spacecraft maneuvering by changing spacecraft geometry and utilizing different gravitational forces acting on finitely extended bodies
01 p0158 A69-11318

Multibody dual spin spacecraft spin axis motion with active internal devices, using digital simulation
02 p0332 A69-11739

Entry phase flight data of Missions AS-202, Apollo 4 and 6 compared with wind tunnel aerodynamics data [AIAA PAPER 68-1143] 03 p0519 A69-13556

Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations [AIAA PAPER 68-344] 04 p0683 A69-15507

Configuration, trajectory planning, instrumentation, calorimetry and aerodynamic heating for planetary atmosphere entry
11 p1968 A69-25719

Computer programs determining gaseous properties and aerodynamic characteristics for missiles, reentry vehicles and spacecraft at angles of attack
18 p3107 A69-35068

Drop test method to obtain subsonic terminal velocity and base pressure data for planetary entry probe configurations
19 p3238 A69-35959

Cone-conical-frustum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
21 p3644 A69-39237

Mariner-Mercury 1973 flyby mission using Atlas-Centaur rocket and gravity-assisted maneuvers, discussing encounter geometrics, spacecraft configuration and Venus probe considerations [AAS PAPER 69-288] 24 p4381 A69-42862

SPACECRAFT CONSTRUCTION MATERIALS

Book on material and design problems encountered in construction of high performance missiles, rockets and spacecraft, considering influence of space environment
01 p0084 A69-10021

Mass spectrometer residual gas analyzer (RGA) for identifying and measuring subliminated substances from spacecraft construction materials, noting applications during vacuum testing
02 p0227 A69-11758

Antimicrobial spacecraft materials, discussing feasibility of impregnation or chemical combination of materials with bactericides
05 p0713 A69-15944

Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
05 p0784 A69-16487

Space radiation effect on spacecraft components and materials simulated by proton and fast electron bombardment of silicon, glass and skin materials
06 p0906 A69-17612

Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc
06 p0945 A69-17872

Homogeneous fused silica and quartz reinforced resins as dielectric materials for reentry vehicle antenna windows
07 p1090 A69-18400

Strength increase in steel components of aircraft, missiles and submersibles in relation to chronological application sequence, discussing ultimate strength [ASM PAPER G68-9.4] 07 p1169 A69-19675

Composite materials for aerospace applications, discussing high modulus filaments, structural and non-structural design considerations, nondestructive testing techniques, etc
12 p2111 A69-25852

Materials rating method in pressure vessel applications, considering impact on design of minimum cost space launch vehicle
12 p2175 A69-26844

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc
13 p2362 A69-27920

Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments [AIAA PAPER 69-642] 17 p2991 A69-33273

Minimum cost design /MCD/ of space launch vehicle, discussing material and process selection based on fracture-safe conditions
19 p3433 A69-35587

Structural aerospace materials development with emphasis on Be and Ti alloys, discussing material combinations and composites
19 p3345 A69-36319

High temperature materials for aerospace and spacecraft applications, considering carbon/carbon composites, oxides, carbides, fibers and ablative systems
19 p3346 A69-36320

Space age metals supply and demand relationships, discussing system engineering criteria for maximum efficiency
19 p3346 A69-36635

Oxidation resistant coating methods and systems for Cb base materials protection for aerospace vehicles and aircraft propulsion systems structures
21 p3730 A69-38672

Metallic and nonmetallic materials for space applications with launch and orbit condition requirements, examining finishes and lubricants
24 p4332 A69-43207

Hazard rating for flammability of aerospace materials in air and oxygen environments applied to J-2 rocket engine insulation
24 p4336 A69-43423

SPACECRAFT CONTAMINATION

Planetary quarantine and biological search strategy, discussing Voyager-Mars mission configuration, sterilization, back contamination and decisions
01 p0021 A69-11090

Flight vehicle cabins ventilation for undesirable gas contaminants removal, discussing contaminant concentration calculation and automatic control
02 p0200 A69-11512

Nonexistence of Biota-Cloud recontamination hazard for planetary lander proved by analysis of interactions between small particles and physical fields around vehicle
02 p1201 A69-11771

Biological monitoring during assembly of Technological Feasibility Spacecraft (Mars lander) to evaluate thermal control techniques and microbiological burden prior to sterilization
02 p1201 A69-11774

Standards of sterility for prevention of introduction of terrestrial microorganisms onto other planets during space missions, noting contamination probability
05 p0712 A69-15936

Modeling requirements and methods for monitoring microbial contamination, discussing vacuum probe sampler to recover microorganisms from large surface areas
05 p0713 A69-15948

Microbial contaminants on space hardware, discussing detection and enumeration techniques
05 p0714 A69-15954

Spacecraft debris atmosphere effects on observations, discussing contamination of exposed optical surfaces and light scattering by ice particles from cabin water vapor leakage
09 p1487 A69-21654

Mars planetary landing program schedule, COSPAR quarantine policy and biological losses from failures to collect data and from contamination
11 p1828 A69-25459

Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
11 p1828 A69-25460

Outgassing behavior of polymers in spacecraft by thermal-vacuum weight-loss and contamination tests
13 p2286 A69-28089

Planetary quarantine constraints by NASA insuring low contamination probability from extraterrestrial biological exploration, giving contamination probability equations and sterilization procedures
16 p2746 A69-32435

Space contamination by spacecraft-borne terrestrial microorganisms, testing vacuum effect on water desorption rate using mass spectrometry on various cells
20 p3475 A69-37615

Space contamination due to manned vehicles and debris atmosphere effects on dim light source observations
21 p3793 A69-38341

Vacuum exposure nephelometer system for materials contamination screening in space applications
24 p4297 A69-42931

SPACECRAFT CONTROL
NT SATELLITE ATTITUDE CONTROL
NT SATELLITE CONTROL

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence
01 p0161 A69-10205

Deceleration control system for aerobraking and skipout to orbit at Mars [AIAA PAPER 68-1146] 03 p0520 A69-13564

Minimum fuel attitude control of spacecraft by Pontryagin principle and extended steepest descent method
03 p0522 A69-14100

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers [AIAA PAPER 67-644] 04 p0586 A69-15502

Manual and automatic spacecraft rendezvous and docking, discussing docking of Cosmos 186 and 188 in 1967 [UN PAPER 68-95764] 06 p1013 A69-17057

Astrodynamics, guidance and control - Conference, Belgrade, September 1967, Volume 1 06 p1004 A69-17560

Three axis attitude servomechanism design to adjust attitude and angular velocity of spacecraft 06 p0955 A69-17589

Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink [AIAA PAPER 69-95] 06 p1038 A69-18126

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads [AIAA PAPER 69-72] 06 p0956 A69-18136

Spacecraft control system and flexible structures interactions, discussing transient phenomena, limit-cycle oscillations and instabilities [AIAA PAPER 69-116] 06 p1019 A69-18187

Scaled models for spacecraft thermal control, considering radiation-conduction-convection heat transfer [SAE PAPER 690196] 07 p1116 A69-18304

Computer simulations, comparing self adaptive/neuron/control of spacecraft energy allocation subsystem to programmed control 07 p1058 A69-18389

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads [AIAA PAPER 69-72] 07 p1177 A69-19179

Human operator manual control of spacecraft under accelerations up to 18 g, noting performance and efficiency of males 08 p1265 A69-19936

Cybernetic theory application to automatic spacecraft, discussing control problems in Mariner 4 and Surveyor 7 missions and attitude stabilization system 08 p1409 A69-20583

Space guidance and control system components, noting control moment gyro, actuator, brushless DC motor, electrically supported gyro and laser gyro 09 p1500 A69-22434

Luna 9 automatic station flight control complex, detailing communication, orientation and stabilization systems operation after separation from acceleration module 10 p1792 A69-24197

Flight control system for automatic interplanetary stations [AIS], comparing Venera series orientation and correction system to Mariner systems 10 p1792 A69-24198

Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment 11 p1967 A69-25500

Reentry and planetary entry physics and technology, II, Advanced concepts, experiments, guidance-control and technology 11 p1967 A69-25718

Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft 11 p1914 A69-25724

Space vehicle angular velocities reduced to zero through linear and nonlinear optimal feedback control systems 12 p2054 A69-26516

Spacecraft longitudinal control during reentry of lunar orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance 13 p2355 A69-27681

Spacecraft range control algorithm during reentry at parabolic velocity into atmosphere with varying parameter distributions 13 p2355 A69-27682

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements 13 p2355 A69-27683

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust 13 p2356 A69-27686

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence 14 p2530 A69-28741

Earth sensor for spin stabilized spacecraft to maintain specific orientation with earth, discussing use of blue and red filters 15 p2609 A69-30593

ESRO 1 satellite centralized control system, discussing housekeeping system responsible for task execution in connection with power supply 15 p2702 A69-31083

Control methods for spacecraft reentry and landing, discussing adaptive systems, descent trajectory parameter prediction and angle of attack 16 p2867 A69-31742

Reentry flight test vehicle development for West German space program, using hypersonic model to determine controllability and aerodynamic stability 16 p2867 A69-31934

Low thrust reaction control for space missions, summarizing range and specific impulse characteristics for solid and hybrid systems [AIAA PAPER 69-433] 16 p2834 A69-32745

Free gas formation in propellant systems and effects on attitude control systems [AIAA PAPER 69-434] 16 p2870 A69-32765

Satellites and space vehicles attitude control mathematical model accounting for nonrigidity, sloshing and energy dissipation in vehicle interior 17 p3048 A69-33239

Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases 19 p3369 A69-35801

Missile and spacecraft guidance navigation and control, discussing fluidics, self adaptive and digital control and Kalman filtering 19 p3370 A69-36316

Cassiopee device for spacecraft or sounding rocket attitude control, describing gyroscopic control unit, sensor element and jet control devices [ONERA-TP-707] 19 p3432 A69-36686

Soviet book on radio control of rocket missiles and space vehicles covering control principles, systems analysis and synthesis, vehicle characteristics, etc 20 p3574 A69-37232

Spacecraft discrete automatic control system computerized simulation, discussing logic elements, applications to design, etc 20 p3502 A69-37393

Density field surrounding leaking circular hatch of spacecraft treated as free molecular flow from annulus, superposing far field of effusive orifice flow 21 p3695 A69-39035

Spacecraft control systems with computer command redundant jets for linear and angular pulses, relating configuration design to level-of-redundancy and task dimension [AIAA PAPER 69-845] 21 p3822 A69-39375

Controllers design for reaction jet controlled aerospace vehicles, studying second order pitch-plane representation with actuator modeled as pure delay [AIAA PAPER 69-854] 21 p3822 A69-39382

Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation [AIAA PAPER 69-876] 21 p3824 A69-39402

Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution [AIAA PAPER 69-879] 21 p3763 A69-39405

Apollo Guidance, Navigation and Control system prelaunch checkup, flight experience and error analysis [AIAA PAPER 69-891] 21 p3824 A69-39416

Mathematical model of astronaut motion and spacecraft angular control during tethered reentry, discussing conditions preventing spinning and collisions 21 p3667 A69-39630

Guidance and control in space - Conference, Warsaw, June 1969 21 p3825 A69-39635

Spacecraft natural vibrations analyzed using point transforms with allowance for control systems imperfections 21 p3826 A69-39637

Guidance control systems for moving plants pursuing targets, basing design on target characteristics and plant phase coordinates 21 p3687 A69-39643

Guidance and control in space - Conference, Warsaw, June 1969 21 p3766 A69-39644

Spacecraft trajectory control algorithm for hypersonic reentry, describing onboard equipment role and simulation results 21 p3767 A69-39649

Stochastic motion control problems formulations in rocket dynamics 21 p3767 A69-39650

Space vehicles optimal pulsed control systems statistical synthesis, considering structural constraints on operation, memory capacity and algorithm coefficients 21 p3767 A69-39651

Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control [AIAA PAPER 68-848] 21 p3828 A69-39760

Deceleration control system for aerobraking and skipout to orbit at Mars [AIAA PAPER 68-1146] 21 p3828 A69-39761

Optimal sliding regimes for controlling dynamic systems, proposing control parameters system extension 21 p3768 A69-39826

General control theory for spacecraft motions, deriving dynamic equations of motion about center of mass for holonomic and nonholonomic control programs 21 p3829 A69-39829

Adaptive control system for aerospace vehicles, describing model reference network for control parameter determination 21 p3688 A69-39857

Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm 22 p3892 A69-40281

Nonlinear adaptive reaction jet attitude control for long life space vehicles, providing optimal performance over bias acceleration disturbances [AIAA PAPER 69-945] 22 p4036 A69-40328

Computer system functional requirements for autonomous Martian surface roving vehicle, emphasizing vehicle motion control system [AIAA PAPER 69-980] 22 p3907 A69-40360

Booster digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device [AIAA PAPER 69-988] 22 p3978 A69-40368

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references [AIAA PAPER 69-1029] 22 p3924 A69-40398

Newton-Raphson function space algorithm for optimizing control systems with discontinuities and terminal constraints, discussing spacecraft examples 22 p3918 A69-41009

High temperature pneumatic systems for missile and space vehicle control, describing pressure regulators, flow controls, thrusters and analog valves 22 p3870 A69-41240

Manual method for navigating and guiding spacecraft to rendezvous with orbiting target, using hand-held unpowered optical instruments and manual computations [AIAA PAPER 68-859] 24 p4348 A69-43243

Attitude control system with rate of change limiter to minimize launch vehicle drift during first stage ascent through atmosphere 24 p4394 A69-43277

Launch vehicle control system synthesis based on mode control theory state variable formulations 24 p4394 A69-43278

Parallel wire array fluidic sun sensor for solar pointing fluidic attitude control, discussing design and breadboard test 24 p4348 A69-43297

SPACECRAFT DESIGN

NT SATELLITE DESIGN

Book on material and design problems encountered in construction of high performance missiles, rockets and spacecraft, considering influence of space environment 01 p0084 A69-10021

Electronic packaging techniques for long life spacecraft, discussing effects of mechanical and electrical stress, temperature cycling, vacuum, radiation and contamination 01 p0038 A69-10145

Space radiators for heat rejection from nuclear powered spacecraft doubling as primary structures to save weight, discussing conical or cylindrical configurations 01 p0160 A69-10151

Paraglider as recoverable sounding rocket dropped from helicopter, describing system design and flight tests
[UN PAPER 68-95445] 01 p0161 A69-10465

Surface dose rate and depth dose distribution for materials used for space vehicle and biological tissue protection from cosmic and internal radiation
[UN PAPER 68-95260] 01 p0144 A69-10477

Systematic approach to standard launch vehicle based on governmental expenditure minimization while attaining mission goals
01 p0162 A69-11096

Space station design requirements, Apollo applications program and various experimental programs
01 p0163 A69-11395

Meteoroid penetration detector development program for spacecraft construction, discussing design, materials and environmental tests
02 p0338 A69-11749

French /LRBA, ONERA and Sud-Aviation/ sounding rocket design emphasizing meteorological rockets and standard equipment
02 p0333 A69-11916

Hypervelocity impact effect on structural honeycomb spacecraft wall configurations, stressing design and wall thickness parameters
[AIAA PAPER 68-314] 02 p0345 A69-12389

Solar cell generator design problems for solar probes, discussing increased operational temperature
02 p0197 A69-12665

Explorer 33 and 35 satellites reliability achievement by design via AIMP program
03 p0519 A69-13232

Aeroshell structural development for Mars flyby and entry landing mission compatible with Atlas/Centaur launch vehicle
[AIAA PAPER 68-1159] 03 p0521 A69-13667

Entry corridor thermal entry limits for Apollo spacecraft defined for design of thermal protection system
[AIAA PAPER 68-1144] 03 p0521 A69-13673

Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations
[AIAA PAPER 68-344] 04 p0683 A69-15507

Manned spacecraft systems design optimization for extended space missions replacement modules
05 p0830 A69-16380

Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis
05 p0827 A69-16476

Dynamics of carrier rockets and space vehicles having complex three dimensional thin walled constructions with cavities containing liquids
[UN PAPER 68-95622] 06 p1013 A69-17051

Spacecraft systems, education - Conference, Belgrade, September 1967
06 p1015 A69-17596

Engineering designs and hardware required for low risk flight of long duration manned space stations
06 p1007 A69-17601

Interplanetary Pioneer spacecraft development and systems engineering aspects
06 p1017 A69-17605

Deployable appendages of OGO attitude controlled spacecraft design
06 p1017 A69-17606

Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering trade-off studies
[AIAA PAPER 69-54] 06 p1010 A69-18042

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements
[AIAA PAPER 69-125] 06 p1018 A69-18076

Thermal considerations of spacecraft external panel effects on specular louvers systems, discussing heat dissipation and computer program
[AIAA PAPER 69-26] 06 p1037 A69-18097

Planetary landing vehicle design optimization, considering effects of trajectory, guidance and environmental parameters under uncertainty
[AIAA PAPER 69-128] 06 p1018 A69-18107

Manned orbital space stations design, purposes and applications, balancing costs against benefits
06 p1019 A69-18237

Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions
[SAE PAPER 690202] 07 p1239 A69-18305

Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner
07 p1227 A69-18334

Electric propulsion missions analysis for spacecraft design engineer, discussing out-of- ecliptic and Jupiter flyby probes
09 p1584 A69-21203

Pre-design and mission analysis software capability for sizing, design, fabrication and developmental testing of flight hardware for electrically propelled inter-planetary spacecraft
09 p1585 A69-21210

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] 09 p1565 A69-21252

Single stage rocket vehicle design for rapid global air transportation noting size, range and economics
09 p1433 A69-21303

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs
[AIAA PAPER 69-252] 09 p1568 A69-21729

Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
10 p1811 A69-22863

Space stage separation qualification of ONERA rocket vehicles based on angular perturbation measurements during variable roll speeds
10 p1669 A69-23005

Spacecraft electronic components design, environmental and reliability criteria including weight and power
11 p1843 A69-24340

Data relay satellite concept, discussing orbits, communications between widely separated earth stations, and satellite tracking, telemetry and commanding
11 p1839 A69-25295

Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment
11 p1967 A69-25500

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques
12 p2148 A69-26834

Esro 1 satellite program management, discussing scientific mission, structure, tracking system and history
13 p2355 A69-27360

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc
13 p2362 A69-27920

Sensitivity function in time domain defined for control system design
13 p2238 A69-27936

Electric relays requirements for spacecraft with magnetic field constraints
13 p2231 A69-28046

Spacecraft surfaces bidirectional reflectance flux distribution applications to space thermal control computations
[AIAA PAPER 68-26] 13 p2222 A69-28216

Landing shock attenuation system for Surveyor spacecraft, describing hydraulic cylinder and piston arrangement for damping, computerized shock absorber design and landing process simulation
[ASME PAPER 69-DE-54] 14 p2530 A69-28848

Soviet book on partially liquid filled solid body dynamics from viewpoint of space and aircraft applications
14 p2530 A69-29815

Communications mission of Symphonic project and satellite communications subsystem design
15 p2562 A69-30084

Europa 1 first stage attitude control system adaptation to Europa 2 requirements, discussing design modifications and improvements and inertial guidance system introduction
16 p2866 A69-31726

Fluid flow problems during orbital refueling vehicle maneuvers and system operations in propellant transfer, including disturbances, liquid-vapor interface instability, vapor ingestion, etc
[AIAA PAPER 69-567] 16 p2868 A69-32721

Passive attitude stabilization of interplanetary probe, using conically shaped sails elastically connected to payload
17 p3047 A69-33225

Scale modeling of multilayer insulated spacecraft for thermal design, considering solar probe and two meter telescope models
[AIAA PAPER 69-613] 17 p3049 A69-33267

Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing
[AIAA PAPER 69-612] 17 p3049 A69-33296

Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations
17 p3050 A69-33797

Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds
18 p3193 A69-34362

Collection of papers on thermal design principles of spacecraft and entry bodies
18 p3227 A69-34372

TD1/TD2 satellites power supply subsystem, stressing high power requirements and significant design features regarding battery and solar array controls
18 p3093 A69-34791

Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] 18 p3208 A69-34864

Computer aided design analysis program to provide weight and sizing data for entry spacecraft
[SAWE PAPER 797] 18 p3208 A69-34903

Minimum cost design (MCD) of space launch vehicle, discussing material and process selection based on fracture-safe conditions
19 p3433 A69-35587

Soviet space stations design based on orbital docking techniques for unrestricted mass size and number of modules, describing wheel shaped station
19 p3431 A69-36465

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
21 p3799 A69-38629

Spacecraft control systems with computer command redundant jets for linear and angular pulses, relating configuration design to level-of- redundancy and task dimension
[AIAA PAPER 69-845] 21 p3822 A69-39375

Evaluation technique for astronautics subsystems in automated spacecraft designed for interplanetary missions, considering operation times, navigation updating and midcourse correction
[AIAA PAPER 69-882] 21 p3764 A69-39408

Cost reduction steps in reusable launch vehicle design, discussing aircraft design and development experience application
21 p3826 A69-39689

Vehicle designs and cost analyses for launch vehicle selection to minimize costs of 40,000- 150,000 pound payload placement into orbit
21 p3827 A69-39694

Low cost efficient shuttle system for personnel and cargo transport to earth orbit for NASA and DOD needs
21 p3827 A69-39695

Technology, design, development, qualification and operational elements noting effects on performance, economics and scheduling of nuclear vehicle
[AIAA PAPER 68-591] 21 p3769 A69-39752

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements
[AIAA PAPER 69-125] 21 p3828 A69-39770

Modular configuration of recoverable scientific MAP /Modular Auroral Probe/ payloads aboard Nike-Apache rockets, discussing payload design concepts
23 p4223 A69-41763

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design
23 p4108 A69-41833

Nuclear reactor/thermoelectric power system design for manned orbiting space station, discussing station integration and operation
23 p4187 A69-42256

Manned space flight history and spacecraft development
[AAS PAPER 69-501] 24 p4380 A69-42852

Spacecraft probes design for mapping meteoroid environment and penetration hazard through asteroid belt
[AAS PAPER 69-321] 24 p4392 A69-42867

Asteroid exploration by solar photovoltaic powered ion propelled probe, discussing spacecraft design, mission and 1975 Mariner utilization
[AAS PAPER 69-322] 24 p4381 A69-42868

- OSO spacecraft thermal design modified to operate University of Minnesota zodiacal light monitor experiment
[AAS PAPER 69-173] 24 p4393 A69-42873
- Adaptive control function technique to design lateral stability augmentation system for hypothetical manned, lifting body entry vehicle
24 p4394 A69-43301

SPACECRAFT DOCKING

- Manual and automatic spacecraft rendezvous and docking, discussing docking of Cosmos 186 and 188 in 1967
[UN PAPER 68-95764] 06 p1013 A69-17057
- Space vehicle docking dynamics and matrix equations of motion amenable to numerical solution on digital computer, using Hamilton principle and Lagrange multipliers
11 p1967 A69-25501
- Space docking, personnel placement on space stations, rescue stations, etc
18 p3196 A69-34630
- Soviet space stations design based on orbital docking techniques for unrestricted mass size and number of modules, describing wheel shaped station
19 p3431 A69-36465
- Rigid and flexible coupling devices for spacecraft rendezvous, describing general operating conditions
22 p4036 A69-40008

SPACECRAFT ELECTRONIC EQUIPMENT

- Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
01 p0080 A69-10582
- Self excitation conditions and output characteristics of tunnel diode DC to AC converters for spacecraft, discussing relaxation-oscillator and push-pull circuit converter types
01 p0046 A69-10755
- Satellite traveling wave tube for X band duplicating C and S band performance
03 p0405 A69-13678
- High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance
04 p0551 A69-15299
- Electronic circuits power supply onboard space vehicle, discussing chemical, solar and nuclear energy sources
07 p1225 A69-18251
- Electronic tubes utilization in space flight, summarizing characteristics and satellite applications
07 p1093 A69-18421
- Roll diffusion bonding technique for permitting complex design of coldplates and radiators of spacecraft electronic equipment
09 p1504 A69-22066
- Spacecraft electronics - Conference, Chicago, December 1968
09 p1465 A69-22433
- Spacecraft electronic components design, environmental and reliability criteria including weight and power
11 p1843 A69-24340
- Surveyor electronic engineering design for lunar environment, discussing vacuum and temperature effects
11 p1958 A69-24633
- High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
11 p1847 A69-24747
- Electrical power requirements in spacecraft, discussing communication, engine and control systems, data processing, electrochemical and nuclear sources
12 p2015 A69-25863
- Electric relays requirements for spacecraft with magnetic field constraints
13 p2231 A69-28046
- Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters
14 p2447 A69-29403
- Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
15 p2610 A69-30752
- Spacecraft electronic component reliability policy based on preferential lists, selection programs and component management
15 p2624 A69-30818
- Satellite circuit assembly reliability achievement by high reliability components, redundancy and optimal utilization
15 p2624 A69-30819
- Integrated circuit failure analysis in military and space applications utilizing type-test programs
15 p2624 A69-30820
- Space electronic component reliability, considering suppliers and laboratory-workshop partnership
15 p2624 A69-30822
- Short term plan of European electronic component selection for ESRO satellite without established guaranteed failure rate
15 p2624 A69-30823
- Large scale integration /LSI/ and medium scale integration /MSI/ circuits evolution and requirements, noting onboard computers and space applications
15 p2625 A69-30825
- Large scale integrated MOS devices tests for space applications, establishing quality specifications
15 p2580 A69-31131
- High reliability space system electronic parts control program to assure success of unmanned space missions
16 p2793 A69-31714
- Soviet book on reliability of semiconductor radio devices of flight vehicles covering failures through production errors, power source instability, environment induced changes, etc
18 p3108 A69-34350
- Portable electric lamp for work and photographic purposes in manned spacecraft, describing circuitry, construction and applications
[IES PREPRINT 30] 18 p3138 A69-35173
- Magnetic core material and process technologies for space power electronic applications noting pulse transformers, nonlinear reactors and tapes
19 p3319 A69-35543
- Communication satellites equipment and techniques, considering global network, satellite design, millimeter wave systems, etc
19 p3275 A69-36314
- Spacecraft onboard processor for digital filtration and data compression, discussing prototype design, construction, sample memory, delay memory, arithmetic unit and programmer
20 p3500 A69-37383
- Onboard spacecraft computer design, programming and operation based on dual bussing system
20 p3500 A69-37384
- SDP-3-A general purpose stored program computer designed for small scientific spacecraft onboard data system, noting computerized simulation
20 p3500 A69-37385
- Satellite onboard computers automatic reconfiguration and self repair
20 p3503 A69-37399
- Spacecraft integration electronics modular packaging, discussing slice housing concept and design criteria including environmental resistance, reliability, performance, etc
22 p3910 A69-39949
- Flexible circuitry for reliable spaceborne data processing equipment electronic packaging
22 p3903 A69-39951
- Encapsulation effects on piece parts in high density package, considering unexpected part failures elimination in Lunar Module Signal Conditioning Electronic Assembly
22 p3910 A69-39953
- Spacecraft electronic components operating junction temperature control, considering role of thermal resistance in controlling radiative and conductive transfer
[AIAA PAPER 69-1015] 22 p3922 A69-40387
- Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components
23 p4133 A69-41739
- L and S band transmitters for space applications, discussing power and frequency stability, low intermodulation, inputs isolation, efficiency, size and weight
23 p4137 A69-41740
- Quality and reliability of electronic spacecraft devices and structural components produced in limited quantity, discussing documentation of production and testing
23 p4171 A69-42474

SPACECRAFT ENVIRONMENTS

- Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space
02 p0352 A69-12211

- Dog adaptation to 60 or 90 mm Hg carbon dioxide in 260 mm Hg total pressure environment, noting arterial pH and bicarbonate level
03 p0375 A69-14071

- Displacement pumps and fluids for extreme environments, discussing fluid types and operational parameters such as speed, pressure, temperature, power, displacement and size
06 p0931 A69-17188

- Statistical correlation between cardiovascular activity and respiration dynamics of cosmonauts during orbital flight, discussing heart beat and respiration rates
07 p1061 A69-18584

- Luminous particles in space observed by Vostok Mercury and Voskhod astronauts, discussing distribution, trajectories and terrestrial origin
07 p1222 A69-19617

- Physiological effects of breathing cool dehumidified air in hot humid environment, tabulating tolerance time, heart rate, temperature changes and sweat loss
09 p1446 A69-22543

- Electroexplosive devices protection by nonconducting composition against premature ignition by RFI in spacecraft environment, noting Apollo Standard Initiators
10 p1751 A69-23018

- Spacecraft electronic components design, environmental and reliability criteria including weight and power
11 p1843 A69-24340

- Computer program for electron and proton fluxes impinging on spacecraft, performing computation for Van Allen belts and solar flares
11 p1949 A69-24863

- Space mission medical heat problems covering thermal characteristics and heat control, protection and resistance of space vehicle and astronaut adaptation
12 p2023 A69-26493

- Self thermostatic phase-change coatings for active and passive spacecraft temperature control, discussing temperature dependent changeability in solar absorptance
14 p2530 A69-29434

- Continuous-channel electron multipliers degradation in spacecraft environment simulation laboratory equipment
14 p2449 A69-29565

- Weightlessness problems, discussing artificial gravitation on spacecraft and astronaut experiences
16 p2746 A69-31930

- Permanent magnets optimal design and properties for attitude control of German research satellite Azur, considering environmental influences
16 p2868 A69-31936

- UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] 17 p2992 A69-33288

- Thermal design of landed vehicle on Mars surface, discussing instrument package covering inside surface coating and battery insulation
[AIAA PAPER 69-611] 17 p3049 A69-33295

- Apollo Lunar Module Environmental Control System /LM/ECS/ steady state performance simulation techniques, discussing vacuum chamber data of LTA-8/LM-3
[AIAA PAPER 69-616] 17 p2903 A69-33307

- Medical and biological laboratory ground experiments role in development of life support systems and suitable environments for prolonged manned space flights
18 p3098 A69-35165

- Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
19 p3253 A69-35702

- Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
19 p3456 A69-36460

- Infectious diseases in space flight, considering environment role in infection transmission, occurrence and severity
20 p3479 A69-37973

- Ceramic-sealed Ni-Cd secondary batteries space environmental behavior testing to determine heat dissipation during spaceborne operation
22 p3869 A69-40591

- Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
23 p4087 A69-41803

Space cabin environment simulation effects on resistance to infection caused by pneumonia and influenza virus in rats
23 p4108 A69-41832

SPACECRAFT GUIDANCE
NT SATELLITE GUIDANCE

Multiengine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation
02 p0277 A69-11740

Proportional navigation guidance systems for interceptor missiles optimized by adding biased term to guidance equation
02 p0278 A69-11973

Manual optimal guidance schemes for space vehicles to minimize computational and display requirements for pilot task loading
02 p0279 A69-12365

Comparison of trajectories in optimum linear perturbation guidance
02 p0279 A69-12546

Nonorthogonal multisensor strapdown inertial reference unit providing redundant capabilities and optimal performance
03 p0429 A69-13211

Apollo guidance, navigation, stabilization and control subsystems, detailing inertial, optical and computer units for data processing and collecting
04 p0665 A69-14881

Astrodynamics, guidance and control - Conference, Belgrade, September 1967, Volume 1
06 p1004 A69-17560

Optimization procedure developed and applied to minimum fuel midcourse guidance of spacecraft, discussing optimal closed loop control of linear stochastic systems
06 p0955 A69-17576

Ground based guidance systems for supplementing onboard guidance of manned space vehicles
06 p0955 A69-17580

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional
[AIAA PAPER 69-76] 06 p0956 A69-18081

Planetary landing vehicle design optimization, considering effects of trajectory, guidance and environmental parameters under uncertainty
[AIAA PAPER 69-128] 06 p1018 A69-18107

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads
[AIAA PAPER 69-72] 06 p0956 A69-18136

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for midcourse impulses
[AIAA PAPER 69-74] 06 p0956 A69-18183

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads
[AIAA PAPER 69-72] 07 p1177 A69-19179

Sight reduction tables for orbital plane determination checked out by sextant sightings onboard Gemini 7
07 p1177 A69-19206

Fluidic devices application to attitude and guidance control of satellites, rockets and space probes
07 p1230 A69-19292

Manual onboard computation procedures and devices for determination of maneuvers for orbital navigation and guidance
08 p1348 A69-21184

Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
09 p1595 A69-21937

Space guidance and control system components, noting control moment gyro, actuator, brushless DC motor, electrically supported gyro and laser gyro
09 p1500 A69-22434

Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft
11 p1914 A69-25724

Fluidics for satellite and rocket attitude control and guidance, discussing computing block function and components, system reliability and resistance to aging, etc
17 p3049 A69-33243

Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
17 p2919 A69-33371

Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
19 p3368 A69-35792

Apollo navigation, guidance and control systems in command module and lunar module, discussing inertial, optical and computer hardware operation
19 p3369 A69-35799

Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases
19 p3369 A69-35801

Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828] 19 p3370 A69-35953

Missile and spacecraft guidance navigation and control, discussing fluidics, self adaptive and digital control and Kalman filtering
19 p3370 A69-36316

Adaptive control for Mars entry based on sensitivity analysis
[AIAA PAPER 68-8355] 20 p3573 A69-37193

Spacecraft guidance analysis of multiple outer planet mission utilizing gravity assist swingbys to achieve planetary flybys with single spacecraft
[AAS PAPER 68-109] 21 p3761 A69-39205

GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] 21 p3763 A69-39396

Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] 21 p3824 A69-39402

Neighboring optimum feedback guidance to motivate min-distance lookup parameter determined by minimizing metric function of perturbed state and reference trajectory
[AIAA PAPER 69-888] 21 p3765 A69-39414

Apollo Guidance, Navigation and Control system prelaunch checkup, flight experience and error analysis
[AIAA PAPER 69-891] 21 p3824 A69-39416

Guidance and control in space - Conference, Warsaw, June 1969
21 p3825 A69-39635

Guidance control systems for moving plants pursuing targets, basing design on target characteristics and plant phase coordinates
21 p3687 A69-39643

Guidance and control in space - Conference, Warsaw, June 1969
21 p3766 A69-39644

Long range space flight trajectory correction problem, obtaining algorithm for determining minimum number of corrections
21 p3818 A69-39822

ELDO radio guidance station at Gove, discussing propulsion stage tracking and instruction transmitted to vehicle
22 p3919 A69-39920

Variable time of arrival (VTA) guidance generalized, developing computational algorithms to supplement linear guidance method
22 p3979 A69-41186

Low thrust guidance for multirevolution trajectory required for earth parking orbit transfer to parabolic orbit insertion, noting advantages over high thrust scheme
[AAS PAPER 69-403] 24 p4379 A69-42832

Space and missile guidance performance analysis through automatic generation of mission performance sensitivity with respect to error sources from Monte Carlo simulation
[AAS PAPER 69-404] 24 p4347 A69-42836

Optimal transfer between hyperbolic asymptotes about finite size planet, discussing twelve types of analytical solutions in terms of arrival, departure and escape velocities
[AAS PAPER 69-242] 24 p4380 A69-42856

Manual method for navigating and guiding spacecraft to rendezvous with orbiting target, using hand-held unpowered optical instruments and manual computations
[AIAA PAPER 68-859] 24 p4348 A69-43243

Vector matrix second order sensitivity equation application to Mars entry guidance, performing numerical simulation of second order sensitivity guidance and tabulating results
24 p4388 A69-43690

SPACECRAFT INSTRUMENTS

NT SATELLITE INSTRUMENTS

Spacecraft attitude ion sensor using charged thermal ions of earth atmosphere as reference, stressing reliability, economy and response
01 p0079 A69-10293

Vector helium magnetometer for Mariner 4 /Mars 1964/ and Mariner 5 /Venus 1967/, discussing efforts to reduce spacecraft stray fields
[IEEE PAPER 10.1] 01 p0081 A69-10714

Stable fluxgate magnetometer sensor for exploration of space magnetic fields, discussing equipment specifications and performance tests
[IEEE PAPER 10.2] 01 p0081 A69-10715

Scientists involvement in planetary spacecraft missions, considering organization for particular instruments and more complex payloads
[AAS PAPER 68-192] 02 p0311 A69-11473

Triangulated pantograph structure for deploying antennas, special equipment and instruments from spacecraft, noting structural design and strength characteristics
02 p0252 A69-11752

Aerospace sensor systems, discussing adaptive multimode sensors and multispectral sensing, electronic recognition of image components, laser radar and Raman scattering technique
03 p0431 A69-13851

Electrostatic potential generated by rockets on space vehicles, noting source of electric current in exhaust plumes and effect on instrumentation
03 p0522 A69-13903

Instrument technology for solar optical astronomy from space, noting rocket and satellite vehicles, far UV detectors, filters, photographic film fogging, etc
05 p0762 A69-15838

Sterilization techniques for instruments and materials as applied to space research - COSPAR Conference, London, July 1967
05 p0711 A69-15934

Multichannel radiometers calibration and testing for spacecraft and solar simulation applications, noting exposure to sun onboard X-15 aircraft at high altitudes
06 p0926 A69-17620

Thermally induced vibration and flutter of flexible spacecraft boom, discussing stability by considering boom as cantilever beam
[AIAA PAPER 69-21] 06 p0869 A69-18144

Diode pump type circuit without diodes in signal path providing accurate transfer function analysis considered for spacecraft use
[IEEE PAPER 3A-3] 07 p1134 A69-19191

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler
[JPL-TR-32-1358] 08 p1312 A69-19850

Plasma generator for maintenance of space vehicle electrical neutrality during ejection of high velocity electron pulses
[AIAA PAPER 69-273] 09 p1567 A69-21263

Space systems and radioastronomy - Conference, Geneva, September-October 1968, Part 2
09 p1450 A69-21285

Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287

Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance /ADAM/ concept
[AIAA PAPER 69-307] 09 p1478 A69-22382

Fundamentals of aerospace instrumentation - ISA Conference, Boston, June 1968, Volume 1
10 p1690 A69-23224

Sonic anemometer for wind velocity through pulse communication transducers noting applications to aerospace vehicle design
10 p1692 A69-23255

Low thrust propulsion devices high response impulse testing, describing limitations imposed by solenoid valve time response
10 p1672 A69-23278

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques
11 p1835 A69-24695

Low light level slow scan Owl TV camera system with secondary electron conduction camera tube for satellite-borne observation of auroral light emission
12 p2079 A69-25904

Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc
13 p2261 A69-27946

Photogrammetric calibration of Surveyor 7 stereo mirror based on vector analysis
[JPL-TR-32-1390] 13 p2263 A69-28199

One inch ceramic vidicon with slow scan photoconductor, electrostatic focusing and magnetic deflection to withstand sterilization and environmental testing for space applications 13 p2234 A69-28262

Structure, equipment and weight breakdown of Black Arrow X3 spacecraft 13 p2357 A69-28478

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose 14 p2446 A69-29047

Spacecraft radar altimetry with application to geodesy, discussing orbital and tracking errors 15 p2609 A69-30460

Spacecraft radar altimetry applied to study of sea surface slopes, tides, tsunamis, storm surges and submarine geology 15 p2609 A69-30461

Fluorine nuclei in primary cosmic radiation identified by counter telescope measurements on Pioneer 8 spacecraft 15 p2676 A69-30886

Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission 15 p2613 A69-31269

Earth albedo instrument on OSO 3 spacecraft to measure solar reflectance of earth at various wavelengths 15 p2614 A69-31279

Electron trap behavior on charged spacecraft, obtaining expressions for current to aperture and internal retarding electrodes for all apertures and spacecraft potentials 16 p2849 A69-31976

Surface type airborne electrostatic probes in ambipolar diffusion flux, measuring ion saturation current, discussing electrode contamination and temperature and ablation tests [AIAA PAPER 69-700] 17 p2974 A69-33443

Electrostatic control for portable clean rooms, describing fabrication, assembly and checkout problems with Instrument Unit /IU/ control center for Saturn launch vehicles 19 p3428 A69-35550

Mars autonomous entry navigation, discussing flight path angle control with onboard sensors using realistic sun, Canopus and planet line of sight tracker accuracies 19 p3368 A69-35790

Planetary navigation using spacecraft measurements and Doppler data from earth-based radio tracking, determining accuracy for earth-Mars trajectory 19 p3368 A69-35791

Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments 19 p3307 A69-35796

Apollo lunar module landing radar, discussing descent phases, operating modes, assemblies and Surveyor radar 19 p3267 A69-35797

Apollo spacecraft equipment qualification program for margin assurance, discussing ground and flight tests 19 p3430 A69-36015

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data 19 p3432 A69-36633

OGO 4 UV airglow spectrometer consisting of Ebert-Fastie monochromator and photomultipliers with cesium telluride and cesium iodide channels 19 p3315 A69-36682

OGO 5 spacecraft detector instrumentation for measuring electrostatic and electromagnetic waves electric fields with coupled antennas, describing in-flight operation 19 p3315 A69-36683

Binary increment and residual class notation techniques for onboard spacecraft computer arithmetic 20 p3499 A69-37378

Explorer 31 ion mass spectrometer calibrated in flight and compared with Alouette 2 topside electron concentration data 20 p3545 A69-37879

Communications, instrumentation and data handling for manned planetary missions, discussing data rate limitations 21 p3674 A69-39018

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites [AIAA PAPER 69-902] 21 p3761 A69-39348

Onboard processor servicing spacecraft sensors, programmable from ground, discussing functions and applications 22 p3903 A69-39921

Surveyor spacecraft instrumentation, describing TV camera design and operation, photographic requirements and techniques, lunar surface characteristics, etc 22 p4011 A69-40043

Apollo 6 multisensor imagery of Wilcox Playa /prehistoric lake remnant/ in Arizona, using IR scanner, microwave radiometer, vidicon system and cameras 22 p3942 A69-40988

Lunar TV camera for Apollo missions, discussing operational requirements and design 23 p4162 A69-41478

Systems analysis method for determining spacecraft remote sensors earth resources survey effectiveness by integrating specifications, mapping requirements and orbital characteristics 23 p4163 A69-41567

Centrifuge on board orbiting spacecraft as research tool for biological and physical experiments relevant to prolonged missions and spacecraft design 23 p4108 A69-41833

Mars atmosphere study by Mariner 6 and 7 spacecraft, discussing instrumentation on board [AAS PAPER 69-091] 24 p4393 A69-42881

SPACECRAFT LANDING

NT LUNAR LANDING

Optical measurements through retrorocket plumes of landing spacecraft, investigating reduced landing site visibility and modulation transfer function 02 p0248 A69-11765

Variable geometry features applied to lifting spacecraft to overcome inherent incompatibility and provide low speed and tangential landing capabilities [AIAA PAPER 68-1164] 03 p0520 A69-13562

Search theory application to planetary exploration overall strategy for improving landing site decisions 09 p1595 A69-21994

Soviet lunar probe Zond 6 achievements in controlled Earth landing and lunar surface photography 13 p2355 A69-27342

Landing shock attenuation system for Surveyor spacecraft, describing hydraulic cylinder and piston arrangement for damping, computerized shock absorber design and landing process simulation [ASME PAPER 69-DE-54] 14 p2530 A69-28848

Control methods for spacecraft reentry and landing, discussing adaptive systems, descent trajectory parameter prediction and angle of attack 16 p2867 A69-31742

Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing [AIAA PAPER 69-742] 18 p3084 A69-34407

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts 21 p3819 A69-39017

Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral [AIAA PAPER 69-864] 21 p3762 A69-39390

SPACECRAFT LAUNCHING

ESRO 2/IRIS satellite launching checkout, count-down and breakdown of operations 01 p0163 A69-11104

Status of European Space Operations Center /ESOC/ with ESRO 2/IRIS launching 01 p0163 A69-11105

Environmental tests of space vehicles, determining parameter effects on ground storage and transportation, launching and orbital life 02 p0228 A69-11918

All weather wind profile monitoring system using FPS-16 radar/Jimsphe system and flight simulation for protection of space vehicle and missile launches 03 p0462 A69-13852

Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment [SMPTE PAPER 104-20] 04 p0596 A69-14360

Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space [IMPI PAPER D2] 04 p0647 A69-15000

Spacecraft launching facilities and payload capabilities in next decade, discussing orbits, spacecraft size and volume, attitude stabilization and positional accuracy 06 p1012 A69-16857

Scout launch vehicle for launching small research satellites in near earth orbits, describing solid propellant stages, guidance, telemetry and beacon systems 06 p1016 A69-17597

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect [AIAA PAPER 69-58] 06 p1019 A69-18204

Anomalous infrasonic signals observed during launching of space vehicles with thrust greater than 200,000 lb, noting supersonic and subsonic group velocity spreads 07 p1078 A69-18853

Truss framework for support of eight 100-lb satellites through Titan 3C launch and dispensing of satellites at predetermined times, discussing materials and fabrication 09 p1512 A69-22369

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements [AIAA PAPER 69-308] 09 p1479 A69-22385

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques 12 p2148 A69-26834

European Space Research Organization projects including satellites and sounding rocket launchings for various missions 12 p2175 A69-26922

Control system design for Black Arrow satellite launch vehicle based on Black Knight test vehicle system 14 p2530 A69-29630

Europa 1 booster supplementing with perigee-apogee system for development of Europa 2, noting payload launching capability into 24-hr circular orbit 15 p2671 A69-31051

European launcher system based on modular principle for low orbit, geostationary and space probe missions payload requirements 17 p3050 A69-33428

Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc 20 p3617 A69-37287

Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc 20 p3618 A69-38117

Space vehicle launcher system reliability from trials and adopted corrections, basing formal computation on adoption of normalized form for reliability likelihood 20 p3618 A69-38278

Europa 1 launch clearance procedure based on wind load precalculations from weather balloon determined wind profiles 20 p3619 A69-38281

Space transportation cost saving options including booster systems, spacecraft/payload systems and support systems, discussing recovery and launching operations 21 p3857 A69-39690

Synchronous communications satellite launch constraints for fixed time or node, noting application to IDCSP/A mission and sun angle, occultation and transfer orbit [AIAA PAPER 68-445] 22 p4036 A69-40543

General purpose space vehicle ground support equipment adapted from special purpose systems, discussing checkout, launch control and data monitoring requirements [AIAA PAPER 69-308] 22 p3927 A69-40552

Satellite system survival probability expressed as function of launch probability, time and number of satellites available [AIAA PAPER 67-324] 24 p4249 A69-43665

SPACECRAFT LUBRICATION

Space lubrication system for Orbiting Solar Observatory program, discussing theoretical high vacuum principles and flight performance and environmental test data 02 p0252 A69-11766

Satellite, spacecraft and rocket components coatings and lubricants, noting high radiation resistance of polyimides 06 p0945 A69-17046

European research on ultrahigh vacuum lubrication in space environments, emphasizing friction of materials under various loadings and temperatures [IME PAPER 10] 07 p1138 A69-18564

SPACECRAFT MANEUVERS

NT ORBITAL RENDEZVOUS

Spacecraft maneuvering by changing spacecraft geometry and utilizing different gravitational forces acting on finitely extended bodies 01 p0158 A69-11318

Constant thrust deceleration formula for gravity turn soft landing maneuvers expressed in elementary and trigonometric functions of initial conditions for descent 02 p0335 A69-12531

Spacecraft orbital maneuvers by means of low thrust, discussing optimization and several orbital transfer examples 03 p0522 A69-14086

Time optimal turn maneuver for rocket with tilting engine and control nozzles, noting rotation moments distribution 04 p0665 A69-14832

Power requirements of low thrust space engine for maneuvers and optimum overlappings theory for selection of power plant 04 p0666 A69-14920

Minimum fuel consumption for low thrust jet engine propelled space vehicles maneuvering in circular trajectories 05 p0829 A69-15879

Electrical propulsion for space maneuvers, discussing interrelationship of orbital changes, payloads and time 06 p0998 A69-16858

Ground based guidance systems for supplementing onboard guidance of manned space vehicles 06 p0955 A69-17580

Velocity meter for precision adjustment of orbits of vehicles in space for long periods using digital integrating accelerometer 08 p1348 A69-21063

Resistojet control system combined with control moment gyro payload capability for long duration manned orbital spacecraft missions [AIAA PAPER 69-255] 09 p1561 A69-21220

Rendezvous maneuvers for fixed elliptical target orbit, discussing numerical solution of problem and suitability of various points of target ellipse for rendezvous 09 p1538 A69-21649

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer 13 p2356 A69-27685

Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission 13 p2354 A69-28504

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential 15 p2696 A69-31064

Reaction control rocket engines for manned spacecraft, discussing operating and cycle life, thrust response, specific impulse and reliability 16 p2867 A69-31746

Electrically propelled TV satellite control maneuvers to reach target position in synchronous circular orbit from spiral ascent trajectory 16 p2868 A69-31935

Capillary barriers to provide propellant positioning, expulsion capability and slosh damping for spacecraft propulsion systems during rotational maneuvers [AIAA PAPER 69-529] 16 p2868 A69-32713

Fluid flow problems during orbital refueling vehicle maneuvers and system operations in propellant transfer, including disturbances, liquid-vapor interface instability, vapor ingestion, etc [AIAA PAPER 69-367] 16 p2868 A69-32721

Momentum control system for satellite maneuvering and pointing in pitch and roll developed by modifying existing libration damping gyrostabilizer 18 p3207 A69-34684

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting with emphasis on singular points 19 p3427 A69-36613

Lunar module motion during optimal ascent from moon surface into circular orbit of command module, noting descent maneuver similarity 19 p3431 A69-36617

Optimal low thrust coplanar rendezvous control for thrusting vehicle and passive vehicle in elliptical orbit

using linearized equations of motion and polar coordinates 20 p3617 A69-37192

Secondary or abort mission maximized subject to primary mission constraints by variational treatment of optimal branched trajectories [AAS PAPER 68-138] 21 p3819 A69-39210

Parking orbit optimal orientation for minimal impulsive maneuvers total velocity increment in three dimensional capture-escape mission [AIAA PAPER 69-918] 21 p3808 A69-39347

Reaction boom attitude control systems for improving stabilization and maneuvering capability of earth pointing satellites, describing configurations [AIAA PAPER 69-834] 21 p3822 A69-39365

Space rendezvous methods from developmental environment to operational method 21 p3824 A69-39474

Satellite maneuver for changing plane of circular orbit to pass through given point, determining on-off engine switching and thrust vector control 21 p3765 A69-39640

Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control [AIAA PAPER 68-848] 21 p3828 A69-39760

Optimal minimum fuel rendezvous maneuver variational problem, generalizing circular orbit results to conical orbits 22 p4028 A69-40754

Optimum functions for mass and energy flow during spacecraft orbital transfer, emphasizing time behavior of propulsion variables 24 p4382 A69-42921

SPACECRAFT MODELS

Mars planetary entry and landing model tests, demonstrating technological feasibility of mission 02 p0333 A69-11746

AZUR satellite movement simulator for thermal control tests, describing assembly 08 p1300 A69-20095

Spacecraft electric propulsion parameters and launching vehicle characteristics in low thrust mission simulation, discussing spacecraft path 09 p1584 A69-21202

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion 09 p1584 A69-21205

Aerodynamic measurements on Apollo CM model at hypersonic flow simulating earth orbital reentry trajectory 12 p2012 A69-26800

Gravity preference tests on rats subjected to simulated Aerobee 150 A rocket launching and flight in ground based spiral centrifuge 13 p2213 A69-28090

Solar radiation pressure effects on satellite models in circular equinoctial orbits 14 p2522 A69-29595

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential 15 p2696 A69-31064

Scale modeling of multilayer insulated spacecraft for thermal design, considering solar probe and two meter telescope models [AIAA PAPER 69-613] 17 p3049 A69-33267

Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing [AIAA PAPER 69-612] 17 p3049 A69-33296

Thermal scale modeling for space hardware development from managerial and engineering viewpoints [AIAA PAPER 69-1010] 22 p3922 A69-40383

SPACECRAFT MODULES

NT LANDING MODULES

NT LUNAR LANDING MODULES

NT LUNAR MODULE

NT MARS EXCURSION MODULE

Cascaded thermoelectric module for spacecraft power conversion via module integration with radio isotope heat source, bonding SiGe and PbTe stages 20 p3465 A69-37706

SPACECRAFT MOTION

Hill method for satellite motion with reference to rectangular rotating axes system with origin at moon center of gravity, obtaining intermediate orbits 16 p2855 A69-31656

Liquid filled toroidal shaped rotating damping tube containing bubble, discussing parameters variation effect on spacecraft nutation 16 p2868 A69-32561

SPACECRAFT PERFORMANCE

Equations of motion of rapidly rotating spacecraft, considering deformations of long elastic booms 18 p3207 A69-34582

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters [AIAA PAPER 69-919] 21 p3820 A69-39349

General control theory for spacecraft motions, deriving dynamic equations of motion about center of mass for holonomic and nonholonomic control programs 21 p3829 A69-39829

Spacecraft spherical motion about mass center under inertial force using Euler differential equations 21 p3830 A69-39838

Multispacecraft simultaneous simulation on hybrid computer using Encke perturbation method for translational motion and Hamilton quaternion method for inertial transformations [AIAA PAPER 69-937] 22 p4036 A69-40320

Kalman-Bucy filtering technique for estimation of initial conditions and smoothing in linear dynamic systems, noting rectilinear motion of randomly accelerated spacecraft 23 p4132 A69-42546

SPACECRAFT ORBITAL ASSEMBLY

U ORBITAL ASSEMBLY

SPACECRAFT ORBITS

NT INTERPLANETARY TRANSFER ORBITS

NT PARKING ORBITS

NT POLAR ORBITS

NT SATELLITE ORBITS

NT STATIONARY ORBITS

NT TRANSFER ORBITS

NT TWENTY-FOUR HOUR ORBITS

Orbiting ESRO 2/IRIS energy measuring experiments, satellite stabilization, power source, communications and data recovery 01 p0156 A69-11108

Saturn ring gravitational field perturbations of space vehicle orbit on flyby mission solved by particle motion perturbation theory 03 p0508 A69-13260

Spacecraft launching facilities and payload capabilities in next decade, discussing orbits, spacecraft size and volume, attitude stabilization and positional accuracy 06 p1012 A69-16857

Velocity meter for precision adjustment of orbits of vehicles in space for long periods using digital integrating accelerometer 08 p1348 A69-21063

Resistojet control system combined with control moment gyro payload capability for long duration manned orbital spacecraft missions [AIAA PAPER 69-255] 09 p1561 A69-21220

Spacecraft orbit control laws determined by studying influence of controlling acceleration in plane perpendicular to absolute velocity vector 11 p1965 A69-25743

Solar array energy performance as function of orbital parameters and spacecraft attitude 13 p2203 A69-27419

Fluid transfer in orbit under low or zero g, stressing orientation [AIAA PAPER 69-565] 16 p2865 A69-32770

Mathematical model for determining thrusted interplanetary spacecraft orbit, considering time history of position, velocity and thrust acceleration [AIAA PAPER 69-901] 21 p3806 A69-39335

Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution [AIAA PAPER 69-879] 21 p3763 A69-39405

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits [AIAA PAPER 69-880] 21 p3763 A69-39406

Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies [AIAA PAPER 68-854] 21 p3767 A69-39764

Minimum impulse transfer of vehicle between non-coplanar Kepler orbits, applying optimal control principles to formulation 23 p4214 A69-41878

SPACECRAFT PERFORMANCE

Variable geometry features applied to lifting spacecraft to overcome inherent incompatibility and provide low speed and tangential landing capabilities [AIAA PAPER 68-1164] 03 p0520 A69-13562

Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis 04 p0652 A69-14519

Real time performance, ground control and data processing of Surveyor spacecraft during maneuvers [AIAA PAPER 67-644] 04 p0586 A69-15502

Earth radiation effect on space vehicle, using diffusely radiating sphere model 05 p0824 A69-16053

Lifting reentry spacecraft performance examined in context of realistic aerodynamic characteristics at low flight Reynolds numbers 06 p0860 A69-17634

RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization 07 p1226 A69-18328

ESRO 1 satellite design coordination, assembly and tests 15 p2702 A69-31082

Saturn 5 translunar payload capability encumbrance by fuel biasing, propellant utilization systems, trajectory shaping and programmed mixture ratio scheme [AIAA PAPER 69-451] 16 p2839 A69-32669

Gravity gradient stabilized satellite achieving best theoretical performance through Foucault current and magnetic hysteresis articulations 17 p3048 A69-33234

Flight performance analysis of space systems, discussing preparation, implementation and communication 18 p3206 A69-34501

Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems 19 p3430 A69-36010

Jet engine risetime effect on spacecraft orientation control system performance, assuming monotonic or extremal thrust mode 19 p3370 A69-36619

Tiros-ESSA satellite operations, describing first and second generation systems 19 p3433 A69-36909

Earth radiation effect on space vehicle, using diffusely radiating sphere model 20 p3606 A69-37963

Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure [AIAA PAPER 69-883] 21 p3764 A69-39409

Space rendezvous methods from developmental environment to operational method 21 p3824 A69-39474

Interactive graphics system for rocket vehicle trajectory simulation and performance analysis [AIAA PAPER 69-954] 22 p3905 A69-40336

SPACECRAFT POSITION INDICATORS

Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures 07 p1177 A69-19212

Instrument error analysis for spacecraft orientation and positioning near planet from planet disk observations 13 p2260 A69-27695

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters 13 p2296 A69-27696

SPACECRAFT POWER SUPPLIES

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions 01 p0160 A69-10031

Storm-Shattuck and push-pull tunnel diode DC-to-DC converters suitable for spacecraft power supplies 01 p0013 A69-10750

Spacecraft voltage-limited charging system for sealed secondary batteries, discussing operating characteristics and battery parameters 01 p0013 A69-11010

Finned tube radiators optimum design for waste heat removal from space power plants 02 p0354 A69-12664

In-core thermionic sodium cooled uranium oxide fueled reactor for space vehicle power plant 02 p0279 A69-12666

Dissociating gas as working fluid for space plant, noting role in radiator area reduction 04 p0551 A69-15313

Mathematical model to design weight optimized silicon-germanium solar flat plate thermoelectric generator as spacecraft auxiliary power source in near sun missions 05 p0704 A69-15674

ESRO satellites power supply design, operation and characteristics 05 p0829 A69-15919

Liquid metals as coolants in breeder and space vehicle reactors for stable two phase flows 05 p0803 A69-15998

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1] 05 p0705 A69-16158

Electronic circuits power supply onboard space vehicle, discussing chemical, solar and nuclear energy sources 07 p1225 A69-18251

Nuclear reactors for powering electrical engines and current supply for satellite devices, noting ROVER project and KiWI reactors 07 p1179 A69-19739

Out-of-core thermionic space power generators using heat pipes, discussing feasibility in geometry, heat pipes, reactor, shield, heat exchanger and radiator 08 p1256 A69-19856

Nuclear power supply with in-core thermionic reactor for space power source and use in satellite TV, discussing theory, design and components 08 p1350 A69-20871

Manned spacecraft electrical power systems requirements, noting Gemini and Apollo fuel cell system design and configuration 08 p1259 A69-21035

Electrical energy production on board space vehicles including solar batteries, chemical reagents and possible nuclear energy utilization 08 p1259 A69-21036

Energy source for space environments based on compact cold hydrogen-oxygen fuel cell, discussing heat control and water elimination methods 08 p1260 A69-21041

Electrostatic rocket exhaust condensation on spacecraft solar electric panels cover glasses, noting deleterious effects [AIAA PAPER 69-271] 09 p1569 A69-21874

High temperature and power gas diodes and thyristors for nuclear electrical space power systems 11 p1847 A69-24744

Astronautics - Conference, Braunschweig, West Germany, October 1968, Volume 2, Energy sources 12 p2014 A69-25862

Electrical power requirements in spacecraft, discussing communication, engine and control systems, data processing, electrochemical and nuclear sources 12 p2015 A69-25863

Solar cells operation in space flight, considering Si photoelectric cells characteristics and complete systems construction for spacecraft power supplies 12 p2015 A69-25865

Regulated voltage converter systems for onboard spacecraft electric power supplies, noting chopper circuits with rectifiers 12 p2015 A69-25867

Thermoelectric and thermal phenomena in thermoelectric generator development for spacecraft applications, considering element design and materials selection 12 p2016 A69-25868

Liquid-metal MHD space power generation system using intermittent vaporization slugs shooting at 2700 R peak temperature 13 p2206 A69-27492

Satellite and spacecraft power supply and power converters 13 p2209 A69-27917

Large power systems integration in manned space stations, discussing design, selection and application criteria 13 p2209 A69-27939

Power supply subsystem for TD1/TD2 satellites with solar cells, discussing design including standby battery for solar eclipse periods 13 p2209 A69-28481

Out-of-core thermionic reactor concept for space power supply using lithium heat pipes in crossed layers 14 p2480 A69-29187

Thermionic reactors U.S.S.R. space and other programs, considering power output, heat exchange and losses, neutron physics and design parameters 14 p2404 A69-29277

ESRO 1 satellite centralized control system, discussing housekeeping system responsible for task execution in connection with power supply 15 p2702 A69-31083

Storage batteries for satellite electrical power sources emphasizing operation in overcharged state 16 p2735 A69-31729

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles 16 p2810 A69-31748

Electrochemical generators for space applications - Conference, Paris, December 1967 16 p2736 A69-32405

Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems 16 p2737 A69-32406

Electrochemical generators space applications, discussing nuclear, solar and rechargeable cells 16 p2737 A69-32407

Hydrogen-oxygen low power space use fuel cell, noting geometrical and electrical characteristics of electrodes 16 p2738 A69-32412

Double skeleton catalyst type VARTA fuel cell system for space power, using potassium hydroxide as electrolyte 16 p2739 A69-32418

Electrochemical generators utilizing anodically polarized zinc associated with oxygen, mercuric oxide or silver oxide for space power sources 16 p2739 A69-32420

Ni-Cd and Ag-Cd storage batteries for space applications, discussing performance, life and reliability 16 p2740 A69-32422

Parametric thermal control weight and power requirements for spacecraft life support systems, considering number of cabins, crew activity, heating, cooling and regeneration [AIAA PAPER 69-621] 17 p2914 A69-33305

Power supply circuits in spacecraft, DC voltage control systems, transistor and thyristor regulators and modulators, etc 17 p2937 A69-33582

Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations 17 p3050 A69-33797

Overload protection guidelines for power subsystems, discussing source and protective device characteristics emphasizing spacecraft requirements 17 p2904 A69-34088

Rotary power transformer design for spin stabilized spacecraft power system, discussing efficiency and advantages 17 p3050 A69-34111

TD1/TD2 satellites power supply subsystem, stressing high power requirements and significant design features regarding battery and solar array controls 18 p3093 A69-34791

Large solar array systems in space, discussing design and operation 18 p3094 A69-35056

Magnetic core material and process technologies for space power electronic applications noting pulse transformers, nonlinear reactors and tapes 19 p3319 A69-35543

Solar cell retractable array for spacecraft multikilowatt power generation 19 p3254 A69-35711

Solar cells volt-ampere characteristics calibrated at various solar incidence angles on LES-6 satellite in synchronous orbit 19 p3254 A69-35712

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1] 19 p3255 A69-36418

Cascaded thermoelectric module for spacecraft power conversion via module integration with radio isotope heat source, bonding SiGe and PbTe stages 20 p3465 A69-37706

Advanced reaction wheel controller for spacecraft attitude control, discussing brushless DC motor role in weight and power reduction and control precision [AIAA PAPER 69-855] 21 p3822 A69-39383

High voltage power supply electronic subsystem for electric propulsion of ATS-D satellite, describing packaging, temperature control and performance in simulated space environment 22 p3999 A69-39948

Photovoltaic cells electrical characteristics, discussing Cd sulfide, single crystal Si and dendritic type Si cells for spacecraft power 22 p3868 A69-40130

Electric power system selection for long duration manned space station [AIAA PAPER 68-1034] 22 p3869 A69-40549

Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations

23 p4068 A69-42240

Computer simulation of satellite electric power systems concerning solar array, thermal, battery and charge models for end-of-mission-life orbits

23 p4068 A69-42241

Solar cell power systems for manned space stations, summarizing studies of battery power system designs

23 p4068 A69-42242

Battery subsystems optimization for earth satellite lifetimes greater than 5 years, analyzing flexibility, weight and reliability

23 p4068 A69-42243

Fuel cell/battery and solar array/battery systems for manned Apollo Applications Program /AAP/ space vehicles, considering mission and power requirements

23 p4069 A69-42244

Thermionic reactors for auxiliary space power and electric propulsion applications, discussing converter development regarding nuclear fuel elements

23 p4186 A69-42246

SNAP 27 radioisotope thermoelectric generator system designed as prime power supply for Apollo lunar surface experiment package /ALSEP/

23 p4187 A69-42249

Mars landers impactable power subsystems, considering thermoelectric generators, batteries, conversion equipment, Mars environment, etc

23 p4069 A69-42253

Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply

23 p4070 A69-42254

Power systems for unmanned spacecraft, noting improved performance for zirconium hydride reactors and thermoelectric converters

23 p4187 A69-42255

Co 60 kernel heat source for multikilowatt space power supplies, stressing design for maximum safety

23 p4187 A69-42257

Thermoelectric generators performance and life tests, describing JPL facilities and programs

23 p4188 A69-42263

Pu-238 isotope organic Rankine cycle system analyzed for one year manned space station, using modified H-521 Space Power computer program

23 p4188 A69-42264

Systems analysis of Rankine cycle nuclear- electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet

23 p4189 A69-42266

Dynamic power and life support systems electrical/ thermal integration for manned spacecraft using low temperature Rankine cycle generator

23 p4189 A69-42269

ISOTEC thermoelectric generators for space power, describing design features, operation, power output and radioisotope heat source

23 p4189 A69-42270

Argon turboalternator design and testing for Brayton cycle space power system, discussing inlet operating temperature and shaft bearings and rotation

23 p4071 A69-42279

Analog computer simulation of single shaft Brayton cycle system dynamics, including startup and shutdown transients

23 p4071 A69-42280

Radioisotope energized Stirling engine for spacecraft auxiliary electric power, discussing system configurations, weight and fuel requirements

23 p4190 A69-42281

Aerospace NiCd batteries charge control, discussing depth of discharge, limiting voltage and environmental temperature interrelationship

23 p4071 A69-42282

Space vehicle flight performance of Ni-Cd batteries noting reliability, consistency and predictability

23 p4072 A69-42285

Apollo Telescope Mount /ATM/ solar cell module electrical performance testing using sunlight simulation

23 p4072 A69-42286

Solar cells arrays degradation in Intelsat spacecraft at synchronous altitude, noting shielding gaps and low energy proton influence

23 p4072 A69-42287

Spacecraft Si cell solar array using self rigidizing folded panels with flexible substrates for increased power/weight and power/stowage volume ratios

23 p4073 A69-42290

Lightweight large area solar cell arrays for space programs with multikilowatt predicted performance, noting rollup array orbital flight testing

23 p4073 A69-42291

Modularized static AC and DC inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests

23 p4073 A69-42292

Power conditioner for use with SERT II mercury ion thruster, describing electrical and mechanical design and operation

23 p4075 A69-42301

High efficiency boost regulator design and tests for planetary spacecraft, considering input and output voltages

23 p4075 A69-42302

Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor

23 p4075 A69-42303

High power density spacecraft hydrogen/oxygen fuel cells with open cycle heat and product-water removal subsystems and reactant tankage

23 p4076 A69-42309

Space nuclear electric power systems applications and development, summarizing current status and near future programs

[AAS PAPER 69-305] 24 p4364 A69-42865

Battery/fuel cell hybrid power source, discussing fast transient response

[SAE PAPER 690205] 24 p4255 A69-42889

SPACECRAFT PRELAUNCH TESTS

U SPACE VEHICLE CHECKOUT PROGRAM

SPACECRAFT PROPULSION

NT ELECTROMAGNETIC PROPULSION

NT ELECTROSTATIC PROPULSION

NT ION PROPULSION

NT PLASMA PROPULSION

NT SOLAR PROPULSION

Solid, liquid and advanced propulsion techniques in France, discussing Diamant program and Europa booster

02 p0334 A69-11919

Book on electric propulsion systems for spacecraft covering thermoelectric, electromagnetic, electrostatic, plasmacore, thermonuclear and photon systems

02 p0305 A69-12233

Rocket motor integration into Scout vehicle to improve performance

02 p0335 A69-12384

French solid propellant sounding rockets proposed launching from Guiana base using different fuel propulsion systems

03 p0518 A69-12851

Power requirements of low thrust space engine for maneuvers and optimum overlappings theory for selection of power plant

04 p0666 A69-14920

Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space

[IMPI PAPER D2] 04 p0647 A69-15000

Spacecraft propulsion - ELDO Conference, Paris, October 1967

05 p0791 A69-15593

Polonium 210 production for radiothermal propulsion via bismuth irradiation in graphite gas power reactor

05 p0791 A69-15594

Radioisotopic propulsion stage design with liquid hydrogen working fluid, stressing tank insulation and hydrostatic flight behavior

05 p0811 A69-15595

Isotopic propulsion engine development problems, emphasizing single channel thermal power engine with hydrogen working fluid

05 p0811 A69-15596

Thorium 228 production and shaping for radiothermal propulsion, discussing transformation from radium 226, irradiated target processing, etc

05 p0791 A69-15597

Low thrust nuclear engine using hydrogen suitable for transfer missions

05 p0791 A69-15598

Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion

06 p1007 A69-17574

Solar sail structural design, discussing application as propulsion system for heliogyro interplanetary spacecraft

06 p1015 A69-17591

Feasibility of nuclear stage for space missions, discussing Saturn 5 third stage replacement, payload gain, reactor and engine size

08 p1409 A69-20158

Cesium electron bombardment microthruster system, discussing ion engine, feed, discharge neutralizer, power conditioning and control electronics

[AIAA PAPER 69-293] 09 p1561 A69-21223

SERT 2 thruster hollow cathode durability tested in bell jar

[AIAA PAPER 69-304] 09 p1562 A69-21224

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298] 09 p1562 A69-21227

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters

[AIAA PAPER 69-243] 09 p1564 A69-21239

Solar electric propulsion mission simplification by staging concept, discussing thrust combination, weight tradeoffs, design and Jupiter flyby probe

[AIAA PAPER 69-251] 09 p1586 A69-21245

Performance boundaries of space propulsion systems containing nuclear electric stages

[AIAA PAPER 69-249] 09 p1538 A69-21249

NASA long range planning of primary electric propulsion for automated space program

[AIAA PAPER 69-247] 09 p1565 A69-21251

Electron bombardment thrusters for low specific impulse operation, discussing electrode structures fabrication by bonding alumina disk to metal electrode

[AIAA PAPER 69-301] 09 p1568 A69-21730

Power converter design for electrically propelled spacecraft, discussing weight, reliability, and thruster load requirements

[AIAA PAPER 69-240] 09 p1568 A69-21732

Liquid mercury cathode electron bombardment thrusters applicability to electric propulsion missions

[AIAA PAPER 69-302] 09 p1569 A69-21876

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

[AIAA PAPER 69-300] 09 p1569 A69-21880

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data

[AIAA PAPER 69-314] 09 p1478 A69-22380

Ionic propulsion application to geostationary satellite attitude correction

10 p1753 A69-23841

Book on theory and design of jet, rocket, nuclear, ion and electric propulsion systems noting combustion, detonation, fluid injection and space mission applications

11 p1943 A69-25582

Rocket propulsion devices classifications, discussing energy sources, propellants, performance, space vehicle applications, liquid propellant rockets, engines, selection criteria and cooling methods

11 p1943 A69-25587

Space propulsion by radioisotope energy noting thermal heating, thruster configurations, propulsion system, mission capabilities and current thruster technology

11 p1914 A69-25591

Electric and ion propulsion with solar array or nuclear reactor energy sources, discussing thermal thrusters, electrostatic thrusters and plasma thrusters

11 p1944 A69-25592

Ion spacecraft propulsion systems, discussing components and characteristics of reaction type rocket engines and electrical thrust devices

11 p1944 A69-25593

Electric propulsion systems characteristics, examining sputtering of metallic targets as thrust augmentor

11 p1944 A69-25598

Spacecraft propulsion systems comparison and evaluation, discussing quality, schedules and costs in relation to mission requirements

11 p1965 A69-25600

Entry propulsion and lower systems technology for planetary entry and atmospheric reentry vehicles

11 p1945 A69-25723

Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems

12 p2176 A69-25860

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques

12 p2148 A69-26834

Thermionic reactor systems, discussing hybrid nuclear rocket/nuclear electric Mars mission, design

features, performance and electric power characteristics

14 p2480 A69-29183

Rocket motors with combustion chambers of variable geometry for hybrid propellants, stressing toroidal chamber

15 p2671 A69-30600

Electric propulsion, discussing plasma research, MPD thruster and arcs, ion thruster research and spacecraft integration [AIAA PAPER 69-497]

16 p2838 A69-32655

Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby [AIAA PAPER 69-499]

16 p2844 A69-32714

Slush hydrogen for spacecraft propulsion, discussing fabrication, conservation and storage

17 p3017 A69-33339

Heat exchanger type low power solid-core fast nuclear rocket design, discussing fuels, safety aspects and space propulsion applications

17 p3004 A69-33342

Optimal overlapping theory to select nonthrottled low thrust spacecraft engines power, noting spacecraft mass invariability

18 p3184 A69-34583

Chemical relaxation, optimum propellant mixture ratio, combustion chamber pressure, gas jet impulse, mass flow and drive capacity of space propulsion systems

18 p3229 A69-34773

Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines

18 p3185 A69-35108

BEEP /Best Estimate of Engine Performance/ program based on trajectory reconstruction and acceleration determination for evaluating Titan 3 propulsion system performance [AIAA PAPER 68-585]

19 p3394 A69-35945

Pneumatic Vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature

21 p3785 A69-39093

Trajectory requirements and performance comparisons of single stage electrically propelled space vehicles [AAS PAPER 68-106]

21 p3819 A69-39204

Liquid hydrogen pumping for Phoebus reactor, discussing feed systems, nozzles, configurations, design, testing, etc [AIAA PAPER 67-478]

21 p3769 A69-39751

Catalyst poisoning and hydrazine material compatibility during hydrazine propulsion systems sterilization and decontamination

21 p3786 A69-39768

Book on commercial satellites covering characteristics, uses, design, rocket propulsion systems, flight trajectories, etc

23 p4224 A69-42367

Spacecraft electric propulsion research in France, Great Britain and Germany

24 p4363 A69-42668

Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration [AAS PAPER 69-359]

24 p4418 A69-42828

Reduced flight time interstellar round trip propulsion system with relativistic velocity capabilities, discussing vehicle with solar sail and magnetic course reversal [AAS PAPER 69-388]

24 p4363 A69-42829

Nuclear propulsion for solar system exploration, discussing NERVA solid core nuclear fission rocket, nuclear-electric rockets and hybrid nuclear rocket/nuclear electric rocket systems [AAS PAPER 69-330]

24 p4349 A69-42871

Optimum functions for mass and energy flow during spacecraft orbital transfer, emphasizing time behavior of propulsion variables

24 p4382 A69-42921

Weight limitations effect on optimum motion parameters of variable mass body in gravitational field applied to spacecraft optimum propulsion system controls and trajectory determination

24 p4383 A69-42956

SPACECRAFT RADIATORS

Dissociating gas as working fluid for space plant, noting role in radiator area reduction

04 p0551 A69-15313

Space radiator dynamic model for predicting outlet temperature transient response to environmental variations [AIAA PAPER 69-29]

06 p1039 A69-18205

Transient thermal analysis of space radiators excluding finite difference equations, noting computer adaptability and time saving [AIAA PAPER 69-615]

17 p3070 A69-33261

Heat pipe application to thermal equalization around ATS-E solar cell mounting panels, comparing predicted and actual performance [AIAA PAPER 69-630]

17 p3072 A69-33277

Space radiator system with hybrid, water heat pipes to transport waste heat from radioisotopic thermoelectric generator

23 p4190 A69-42304

SPACECRAFT RECOVERY

Air to air recovery of reentry vehicles, discussing parachute/wing descent, aircraft/helicopter energy absorption, payload boarding and towing techniques [AIAA PAPER 68-1163]

03 p0520 A69-13563

Soviet probe Zond 5 circumlunar flight to recover space vehicles from interplanetary paths

06 p1003 A69-17389

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, discussing unintended landing

20 p3636 A69-37113

Agreement on Rescue and Return of Astronauts and Return of Objects Launched into Outer Space, noting humanitarian considerations and indemnity for services rendered

20 p3636 A69-37114

UN agreement provisions on international cooperation for rescuing astronauts and objects in case of accident, distress, emergency or unintended landing

20 p3637 A69-37116

Space transportation cost saving options including booster systems, spacecraft/payload systems and support systems, discussing recovery and launching operations

21 p3857 A69-39690

SPACECRAFT REENTRY

Upgrading wave superheater for evaluation of reentry materials

01 p0054 A69-10917

Apollo thermal protection system, noting low density ablation, flight and ground tests [AIAA PAPER 68-1142]

03 p0519 A69-13558

Space vehicle flight automatic optimization for maximum L/D reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry

05 p0830 A69-16045

Cosmos 253 rocket reentry and fragmentation over England

05 p0830 A69-16656

Flat plate in two dimensional low density hypersonic flow wind tunnel tested for aerodynamic effects on spacecraft reentry

11 p1819 A69-25424

Mass transfer cooling of high velocity surfaces in gaseous environment noting applications to atmospheric entry

13 p2377 A69-28146

Control methods for spacecraft reentry and landing, discussing adaptive systems, descent trajectory parameter prediction and angle of attack

16 p2867 A69-31742

NASA planetary entry parachute program for rocket launched and balloon deployment tests [AIAA PAPER 68-934]

19 p3247 A69-35952

Space vehicle flight automatic optimization for maximum L/d reentry, considering perturbations causing trajectory inclination changes during roller coaster reentry

20 p3618 A69-37954

Optimal sliding regimes for controlling dynamic systems, proposing control parameters system extension

21 p3768 A69-39826

Arc-heated hypersonic wind tunnel for simulated spacecraft reentry environment, aerodynamic heating characteristics and research applications

22 p3927 A69-40595

SPACECRAFT RELIABILITY

Meteoroid penetration detector development program for spacecraft construction, discussing design, materials and environmental tests

02 p0338 A69-11749

Reliability of operational satellite systems consisting of two single purpose satellites in interchangeable orbits, discussing outage and replacement

02 p0333 A69-11805

Explorer 33 and 35 satellites reliability achievement by design via AIMP program

03 p0519 A69-13232

Reliability in air and space travel, quality/ quantity aspects, problems and cooperation

04 p0606 A69-14803

Spacecraft terminal dry heat sterilization procedures for minimal time and temperature conditions, using simple geometric configuration of spacecraft for thermal analysis

05 p0712 A69-15942

Engineering designs and hardware required for low risk flight of long duration manned space stations

06 p1007 A69-17601

Satellite attitude control, discussing mission requirements, typical guidance sensors, actuating torque, systems reliability, etc

09 p1609 A69-21617

Integrated management information system /IMIS/, discussing logistics, reliability and quality assurance disciplines

11 p2005 A69-25304

Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model [AIAA PAPER 68-1059]

12 p2174 A69-26797

Electric relays requirements for spacecraft with magnetic field constraints

13 p2231 A69-28046

Three meter spherical volume heat balance test facility for space vehicles at European Space Technology Center, describing vacuum system, solar simulation, etc

13 p2241 A69-28080

Scientific satellite checkout system tests by manual, automatic and self test control

13 p2243 A69-28480

Space equipment reliability, discussing manufacturing defects, design faults, component failures, maintenance, overloads, accidents and operating errors

15 p2624 A69-30817

Static structure ground test for Saturn-Apollo vehicle short stack, describing air pressure simulation, data acquisition and readout systems

15 p2589 A69-31079

Space vehicle subcontracted components reliability attainment, discussing reliability process specifications, motivation, product reliability and feedback programs

15 p2723 A69-31139

Engine and components reliability, discussing design stage and programming [AIAA PAPER 69-476]

16 p2795 A69-32771

Fluidics for satellite and rocket attitude control and guidance, discussing computing block function and components, system reliability and resistance to aging, etc

17 p3049 A69-33243

Spacecraft and aircraft components failure analysis for ensuring high reliability of final products

18 p3143 A69-34483

Flight failure analysis, discussing methods and restrictions due to hardware unavailability, minimum data, urgency and publicity

18 p3145 A69-34502

Spacecraft structures reliability, discussing detection, identification, assessment and control of defects

18 p3146 A69-34513

Spacecraft and components testing methods critical reassessment, discussing cost reduction, vacuum and thermal cycle tests

18 p3118 A69-35082

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design and components

19 p3370 A69-35803

Space simulation facility assembly and operational testing

22 p3919 A69-39959

Operational reliability verification of Apollo real time mission program and testing structure, discussing environment, processing, controls, response criteria, etc [AIAA PAPER 69-981]

22 p3907 A69-40361

Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design [AIAA PAPER 69-995]

22 p3920 A69-40373

Spacecraft test equipment based on balancing and vibration testing machines, emphasizing mass distribution experimental determination

24 p4296 A69-42669

Space station safety, discussing damage containment and control, escape and rescue, etc [AAS PAPER 69-518]

24 p4392 A69-42842

Systems supply for unmanned spacecraft, considering power supply, equipment operation, trajectory correction, etc [AAS PAPER 69-520]

24 p4392 A69-42849

High reliability of solenoid and pressure regulating valves under long duration space missions, considering design, tests and controls
[AAS PAPER 69-238] 24 p4319 A69-42854

SPACECRAFT RENDEZVOUS
U SPACE RENDEZVOUS

SPACECRAFT SHIELDING

Equation for calculating meteor shielded tubular panel heat radiators emissivity and weight optimization, considering surface thermal balance and temperature distribution
05 p0846 A69-15897

Cosmic radiation and hybernation physiopathology of human organism, noting beryl as radiation resisting agent in spacecraft design
06 p0874 A69-17645

Solar flare radiation protection requirements, considering bulk and plasma radiation shielding
[AIAA PAPER 69-15] 06 p0884 A69-18079

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt
08 p1377 A69-19843

Field noise reduction frequency spectra afforded by spacecraft shroud, basing estimating criterion on flight test data
09 p1609 A69-21892

Super insulation blankets comprised of dacron sailcloth, silk net or aluminized mylar, describing crinkling, cutting, sewing and hole drilling techniques
09 p1507 A69-22330

Multiple Coulomb scattering and range straggling effects in shielding against solar flare protons and trapped protons in Van Allen belt
10 p1723 A69-23164

Proton flux density at axial point of thin cylindrical and slab shell shields bombarded by isotropic inverse power law spectrum of protons in space
10 p1723 A69-23165

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation
13 p2356 A69-27702

Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] 13 p2367 A69-28304

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation
[AIAA PAPER 69-377] 13 p2357 A69-28307

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact
[AIAA PAPER 69-380] 13 p2368 A69-28310

Soviet book on nuclear interactions in spacecraft shielding covering proton-A1 nuclei inelastic interactions, secondary radiation, solar radiation effects, radiation belts, etc
14 p2481 A69-29817

Calorimetric measurement of source and broadband spectral absorptances of spacecraft thermal control coatings during exposure to UV in vacuum environment
16 p2789 A69-31815

Lunar module multilayer radiation insulation for thermal control, testing aluminum coated Mylar and Kapton sheets
[AIAA PAPER 69-609] 17 p3073 A69-33304

Second surface mirror used as coating for spacecraft thermal control
20 p3632 A69-37290

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] 22 p4050 A69-40359

IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
23 p4164 A69-41633

SPACECRAFT STABILITY

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field
01 p0161 A69-10585

Data acquisition program for Apollo crew motion disturbances experiment consisting of ground simulations and orbital experiment establishing mathematical model of human body
02 p0201 A69-11759

Stabilization and control techniques for future unmanned commercial space vehicles, emphasizing application of projected technological advances in instrumentation
[AIAA PAPER 67-878] 02 p0334 A69-12367

Phase plane diagram utility in toppling stability analysis of spacecraft, emphasizing numerical integration time reduction
02 p0334 A69-12376

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
03 p0519 A69-13068

Energy dissipation effects on attitude stability of dual-spin satellites with damping mechanism on rotating sections
04 p0665 A69-14703

Apollo guidance, navigation, stabilization and control subsystems, detailing inertial, optical and computer units for data processing and collecting
04 p0665 A69-14881

Optimum stabilization of uniformly rotating axisymmetric satellite, using Liapunov theorem on asymptotic stability
04 p0666 A69-14921

Satellite relative equilibrium stability under action of gravitational and aerodynamic moments
05 p0830 A69-16503

Nutational stability of multibody spin stabilized satellites, discussing moment of inertia ratios role with energy dissipative damper on despun platform
06 p1015 A69-17585

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
[AIAA PAPER 69-104] 06 p1019 A69-18210

Semipassive three axis stabilization for dumbbell type satellites, considering pitch, roll and yaw motions damping
07 p1226 A69-18324

Thermal flutter effect on gravity gradient stabilized spacecraft, noting dependence on sunlight and time
07 p1226 A69-18325

Semipassive attitude control system providing one degree pointing accuracies in all axes
07 p1226 A69-18326

Storable tubular extendible member (STEM) booms for gravity gradient applications, emphasizing reflective coatings to minimize deflection by solar radiation
07 p1226 A69-18327

RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
07 p1226 A69-18328

Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation
07 p1227 A69-18333

Hybrid simulation study of satellite attitude control system to replace momentum wheels and gas jets by commandable gravity gradient boom
07 p1227 A69-18335

Equilibria of orbiting gyrostat satellite with internal angular momenta along principal axes
07 p1227 A69-18336

System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
07 p1228 A69-18338

Communication satellites attitude control and stabilization due to antenna beam pointing, with future systems forecast, discussing exchange, distribution and collection systems
07 p1228 A69-18339

Naval Research Laboratory experience with two and three axis gravity gradient satellites stabilization systems
07 p1228 A69-18344

RAE satellite boom deployment to achieve gravity gradient capture
07 p1228 A69-18346

Gravity gradient stabilization role in space missions in 1970s and 1980s
07 p1229 A69-18348

Damping criteria for satellite vibration based on energy dissipation by material hysteresis, friction in viscous flow, magnetic hysteresis and eddy currents
10 p1791 A69-22921

Atmospheric influence on plane oscillations of space vehicle moving at 100-150 km heights
10 p1792 A69-24208

Rotational dynamics equations in linearized matrix form applied to satellite librations in circular orbit and gyroscope motion
11 p1970 A69-24608

Saturn 5 unstable longitudinal oscillation due to coupling of structure and LOX line frequencies solved by helium injection
11 p1967 A69-25497

Magnetic attitude detection and control system for Radio Astronomy Explorer satellite
[AIAA PAPER 68-855] 12 p2174 A69-26779

Space vehicle attitude stabilization based on rotating flywheel resistance to changes in rotation axis attitude, noting grease lubricated hydrodynamic bearing system
12 p2175 A69-26893

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization
13 p2357 A69-28476

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
14 p2530 A69-28750

Steady motion stability of satellite with gimbal suspended gyroscope in central gravitational field, showing no effect of satellite perturbations on gyrostaticity
14 p2530 A69-29481

First approximation stability of single rotation of artificial earth satellite about center of mass in Newtonian gravitational force field
15 p2702 A69-30755

Satellite gravitational stabilization system with maximum damping rate, discussing orbital plane oscillations
16 p2867 A69-31738

Flight and space mechanics problems from engineer standpoint, discussing flight path calculation, stability and control characteristics and experimental techniques for high reliability
17 p3076 A69-33041

Satellite attitude control and stabilization - Conference, Paris, October 1968
17 p3045 A69-33219

D-2 satellite stabilization system design and development, noting mission to determine hydrogen distribution around earth
17 p3046 A69-33223

Diademe satellites stabilization system to measure station-to-satellite distance by laser pulse, discussing reflector, magnet for attitude control, damping device, etc
17 p3046 A69-33224

Stable motions determination of solid bodies with liquid filled cavities and satellites motions stability in central Newtonian force field
17 p3005 A69-33228

Attitude and simple stability of deformable earth pointing satellite
17 p3047 A69-33229

Damping of gravity gradient stabilized satellites by hysteresis of materials, friction of viscous fluids, magnetic hysteresis and Foucault currents
17 p3047 A69-33230

Magnetic materials simulation for satellite stabilization device based on magnetic hysteresis, using mathematical models and direct magnetic measurements
17 p2945 A69-33235

Ammonia jet device to stabilize telecommunication satellites consisting of electric heating element, ejection nozzle and thermal screens
17 p3018 A69-33236

Satellite three axis attitude control analysis showing rolling and longitudinal stabilization possibility by flywheel, with validity tested by analog simulation
17 p3048 A69-33240

Flywheels desaturated by magnetic action for optimizing stabilization system of satellite in circular orbit [ONERA-TP-732] 17 p3049 A69-33241

Astronomical satellite direct digital attitude control using digital computer between sensor and actuator to achieve optimal filtering and stabilization
17 p3049 A69-33244

Bearing system for mechanically despun antenna in spin stabilized communications satellite, offering greater directional stability, lower weight and power losses
17 p2978 A69-33431

Aerospace vehicle mass property limits and dynamic balancing related, noting errors
[SAWE PAPER 772] 18 p3208 A69-34875

Differential synthesis technique application to design of multiaxis stability augmentation systems for aerospace vehicles
[AIAA PAPER 68-834] 20 p3616 A69-37156

Stability of periodic orbits in elliptic restricted three body problem
[AAS PAPER 68-086] 20 p3595 A69-37172

Stationary resonant nonlinear oscillatory and rotary states, stability and pitching motions of controlled satellite in slightly elliptical orbit
20 p3616 A69-37177

SPACECRAFT STERILIZATION

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance
[AAS PAPER 68-124] 20 p3616 A69-37178

Atmospheric entry-capsule dynamics, considering angle of attack motion under gravity forces influence and aerodynamic normal force stability relations
20 p3617 A69-37197

Photometry methods for spacecraft brightness in dynamical states of rapid spin and tumble
21 p3671 A69-38340

Planar tumbling in atmospheric entry, describing arrest by approximating Painleve equation
21 p3819 A69-39033

Motion and stability of rotating connected two body space station satellite system, developing Lagrangian equations of motion and optimizing damping system parameters
[AIAA PAPER 69-919] 21 p3820 A69-39349

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit
[AIAA PAPER 69-921] 21 p3821 A69-39351

Aerodynamic and gravitational torque effects on orbiting satellites attitude stability, applying Liapunov direct method in case of conservative aerodynamic torque
[AIAA PAPER 69-832] 21 p3821 A69-39363

Adaptive tracking filter for bending mode stabilization of large flexible boosters
[AIAA PAPER 69-874] 21 p3823 A69-39400

Apollo-Saturn 5 propulsion and structure feedback loop, analyzing Pogo components and Nyquist plot application
[AIAA PAPER 69-877] 21 p3824 A69-39403

Spacecraft natural vibrations analyzed using point transforms with allowance for control systems imperfections
21 p3826 A69-39637

Dynamics of relay gas jet preliminary vibration damping system of gravity gradient stabilized satellite, allowing for sensor limitations and stabilizer flexural vibrations
21 p3826 A69-39638

Simulation of passively stabilized satellites using in-line hybrid computer
[AIAA PAPER 68-853] 21 p3680 A69-39758

Satellite stabilization by earth magnetic field through conservative magnetic moments application
21 p3830 A69-39834

Closed form solution to stability of coupled libration motion of slender axisymmetric satellite in circular orbit limited to small amplitude vibrations
22 p4008 A69-39936

Representative data of actual forces and moments applicable to large spacecraft attitude control system for typical crew activities obtained through simulation programs
[AIAA PAPER 69-1006] 22 p3921 A69-40380

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
22 p4036 A69-40550

Attitude stability of orbiting vehicle containing gyrost, discussing asymptotic stability
22 p4037 A69-40555

Motion stability of rapidly spinning satellite, discussing elastic booms effect
22 p4037 A69-41091

Periodic solutions for gravity-gradient stabilized satellite librating in orbital plane, using elliptic sine function and harmonic balance method
23 p4224 A69-41876

Spinning satellite containing elastically restrained, viscously damped mass, analyzing attitude dynamics and stability, noting wide nutation possibility
23 p4224 A69-42396

Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload
[AAS PAPER 69-255] 24 p4313 A69-42859

Stability analysis of periodic solutions associated with planar librations of gravity oriented satellite using linear perturbation analysis
24 p4388 A69-43649

SPACECRAFT STERILIZATION

Dry heat sterilization and ethylene oxide decontamination test equipment for bipropellant liquid propulsion system
02 p0228 A69-11764

Mars capsule feasibility model terminal dry heat thermal sterilization cycle determined from microbial data
02 p1201 A69-11772

Product assurance role in spacecraft sterilization to maintain planetary biological environments integrity in space programs for extraterrestrial life determination
03 p0379 A69-13400

Sterilization techniques for instruments and materials as applied to space research - COSPAR Conference, London, July 1967
05 p0711 A69-15934

Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles
05 p0712 A69-15935

Standards of sterility for prevention of introduction of terrestrial microorganisms onto other planets during space missions, noting contamination probability
05 p0712 A69-15936

Spacecraft sterilization techniques efficiency in terrestrial and extraterrestrial environments noting dry heat, radiation, ethylene oxide, isopropanol and formaldehyde in methanol
05 p0712 A69-15937

Dry heat destruction of spores, discussing dependence on spore water content and effect of surrounding gas volume on escape of water from spore
05 p0712 A69-15938

Dry heat sterilization of spacecraft, microorganism water content and recommendations for fabrication conditions for spacecraft
05 p0712 A69-15939

Ethylene oxide sterilization rate dependence on temperature, gas concentration, relative humidity and medium surrounding microorganisms
05 p0707 A69-15940

Mathematical model for estimating microbial survival in heat sterilization of spacecraft, including environmental and time cumulative effects
05 p0707 A69-15941

Spacecraft terminal dry heat sterilization procedures for minimal time and temperature conditions, using simple geometric configuration of spacecraft for thermal analysis
05 p0712 A69-15942

Spacecraft sterilization by hydrogen peroxide solutions mixed with selected anion active detergents
05 p0713 A69-15943

Antimicrobial spacecraft materials, discussing feasibility of impregnation or chemical combination of materials with bactericides
05 p0713 A69-15944

Modeling requirements and methods for monitoring microbial contamination, discussing vacuum probe sampler to recover microorganisms from large surface areas
05 p0713 A69-15948

Split-seam process for inserting sterile objects into isolated sterile environment without contamination as method for sterile spacecraft repair
05 p0714 A69-15950

Microbial contaminants on space hardware, discussing detection and enumeration techniques
05 p0714 A69-15954

Thermal stabilization and ethylene oxide effect on spaceborne electronic component sterilization and decontamination
08 p1283 A69-20266

Spacecraft component heat sterilization, discussing heat effects on electrical connections, polymers and adhesives
08 p1284 A69-20267

Technology Feasibility Spacecraft/TFS/ sterilization and bioassay program during assembly, analyzing sampling and cleaning procedures
09 p1446 A69-22358

Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
11 p1828 A69-25460

Microbial contamination release probability from solids fractured by impact, considering spacecraft sterilization requirements
11 p1828 A69-25461

Sterilization assembly development laboratory /SADL/ quality assurance program for microbiological monitoring according to NASA planetary quarantine requirements
15 p2559 A69-31123

Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities
15 p2559 A69-31124

Dry heat destruction rates for microorganisms encapsulated in and on spacecraft hardware, concluding temperature and water conditions in spore as major factors
15 p2560 A69-31444

Spacecraft sterilization by destructive heating with thermite or high velocity entry friction before entering planet atmosphere
15 p2560 A69-31472

Planetary quarantine constraints by NASA insuring low contamination probability from extraterrestrial biological exploration, giving contamination probability equations and sterilization procedures
16 p2746 A69-32435

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization
[AIAA PAPER 69-823] 16 p2840 A69-32675

Thermal stability elements in solid propellant liner insulation system for heat sterilized solid rocket motors used in unmanned planetary landers
[AIAA PAPER 69-437] 16 p2869 A69-32750

Life support system sterilization maintenance problem for biosatellite experiment over one year
20 p3477 A69-37624

Loaded bipropellant liquid propulsion system sterilization studies on structural and nonmetallic materials suitability for use in oxidizer
[AIAA PAPER 68-631] 21 p3785 A69-39025

Catalyst poisoning and hydrazine material compatibility during hydrazine propulsion systems sterilization and decontamination
21 p3786 A69-39768

SPACECRAFT STRUCTURES

Space radiators for heat rejection from nuclear powered spacecraft doubling as primary structures to save weight, discussing conical or cylindrical configurations
01 p0160 A69-10151

Hypervelocity impact effect on structural honeycomb spacecraft wall configurations, stressing design and wall thickness parameters
[AIAA PAPER 68-314] 02 p0345 A69-12389

Optimal design of vibration tests based on decision theory
[SAE PAPER 680753] 03 p0525 A69-13436

Ground vibration testing of flight and space vehicles, noting structural damping asymmetries and nonlinearities
04 p0585 A69-14833

Digital computer methods and numerical techniques to evaluate temperature distributions in spacecraft structures, discussing thermal modeling
[SAE PAPER 690199] 07 p1239 A69-18301

Integrated nondestructive testing systems to ensure welded assemblies reliability for Saturn 5 program, including surface defect detection
07 p1117 A69-19699

Truss framework for support of eight 100-lb satellites through Titan 3C launch and dispensing of satellites at predetermined times, discussing materials and fabrication
09 p1512 A69-22369

Silicated alumina attachment for high temperature radomes and leading surface heat shields, discussing stress concentration and load transfer
09 p1477 A69-22370

Ultrasonically assisted installation of fasteners for weight savings in aircraft/spacecraft structures
09 p1478 A69-22373

Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendable booms to solar environment
11 p1967 A69-25500

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope
11 p1994 A69-25530

Space vehicle dynamic structure response, discussing vibration problems, test methods and responses to periodic, stochastic and forced excitations
12 p2176 A69-25857

Metal adhesive bonding strength behavior in satellite and space vehicle applications, noting effects of various space environment factors
12 p2101 A69-25858

Metal bonded and sandwich structures application to space vehicles, launch vehicles, rocket motors, ground equipment and balloon gondolas, noting inspection methods
12 p2101 A69-25859

Fiber reinforced space vehicle combustion chambers and cryogenic fuel tanks, discussing design and elastomechanical problems
12 p2176 A69-25860

Thermal behavior of space vehicle window systems predicted by mathematical analysis and computer methods for heat transfer through glass
[AIAA PAPER 68-65] 13 p2378 A69-28215

Mathematical models for ballistic limit of single and double wall structures, yielding equations for relation to projectile and target characteristics
[AIAA PAPER 69-370] 13 p2367 A69-28302

Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris
[AIAA PAPER 69-371] 13 p2367 A69-28303

Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles
[AIAA PAPER 69-376] 13 p2367 A69-28306

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation
[AIAA PAPER 69-377] 13 p2357 A69-28307

Structure, equipment and weight breakdown of Black Arrow X3 spacecraft
13 p2357 A69-28478

Spray deposition of low emittance gold thermal control coatings on aerospace structures
15 p2618 A69-30310

Variational principles and differential equations of thin elastic panels mechanics for aerospace structures
15 p2712 A69-30974

Static, transient and in-space environmental tests at satellite structures and heat shield test facilities in Italy
16 p2765 A69-31750

Scientific satellites structural design problems, considering limitations imposed by weight, layout, environmental conditions, mission and manufacture
18 p3208 A69-34792

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments
18 p3198 A69-34795

Kennedy Space Center Vehicle Assembly Building construction, capacity and operation for manned spacecraft
19 p3288 A69-35500

Composite material applications in space vehicle structures, noting strength and stiffness of boron fibers in plastic or metal matrices
19 p3340 A69-35502

Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
19 p3340 A69-35504

Environmental testing of space hardware, discussing failure detection by thermal vacuum tests and mechanical signature analysis
19 p3430 A69-36009

Finite element techniques of structural analysis for missile and space structures, including Apollo computerized analysis and structural optimization
19 p3438 A69-36324

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems
21 p3818 A69-38621

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem
21 p3717 A69-39656

Boron and carbon reinforced composite materials aerospace structural application, discussing weight savings, components structural design and connection and load input problems
22 p4038 A69-39908

Seals leak testing for complex manned spacecraft structures
[AIAA PAPER 69-1030] 22 p3924 A69-40399

Spacecraft booms thermally induced vibration and flutter, considering damping and solar exposure effects
22 p4043 A69-40545

Metallurgical and structural production of diffusion bonded titanium honeycomb sandwich panels for aerospace hardware weight saving
24 p4324 A69-43434

Heat conduction problems associated with radiant exchange in shells under discontinuous solar flux, considering spacecraft structures, illumination theory and astrophysics
24 p4416 A69-43689

SPACECRAFT TELEVISION
NT SATELLITE TELEVISION

Spacecraft device for photographing and transmitting TV pictures noting limitations and spatial conditions adaptations
02 p0207 A69-11829

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position
[SMPTE PAPER 105-71] 12 p2078 A69-25771

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations
[SMPTE PAPER 105-72] 12 p2078 A69-25772

Apollo 8 photooptics, considering TV camera and broadcasts, photographic equipment and visual observation
15 p2609 A69-30469

Apollo 10 field sequential color TV system, describing camera modifications, systems design and equipment compatibility problems
18 p3101 A69-34810

Mars TV pictures from Mariner 7, describing prominent surface features
21 p3806 A69-39330

Surveyor spacecraft instrumentation, describing TV camera design and operation, photographic requirements and techniques, lunar surface characteristics, etc
22 p4011 A69-40043

Mariner Mars 1969 TV system environmental test and calibration program
22 p3920 A69-40372

Lunar TV camera for Apollo missions, discussing operational requirements and design
23 p4162 A69-41478

Mariner 6 and 7 TV data, discussing implications for Mars present state, past history and biological status
24 p4384 A69-43195

SPACECRAFT TRACKING
NT SATELLITE TRACKING

Optical spacecraft tracking organization in U.S.S.R., describing network of visual observation and photographic stations for satellite and space probe tracking
01 p0032 A69-10952

Optical correlator for fast acquisition of pseudorandom ranging codes, giving code delay estimation to synchronize local code generator of delay-lock loop
03 p0389 A69-13186

Deep space tracking network development, discussing capabilities and operational quality assurance
07 p1078 A69-18831

Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
07 p1081 A69-19101

Spacecraft tracking network for determining spacecraft motion parameters, noting application to coordinates and velocities determination for terrestrial observers
07 p1087 A69-19609

Processing of data obtained in continuous tracking of space objects using computer algorithms
10 p1791 A69-24193

Apollo Range Instrumented Aircraft /ARIA/ telemetry antenna system for trajectory tracking, discussing computer program for simulation of behavior
11 p1840 A69-25309

Phased array radar system for UHF detection, identification and tracking of orbiting objects and ballistic missiles, noting system design and hardware
12 p2028 A69-25906

Electromagnetic and plasma waves scattering by space vehicle excited by ground source in isotropic warm plasma, obtaining radar cross sections
13 p2221 A69-27965

Baker-Nunn photometry from Apollo tracking utilizing photographs for brightness, dynamics and duration of rocket exhausts and venting clouds
15 p2571 A69-31338

Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
17 p2919 A69-33371

Navigational accuracy dependence on spacecraft geometry, determining information content and critical error sources of earth based Doppler radio tracking data
[AAS PAPER 69-112] 19 p3402 A69-35935

Continuously powered deep space vehicle orbit determination, discussing state estimation accuracy and use of continuous data filtering
[AAS PAPER 68-144] 19 p3402 A69-35939

Digital computer controlled antenna positioning system computing spacecraft tracking trajectory from given parameter input set
19 p3267 A69-35997

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases
[AIAA PAPER 69-899] 21 p3761 A69-39334

SPACECRAFT TRAJECTORIES
NT CIRCUMLUNAR TRAJECTORIES
NT EARTH-MARS TRAJECTORIES

NT EARTH-MOON TRAJECTORIES
NT INTERPLANETARY TRAJECTORIES
NT LUNAR TRAJECTORIES
NT MOON-EARTH TRAJECTORIES

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors
01 p0161 A69-10569

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt
01 p0113 A69-10571

Low thrust spacecraft motion continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption
01 p0113 A69-10572

Spacecraft trajectories computation from initial conditions by techniques involving construction of N body reference orbit
03 p0518 A69-14248

Minimum fuel consumption for low thrust jet engine propelled space vehicles maneuvering in circular trajectories
05 p0829 A69-15879

Algorithms construction for aerospace vehicle trajectory optimization, considering quasi-linearization method for computation of variable time optimum trajectories
06 p1006 A69-17569

Space vehicle trajectory optimization using computerized step by step steepest descent to minimum cost, considering cost gradient vs control
06 p1006 A69-17570

Spacecraft trajectory during atmospheric reentry determined from projections of longitudinal acceleration onto coordinate axes connected with spacecraft
06 p1014 A69-17581

Free fall vehicle dynamics for wind tunnel measurements of research shapes used in computer simulation of vehicle trajectories
[AIAA PAPER 69-229] 06 p0864 A69-18130

Observability theory of dynamic objects application to composing measurements for space flights, solving parametric observability problem
07 p1087 A69-19605

Coordinates and velocity components accuracy for artificial earth satellite moving in central Newtonian field, covering elliptic and circular orbits
07 p1178 A69-19606

Composition effect of flight path measurements on correction of space vehicles flight path, discussing single parameter correction of motion in force free field
07 p1178 A69-19607

Three dimensional atmospheric entry trajectories equations for satellite with aerodynamic lift, examining aerodynamic factors and bank angle effects
07 p1230 A69-19608

Spacecraft tracking network for determining spacecraft motion parameters, noting application to coordinates and velocities determination for terrestrial observers
07 p1087 A69-19609

Spacecraft trajectory using microthrust and lunar gravitational attraction for acceleration into heliocentric orbit
09 p1593 A69-21620

Spacecraft trajectory optimal determination without knowing measurements error distribution function, examining computer solution properties of linear programming
09 p1595 A69-21757

Minimum time turns for spacecraft about fixed axis lying beyond plane of vehicle forces
09 p1609 A69-21760

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data
09 p1495 A69-21764

Planar motion of satellite containing damping mechanism, considering small dampers case
10 p1791 A69-22935

Earth gravitational field effect on satellite orbits, noting elliptical motion in central force field, energy criteria and rotational ratios
10 p1776 A69-23295

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust
13 p2356 A69-27686

Canonical transformation and Hamilton-Jacobi theories applied to space vehicle trajectory analysis, discussing elliptical coast arc and optimal low thrust problems
13 p2353 A69-28202

SPACECREWS

Spacecraft motion parameters determination under controlled acceleration using information from inertial sensors 15 p2702 A69-30739

Optimum control determination for low thrust spacecraft to minimize time for passing through radiation belt 15 p2651 A69-30741

Low thrust spacecraft action continuous correction by dynamic programming, assuming continuous information on system state including fuel consumption 15 p2651 A69-30742

Generalized Fourier analysis for satellite motion deviations from arbitrarily chosen reference orbit generated analytically or numerically, determining equations for potential coefficients 15 p2697 A69-31323

Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times 16 p2857 A69-32154

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments 18 p3198 A69-34795

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass 19 p3431 A69-36616

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials 19 p3427 A69-36627

Computation method for optimum finite thrust space trajectories based on approximation of state time history by polynomial [AAS PAPER 68-080] 20 p3595 A69-37170

Liapunov stability theory for motion of spacecraft with flexible and moving parts in force free space [AAS PAPER 68-125] 20 p3617 A69-37180

Space vehicle space-time position fiducial distribution and future location determinations based on inference theory 20 p3617 A69-37528

Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics [AIAA PAPER 69-903] 21 p3798 A69-38546

Optimal transfer between coplanar elliptical orbits of spacecraft with combined small and large thrust propulsion system 21 p3803 A69-38848

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions [AIAA PAPER 69-905] 21 p3806 A69-39337

Analytic approximation for initial adjoint vector for optimal/minimum propellant/space trajectories [AIAA PAPER 69-916] 21 p3808 A69-39345

Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method [AIAA PAPER 69-917] 21 p3808 A69-39346

Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting [AIAA PAPER 69-932] 21 p3809 A69-39361

Spacecraft descent trajectory optimization during atmospheric reentry, proposing algorithm for continuous trajectory determination 21 p3766 A69-39647

Flight dynamics boundary value problem for spacecraft trajectories optimization, using variational method 21 p3817 A69-39817

Controlled motion of space vehicle about center of mass analyzed by equation expressing nutation angle invariance 21 p3830 A69-39839

Real time orbit determination system at NASA manned space center for Apollo missions [AIAA PAPER 69-938] 22 p4020 A69-40321

Interactive graphics system for rocket vehicle trajectory simulation and performance analysis [AIAA PAPER 69-954] 22 p3905 A69-40336

Grobner method of Lie series applied to numerical integration of spacecraft trajectories and n-body problems 23 p4223 A69-42476

Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions [AAS PAPER 69-258] 24 p4380 A69-42860

Meteoroid shower model for interplanetary flight hazard evaluation, suggesting shower zone defining on ecliptic plane 24 p4385 A69-43258

Fractional correction procedure for indirect trajectory optimization through extremal trajectory meeting boundary conditions 24 p4386 A69-43264

SPACECREWS

Man as main component of future spacecraft or planetary station closed ecological system, discussing spacecrew physiological monitoring for biological cycles optimization 01 p0020 A69-11076

Legal and technical aspects of international cooperation in spacecraft crew rescue operations signed by UN General Assembly 06 p1042 A69-17033

Optimum physiological parameters selection criteria for medical control of crew during space flights 07 p1071 A69-18978

Permissible irradiation doses established for spacecraft crews making short and long flights, considering roles of life span, somatic effects, leukemia and genetics 07 p1069 A69-19618

Computer program for onboard medical checkups of spacecraft crews during extended space flights, discussing tests and intervals 10 p1649 A69-23505

Admissible radiation doses for space crews and ionizing radiation protection, studying long term radiation effects on dogs 15 p2557 A69-31344

Biological effects of cosmic radiation on crewmen and protection measures, noting ground radiobiological and medical hygienic investigations 20 p3478 A69-37628

Optimum physiological parameters selection criteria for medical control of crew during space flights 20 p3483 A69-38226

Representative data of actual forces and moments applicable to large spacecraft attitude control system for typical crew activities obtained through simulation programs [AIAA PAPER 69-1006] 22 p3921 A69-40380

Crew survival ensurance under emergency situations during manned space flight, discussing Apollo abort system refinements [AAS PAPER 69-469] 24 p4272 A69-42848

SPACING

AIRCRAFT APPROACH SPACING

Dynamic programming application to synthesis of unequally spaced symmetrical antenna arrays 02 p0219 A69-12338

Optimum spacing of communication satellites on inclined circular synchronous orbits, applying figure 8 packing schemes 04 p0562 A69-15458

Synthesis of symmetrical linear array space factors in main beam and grating lobes by spacing distributions and element excitation adjustment 07 p1108 A69-19466

Performance prediction for planar and cylindrical electrode geometry fixed spacing thermionic converters 09 p1438 A69-21814

Zero crossing statistics measurements for 1/f noise, noting statistically stationary character of probability density distributions of interval spacings between zero crossings 10 p1656 A69-23657

Thinned arrays design based on array excitation autocorrelation function, considering element spacing 11 p1856 A69-25661

Transverse wave spacings for self sustaining detonations in oxygen and diluents mixtures with hydrogen, methane, acetylene or ethylene fuel, noting dilution 13 p2378 A69-28217

Three antenna interferometer angle measurement accuracy dependent on antenna spacing, deriving optimal spacing value 16 p2758 A69-31730

SPAIN

Solar activity /Madrid 1967/, detailing Wolf numbers, sunspots, chromospheric faculae, H filaments and prominences 18 p3202 A69-35290

SPALLATION

Cosmic-ray-produced stable and long-lived nuclides in iron meteorites, considering shielding effect on spallation production 19 p3411 A69-36099

K 40-Ar 40 age measurements in separated mineral phases of chondrites, including production rates of spallation isotopes 19 p3418 A69-36137

Spallogenic rare gas concentrations and isotopic ratios in taenite of iron meteorites measured mass spectrometrically and compared with kamacite values 19 p3419 A69-36139

SPALLING

Time dependence criterion in dynamic fracture determined by spall stress relation to stress pulse duration during plate impact 10 p1803 A69-24032

High purity beryllium dynamic tests, determining Hugoniot equation of state, shock profile and spall threshold /onset of microcracking/ for elastic pulses [AIAA PAPER 69-360] 13 p2283 A69-28293

SPARE PARTS

Manned spacecraft systems design optimization for extended space missions replacement modules 05 p0830 A69-16380

Spare kit evaluation model for problems with constraints on spare parts quantities, considering optimization and simulation routines for weapon system maintenance 10 p1669 A69-22981

Steady state availability of system with limited repairable spares for online units, considering statistical dependence among similar units 18 p3144 A69-34493

SPARK CHAMBERS

Spark chambers for primary cosmic ray study in balloon flights, detailing construction and performance 06 p0924 A69-17285

Instruments for gamma ray astronomy including Ranger low energy detector, howitzer detector and cosmic spark chamber 18 p3138 A69-35135

SPARK DISCHARGES

ELECTRIC SPARKS

SPARK GAPS

High speed shadow photographs of Q switched laser triggered spark gap air discharge, showing sonic waves and development of discharge channel 04 p0610 A69-14349

Pressurized spark gap triggered by focused Q switched laser beam introduced along axis 04 p0612 A69-15204

Electronically controlled spark gap system for HF optical frame separation based on Cranz-Schardin principle 05 p0763 A69-15985

He-Ne laser with small spark gap optimum parameters dependent on active medium and resonator field structure 06 p0935 A69-17683

Spherical and rod-plate spark gap response voltage as function of sawtooth wave, cosmic, gamma and UV radiation 11 p1851 A69-25086

RLC integrated low inductance circuit for magnetooptical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap 12 p2084 A69-26149

Spark gap protection of input transistors in radio receivers against antenna-collected static charge damage 21 p3681 A69-38395

SPARK IGNITION

Spherical flames of spark-ignited dust clouds, discussing streak film photographs, flame propagation, particle burnout time and burning velocities 02 p0353 A69-12323

Laser induced breakdown spark ignition of detonable and nondetonable chemically reactive gas mixtures, noting blast waves [AIAA PAPER 68-146] 09 p1622 A69-21951

Spark ignition of liquid fuel droplets atomized in air analyzed by spark discharge visualization for two phase mixture 09 p1623 A69-22220

Steady propagation of flame front initiated by local ignitor /spark/ in gas mixture, discussing critical requirements, boundary conditions, etc 11 p2001 A69-25190

Aircraft fuel vent line sensitivity to lightning hazards, using flame propagation and arrester experiments with high voltage and high current facilities [SAE PAPER 690434] 23 p4062 A69-41651

SPARK MACHINING

- Electroerosion effect on fabrication of small disks for direct examination by electron microscopy, using refined and heat treated aluminum
03 p0427 A69-12880
- Beryllium chemical and mechanical machining in quantity production, examining salvage and safety precautions
[SAE PAPER 680649] 03 p0434 A69-13455
- Statistical analysis of operation of precision electric spark machine servosystems with RC generator based on working pulse peak voltage distribution
23 p4168 A69-41307
- Automation of single pass electric spark machining of high alloy steels and hard alloys, including anodic-mechanical profiling, cutting and drilling
23 p4168 A69-41308

SPARK PLUGS

- Aircraft engine spark plugs development, reviewing ceramic and mica insulated plugs and four pole electrode spark plugs
13 p2324 A69-27333

SPARK SHADOWGRAPH PHOTOGRAPHY

U SHADOWGRAPH PHOTOGRAPHY

SPARKS

NT ELECTRIC SPARKS

- Laser produced sparks in 200 kG magnetic field in air, butane and helium at atmospheric pressure
02 p0260 A69-12659
- Radiative flux density, spectrum and temporal behavior of Q switched laser induced underwater sparks
05 p0771 A69-15818
- Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation
14 p2461 A69-29779
- Shadow photography study of electrical discharge set off by laser spark
21 p3740 A69-39552
- Slow combustion laser spark at intensity below optical breakdown obtained by focusing radiation pulse of Nd glass laser in discharge gap
23 p4172 A69-41492

SPATIAL DEPENDENCIES

- Spatial and temporal dependence of trapped particle energy spectra on basis of bimodal diffusion
16 p2852 A69-32619
- Scale determination in spatial direction networks, using polygonal transverse measured along continental surfaces and Secor method over water surfaces
18 p3131 A69-35196

SPATIAL DISTRIBUTION

NT STAR DISTRIBUTION

- Spatial and kinetic distributions of molecules reflected by surface in rarefied atmosphere, discussing mathematical model
01 p0122 A69-10041
- H alpha emission symmetrical spatial distribution of night airglow observed with high transmission diffraction spectrographs
01 p0062 A69-10128
- Three dimensional holography using scatter plates applicable to transilluminated objects in particular distribution of particles or phase disturbances
01 p0079 A69-10217
- Meteorite scattering in geogravitational field and influence on lunar meteorite precipitation distribution
01 p0153 A69-10756
- Meteor grouping in meteor streams analyzed using radar records of meteor showers
01 p0154 A69-10873
- Midlatitude sporadic E layer vertical and horizontal structure and statistical properties, discussing theory of ion concentration by wind shear
01 p0073 A69-11177
- Soviet book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion
02 p0255 A69-11800
- Charge image detector for reading information as extended spatial charge distribution on dielectric layer surface, using vibrating conducting probe scanner
02 p0248 A69-11822
- Dipole antenna current distribution, deriving simple, accurate formula for infinite, semiinfinite and finite cases
02 p0218 A69-12330
- Gegenschein measurements for determining upper limit on asteroidal debris spatial density
02 p0324 A69-12545

Spatial variations in particle intensity near and inside magnetosphere during September 1966 solar cosmic ray events, noting magnetosphere screening effectiveness
02 p0309 A69-12740

Refractivity distribution at ground level and at one km over India, correlating surface refractivity with difference, noting seasonal and diurnal variations
03 p0393 A69-13304

Dipole model of geomagnetic field in terms of spatial distribution of vertical component, discussing computer program for calculating rectangular components
03 p0424 A69-13544

Geometric optics for media with spatial dispersion, describing procedures for equation solution
03 p0467 A69-13718

Spatial autocorrelation functions of amplitude and phase fluctuations in plane parallel to wavefront of incident wave for conditions of multiple scatter
03 p0468 A69-13807

Plasma density spatial distribution determined from HF electromagnetic wave phase shifts without assuming axisymmetry
03 p0480 A69-14138

Ring laser field space-time pattern from light waves scattered at discontinuities, discussing equations of motion of solid state laser
03 p0441 A69-14140

Photographic recording to produce spatial analog of temporal Fourier spectrum of astronomical source used for distinguishing weak periodic signal from background signal
04 p0556 A69-14294

Spatial distribution of background magnetic fields of quiet sun from photoelectric magnetograph observations, noting relation to supergranulation
04 p0663 A69-15396

Origin of binaries from angular momentum vectors orientation and separation distribution
05 p0822 A69-15856

Spatial and temporal conjugacy of visual auroras during magnetically quiet periods
05 p0753 A69-16247

Pulsars, noting clusters associated with spiral arm tangential points, anomalous distribution and possible association with galactic disk or spiral arms
05 p0825 A69-16356

Radio sources quantity dependence on radio emission value, noting determination of spatial density variations of radio galaxies
05 p0826 A69-16426

Sounding energy optimum spatial distribution during scanning and detection of several signals, noting reduction of mean energy losses
05 p0723 A69-16786

Cyclotron instability of outer radiation belt protons, taking into account data on spatial distribution and ion composition of exospheric plasma
06 p0919 A69-17721

Pc5 geomagnetic pulsations spatial characteristics, showing localized excitation in space and dependence on geomagnetic latitude
06 p0921 A69-17736

Mathematical theory of electromagnetic induction for spherical model of earth with conductivity distribution given by sine function
06 p0921 A69-17739

Spatial structure of residual anomalous magnetic field, determining parameters of eccentric horizontal dipole as main source of geomagnetic field
06 p0922 A69-17755

Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles
06 p0981 A69-17878

Cosmic radio noise brightness distribution in Southern Hemisphere at 10.02 MHz, noting spectra of sources observed
07 p1206 A69-19272

Cosmological models with antipole, determining models consistent with spatial distribution of quasars and radio galaxies
07 p1219 A69-19284

Noncoherent scattering of atoms with Maxwellian distribution in moving atmosphere, discussing Doppler broadening expansion in Legendre polynomials
07 p1219 A69-19286

Primordial magnetic field effects on spatially homogeneous cosmological models with anisotropic Euclidean metric
08 p1383 A69-20049

Radio interferometer antenna array spatial characteristics obtained as function of geographical coordinates of site for reducing observation errors
08 p1314 A69-20434

Spatial distribution and temporal variation measurements of magnetic fields in plasma, emphasizing pulsed discharges
08 p1364 A69-20472

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems
09 p1589 A69-21368

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars
09 p1590 A69-21381

Spatial distribution of velocity, spatial correlation and ergodicity of turbulent flow, using spectrum of intensity fluctuations of scattered laser light
09 p1493 A69-21491

Analytical description of planetary distribution of space-time variations of f0F2, deriving Fourier series as function of UT
09 p1486 A69-21545

Cloud seeding effects due to inhomogeneous distribution of freezing nuclei, discussing silver iodide distributions by Gaussian plume diffusion model
09 p1535 A69-21639

Rotation and mass of Sb galaxy NGC 1832, giving central and mean densities
09 p1599 A69-22188

Enthalpy distribution in plasma tube arc heater inlet flow region with hot and cold gas core boundary in presence of electric field
09 p1553 A69-22538

Charged particles motion in geomagnetic field from analyzing spatial distribution within framework of two dipole magnetosphere model
10 p1756 A69-22818

Interstellar reddening material distribution within 2500 parsecs of sun, noting concentration in galactic plane, spiral arms and cloud complexes
10 p1773 A69-22961

Galactic structure and space distribution of known Classical Cepheids, noting interstellar absorption and variation of period with distance to galaxy center
10 p1773 A69-22962

Spatial distribution of residual nuclei produced in thick Fe targets by one and three Gev protons, noting total production and longitudinal variation of production
10 p1760 A69-23411

Energetic proton and electron fluxes spatial gradients after July 7, 1966 solar flare, noting satellite observations and injection mechanism geometry
10 p1767 A69-23767

Structure dynamic response for motion through homogeneous frozen random load field with spacewise variations, applying analysis method to beam
[ASME PAPER 69-VIBR-38] 10 p1807 A69-24176

Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law
11 p1955 A69-24390

Geomagnetically trapped particle loss processes and equilibrium distribution resulting from MHD wave field interaction described using sandbox model
11 p1948 A69-24856

Holographic reconstruction of spatial distribution of laser light field within and outside resonator, noting suitability for pulsed laser analysis
11 p1885 A69-24919

Aircraft dynamic response to three dimensional turbulence, establishing unique correspondence between spatial symmetry properties of ambient fields of turbulence and aircraft
11 p1823 A69-25503

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam
11 p1933 A69-25542

Nonuniform standing wave fields spatial distribution in active rod of ruby laser effects on laser radiation dynamic parameters, discussing radiation spectrum width
11 p1901 A69-25756

Observed frequencies of number of members in multiple systems of galaxies
12 p2156 A69-26222

Laser interferometer determining spatial distribution of neon metastable state in He-Ne active discharge, discussing lens effects
12 p2108 A69-26636

Kinetic equation solved for radiation propagation in atmosphere, considering neutron density variations and spatial distribution
12 p2149 A69-26683

SPATIAL DISTRIBUTION

- Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production 12 p2145 A69-26723
- Unified model for spatial distribution of transpolar exospheric electron density for polar plasma study 12 p2151 A69-26952
- Galactic and quasar radio sources distribution, discussing spectral indices 12 p2166 A69-27036
- Quasar properties from cosmological nature, discussing red shift, luminosity, radiation intensity, absorption features, distribution, chemical composition, etc 12 p2168 A69-27049
- Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra 12 p2131 A69-27072
- Galactic force law from observed stellar velocity and space density distribution 13 p2348 A69-27802
- Stellar densities and luminosity function determined from stellar data concerning sphere with 20 pc radius around sun 13 p2351 A69-27869
- Spatial density distribution and local values of attenuation of pulsed reflex discharge plasma determined from measured attenuation of microwave beam 13 p2312 A69-28112
- Half wave dipole antenna operational factors analyzed for RF radiation spatial power distribution from atmospheric cosmic ray showers 13 p2332 A69-28408
- Spatial harmonic spectrum and tangential field distributions in microwave devices showing separation of higher harmonics through delay structure 13 p2236 A69-28576
- Spatial distribution patterns of gaseous argon atoms scattered from solid argon surface 13 p2300 A69-28658
- Distribution characteristics of radiation defects in materials irradiated by monoenergetic beams of protons and alpha particles 14 p2503 A69-28787
- Asymmetric spherical temperature field reconstruction based on measuring temperature and derivatives at two points of field 14 p2537 A69-28888
- Frequency selection, spectral index distributions and counts of extragalactic radio sources 14 p2518 A69-29134
- Orientation distribution of lineal and areal elements in space, expanding density function definition of two dimensional lineal array 14 p2470 A69-29363
- Galactic anticenter region surveyed at 13.1 MHz, observing ionized hydrogen concentrations in galactic plane 14 p2519 A69-29370
- 21 cm line emission surveyed for spatial distribution of random velocities of neutral hydrogen in solar neighborhood 14 p2520 A69-29371
- Polar auroras temporal and spatial variations and relation to solar activity 14 p2442 A69-29719
- Relation between radar echoes spatial extent and synoptic conditions with reference to various fronts, noting significance for aviation 14 p2474 A69-29738
- Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source 14 p2451 A69-29777
- Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes 14 p2497 A69-29792
- Spatial correlation function of Northern Hemisphere geopotential, using model based on random distribution of potential vortex fluctuations for atmospheric circulation 14 p2476 A69-29822
- Interstellar radio absorption influence on spatial distribution of cosmic radio emission observations with fixed multiple dipole antenna arrays 15 p2687 A69-30545
- Earth reflected solar radiation spatial, angular and spectral distributions measured by telephotometers on-board Cosmos 149 15 p2596 A69-30650
- Global multielement radio interferometer with autonomous reception synthesized for studying spatial radio brightness distribution over radiation sources 15 p2578 A69-30936

- Radio interferometer with independent heterodynes to obtain radio brightness distribution over source by varying antenna spacing and reception frequency 15 p2578 A69-30937
- Charge sign ratio of primary cosmic ray electrons measured by balloon flown multiplate spark chamber, studying east-west asymmetry 15 p2678 A69-31497
- Spatial distribution of stellar densities and velocity distributions in phase space, using Greenwich catalog of positions and proper motions of omega Centauri cluster stars 16 p2859 A69-32220
- Cumulonimbus clouds phase structure and spatial distribution based on radar signal polarization analysis, showing high nonuniformity and variability 16 p2806 A69-32266
- Galaxies clusters spatial distribution based on crude distance estimates, discussing serial correlation of counts and interpreting results 16 p2862 A69-32371
- Collisional equilibrium and nonuniform formation models for spatial gradient development of early afterglow of He plasma molecular excited state densities 16 p2782 A69-32465
- Analytical description of planetary distribution of space-time variations of f0F2, deriving Fourier series as function of UT 16 p2783 A69-32540
- Laser emission spatial structure transformation determined from ratio between focused spot radius and distance between lens and output mirror 17 p2981 A69-33111
- Spatial frequency distribution of linear array with randomly located elements from probabilistic analysis 17 p2929 A69-33873
- Meteoritic matter distribution by calculating orbital elements of 12,500 meteors from radar data, using diversity reception for radio waves scattered at meteor trails 17 p3041 A69-33894
- Geomagnetic disturbances intensity spatiotemporal distribution at Northern Hemisphere high latitudes during IGY and IQSY 17 p2965 A69-33966
- Space diversity reception and diurnal variations of F region ionospheric motions, comparing IQSY program 17 p2969 A69-33999
- Laser eigenmodes determined iteratively from eigenvalue equation including spatial inversion inhomogeneities, atomic density and local loss 17 p2984 A69-34046
- Spatial structure of solar proton flare of 5 April 1960, discussing top ascending emission filament velocity in H alpha and coronal lines 17 p3025 A69-34224
- H II regions distribution in nearby irregular I galaxies, attributing asymmetry to localized bursts of star formation 18 p3190 A69-34289
- Linear isotropic elastic continuum dislocations distribution, deriving transport equations by statistical methods, noting analogy between energy/ momentum and MHD equations 18 p3212 A69-34352
- Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems 18 p3198 A69-34757
- Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars 18 p3198 A69-34769
- Ruby laser stimulated emission spatial, temporal, energetic and spectral characteristics during disruption in spherical cavity containing strongly scattering medium 18 p3152 A69-35026
- Laser emission during disturbed quasi-equilibrium, considering emission spatial inhomogeneity due to arbitrary radiative transitions 19 p3333 A69-35876
- Butterfly diagram of sunspot distribution, concluding physical processes not yet clarified 19 p3426 A69-36583
- Spatiotemporal contours of pressure pulses emitted into surrounding fluid by collapsing cavitation bubble, using schlieren-optical observation method, electroacoustical detection device and microphone 19 p3302 A69-36870
- Lower ionosphere geomagnetic field local gradients determination by partial reflection method 20 p3522 A69-37055
- IC 4499 cluster variable stars coordinates in tabular form, showing high percentage of short period 20 p3598 A69-37462

- Open cluster NGC 7128 distance and reddening determination by photometry 20 p3598 A69-37465
- Photogrammetric instruments applied to determination of spatial position of tectonic surfaces by aerial photography 20 p3539 A69-37511
- Time-space variations in occurrence probability of ionospheric E-2 layer during solar activity maximum and minimum 20 p3527 A69-37672
- Neodymium glass laser emission spatial characteristics, investigating higher laser modes excitation 20 p3554 A69-37725
- Arbitrary circle distribution in plane transformed to corresponding distribution of spheres in space for size and shape distribution determination of disperse phase 20 p3627 A69-37764
- Universal hydrogen distribution, discussing atomic hydrogen needed to close universe 20 p3610 A69-38140
- Satellite-anomalous OH radio emission sources, observing spatial distribution and Stokes parameters 20 p3610 A69-38146
- Autoradiographic technique for spatial distribution in solid of B at ppm concentration, using electron microscope 20 p3567 A69-38263
- Steady state atomic He distribution according to solar atmosphere levels, involving formulation and solution of equilibrium equations for single and triplet levels 20 p3615 A69-38298
- Energy spectrum, spatial characteristics and displacements of auroral zone X rays from X ray spectrometry 21 p3787 A69-38359
- Vertical neutral wind measurements in lower E region with wavelike spatial structure, noting vertical shear role in ionosphere dynamics 21 p3703 A69-38363
- Auroral electron and proton fluxes precipitation measurements by satellite, studying data in terms of spatial, energy and angular distributions 21 p3709 A69-38500
- Radio source counts from cosmological standpoint, discussing terrestrial location relative to quasars 21 p3802 A69-38828
- Spatial dispersion of HF dielectric constant in semiconductor based on electron-hole pair production 21 p3781 A69-39136
- Harrison primordial inhomogeneity postulate concerning baryon numbers distribution in universe, precluding possibility of considering cosmic rays bulk as universal 21 p3810 A69-39469
- Amplification saturation in spatially inhomogeneous laser field, relating power to active medium and resonator parameters 21 p3740 A69-39549
- EEG patterns computerized spatio-temporal display technique using CRT and motion picture camera 21 p3668 A69-39864
- Spatial gradient and amount of auroral radio absorption measured by riometers at magnetically conjugate and closely spaced stations 22 p3934 A69-39966
- Spin compensated state of localized magnetic impurity moment in space, calculating size range of magnetic impurity spin/conduction electron spin correlation function 22 p3983 A69-40061
- Space density of giant M stars as function of distance at galactic anticenter 22 p4014 A69-40125
- Spatial distribution of amplitude and onset of premonition positivity, readiness and motor potential changes in human cerebral cortex preceding voluntary finger movements 22 p3875 A69-40261
- Spatial coherence of He-Ne laser radiation diffused by turbid medium calculated by using diffraction and interference measurements 22 p3964 A69-40798
- Spatial interactions and thresholds in identification and detection of compound visual stimuli 22 p3883 A69-40878
- Radioactive debris distribution in space from 9 July 1962 thermonuclear explosion over Johnston island recorded by Cosmos 6 satellite 23 p4205 A69-41836
- Pulsars dispersion measure and distance relationship, particularly for Crab Nebula pulsars 23 p4220 A69-42381

Solar flares spectra X ray portion, considering spatial distribution, relation to magnetic fields and time sequence of emitting region
24 p4366 A69-42688

Differential solar rotation noting strong quasi-kineticity effect on solar convective zone and rotation influence on viscosity tensor and rotation law
24 p4390 A69-43780

SPATIAL FILTERING

Spatial filtering effectiveness determination by equivalent spatial operations, deriving expression for SNR
01 p0052 A69-10799

Laser Doppler meter model interpreting output frequency in terms of particle crossing set of fringes
06 p0932 A69-16927

Blurred spaceborne photographic image reconstruction by spatial frequency filtration
[UN PAPER 68-95240] 06 p0923 A69-17080

Two dimensional signal analog correlation in noise background using optical spatial filtering Fraunhofer hologram and input as functions
09 p1499 A69-22276

Complex spatial filtering by holographic Fourier transform subtraction
10 p1690 A69-22953

Typographical spatial correlation filtering methods for reconstructing holographic images with ultrasonic waves, noting application to flaw recognition
10 p1696 A69-23551

Electron beam addressed electrooptic light valve used as spatial filter, discussing electronic control and optical processing in real time
10 p1697 A69-23870

Lenses spherical aberration role in studying laser induced breakdown of gases, considering intense ionization collinear regions multiplicity along optic axis
15 p2634 A69-30878

Restoration of photographic images by optical spatial filtering with least mean square error filter in presence of random additive noise
15 p2611 A69-31033

Holographic method of a posteriori restoration of images formed by coherent and incoherent light by spatial frequency retrieval
19 p3304 A69-35603

System components for spatial discrimination implementation scheme, discussing IR detector arrays and optical imagery processing
19 p3373 A69-36055

Mechanical collimator using random aperture arrays for celestial observation at extreme UV and X rays
19 p3313 A69-36489

Image deblurring and aperture synthesis using a posteriori processing by Fourier transform holographic spatial filtering
21 p3722 A69-38793

SPATIAL ISOTROPY
U ISOTROPY

SPATIAL ORIENTATION
U ATTITUDE [INCLINATION]

SPECIES DIFFUSION

Micrographic reagent coloring grains of Mo in relation to crystalline orientation applied to refractory metal welding and diffusion studies
14 p2505 A69-29221

Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
19 p3313 A69-36490

SPECIFIC HEAT
NT HEAT OF SOLUTION

Posistors heat capacity investigated as temperature function, showing maximum heat balance corresponds to Curie temperature
01 p0038 A69-10098

Specific heats of Cu, GaAs, GaSb, InAs and InSb measured over low temperature ranges
01 p0140 A69-11252

Temperature dependence of thermal conductivity coefficient and specific heat of sublimating heat proof materials
02 p0350 A69-11580

Graphite specific heat temperature dependence at low temperatures, noting Wigner effect for neutron irradiation
02 p0269 A69-11782

Thermal contact rectangle with single side heat capacity, applying Fourier transform and Abel convergence tests
03 p0533 A69-13863

Heat capacity of diamond-like semiconducting Si, GaAs and GaP calculated on basis of quasi-chain dynamics of covalent crystals
03 p0490 A69-13943

Adiabatic elastic constants of molybdenum-rich rhenium alloys, studying concentration effects on bulk modulus, Debye temperatures and interatomic forces
04 p0613 A69-14455

Heat capacity at constant volume determined for nitromethane, trinitrotoluene and difluoramine alitanes
[WSCIPAPER 68-39] 07 p1202 A69-18368

Vanadium monoxides and oxycarbides heat capacity using adiabatic calorimeter, calculating entropy, enthalpy and characteristic temperatures
09 p1523 A69-21739

Specific heat dependence of beryllium at low temperatures on sample impurities, considering Debye temperature
09 p1527 A69-22399

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator
10 p1636 A69-23103

Specific heats of oxygen at coexistence from triple point to critical point and corresponding values for liquid phase
10 p1808 A69-23187

Tabulating experimental constant volume specific heats of fluid oxygen from triple point to 300 K at pressures to 350 atm
10 p1808 A69-23188

Anharmonic lattice vibrations, specific heats and coefficient of linear expansion of solids at high temperatures, noting interatomic spacing
10 p1809 A69-23653

Specific heat of electron gas at temperatures approaching absolute zero, using method of displacements and collective variables
11 p1927 A69-24918

Specific isochoric heat capacity of pure fluids, considering thermal equation of state, vapor pressure and boundary conditions at critical point
11 p2001 A69-25201

Low temperature specific heat of praseodymium magnesium nitrate
12 p2026 A69-25784

Rigid heat conductor in continuum thermodynamics, discussing conductivity tensor symmetry and heat capacity positivity as restrictors
13 p2377 A69-28193

Half maximum temperature of diatomic gases determined by extending relation between specific heat and molecular dissociation to diatomic molecules
[DVL-899] 15 p2656 A69-31102

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components
16 p2732 A69-32126

Linear high polymer heat capacities by adding contributions from chain segments, deriving table of heat capacity contributions of polymer constituents
19 p3359 A69-36287

Shock wave parameters from meteoric body moving at high supersonic speeds through atmosphere, calculating specific heat ratio
19 p3428 A69-36841

Ammonium perchlorate experimental heat capacity data significance for rotational freedom of ammonium ion
20 p3484 A69-37344

Enthalpy and heat capacity of high melting point homogeneous Ti, Zr and Nb carbides, analyzing influence of Me-Me bonds and carbon sublattice defects
21 p3742 A69-38614

Metals conductivity under high pressure, giving theories for electrons scattering cross sections on ions and for Debye temperature
22 p3980 A69-40187

Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162

Thermal conductivity and specific heat of groups of liquid substances as functions of temperature, giving curves, tables and conversion factors
23 p4238 A69-41336

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack
23 p4058 A69-41579

Computer calculation of adiabatic expansion of air, allowing for specific heat ratio and compressibility factor changes
24 p4244 A69-43088

SPECIFIC IMPULSE

Mixture ratio distribution, injector/chamber performance and nozzle effects on specific impulse of liquid propellant rocket engine using hydrazine and oxygen
16 p2828 A69-31724

Agena propulsion system performance model for predicting propellant flow rate, mixture ratio, thrust time and specific impulse
[AIAA PAPER 69-453] 16 p2841 A69-32683

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] 16 p2845 A69-32762

Two stage vehicle gross weight minimization determined by slide rule computation using formula based on specific impulse differences between stages
19 p3429 A69-35918

SPECIFICATIONS

NT AIRCRAFT SPECIFICATIONS
NT EQUIPMENT SPECIFICATIONS

Military specifications validity with reference to reliability and metal finishing industry
15 p2722 A69-31120

Maintainability as design requirement in system specifications and contracts, noting MIL-STD-471 program of maintainability demonstration tests
20 p3551 A69-38268

Implementation of MIL-STD-781 reliability test specification from contractor viewpoint, detailing test procedures /procedural, decision, reporting and corrective action rules/
22 p3952 A69-40025

Reliability test program based on MIL-STD-781 B specification, noting test environments with AGREE chamber
22 p3953 A69-40027

SPECIMENS

Finite element analysis and strain gage results to verify end constraint on off-axis tensile coupons and to design test specimen
20 p3628 A69-37775

Spectral transmission for water vapor and carbon dioxide bands

02 p0236 A69-11451

Band profiles and emission spectra of shock heated AIO compared for self absorption of blue-green system, discussing electronic transition moment

07 p1184 A69-19163

IR zero one band of molecular O observed in day air-glow with ground based scanning grating spectrometer

08 p1306 A69-20096

Vibrational excitation in He, H and N ion-molecule collisions on nitrogen first negative system, studying relative band intensities

08 p1356 A69-20739

IR spectrum of NML Cygnus star with Michelson interferometer, noting CO bands and IR excess

09 p1602 A69-22229

Relative band intensities of atmospheric and IR atmospheric systems of molecular oxygen compared with Franck-Condon factor calculations

10 p1681 A69-23163

Methane absorption distribution in 6190 A band over Jupiter disk based on spectrograms, noting center to limb variations

11 p1960 A69-24730

Image tube spectra observations of interstellar absorption band at 4430 A, noting emission band at 4400 A

11 p1965 A69-25658

Cyanogen band absorption in nuclei of elliptical and spiral galaxies derived from photoelectric measurements indicating rich metal content in central cores

12 p2153 A69-25803

Transmission system with baseband spectrum divided into subbands, cascade phase modulating carrier in multipication chain

12 p2030 A69-26385

Monograph on optical properties and band structure of semiconductors covering absorption and reflectivity measurement, electronic states transition, deformation, etc

13 p2323 A69-28200

Pulsars dynamic spectra, suggesting inadequacy of interstellar scintillation models to explain observed dependence of decorrelation band widths on frequency

14 p2517 A69-29087

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part I

15 p2656 A69-31156

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part II

15 p2656 A69-31157

Spectroscopic observations of Venus atmosphere rotational temperature based on carbon dioxide band at 7883 A

16 p2852 A69-31563

Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency

16 p2774 A69-31981

Hydroxyl band contamination of emission and background radiation from night sky

16 p2774 A69-31987

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section

16 p2850 A69-32315

Ozone absorption coefficients in vicinity of Hartley band maximum verified by photographic spectrophotometry

16 p2785 A69-32626

Ozone and temperature profiles influence on atmospheric radiation intensities measurement by satellite in five spectral regions, noting pressure broadening effect

16 p2786 A69-32633

Static temperature measurement in arc-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer

19 p3294 A69-35752

Atmospheric slant path molecular absorption and emission from band model methods, discussing computer program prediction capabilities

19 p3375 A69-36052

Undoped n-type gallium arsenide single crystals edge emission spectral band shape dependence on crystal type and ambient temperature

19 p3392 A69-36610

Electron band forces probable values of Meinel system positive N molecules and first positive system of nitrogen molecules at high temperatures

20 p3579 A69-37307

Rotational analysis of O₂O₂ band of gamma-prime system of TiO molecule, considering transition to ground state

20 p3577 A69-38170

Carbon dioxide band in Venus spectrum by dispersion analysis, deriving rotational temperature

20 p3614 A69-38254

First order profile of Utrecht Solar Atlas from second order profile and oxygen band refining procedure, deducing instrumental profile for first order spectra

21 p3722 A69-38699

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for each electronic state by numerical solutions of radial Schroedinger equation

21 p3774 A69-38758

Spectral transmittance of mixture of carbon monoxide and nitrous oxide for overlapping absorption bands [AIAA PAPER 67-600]

21 p3819 A69-39013

Thermal average derived with classical path treatment for line broadening theories of gases or plasmas

23 p4192 A69-41378

SPECTRAL EMISSION

Continuous and time-resolved absorption and emission spectra studies produced by exploding wires in gases, discussing effects of environment, pressure and electrical energy

01 p0118 A69-10664

Mechanism responsible for luminosity of long duration meteor trains, discussing color changes, band emission and train spectra as function of height and duration

01 p0154 A69-10874

Intensity ratio of first negative nitrogen band and oxygen line varies in auroral displays

02 p0235 A69-11425

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

02 p0314 A69-11676

Integral spectral emissivity of gas arc plasmas at high temperatures and atmospheric pressure

02 p0291 A69-12484

Weighting functions for finite optically thick atmospheres, discussing emission line formation

02 p0328 A69-12755

Astronomical needs for atomic spectra, discussing emissions in Wolf-Rayet lines and Of stars and forbidden lines in absorption in sun and F-K stars

03 p0508 A69-13172

Airborne radiometric /8 to 14 micron/ temperature measurements, determining emissivities of ocean, stratus clouds, desert and snow

04 p0592 A69-14653

Nongray radiation absorption coefficients reformulation employing alternative angular moment averaged absorption coefficients with emission /Planck/

04 p0686 A69-14744

Spectral output time variation of GaAs diode laser operating in Fabry-Perot modes

05 p0772 A69-15961

Total and spectral emittance of cobalt surfaces conditioned by evaporating some cobalt from surface at high temperature in vacuo

05 p0716 A69-16447

Chemiluminescence and chemionization in flames, considering electrically conducting properties and spectral analysis

06 p1032 A69-17423

Emission line formation in homogeneous chromosphere for noncoherent scattering, considering various chromosphere models

08 p1381 A69-19800

Spectral intensities and time variations of solar X ray bursts, discussing model for high energy flare plasma and resulting X ray flare

08 p1379 A69-20532

OH emission source in W24 during July 19, 1967 lunar occultation, obtaining better position for brighter OH emission feature

09 p1591 A69-21449

Boltzmann plots derived from spatially integrated spectral line intensities emitted from nonuniform gaseous plasmas, discussing Boltzmann temperature

09 p1552 A69-22251

IR excess from carbon-rich peculiar variable I Coronae Borealis and M7 variable associated with emission nebula R Aquarii attributed to circumstellar matter

09 p1603 A69-22261

Molecular ion C13H line found in zeta Ophiuchi 4232.08 A, measuring equivalent width and finding C12/C13 ratio

09 p1603 A69-22261

Radio recombination lines of galactic hydrogen and sensitive test for low energy cosmic ray existence in interstellar medium

09 p1580 A69-22273

Nonthermal cosmic radio emission spectral index and angular variations during scanning of sky by receiver antenna, analyzing dependence on galactic latitude

10 p1784 A69-23940

H beta emission line in night sky spectrum measured with gas pressure scanned Fabry-Perot interferometer in Italian alps

12 p2074 A69-26963

NGC 4151 bright lines intensity, electron density, temperature and ions quantity evaluation from spectrograms with 140 A/mm dispersion

12 p2164 A69-27021

IR airglow spectra measured by two beam interferometer on balloon, noting carbon dioxide and OH emission bands

13 p2252 A69-27586

Solar corona 5303 and 6374 A emission enhancements correlated to 169 MHz S-component, discussing coronal temperature

13 p2347 A69-27717

Optimum emission wavelengths in atmospheric refractive index determination in optical range finder/refractometer system, noting laser applicability

13 p2260 A69-27826

Goddard Experiment Package /automated spaceborne telescope design/ for stars and nebulae UV spectral emittance measurements

13 p2261 A69-27948

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques [AIAA PAPER 69-331]

13 p2242 A69-28267

Radio emission fluxes in solar active regions, determining slope of spectral characteristics of radio sources from effective emission center

13 p2355 A69-28707

Radiative heat transfer calculations between parallel surfaces, applying approximations based on total emissivities to known spectral emissivities

14 p2539 A69-29223

Solar simulator with pulsed Xe arc tube, describing operating characteristics, spectral emission and simulator-sunlight correlation

15 p2586 A69-30385

Unidentified cometary spectra line emission possible interpretations, examining atomic hydrogen abundance in cometary atmosphere and ionic hydrogen recombination

15 p2685 A69-30523

Weak emissions in near IR daytime airglow using rocket-borne spectrometers

16 p2776 A69-32094

Radio sources spectral flux densities at 22 MHz, considering ionospheric conditions, calibration and reduction

16 p2860 A69-32231

Two flare unconnected prominence eruptions on 19 January 1968, discussing emission at arch top

17 p3023 A69-33053

Probe for spectral radiation from luminous gas-cap stagnation region to determine driver gas in test section of hypersonic shock tunnel

19 p3294 A69-35753

Spectral emissivity measurement of ablating phenolic graphite heated by subsonic air stream to high temperature to simulate reentry condition

20 p3565 A69-37187

Relative oscillator strengths of 3500-5600 A Fe I lines in emission of arc burning in Ar with iron chloride admixture

20 p3581 A69-37823

Satellite-anomalous OH radio emission sources, observing spatial distribution and Stokes parameters

20 p3610 A69-38146

Excitation temperatures and OH microwave line optical depths measured for dust clouds, discussing optical absorption lines and LF radio absorption

20 p3611 A69-38147

Effective thinness approximation for spectral line formation from photon degradation processes and random walk of scattered photons, discussing optical thickness

20 p3612 A69-38155

Vacuum UV flux along T type shock tube axis and measurements of He I line precursor emission, indicating ionizing radiation contributions to precursor ionization and excitation
20 p3511 A69-38239

Daylight sky spectral radiance in ruby laser spectral range as functions of scattering angle, height over horizon of observed point and sun altitude
21 p3734 A69-38397

Luminous efficiency for electron induced molecular nitrogen bands, discussing thick- and thin-target measurements of fluorescent efficiencies
21 p3774 A69-38521

Emission from polymethine dye solution during optical pumping with pulses from Q switched Nd glass laser, discussing emission spectral, temporal and energy characteristics
21 p3739 A69-39542

Spectral reflectivity and emissivity observations of proposed Apollo landing sites compared with other lunar localities and unmanned lunar probe data
21 p3815 A69-39585

Argon plasma jet spectral radiation properties, considering electron density, recombination, excitation, argon density, etc
22 p3991 A69-41052

Heat resistant materials integral and spectral radiative properties in IR and visible regions determined by calorimetry and IR spectrometer
23 p4237 A69-41329

Spectral emissivity and radiation intensity spectral distribution measurements for heat- resistant materials at high temperature, using photographic method
23 p4238 A69-41330

Thermal average derived with classical path treatment for line broadening theories of gases or plasmas
23 p4192 A69-41378

Autoionized resonance transitions of He at 206.2-192.2 Å using He continuum produced by capillary spark, also producing He II line spectra
23 p4191 A69-42149

Light sources in 0.15-20 micron spectral range from published literature, unpublished reports, light source manufacturers and individuals
23 p4191 A69-42190

Spectral distribution of two photon emission from metastable state of singly ionized He by broadband spectroscopic coincidence counting technique
23 p4220 A69-42378

Photoelectric measurements of emission line intensities for low density planetary nebula with moderate excitation located near north galactic pole, deriving abundances
24 p4376 A69-42662

Tabulation of photographic and photoelectric spectrophotometrically obtained relative spectral line intensities for planetary nebula IC 5217, discussing interstellar absorption
24 p4376 A69-42663

SPECTRAL ENERGY DISTRIBUTION

Auroral emission rates and heating effects as function of altitudes
02 p0235 A69-11426

Angular and spectral distribution of earth IR radiation near horizon from satellite observation and spectrograms
03 p0422 A69-13506

Latitude dependence of earth spectral radiation intensities, discussing satellite observations in equatorial and subtropical regions
03 p0422 A69-13507

Wave number frequency dependent spectral function and space-time correlation function in turbulent plasma, noting utility for probes and scattering analysis
03 p0483 A69-14255

Low temperature spectral distribution of impurity induced photoconductivity in p-type InSb crystals prepared by zone refining
04 p0644 A69-15270

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
05 p0814 A69-16051

Finite cross relaxation rate effect on spectral distribution in CW laser oscillator output with inhomogeneous broadening, noting population inversion distribution [IEEE PAPER T-2]
05 p0776 A69-16327

Multiplicity of secondary neutrons counted by IGY neutron monitor detecting cosmic radiation
06 p0925 A69-17297

Extensive air shower high energy muons measurements noting energy spectrum, lateral spread and dependence on shower size
06 p0990 A69-17300

Complex distribution of quasar red shift interpreted as due to two simple distributions of cosmological and gravitational red shift
06 p1009 A69-17968

Planetary nebula IC 4642 spectral line intensities measured by photographic spectrophotometry compared to previous measurements, noting no evidence for changes
08 p1383 A69-19898

Radiative tunneling shifting peak spectra in abrupt asymmetrically doped GaAs junctions
09 p1544 A69-21336

Solar irradiance spectral distribution data normalized and combined with spectral absorbance of satellite surface coatings, obtaining absorbed energy for spectral range
09 p1576 A69-21646

Spectral distribution of X ray atmospheric absorption used to determine high energy photoelectrons spectrum
09 p1577 A69-21774

Photocell base thickness for optimal power to weight ratio, noting photons spectral distribution and absorption coefficient dependence on frequency
09 p1443 A69-22719

Ionization-recombination thermodynamic equilibrium upset causing spectral excitation in He arc plasma
10 p1742 A69-24077

IR spectral distribution from region between stars of Trapezium in Orion Nebula
10 p1786 A69-24106

NGC 4151 absolute intensities of wide emission of weak isolated and IR lines determined from photoelectric spectrophotometric measurements
12 p2164 A69-27023

Quasars optical properties, hypotheses on nature, energy distribution, red shift, stellar magnitude and distance estimation on basis of absorption
12 p2167 A69-27042

Spectral energy distribution in quasars, using photoelectric spectral scanner in several wavelength ranges
12 p2168 A69-27051

Variable star BL Lacertae absolute spectral energy distribution in visible and IR regions, noting synchrotron features and possible quasar nature
13 p2335 A69-27315

Crab Nebula pulsar NP 0532 photoelectric spectrophotometry results, noting main pulse and interpulse spectral energy distributions similarity to extended synchrotron radiation
13 p2335 A69-27317

Spectrophotometry of variable star SS Cyg, analyzing energy distribution in continuum, UV gradient and Balmer jump
13 p2351 A69-27868

Solar X ray flux deduced from flare effects on VLF propagation, showing total energy content as measure of ionizing radiation
14 p2411 A69-29105

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator
14 p2447 A69-29409

Spectral distribution of photosensitivity for p-n junctions in silicon doped GaAs, showing agreement with state density model and absorption data
15 p2666 A69-30067

Absolute spectrophotometric gradients determined from energy distribution in UV beta Lyr spectrum, confirming gradual variations in light curve shape and spectral characteristics
15 p2688 A69-30557

Flux densities at 2695 MHz for radio sources, tabulating measured data, discussing spectral distribution indices
15 p2696 A69-31206

Solar radiation actinometric and pyranometric observations during 20 May 1966 eclipse, examining IR component and spectral radiation energies
15 p2697 A69-31257

Spectral density function derivation for energy scattered from underdense turbulent wake
16 p2732 A69-31893

BetaCrB atmospheric microturbulence velocity, ionization and excitation temperatures, electron pressure and abundances determined by spectrophotometry
16 p2864 A69-32592

Random functions applications to random vibrations, discussing spectral power density, ergodic steady functions, etc
17 p3054 A69-33063

Stable passive Q-switch of neodymium laser, presenting single pulses energy, time and spectral characteristics
17 p2983 A69-33969

YZ Canis Minoris red dwarf star flare event observation record, noting optical spectrum energy output and slow decay
17 p3043 A69-34165

Ionization stratification and chemical abundances in planetary nebula NGC 7662, discussing density fluctuations effect on N II and O II lines
18 p3191 A69-34294

Pulsars observed for average energies at centimeter wavelengths, using azimuth elevation antenna
18 p3196 A69-34644

Relation between angular divergence, spectral characteristics and kinetic behavior of laser operating in various pulsed modes
19 p3333 A69-35879

Spectral parameters effect on IR instrument SNR, discussing range equations of point and extended sources and radiation-noise-limited detectors
19 p3310 A69-36061

Spectral energy distribution of gamma-Cas in 1967 based on observations in seven color photometric system
19 p3426 A69-36565

Spectral density of outgoing radiation in 0.6-0.8 micron frequency range, noting reflected radiation and cloud fields correlation functions
19 p3366 A69-36672

Homogeneous isotropic turbulence spectrum asymptotic behavior for various spectral energy transfer models
19 p3301 A69-36818

Spectral intensity distribution of night airglow, noting visual spectra distribution difference from G2 stars
20 p3522 A69-37057

Hg injection lamp with high power and variable spectral energy distribution as light source for testing solar radiation effects
20 p3510 A69-37630

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses
20 p3591 A69-37961

Balloon-borne proportional counters to measure X rays intensity and spectral distribution from Taurus X-1 and Cygnus X-1
20 p3593 A69-38153

Galactic X ray source spectral data observed by rocket, presenting graph with corrections
20 p3594 A69-38172

Magnetic ordering in dysprosium phosphate observed by high resolution spectral line intensity measurements, finding Neel temperature
21 p3773 A69-38331

Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields
21 p3707 A69-38490

Approximate formula for energy spectrum of isotropic turbulence at large wave numbers, showing agreement with Gaussian exponential form
21 p3694 A69-38834

Spectral equation for decaying isotropic turbulence of incompressible inviscid flow at large Reynolds number, using spectral cascading
21 p3694 A69-38835

NGC 7023 nebula physical characteristics observation based on flux and brightness measurement, noting spectral energy distribution and causes
21 p3816 A69-39724

IC 349 nebula in Pleiades investigated with diffraction spectrograph, observing spectral energy distribution relationship to illuminating star
21 p3817 A69-39728

Particles integral and differential fluxes spectral distribution calculation for determining radiation load for synchronous satellite
22 p4035 A69-39909

Power per unit volume of UV and forbidden lines emitted by ionized C, N, O and Ne as function of electron temperature and density
22 p3984 A69-40157

Spectral emissivity and radiation intensity spectral distribution measurements for heat- resistant materials at high temperature, using photographic method
23 p4238 A69-41330

Zenith atmospheric attenuation in 183-325 GHz region measured by wideband Ge bolometer detector and spectral convolution technique
23 p4115 A69-41586

SPECTRAL LINE WIDTH

Energy density distribution in power spectra of turbulence in long wave region in free atmosphere
24 p4346 A69-43155

Isotropic cosmic X rays measured by balloon-borne scintillation telescope, discussing agreement with electron energy spectral distribution
24 p4368 A69-43185

Quasi-isotropic semigray radiative transfer prediction using nongray model in bounded plane-parallel geometries for gas with spectrum from free-free processes
24 p4415 A69-43673

SPECTRAL LINE WIDTH

Negative Faraday effect and Doppler line width measurements for He-Ne IR gas laser tube by producing beat frequencies in ring laser system
01 p0088 A69-10028

Pionic 2p-1s X ray transition energy and natural linewidth and muonic 2p-1s X ray transition energy measurements for Na 23
01 p0122 A69-10035

Carbon dioxide spectral line broadening and self broadening coefficients, using carbon dioxide laser radiant energy
01 p0091 A69-10844

Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
01 p0124 A69-10960

Radiation, Stark and van der Waals level broadening constants for Mg I and Si I calculated to interpret solar and stellar spectral line widths
02 p0310 A69-11454

Fraunhofer lines hyperfine structure effect on solar abundances of V, Mn, Co, Cu and Ba, calculating equivalent line widths by ALGOL program
02 p0311 A69-11458

Collision broadened homogeneous linewidth measurements for 6328 angstrom Ne line in Ne and He-Ne discharges, using nonlinear interaction between two traveling waves
02 p0257 A69-12613

Ruby laser emission spectral line narrowing due to lasing modes reduction
03 p0439 A69-13059

Wind shear and reflectivity gradient effects on Doppler radar spectra
03 p0461 A69-13341

Telluric lines halfwidth and depth dependence on observation point altitude and intervening air mass, determining absorption line contours for isothermal atmosphere
03 p0512 A69-13695

Empirical growth curve determined by using equivalent widths of absorption lines of quasar 3C 191, concluding ionization is mainly due to collisional processes
03 p0514 A69-13962

Analysis of equivalent widths as function of disk position for six photospheric neutral atomic oxygen Fraunhofer multiplets, noting O abundance
03 p0515 A69-14034

Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
03 p0442 A69-14189

Hydrogen spectral line broadening under combined action of ions and electrons, tabulating values for calculation of absorption coefficient
04 p0651 A69-14373

Seyfert galaxies high excitation broad emission lines and quasars resemblance, discussing causes of spiral galaxies violent nuclear activity
04 p0657 A69-14689

Tsao-Curnutte line broadening calculations extended to include Raman scattering and quadrupole absorption
04 p0633 A69-15231

Hydrogen spectral line widening by plasma electrons emphasizing Lyman, Balmer and Paschen series
04 p0638 A69-15239

Methane broadening and anomalously small pressure shift of 3.39 micron rotation-vibration line, using laser saturated molecular absorption
04 p0633 A69-15424

Photon number and amplitude fluctuations of laser radiation in case of inhomogeneously broadened atomic line and for steady state condition
05 p0770 A69-15631

Table of equivalent widths of isolated lines with combined Doppler and collision broadened profiles
05 p0796 A69-15747

Line broadening possibility for Q switched iodine laser with aid of magnetic effect / Zeeman effect/, noting energy storage capability increase
05 p0773 A69-16288

Gallium arsenide electro-optic switch measuring signal time response to radiation step of homogeneously broadened carbon dioxide, He and nitrogen laser amplifier
05 p0773 A69-16293

Finite cross relaxation rate effect on spectral distribution in CW laser oscillator output with inhomogeneous broadening, noting population inversion distribution [IEEE PAPER T-2]
05 p0776 A69-16327

Spectral line shapes broadened by electron impacts, taking into account contribution of radiation produced by perturbing electrons
06 p0961 A69-17136

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals
07 p1197 A69-18454

Water vapor absorption line for nitrogen and oxygen mixtures with frequency measurements at various pressures and temperatures, discussing attenuation and line breadth
07 p1184 A69-18911

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections [IEEE PAPER B-11]
07 p1157 A69-19485

Calculated profiles of He I 4471 and 4922 A and forbidden components star spectra, using quasi-static and impact approximations
07 p1224 A69-19713

Plasma spectral line shifting and broadening under ion and electron impact
07 p1187 A69-19720

Spectra of envelope star HD 217050, analyzing metallic lines as function of central depths
08 p1387 A69-20121

Green function method for atomic line broadening in plasma radiation, including electron correlations and quantum effects
08 p1361 A69-20147

Equivalent widths of K line of single ionized calcium and central depths of unidentified broad absorption in O and B stars spectra
08 p1389 A69-20250

Quantum theory of line broadening and shift, relating adiabatic and diabatic collisions to elastic and inelastic scattering of perturbers
08 p1363 A69-20464

Mean square radii for assigned terms of Fe I energy diagram for Van der Waals line broadening
08 p1392 A69-20559

Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
08 p1352 A69-20745

Emission line galaxy NGC 5253, discussing radial velocity, line width and excitation and similarity to Seyfert galaxies
08 p1407 A69-21132

Frequency fluctuations in mode coupled gas laser used to determine natural emission line width
09 p1516 A69-21670

Helium I line profiles including forbidden component, discussing electron and ion Stark broadening and thermal Doppler broadening
09 p1601 A69-22209

Stark broadening of Balmer H alpha, H beta, H gamma and H delta lines in plasma region in strong magnetic fields
09 p1542 A69-22248

Nonadiabatic collision broadening theory for IR spectral lines applied to carbon dioxide-carbon dioxide and carbon dioxide-nitrogen collisions, estimating rotational line widths
09 p1543 A69-22250

Collision broadening cross sections of OH UV transition at room temperature, using flash photolysis
09 p1543 A69-22252

Molecular ion C13H line found in zeta Oph at 4232.08 A, measuring equivalent width and finding C12/C13 ratio
09 p1603 A69-22266

Laser induced line narrowing in coupled Doppler broadened transitions, noting mode crossing and spontaneous emission
09 p1519 A69-22282

Degeneracy of hydrogenic states to sum S-matrix in Stark broadening calculations
09 p1543 A69-22405

Line blanketing for two level atom with spectral line formed in pure absorption and noncoherent scattering, studying wavelength and depth dependence
09 p1606 A69-22424

Angular dependence of EPR line widths of trivalent Cr ions in zinc tungstate in rotating magnetic field, noting spin-phonon mechanism
10 p1743 A69-23131

Amplitude fluctuations and line width of traveling wave and standing wave He-Ne laser, considering saturation effects
10 p1701 A69-23135

Early type stars spectrophotometric parameters, discussing hydrogen beta, gamma and delta line widths, magnitude, etc
10 p1777 A69-23387

Nuclear sizes, emission line widths and densities in Sc galaxy M 51 and Seyfert galaxy NGC 4151, noting similarities and difference between nuclei
10 p1785 A69-24089

Spectral broadening measurements of ruby laser light scattered by density fluctuations in theta pinch plasma
11 p1924 A69-24304

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location
11 p1955 A69-24388

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
11 p1955 A69-24389

Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks
11 p1958 A69-24591

Monograph on internal structure of sun corona covering variations in intensity and width of coronal lines, inhomogeneity, quasi-homogeneous and anisothermic coronas, etc
11 p1961 A69-25103

Frequency stability of He-Xe laser with nonresonant feedback, noting spectral line width dependence on number of interacting modes
12 p2105 A69-26049

Shapes of extreme wings of collision-broadened carbon dioxide lines, noting absorption deviation from Lorentz-shaped lines
12 p2132 A69-26248

Disaligning and velocity changing collisions influence on laser light induced saturation peaks or holes in velocity distribution of Ne atoms
12 p2105 A69-26317

Mode interaction in lasers with homogeneous line broadening, analyzing rate equations for radiation fields of operating modes for asymptotic values of mode intensities
12 p2106 A69-26323

Laser gain medium dispersion expressions applied to multimode ring laser operation with mode spacing less than pressure broadened atomic linewidth
12 p2106 A69-26324

Surface gravities and detection of metallic line early A stars from spectral classification using equivalent line widths
12 p2171 A69-27151

Absorption line spectrum of quasar Ton 1530, discussing line widths and red shifts
13 p2334 A69-27306

Fe III line profiles and equivalent widths from spectrograms of zeta Cas and gamma Peg for Fe abundance, using model atmospheres
13 p2347 A69-27715

VLF morning and evening magnetosphere emission distinction by studying spectrum width as function of variations in K index
13 p2253 A69-27740

He-Ne laser transition line shape and gain curve through width, considering spectral frequency characteristics, output power and gas temperature and concentration
13 p2272 A69-28115

Spectral width of emission of laser resonator in nonstationary mode in presence of active medium, noting time dependence
14 p2456 A69-28736

Passive Q switch laser single pulse formation time and spectral width using balance equations
14 p2458 A69-29166

Emission spectrum width of solid state lasers as function of temperature, investigating effects of active medium parameters, pumping and cavity
14 p2459 A69-29389

Sunspot equivalent line widths calculated using sunspot models, considering influence of light scatter correction
14 p2525 A69-29721

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation

14 p2461 A69-29779

Si III and O II spectral lines distortion in pulse HF plasma in rotating electromagnetic field, showing particle rotational speed dependence on discharge chamber radius

14 p2497 A69-29791

Source functions of IR Fraunhofer lines obtained using solar disk equivalent width method, noting LTE role

14 p2528 A69-29961

FM oscillations spectral width during modulation by finite sequences of multiple and nonmultiple frequencies

15 p2562 A69-30116

Gas laser secondary modes emission and beat frequency spectrum widths, using results of Lamb lasers theory

15 p2633 A69-30121

Subtractor performance for processing correlated random signals with different spectral widths in signal delay time indicator, discussing errors

15 p2572 A69-30346

Filamentary nebula IC 443 observation by Fabry-Perot etalon with image converter, determining radial, expansion velocities and H alpha line half width

15 p2686 A69-30538

Quartz oscillator amplitude and frequency fluctuations due to elements tolerance fluctuations, examining oscillator parameters contributions to spectral line width

15 p2579 A69-30944

Time resolved Stark broadened spectral profiles for Na I 5882-88 A and 4978-82 A lines of plasma, comparing electron densities

15 p2656 A69-31155

OGO 5 satellite measurements of intensity and width of Lyman alpha line scattered by hydrogen geocorona

15 p2699 A69-31412

Turbulence dissipation rate in clouds and precipitations determined from rms width of vertical sounding radar signal fluctuation spectra, distinguishing gravity and turbulence effects

16 p2807 A69-32273

Electron impact broadening of isolated spectral lines emitted by neutral atoms in plasma

16 p2823 A69-32468

Hydrogen line profiles, equivalent widths and electron impact for peculiar alpha 2 CVn and gamma Lyr stars

16 p2864 A69-32594

Line widths of 48 galaxies at 21 cm and spectroscopic data, estimating masses and angular momenta, finding mass-angular momentum relation

16 p2866 A69-32818

HCN laser line width measurement with high resolution spectrum analyzer indicating spectral widths caused by mechanical instability

17 p2979 A69-32850

Line width and intensity correlation of laser radiation noting damping constant

17 p2980 A69-33012

Spontaneous gas laser emission from level coupled by spontaneous transition with emitting level, obtaining atoms interaction with laser field velocity distribution and spectral line width

17 p2981 A69-33116

Level crossing signal obtained by magnetic/electric field modulation, tabulating corrections to widths and centers for distortions

17 p3009 A69-34155

Solar Fe II lines theoretical equivalent widths calculations, estimating influence of photosphere model on iron abundance data

18 p3191 A69-34305

Width measurements of van der Waals broadened Si I spectral lines by shock tube and scanning Fabry-Perot interferometer, using argon as perturbing gas

18 p3116 A69-34449

Atomic and molecular absorption lines and width measurement in spectrum of WZ Cassiopeiae carbon star in visual and IR region

18 p3204 A69-35350

Laser emission in system of four level centers, determining nonuniform emission line broadening due to disturbed quasi-equilibrium distribution of electron subsystem elementary excitations

19 p3333 A69-35877

Lamb theory of Doppler broadened gas laser extended to arbitrary intensities for single mode opera-

tion, calculating detuning curves and inversion densities

19 p3335 A69-36048

Rb 87 vapor laser pumping, output, spectral line width and emission frequency approximated in three level system

19 p3335 A69-36342

Rb 87 vapor laser output power and spectral line width dependence on optical pumping intensity and atom density in resonator

19 p3336 A69-36343

Exciton line broadening in II-VI compound semiconductors, discussing thermal broadening of n equals one exciton associated with LO phonon-induced scattering

19 p3386 A69-36524

Spectral line scattering during propagation of radiation in turbulent plasma

19 p3396 A69-36573

GaAs laser used as optical sweep generator for display of Cs 133 spectral line shape, studying fluorescence and radiation lifetime

19 p3339 A69-36696

Stark broadened H gamma profile, considering effect of strong collisions in electron perturbation and electron impact broadening of lower levels

20 p3579 A69-37305

Spectral line broadening and shift due to electron and ion shocks in impact theory

20 p3580 A69-37828

Output power spectra of Pb-Sn-Te diode laser above threshold of oscillation, demonstrating inverse dependence of line width on laser power

21 p3734 A69-38326

Equivalent absorption line widths of supergiant B1 IA /kappa Cassiopeia/ tabulated with log NH content of atmosphere for various elements

21 p3803 A69-38844

Absorption spectroscopy using resonance broadened atomic lines for two phase mixtures study

21 p3774 A69-39239

Solar flares and prominences emission lines equivalent width correlated with relative differential velocity between filaments

22 p4001 A69-39994

Calcium K line strengths in A stars measured by narrow band spectrometer compensated for seeing and transparency variations

22 p4015 A69-40154

Methane rotational temperature in Jovian atmosphere deduced from equivalent widths of lines at 1.1 micron band

22 p4028 A69-40663

Stark broadening of H-gamma for electron density measurement in plasma, noting temperature range

22 p3985 A69-40664

Electron and ion Stark broadening of allowed and forbidden, triplet and singlet transitions in neutral He at low electron densities, noting Doppler broadening

22 p3985 A69-40665

Aperture distortions and spectral line shapes of electromagnetic radiation diffused by plasma

22 p3982 A69-40799

Nonlinearity effect on spectral shape and bandwidth in connection with frequency modulation by noise

22 p3900 A69-40923

Frequency discrimination in optical harmonic generators, discussing spectral width of wideband laser for supershort pulses and spectral device, using frequency dependence of mode locking direction

22 p3965 A69-40964

Thermal average derived with classical path treatment for line broadening theories of gases or plasmas

23 p4192 A69-41378

Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen

23 p4193 A69-41379

Electron spin memory in optical pumping cycle of potassium halides F centers, measuring relaxed excited state g factors and spin resonance line widths

23 p4198 A69-42419

Equivalent width measurements of Arcturus IR line spectra using Fourier transform spectroscopy, tabulating results

23 p4222 A69-42453

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location

24 p4390 A69-43778

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations

24 p4390 A69-43779

Beta Orionis spectral line profiles data used to study atmospheric structure

24 p4391 A69-43804

SPECTRAL LINES

U LINE SPECTRA

SPECTRAL NOISE

U WHITE NOISE

SPECTRAL REFLECTANCE

Radar reflectivity and refractive index spectra in clear atmosphere simultaneously measured and compared with theoretical calculations

01 p0032 A69-10969

Plane wave scattering from modulated corrugated structures, obtaining reflection coefficients for multimode propagation

01 p0033 A69-10973

High temperature directional reflectance measurements of ablative materials as function of sample temperature using paraboloid reflectometer

04 p0604 A69-15512

Spectral reflectivity curves for bright and dark areas of Mars noting seasonal crossings

09 p1587 A69-21308

Multispectral photographic determination of reflectance of environmental features from aerial spectral photographs, noting EROS program application

11 p1880 A69-24266

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition

12 p2145 A69-26724

Light interaction with stacked leaves and plant canopy, determining reflectance and transmittance

12 p2097 A69-26985

Spectral reflectivity differences of selected dark and bright regions of Mars observed with double beam photometer

13 p2338 A69-27553

Lunar surface spectral reflectivity variations with time, noting phase angle effects on color contrast

13 p2349 A69-27819

Earth albedo instrument on OSO 3 spacecraft to measure solar reflectance of earth at various wavelengths

15 p2614 A69-31279

Spectral reflectivity differences /color differences/ on lunar surface in visible region, indicating compositional difference origins

17 p3037 A69-33653

Spectral reflectances of objects and vegetative backgrounds to generate color photographic technique increasing detection sensitivity and rate

18 p3133 A69-34247

CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure

18 p3181 A69-34274

Reflection reduction properties of symmetrical, light transmitting three layer coating consisting of zinc sulfide-magnesium fluoride-zinc sulfide films

18 p3173 A69-35147

Antimony trisulfide natural light reflection and transmission in and near IR region, noting spectral temperature and time dependence peculiarities

19 p3384 A69-36481

Cadmium sulfide-selenide single crystals vegetation coefficient polarimetric measurement, observing reflection peaks relationship to absorption spectral temperature dependence

19 p3391 A69-36607

Spectral reflectivities of sintered Ti-TiN-TiC and Zr-ZrN-ZrC alloys and Zr-ZrN-ZrC alloys

20 p3559 A69-37330

Band structure and reflection spectra of vanadium dioxide and pentoxide single crystals, noting changes in metal-semiconductor phase transition

21 p3781 A69-39137

Spectral reflectivity and emissivity observations of proposed Apollo landing sites compared with other lunar localities and unmanned lunar probe data

21 p3815 A69-39585

Visible and IR spectral reflectivity of Apollo lunar landing sites, attributing reflectivity differences to compositional and/or mineralogical differences

21 p3815 A69-39586

Relative IR spectral reflectivity of selected lunar surface areas measured using double beam photoelectric filter photometer

21 p3815 A69-39588

Gases effects on UV irradiated thermal control materials spectral reflectance, discussing tests and photolysis mechanisms

22 p3923 A69-40395

Optical frequencies and polarizations of IR active phonons of tysonite lanthanide fluorides based on Kramers-Kronig reflectance spectra analysis
22 p3993 A69-40729

Spectral reflectivity curves for Mars light and dark areas and seasonal changes of dark area simulated in laboratory
23 p4209 A69-41319

Donor and acceptor impurity effect on absorption and reflection spectra of CdTe single crystals, analyzing In, Ga, S and Se
24 p4362 A69-43735

SPECTRAL RESOLUTION

Europium complexes high resolution emission spectra in relation to molecular configuration
01 p0024 A69-10893

Selective resonators for laser emission spectral structure control, proposing dispersion power increase by inserting telescopic system
05 p0777 A69-16371

Photometric effects of UVB color indices ineffective in detecting double stars in Galaxy
07 p1216 A69-18854

Coupled wave equation solution based on spectral resolution for longitudinal components of electric and magnetic fields when source currents are present in compressible anisotropic plasma
08 p1274 A69-20031

HF ionospheric radar ground scatter map showing separated land-sea backscattered radio waves by Doppler technique
09 p1454 A69-21681

Recombination parameters and depth of levels of p-n junctions in semiconductor photocells determined from position of maximum spectral sensitivity
09 p1560 A69-22718

Color TV system for Earth Resources Observation Satellite /EROS/, discussing resolution in relation to spectral separation through data simulation study [SMPT PAPER 105-79]
12 p2077 A69-25767

Slowly varying component of solar radio emission, evaluating resolution of radio telescopes in sunspot studies and localized areas luminescence
15 p2674 A69-30503

Aberrations of Fabry-Perot interferometers with small nonuniformities in plate spacing used as spectral and optical filters
17 p2972 A69-33081

Remote sensors discrimination and performance, discussing linear filter system, contrast ratio, tricolor systems and multispectral scanning system
20 p3493 A69-37743

Spectroscopic observations of optical pulsar NP 0532, using technique permitting phase resolution of spectra of main pulse and interpulse
21 p3799 A69-38646

Solar IR spectrum recorded by LPL B spectrometer on NASA CV-990 aircraft using one micron grating, noting resolution
21 p3800 A69-38683

Image intensifier coupling to electron scanning image converter to increase time-resolving spectrograph sensitivity in simulated reentry studies
24 p4317 A69-43759

SPECTRAL THEORY

Book on linear boundary value problems of mathematical physics based on Green function covering Hilbert spaces, integral equations and spectral theory of differential operators
04 p0625 A69-15232

Book on stellar atmospheres covering radiation theories, thermal equilibrium, measurement techniques, spectral analysis, etc, emphasizing sun
11 p1961 A69-25084

Spectrum of ordinary second order differential operators, correlating spectral properties with analytic function-theoretic properties of differential equation solutions
17 p2996 A69-33793

Primary H nuclei flux and spectrum near geomagnetic equator, discussing emulsion stack exposure
22 p4005 A69-40520

Gain modification from spectral splitting of optical transition by incident light wave on higher frequency coupled transition
22 p3965 A69-41125

SPECTROGRAMS

Photometric standardization and calibration of meteor spectrograms for real meteor masses determination using spectroscensitometer
12 p2154 A69-25820

Magnetic A star HD 152107 anomalous intensification of Balmer series H lines observed by spectrograms
13 p2352 A69-27873

P Cyg star HD 190603 atmospheric parameters from spectrograms analyzed by curve of growth method, including ionization and excitation temperatures and electron density
14 p2519 A69-29357

Masses of visual binaries above main sequence with published orbits determined as function of position in H-R diagram, using spectroscopic parallaxes
18 p3195 A69-34429

MK system spectral types determination for B, A and F type stars from slit spectrograms near NGC 2264
23 p4211 A69-41487

M giant star possible evolution into S star, using high dispersion spectrograms
24 p4387 A69-43349

SPECTROGRAPHS

U SPECTROMETERS

SPECTROHELIOGRAPHS

Optical evidence for mass motions in solar flares /1937-1967/
06 p0993 A69-17428

Solar corona X ray emission during flares and under quiet sun conditions investigated by satellite with X ray heliograph
07 p1210 A69-19614

Sunspot observations with astrogaph telescope by tracing on projected image of solar disk
08 p1387 A69-20118

Multilens spectroheliograph for nonstabilized rockets, obtaining consecutive points recording along solar image chord
08 p1313 A69-20252

Radiophysics Laboratory /Sidney/, discussing radio astronomy, radioheliographs, radio telescopes, cloud physics and research
10 p1784 A69-23988

Spectroheliograph technique, obtaining high resolution magnetic maps of solar magnetic fields directly in single image without photographic subtraction
11 p1880 A69-24432

Stationary Babinet compensator for measuring longitudinal solar magnetic fields by means of fringes introduced in spectroheliograms
11 p1880 A69-24433

Aerospace Corp. solar observatory /California/ compound telescope, vacuum spectroheliograph, instrumentation and applications
11 p1862 A69-24792

Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
11 p1884 A69-24838

Solar activity indices based on Ca flocculi, emphasizing index representing emission excess over chromospheric emission
14 p2525 A69-29722

Photoheliographic data tabulation of sunspots positions and areas for 1961 obtained from various astronomical observatories
15 p2700 A69-31490

Tachoheliograph /modified spectroheliograph/ for obtaining two dimensional solar velocity maps, discussing construction and theory of operation
17 p3030 A69-33061

Spectroheliograms interpretation obtained in line cores of neutral oxygen IR multiplets
18 p3204 A69-35388

Solar radio emission during quiet sun years 1964-1965 mapped using Stanford spectroheliograph, attributing slowly varying component to electron density enhancement
18 p3188 A69-35395

Solar microwave emission heliographic distribution during pronounced geomagnetic recurrence, noting brightness temperature nonuniformity due to coronal depression through polytrope models for solar wind
18 p3188 A69-35396

X ray heliography by Fresnel-Soret type zoneplate camera to obtain solar photographs from rockets
20 p3544 A69-37803

Neutral He lines at 537 A and 584 A obtained by spectroheliometer on OSO 4, studying differences between quiet and active regions
23 p4222 A69-42405

NT FABRY-PEROT SPECTROMETERS

NT INFRARED SPECTROMETERS

NT MASS SPECTROMETERS

NT SOLAR SPECTROMETERS

NT SPECTROHELIOGRAPHS

NT TIME OF FLIGHT SPECTROMETERS

NT ULTRAVIOLET SPECTROMETERS

H alpha emission symmetrical spatial distribution of night airglow observed with high transmission diffraction spectrographs
01 p0062 A69-10128

Electron impact spectrometer for obtaining molecular energy loss spectra used to investigate scattering cross sections for optically allowed and forbidden transitions
01 p0123 A69-10620

Rapid scan spectrometer design and calibration, noting application to diagnostics of high density transient Xe and H plasmas
01 p0082 A69-10838

Scaled and translated composite curve technique for reducing calibration data for spectrograph film system response characteristics
01 p0082 A69-10839

Scintillation gamma spectrometer on Luna 10, eliminating charged particle background by fabricating detector from NaI single crystal in scintillating plastic container
01 p0084 A69-11314

Multichannel amplitude analyzer for space applications, noting use as gamma-spectrometer component in Lunik 10 and 4096 bit/channel traffic capacity
01 p0084 A69-11315

Solar radiation protection of radiometers and spectrometers on reentry vehicle by launching times and solar view field selection
04 p0666 A69-15511

Low dispersion spectrograph for temperature and electron density determination in plasma beam
05 p0803 A69-15997

Cosmic ray magnetic spectrograph for measurement of momentum spectrum, charge ratio and specific ionization of muons, discussing magnetic and scattering displacement
06 p0925 A69-17302

Communications of Lunar and Planetary Laboratory, Volume 7, covering IR solar spectrum atlas reports and solar spectrometer for airborne IR observations
06 p1008 A69-17807

Instrument profile of grating spectrograph determined by applying He-Ne laser mode separated in Fabry-Perot interferometer
07 p1131 A69-18405

Parametric light interactions application to optics stressing nonlinear spectrograph and cavity and traveling wave oscillator [IEEE PAPER K-5]
07 p1152 A69-19066

Onboard calibration system for gamma ray spectrometers and X ray detector in earth satellites, describing fabrication and test results for radioactive sources [IEEE PAPER 3A-6]
07 p1134 A69-19193

X ray proportional counter, analog to digital converter and power supply for gamma ray spectrometry used in satellite applications [IEEE PAPER 3A-7]
07 p1134 A69-19194

Channel multiplier spectrometer for low energy electrons and protons at synchronous altitude on ATS-E satellite [IEEE PAPER 3C-5]
07 p1135 A69-19199

Stimulated emission of laser employing crystal and glass lasers doped with neodymium ions, using high temperature spectroscopy
08 p1323 A69-19944

Multichannel photoelectric spectrometer design for Hale telescope, noting effectiveness in red and IR observations
08 p1318 A69-21131

Cosmic ray intensity variations by spectrographic method, noting geomagnetic effects
10 p1759 A69-22836

Image intensifier for high speed spectrography of short duration faint radiation source, noting high speed shutter and resolution
12 p2085 A69-26160

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions
12 p2092 A69-26477

Correlation spectrometer for air pollution surveillance from airborne and spaceborne platforms, noting scanning satellite system for continuous global coverage
12 p2096 A69-26981

H alpha line emission preceding auroral breakup by data analysis of Antarctica Meinel-type patrol spectrograph, noting magnetic activity role
14 p2441 A69-29386

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator
14 p2447 A69-29409

Rocket-borne scintillation spectrometer for cosmic photon radiation
14 p2449 A69-29566

Parametron preamplifier for X band superheterodyne ESR spectrometer, noting sensitivity and SNR
14 p2423 A69-29757

Nova Delphini 1967 observational data and equipment including Cassegrain spectrograph, reflector telescope and photoelectric photometer
15 p2682 A69-30439

OGO 5 spectrometric studies of topside ionospheric ion concentrations, noting difference between nighttime and sunlit pass
15 p2599 A69-31345

Jodrell Bank RF digital autocorrelation spectrometer based on time delay related to signal power spectrum through Fourier transform
17 p2970 A69-32856

High energy cosmic ray muon charge ratios at large zenith angles measured as function of momentum by using spectrometer
17 p3023 A69-33321

Nondestructive ultrasonic, spectroscopic and TV test methods reducing time for inspection and increasing reliability of turbines
17 p2978 A69-33330

Ultrasonic spectrometry application to thickness measurement of thin and thick walled articles
18 p3137 A69-35110

Amplitude and intensity distributions of plane periodic Fresnel diffraction grating calculated by Fraunhofer theory, noting applicability to spectrometric and meteorological instruments
19 p3372 A69-35906

Multispectral scanner with multichannel spectrometer for earth observations, describing video image generation from detector elements output signals
19 p3310 A69-36066

Prismatic Cassegrainian-focus spectrograph of telescope at Shemakha Observatory, discussing camera inclination, instrumental contour for yellow neon line, astigmatism, optical temperature effects, etc
19 p3313 A69-36582

OGO 5 ion spectrometer for measuring oxygen, He and hydrogen ion concentration, noting functions as energetic particle analyzer and proton energy distribution measurement capability
19 p3314 A69-36679

Instrumental profile determination for high resolution stellar spectrograph, using profiles of telluric oxygen bands obtained from emission line observations
21 p3721 A69-38696

X ray scintillation spectrometers temperature stabilizing circuit, describing amplitude- frequency conversion technique for position stability
21 p3727 A69-39856

Cosmic ray electrons component measurements at balloon altitudes with electron spectrometers
22 p4002 A69-40091

Airborne correlation spectrometer for air pollution remote sensing, describing applications
[RAES PAPER 7] 22 p3896 A69-40488

Image intensifier coupling to electron scanning image converter to increase time-resolving spectrograph sensitivity in simulated reentry studies
24 p4317 A69-43759

SPECTROMETRY

U SPECTROMETERS

SPECTROPHOTOGRAPHY

Instrument profile of birefringent Lyot filter for H alpha line determined from photographic spectra with grating spectrograph
04 p0664 A69-15524

Apollo 9 multispectral photography compared with photographs taken simultaneously by aircraft using same film filter combinations
15 p2608 A69-30452

Spectral reflectances of objects and vegetative backgrounds to generate color photographic technique increasing detection sensitivity and rate
18 p3333 A69-34247

Monochromatic coronal emission line photographs improved by composite technique
20 p3539 A69-37547

SPECTROPHOTOMETERS

NT INFRARED SPECTROPHOTOMETERS

NT ULTRAVIOLET SPECTROPHOTOMETERS

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness
01 p0074 A69-11188

Rapid recording microspectrophotometer for IR to UV absorption spectra of living cells, cell organelles and half micron diameter particles
03 p0428 A69-13109

Spectrophotometer and integral methods to determine solar radiation absorptivity for steady/ unsteady thermal regimes in solids
05 p0846 A69-15901

Daytime sky radiation measurements by high altitude vehicles with spectrophotometer noting spectral radiance, luminance, polarization, albedo and near IR
08 p1317 A69-21071

Remote control spectrophotochronograph to study radiation of high speed high temperature processes, giving construction data and diagrams
12 p2085 A69-26161

Statistical characteristics of ozone measurements with Dobson spectrophotometers and filter ozonometers, determining requirements for maximum effectiveness of ozone network
16 p2787 A69-32639

Amplifier working in conjunction with solid state phase sensitive detector replacing existing commutator in Dobson ozone spectrophotometer
16 p2792 A69-32641

Variations in difference between integrated ozone amount by soundings and total ozone by Dobson spectrophotometers
16 p2792 A69-32642

FORTAN computer program for quality control and calculation of total ozone measurements and lamp tests for Dobson ozone spectrophotometer
16 p2787 A69-32644

SPECTROPHOTOMETRY

NT STELLAR SPECTROPHOTOMETRY

Geophysical investigations on manned orbital space laboratories, discussing space photography, spectrophotometry, terrain pictures and aerosol layers
05 p0759 A69-16633

Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements
07 p1212 A69-18601

Electron transport of Halobacterium cutirubrum, discussing spectrophotometric identification of cytochromes
07 p1068 A69-19481

Simulated solar EUV laboratory spectrophotometry used in preparing optical space flight experiments, discussing instrumentation and calibration
08 p1267 A69-19888

Flame emission spectrophotometric method for ultraminate sodium contamination detection in thin silicon oxide films and cleaned silicon surfaces
[ECS PAPER 306] 08 p1314 A69-20367

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph
09 p1590 A69-21380

Solar soft X ray components observed with ion chamber photometer, studying components relation to transient and slowly varying phenomena at other wavelengths
09 p1578 A69-22170

Spectral lines relative intensities for bright medium excitation gaseous planetary nebula IC 3568, using photoelectric spectrum scanner and spectrophotometry technique
10 p1787 A69-24117

Tilting filter photometer for faint light source spectrophotometry, discussing digital approach used with photomultipliers
11 p1884 A69-24834

Ozone absorption coefficients in vicinity of Hartley band maximum verified by photographic spectrophotometry
16 p2785 A69-32626

Absolute spectrophotometry of IR lines in planetary nebulae spectra determined by diffraction spectrograph
18 p3198 A69-34768

Detection and spectral examination of trace porphyrin complexes by demetallation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry
24 p4279 A69-42557

SPECTRORADIOMETERS

NT INFRARED SPECTROPHOTOMETERS

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
04 p0597 A69-14851

Radio spectrometer with paramagnetic quantum amplifier for astronomical spectral measurements in 8 mm range
15 p2607 A69-30243

Multispectral radiometric analysis of ERTS images, discussing image registration, SNR and atmospheric and diffraction effects
21 p3721 A69-38627

SPECTROSCOPES

U SPECTROMETERS

SPECTROSCOPIC ANALYSIS

Spectroscopic investigation of high density plasma from Li exploded wires
01 p0129 A69-10662

Orbital spectroscopic and radiometric IR experiments, considering moon and Mars surface
[AAS PAPER 68-196] 02 p0312 A69-11474

Q switched laser excitation flash spectroscopic analysis of naphthalene, describing equipment arrangement and experimental results
02 p0254 A69-11544

X ray spectrographic camera for nondestructive spectrum analysis of small samples
03 p0427 A69-13101

Rapid recording microspectrophotometer for IR to UV absorption spectra of living cells, cell organelles and half micron diameter particles
03 p0428 A69-13109

Polar aurora incident energetic particles spectroscopic analysis, showing system of lines and bands intensity dependence on particle energy spectrum and magnetic activity
05 p0752 A69-15799

Spectroscopic charged particle concentration determination, discussing error and limits of applicability in low temperature plasma
05 p0762 A69-15899

Spectroscopy of potassium vapor using laser induced fluorescence, noting laser line coincides with several molecular transitions
05 p0771 A69-15907

Laser photolysis and spectroscopy for photographic recording of absorption spectra of transient intermediates in nanosecond reactions
05 p0772 A69-16025

Quantitative spectroscopy and spectral photometry, discussing developed image properties and connection between exposure and image
08 p1315 A69-20467

Southern planetary nebulae observed with Newtonian spectroscope of Radcliffe Observatory in Pretoria, giving corrected data listing
08 p1392 A69-20561

Glass fibers size, finish and surface treatment identification by pyrolysis attenuated total reflectance IR spectroscopy
09 p1448 A69-22315

Trivalent rare earth ions Stark structure based on spectroscopic observations of stimulated transitions in lasers
10 p1701 A69-23129

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels
10 p1731 A69-23434

Microimpurities in aluminum-yttrium garnets determined spectrographically by using gallium oxide as carrier and Teflon powder for fluorinator
10 p1747 A69-23843

Pulsed tunable lasers, emphasizing dye lasers for visible and near visible light in specialized spectroscopy
11 p1893 A69-24343

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations
11 p1956 A69-24401

Spectrometric oil analysis procedure [SOAP] for predicting failure of oil wetted parts in small turboprop aircraft engines
[SAE PAPER 690325] 11 p1941 A69-24508

Covalence degree of activator-ligand chemical bonds effect on spectroscopic properties of transition metals
11 p1907 A69-25031

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques
[AIAA PAPER 69-331] 13 p2242 A69-28267

Spectroscopic determination of temperature fields in water and transpiration cooled constricted Ar arc jets at atmospheric pressure
15 p2657 A69-30155

Spectroscopic measurements of charged particle concentrations in jet produced by pulsed plasma generator

15 p2663 A69-30991

Spectroscopic study of P Cygni showing ionization temperature, Balmer decrement agreement with calculated value and chemical composition

16 p2864 A69-32595

Mossbauer spectroscopy, discussing nuclear resonance fluorescence and equipment

18 p3099 A69-34622

Ion structure of keto and enol and McLafferty rearrangements determined by ion cyclotron resonance spectroscopy

19 p3265 A69-36288

Spectroscopic quantitative analytical method for measuring atomic absorption in flame based on determining integral absorption magnitude during evaporation

20 p3539 A69-37605

Spectrographic analysis for ferrous and nonferrous alloys as nondestructive testing

20 p3551 A69-38313

Nonpolar LF latitude variations based on spectroscopic and harmonic analysis of zenith telescope and prismatic astrolabe observations

24 p4391 A69-43791

SPECTROSCOPIC TELESCOPES

NT STRATOSCOPE TELESCOPES

Lasers and holography applications in astronomy including high resolution spectrographic diffraction gratings manufacture and astronomical objects photographic pictures evaluation

15 p2610 A69-30880

Solar image motion frequency spectra analysis via photoelectric equipment, showing influence on photographic pictures, spectra and modulation transfer functions for diffraction telescope

17 p3029 A69-33047

NT X RAY SPECTROSCOPY

Exploding wires as light source for quantitative spectroscopy, noting optically thin plasma clouds with radial symmetry

01 p0117 A69-10658

Time resolved spectroscopy of exploding wire plasmas in visible spectrum of various elements, determining plasma characteristics

01 p0119 A69-10671

Beam-foil spectroscopy - NASA Conference, University of Arizona, November 1968, Volume I

03 p0470 A69-13160

Beam-foil spectroscopy problems noting light collection, spectrograph design, broadening of spectral lines by Doppler effect and other complications

03 p0470 A69-13161

Spectroscopy of fast atoms resulting from fast ion impact with gas targets and electron capture into excited state

03 p0471 A69-13162

Beam-foil spectroscopy above 5.5 Mev for multiply ionized atoms, noting use of Tandem accelerator, spectral resolution, beam intensity and Doppler effect

03 p0471 A69-13163

Beam foil spectroscopy - NASA Conference, University of Tucson, November 1967, Volume 2

03 p0507 A69-13168

Beam foil spectroscopy for measuring wavelengths and spectral line intensities

04 p0595 A69-14276

Static beam deflection in beam foil spectroscopy for determining parent ionization stage of emitting ions

04 p0595 A69-14279

Superradiant and laser spectroscopy in second positive system of molecular nitrogen

04 p0609 A69-14285

Spectroscopy history from Newton to present, stressing need for standardized system of spectral classification

06 p0999 A69-16974

Paraelectric resonance spectroscopy on KCl, using bistable dipole model

06 p0982 A69-18235

Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure

07 p1190 A69-18695

Auger and photoelectron spectroscopy for chemical analysis, noting effects of sample thickness, sample potential, surface contamination and X ray incident angle

07 p1075 A69-19775

Shock heated helium plasma temperature measurements by spectroscopy compared to Rankine-Hugoniot calculations including ionization effect

09 p1548 A69-21963

Coherent detection spectroscopy with laser oscillator, emphasizing high resolution and applications in astronomical spectroscopy and IR

10 p1696 A69-23684

Spectroscopy application to spontaneous combination scattering of light

12 p2108 A69-26618

Stimulated emission of cerium trifluoride-positive trivalent Nd ion laser noting absorption, luminescence, excitation, emission spectra and metastable state lifetime

14 p2460 A69-29645

Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties [AIAA PAPER 67-149]

16 p2789 A69-31868

Level crossing signal obtained by magnetic/electric field modulation, tabulating corrections to widths and centers for distortions

17 p3009 A69-34155

Quantum transitions between molecular or atomic energy levels noting microwave spectroscopy utilization

18 p3099 A69-35405

SPECTRUM ANALYSIS

Power spectral indices of March 6, 1968 solar radio burst, suggesting Razin effect

01 p0148 A69-10054

Hydrogen content effect on relaxation spectrum of alpha titanium, using nondestructive tests

01 p0096 A69-10614

Copper exploding wire Kerr-cell time-resolved absorption spectra analysis, considering copper atom transition

01 p0118 A69-10665

Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure

01 p0024 A69-10683

Rapid scanning Fabry-Perot spectrometers, considering time resolution, wavelength resolution, wavelength interval size, aperture diameter and limitations of mechanical components

01 p0082 A69-10837

Laser beam spectra for modulation by electrooptic Doppler shift, considering sawtooth and triangular functions for applied electric field

01 p0091 A69-10843

Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares

01 p0154 A69-10894

Spectral parameters of VLF radio noise given as functions of azimuth from atmospheric analyzer observations

01 p0033 A69-10971

Numerical filtering procedures for gust spectrum analyses compared for gain and phase lag frequency response characteristics, discussing gust acceleration spectra

01 p0084 A69-11052

Inner Van Allen belt proton dose rate and spectral charged particle environment profiles correlated, noting agreement with theoretical values

01 p0145 A69-11081

Automatic spectroelectrophotometer for measuring sky spectral brightness at 6910-4040 angstroms, determining point of minimum brightness

01 p0074 A69-11187

Atmosphere spectral transparency and stability spectrophotometric studies based on measuring solar aureole brightness

01 p0074 A69-11188

Time compression system with ultrasonic diffraction cell allows coherent light optical spectrum analyzer to function at audio frequencies

01 p0035 A69-11283

Nitrous oxide absorptance, deriving analytical expressions for transmission spectra

02 p0236 A69-11452

Eight color narrow band photometry of bright stars, discussing band system, instrumentation, data and calibration

02 p0313 A69-11487

Soviet book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion

02 p0255 A69-11800

Absorption oscillator strengths of Ba 2 lines in UV and visible spectral regions, using cascade arc in argon with barium vapor

02 p0242 A69-11872

Spectral measurements for matrix isolated lithium fluoride extended into far IR to obtain evidence for linear lithium fluoride dimer

02 p0205 A69-12465

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals

02 p0257 A69-12560

Automatic determination of relaxation and retardation spectra for linearly viscoelastic materials from experimental data using simple numerical techniques

02 p0348 A69-12605

High resolution spectroscopic study of stimulated rotational transitions of nitrogen molecules using crossed grating Echelle spectrograph

02 p0284 A69-12621

Stress and heat flux cospectra estimation using Busch-Panofsky observations

02 p0276 A69-12698

Type 4 bursts mobile spectrum of september 14, 1966 interpreted by considering plasma effects on synchrotron emission mechanism

02 p0309 A69-12754

Solar atmosphere from two dimensional study of solar spectrum, discussing satellite observations of corona and upper chromosphere

02 p0329 A69-12785

Procedure and apparatus for integral microwave and X ray and spectral measurements of quasi-steady plasma radiation

03 p0473 A69-12897

Fraunhofer lines in solar spectrum in 2950-8770 Å wavelength region, noting 8000 additional unidentified lines

03 p0507 A69-13170

Line identification methods in solar extreme UV and X ray regions

03 p0507 A69-13171

Spectral line identification in quasars, noting emission lines characteristic of emission nebulae and absorption lines of stellar atmospheres

03 p0508 A69-13173

Growth curve for analysis of stellar spectra, determining relative f values and abundance

03 p0508 A69-13174

F values for Ti II, Cr II and Fe II by empirical astrophysical line strength analysis, discussing f value determination from stellar growth curve

03 p0508 A69-13175

Stellar image and spectrum distortions during occultation observed from satellite, discussing recovery of atmospheric composition data from stellar spectra

03 p0421 A69-13346

Shock waves luminescence temperature dependence measured by UV and visible radiation, noting dependence on front glow duration

03 p0415 A69-13411

Bolide fireball radiation maximum efficiency from observed spectra, using monochromatic radiation efficiency data for rarefied atoms and ions in meteor comas

03 p0512 A69-13692

Bound excitons spectra in CdS, semiconductor band structure and tabulating positions of lines identified with excitons

03 p0488 A69-13784

Spectrum analysis of pulse signals by point to point measurements of magnitude and phase of pulse-like time functions, using narrow band filter output

03 p0399 A69-13939

Revision of RGU photometry fundamental data, noting main sequence curve position of O-B5 and distinction between zero age main sequence and class V

03 p0514 A69-13963

HF gas discharges, discussing plasma temperature and density, plasmoid length and spectroscopic applications

03 p0482 A69-14217

Mossbauer spectra of shocked and unshocked iron meteorite and fayalite
03 p0517 A69-14231

Photographic recording to produce spatial analog of temporal Fourier spectrum of astronomical source used for distinguishing weak periodic signal from background signal
04 p0556 A69-14294

Meteor spectrum from 1966 Leonid shower considered to be closer to comet nucleus spectra than previous spectra
04 p0655 A69-14664

Correlation function and spectrum analysis of passage of random noise and signal through multistage frequency multiplier
04 p0557 A69-14777

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements
04 p0598 A69-14854

Near earth atmospheric spectrum characteristics determined by analytical expressions for elementary signals in 2-30 kHz range
04 p0593 A69-15105

Nonattenuating signals spectra construction by means of generalized function method and Laplace transforms
04 p0583 A69-15134

Current nature on infinite cylindrical antenna in compressible anisotropic lossy plasma medium, noting characteristic waves on infinite cylinder
04 p0578 A69-15215

Fast Fourier transform, discussing algorithms for sampled Fourier spectra and FORTRAN programs
04 p0625 A69-15223

Spectral study of crystal lattice of gallium phosphides for influence of vacancies and impurities on band formation
04 p0643 A69-15258

Current carrier concentration temperature dependence in Te-doped silicon single crystals by analyzing photoconductivity spectra
04 p0644 A69-15267

Laser light scattering by plasma using theory of ionospheric scattering of radar signals, determining scattered spectrum
05 p0798 A69-15586

Crab Nebula and Cygnus XR-1 X ray spectra shown to have differential number power law spectra and same intensity
05 p0813 A69-15846

Spectra of close binary systems, analyzing abundance anomalies, noting metallicity results
05 p0822 A69-15854

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature
05 p0824 A69-16060

Bandwidth effect on wave recordings cross spectra interpretation from spatially separated sites, deriving relationship between propagation velocity and velocity bandwidth
05 p0756 A69-16272

Secondary particle spectra from proton-proton interactions analyzed in two temperature statistical model, considering momentum distributions
05 p0797 A69-16368

Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
05 p0757 A69-16407

Frequency structure of pulse energy or pulsar intensity, emphasizing total energy density received per pulse
05 p0828 A69-16660

Spectrum of accelerated particles on surface of stars revealed by observation of photospheric lithium and beryllium
05 p0817 A69-16711

Atmospheric turbulence flight tests random data analysis to stimulate power spectra and transfer functions
05 p0767 A69-16756

Digital spectra analysis by Fourier transform and comb filter for determination of voltage and power spectra
05 p0722 A69-16762

Spectroscopy history from Newton to present, stressing need for standardized system of spectral classification
06 p0999 A69-16974

Single crystal InAs wafers reflection spectra from specular surfaces, obtaining direct interzone transition values and fine structure
06 p0979 A69-16995

Identification of emission lines from 3200 to 7000 Å in Eta Carinae spectrum, noting P Cygni-like absorption lines
06 p1002 A69-17263

Spectrum and amplitude fluctuations of laser light propagating through liquid helium, obtaining spatial correlation function of refractive index fluctuations
06 p0957 A69-17267

Cosmic radiation propagation in interstellar space, discussing differential kinetic energy spectra of protons, He, C and O nuclei and Fe
06 p0988 A69-17269

Spectra analysis of proton and He nuclei having different charge-to-mass ratios to obtain information on solar modulation and injection spectra
06 p0988 A69-17272

Mass motion in solar flares, discussing loop flares from emission line profile characteristics
06 p0993 A69-17429

Multichannel HF resolution spectral analyzer of pulses reflected from ionosphere applied to dependence of cross correlation coefficient on frequency separation
06 p0897 A69-17740

Long wave radio stations field intensity spectral analysis data evaluated to determine vertical ionospheric displacements at sunset and sunrise
06 p0922 A69-17752

Radio spectra analyzed for NGC 1052 and NGC 4278 elliptical galaxies, discussing 178 MHz flux density, anomalies and radiation absorption mechanisms
06 p1009 A69-17959

Spectral brightness of clouds and various terrains in visible and near IR regions measured from aircraft
06 p0953 A69-17991

Terrestrial and Martian aerosols estimation based on carbon dioxide spectral and Mariner 4 RF occultation measurements [AIAA PAPER 69-52]
06 p1011 A69-18199

Instrument profile of grating spectrograph determined by applying He-Ne laser mode separated in Fabry-Perot interferometer
07 p1131 A69-18405

InAs solid solutions reflection spectra with CdTe, CdS, CdSe and ZnTe compounds, determining conduction bands
07 p1198 A69-18511

Quasi-periodic variations of solar radio emission intensity related to solar activity variations
07 p1211 A69-18516

Dayglow determination from aerosol spectrum obtained through data of brightness and polarization of day sky
07 p1211 A69-18545

Spectroscopic binary 16 Piscium, showing unusual period of 47.25 days
07 p1214 A69-18662

Photoionization cross section measurements for sodium line by analyzing electron-ion recombination radiation from sodium seeded plasma, determining electron temperatures and concentrations
07 p1184 A69-19164

Hot gases optical properties based on real spectra, discussing radiative processes and cross sections calculation methods
07 p1185 A69-19166

Fe II lines relative intensities in eta Carinae spectrum, discussing possible intrinsic reddening of object and representation of visible and near IR continuum
07 p1217 A69-19253

Spectrum data of Nova Vulpeculae /1968/ summarized concerning dispersion figures
07 p1220 A69-19337

Spectrum of light scattered by particles suspended in turbulent fluid
07 p1157 A69-19417

Lines displacement in binary star spectrum due to blending, presenting graphs displaying magnitude of effect under various conditions
07 p1223 A69-19624

Radio spectrum of quasi-stellar object identified as Parkes 2134 plus 004
07 p1224 A69-19708

Emission spectrum analysis of faint solar prominences noting kinetic temperature, turbulent velocity and electron density
07 p1210 A69-19718

Plasma spectral line shifting and broadening under ion and electron impact
07 p1187 A69-19720

UV emission spectrum of double star Boss 1985, excitation potential effect on Fe II lines and table identifying emission lines
08 p1385 A69-20060

Electro-optical and magneto-optical effects in solids, noting high sensitivity and resolution in application to spectroscopic investigation of absolute spectra
08 p1371 A69-20217

Spectral distribution and energy of luminous radiation emitted during theta pinch in Ar plasma, noting energy maximum as function of pressure
08 p1362 A69-20280

Nine spectra of recurrent Nova T Pyxidis during fifth /1966/ outburst compared to previous outbursts
08 p1391 A69-20396

Transient response spectrum of nonlinear cubic spring mass system subjected to step function input, discussing viscous damping effects on peak response
08 p1413 A69-20402

Radio signal spectrum scattered at oscillating interface calculated in Kirchhoff approximation, determining scattering factors
08 p1275 A69-20432

Gas laser emission natural frequency fluctuations spectral density measured by auxiliary heterodyne laser
08 p1326 A69-20540

Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium fluoride crystal, noting spectrum shift with increasing crystal temperature
08 p1326 A69-20544

Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
08 p1394 A69-20624

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux
08 p1380 A69-20728

Doublet structure suppression in mixtures of cesium and foreign gases, discussing absorption observations
08 p1356 A69-20736

Spectrum variations of type 4 radio burst as source rises through solar corona, determining electron density and magnetic field distributions in corona
08 p1380 A69-20775

Abundance determinations and spectrum intercomparisons in late type peculiar stars, discussing carbon and heavy metal star classes
08 p1403 A69-20910

IR photoconductivity spectra at surface of gold doped silicon, establishing monopolarity
08 p1373 A69-21073

Electronic optical system to process time-varying signals as optical spectrum analyzer for measuring power spectral density of input time function
08 p1317 A69-21086

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
09 p1588 A69-21367

Correlated spectra of related sunspot number and solar 10.7 cm radiation component, noting variance for solar rotation periods
09 p1574 A69-21397

Differential brightness of night airglow spectrum, obtaining rotational temperature by comparison with synthetic spectra
09 p1488 A69-21656

Cross-spectral density of pressure induced on lifting surface by isotropic atmospheric turbulence, solving integral equation [ONERA-TP-681]
09 p1613 A69-21689

Vertical ionospheric motions near magnetic equator measured by Doppler shifts of incoherent scatter frequency spectra
09 p1489 A69-21704

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection
09 p1490 A69-21766

High energy protons, helium and gamma rays observed by particle telescope on board OSO-C, obtaining integral rigidity spectra of proton and helium nuclei
09 p1579 A69-22172

Red autoionizing lines relative gf values for calcium measured by shock tube experiment
09 p1601 A69-22208

Pulsed RF spectra analyzer displays, noting responses to CW and pulsed signals and Fourier and pulsed repetition rate lines
09 p1460 A69-22791

Interplanetary magnetic fields characteristics and magnetic inhomogeneities spectra from cosmic ray variation studies used to obtain scattering mean free path
10 p1757 A69-22824

Optoelectronic spectrum analyzer with raster illuminator for producing two dimensional Fourier transform to analyze two dimensional functions
10 p1725 A69-23301

Transitions between heavy hole and spin orbit split bands in uniaxially stressed Ge and GaAs, noting spectra for various temperatures and valence band parameters
10 p1745 A69-23359

Atmospheric extinction function in Chile by using photoelectric spectrum scans, observing neutral component, Rayleigh scattering and ozone absorption variations
10 p1777 A69-23386

Soviet book on highly doped semiconductors covering energy spectrum analysis, kinetic effects, optical properties, fabrication and applications
10 p1746 A69-23522

Dynamic spectrum of July 7, 1966 proton flare, considering short wave fadeout at 0027 UT and intense burst of spectral Type 2
10 p1765 A69-23750

Discrete Fourier transforms, discrete linear filters and spectrum weighting for purpose of sidelobe reductions
10 p1666 A69-23888

Analytic investigation of spectrum of electrical signals induced by spherical defects in ferroprobe sensors
10 p1675 A69-24072

Power spectrum analysis of photometric observations of white dwarf stars for measuring variability of stellar luminosity
10 p1788 A69-24124

Nitrogen plasma total radiation intensity under pressure and at high temperatures calculated from radiation spectrum
11 p1922 A69-24231

Quasar and radio galaxy spectra obtained on Cassegrainian focusing diffraction spectroscopy
11 p1951 A69-24236

Flux densities and spectral indices of radio sources in 3C and 3CR catalogs, noting measurements at 86 MHz frequency
11 p1951 A69-24237

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness
11 p1955 A69-24391

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer
11 p1956 A69-24395

Venus albedo dependence on wavelength in UV spectrum between 4500 and 3200 A from reflector observations
11 p1957 A69-24406

Cepstrum/Fourier transform of log-spectrum of signal as model for prediction of perception of pitches in harmonic residue/ambiguity of pitch/
11 p1834 A69-24571

Power output and radiation spectra of trivalent Nd doped liquid lasers based on phosphoryl chloride with tin and titanium chlorides
11 p1894 A69-24620

Dwell time of sample particles in plasma excitation zone, noting effect on spectral analysis of sample materials injected into spark discharge plasma
11 p1926 A69-24624

Monograph on method and results of measurements of mobilities spectrum ion density and conductivity in upper troposphere and stratosphere
11 p1877 A69-24636

Real time Fourier spectroscopic system for synthesis of spectrum of interferogram, noting polystyrene IR transmission spectra
11 p1884 A69-24837

Spectrum space-time characteristics of electrically produced plasma discharges magnetically compressed to discharge tube wall, using spectrochromograph and spectrographs
11 p1927 A69-25217

Balloon-borne IR spectrometry to study atmospheric nitric acid vapor compared with absorption by ozone and methane
11 p1879 A69-25407

Solar X ray bursts analyzed by dynamic spectra based on time history of intensity of bursts
11 p1951 A69-25419

Free emission spectrum analysis of ruby laser with external mirrors and elimination of axial mode discrimination
11 p1900 A69-25547

Recombination emission spectrum relation to plasma recombination coefficient, determining plasma electron temperature from continuous spectrum intensity
11 p1934 A69-25566

Lunar far side surface spectral inhomogeneities in UV from Zond 3 measurements
12 p2154 A69-25817

Calculated UV spectra of solar radiation reflected from atmosphere compared with satellites photometric measurements, attributing radiation intensity distribution asymmetries to seasonal dependence of ozone content
12 p2064 A69-25952

IR absorption spectrum of Br-doped n-CdTe specimen, considering donor level transfer mechanism
12 p2142 A69-25979

Emission spectrum of ruby laser as function of relative orientation of resonator and active crystal axes, noting spectrum width
12 p2104 A69-26029

High speed streak camera for recording fast processes, noting changeability from optical to UV spectral range
12 p2085 A69-26155

Spectrum analysis of Jupiter atmospheric composition, obtaining abundances of minor constituents
12 p2155 A69-26205

Physical parameters and chemical composition of DD Lac atmosphere from spectral analysis
12 p2156 A69-26219

Element contents of supergiant HD 190603 at atmosphere based on spectrophotometric analysis including temperatures, turbulent velocity, gravity acceleration and electron concentration
12 p2157 A69-26336

Amplitude spectra of periodic pulse sequences or pseudonoise sequences calculated using weighting and shape functions
12 p2030 A69-26389

Photometric and colorimetric characteristics of hot gas optically thin in continuous spectrum with optical thickness of several units in Balmer series lines
12 p2159 A69-26667

Primary cosmic ray energy spectrum studies during 11-year cycle based on changes in intensity at various altitudes
12 p2149 A69-26682

Spectral model used for analysis of atmospheric turbulence as related to loads on gliders
12 p2127 A69-26931

High pressure arc discharge diagnostics with spectroscopic method relating spectral profiles to central temperature, pressure and temperature distribution
12 p2094 A69-26968

Multispectral and calibrated Alaskan Arctic aerial survey of sea ice, thaw lakes and polygonal soils
12 p2075 A69-26996

Successive explosions produced two gas systems observed in six Seyfert galaxy nuclei by spectrophotometry, using diffraction spectrographs
12 p2164 A69-27022

Colorimetric studies of galaxies exhibiting red shift with increasing radial distance from center
12 p2164 A69-27025

Blue, UV and yellow spectral observations of M 82 (NGC 3034), obtaining polarization dependence on reciprocal of wavelength, polarization and color characteristics
12 p2169 A69-27057

Spectral criterion for distinguishing mode locked and nonmode locked laser signals
13 p2270 A69-27197

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level
13 p2246 A69-27535

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
13 p2246 A69-27537

Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
13 p2326 A69-27554

NGC 4194 galaxy emission line spectrum analysis showing presence of highly excited gas in nucleus and in bright central region similar to NGC 7714
13 p2339 A69-27571

Dynamic Michelson interferometer equipped with Ge detector to obtain spectra of airglow from 1.2-1.6 microns
13 p2252 A69-27587

Venus carbon dioxide spectral band analysis methods, discussing spectral lines and rotational temperatures obtained
13 p2344 A69-27649

VLF morning and evening magnetosphere emission distinction by studying spectrum width as function of variations in K index
13 p2253 A69-27740

GaS, GaSe and InSe crystals band structure from analyzing reflection spectra, noting sensitivity to visible, IR and hard radiation
13 p2317 A69-27883

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures
13 p2271 A69-27888

Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma
13 p2310 A69-28029

GaAs photoelectric emission at different activation degrees by adsorbed Cs and BaO layers, noting spectral response characteristics differences and causes
14 p2504 A69-28993

Sco-Cen B stars radial velocities, determining spectroscopic binaries
14 p2519 A69-29136

Spectral analysis of O and Ti based on O extraction, using Ni tank in A atmosphere with DC arc
14 p2446 A69-29158

Passive Q switch laser single pulse formation time and spectral width using balance equations
14 p2458 A69-29166

Oscillation spectrum with harmonic phase or frequency modulation, analyzing structural dependence on initial phase
14 p2412 A69-29427

Quasi-linear approximation for spectrum analysis of LF plasma wave oscillations in steady electric field
14 p2492 A69-29468

Supergiant HD-33579 in Magellanic cloud by model atmospheres, discussing abundances
14 p2529 A69-29979

Residual phase term influence on compressed signal shape, analyzing linearly frequency modulated signal spectrum and sidelobe suppression in pulsed radar
15 p2564 A69-30143

Nonadjustable Fabry-Perot scanning interferometer for gas laser spectra analysis, using barium titanate piezoceramic elements
15 p2608 A69-30246

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals
15 p2633 A69-30257

Design and efficiency for signal-time compressors of spectral analyzers using electron beam tubes with charge storage
15 p2576 A69-30351

Comet Ikeya-Seki tail spectra from nebular spectrograph, tabulating energy distribution in comet tail, noting similarity to solar spectrum
15 p2685 A69-30524

Radio source W 43 distance determined from analyzing neutral H line profile and radial velocity in excited H line 104 alpha
15 p2687 A69-30543

Ca XV spectrum in vacuum UV under laboratory conditions, discussing fine structure of ground level of Ca XV and coronal lines
15 p2688 A69-30553

Atmospheric transmission functions dependences on absorbing material, pressure and temperature in 15 micron band of carbon dioxide, introducing corrections
15 p2597 A69-30653

Spin doublet formation analysis in X ray satellite spectra, revealing K, L and M spin doublets existence
15 p2675 A69-30700

Ruby laser lasing modes spectral time dependence attributed to population inversion inertia responsible for mode competition
15 p2633 A69-30725

Power spectrum analyzer of weak periodic signal obscured by white noise by zero interactions count of signal and noise mixture
15 p2579 A69-30945

Optimal parameters of cuvette for use with helium-neon laser as excitation source to record combination light scattering spectra of powdery materials
15 p2635 A69-31105

Universal transfer function computer based on synchronous spectrum analyzer having outputs combined in cross spectrum correlation computer to yield plot in Bode form
15 p2615 A69-31282

Carbon atoms presence in Venus upper atmosphere from Venus spectrum obtained by Aerobee rocket experiment

15 p2698 A69-31341

Lyrid and Perseid meteor spectra for spectral line identifications in 3100-4000 Å UV range, listing lines from six neutral atoms and five ions

15 p2700 A69-31500

Induction period of reactions behind incident shock waves traveling through undiluted high temperature CO and molecular oxygen mixtures, using CO flame spectra

16 p2877 A69-31768

Atmospheric IR spectra determination from transmission functions overlapping effects of atmospheric gases

16 p2814 A69-31792

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals

16 p2796 A69-31822

Vertical ozone distribution from emission and absorption in 9.6 µ band determined during IGY in Switzerland

16 p2785 A69-32625

Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model

16 p2828 A69-32792

Hyperfine spectrum analysis of NaCl at low field using molecular beam electric resonance method, discussing Hamiltonian function representation

16 p2815 A69-32794

Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum

17 p3032 A69-33161

Acoustic spectrum averager for Mariner spacecraft environmental tests, calculating rms average 1/3 octave spectrum bands in real time [JPL-TR-32-1442]

17 p2946 A69-33658

13 color narrow band photometry of 1000 bright stars in tubular form, discussing sample points, Balmer discontinuity, absolute energy calibration, etc

17 p3038 A69-33692

Homology within solar flare associated type 2 radio events from dynamic spectra

17 p3024 A69-33803

Power spectral analysis of chromospheric inhomogeneities in July 1967 and June 1968, tabulating mean heights of formation in solar atmosphere

17 p3040 A69-33811

Numerical solution of boundary value problems, discussing spectral domain and scattering matrix formalisms

17 p2929 A69-33882

Compressed signal spectral analyzer resolving power, discussing dynamic amplitude range influence and weighting functions role

17 p2939 A69-33906

Resolving power of spectral analyzer with in-phase storage increased by weighted signal treatment

17 p2931 A69-33908

Spectral analyzer for structural noise spectrum of scanning ray TV transmitter

17 p2939 A69-33909

Absolute gf values for Fe I and Fe II lines between 3190 and 3315 Å measured by spectral absorption through shock heated gas containing Fe

18 p3175 A69-34304

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements

18 p3198 A69-34756

Radio sources spectrum measurement results at cm wavelengths in tabular form, noting flux density relationship to frequency

18 p3200 A69-35132

Discrete radio sources spectra at decametric wavelengths, showing variation with frequency and radio wave generation mechanism leading to various spectral types

18 p3200 A69-35134

Jupiter decametric radio source analysis suggesting two component model of rotation at both constant and variable rotational periods

18 p3202 A69-35212

Solar cycle line in horizontal force of earth magnetic field resolved by power spectrum analysis suggesting 80 year cycle

18 p3205 A69-35414

Random vibrations in linear systems during spectral and correlation analysis, noting nonlinear systems

18 p3227 A69-35491

Multidimensional discrete control systems for spectral characteristics of random processes in vibrational and fatigue strength testing of machines and equipment

19 p3286 A69-35890

Object discrimination based on IR spectral differences, reviewing calibrated radiometers, relative spectrometers and imaging sensors

19 p3373 A69-36056

Celestial spectra forbidden lines tabulated by element and ionization stages, describing laboratory spectrum analysis programs

19 p3421 A69-36212

M8 electron temperature and internal kinematics from photoelectric Fabry-Perot spectrometric recording of H alpha line profiles and N II

19 p3424 A69-36334

High index frequency modulated waveform spectrum analysis including upper bound on approximation error to avoid fallacy of Woodward theorem [IEEE PAPER 68-TP-74-COM]

19 p3276 A69-36485

Spectrum of axial modes of laser with inhomogeneous longitudinal pumping, dividing parameter space into steady emission regions

19 p3339 A69-36880

Spectrum measurement of He-Ne laser by Fabry-Perot interferometer, determining mirrors flatness

20 p3536 A69-36945

Vibration phenomena analysis by transfer function computer, discussing precision spectrum analyzers

20 p3498 A69-37003

Book on linear digital filtering and discrete spectrum analysis, emphasizing frequency domain description of signals and systems

20 p3487 A69-37146

Relative displacement spectra analysis illustrating shock spectra errors, comparing real system response with simple single degree of freedom system response

20 p3548 A69-37301

Energy level NMR spectral analysis for spin systems with sets of magnetically nonequivalent chemical-shift equivalent nuclei

20 p3579 A69-37348

WY Gem star spectroscopic observation showing peculiarity about forbidden and absorption spectra superposition

20 p3598 A69-37464

HD 200775 spectrum analyzed for absorption lines wavelengths and equivalent widths, noting role for NGC 7023

20 p3599 A69-37469

Zeta Tauri shell spectrum radial velocity measurement results compared with extrapolated seven year curve by Delplace

20 p3599 A69-37471

Solar and geomagnetic activity persistence by variance spectrum analysis, noting sunspot numbers and radiation flux autocorrelation functions

20 p3601 A69-37508

Solar rare earth abundances determined from high resolution tracings of solar spectrum, comparing results with nucleosynthesis theories

20 p3602 A69-37539

Spectral calculation deformations and errors estimation using Blackman-Tukey spectral formulas

20 p3571 A69-37697

Type 3 bursts spectra graphical representation, giving probable solar origin and curves of corona temperature

20 p3591 A69-37970

Periodicities in solar activity variation from correlation spectral analysis, establishing monotonically decreasing component and secular variations in activity

20 p3607 A69-38045

Radio source flux density values in revised 3C catalog determining spectrum, discussing effects of relativistic electron energy distribution, self absorption and spatial distribution

20 p3609 A69-38138

LF spectral analysis of flowing water pressure pulsations behind single bulge on hydrodynamic channel smooth wall at low disturbance level

20 p3518 A69-38202

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall

20 p3518 A69-38203

Revised solar iron abundance by photospheric Fe I lines analysis using Garz and Kock f values, noting influence on solar photospheric model

21 p3796 A69-38475

Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency

21 p3796 A69-38479

Spectrum, latitude dependence and diurnal variation of night airglow emission, noting space and time correlation and magnetic activity relationship to luminous intensity

21 p3711 A69-38514

Spectra and intensities of rocket releases for upper atmosphere composition, temperature and reaction kinetics, noting chemiluminescence and atomic and molecular emissions

21 p3712 A69-38522

Multispectral radiometric analysis of ERTS images, discussing image registration, SNR and atmospheric and diffraction effects

21 p3721 A69-38627

M 82 direct photographs sequence observation in optical IR region, noting small nucleus and unbroadened inclined emission lines

21 p3799 A69-38649

Argon ion laser single frequency output spectrum characteristics

21 p3738 A69-39140

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures

21 p3738 A69-39146

Earth-pole wobble /1951-1966/ by spectral analysis using least square fit method

21 p3716 A69-39244

Solid metal oxide particles temperature in premixed flames determined from intensity/ wavelength plots of continua

21 p3852 A69-39592

Critique of Shivanandan suggestion of background radiation spectrum distortions

21 p3815 A69-39612

Catalog of reflection nebulae with known dimensions and flux characteristics noting spectrum characteristics

21 p3816 A69-39722

Fourier spectrum analysis of solar line oscillation sequences, discussing power spectra and lifetime of oscillation phase

22 p4019 A69-40286

Splash and return albedo electrons in cosmic ray electron spectrum between 12 Mev-1 Gev measured by high altitude balloon flight

22 p4005 A69-40510

Spectral characteristics of structured areas of luminosity in polar cap region, reporting spatial and time variations plotted from NASA airborne survey

22 p3940 A69-40522

Jupiter spectrum observations in 2.8-14 micron range, describing absorption strength and brightness temperature, basing analysis on ammonia, methane and hydrogen absorption

22 p4028 A69-40662

Quasar association with galactic clusters, noting red shift and spectral correspondence

22 p4029 A69-40763

Random processes integration and differentiation and spectral density determination, examining Markov, Gaussian and point processes

22 p3975 A69-40777

Agricultural and forestry applications of tethered balloons, discussing observation angle effect on spectral signature response and signal preprocessing

22 p4053 A69-40805

Glass filter systems for aerial color photography developed from spectral studies of sunlight, skylight and airlight in Rayleigh atmosphere

22 p3948 A69-40986

Multispectral processing of Apollo 6 earth photograph, evaluating geologic, vegetative and cultural features from red, green and blue portions of visible spectrum

22 p3941 A69-40987

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

22 p4007 A69-41093

Sensors array to determine propagation wave vector velocity via high resolution frequency wavenumber spectrum analysis, emphasizing seismic applications

22 p3902 A69-41220

Heat resistant materials integral and spectral radiative properties in IR and visible regions determined by calorimetry and IR spectrometer

23 p4237 A69-41329

Autoionized resonance transitions of He at 206.2-192.2 Å using He continuum produced by capillary spark, also producing He II line spectra

23 p4191 A69-42149

Carbon monoxide presence in Martian atmosphere from Mars line spectra, giving content, surface pressure and concentration

23 p4220 A69-42379

Blue component of HD 237006 and VV Cephei spectra, suggesting greater luminosity of blue star in late type supergiant

24 p4387 A69-43353

Solar flares accompanied X ray emission temporal and spectral variations, showing departure from thermal equilibrium

24 p4371 A69-43608

Total solar eclipse of 5 February 1962 observed for spectrophotometry of flash spectrum, finding abnormal intensity gradients of H alpha and D3 lines

24 p4388 A69-43636

Thermally scanned Fabry-Perot interferometer in flat-flat resonator configuration, featuring high transmission and large usable apertures, used for spectral analysis

24 p4329 A69-43757

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness

24 p4390 A69-43781

Brightness temperatures and spectra of Venus, Mars, Jupiter and moon measured from 8 to 14 microns by reflector and prismatic spectrometer

24 p4390 A69-43785

Venus albedo dependence on wavelength in UV spectrum between 4500 and 3200 A from reflector observations

24 p4391 A69-43796

Rotational microwave spectrum of 2-methylfuran, using fourth order perturbation method for internal rotation A-E doublet splittings

24 p4280 A69-43811

SPECULAR REFLECTION

Specular component of ionospherically reflected radio waves between antenna array elements measured for statistical variations

01 p0032 A69-10968

Electromagnetic theory of surface radiation properties, analyzing specular reflectance of optically smooth surfaces

04 p0684 A69-14357

Single crystal InAs wafers reflection spectra from specular surfaces, obtaining direct interzone transition values and fine structure

06 p0979 A69-16995

Specular reflection computer program utilizing virtual image technique to determine reflection characteristics of enclosed diffusely emitting surface [AIAA PAPER 69-65]

06 p1040 A69-18215

Diffuse reflection of monochromatic radiation by semiinfinite plane layer in case of isotropic scattering, reducing problem to power series

11 p1960 A69-24732

Angular distribution of electrons leaving plasma at electrode boundary, using kinetic Boltzmann equation with scattering function and specular reflection

11 p1933 A69-25546

Specularly vs diffusely reflecting cylinders for cavity type sources of approximately black body radiant energy, noting ray tracing of cones

12 p2130 A69-26245

Light diffusive reflection from rough surface measured as function of angle of incidence in presence of specular component by goniospectrophotometer

14 p2485 A69-29171

Earth radar studies, relating echo behavior to rocket altitude and surface electrical characteristics

14 p2416 A69-29531

Cauchy system for reflection and transmission functions of finite isotropically scattering atmospheres with specular reflectors, noting use for ozone and cloud heights measurements

15 p2597 A69-31152

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model [AIAA PAPER 69-624]

17 p3070 A69-33259

ATS 3 satellite reflectometer experiment carrying test samples to measure specular reflectance, noting silica shield effects [AIAA PAPER 69-644]

17 p3071 A69-33270

Coherent light scattering from rough surface, studying effects of target tilt, translation and rotation on speckle patterns produced

18 p3174 A69-35281

Remote sensors geometrical optics, considering power flow direction, specular reflection, imaging and dihedral in case of specular reflectors, reflection and diffraction

20 p3577 A69-37744

Parametric excitation theory involving Langmuir and ion-acoustic waves for homogeneous plasma slab with specular particle reflection at slab walls

20 p3582 A69-38245

Meter and decimeter wavelength range short period fading under conditions excluding optical sights, correlating specular and diffuse reflection

24 p4281 A69-42612

SPEECH

NT ARTICULATION
NT PHONETICS

Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions

05 p0709 A69-16518

Digitally controlled formant /spectral maximum/ generator for terminal analog speech synthesizer

11 p1852 A69-25292

Recorded vocal reactions of humans analyzed as characteristic of positive and negative emotions

18 p3096 A69-34737

Group leadership attempting behavior dependence on situational and perceptual variables

23 p4110 A69-42015

SPEECH DEFECTS

Retarded voice tests apparatus using graphical recording to determine intensity of deformations by autoaudition, considering application to recruitment investigation

24 p4270 A69-42604

SPEECH RECOGNITION

Limited speech recognition system /LISPER/ simplifies recognition by computer designed as research vehicle and pattern recognition system

04 p0565 A69-15338

Oxygen-helium cabin atmosphere effect on speech communication analyzed during simulated space mission

07 p1066 A69-19420

Speech intelligibility in air at ground level and in helium-oxygen mixture at 18,000 ft

12 p2019 A69-26548

He speech processor for aerospace applications, discussing He speech distortion nature

17 p2911 A69-34095

Machine recognition of continuous speech at acoustic level, noting low bit rate speech communication system

17 p2932 A69-34119

Aircraft noise acceptability tests based on listening in absence and presence of speech

18 p3097 A69-34325

Transmission filter to improve voice communication intelligibility and SNR, describing applications to nonlinear circuits

20 p3505 A69-37293

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites

21 p3721 A69-38630

Speech interference aspects of noise measured as function of level and spectrum of speech and noise at listener ear, using simplifying nomogram

23 p4101 A69-41495

Whispered vowels pitch perception test using listen-and-compare method to determine formants for comparison with complex analysis procedure

23 p4190 A69-41575

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and interplot speech interference

23 p4102 A69-41682

Brain and machine model of pattern recognition, pattern synthesis, memory, learning and speech, using concept of similarity, context and signal analysis

24 p4273 A69-42909

SPEED BRAKES

U BRAKES [FOR ARRESTING MOTION]

SPEED CONTROL

MOS technology developments for higher speeds in logic circuits

07 p1113 A69-19765

Fluidic overspeed sensor for small turboshaft power turbine, discussing requirements, circuit and system design, packaging, reliability and maintainability [ASME PAPER 69-GT-17]

09 p1571 A69-22500

Transistorized tachometer for rotational speed measurement and overspeed protection of automotive internal combustion engines

12 p2090 A69-26240

Hall generator DC brushless motors for aerospace use, discussing speed control and motor design

18 p3094 A69-35074

V/STOL wind tunnel data at low forward speeds, discussing test limit dependence on model size, downwash angle and tunnel geometry

18 p3119 A69-35229

SPEED INDICATORS

NT ANEMOMETERS
NT HOT-WIRE ANEMOMETERS
NT SONIC ANEMOMETERS
NT TACHOMETERS

Slide wire aircraft vertical velocity meter for application during aerogravimetric mapping, discussing calibration and gravitational force measurement accuracy

03 p0429 A69-13261

Boundary shear stress with unknown magnitude and direction measured by yaw probe used as Preston tube

05 p0751 A69-16396

Skin friction measurement with rectangular mouthed Preston tubes of constant thickness ratio, analyzing calibration curves and difference from circular tubes

11 p1880 A69-24376

Connecting duct influence on slide wire vertical airspeed indicator operating on barometric principle during aerial gravimetric surveying

13 p2260 A69-27828

Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation [AIAA PAPER 69-345]

13 p2249 A69-28280

Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient [AIAA PAPER 69-648]

17 p2893 A69-33496

Reentry Vehicle Altitude-Velocity Sensor for continuously measuring hypersonic vehicles free stream density and velocity in atmosphere at low angle of attack [AIAA PAPER 69-866]

21 p3725 A69-39392

SPEED REGULATORS

Flow control valve for hydraulic motor speed regulation operated by remote pressure signal

11 p1827 A69-25646

SPEEDOMETERS

U SPEED INDICATORS

SPERMATOCYTES

U GAMETOCYTES

SPERMATOZOA

Axial units with basal plates in spermatozoa of Chlamydomonas negatively stained with phosphotungstic acid, showing doublet microtubules

07 p1066 A69-19263

SPHERES

NT CELESTIAL SPHERE
NT POINCARÉ SPHERES
NT ROTATING SPHERES

Radiation from isothermal sphere in vacuum having spherical scattering indicatrix solved by Bubnov-Galerkin method with allowance for scattering

01 p0174 A69-10106

Effect of steady flow of incompressible conducting fluid on magnetic dipole at center of sphere

01 p0128 A69-10363

Wake structure behind spherical bodies in rarefied plasma flow by measuring plasma parameters and disturbances with probes

01 p0134 A69-11308

Luminous flow in front of sphere and behind cylinder under high temperature and low density conditions, discussing profiles of shock waves

02 p0189 A69-12182

Heat transfer rates from high temperature spheres into subcooled liquid sodium during forced convection, noting surface vapor formation [ASME PAPER 67-WA/HT-32]

02 p0351 A69-12202

Heat transfer coefficient for spherical protuberance on plate with turbulent boundary layer [ASME PAPER 68-HT-2]

02 p0351 A69-12204

Boundary conditions for irrotational hydrodynamic field around sphere moving along axis of cylindrical tube containing incompressible fluid calculated by least squares method

03 p0415 A69-13362

Electromagnetic wave diffraction at uniformly expanding sphere solved by Kirchhoff method

03 p0397 A69-13719

Scattering data for optical diagnostic measurements on two component suspensions or gases, using random distributions of spheres

04 p0555 A69-14282

Rarefied flow past sphere, analyzing collisionless flowfield structure and development as density increases

04 p0542 A69-14731

Acoustic streaming near small spherical obstacles, obtaining stream functions

04 p0631 A69-14904

Free convective heat transfer in liquid filled spherical volume with constant thermal flux density at boundary
04 p0686 A69-14992

Relativistic analysis of far zone electromagnetic scattering by conducting sphere moving through incident plane wave, calculating scattering cross section
04 p0559 A69-15212

Velocities, accelerations and drag forces on spheres falling along center line in viscous fluid, considering different Reynolds numbers and Stokes approximation range
05 p0788 A69-15725

Energy transfer from radiating sphere to medium with molecular heat conduction
05 p0845 A69-15782

Nonequilibrium supersonic flow calculation of detonating mixture past blunt bodies applied to flow of hydrogen-oxygen mixture past sphere
06 p0859 A69-17343

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
[AIAA PAPER 69-140] 06 p0865 A69-18184

Electron bombardment ion source generated Ar plasma beam to study wakes of disks and spheres, considering plasma interaction with bodies
[AIAA PAPER 69-79] 06 p0865 A69-18200

Laminar boundary layer flow on sphere in hypersonic flow of equilibrium dissociating air
07 p1050 A69-18756

Viscous gravitating sphere oscillations and velocity field, noting oscillations of Maxwell sphere
07 p1123 A69-18806

HF scattering of scalar plane wave by transparent sphere based on Watson transformation
07 p1181 A69-19033

Small amplitude surface irregularities effect on backscattering properties of radar calibration metal sphere, using full wave boundary perturbation method
08 p1273 A69-20027

Beam wave scattering by small sphere, discussing dielectric constant and difference from plane wave
08 p1273 A69-20028

Ray path geometry derived by Poynting vector to calculate surface fields due to creeping waves in sphere planes
08 p1274 A69-20046

Stress fields in Hertzian contact of parallel cylinders composed of anisotropic materials and transversely isotropic spherical bodies
08 p1414 A69-20524

Inertia of electrically charged spherical body calculated on basis of relativistic stress energy
08 p1352 A69-20756

Viscoelastic properties of heterogeneous media of composite sphere model type obtained from shear modulus formula
08 p1417 A69-20825

Self gravitating incompressible fluid sphere free oscillations, deriving characteristic equations for arbitrary viscosities
09 p1481 A69-21790

Diffraction of plane electromagnetic wave incident on conducting sphere segment, deriving secondary electromagnetic field equations in geometrical optics approximation
11 p1846 A69-24613

Pressure distribution measurement over sphere with cylindrical afterbody in magnetofluid dynamic flow, showing drag decrease at large magnetic field
11 p1873 A69-25136

Thin spherical layer flow stability with respect to small disturbances, showing unsteady motion above critical Reynolds numbers and secondary flow features
11 p1875 A69-25486

Transverse pulsating motion of spherical particle in turbulent flow, considering differential equation of motion transformation
11 p1876 A69-25489

Acoustic streaming near small spherical obstacles, obtaining stream functions
12 p2131 A69-26657

Radial and polar load support of squeeze film gas bearing in form of sphere pulsating radially or moving along polar axis
[ASME PAPER 68-LUBS-3] 13 p2266 A69-27279

Unsteady temperature distribution in solid sphere with variable internal heat source and surface subjected to variable heat flux
13 p2373 A69-27773

Differential approximation for radiative transfer between concentric spheres enclosing gray gas
[ASME PAPER 68-HT-21] 13 p2373 A69-27774

Radiative transfer between two concentric gray opaque spheres separated by radiating gray gas, employing Fredholm equations
13 p2377 A69-28149

Hypervelocity impact of spheres on thin targets studied with numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model
[AIAA PAPER 69-357] 13 p2366 A69-28290

Dissipative fluid sphere motion due to impulsive point source calculated by finite difference scheme, assuming Voigt and Maxwell type internal friction mechanisms limitations
14 p2485 A69-29026

Subroutines for computing characteristics of electromagnetic radiation scattered by absorbing and homogeneous sphere employing logarithmic derivative method
14 p2412 A69-29283

Aerodynamic lift and moment fluctuations of sphere at supercritical Reynolds numbers measured by hot-wire anemometers, noting dependence on time
14 p2390 A69-29573

Near free molecule heat transfer and density distribution between concentric spheres using BGK model equation and Knudsen iteration technique
16 p2877 A69-31921

Temperature distribution of solid spherical satellite under solar radiant heating solved by variational calculus or point matching methods
16 p2877 A69-31922

Diffraction of electromagnetic waves produced by vertical dipole on impedance sphere of large radius in isotropic medium, using moment method
16 p2751 A69-32028

Water bag spherically symmetrical universe model, discussing system stability, distribution function representation and polytrope equivalency
16 p2866 A69-32813

Shock detachment distance for flow around cylinders and spheres determined by microphotometric tracing of negatives of photographs of forward stagnation streamlines
17 p2949 A69-32962

Elastohydrodynamic theory of spherical bodies in normal approach contact, discussing lubrication and elasticity equations
[ASME PAPER 69-LUBS-3] 18 p3213 A69-34384

Transient uniform flow over sphere at intermediate Reynolds numbers with recirculatory wakes, utilizing difference approximation to time dependent Navier-Stokes equations
18 p3120 A69-34434

Aerodynamic characteristics of sphere and blunt cone in highly rarefied gas flow, noting molecular collision effect
18 p3086 A69-34708

Electromagnetic induction in concentric thin shell-enclosed solid conducting sphere immersed in varying electromagnetic field
[AFRL-69-0082] 18 p3101 A69-34803

Energy transfer from radiating sphere to medium with molecular heat conduction
18 p3230 A69-35034

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation
18 p3231 A69-35325

Nonequilibrium behavior of shock standoff distance ahead of spheres at low supersonic Mach number
18 p3089 A69-35385

Ablating sphere viscous wake using image converter camera, computing luminance radial distribution by unit volume
19 p3306 A69-35739

Linear oscillations of sphere in compressible viscous fluid with slip at surface, noting drag variation
19 p3297 A69-35836

Plane electromagnetic wave diffraction on conducting sphere situated in absorbing nonuniform plasma layer
19 p3275 A69-36340

Shock wave interaction and bow shock wave establishment near sphere in presence of ionization relaxation, using time resolved schlieren photography
19 p3450 A69-36361

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection
19 p3298 A69-36385

Hydrodynamic vertical or horizontal impact of sphere immersed in ideal heavy liquid of finite depth, considering container floor effect, surface pressure distribution, etc
19 p3299 A69-36393

Numerical integration of atmospheric motion equations in global domain using hexagonal grid, including sphericity corrections and Coriolis term
19 p3364 A69-36509

Combustible mixtures flow past bodies, discussing equation for shock polar for exothermal discontinuities at subsonic and supersonic velocities
19 p3241 A69-36780

Incompressible viscous fluid flow past sphere at low Reynolds number, evaluating stream function and drag on sphere
21 p3694 A69-38771

Spheres impulsive starting in incompressible viscous fluid, including Reynolds number and investigation time parameters in Navier-Stokes equation
21 p3696 A69-39296

Heat transfer from spheres in free finite width flow, determining heat transfer coefficient distribution as function of flow width and Reynolds number
21 p3855 A69-39849

Radiative transfer in interior of two concentric spheres in motion assuming low density of residual gas
22 p4031 A69-40907

Hypersonic reentry spheres drag coefficients derived from radar measurements
23 p4059 A69-41898

Spheroidal disturbances theoretical seismograms on surface of gravitating elastic sphere with homogeneous mantle and liquid core, considering gravity and polar radial stress effects
23 p4158 A69-42020

Sphere set in motion at constant velocity by impulsive force submerged in incompressible fluid in half space
24 p4298 A69-42585

Stokes stream function and forces acting on two spheres moving in contact along line of centers through viscous fluid
24 p4299 A69-42747

Fluid flow around sphere at high Reynolds number by measuring pressure distribution, considering boundary layer separation, tunnel blockage, etc
[ASME PAPER 69-APMW-26] 24 p4245 A69-43093

Hydrogen-air combustion in supersonic flow past sphere determined with allowance for chemical reactions nonequilibrium rates at high pressure and temperature
24 p4408 A69-43488

Diffuse configuration factors between small plane and large sphere by unit sphere method, presenting limiting cases
24 p4351 A69-43683

SPHERICAL CAPS

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] 06 p1028 A69-18133

Axisymmetric vibration of shallow spherical caps, using nonlinear dynamic equations and associated variational equation of motion for elastic spherical shells
[ASME PAPER 69-APMW-6] 24 p4402 A69-43107

Scale error correction technique for structural impact modeling using dissimilar materials, involving permanent deformation of spherical caps impacted into liquids
24 p4406 A69-43692

SPHERICAL HARMONICS

Algorithm computing spherical harmonic coefficients for eccentric geomagnetic dipole potential
02 p0245 A69-12735

Satellite orbit selection for determining geopotential and spherical and tesseral harmonic coefficients, discussing propulsion systems and satellite observation cost feasibility
02 p0331 A69-12807

Planetary distribution of ionospheric parameters analyzed, using geographic longitude and magnetic inclination as longitudinal and latitudinal coordinates
06 p0921 A69-17745

Spherical harmonic analysis of Stokes parameters for polarization of stars, discussing magnetic field of Galaxy
08 p1390 A69-20390

Time harmonic, spherical harmonic and power series expansion of Boltzmann equation
08 p1353 A69-20793

Radar SEP /spherical error probable/ for defining error ellipsoid in three dimensional accuracy and CEP /circular error probable/ for defining two dimensional accuracy
13 p2221 A69-27963

SPHERICAL SHELLS

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields

14 p2437 A69-29063

Kinetic energy conversion into heat in moving viscous media, formulating equations as volume integrals of spherical harmonics products

14 p2487 A69-29980

Large scale atmospheric wave motions analyzed by spherical harmonic representation of height fields over earth, detailing wave components and quasi-stationary fluctuations

15 p2647 A69-30216

Geopotential determination from gravity force measurements at known surface and error assessment for earth model with aid of spherical harmonic expansion

15 p2689 A69-30567

Coefficients of zonal spherical harmonics to 21st order in expression for earth gravitational potential

15 p2600 A69-31358

Arbitrary electromagnetic field prediction based on spherical harmonics expansion method using field points measurement data, determining electromagnetic properties of environments

17 p2929 A69-33881

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis

20 p3522 A69-37060

Geomagnetic field spherical analysis from angular data and extrapolated values of time variable field coefficient

23 p4157 A69-41866

Geomagnetic multipole parameters changes using spherical harmonic coefficients of geomagnetic potential, relating to secular variation field

23 p4158 A69-42171

SPHERICAL SHELLS

Stress concentration near eccentric elliptical hole in spherical shell, using computer methods

01 p0165 A69-10089

Basic equations for optimum inhomogeneity in pressure vessels of maximum rigidity derived, using thick walled spherical shell

01 p0167 A69-10326

Spherical shell pressure vessels investigated for optimum inhomogeneity and rigidity using Lagrange polynomials

01 p0167 A69-10327

Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory

02 p0336 A69-11555

Complex revolution vessels and multilobed structures analyzed by electronic computers, considering doubly stressed state of shells and bending moments from external forces

02 p0339 A69-11894

Plane shock wave interaction with elastic shallow spherical shell in compressible fluid, formulating equations of motion

02 p0339 A69-11977

Anomalous gravitational geopotential as function of mass, discussing density anomalies in spherical shells for harmonics as obtained from satellite observations

02 p0244 A69-12178

Postbuckling behavior of elastic spherical shells from pressure and volume-displacement instrumentation and photography

03 p0524 A69-13062

Solid viscosities effects on dynamic load factors of ring and hollow sphere subject to uniformly distributed impulsive loads along inner and outer edges

03 p0530 A69-14089

Kirchhoff-Love hypothesis error dependence on stressed state variability index in theory of elasticity for closed spherical shell under uniform surface load

04 p0680 A69-14927

Creep buckling of shallow geometrically nonlinear spherical shell of linear viscoelastic material under constant external load

05 p0831 A69-15679

Axisymmetric thermal stresses in spheroidal shell of arbitrary thickness due to thermoelastic strain nucleus

05 p0836 A69-15923

Stability of Al-Mg alloy spherical shells under uniform external pressure beyond elastic limit

05 p0843 A69-16693

Stress distribution in shallow spherical shell with smooth cornered rectangular hole or biperiodically arranged set of holes, using computer program

06 p1027 A69-18020

Supercritical elastic states of closed spherical shell

07 p1232 A69-18934

Gravitational field in static spherical shell of matter in vacuum, deducing exact junction conditions for thin shell

07 p1182 A69-19453

Traveling waves on elastic spherical shells derived from dynamic equations of motion, including transverse shear and rotatory inertia effects

07 p1236 A69-19460

Dynamic internal thermal shock in spherical shells of arbitrary thickness, considering uncoupled dynamic thermoelasticity problems with spherically symmetrical temperature fields

07 p1236 A69-19471

Shallow spherical shells equilibrium under uniformly distributed internal pressure, analyzing nonlinear boundary value problems by algorithm

07 p1237 A69-19685

Radiative transfer iteration for gray medium between concentric spheres and for constant heat generating spherical region imbedded in gray medium

08 p1420 A69-20152

Free vibration frequencies and mode shapes for thin orthotropic oblate spheroidal shells, noting isotropic oblate spheroidal shell and isotropic spherical shell

09 p1613 A69-21719

Axisymmetric dynamic snap through critical load analysis for elastic clamped shallow spherical shells, considering impulsive and step loads

09 p1616 A69-21977

Rectangular planform shallow spherical shell stability with mixed boundary conditions, using Cauchy-Riemann equations and equation for plate on elastic base

10 p1792 A69-22848

Short memory elasticoviscous fluid motion in and around oscillating spherical shell

10 p1800 A69-23240

Formula in Prandtl-Batchelor theory describing motion of incompressible fluid in sphere interior verified experimentally

11 p1868 A69-24755

Static and dynamic stability of flexible shallow spherical shell under axisymmetric load and elastically hinged along contours

11 p1976 A69-24763

Permanent displacement relationship to shell thickness following snap-through of loaded rigid boss in spherical metal shell

11 p1980 A69-24822

Plastic analysis of shallow spherical rigid plastic shell, using shell deflection equations to establish load-deflection relationship

11 p1980 A69-24823

Stress concentration around curvilinear holes in three layer spherical and cylindrical isotropic shells with hard and soft fillers under external loads

11 p1984 A69-25171

Axisymmetric oscillations of two spherical shells with noncoinciding centers of curvature immersed in compressible or incompressible fluids

11 p1875 A69-25467

Free periods of oscillation of incompressible rotating fluid bounded by rigid concentric spheres, using Longuet-Higgins solution of Laplace tidal equation

11 p1876 A69-25558

Axisymmetric deformation of thin orthotropic laminar spherical shells under internal loads calculated on computer using Legendre polynomials

12 p2181 A69-26611

Elastic buckling and initial postbuckling behavior of clamped shallow spherical shells under axisymmetric load

12 p2187 A69-26842

Monograph on shell calculations by linear three dimensional elasticity theory, relating displacements and stresses

12 p2188 A69-26902

Axisymmetric plastic buckling of complete spherical shells subjected to external hydrostatic pressure

13 p2361 A69-27439

Frequency equation for thickness effects on axisymmetric radial and rotatory vibrations of empty or fluid filled isotropic spherical shell

13 p2363 A69-28185

Differential equations for shallow circular spherical shell transformation to equation describing stress-strain state of plate on elastic base

13 p2369 A69-28565

Stress concentration around holes in thin shells, including analysis of stress-strain state in cylindrical and spherical shells

14 p2532 A69-28977

Syntactic foam low density thermoplastic microspheres as hollow spherical filler in polyester matrix, noting applications

14 p2467 A69-29285

Spherical plate electrostatic analyzer transmission characteristics, emphasizing angular response to external particle sources as functions of angular coordinates and particle energy

14 p2449 A69-29560

Plane shock wave interaction with elastic shallow shell in compressible fluid, formulating equations of motion

15 p2704 A69-30262

Elastic deformations of spherical sandwich shell of rigidly connected isotropic homogeneous layers, describing shell symmetrical expansion and inversion under stresses

15 p2707 A69-30588

Stress distribution in isotropic spherical shell rotating uniformly about diametral axis, deriving equilibrium equations

15 p2712 A69-31005

Linear static deformation and buckling of shallow spherical shells under asymmetric load by solving two dimensional finite difference equations

16 p2871 A69-31897

Axially symmetric vibrations of thin elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness

16 p2873 A69-32129

Elastic spheroidal shell of revolution under external pressure described by buckling and postbuckling theory

16 p2874 A69-32162

Transient wave processes of deformation in spherical shell under load abruptly applied to geometrical pole

16 p2875 A69-32288

Air density measurement at high altitudes by falling instrumented sphere ejected by missile in upper atmosphere

17 p2971 A69-32898

Fluid filled spherical shell axisymmetric nontorsional motion analysis via differential equations obtained by Hamilton principle

17 p3051 A69-32956

Plastic failure under internal pressure of aluminum spherical shells with single radial or oblique nozzle based on limit analysis theory

17 p3052 A69-32983

Random oscillations of elastoacoustic systems, obtaining solution for spherical shell containing acoustic medium

17 p3057 A69-33199

Complete spherical shells transverse frequency analysis, comparing results of elastic theory and classical, improved and membrane shell theories

17 p3061 A69-33705

Complete spherical shells nonsymmetric vibrations frequencies and mode shapes calculated by matrix method

17 p3061 A69-33706

Nonlinear partial differential equations solutions in theory of thin elastic spherical shells subjected to temperature fields and external loading

17 p3067 A69-34147

Stress field in elastic contact area vicinity of hollow sphere subjected to normal load through flat plate, noting contact life [ASME PAPER 69-LUBS-5]

18 p3212 A69-34383

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression

18 p3224 A69-35318

Limiting equilibrium of variable thickness shallow spherical and conical shells of revolution under axisymmetric loads, assuming rigid plastic shell material

18 p3225 A69-35370

Hollow thin walled carbon spheres developed as filler material for resins in low weight high temperature applications

19 p3355 A69-35522

Buckling and postbuckling of complete spherical shells with symmetric initial shape deviations and elastic deformations

19 p3446 A69-36834

Twisting of spherical shell of nonhomogeneous isotropic material with variable shear modulus and inner surface assumed to be stress free

20 p3619 A69-36911

Matrix displacement method of structural analysis applied to dynamic buckling of clamped shallow spherical caps under step pressure loading

20 p3622 A69-37229

Shells of revolution bearing capacity under axisymmetric loads determined by linear programming and finite difference method

20 p3622 A69-37326

Complex representation of strain and displacement state in spherical shell using membrane theory, deriving shear forces resulting from single moment loading
21 p3831 A69-38416

Stress concentration near holes in three layer spherical shells, determining boundary conditions at hole perimeters for various loads
21 p3833 A69-38570

Stress-strain state of thin spherical shell of variable thickness in elastoplastic equilibrium, using Meissner variables to reduce equilibrium equations
21 p3834 A69-38717

Thermal stability of reactive spherical shell, investigating spontaneous ignition of volatile fuel drop exposed to hot oxidizing environment
21 p3849 A69-38804

Stability of free and clamped spherical and circular cylindrical shells subjected to uniform or nonuniform heating, discussing effects of temperature stresses
21 p3838 A69-39190

General system of equations derived for nonaxisymmetric oscillations of elastic spherical shells, obtaining expressions for oscillations from torsion, tension and bending
21 p3839 A69-39199

Deformation of thin walled spherical shell reinforced with equatorial hoop by concentric equal forces
21 p3846 A69-39714

Momentless orthotropic spherical shell of variable thickness stress analyzed, assuming large deformations under uniform axisymmetric load distribution
22 p4039 A69-39916

Solid viscosities effects on dynamic load factors of hollow sphere subjected to uniformly distributed impulsive loads, using three element model
22 p4044 A69-40598

Differential rotation of incompressible inviscid fluid of infinite electrical conductivity in spherical shell, noting toroidal magnetic field for sun
22 p4027 A69-40658

Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components
22 p4046 A69-41041

Conducting fluid flow in spherical container in rotating magnetic field, calculating induced field velocity and inside and outside components
23 p4196 A69-41609

Infinite systems of algebraic equations in periodic problems for spherical shells with circular holes approximated by reduction method
23 p4227 A69-41706

Supercritical elastic states of closed spherical shell
23 p4228 A69-41971

Stress concentration in shallow spherical perforated shell under loads, reducing boundary value problem to infinite algebraic equations solution
23 p4233 A69-42342

Dynamic response of anisotropic elastic cylindrical and spherical shells determined by application of Hankel transforms, considering time dependence of loads
23 p4235 A69-42481

Shallow spherical sandwich shells critical buckling loads using differential pressure method
24 p4396 A69-42734

Three dimensional and shell theory analysis of nonaxisymmetric harmonic elastic wave propagation in hollow elastic sphere
[ASME PAPER 69-APMW-7]
24 p4402 A69-43105

Computerized spectral analysis of vibrational frequency due to elastic waves in isotropic hollow spherical shells
[ASME PAPER 69-APMW-8]
24 p4402 A69-43106

Energy dissipation in oscillating sphere filled with viscous fluid, giving fluid response by solving Navier-Stokes equation
24 p4305 A69-43587

Transmission functions probabilistic model for solving radiative transfer problems in spherical shell medium surrounding emitting black core or point source, using integrodifferential equations
24 p4415 A69-43637

Plastic inhomogeneity effects on yield stress of isotropic spherical shell and long cylindrical tube under internal pressure
24 p4405 A69-43672

SPHERICAL TANKS

Spherical false bottom influence on propellant sloshing in circular tank
[DVL-843]
03 p0416 A69-13665

Ritz method for natural oscillations of ideal liquid in spherical vessel with various filling levels, considering vertical perturbing force
06 p0910 A69-17333

Natural frequencies and forms of small vibrations of ideal liquid in spherical container with weak force field, considering surface tension forces
11 p1875 A69-25484

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects
[AIAA PAPER 69-1004]
22 p3921 A69-40378

Spherical vessel partially liquid-filled and supported by equatorial ring, studying axisymmetric oscillations under external forces
24 p4300 A69-43069

SPHERICAL WAVES

Spherical elastic-plastic stress wave propagation analysis via finite difference procedure
02 p0348 A69-12610

Rapid uniform expansion of spherical cavity in compressible elastic-plastic solid, obtaining similarity solution
03 p0528 A69-13798

Spherical wave reflection from nondeformable plane in elastic viscoplastic medium
03 p0528 A69-13926

Helicon waves in nonresistive cylindrical and spherical plasmas
03 p0479 A69-13961

Adiabatic motion of hydromagnetic fluid behind spherical fast shock wave for Parker solar wind model
04 p0660 A69-15126

Spherical deflagration and detonation waves in diluted stoichiometric hydrogen-oxygen mixtures in hemispherical combustion chamber
06 p1034 A69-17927

Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
07 p1157 A69-19641

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces
07 p1195 A69-19747

Spherical wave generalization for plane light wave propagating in turbulent medium, describing circular objective averaging effect on intensity fluctuations
08 p1351 A69-20438

Unsteady flow parameters for reaction products behind spherical detonation wave in gas mixtures based on Taylor solution
08 p1421 A69-20765

Analytical method for perturbations by spherical and cylindrical shock waves flowing toward common center
10 p1677 A69-22899

Kinetic theory for spherical expansion of hypersonic jet flow indicating translational freezing in hypersonic source expansion
11 p1870 A69-25006

Spherical wave propagation in homogeneous turbulent medium, discussing nonstationary statistics as applied to vertical propagation in atmosphere
12 p2029 A69-26251

Spherical stress wave reflected from plane surface, discussing tensile stress in target
[AIAA PAPER 69-363]
13 p2366 A69-28295

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Scintillation of ground based spherical wave laser source viewed from space analyzed from Geos 2 satellite laser tracking, noting stellar scintillation correspondence
15 p2570 A69-31309

Perturbation solutions for planar cylindrical and spherical blast waves in air, considering third and fourth order approximations
16 p2770 A69-31900

Reflection of spherical stress wave against smooth indeformable plane in elastoviscoplastic medium, discussing Taylor series expansions for displacement, velocity and stress fields
18 p3226 A69-35463

Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
20 p3486 A69-37024

Perturbation solution in power and asymptotic series for initial collapse phases of impulsively generated converging cylindrical and spherical shock waves in perfect gas
21 p3692 A69-38688

Reflection of spherical stress wave against plane clamped partition in elastoviscoplastic medium, investigating three dimensional problem by infinitesimal deformations theory
24 p4406 A69-43732

SPHEROIDS

NT OBLATE SPHEROIDS
NT PROLATE SPHEROIDS

Mass functions of real earth derived from satellite orbital perturbations
[UN PAPER 68-95385]
01 p0064 A69-10460

Existence of periodic solutions by Whittaker criterion to equations describing motion of satellite of spheroidal planet in planetocentric coordinate system
02 p0317 A69-11959

Axisymmetric stress field around spheroidal inclusions and cavities in transversely isotropic material
[ASME PAPER 68-WA/APM-14]
04 p0669 A69-14400

Motion of two rigid spheroids with mutual gravitational attraction based on Hamilton-Jacobi theory applicable to binary stars
16 p2863 A69-32402

Small parameter method applied to axisymmetric problems of elastoplastic nearly spherical bodies undergoing exponential hardening process, deriving linearized expressions for boundary conditions
21 p3839 A69-39198

SPHERULES

NT SPHERULITES

Meteorite dust spherules at Tungusk and Sikhotealin falls investigated for mineral composition using X ray analysis
01 p0160 A69-11383

Lifetime of highly soluble isolated dense spherical solute particle in solvent, taking into account molecular diffusion, kinetic limitations, etc
10 p1651 A69-22939

Black magnetite spherules electromagnetically separated from residue of Permian rock salt, determining content and properties of extraterrestrial material
12 p2154 A69-25821

Barbados airborne dust collections showing metal fragments and black magnetic spherules contaminants from handling, discussing deep sea cosmic spherules and zodiacal cloud
12 p2075 A69-26964

Oxide composition of silicate spherules from forest area devastated by Tunguka meteorite explosion using electron microprobe analysis
14 p2516 A69-28869

Black magnetite bearing spherules extracted from tektites, and magnetic fractions of impact glasses, determined by reflecting microscope and electron microprobe
23 p4210 A69-41349

SPHERULITES

Spherulite boundaries and interspherulite breakdown in polyethylene, considering structure control by varying macromolecular microstructure
22 p3973 A69-40740

Pyroxene crystallization in meteoritic chondrules, noting normal spherulite crystallization
22 p4033 A69-41065

SPICULES

Solar flares and surges origin, discussing role of supergranular convection, field gradients and spicules
06 p0994 A69-17437

Three dimensional information pictures of chromospheric alpha H line using special camera attached to solar telescope diffraction grating spectrograph
07 p1217 A69-19241

Mercury transits in 1970 and 1973 to resolve prominence threads and spicules, sunspot fine structures, etc
11 p1958 A69-24434

Chromospheric spicules formation, density, pressure gradient, vertical motion, velocity fluctuations and luminosity
15 p2675 A69-30551

Solar chromospheric spicules acceleration mechanism based on magnetic field structure on supergranulation boundaries
24 p4374 A69-43635

SPIKE ANTENNAS

U MONOPOLE ANTENNAS

SPIKE POTENTIALS

Expected number of spikes of phase locked loop demodulators, extending determination method to FM discriminator threshold and maximum likelihood estimator
07 p1082 A69-19107

SPIKES

Optic nerve spikes elicited by acetylcholine application on isolated perfused retina of frog, varying response by prostigmine and atropine
23 p4084 A69-41465

SPIKES

High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
14 p2511 A69-28950

Radiation dynamics of GaAs injection semiconductor laser, plotting spike period dependence on resonator length
19 p3337 A69-36535

Ruby laser resonator mirror mechanical vibrations effects on emission temporal behavior, spectral output and far field pattern, describing conditions for spiking
22 p3962 A69-40562

SPIKING

Spiking behavior detection in Q switched light output from GaAs pulsed junction laser, noting width at high pumping levels
22 p3963 A69-40563

SPIN

NT ELECTRON CAPTURE
NT ELECTRON SPIN
NT NUCLEAR SPIN
NT SPIN-ORBIT INTERACTIONS
NT SPIN-SPIN COUPLING

Spin doublet formation analysis in X ray satellite spectra, revealing K, L and M spin doublets existence
15 p2675 A69-30700

SPIN DYNAMICS

Multibody dual spin spacecraft spin axis motion with active internal devices, using digital simulation
02 p0332 A69-11739

Boom flutter effects on attitude dynamics of OV1-10 satellite, noting introduction of angular momentum by tip mass elliptical vibration
04 p0666 A69-15520

Whirl dynamics of partially liquid filled spinning rotor mounted on elastic shaft, noting synchronous critical speed and asynchronous whirl speed
[ASME PAPER 68-WA/APM-25]
05 p0768 A69-16189

Mass distribution and inertia characteristics influence on spin susceptibility and spin recovery characteristics for eight current fighter aircraft
[AIAA PAPER 69-188]
06 p0868 A69-18057

Anomalous roll behavior of spinning ballistic reentry vehicles with compound aerodynamic asymmetry consisting of lateral offset combined with trim angle of attack
[AIAA PAPER 69-103]
06 p1019 A69-18168

Variation in spinning velocity around axis of last stage of solid propellant rocket in flight
08 p1409 A69-20160

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope
11 p1994 A69-25530

Monograph on rapid rotations of aircraft with fixed controls, covering spin and roll movements differential equations
12 p2013 A69-26118

Solar oblateness and differential rotation time development due to solar wind torque
12 p2157 A69-26308

Atomic and molecular spins dynamic orientation in anisotropic radiation field, examining medium properties and astrophysical consequences
13 p2350 A69-27861

Inverted spin testing techniques using jet trainer, emphasizing entry variations and effect on spin characteristics
14 p2392 A69-29696

Spin temperature of interstellar neutral hydrogen calculated from 21 cm absorption spectra line profiles
15 p2681 A69-30411

Theory of temperature dependent magnon energies in antiferromagnets based on spin wave operator expansion of Hamiltonian, taking into account dynamical interaction between waves
15 p2668 A69-30684

Moon possible origin, discussing spin off from earth, accretion from same dust cloud or formed elsewhere and captured
20 p3603 A69-37559

Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854]
21 p3767 A69-39764

Linear field gravitation theories, discussing spin dynamics
22 p3979 A69-39976

Spin compensated state of localized magnetic impurity moment in space, calculating size range of magnetic impurity spin/conduction electron spin correlation function
22 p3983 A69-40061

Spinning satellite containing elastically restrained, viscously damped mass, analyzing attitude dynamics and stability, noting wide nutation possibility
23 p4224 A69-42396

Spin-phonon systems thermal noise, based on combined lattice and spin lattice Hamiltonian densities, applied to acoustic noise field measurements
24 p4350 A69-43061

SPIN-LATTICE RELAXATION

Multiphonon orbit-lattice relaxation of excited states of rare earth ions in crystals, measuring fluorescence lifetimes, quantum efficiencies and transition rates
01 p0134 A69-10011

Acoustic paramagnetic resonance in arsenic doped germanium, measuring spin-lattice relaxation
02 p0296 A69-11835

Phonon states effective density in neodymium trichloride from vibronic spectra accompanying electronic transitions in trivalent Pr and Nd ions
03 p0473 A69-13907

Proton spin-lattice relaxation time in dilute liquid and gas solutions of orthohydrogen in parahydrogen, noting dependence on temperature, density and composition
06 p0961 A69-17141

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients
06 p0980 A69-17458

Optical pumping at high temperatures using spin exchange signals for RF spectroscopy
07 p1148 A69-18893

Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio
[IEEE PAPER C-2]
07 p1150 A69-19049

Relation between electron spin-spin interactions and polarization and relaxation of ruby nuclei at He temperatures
08 p1372 A69-20541

Cross relaxation and spin-lattice relaxation probabilities determination in ruby crystal based on inversion coefficients
20 p3584 A69-37941

SPIN-ORBIT INTERACTIONS

NT ELECTRON CAPTURE

Spin-other-orbit matrix elements for F super 3 electron configurations
06 p0962 A69-17819

Venus and Mercury diurnal period commensurability associated with Venus spin-orbit resonance with earth orbit
22 p4018 A69-40270

Natural orbitals calculated from spin free one density matrix of open shell limited configuration-interaction wave function constructed from nonorthogonal basis
23 p4194 A69-42206

SPIN REDUCTION

Design evolution of mechanically despun antenna systems from ATS to INTELSTAT, discussing RF and control systems
03 p0403 A69-13239

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelstat 3 satellite
06 p0897 A69-17590

Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
21 p3814 A69-39568

Intelstat 3 communications satellite mechanically despun high gain directive antenna, discussing system, control electronics, design and performance
22 p3913 A69-40691

SPIN RESONANCE

Proton spin maser oscillator with emission coils coupled by prepolarized liquid, discussing tuning and detuning
08 p1324 A69-20231

Temperature dependence of g-value in spin resonance in partially degenerate region in pure n-type InSb and InAs
19 p3389 A69-36549

Venus and Mercury diurnal period commensurability associated with Venus spin-orbit resonance with earth orbit
22 p4018 A69-40270

Nonresonant and resonant cross sections for gamma ray transitions involving isobaric-spin mixed states in Be 8
22 p3987 A69-41043

Electron spin memory in optical pumping cycle of potassium halides F centers, measuring relaxed excited state g factors and spin resonance line widths
23 p4198 A69-42419

SPIN-SPIN COUPLING

Coupled waves in ferromagnetic and antiferromagnetic semiconductors in constant electric and magnetic fields, discussing spin, electromagnetic and plasma waves dispersion
05 p0809 A69-16548

Relation between electron spin-spin interactions and polarization and relaxation of ruby nuclei at He temperatures
08 p1372 A69-20541

Barrier to internal rotation from PMR spectrum for 1, 2-disubstituted ethanes, studying vicinal coupling parameters dependence
12 p2132 A69-25987

Electric quadrupole coupling for N 14 in aminedisulfonate studied by observation of second order transitions in electron spin resonance spectra
18 p3178 A69-35474

SPIN STABILIZATION

Mechanically despun VHF antenna for spin stabilized synchronous satellites, detailing electrical and mechanical design
01 p0161 A69-10350

Magnetic orientation and attitude control of spin stabilized satellites, synthesizing control circuits and calculating power requirements
03 p0521 A69-13644

Ground coverage of oblate planets by spin stabilized satellites, determining ground areas visible to satellite by solution of quadratic equations
03 p0522 A69-14244

Energy dissipation effects on attitude stability of dual-spin satellites with damping mechanism on rotating sections
04 p0665 A69-14703

Optimum stabilization of uniformly rotating axisymmetric satellite, using Liapunov theorem on asymptotic stability
04 p0666 A69-14921

Roll dynamics of spinning axisymmetric satellite in elliptical orbit, discussing eccentricity and gravity gradient torque effect
05 p0830 A69-16397

Attitude perturbations of spin stabilized satellite describing highly eccentric orbit
06 p1014 A69-17568

Nutational stability of multibody spin stabilized satellites, discussing moment of inertia ratios role with energy dissipative damper on despun platform
06 p1015 A69-17585

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion
07 p1183 A69-19678

Counterrotating antenna for spin stabilized satellite, noting linear phase shift influence on radiation pattern
08 p1289 A69-20968

Electronically phased array antenna system design optimization and testing for application to spin stabilized satellites
08 p1289 A69-20969

Computer program for continuous attitude determination for spin stabilized OGO-C satellite after malfunction of attitude control system, calculating angle between high rate data periods
09 p1610 A69-21987

Harmonic balance procedure to study periodic motions in nonlinear stabilization system of nonrigid satellite
10 p1792 A69-24195

Dynamic modeling for spin stability of satellites with flexible parts, noting torques induced by attitude control
11 p1994 A69-25533

Parachute recovery system for spinning /250 rps/ 155 mm shell launched to 3000 ft/sec by 20,000 g acceleration
[AIAA PAPER 68-937]
12 p2014 A69-26805

Optimal stochastic controller synthesis theory applied to stabilizing and controlling orientation of rotating bodies in central gravitational fields
13 p2300 A69-28326

Linear dynamic stability of spinning satellite in elliptic orbit, applying perturbation method to determine Floquet solutions 14 p2534 A69-29318

Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite 15 p2587 A69-30391

Dynamics of spin stabilized satellite with long crossed dipoles or slender beams, including linearized equations of motion 15 p2703 A69-31332

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization [AIAA PAPER 69-823] 16 p2840 A69-32675

Bearing system for mechanically despun antenna in spin stabilized communications satellite, offering greater directional stability, lower weight and power losses 17 p2978 A69-33431

Rotary power transformer design for spin stabilized spacecraft power system, discussing efficiency and advantages 17 p3050 A69-34111

Optimal nutation damping of spin stabilized bodies, using Pontryagin maximum principle to optimize time, consumption and linear time-consumption combination 18 p3208 A69-34774

Time and fuel optimization of angular momentum alignment and nutation elimination of spin stabilized bodies with inertial reference direction 18 p3208 A69-34775

Mechanics of missile dispersion due to dynamic unbalance and rocket spin stabilization problems [SAWE PAPER 741] 18 p3208 A69-34886

Moment of inertia measurements facility for spacecraft dynamic balancing operations at low angular rates [SAWE PAPER 739] 18 p3118 A69-34889

Lumped parameter simulation model, based on vector mechanics for flexible spinning bodies, to study spin stabilized spacecraft or turbine rotors 19 p3280 A69-35990

Spinning satellite attitude perturbations due to oscillating mass in satellite rigid frame, discussing analytical approach and analog simulation results 20 p3618 A69-37912

Acrodynamic pitch-roll coupling in spinning vehicles, showing unsteady components complicating data reduction 21 p3647 A69-39038

Ariol 3 satellite management structure, responsibilities and orbit, stabilization, launch window, data acquisition and processing 21 p3856 A69-39255

Stability conditions determination for spinning projectile based on ballistic equations, discussing role of Magnus effect 21 p3772 A69-39294

Reaction boom attitude control systems for improving stabilization and maneuvering capability of earth pointing satellites, describing configurations [AIAA PAPER 69-834] 21 p3822 A69-39365

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect [AIAA PAPER 69-857] 21 p3823 A69-39385

Dornier ASTRID attitude stabilization system design for spinning rocket nose cone with instrument payload, using first stage biaxial inertial platform and second stage star tracker 21 p3826 A69-39639

Equations of motion of elastic dumbbell satellite and two-mass spring-connected satellite in orbit, using energy and Floquet theory to investigate spinning motion stability 21 p3817 A69-39759

Fluid loop rotational kinetic energy dissipator reducing time required for reaching WRESAT 1 satellite spin stabilization axis 21 p3828 A69-39767

ATS 3 mechanically despun communications antenna, using parabolic cylindrical reflectors, in-line feed and vernier type stepping motor drive positioning 22 p3913 A69-40692

Multifunction lightweight antenna system package for spin stabilized near synchronous satellite having axis normal to orbital plane 22 p3913 A69-40694

Dynamic model of ablation pitching moment derivative and time lag effect on spinning reentry vehicle applied to Black Knight flight results 24 p4245 A69-43249

SPIN TESTS

Spin tests to determine brittle fracture under plane strain, using cyclic thermal stress or hydrostatic pressure to generate fatigue crack in rotor blank 03 p0524 A69-13060

Nonlinear theory for whirling of heavy string under constant axial tension; considering orbitally stable modes for eigenvalues of rotation 13 p2359 A69-27264

Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients 13 p2370 A69-28665

Inverted spin testing techniques using jet trainer, emphasizing entry variations and effect on spin characteristics 14 p2392 A69-29696

SPIN WAVES
U MAGNONS

SPINACH

Deoxyribonucleic acid conformations in spinach leaf chloroplasts by electron microscopy 20 p3479 A69-38001

SPIINAL CORD
NT SPINE

Ejection seat cushion dynamic characteristics influence on incidence of spinal injury during ejection, considering MIL specification dynamic model of human body 17 p2917 A69-34033

Thermoregulatory responses to cooling in spinal man, discussing deep temperature sensitive structures and relationship between skin and central regulatory structures 22 p3873 A69-40209

Lobeline effect on oxygen pressure in gigantocellular nucleus of medulla oblongata and respiration rates of dogs recorded automatically 22 p3888 A69-41273

Temperature dependence of afferent and efferent spontaneous activity of spinal cord, using filament recordings from ventral and dorsal roots in anesthetized cats 23 p4093 A69-42066

Spinal cord temperature effect on stretch responses of muscle spindle endings of triceps surae, anterior tibialis and extensor digitorum longus in anesthetized cats 23 p4093 A69-42067

Spinal cord temperature influence on stretch response of tonic and phasic alpha-motoneurons by filament recordings from ventral roots in anesthetized cats 23 p4098 A69-42099

High intensity and short duration acceleration effects on human beings, discussing mechanical resistance of spinal column and circulatory aspects 24 p4266 A69-43380

SPINE

Viscoelastic rod model of human spine subjected to accelerations 07 p1072 A69-19725

Dynamic roentgenology of cervical spine noting ease of use in neutral profile, hyperflexion and hyperextension for aeronautical medicine 23 p4087 A69-41797

Military pilots cervical spine dynamic X ray studies, comparing spine curvature and rectitude of jet and nonjet pilots and nonflying personnel 23 p4087 A69-41798

SPINEL

Sulfospinels polymorphism at high temperature and pressure and pressure-temperature phase relations 02 p0266 A69-12162

Thin sections of ringwoodite natural spinel in Tenham meteorite shower, observing various rounded purple isotropic grains 09 p1597 A69-22155

Artificial aging effect on spinel structure and properties of ferrites using X ray analysis, neutron diffraction and electron microscopy 13 p2320 A69-27997

Chromium composites mechanical properties, studying effects of alloying with spinel and magnesium oxides 23 p4177 A69-41672

SPINNING UNGUIDED ROCKET TRAJECTORY

Angle of attack effect on motion throughout entry of spinning descending vehicle, noting effects of transverse angular velocity and spin rate 04 p0666 A69-15522

SPINOR GROUPS

Factorizability of Einstein field equations in two dimensional spinor formulation 03 p0468 A69-13759

Gravitational analog of Mariot-Robinson theorem, obtaining two related theorems with Newman-Penrose spinor formalism 11 p1919 A69-25097

Second rank Dirac spinors with invariant components relative to Lorentz group transformations 19 p3361 A69-36817

SPIRAL ANTENNAS

NT LOG SPIRAL ANTENNAS

Balanced symmetrical four arm conical equiangular spiral antenna providing omnidirectional circularly polarized radiation pattern in azimuthal plane 03 p0404 A69-13471

Anisotropically conducting spiral cone current phase distribution applied to frequency independent antennas analysis, discussing spiral motion and field azimuthal dependence effects 03 p0408 A69-14133

Radiation properties of spherical phased array of 16 flat spiral antennas and radiation field polarization characteristics 04 p0573 A69-14331

Space frequency filter antennas, using multiple terminals for signal processing as function of frequency and angle 08 p1290 A69-20977

SPIRAL GALAXIES

NT MILKY WAY GALAXY

Seyfert galaxies high excitation broad emission lines and quasars resemblance, discussing causes of spiral galaxies violent nuclear activity 04 p0657 A69-14689

Seyfert galaxies nuclear regions, noting multicolor photometric measurements between 0.3 and 1.6 micron and measurements of M87 jet at 1.55 micron 04 p0663 A69-15386

X ray emission from Seyfert galaxy nuclei, noting model with bremsstrahlung from hot source 04 p0649 A69-15387

Galactic model with differential rotation, discussing experiments on bar and cylindrical galaxy and spiral and loop structures formation 07 p1216 A69-19204

Novas in M 31 on Tautenburg Schmidt photographs 08 p1382 A69-19873

Radial distribution of H II regions in spiral galaxies, noting peak at 1/4 distance from center 08 p1384 A69-20052

Neutral hydrogen content and distribution of late type spiral galaxy NGC 6946 from 21 cm line measurements 09 p1598 A69-22187

Rotation and mass of Sb galaxy NGC 1832, giving central and mean densities 09 p1599 A69-22188

Density wave theory of galactic spirals, discussing hydrogen distribution, young star distribution, stellar migration, magnetic field structure, density waves in stellar formation, etc 10 p1786 A69-24109

Cyanogen band absorption in nuclei of elliptical and spiral galaxies derived from photoelectric measurements indicating rich metal content in central cores 12 p1553 A69-25803

Interstellar gas and dust clouds inclination to plane of M31 galaxy spiral arms 12 p2159 A69-26664

Galactic nuclei congeneric and coexisting peculiarities, including hot star planar formations in spiral galaxies 12 p2164 A69-27027

Spiral galaxy nuclei, relating nuclei luminosity to galactic luminosity 12 p2165 A69-27028

Spiral galaxies with connectors observed in Southern Hemisphere, noting galactic nuclei differences and nucleus relation to galaxy morphological type 12 p2165 A69-27030

Absolute radio luminosity relation to surface brightness of extragalactic radio sources, finding volume radiation coefficient of spiral and radio galaxies 12 p2166 A69-27035

Spiral galaxies rotation curve fluctuations attributed to kinematic properties of galactic matter and gas components 12 p2170 A69-27062

Gasdynamic phenomena during subsonic or supersonic motion of isothermal gas under action of gravita-

tional forces in flatten axisymmetric galaxy containing spiral density waves

12 p2170 A69-27065

Spiral arms as wakes of gravitational shock waves arising at galactic nucleus boundary and propagating outward through interstellar gas

12 p2170 A69-27066

Spectrum analysis of radio galaxy M82 nucleus, noting H alpha emission lines from analysis of IR photograph

13 p2335 A69-27310

Hydromagnetic stability of spiral arm embedded in gravitating medium from analysis of instability of self gravitating incompressible cylinder

13 p2346 A69-27705

Messier 51 ionized hydrogen observations, discussing H II regions, radial velocities and galactic mass, rotation and noncircular nuclear motions

13 p2347 A69-27720

Integral equation solved by successive approximation procedure for determining mass distribution in galaxies on radial velocity basis, applying to NGC 7331

13 p2353 A69-28325

Linear polarization of quasars, radio or normal spiral galaxies, galactic objects, etc, observed by Parkes telescope

14 p2526 A69-29770

Supernova in Sc type spiral M83, discussing supernovae occurrence frequency

15 p2682 A69-30451

Spiral density waves formation in galaxy model with differentially rotating and nonrotating subsystems based on collective interactions

15 p2688 A69-30550

Rotation curve, mass and M/L ratio of Sc galaxy NGC 6574, discussing nucleus and systemic velocity

15 p2691 A69-30764

Irregular dwarf galaxies as source of faint objects in close galactic groups

16 p2864 A69-32597

Variation influence of total absorption to color excess ratio on galactic spiral structures indicating ineffective application of variable-extinction method to Q spectra

18 p3199 A69-34914

Spiral disk galaxies stability analysis assuming centrifugal force balancing self gravitation, transforming linearized equations of motion into eigenvalue equations

18 p3200 A69-35131

Spiral galaxy linear diameter relation to luminosity applied to Virgo galactic clusters, noting effect on distance modulus and Hubble constant

19 p3427 A69-36652

Spiral arms interpreted and derived as consequences of galactic nuclei explosion

20 p3599 A69-37468

Photographic photometry investigation of Light distribution in spiral galaxies NGC 681, 972 and 1084, discussing mass distribution

20 p3599 A69-37476

Nonlinear effects in spiral galaxies with emphasis on solar neighborhood region, discussing radial motion, stationary state with excited waves and vertex deviation

20 p3607 A69-38036

Spectra of peculiar S zero galaxy NGC 7625 with irregular dust distribution, discussing central spheroid rotation and mass

20 p3610 A69-38142

Galaxy NGC 3593 with large amounts of interstellar dust, calculating galactic mass and central density

20 p3610 A69-38143

Interferogram observations of central velocity of M 31 under constant rotational velocity assumption, noting galaxy inclination

21 p3797 A69-38481

Galaxy model for spiral structure origin

21 p3797 A69-38537

H II regions radial velocities ellipsoidal distribution in M 33 explained as distribution with minor axis in direction of rotation

21 p3797 A69-38538

RF high resolution observations of edge on spiral galaxy NGC 4631, noting radio halo and spur absence, nonthermal radio emission region, etc

22 p4022 A69-40463

Radio observations of elliptical and spiral noncluster galaxies, noting correlation between magnitude and radio emission in elliptical galaxies

22 p4025 A69-40639

Radio studies of galactic structure, discussing Milky Way origin and formation

23 p4217 A69-42320

Spiral and irregular galaxies integral properties and relations, discussing optical and 21-cm observations, hydrogen masses, statistical corrections, hydrogen line optical depths, etc

23 p4220 A69-42383

OB stars near emission nebula RCW 103, describing galactic structure in Norma

23 p4220 A69-42384

High radial velocity gas cloud near Seyfert type galaxy NGC 4939 nucleus investigated spectroscopically

24 p4375 A69-42609

Circular arm with elliptical cross section used as magnetohydrodynamical model of helical magnetic field in spiral arms to demonstrate interstellar gas flow path

24 p4388 A69-43640

SPLASH POINTS

U RECOVERY ZONES

U WATER LANDING

SPLICING

Machine cutting tool for cutting and splicing endless magnetic tape 30 microns thick, noting film safety feature and nonmagnetic steel scissors

08 p1321 A69-20876

SPLITTING

Partial difference methods from parabolic, elliptic and hyperbolic equations solved by splittings of locally one dimensional nature

21 p3754 A69-38745

Gain modification from spectral splitting of polarization transition by incident light wave on higher frequency coupled transition

22 p3965 A69-41125

SPOILERS

Analytical model of spoiler generated sound in jet pipe, presenting data on level, spectrum and directivity of sound

07 p1183 A69-19462

Spoiler effect on aerodynamic characteristics of airfoil with hinged flap in inviscid fluid plane flow

15 p2549 A69-31223

Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory

[AIAA PAPER 69-737] 18 p3083 A69-34402

DC-10 aircraft CF6 engine thrust reverser and spoiler design features impacting operational characteristics, maintainability, noise reduction, structural concept, control and actuation system

[SAE PAPER 690411] 23 p4200 A69-41639

SPONTANEOUS COMBUSTION

Diacetylene burning and spontaneous combustion regularities, determining reaction kinetics at moderate temperature

02 p0351 A69-11981

Slow oxidation and self ignition in gaseous phase, discussing cold flames and interpretation of experimental data

06 p1031 A69-17416

Chemical mechanism of two stage spontaneous ignition controlled by cool flames of alkane-air mixtures under engine conditions to avoid knocking

11 p1998 A69-24479

Spontaneous reignition predictions for solid restartable rocket motors with solid propellant combustion terminated by liquid quenching

[AIAA PAPER 69-444] 16 p2842 A69-32695

Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc

17 p3070 A69-33142

Thermal stability of reactive spherical shell, investigating spontaneous ignition of volatile fuel drop exposed to hot oxidizing environment

21 p3849 A69-38804

Pressure effects in spontaneous ignition of interimpinging hydrazine and red fuming nitric acid/RF-NA/ liquid streams in evacuated test chamber

24 p4415 A69-43667

SPONTANEOUS EMISSION

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission

09 p1515 A69-21354

Quantum phase noise in He-Ne laser, considering amplitude fluctuation, spontaneous emission and oscillator linewidth

10 p1704 A69-23669

Spontaneous gas laser emission from level coupled by spontaneous transition with emitting level, obtaining

atoms interaction with laser field velocity distribution and spectral line width

17 p2981 A69-33116

Laser action and spontaneous emission at atomic oxygen transition, discussing pulsed emission mode in argon-oxygen laser

17 p2982 A69-33632

Laser action in quantum system, analyzing absorption constant relation to spontaneous/stimulated emission constants, energy level population inversion, pumping, etc

17 p2984 A69-34150

Pressure dependence of trapped spontaneous decay of resonant radiation carbon dioxide

18 p3179 A69-35471

Carbon dioxide lasers near IR spontaneous emission spectra

19 p3339 A69-36697

Afterglow decay rates of Zn II laser lines in spontaneous emission measured, indicating thermal energy charge exchange excitation and CW oscillation

21 p3735 A69-38598

Changes in CdS crystals spontaneous and coherent emissions caused by electron beam radiation damage, determining intensity and spectral composition dependence

21 p3780 A69-39047

Lasing properties of spontaneous emission hemispherical semiconductor diode with AlAs-GaAs junctions measured by calibrated silicon photocell

22 p3964 A69-40608

Anisotropic carrier distribution effect on polarization of spontaneous recombination radiation during GaAs breakdown in electric field

24 p4362 A69-43736

SPONTANEOUS IGNITION TEMPERATURE

U IGNITION TEMPERATURE

SPORADIC E LAYER

Sporadic E layer boundary frequencies disturbances at midlatitudes, noting solar activity effects, diurnal variations and effect of meteor fluxes

01 p0066 A69-10600

Temperate latitude sporadic E origin and structure - Conference, Vail, Colorado, June 1968

01 p0069 A69-11156

Gross behavior patterns of intense sporadic E including seasonal, diurnal and geographic variations and latitudinal and longitudinal effects

01 p0070 A69-11157

Morphological behavior of blanketing sporadic E at middle latitudes, discussing wind shear time variations, solar cycle variation and geomagnetic storm effects

01 p0070 A69-11158

Time and latitude variations of blanketing sporadic E of different intensities

01 p0070 A69-11159

Numerical maps of sporadic E critical frequency for solar cycle maximum and minimum to estimate propagation

01 p0070 A69-11160

Sporadic E layer structure observed by rocket borne probes relation to ground based radio techniques, showing agreement between plasma and blanketing frequencies

01 p0070 A69-11161

Blob existence in temperate latitude sporadic E from ionosonde and VHF oblique incidence measurements

01 p0070 A69-11162

Sporadic E microstructure and vertical motion, describing radio sounding system to observe ionospheric 3d structure and motions from ground

01 p0071 A69-11164

Nighttime sporadic E rocket measurements, discussing descending layer thickness and electron density and lower boundary

01 p0071 A69-11165

Sporadic E structure and composition measured above White Sands by rocket-borne planar ion trap and two RF ion mass spectrometers

01 p0071 A69-11166

Initial production of metallic gases associated with sporadic E layers by processes other than vaporization or photodissociation, discussing Na atom production mechanisms

01 p0071 A69-11167

Metal ionic reactions with weak chemical bond breaking and three body reactions forming molecular ions without bond breaking, discussing sporadic E deionization

01 p0071 A69-11168

Cause and structure of temperate latitude sporadic E - Conference, Vail, Colorado, June 1968, Volume 2

01 p0072 A69-11169

Midlatitude sporadic E layer, examining hypothesis of wind action on metallic ions and metallic ion accumulation caused by gravity waves

01 p0072 A69-11173

Sporadic E layer formation, considering ion convergence effects due to neutral wind shears and drift ionization due to electrostatic field

01 p0072 A69-11174

Neutral gas temperature variations effect on electron-ion temperature height profile in tidally generated sporadic E layer with wind shear of gravity wave origin

01 p0073 A69-11176

Midlatitude sporadic E layer vertical and horizontal structure and statistical properties, discussing theory of ion concentration by wind shear

01 p0073 A69-11177

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency

02 p0207 A69-11684

Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle

02 p0239 A69-11685

Nighttime sporadic E layer occurrence due to ionization redistribution established, noting concurrent F region electron concentration decrease

03 p0423 A69-13536

Absorption as factor influencing correlation between solar activity, sporadic E layer probability of occurrence and reflection stability

03 p0423 A69-13537

Radio wave absorption in ionosphere at five fixed frequencies for determining correlation with changes in sporadic E layer parameters

03 p0423 A69-13539

Sporadic E irregularities in producing amplitude variations in radio star observations and satellite transmission

04 p0594 A69-15125

Sporadic E layers compared with model of electron concentration profile, using rocket measured profile data for computing ionogram

06 p0922 A69-17750

Time and latitude variations of blanketing sporadic E using wind shear theory, predicting ionization layer formation in ionospheric E layer

07 p1125 A69-18840

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves

09 p1486 A69-21547

F2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

09 p1486 A69-21548

Sporadic E region HF backscatter observed during IQSY, using PPI display

09 p1489 A69-21701

VHF satellite signal scintillation by ionospheric irregularities with sharp boundary /such as sporadic E/, noting diffraction pattern dependence on phase shift

09 p1489 A69-21713

Numerical decile value maps of sporadic E layer ionization critical frequency for each month of solar cycle minimum and maximum year

10 p1682 A69-23418

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanism and ambient electron density

10 p1688 A69-23932

Vertical probe observations of short radio waves propagation through sporadic E at various frequencies and path lengths

10 p1657 A69-23933

Polar cap sporadic E investigation with backscatter at 28 MHz, noting geographic distribution, annual and diurnal variations

12 p2069 A69-26464

Correlation coefficient between changes in F2 layer critical frequency and sporadic E layer maximum frequency

13 p2254 A69-28330

Ionospheric sporadic E layer reflection duration during solar activity cycle analyzed as function of critical frequency

13 p2224 A69-28715

Sporadic E layer critical frequencies seasonal and diurnal periodic variations, noting independence of solar activity cycle

13 p2258 A69-28716

Sporadic E layer cloud configuration study based on explorer 20 satellite observations, discussing W echoes

14 p2434 A69-28943

Position stability of ionospheric sporadic E layer

14 p2435 A69-29038

Vertical motion of ionized formations in ionospheric F region related to sporadic E layer

14 p2437 A69-29074

Electron and ion temperatures height variations in sporadic E layers, noting effects of neutral gas temperature changes

14 p2440 A69-29127

Efficiency parameter beta for ion and electron production by meteoritic processes, noting importance to nighttime sporadic E ionization

14 p2520 A69-29372

Sporadic E layer frequency characteristics dependence on reflected signal fading, showing fine structure influence and maximum value of mean electron concentration

14 p2442 A69-29733

Ionospheric sporadic E layer inhomogeneities drift, discussing altitude dependence of velocity and direction

14 p2444 A69-29869

Sporadic E layer nighttime electron density profiles obtained by Langmuir probe equipped sounding rockets

15 p2603 A69-31398

Charge density irregularities of midlatitude ionospheric E region related to cross field plasma instability noting turbulence

16 p2773 A69-31972

Low latitude sporadic E layer associated with geomagnetic activity studied in Hong Kong using proton precession magnetometer and standard ionosonde

16 p2779 A69-32195

Sporadic E ionization by rocket sounding, comparing positive ion density measurements with separate wind shear observations

16 p2780 A69-32310

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves

16 p2784 A69-32542

F2 layer diffusion and sporadic E layer characteristics from equatorial ionosphere soundings on Zaria schooner

16 p2784 A69-32543

Relationship between sporadic E and 5577 A nightglow emission attributable to ionization redistribution in E region due to dynamic processes

16 p2788 A69-32782

Latitude variations of day and night ionospheric critical frequencies, inhomogeneity and ionization, discussing generation of r type sporadic E layer in auroral zone

17 p2964 A69-33963

Reflection and ionization heights diurnal variations in F region, obtaining data for sporadic E formation

17 p2968 A69-33995

Diurnal sporadic E layer height variations analyzed for singularities in height peak behavior as function of geography, season and magnetic activity

17 p2968 A69-33996

Time dependent diffuse reflections related to solar activity, showing diffusion intensity variations with sporadic E layer height and electron concentration

17 p2968 A69-33997

Midday aurora oval and polar cap region airborne observation, noting relation to sporadic E layer

18 p3126 A69-34258

Frequency dependence of radio wave absorption in ionosphere at 2.2-4 MHz by impulse method, noting effect of sporadic layer

20 p3491 A69-37680

Sporadic E layer structure and behavior during solar cycle from vertical sounding, discussing semiopaque region, reflection multiplicity, active height, wind effects, etc

20 p3528 A69-37681

Sporadic E layer large scale irregularities direction and velocity determined by inclined backscatter method, using plan position indicator

20 p3528 A69-37682

Small scale inhomogeneities motions in E and sporadic E layers, processing data with method of full correlation analysis and statistical method

20 p3528 A69-37683

Ion layer separation in temperate-zone sporadic E, obtaining layer shape by superimposition of density distributions

20 p3535 A69-38106

Equatorial E sub sq and daytime blanketing sporadic E occurrence frequencies compared in magnetic equatorial zone, considering diurnal, seasonal, latitudinal and vertical variations

23 p4160 A69-42426

Daytime drift velocities and signal fading characteristics of equatorial and blanketing sporadic E layer irregularities, noting independence of electrojet intensity

23 p4160 A69-42429

Midlatitude sporadic E model, discussing overdense ionization layers spatial distribution, wind shear effects, periodic variations, etc

24 p4311 A69-43743

SPORADIC METEOROIDS

Diffuse meteor stream separation from sporadic background, using orbital elements of individual meteors

04 p0659 A69-15034

Sporadic background separation from radar observations of meteor showers, using echo range distribution, head echoes and antenna direction change

04 p0659 A69-15035

SPORES

NT MICROSPORES

Dry heat destruction of spores, discussing dependence on spore water content and effect of surrounding gas volume on escape of water from spore

05 p0712 A69-15938

SPOT WELDS

Electrode indentation in resistance spot welds related to weld strength for titanium, steel and aluminum alloy

01 p0086 A69-10538

Spot weld strength of tungsten inert gas spot welding on Al-Mg-Si sheets greater than resistance welding, noting crack formation during inert gas welding

05 p0769 A69-16538

Weld-nugget formation in resistance spot welding, using high-speed photography on model section of spot weld

05 p0769 A69-16539

Vacuum effects on resistance spot welds in aluminum, stainless steel and titanium alloys, noting X ray and tensile shear test results

12 p2103 A69-26622

Seam and stitch welding in miniaturized semiconductor package fabrication, including leak rate tables

18 p3149 A69-35272

Resistance spot welds in Al, Ti and stainless steel in air and hard vacuum, showing feasibility for space assembly

19 p3319 A69-35554

SPRAY CHARACTERISTICS

Sprays in solar flares, discussing production in explosive and normal flares, occurrence, energy and relation to surges

06 p0995 A69-17439

Lateral spreading of liquids injected into supersonic flow, discussing dependence on Mach number and scattered light and schlieren photographs of spray structure

09 p1482 A69-21966

Quantitative analysis of interaction between spray and ambient atmosphere, discussing atomization of flat sheet and drop behavior relationship to operating conditions

15 p2717 A69-30465

Decomposition of ammonium perchlorate containing additives introduced by spray drying [AIAA PAPER 69-502]

16 p2834 A69-32752

Evaporation rate of liquid sprays involving atomization, droplets ballistics, drop size distribution, turbulence effects, etc

18 p3119 A69-34246

Spray cleaning and deoxidizing of Al surfaces for structural bonding using sulfuric acid-sodium dichromate deoxidizer, noting tests with proprietary solutions

19 p3321 A69-35564

Tilt wing V-STOL aircraft spray circulation characteristics in overwater operation, examining forces, moments and generated environmental conditions [AIAA PAPER 69-791]

19 p3243 A69-35638

SPRAY NOZZLES

Liquid metal sprayer design including calculation of nozzles for subsonic and supersonic gas outflow

21 p3728 A69-38613

SPRAYED COATINGS

Density distribution vs thickness in sprayed ZrC, NbC and aluminum oxide coatings obtained by plasma jet

12 p2118 A69-26258

Spray deposition of low emittance gold thermal control coatings on aerospace structures

15 p2618 A69-30310

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc
20 p3549 A69-37374

Sprayable polyurethane foam lightweight insulation for Saturn s-2 booster tanks holding liquid H an liquid O at wide temperature ranges
21 p3732 A69-38967

**SPRAYED PROTECTIVE COATINGS
U PROTECTIVE COATINGS**

SPRAYERS

Liquid metal sprayer design including calculation of nozzles for subsonic and supersonic gas outflow
21 p3728 A69-38613

SPRAYING

NT ARC SPRAYING
NT FLAME SPRAYING
NT PLASMA SPRAYING

Lithium metal spray structural cooling system for refractory materials
[AIAA PAPER 68-358] 04 p0688 A69-15509

Spray cooling techniques for thermal protection of aerospace structures including lithium spray cooling, vapor collection and condensation, etc
11 p1966 A69-24532

Etching, spray etching and photo-resist methods for producing CrNi steel heating elements for propeller de-icing
12 p2102 A69-26370

**SPRAYING APPARATUS
U SPRAYERS**

SPRAYS

U SPRAYERS

SPREAD F

Latitude variation of time of occurrence of maximum F height and maximum spread F probability
03 p0420 A69-13305

Antarctic spread F irregularities, examining models and performing ray tracing
04 p0595 A69-15439

Latitude variations of delays between spread F and magnetic activity shown to be different at various parts of solar cycle
16 p2779 A69-32194

Field aligned ionospheric F layer ion density irregularities, using simultaneous hourly radar echo and spread F data and detailed ray path calculations
18 p3129 A69-34958

**SPREAD REFLECTION
U DIFFUSE RADIATION
U REFLECTION**

SPREADING

Alloy elements effect on spreading of liquid titanium and zirconium alloys on graphite
03 p0446 A69-13573

Paraxial electron beams from Pierce gun and spreading due to thermal velocities and space charge in nonuniform potential
12 p2036 A69-25920

SPRINGS (ELASTIC)

Positive feedback of spring mass system for mirror control on spectroheliometer of Apollo Telescope Mount flight
02 p0248 A69-11738

Spring supported hydrostatic shaft seal with floating members isolated from structure
[ASME PAPER 68-WA/LUB-9]
05 p0768 A69-16132

Nonlinear oscillations stability of solid body connected to base by elastic springs of different rigidities under external forces
14 p2536 A69-29745

Blade vibration damper consisting of springs attached to blade, analyzing resonance stresses on basis of dynamic rigidities
17 p3066 A69-33944

Landing shock struts of Surveyor 6, emphasizing silicone liquid springs role as absorbers and stabilizers
20 p3466 A69-38180

Spring mass nonlinear systems under constant force excitation, studying step function responses of systems with various restoring force characteristics
21 p3836 A69-38985

Damped mass spring system response to sonic booms, considering effects of structural damping, total/positive phase duration ratio and N wave rise time
21 p3647 A69-38987

Time optimal control of soft spring showing switching locus changes
24 p4289 A69-42955

**SPUR [REACTORS]
U SPACE POWER UNIT REACTORS**

**SPURT [TRAJECTORIES]
U SPINNING UNGUIDED ROCKET TRAJECTORY**

SPUTTERING

Cathode sputtering and thermal evaporation in vacuum used for preparing thin dielectric coatings on mirrors of optical resonators containing nonlinear crystals
03 p0438 A69-13049

Angular distribution of particles sputtered from GaAs and GaP single crystals, bombarding faces with Ar ions at low energy
04 p0640 A69-14452

RF sputter etching of microcircuits and components
04 p0606 A69-14874

Vacuum equipment for evaporation or sputtering in semiconductor industry
04 p0598 A69-14876

Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] 07 p1140 A69-19308

Electric propulsion systems characteristics, examining sputtering of metallic targets as thrust augmentor
11 p1944 A69-25598

Ion sputtering method for making electrodes in thermionic energy converters, discussing alumina and W surface layers preparation
23 p4170 A69-42259

SQUALLS

Probabilistic forecasts in meteorological support of aviation, comparing economic implications of squall forecasting
14 p2474 A69-29739

SQUARE WAVES

Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments
18 p3134 A69-34537

Time domain expression derived for frequency varying nonperiodic square wave in FDM and FM systems, using orthogonal functions to obtain frequency spectrum
24 p4281 A69-42623

SQUARES [MATHEMATICS]

Square matrices decomposition into orthogonal and triangular matrices products for computer storage applications
13 p2290 A69-28485

Visual succession threshold for sides of square contour affected by presenting single line on parallel contour sides
22 p3882 A69-40868

**SQUEEZING
U COMPRESSING**

SQUELCH CIRCUITS

Linear integrated circuit communication systems based on subsystem approach, showing example of IF strip and audio AGC/squelch amplifier
01 p0035 A69-11389

HF receiver interference blanker, discussing limiter-blanker system, integration, effectiveness and squelch circuit
23 p4141 A69-42221

Stability of compound superconducting cables under conditions of controlled heat transfer from cable surface to liquid He
[IEEE PAPER 13.5] 01 p0176 A69-10718

Difference schemes stability for solving linearized gasdynamic equations obtained by representing transition matrices in form of two matrix sum
01 p0060 A69-10722

Stability of two coordinate automatic angular tracking systems
01 p0053 A69-10800

Reduction principle for study of linear differential equations stability
01 p0106 A69-10956

Unstable minimization problem of functional, examining construction of sequences and stability
02 p0271 A69-11648

Numerical integration stability of differential equations, noting limiting integration step size for unsteady distillation
02 p0273 A69-12478

Necessary conditions for stability of trivial solutions of parabolic systems of partial differential equations
03 p0456 A69-13405

Stability criteria for closed rigid feedback systems with stable linear part connected in series with parametric quick response nonlinear element
03 p0410 A69-13683

Critique of paper on theory of gradient instability in semiconductor currents, questioning boundary value problems solution validity
03 p0487 A69-13728

Stability of stochastic systems, discussing continuous parameter models, Gaussian white noise, stabilization of unstable deterministic system and ITO equations
04 p0623 A69-14695

Stability limits of regenerative echo amplifier during simultaneous variation of network capacitance and negative resistance
04 p0577 A69-14778

Periodic cycles in linear closed loop integral pulse FM systems, discussing existence conditions, periodic formulac and stability criterion
05 p0737 A69-15865

Stability of linear passive time variable circuits, discussing validity of circuit elements replacement by gyrator equivalents
05 p0739 A69-16348

Stability of time varying systems by construction of multipliers with prescribed phase characteristics
05 p0740 A69-16598

Stability analysis of nonlinear and time varying discrete feedback systems
05 p0740 A69-16600

L super P stability conditions for nonlinear time varying feedback systems derived with transformation technique and small gain theorem
06 p0903 A69-17411

Existence and uniqueness theorem for functional equation of optimal control problems, noting stability of solution
06 p0949 A69-17889

Rearrangement inequalities for positivity of nonquadratic transformations, discussing stability of nonlinear feedback loop described by difference equations
06 p0904 A69-17943

Circle criterion for stability of nonlinear time varying systems, considering integrator and infinite sequence of impulses in impulse response
06 p0905 A69-17949

Linear closed loop control system poorly damped response to deterministic inputs improved by stability constraint for minimization of mean squared error
06 p0905 A69-17950

Rotating stellar models oscillation and stability approximated by virial equations
07 p1220 A69-19389

Stability analysis of model reference adaptive control system with sinusoidal inputs, using reformulation of fourth order Runge-Kutta method
08 p1297 A69-20357

Stability region of second order nonlinear autonomous system determined by numerical computational method
08 p1297 A69-20358

Relativistic energy momentum tensor of electromagnetic field in moving multicomponent dispersive media and instability of wave
10 p1653 A69-23193

Instabilities of numerical integration of ordinary differential equations on digital computer, considering difference approximation containing extraneous solutions

10 p1721 A69-24042

Linear differential equation solution for elastic systems stability problems, discussing applications to heated rectangular plates

11 p1982 A69-24950

Initial conditions estimation problem for nonlinear system asymptotic stability and satisfaction of output constraints on state variables

11 p1909 A69-25290

Energy metric algorithm for Liapunov functions generation, discussing stability conditions in Wall and Moe work

12 p2122 A69-26521

Dahlquist linear multistep methods of stability analysis for ordinary differential equations extended to Volterra integrodifferential equations

12 p2123 A69-26753

Electric drift instability in semiconductors with hot electrons, discussing diffusion, electron heat conduction, energy transfer, space charge density, etc

13 p2318 A69-27891

Stability of quasi-solutions for equations with closed and with continuous operators

13 p2289 A69-28483

Semidefinite Peano kernels of stable forms

15 p2644 A69-30450

Chetaev /A, lambda/ estimates of approximate integrations of system of ordinary differential equations, analyzing stability with aid of Liapunov functions

15 p2644 A69-30664

Asymptotic Liapunov stability of perturbed solutions to weakly coupled multifrequency systems

15 p2654 A69-31258

Stability and asymptotic stability theorems related to Liapunov second method, considering linear differential equations zero solution

15 p2654 A69-31259

Pseudo Runge-Kutta methods stability in numerically integrating two point Cauchy problems

15 p2646 A69-31261

Stability determination for nonlinear automatic control systems, describing mathematical methods based on Liapunov functions

16 p2804 A69-32242

Digital simulation computer stability analysis scheme premised on use of perturbed transient responses

17 p2944 A69-32899

Stability conditions for time lag differential equation systems over finite interval employing Liapunov functions, noting similarity with systems having continuously acting disturbances

17 p2995 A69-33616

Ordinary differential equations integration method, presenting algorithm based on double constraint of maximum accuracy and stability

19 p3279 A69-35805

Liapunov first stability theorem generalized for differential equations in Banach space

19 p3360 A69-35860

Autonomous second order recurrence with real variables, studying conditions for attractive limiting set stability region with several noninterconnected regions

19 p3287 A69-36651

Elastic stability theory from thermodynamic viewpoint, considering postulates and energy equations

19 p3444 A69-36796

Adjoint system for determining equilibrium stability of elastic continuum subjected to follower type surface tractions

19 p3446 A69-36835

N-dimensional vector functions branching process stability belonging to locally compact set in certain space

20 p3509 A69-37075

Stability analysis of Kippenhahn-Schluter model of solar corona filaments against arbitrary perturbations treated in MHD approximation using Bernstein energy principle

20 p3588 A69-37544

Hydrostatic instability in high temperature stars in postNewtonian approximation

20 p3580 A69-37926

Stability criteria for integral manifold formed by intersection of hypersurfaces in Euclidean n-dimensional space

21 p3770 A69-38850

Asymptotic stability of differential equations solutions in linear normalized spaces via Liapunov theorems extension

21 p3755 A69-39105

Stability of two differential equations in critical case, obtaining Liapunov stability and instability

21 p3755 A69-39107

Absolute and convective instability criteria of interacting electromagnetic waves in waveguide systems involving parametric oscillators and amplifiers

21 p3677 A69-39555

YIG single crystal disk instability, noting dispersion of magnetostatic and plane spin waves from supplementary absorption and LF oscillations recording

21 p3783 A69-39561

Boundary value problem of hydrodynamic equations discontinuous solution stability under random perturbations, analyzing combustion and detonation models

23 p4239 A69-41961

Sufficient conditions theorems for investigation of instability of numerical integration methods to solve differential equations

24 p4339 A69-42646

STABILITY AUGMENTATION

U FEEDBACK CONTROL

U STABILIZATION

STABILITY DERIVATIVES

NT PITCHING MOMENTS

NT ROLLING MOMENTS

Stability derivative estimation at subsonic speeds for preliminary design engineer

05 p0700 A69-15545

Dynamic stability tests of tilt winged V/STOL aircraft model in ultralow speed range, discussing apparatus for stability derivatives

06 p0866 A69-17091

Lifting force and moments acting on slender wing of finite span and arbitrary planform moving at constant mean velocity in unsteady flow

06 p0858 A69-17338

Roll acceleration influence on angle of attack convergence and windward meridian rotation rate of rolling reentry vehicles

[AIAA PAPER 69-100]

06 p1018 A69-18089

Longitudinal stability derivatives prediction for rigid and elastic airplanes, using influence coefficient method

[AIAA PAPER 69-131]

06 p0868 A69-18134

Stability theorem for nonlinear mixed integral equations in boundary value problems

08 p1343 A69-20355

Unstable regions prediction for reciprocal cases governed by linear equations with periodic coefficients, noting application to rotating shaft and helicopter rotor

08 p1413 A69-20401

Laminar hypersonic roll damping derivatives for 10 degree half angle cone at zero angle of attack for environmental flow conditions of hypersonic wind tunnel

09 p1430 A69-21958

Newton-Raphson technique development for determining stability derivatives from flight data, noting use of a priori wind tunnel information

[AIAA PAPER 69-315]

09 p1434 A69-22379

Geometrical stability criterion similar to Popov criterion for single loop time varying nonlinear control systems analysis

09 p1476 A69-22784

Liapunov direct method in stability problems for semilinear and quasi-linear systems of hyperbolic partial differential equations with independent variables

09 p1534 A69-22799

Aircraft stability derivatives determined by adaptive method, emphasizing physical and mathematical characteristics of learning model

11 p1824 A69-25671

Asymptotic stability inferred by examining higher order derivatives of Liapunov function, noting application to learning and adaptive control

12 p2122 A69-26522

Accelerometer force balance used in measuring forces and moments acting on models in short duration rocket plume tests at simulated high altitude

[AIAA PAPER 69-351]

13 p2264 A69-28285

Stability theorems for barotropic vorticity equation integrated within limited region for flow through boundary without existing physical boundary conditions

13 p2294 A69-28494

Aerodynamic lift and moment fluctuations of sphere at supercritical Reynolds numbers measured by hot-wire anemometers, noting dependence on time

14 p2390 A69-29573

Popov type graphic criterion for determining absolute stability of modulation systems

16 p2764 A69-32440

Popov and Sandberg graphic methods for determining absolute stability of nonautonomous systems, noting role of single nonzero eigenvalue in matrix

16 p2765 A69-32441

Cosmos 149 satellite stabilization system, discussing three axis orientation and pitch, yaw and roll stabilizations by aerodynamic and/or gyroscopic moments

17 p3047 A69-33226

Cauchy problem for homogeneous linear difference scheme with constant complex coefficients, giving stability lemmas

18 p3165 A69-35049

Aircraft wing aerodynamic forces and moments due to lifting engine air intake simulated by wind tunnel experiment

19 p3239 A69-36400

Gyrostatt satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostabilized satellite equations of motion

19 p3432 A69-36620

First approximation stability of triangular Lagrange solutions of restricted elliptical three body problem, formulating power series for orbital eccentricity

20 p3575 A69-37318

Wind tunnel tests determining propeller slipstream effect on roll-damping derivative in transitional flight region, estimating STOL aircraft characteristics

22 p3863 A69-40145

STABILITY TESTS

NT FLIGHT STABILITY TESTS

NT WIND TUNNEL STABILITY TESTS

Matrix transformation applications in dynamic system theory and stability test

02 p0281 A69-11943

Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses

03 p0367 A69-13074

Stability margin difficulties in equilibrium application to continuum mechanics

03 p0418 A69-13816

Stability test functions for characteristic polynomials with real coefficients and even powers

05 p0833 A69-15710

Stability test for linear unit feedback control system with second order lag and dead time compensated by PIO controller

13 p2238 A69-27395

High strength alloys stress corrosion cracks, analyzing tensile ligament instability from plastic flow tests of bulk /compression/ specimens

13 p2277 A69-27404

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures

13 p2277 A69-27405

Numerical absolute stability test for nonlinear discrete systems using bilinear transformation

17 p2994 A69-32848

Finite difference schemes for barotropic fluid free surface model primitive equations tested for numerical integration stability and accuracy

17 p2997 A69-33691

Numerical procedure for testing absolute stability and positive realness of free dynamic systems based on Routh algorithm

18 p3112 A69-34689

Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions

19 p3281 A69-35549

STABILIZATION

NT SIGNAL STABILIZATION

NT SPIN STABILIZATION

Garden hose instability quasi-linear stabilization employing macroscopic viewpoint, discussing fluid model

01 p0133 A69-11217

Stabilization system for klystron automatic frequency control, noting use in voice communication microwave generators and resonance spectroscopy

02 p0216 A69-12096

Cavity stabilization of microwave oscillator for noise reduction

02 p0220 A69-12451

Linear differential equations zero solution stabilization by control formed as linear combination of measured coordinates of object

03 p0408 A69-12972

Linear pulse control systems monotone stabilization, estimating required number of controls

03 p0409 A69-12975

Stabilization of steady motions of nonlinear controlled systems with two purely imaginary roots, using Liapunov stability theory

05 p0794 A69-15790

UV astronomy, discussing vehicle stabilization, un-stabilized sounding rockets, scanning satellites, bal-

loons, stabilized rockets, pointing satellites, optics and detectors

05 p0821 A69-15839

Stabilization method for composite cavity single frequency laser, noting insensitivity to oscillation power level variations

05 p0776 A69-16333

Stabilization rate of boundary value problem for parabolic equation in n dimensional space

09 p1532 A69-21627

Gain stabilization of parametric amplifier, using pumped conduction current of varactor diode

09 p1467 A69-22585

Fluid rotor angular accelerometer design for stabilization and control, noting applications to centrifuge speed and thruster gas consumption

10 p1633 A69-23273

Superconducting magnets steady state stability improvement by using composite conductors

10 p1746 A69-23634

Computer aided design of linear multivariable control systems applied to VTOL aircraft stability augmentation

12 p2013 A69-26068

Asymptotic controllability of linear system, giving stabilization procedures based on solutions to limiting differential equations

12 p2053 A69-26515

Helicopter stabilization systems design using optimal control theory to obtain multivariable feedback controller

12 p2014 A69-26764

Nonholonomic coupling effect on mechanical system stabilization characteristics in terms of generalized coordinates

14 p2482 A69-28814

Stabilization system design for stratospheric balloon gondolas, discussing optimal system with flywheel and weight combination

17 p2898 A69-33242

Stability augmentation system for CX-84 tilt wing V/STOL aircraft, using redundancy techniques to achieve fail operational performance with two active channels [AHS PAPER 310]

17 p2901 A69-33545

Statistical characteristics stabilization of random loads in fatigue tests, noting transfer function of testing machine and spring stiffness

18 p3215 A69-34544

Generalized Cauchy problem solution stabilization for ultraparabolic equation by integral representation of solution in positive initial functionals

18 p3165 A69-35312

C-5 aircraft stability augmentation and autopilot development with consideration for unusual design required by takeoff weight, inertia and low approach speed

20 p3461 A69-36927

Balloon-borne gondola azimuth stabilization using lunar tracker

20 p3538 A69-37300

Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance [AIAA PAPER 69-887]

21 p3647 A69-39413

STABILIZED PLATFORMS

Stabilized platform vibration in inertial navigation system with integral correction

01 p0112 A69-10086

Brushless DC torque motor using reluctance magnetic circuit and toroidally distributed coil winding

01 p0012 A69-10154

Satellites and ocean platforms for civil aviation operations over North Atlantic, noting cost justification dependence on supersonic traffic increase [UN PAPER 68-95887]

01 p0113 A69-10521

Invariance of stabilized coordinates in power gyro stabilizers, using matrix equivalent of gyroscopic moments acting on platform

04 p0597 A69-14602

Multiframe platform stabilization, analyzing dynamic coupling due to possible avoidance of adjusting moment and effect of coupling on attitude control

04 p0629 A69-14830

Equations for instability of stabilized platform of inertial navigation system with viscous friction in accelerometers

06 p0954 A69-16824

Attitude stabilized balloon telescope for measuring interplanetary scattered light and nightglow

06 p0999 A69-16972

Attitude control system for maintaining orientation of experimental package relative to space stabilized platform, noting transient response and steady state accuracy

06 p0955 A69-17587

Attitude stabilization for astronomical satellites

06 p1015 A69-17588

Stabilized gyroscope platform internal dynamics analysis, outlining optimal orientation for full compensation of cross couplings

09 p1499 A69-22240

Gyroscopes orientation influence on dynamic drift of triaxial power gyrostabilizer on rocking platform, noting optimum orientations

11 p1881 A69-24560

Inertial navigation platform principles including acceleration and position of vehicle, single axis platforms and stabilized element coordination

12 p2078 A69-25872

Dynamics of triaxial gyrostabilizer with additional rotor mounted on base, showing systematic drift

13 p2259 A69-27428

Triaxial gyrostabilizer systematic drifts during rocking at large platform displacement angles, analyzing drift direction and rate dependence

13 p2259 A69-27430

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization

13 p2357 A69-28476

Gyroscopic platforms automatic stability relative to inertial reference system, considering functional equations and error computation

21 p3760 A69-38734

Gyroplatform to stabilize gravimetric equipment on aircraft, noting channel stabilization by electrohydraulic servomechanism

21 p3723 A69-38885

Photographic platform applications of tethered balloons, discussing powered systems for low and high altitudes and free balloons

22 p3865 A69-40811

STABILIZERS

Optimum platform stabilizer selection for damping of rotational motion and elastic torsional stresses of aircraft fuselage about longitudinal axis

11 p1966 A69-25327

Ammonia jet device to stabilize telecommunication satellites consisting of electric heating element, ejection nozzle and thermal screens

17 p3018 A69-33236

STABILIZERS [AGENTS]

Gas chromatography used to determine residual solid propellant stabilizers content and nitro derivatives, including thin film chromatography

02 p3030 A69-11528

STABILIZERS [FLUID DYNAMICS]

NT HORIZONTAL TAIL SURFACES

Lifting reentry dynamic stability of flare stabilizers and flap controls

[AIAA PAPER 69-182] 06 p1017 A69-18053

Lift augmentation by lateral blowing over lifting surface, discussing wind tunnel pressure tests on wings, flaps and stabilizers [AIAA PAPER 69-193]

07 p1051 A69-19554

STABLE OSCILLATIONS

Nonlinear adiabatic pulsations of sequence of massive stars of uniform composition, allowing for radiation pressure variations

01 p0149 A69-10266

Asymptotic stability conditions for delayed quasilinear nonautonomous systems periodic solutions derived by Shimanov method

02 p0280 A69-11705

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

02 p0291 A69-12553

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources

04 p0575 A69-14463

Two mirror resonators, discussing curvatures formation and stability conditions to derive natural frequencies

09 p1520 A69-22680

Axisymmetric models for stable and unstable oscillations of rapidly rotating zero temperature white dwarfs, discussing kinetic and potential energy

10 p1789 A69-24129

Hydromagnetic fluid flow between flat plates oscillating with phase difference, same frequency and different amplitudes

12 p2135 A69-26273

Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations

13 p2253 A69-27629

Time dependences of retardation effect, reversible magnetic permeability and magnetic viscosity during pulse magnetization of ferrite cores

13 p2319 A69-27999

Rotary oscillatory solution of parameterized system with stable unexcited motion using successive approximations

14 p2482 A69-28812

Bistable zones in series oscillator circuit consisting of inductor and nonlinear p-n junction capacitance subjected to DC and AC voltage sources

14 p2418 A69-28834

Nonlinear oscillations stability of solid body connected to base by elastic springs of different rigidities under external forces

14 p2536 A69-29745

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect

15 p2703 A69-30050

Bulk negative resistance material stability, discussing amplifier skin effect limitation and instability beyond critical length

15 p2575 A69-30172

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

15 p2658 A69-30250

Oscillations analysis in quasi-linear autonomous system with two degrees of freedom, using point mapping for case of resonance

15 p2653 A69-31193

Satellite gravitational stabilization system with maximum damping rate, discussing orbital plane oscillations

16 p2867 A69-31738

Almost periodical oscillations of nonlinear systems containing quasi-cyclic coordinates

16 p2813 A69-32286

First harmonic approximation method reformulated to interpret nonlinear characteristic directly, discussing oscillation stability of servosystems

19 p3287 A69-36709

Two-pulse limit cycle oscillation stability relation to physical parameters of pulse modulated feedback system used for satellite attitude control

21 p3688 A69-39756

Oscillators frequency instability theories emphasizing difference between concepts of frequency instability and spectral purity

22 p3900 A69-40930

Book on interaction between oscillatory systems and energy source of limited capacity, examining stability and resonance phenomena

23 p4170 A69-42166

STACKING FAULT ENERGY

Nickel-cobalt fcc alloys rolling and recrystallization textures established with filtered Aco K-alpha radiation, considering stacking fault energy effects

04 p0615 A69-14643

Substructural changes during fatigue due to stacking fault energy variations related to morphology of fracture surface in solid solution Ni-Co alloys

10 p1795 A69-23060

Ni base superalloy stacking fault energy, studying effects of various solute additions

19 p3343 A69-35925

Stress corrosion cracking in stainless steel foils correlated with stacking fault energy and ordering, emphasizing environmental forming tendencies

19 p3350 A69-36892

Stacking fault formation probability in Ti and Zr by X ray diffraction techniques, using Fourier analysis and half-width measurements

21 p3749 A69-39600

Impurities effects on single crystal film formation of fcc metals on alkali-halide cleavage planes, stressing stacking fault energy importance

22 p3992 A69-39899

Dislocation structure of Al, Ni, Cu and Ag during creep, noting dependence of creep rate on stacking-fault energy

22 p3972 A69-41080

STACKING FAULTS

U CRYSTAL DEFECTS

STADAN [SATELLITE TRACKING NETWORK]

International 28-station global instrumentation ground support network for space tracking and data acquisition [UN PAPER 68-95912]

06 p1043 A69-17059

Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System

12 p2028 A69-25933

PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project

19 p3270 A69-36242

Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation

23 p4133 A69-41769

STAGE SEPARATION

Angular motion during first stage cut-off of Europa 1 launch vehicle from flight tests compared with theoretical predictions

03 p0519 A69-12856

Separation systems in Europa 1 booster vehicle, discussing thrust decay, ignition and control system characteristics

08 p1410 A69-21145

Space stage separation qualification of ONERA rocket vehicles based on angular perturbation measurements during variable roll speeds

10 p1669 A69-23005

Detonating fuses for separation of missile and rocket stages, noting separation ease, aftereffects, priming capability and fabrication

10 p1752 A69-23023

Transient phenomenon analysis and filtering based on stage separation tests in vacuum chamber, with emphasis on selective integration method

[ONERA-TP-684] 19 p3293 A69-35747

Pyrotechnical gas generator performance tests during Europa 1 rocket second and third stage separation, including generator design, ground and flight tests

23 p4224 A69-42153

Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration

[AAS PAPER 69-359] 24 p4418 A69-42828

STAGING [ROCKETS]

U STAGE SEPARATION

STAGNATION FLOW

Ideal gas flow near stagnation line for blunt bodies, applying van Dyke series truncation method to numerical solution

03 p0364 A69-13660

Liquid hydrazine ignition by nitrogen tetroxide gas based on stagnation flow principle, presenting threshold measurements

[WSCI PAPER 68-43] 06 p0983 A69-17792

Partially ionized argon plasma stagnation flow past blunt body using multifluid theory, obtaining flow profiles

08 p1369 A69-20817

MGD stagnation point flow, discussing relaxation region influenced by magnetic field

09 p1543 A69-21300

Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate

09 p1430 A69-21973

Stagnation flow of viscous fluid around rotating magnetized disk, determining effects on magnetic and velocity fields, currents and shear stresses

15 p2659 A69-30674

Hamiltonian variational principle for stationary bounded MHD flows, choosing suitable functions and rigid conducting boundary location

15 p2660 A69-30910

Shock detachment distance for flow around cylinders and spheres determined by microphotometric tracing of negatives of photographs of forward stagnation streamlines

17 p2949 A69-32962

Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids

21 p3697 A69-39674

Numerical methods for radiation transport for inviscid stagnation flows, detailing spectral nature of radiation emission and absorption

[AIAA PAPER 68-664] 23 p4059 A69-41890

STAGNATION POINT

Ablation rate optical measurement near stagnation point of Teflon cylinder models, noting effect of nose curvature and temperature at supersonic speed

01 p0006 A69-10758

Heat transfer near stagnation point in axisymmetric turbulent jet impinging on circular disk

02 p0354 A69-12491

Rarefied merged stagnation shock layer of hypersonic body, considering chemical reactions of nonequilibrium dissociative relaxation of air

02 p0189 A69-12521

Exact solutions for Navier-Stokes equations for nonsteady incompressible viscous flow near two dimensional or axisymmetrical stagnation point

02 p0233 A69-12527

Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models

04 p0685 A69-14736

Heat transfer between body and gas flow near stagnation point

04 p0544 A69-15412

Trailing edge velocity and stagnation points for isolated and latticed airfoils using Zhukovskii and Weing transformations

05 p0697 A69-15880

Free stream turbulence influence on stagnation zone heating in arc heated hypersonic facilities, obtaining stagnation point heating rates

[AIAA PAPER 69-167] 06 p1039 A69-18198

Nonstationary flow past spheres and cylinders in electromagnetic shock tube, determining time required for flow to become stationary

07 p1119 A69-18744

Hypersonic flow past blunt body near stagnation point, noting surface layer characterized by increased density and decreased entropy of gas

07 p1050 A69-18755

MGD stagnation point flow, discussing relaxation region influenced by magnetic field

09 p1543 A69-21300

Stagnation point heat transfer sensitivity to free stream turbulence attributed to external vorticity, noting correlation with Prandtl number

09 p1622 A69-21905

Stagnation point heat transfer for thin ablative coatings on sounding rockets in continuum supersonic and hypersonic flight regimes

10 p1808 A69-22934

Three dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two dimensional flow

10 p1727 A69-23100

Inviscid reacting flow free of molecular transport analyzed locally near stagnation point, using Lighthill-Freeman gas model

11 p1876 A69-25560

Heat and mass transfer conditions in ablation of shear thinning and thickening fluids at stagnation point

[ASME PAPER 67-HT-78] 13 p2374 A69-27778

Heat transfer at gas flow stagnation point past blunt body under radiation from air layer in shock wave wake, using gray gas model

14 p2390 A69-29614

Supersonic gas flow past wedge at zero angle of attack with separated shock wave, calculating velocity gradient at stagnation point and pressure and drag distribution

14 p2390 A69-29615

Boundary value problem in three dimensional boundary layer theory for incompressible flow near stagnation point

14 p2432 A69-29677

Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts

[AIAA PAPER 69-573] 16 p2840 A69-32677

Convective plus radiative shock tube model stagnation point heating rate measurements for planetary entry heating rate in air and Venus gas

[AIAA PAPER 69-635] 17 p2890 A69-33272

Nonequilibrium multicomponent ionization calculations for stagnation merged shock layer of hypersonic blunt body by successive accelerated replacement

[AIAA PAPER 69-655] 17 p2892 A69-33469

Heat exchange in stagnation point region of blunt body, using shock test simulation of high speed flight

18 p3086 A69-35118

Probe for spectral radiation from luminous gas-cap stagnation region to determine driver gas in test section of hypersonic shock tunnel

19 p3294 A69-35753

Axial stagnation point flow in shock wave reflected from sphere or circular cylinder, determining velocity time variation, enthalpy pressure and reflection

19 p3298 A69-36385

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc

20 p3457 A69-36981

Jupiter Great Red Spot in terms of homogeneous fluid rapid rotation, Rossby number, stagnant region, Taylor column and stratification

20 p3609 A69-38060

Unsteady aerodynamic heating at stagnation region including surface combustion in arc heated high enthalpy wind tunnel

22 p3860 A69-40597

Semianalytic solution for axisymmetrical supersonic inviscid flow near stagnation region of spherically blunted body with detached shock waves

22 p3861 A69-41178

Radiative transfer effects in low Reynolds number or merged layer regime of hypersonic flow about axisymmetric blunt bodies, including thin shock layer theory

23 p4059 A69-41885

Stagnation point Mach number gradient, sonic point location and drag coefficient of hemisphere at zero angle of incidence

23 p4060 A69-41910

Blunt body stagnation point air ionization by chemical nonequilibrium thin viscous shock layer analysis, predicting electron density

23 p4060 A69-41917

Chaplygin equation applied to eddy flow past semicylindrical surface, discussing stagnation points and boundary value problems

24 p4245 A69-43477

Convective thermal flux at stagnation point in multicomponent partially ionized gas injected flow past body, considering effective ambipolar diffusion coefficient

24 p4246 A69-43485

Heat exchange at stagnation point during interaction between underexpanded axisymmetric supersonic jet and flat obstruction, using method of characteristics

24 p4246 A69-43493

Stagnation region heat transfer with nongray subjected to external radiation using two step continuum absorption coefficient model

24 p4415 A69-43590

STAGNATION PRESSURE

Stagnation pressure losses of adiabatic flow of compressible fluids through abrupt area expansion and contraction in subsonic range, discussing base pressure

[ASME PAPER 68-WA/FE-46] 05 p0750 A69-16113

Ablation performances of asbestos phenolic and silica phenolic compared at higher stagnation pressures in wave-superheater hypersonic tunnel

12 p2119 A69-26814

Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct

15 p2549 A69-31220

Stagnation temperature determined in transition and free molecule region of rarefied gas flows from critical mass flow dependence on temperature and stagnation pressure

24 p4408 A69-43492

Choking and shock in flashing single component two phase flow in tube, including vibrational effects, predicting minimum stagnation pressure loss

[ASME PAPER 69-HT-61] 24 p4303 A69-43535

STAGNATION TEMPERATURE

Internal temperature distributions of present and proposed calorimeter geometries operating at high pressure and extreme heating rates compared, using one and two dimensional heat conduction programs

01 p0079 A69-10299

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary injection into supersonic stream

[AIAA PAPER 69-1] 06 p1039 A69-18196

Free stream turbulence influence on stagnation zone heating in arc heated hypersonic facilities, obtaining stagnation point heating rates

[AIAA PAPER 69-167] 06 p1039 A69-18198

Mixing regimes for flows with different stagnation enthalpies subject to mass flow limitation due to thermal choking

13 p2251 A69-28499

Similarity solutions for laminar compressible boundary layer with reverse flow, considering various wall/stagnation temperature ratios

15 p2591 A69-30907

Subsonic and supersonic turbulent air jets expansion over perpendicularly positioned plane disk obstacle, deriving equations for pressure distribution and stagnation temperature

18 p3123 A69-34990

Stagnation temperature determined in transition and free molecule region of rarefied gas flows from critical

STAINING

mass flow dependence on temperature and stagnation pressure
24 p4408 A69-43492

STAINING

Spectral absorption curves of hematoxylin stains in stained tissue sections of rat thyroid
01 p0015 A69-10924

STAINLESS STEELS

NT AUSTENITIC STAINLESS STEELS
NT MARTENSITIC STAINLESS STEELS

Prestraining of stainless steel En58b sheet at room and cryogenic temperature, noting effect on tensile properties
01 p0099 A69-11151

Mechanical finishing abrasion induced plastic deformation microtwinning observed in thin stainless steel films by transmission electron microscopy
02 p0251 A69-11542

Surface preparation effect on stress corrosion cracking of type 310 stainless steel wires in boiling aqueous magnesium chloride solutions
03 p0444 A69-13311

Stability of ductility and fatigue strength of stainless steel under longtime static loads in vacuum and in liquid lithium
03 p0450 A69-13912

Emissivity and other radiative characteristics of stainless steel oxides heated to various temperatures in air
03 p0453 A69-14157

Pool boiling heat transfer from stainless steel coated with Teflon to produce nonwetted surfaces
[ASME PAPER 68-WA/HT-12]
05 p0847 A69-16119

Aluminum-stainless steel wire reinforced metal matrix composites, analyzing strain hardening and plastic deformation
06 p0940 A69-16950

Nitrogen solubility measured in liquid Fe-Cr-Ni-Al alloys, noting solubility increase with increasing Al content
06 p0942 A69-17228

Stainless steel sensitization analyzed using Mossbauer spectroscopy and X ray diffraction, noting ferromagnetic phase
06 p0944 A69-17852

Passive current maxima during anodic polarization of stainless steel in sulfuric acid, using electrochemical and electron microprobes
06 p0944 A69-17853

Precipitation hardening stainless steels, discussing corrosion resistance, high strength, weldability, fabricability, heat treatment, etc
06 p0932 A69-17874

Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet
07 p1165 A69-18931

Maraging stainless steel for manufacturing liquid rocket propellant tanks, discussing composition determination and mechanical properties
07 p1166 A69-19236

Sulfite ion influence on pitting corrosion of stainless steels in sodium chloride solution
07 p1167 A69-19343

Long life creep rupture of Type 304 stainless steel for linear, Larson-Miller and Dorn parameter curves, discussing isothermal curves and creep rate
[ASM PAPER D8-9.6]
07 p1169 A69-19664

Acoustic emission from welds in stainless steel plates used for detecting defects in single and multiple pass machine welds
08 p1318 A69-19963

Weldability of precipitation-hardening stainless steels by gas tungsten arc process, discussing microstructure and shrinkage stress cracking
08 p1320 A69-20409

Ductile fracture behavior of two phase stainless steel examined by straining smoothed and notched tensile and Charpy impact specimens
08 p1333 A69-20574

Carbide precipitation in stainless steels using metal foil and extraction replicas, discussing grain boundaries corrosion relation
10 p1713 A69-23820

Highly alloyed steels weldability, considering nickel maraging and precipitation hardening stainless steels
12 p2111 A69-25829

Oxygen effects in Type 316 stainless steel, Nb-Zr alloy liquid potassium system, discussing thermal convection and forced circulation loops and corrosion rates
12 p2112 A69-25943

Hydrogen embrittlement of stainless steel and effects on mechanical properties, discussing martensitic phase role
12 p2115 A69-26616

Transition zone structure and phase composition in Ti/stainless steel bimetal as function of rolling conditions and heat treatment
13 p2283 A69-28490

Stainless steel biaxial residual surface stresses from grinding and finish machining determined by dissection technique
[ASME PAPER 68-WA/MET-9]
14 p2455 A69-29437

Chemical composition effect on Cr-Ni-Mo-Ti stainless maraging steels mechanical properties
15 p2640 A69-30631

Polyethylene stainless steel lap joints and polyethylene samples yield strengths measurements at high temperature, suggesting yield mechanism based on dislocation loops
16 p2794 A69-32573

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine
17 p2987 A69-33074

Low cycle fatigue behavior prediction for 304 and 306 stainless steels based on temperature and strain rate ratio to tensile ductility
17 p2987 A69-33079

Materials integral hemispheric radiative capacity determination based on cooling rate of thin walled specimen in vacuum, considering stainless steel, Ni and Cu
18 p3156 A69-34698
